May 20   M   University Commencement

June 3   M   Final grades for spring-term courses and full-year courses are due
A Message from the Dean

Welcome to the Graduate School of Arts and Sciences at Yale University, the first of its kind in North America. The Graduate School stands at the very heart of Yale’s mission as a university, and this publication, Programs and Policies, reveals the extraordinary breadth of opportunities for graduate study at Yale. As you peruse it, you likely will discover the intriguing ways in which graduate study differs from the undergraduate experience and the fulfillment brought by this intellectual progression. You have undertaken to explore a field in depth, master an area of inquiry, and learn to disseminate knowledge through classroom teaching. Graduate education culminates in a creative and original contribution in one’s field of study representing the ability to participate in the advancement of human knowledge.

Yale’s departments and programs constitute the center for most graduate student intellectual and social life at Yale. They comprise vital communities of scholars who share a common interest in advancing a particular discipline, and graduate students and faculty alike gain immeasurably from their intellectual and disciplinary collaborations. Yale’s excellent laboratory facilities, unique museum collections, and tremendous library holdings all enrich the experience of a Yale University graduate education.

The Graduate School of Arts and Sciences has worked to extend and enrich the community life found within these disciplines. Through interdisciplinary programs and institutes, as well as the McDougal Graduate Student Center’s seminars on teaching, writing, and career education that help graduate students prepare for their professional lives, the Graduate School enables students to connect with skilled experts with a shared commitment to careers in teaching, research, and an array of potential leadership opportunities.

Use Programs and Policies as a guide throughout your graduate study at Yale. It includes practical information about registration, financial aid, teaching experiences, University resources available to you, and the full range of assistance provided by the Graduate School. All of us in the Graduate School wish you good fortune as you pursue your advanced degree, and we want you to contact us if we can help you along the way. Graduate study is exhilarating and life-changing. For well over a century Yale has prepared men and women for truly extraordinary careers across many old, new, and evolving disciplines.

Thomas D. Pollard, M.D.
Dean, Graduate School of Arts and Sciences
Sterling Professor of Molecular, Cellular, and Developmental Biology and Professor of Molecular Biophysics and Biochemistry and Cell Biology
The Graduate School of Arts and Sciences

The Yale Graduate School of Arts and Sciences is one of fourteen schools composing Yale University and the only one that awards the degrees of Doctor of Philosophy, Master of Philosophy, Master of Arts, Master of Science, and Master of Engineering. The work of the Graduate School is carried on in the divisions of the Humanities, Social Sciences, and Biological and Physical Sciences. Fifty-five departments and programs offer courses of study leading to the Ph.D. degree. There are twenty-two programs that terminate with the master’s degree.

Yale began to offer graduate education in 1847, and in 1861 it conferred the first Ph.D. degrees in North America. In 1876 Yale became the first American university to award the Ph.D. to an African American. The Graduate School of Arts and Sciences was formally established in 1892, when the first dean was appointed. It was in that same year that women were first admitted as candidates for the doctorate.

The Graduate School community has grown vigorously since the early twentieth century; today it comprises 2,500 graduate students and a faculty of 900 who are among the world’s most distinguished teachers and scholars. Admission to the Graduate School is highly competitive; currently each entering class is made up of about 550 students.

The Graduate School’s purpose is to educate students in research, scholarship, and teaching in the arts and sciences. Under the guidance of the faculty, graduate students engage in advanced study of a discipline and then proceed to generate new knowledge and ideas through research. They learn to disseminate this knowledge in scholarly publications and teaching. Yale’s graduate students have built careers in colleges and universities, research laboratories, government, the nonprofit sector, and private industry. Their education equips them for leadership roles in all these callings.

Yale’s standing as a great international research university is based on the strength and attractiveness of its graduate programs. The pursuit of advanced learning and new knowledge takes place in the departments and programs of the Graduate School. Thus it is the Graduate School that makes Yale a university. Furthermore, graduate students as scholars in training and apprentice teachers engage with undergraduates and the faculty. A shared sense of common purpose makes Yale a community of scholars, and a place for an unusually intimate exchange of ideas.

MISSION STATEMENT

The mission of the Graduate School of Arts and Sciences is to seek students of the highest intellectual promise and achievement of all backgrounds, from across the nation and around the world, and to educate them to be scholars, teachers, and leaders for many sectors of society. The larger aim of this enterprise is to prepare and stimulate each new generation to perpetuate and advance human knowledge and to contribute to the health and development of the human community.
YALE AND THE WORLD

The Yale Graduate School has always comprised an international community, but it recognizes as well that now, more than ever, advanced scholarship must occur on transnational grounds. It is increasingly important that we prepare our students to participate in a global economy of research and knowledge and that we create institutional channels through which such participation can flourish. In addition to formal student exchanges that enable graduate students to perform research and fieldwork abroad, individual faculty members, departments, and the School participate in collaborative efforts with international partners.

Approximately one-third of full-time graduate students at Yale come from outside the United States. In addition, many international students come to the Graduate School as nondegree students in the Division of Special Registration (DSR). DSR students may undertake course work and/or research for periods of one term or one year. When appropriate the period may extend for a second year. These students are subject to the usual admissions procedure, are admitted to a department, and often work with a specific faculty member. See International Student Life for additional information regarding international student life at Yale.

A Global University

In a speech entitled “The Global University,” Yale President Richard C. Levin declared that as Yale enters its fourth century, its goal is to become a truly global university—educating leaders and advancing the frontiers of knowledge not simply for the United States, but for the entire world: “The globalization of the University is in part an evolutionary development. Yale has drawn students from outside the United States for nearly two centuries, and international issues have been represented in its curriculum for the past hundred years and more. But creating the global university is also a revolutionary development—signaling distinct changes in the substance of teaching and research, the demographic characteristics of students, the scope and breadth of external collaborations, and the engagement of the University with new audiences.”

Yale University’s goals and strategies for internationalization are described in a report entitled “International Framework: Yale’s Agenda for 2009 to 2012,” which is available online at www.world.yale.edu/framework.

International activity is coordinated by several University-wide organizations in addition to the efforts within the individual schools and programs.

The Office of International Affairs (OIA) supports the international activities of all schools, departments, offices, centers, and organizations at Yale; promotes Yale and its faculty to international audiences; and works to increase the visibility of Yale’s international activities around the globe. See http://world.yale.edu/oia.

The Office of International Students and Scholars (OISS) is a resource on immigration matters and hosts orientation programs and social activities for the University’s international community. See description in this bulletin and www.yale.edu/oiss.

The Whitney and Betty MacMillan Center for International and Area Studies is the University’s principal agency for encouraging and coordinating teaching and research on
international affairs, societies, and cultures. See description in this bulletin and www.yale.edu/macmillan.

Opened in fall 2010, the Jackson Institute for Global Affairs seeks to institutionalize the teaching of global affairs throughout the University and to inspire and prepare Yale students for global citizenship and leadership. See http://jackson.yale.edu.

The Yale Center for the Study of Globalization draws on the intellectual resources of the Yale community, scholars from other universities, and experts from around the world to support teaching and research on the many facets of globalization, and to enrich debate through workshops, conferences, and public programs. See www.ycsg.yale.edu.

The Yale World Fellows Program hosts fifteen emerging leaders from outside the United States each year for an intensive semester of individualized research, weekly seminars, leadership training, and regular interactions with the Yale community. See www.yale.edu/worldfellows.

For additional information, the “Yale and the World” Web site offers a compilation of resources for international students, scholars, and other Yale affiliates interested in the University’s global initiatives. See www.world.yale.edu.

THE DEAN

Thomas D. Pollard, M.D., 112 HGS, 203.432.2733, grad.dean@yale.edu

The dean of the Graduate School is appointed by the president of the University and is responsible for the educational mission of the Graduate School, its faculty, the quality of its programs, and the welfare of graduate students.

ASSOCIATE AND ASSISTANT DEANS

FOR ACADEMIC AFFAIRS

Pamela Schirmeister, Associate Dean, 136 HGS, 203.432.7598, pamela.schirmeister@yale.edu

Richard G. Sleight, Associate Dean, 132 HGS, 203.432.2744, richard.sleight@yale.edu

Allegra di Bonaventura, Assistant Dean, 135 HGS, 203.436.2628, allegra.dibonaventura@yale.edu

Robert Harper-Mangels, Assistant Dean, 133 HGS, 203.432.1884, robert.harper-mangels@yale.edu

Carl Hashimoto, Assistant Dean, 114 HGS, 203.432.6814, carl.hashimoto@yale.edu

The academic deans of the Graduate School are responsible for the administration of graduate programs, normally in consultation with the directors of graduate studies, and for the academic and personal well-being of students. They participate in decisions regarding admissions, financial aid, academic performance, and the application of the regulations and policies of the Graduate School.

Dean Schirmeister and Dean di Bonaventura oversee Ph.D. and terminal master’s programs in African American Studies; African Studies; American Studies; Archaeological Studies; Architecture; Classics; Comparative Literature; East Asian Languages and Literatures; East Asian Studies; Economics; English Language and Literature; European
and Russian Studies; Film Studies; French; Germanic Languages and Literatures; History; History of Art; History of Science and Medicine; International and Development Economics; International Relations; Italian Language and Literature; Law; Management; Medieval Studies; Music; Near Eastern Languages and Civilizations; Philosophy; Political Science; Religious Studies; Renaissance Studies; Slavic Languages and Literatures; Sociology; and Spanish and Portuguese.

Dean Sleight, Dean Harper-Mangels, and Dean Hashimoto oversee Ph.D. and terminal master’s programs in Anthropology; Applied Mathematics; Applied Physics; Astronomy; Biological and Biomedical Sciences; Biomedical Engineering; Cell Biology; Cellular and Molecular Physiology; Chemical & Environmental Engineering; Chemistry; Computational Biology and Bioinformatics; Computer Science; Ecology and Evolutionary Biology; Electrical Engineering; Experimental Pathology; Forestry & Environmental Studies; Genetics; Geology and Geophysics; Immunobiology; Investigative Medicine; Linguistics; Mathematics; M.D./Ph.D. Program; Mechanical Engineering & Materials Science; Microbiology; Molecular Biophysics and Biochemistry; Molecular, Cellular, and Developmental Biology; Neurobiology; Neuroscience; Nursing; Pharmacology; Physics; Psychology; Public Health; and Statistics.

DIRECTORS OF GRADUATE STUDIES (DGS)

A senior faculty member, appointed by the dean, serves as director of graduate studies (DGS) for each department or program. The directors of graduate studies are responsible for the satisfactory administration of the programs of graduate study and function as advisers and guides to all graduate students in their respective departments and programs. They help graduate students to plan an appropriate course of study and research, and advise on and approve course schedules. The DGS acts as the liaison between each student in the department or program and the Office of the Dean.

DIVERSITY AND EQUAL OPPORTUNITY

Michelle Nearon, Assistant Dean, Director, 127 HGS, 203.436.1301
www.yale.edu/graduateschool/diversity

The Office for Diversity and Equal Opportunity’s mission is to expand the diversity of the student body and to enhance the intellectual experience of the entire scholarly community. The office coordinates efforts to recruit and retain students of color, women, and other diverse groups at Yale Graduate School. The assistant dean works collaboratively with departments and programs to support the needs of these students as they pursue graduate study. The assistant dean advises prospective and current minority graduate students, directs the Summer Undergraduate Research Fellowship (SURF) Program, oversees Diversity Recruitment Days, writes and administers grants, and provides reports on the Graduate School’s progress in recruiting and retaining diverse students. Graduate Diversity Fellows within the office are also appointed annually to assist the office in the development and implementation of a wide array of programs, such as application seminars, mentoring programs, discussions and lectures presented by diverse scholars, and social and cultural events. An Advisory Committee, appointed by the dean, meets regularly to discuss and review the office’s programmatic efforts.
MCDOUGAL GRADUATE STUDENT CENTER

Hall of Graduate Studies, 203.432.BLUE (2583)
www.yale.edu/graduateschool/mcdougal

A generous gift from Mr. Alfred McDougal ’53, a Yale alumnus, and his wife, Ms. Nancy Lauter, enabled Yale to create the McDougal Graduate Student Center in 1997. The McDougal Center provides space and programs for building intellectual, cultural, and social community, as well as facilitating professional development activities across the departments of the Graduate School.

Graduate Career Services

Victoria A. Blodgett, Assistant Dean and Director, 122 HGS, 203.432.7375,
mcdougal.careers@yale.edu
www.yale.edu/mcdougal/careers

Graduate Career Services (GCS) assists currently enrolled students of the Graduate School and its alumni with career education, decision making, and job search planning. Offerings include individual advising, workshops and programs, guest speakers, employer visits and information sessions, interview practice, print resources, and career-related Web links. The GCS director consults with directors of graduate studies to develop programs that supplement the department’s role in the professional development of students pursuing an academic career. For graduate students considering careers beyond the professoriate, the director and Career Services McDougal Fellows initiate programs and develop links with employers who seek graduate students’ skills. Students and alumni place requests through Interfolio to transmit their dossiers to employers, agencies, and schools considering them for permanent or short-term positions, and for grants and fellowships. Students are encouraged to begin using the services of the office and attending career and professional development programs and events early in their graduate careers in order to increase their opportunities upon the completion of their degree. Students interested in the activities planned by the GCS should visit the Web site to view the calendar of events and subscribe to the weekly GCS newsletter.

Graduate Student Life

Lisa Brandes, Assistant Dean for Student Affairs and Director, 126 HGS, 203.432.2583,
mcdougal.center@yale.edu
Jennifer Mendelsohn, Associate Director, 125 HGS, 203.432.2583,
mcdougal.center@yale.edu
www.yale.edu/mcdougal/studentlife

The Office of Graduate Student Life is responsible for student life programs in the McDougal Center and student services in the Graduate School. McDougal Graduate Fellows and staff produce a wide array of student life programs, including concerts; arts, literary, music, sports, and cultural events; health and wellness programs; outings; family activities and resources; international student events; religious and spiritual events; public service opportunities; and monthly happy hours, dances, and events for various
student groups. Graduate Student Life provides advice and support to graduate student organizations, which may sponsor events at the center. Activities are announced in the weekly e-mail McDougal Life Notes, through specialized e-mail lists, and on the McDougal Center Student Life Web calendar at the site listed above. This office also oversees the facilities and general services of the McDougal Center, including meeting rooms and room requests, online ticket sales, and lockers.

The assistant dean for student affairs coordinates general campus services for graduate students, serving as the student advocate and departmental liaison for graduate housing, dining services, health services, athletics, security, chaplains, child care, and parking and transit. The assistant dean and staff are available to answer questions or help with any problems that students may have, including speaking individually about issues concerning their life at Yale and other personal matters and concerns. The Graduate Student Life office also organizes recruitment activities, new student orientation, and other events for the Graduate School community, including the Graduate School’s participation in the University’s Commencement exercises.

**McDougal Graduate Teaching Center**

William C. Rando, Assistant Dean and Director, 120B HGS, 203.432.2583, william.rando@yale.edu, mcdougal.teaching@yale.edu

Kristin Rudenga, Associate Director, Science Education, 120A HGS, 203.432.2583, mcdougal.teaching@yale.edu

www.yale.edu/mcdougal/teaching

The Graduate Teaching Center offers a full range of training, consultation, and development services to teachers and teaching fellows at Yale. The director and staff of fifteen graduate teaching consultants are available throughout the year and in a variety of capacities, providing assistance and training for brand-new teachers as well as experienced members of the faculty. Each year the center offers a comprehensive program of teaching workshops, dealing with topics such as effective discussion leading, classroom management, lecturing, and course design. The center also organizes four- to six-week courses in the fundamentals of teaching in each of four areas: humanities, social sciences, sciences, and foreign languages. Through its Spring Teaching Forum and lecture series, the GTC also provides a venue for members of the Yale community to discuss issues in undergraduate education and to explore the latest in teaching innovation. Anyone teaching at Yale can contact the center for an individual consultation at any time. Classroom visitations and videotaping are also available. The GTC works closely with academic departments to design discipline-specific training for teaching fellows and new faculty. The GTC publishes *Becoming Teachers: The Graduate Student Guide to Teaching at Yale* as well as *Tales from the Classroom*, which presents teaching cases from Yale as short, illustrated comics. Graduate students interested in the activities organized by the GTC should visit the Web site listed above and sign up for the GTC listserv, Teaching Notes.
McDougal Graduate Writing Center

Elena D. Kallestinova, Assistant Dean and Director, 35 Broadway, Rm. 210, 203.432.7725, elena.kallestinova@yale.edu, grad.writing@yale.edu
www.yale.edu/graduateschool/writing

The Graduate Writing Center helps graduate students develop as successful academic writers. The center offers support and assistance through a full range of services including individual consultations, academic writing workshops, discussion panels, dissertation writing groups, and department-specific programs. Graduate student writing advisers are available throughout the academic year for individual consultations in which they provide feedback on written course work, grant proposals, fellowship applications, prospectuses, and dissertation chapters. In addition, the center offers a comprehensive program of workshops relating to topics of academic writing and publishing. The center also organizes regular writing events that help students with the process of dissertation writing. For a complete list of the offered programs, please see the Writing Center Web site and the newsletter circulated among graduate students by e-mail.

ADMISSIONS

Robert Colonna, Director, 117B HGS, 203.432.2771, graduate.admissions@yale.edu
Lisa Furino, Assistant Director, 117A HGS, 203.432.2771, graduate.admissions@yale.edu
www.yale.edu/graduateschool/admissions

The Office of Graduate Admissions coordinates and oversees all aspects of application to the Graduate School for individuals seeking master’s and doctoral degrees, as well as for nondegree study. The office also works with the associate deans and academic departments to provide relevant information and decisions to applicants.

BUSINESS OPERATIONS

Jane Lee, Director, 114 HGS, 203.432.7664, jane.lee@yale.edu

The Office of Business Operations is responsible for all financial transactions in the Graduate School, overseeing both financial aid and operating activities. Working with the dean and others, the office develops and monitors all Graduate School budgets and expenditures, maintaining compliance with internal and external policies and regulations. The office provides support to the dean and Graduate School supervisory staff in hiring, training, and related human resources activities of the School. The office is a resource to Graduate School, University, and external organizations seeking interpretation of policies and regulations, providing guidance about procedures, reporting, and interactive systems.
FINANCIAL AID
Jennifer Brinley, Director, 129 HGS, 203.432.7980, jennifer.brinley@yale.edu
www.yale.edu/graduateschool/financial

The Office of Financial Aid is a resource to graduate students, departments, and non-Yale organizations needing guidance or assistance regarding financial aid policies and the administration of fellowships and student loan programs. The office oversees and maintains financial and data management systems and disburses all graduate student financial aid.

REGISTRAR’S OFFICE
Stephen Goot, Deputy Registrar, 246 Church Street, 203.432.2743, stephen.goot@yale.edu

The Office of the Registrar maintains the academic records of all students in the Graduate School. In addition, the office develops course and classroom schedules and oversees registration, tuition charges, academic holds, dissertation submission, final clearance at graduation, and release of diplomas for Commencement. Students should consult this office to report changes in name or Social Security number, to request transcripts, or to certify their enrollment in the Graduate School. Students can change their address listing at www.yale.edu/sis.

TEACHING FELLOW PROGRAM
Judith Dozier Hackman, Director, 139 HGS, 203.432.2757, judith.hackman@yale.edu
Howard el-Yasin, Assistant Director, 139 HGS, 203.432.2757, howard.el-yasin@yale.edu

The Teaching Fellow Program is the principal framework at Yale in which graduate students learn to become effective teachers. Learning to teach and to evaluate student work is fundamental to the education of graduate students. The Teaching Fellow Program provides opportunities for graduate students to develop teaching skills, under faculty guidance, through active participation in the teaching of Yale undergraduates. Teaching fellows who encounter problems or difficulties related to their teaching roles are encouraged to meet with the director of the Teaching Fellow Program or their associate dean.

COMMITTEES
Currently four standing committees are concerned with the policies and procedures of the Graduate School; as with all standing committees, their deliberations are confidential. Student members of these committees are selected by the Graduate Student Assembly.

The Executive Committee A committee of faculty members and graduate students, chaired by the dean, advises the dean on broad matters of policy and procedure and makes recommendations to the faculty of the Graduate School.

The Degree Committees There are three degree committees, serving the divisions of Humanities, Social Sciences, and Biological and Physical Sciences. The degree committees, composed of members of the division’s faculty and chaired by the dean, meet twice a
year and are responsible to the faculty of the Graduate School for maintaining standards of graduate education in the School and for recommending candidates for degrees. They review special academic problems of individual students and, when appropriate, the educational programs of the departments.

**Dean's Advisory Committee on Student Grievances** Composed of three graduate students, three faculty members, normally one from each division, and one administrator of the Graduate School, the committee reviews complaints brought by graduate students against a member of the faculty or administration of the Graduate School (see Grievance Procedures, under Policies and Regulations).

**The Committee on Regulations and Discipline** Composed of three graduate students, three faculty members, normally one from each division, and an associate dean, the committee reviews violations of the regulations governing academic and personal conduct (see Personal Conduct, under Policies and Regulations).

**GRADUATE STUDENT ASSEMBLY (GSA)**

B43 HGS, 203.432.8893, gsa@yale.edu

www.yale.edu/gsa

Students in the Graduate School are represented collectively by the Graduate Student Assembly, which provides a forum for students to address issues across the Graduate School and University. It consults with the dean and other administrators on proposed changes in Graduate School policy, raises concerns expressed by the student body, nomi- nates the student members of all Graduate School standing committees, and administers a conference travel fund for graduate students. Representatives to the assembly are elected by students in individual departments and degree programs. Each department or program has at least one student representative, with additional representatives allotted proportionally by size of the student population.

**GRADUATE-PROFESSIONAL STUDENT SENATE (GPSS)**

gpss@yale.edu

www.yale.edu/gpss

The Graduate and Professional Student Senate (GPSS) is composed of elected representatives from each of the thirteen graduate and professional schools at Yale. Any student in one of these schools is eligible to run for a senate seat during fall elections. As a governing body, the GPSS advocates for student concerns and advancement within Yale, represents all graduate and professional students to the outside world, and facilitates interaction and collaboration among the schools through social gatherings, academic or professional events, and community service. GPSS meetings occur on alternating Thursdays and are open to the entire graduate and professional school community, as well as representatives from the Yale administration. GPSS also oversees the management of the Graduate-Professional Student Center at Yale (GPSCY), located at 204 York Street. GPSCY provides office and event space for GPSS and other student organizations and houses Gryphon’s Pub.
Degree-Granting Departments and Programs

This section provides information on all degree-granting departments and programs of the Graduate School of Arts and Sciences. Each listing provides a roster of faculty, special admissions and degree requirements, and course offerings for that department or program. The requirements appearing in the *Graduate School of Arts and Sciences Programs and Policies* take precedence over any statements published separately by individual departments and programs.

The degree requirements of the Graduate School itself appear later in this publication, under Policies and Regulations. These apply to all students in the Graduate School, although there are variations in the pattern of their fulfillment in individual departments and programs. The requirements of the Graduate School may change from time to time. If a requirement changes within the period normally required for completion of a student’s course of study, the student will normally be given the choice of completing either the new or the old requirement.

The requirements of individual departments also may change from time to time, with the approval of the Graduate School. After such approval has officially been given, students in that department or program will receive written notification. All changes in departmental degree requirements occurring after the publication closing date of the *Graduate School of Arts and Sciences Programs and Policies* are posted in the Faculty of Arts and Sciences Registrar’s Office, 246 Church Street, third floor.

The course listings and instructors that follow reflect information received by the registrar as of the publication date and are subject to change without notice. Students are advised to consult www.yale.edu/oci for the most recent information.

Fall-term courses are indicated by the letter “a,” spring-term courses by the letter “b.” Yearlong courses have no letter designation or list both “a” and “b.” Course numbers followed by a superscript “u” are also open to undergraduates in Yale College. Courses in brackets are not offered during the current academic year.
AFRICAN AMERICAN STUDIES
81 Wall Street, 203.432.1170
www.yale.edu/afamstudies
M.A., M.Phil., Ph.D.
Chair
Elizabeth Alexander

Director of Graduate Studies
Glenda Gilmore (81 Wall St., glenda.gilmore@yale.edu)

Professors  Elizabeth Alexander, Elijah Anderson, David Blight, Hazel Carby,
M. Kamari Clarke, Glenda Gilmore, Jacqueline Goldsby, Jonathan Holloway, Matthew
Jacobson, Gerald Jaynes, Kobena Mercer, Christopher L. Miller, Joseph Roach, Robert
Stepto (on leave [F]), John Szwed (Emeritus), Robert Thompson, Emilie Townes (on
leave), Michael Veal

Associate Professor  Terri Francis

Assistant Professors  Jafari Allen, GerShun Avilez, Crystal Feimster, Erica James (on
leave), Paige McGinley, Anthony Reed, Edward Rugemer, Vesla Weaver

Lecturers  Kathleen Cleaver, Flemming Norcott, Deborah Thomas

Fields of Study
The Department of African American Studies offers a combined Ph.D. in conjunction
with several other departments and programs. Departments and programs that currently
offer a combined Ph.D. with African American Studies are: American Studies, Anthropol-
yogy, English, Film Studies, French, History, History of Art, Political Science, Psychology,
Religious Studies, Sociology, and Spanish and Portuguese. Within the field of study, the
student will select an area of concentration in consultation with the directors of graduate
studies of African American Studies and the joint department or program. An area of
concentration in African American Studies may take the form of a single area study or a
comparative area study: e.g., Caribbean or African American literature, a comparison of
African American literature in a combined degree with the Department of English; an
investigation of the significance of the presence of African cultures in the New World,
either in the Caribbean or in Latin and/or South America in a combined degree with the
Spanish and Portuguese department. An area of concentration may also follow the fields
of study already established within a single discipline: e.g., race/minority/ethnic studies
in a combined degree with Sociology. An area of concentration must either be a field of
study offered by a department or fall within the rubric of such a field. Please refer to the
description of fields of study of the prospective joint department or program.

Special Admissions Requirements
Strong undergraduate preparation in a discipline related to African American studies;
writing sample; description of the fields of interest to be pursued in a combined degree.
This is a combined degree program. To be considered for admission to this program you
must indicate both African American Studies and one of the participating departments/programs listed above. Additionally, please indicate both departments on all supporting documents (personal statement, letters of recommendation, transcripts, etc.).

**Special Requirements for the Ph.D. Degree**

Students will be subject to the combined Ph.D. supervision of the African American Studies department and the relevant participating department or program. The student's academic program will be decided in consultation with an adviser, the director of graduate studies of African American Studies, and the director of graduate studies of the participating department or program and must be approved by all three. Students are required to take five courses in African American Studies, generally at least one course each term. Any variance in scheduling requires DGS approval. Core courses are (1) Theorizing Racial Formations (AFAM 505a/AMST 643a), which is a required course for all first-year graduate students in the combined program, and (2) Dissertation Prospectus Workshop (AFAM 895), a two-term course, which graduate students in their third year of study must satisfactorily complete. This workshop is intended to support preparation of the dissertation proposal; each student will be required to present his or her dissertation prospectus orally to the faculty and to turn in a written prospectus draft by the end of spring term. Three other graduate-level African American Studies courses are required: (1) a history course, (2) a social science course, and (3) a course in literature or culture.

Qualifying examinations and the dissertation proposal will be administered jointly by the program and participating department and must be passed within the time required by the participating department. The total number of courses required will adhere to the requirements of the participating department or program. Each student must complete the minimum number of courses required by the participating department or program; African American Studies courses (excepting the dissertation prospectus workshop) count toward the participating department’s or program’s total. For details of these requirements, see the special requirements of the combined Ph.D. for the particular department printed in this bulletin. Students will be required to meet the foreign language requirements of the participating department (see Degree Requirements under Policies and Regulations). Students will not be admitted to candidacy until all requirements, including the dissertation prospectus, have been met and approved by the Graduate Studies Executive Committee of the African American Studies department and the participating department. If a student intends to apply for this combined Ph.D. in African American Studies and another department, he or she should contact the prospective department and request a description of all Ph.D. requirements and courses.

The faculty in African American Studies consider teaching to be an essential component of graduate education, and students therefore will teach in their third and fourth years.

**Master’s Degrees**

**M.Phil.** See Degree Requirements under Policies and Regulations.

**M.A. (en route to the joint Ph.D.)** Students will be awarded a combined M.A. degree in African American Studies and the relevant participating department or program upon
successful completion of all course work except the Dissertation Prospectus Workshop, which is taken in the student’s third year of study. See also Degree Requirements under Policies and Regulations.

For further information, see the African American Studies Web site at www.yale.edu/afamstudies.

Courses

AFAM 505a/AMST 643a, Theorizing Racial Formations  Elizabeth Alexander
A required course for all first-year students in the joint Ph.D. program in African American Studies; also open to students in American Studies. This interdisciplinary reading seminar focuses on new work that is challenging the temporal, theoretical, and spatial boundaries of the field. T 9:25–11:15

AFAM 588bU/AMST 710bU/ENGL 948bU, Autobiography in America  Robert Stepto
At least a dozen North American autobiographies are studied, mostly from the “American Renaissance” to the present. Discussion of various autobiographical forms and strategies as well as of various experiences of American selfhood and citizenship. Slave narratives, spiritual autobiographies, immigrant narratives, autobiographies of childhood or adolescence, relations between autobiography and class, region, or occupation. M 1:30–3:20

AFAM 647b/ANTH 591b/WGSS 689b, Black Feminist Theory and Praxis  Jafari Allen
In this course we analyze black feminisms as both political space and scholarly choice. This framework enables us to examine the continuities between black feminist and womanist theorizing in diverse locations, and to explore how different embodied experiences—including genders, histories, geographies, and genealogies—condition divergent perspectives. Themes explored include slavery, colonialism, diaspora consciousness, multiple genders and sexualities, class difference and inequities of power within black communities; representation in popular culture; state violence; poetics and resistance. We employ a transdisciplinary perspective—including anthropology, history, sociology, literature, and film—and challenge notions of “theory” as the province of the West (and North) and the middle class. TH 3:30–5:20

AFAM 673bU/FILM 712bU, The Filmworks of Spike Lee  Terri Francis
Survey of Spike Lee’s films and writings, in the contexts of African American cultural movements and American independent films. TH 3:30–5:20, screenings W 7–9:30

AFAM 709b/AMST 709b/HIST 736b/WGSS 736b, Research in U.S. Political and Social History after 1865  Glenda Gilmore
Projects chosen from the post-Civil War period, with emphasis on twentieth-century social and political history, broadly defined. Research seminar. TH 9:25–11:15

AFAM 717aU/FILM 715aU, African American Cinema  Terri Francis
A survey of African American cinema from Oscar Micheaux’s Within Our Gates (1919) to Julie Dash’s Daughters of the Dust (1991) and beyond. Topics include the concept of a black aesthetic, the relationship between commercial and independent filmmaking practices, and the question of genre. TH 3:30–5:30, screenings M 7–9
AFAM 727a/HSAR 780a, Running Backs and Wide Receivers: The Influence of African Dance on American Sport  Robert Thompson

Starting with an intensive study of the main organizing principles in African dance and their variations among four key civilizations, Mandé, Yorùbá, Igbo, and Kongo, the seminar systematically compares these traits and gestures first with key black American dancing and then with action styles in black American sport. Emphasis is given to the transformation of soccer by the black superstar Pelé, and black influence in the reshaping of NFL football. TH 3:30–5:20

AFAM 728b/AFST 778bu/HSAR 778bu, From West Africa to the Black Americas: The Black Atlantic Visual Tradition  Robert Thompson

Art, music, and dance in the history of key classical civilizations south of the Sahara—Mali, Asante, Dahomey, Yorùbá, Ejagham, Kongon—and their impact on the rise of New World art and music. TTH 11:35–12:50

AFAM 729a/HSAR 779a, New York Mambo: Microcosm of Black Creativity  Robert Thompson

Art, music, and dance in the history of key classical civilizations of the world of New York mambo and salsa. Emphasis on Palmieri, Cortijo, Roena, Harlow, and Colón. Examination of panel traditions such as New York Haitian art, Dominican merengue and rastas of Jamaican Brooklyn, and the New York school of Brazilian capoeira. TTH 11:35–12:50

AFAM 733b/AMST 678b/HIST 717b, Readings on Slavery in the Americas to 1800  Edward Rugemer, Alejandra Dubcovsky

This reading course examines the histories and historiographies of the slave systems of the Americas from about 1500 to 1800. The course has a broad geographical scope, moving away from national histories and engaging with hemispheric, Atlantic, and world history paradigms. T 9:25–11:15

AFAM 734b/FILM 719b/WGSS 632b, Film Race Gender  Terri Francis

Film aesthetics and intellectual history of African American cinema. Shifting views on race/racism and gender/sex/sexism within the overall context of the Hollywood industry. American independent/experimental filmmaking practices and African diaspora aesthetics. African American cinema as a case of cross-cultural contact, complicity, and creativity. Issues of stereotypes, authorship, and performance. Shared problematics and passions between African American film and literature. Film positioned less as a window and more as a palimpsest, a refracting medium with its own aesthetics and, within its own traditions, working over “race” and perceptions of particular cultures through plot devices, lighting, and sound, in particular, often in unexpected ways. Films alongside materials drawn from film, drama, literature, social history, journalism, television, photography, painting, dance, and other arts. Special unit on Josephine Baker, embodying the crucial conceptual bridge between black modernism and primitivism and between American race films and European colonial films. Baker through the lens of a recast Harlem Renaissance that emphasizes the modernist concerns of the body, life as art, migration, memory, and intercultural collaboration in a multidisciplinary canon. Readings from canonical, controversial, and recent publications in African American studies, film and media studies, and gender/sexuality studies. Oscar Micheaux and his circle, the L.A. Rebellion, “New” Black Cinema, and beyond. W 3:30–5:20
AFAM 736a/HSAR 785a/WGSS 788a, Bodies and Borders: Sexuality, Race, and Representation  Kobena Mercer
Introducing methods from cultural studies, postcolonial studies, and psychoanalysis, this seminar examines representations of black bodies in modern art and visual culture. Abolitionist, Orientalist, and primitivist painting and sculpture are investigated through concepts of fetishism, fantasy, and the gaze, and in light of post-1960s artistic practices addressing interracial border zones as sites of cross-cultural hybridity. Artists include Carl Van Vechten, Wifredo Lam, Adrian Piper, Robert Mapplethorpe, Kara Walker, and Renee Cox; texts include Mikhail Bakhtin, Homi Bhabha, Frantz Fanon, and Griselda Pollock. TH 1:30–3:20

AFAM 738a/AMST 706a/HIST 711a/WGSS 716a, Readings in African American Women's History  Crystal Feimster
The diversity of African American women's lives from the colonial era through the late twentieth century. Using primary and secondary sources we explore the social, political, cultural, and economic factors that produced change and transformation in the lives of African American women. Through history, fiction, autobiography, art, religion, film, music, and cultural criticism we discuss and explore the construction of African American women's activism and feminism; the racial politics of the body, beauty, and complexion; hetero- and same-sex sexualities; intraracial class relations; and the politics of identity, family, and work. TH 9:25–11:15

AFAM 741b/HSAR 777b, Mambo in the Media, 1949–2011  Robert Thompson
The impact of a midcentury dance on novels, films, aesthetic criticism, photography, and painting from 1949 to 2011. Discussion includes the novels of Jack Kerouac, Carlos Fuentes, and Gonzalo Martré; the films of Almodóvar and Fellini; and the history of mambo dance in Havana, Mexico City, New York, Tokyo, and London. TH 3:30–5:20

AFAM 743bu/AMST 654bu/ENGL 845bu, American Artists and the African American Book  Robert Stepto
The visual art, decoration, and illustration of African American books (prose and poetry) since 1900. Topics include book art of the Harlem Renaissance (with special attention to Aaron Douglas and Charles Cullen), art imported to book production (e.g., Archibald Motley's paintings used as book art), children's books (e.g., I Saw Your Face by Kwame Dawes with drawings by Tom Feelings; Ntozake Shange's Ellington Was Not a Street, illus. by Kadir Nelson), photography and literature (e.g., Paul Laurence Dunbar's Cabin and Field, with Hampton Institute photographs; Richard Wright's 12 Million Black Voices). The seminar includes sessions at Beinecke Library and encourages research projects in the Beinecke's holdings, especially the James Weldon Johnson collection. W 1:30–3:20

AFAM 745b/HSAR 786b, Black Atlantic Visual Arts since 1980  Kobena Mercer
Surveying developments by which African American and Black Atlantic artists have questioned the core tenets of twentieth-century modernism, this seminar explores aesthetic strategies alongside contextual shifts from multiculturalism to globalization, thus introducing contemporary conceptions of diaspora. Artists include Alison Saar, Kerry James Marshall, Glenn Ligon, Keith Piper, Lorna Simpson, Fred Wilson, Yinka Shonibare, Kehinde Wiley, Mickalene Thomas; texts include Guy Brett, Okwui Enwezor, Jean Fisher, Nikos Papastergiadis, Michele Wallace, Judith Wilson. TH 1:30–3:20
AFAM 746a/AMST 671a/HIST 710a, Black Politics and Performance in the Twentieth-Century United States  Jonathan Holloway, Paige McGinley
This course examines black politics and performance from the New Negro Renaissance to the Los Angeles Uprising. Bringing together methods from history and performance studies, the course focuses on questions of race, citizenship, memory, and movement within the framework of black cultural politics. The course moves across many modes of cultural and artistic production, from the Federal Theater Project to the essays of James Baldwin to the verbatim theater of Anna Deavere Smith. TH 1:30–3:20

AFAM 757a/AMST 722a/HIST 722a, Research Seminar in Nineteenth-Century U.S. History  David Blight
Some class sessions focus on matters of craft: research techniques, styles of writing narrative and analysis; judging scholarly work; and philosophical dimensions of doing history in the early twenty-first century. The primary focus of course is for each student to complete his/her own major research paper. Students in any field of American history are welcome. W 9:25–11:15

AFAM 764b/AMST 715b/HIST 715b, Readings in Nineteenth-Century America  David Blight
The course explores recent trends and historiography on several problems through the middle of the nineteenth century: sectionalism; expansion; slavery and the Old South; northern society and reform movements; Civil War causation; the meaning of the Confederacy; why the North won the Civil War; the political, constitutional, and social meanings of emancipation and Reconstruction; violence in Reconstruction society; the relationships between social/cultural and military/political history; problems in historical memory; the tension between narrative and analytical history writing; and the ways in which race and gender have reshaped research and interpretive agendas. W 1:30–3:20

AFAM 773a or b/SOCY 630a or b, Workshop in Urban Ethnography  Elijah Anderson
The ethnographic interpretation of urban life and culture. Conceptual and methodological issues are discussed. Ongoing projects of participants are presented in a workshop format, thus providing participants with critical feedback as well as the opportunity to learn from and contribute to ethnographic work in progress. Selected ethnographic works are read and assessed. M 11:30–1:20

AFAM 807a/ENGL 942a, African American Literary Criticism and Theory  Jacqueline Goldsby
In this course we survey works that have shaped current research and critical debates in African American literary studies. What categories and methods of analysis presently structure the field’s critical imaginary? What texts—or, more precisely, what kinds of texts—comprise the canon of African American literary studies, and what theoretical cases are made for those works of art? How might these projects lead you to shape your own critical pursuits? Studies may include Elizabeth McHenry on the literary societies and reading practices among free blacks during slavery; Daphne Brooks on transatlantic “performances of freedom” during the late nineteenth and early twentieth centuries; Brent Edwards on the Harlem Renaissance’s translation to (and reconfiguration in) the
scene of 1920s Paris; Lawrence Jackson’s “narrative history” of mid-twentieth-century African American writing; Candice Jenkins on the “politics of respectability” in contemporary black women’s writing; Madhu Dubey on the anxieties and aesthetics that animate black postmodern fiction; Kenneth Warren on the politics of canon formation and periodization. Also, since the Birmingham School’s cultural studies approach has proven decisive to the field’s development in the past two decades, we discuss its migration from England to the U.S. academy through select works by Stuart Hall, Hazel Carby, and Paul Gilroy. We read mostly monographs. Article-length works are defined through independent reading shaped by students’ research interests. Students write three short book reviews, lead class discussions, and submit a longer review essay. W 9:25–11:15

AFAM 811b/PLSC 866b, Race and the Politics of Punishment  Vesla Weaver
In this course, we explore the rise of the carceral state in America and its implications for minorities, particularly the black urban underclass. We examine how punishment and surveillance and crime discourse have changed over time, debate the explanations for black mass incarceration, and consider its effects for the political lifeworlds of black communities. F 9:25–11:15

AFAM 816a/AMST 657a/WGSS 816a, Place and Space in Caribbean Literature, Theory, and Ecology  Hazel Carby
Readings are drawn from twentieth-century Caribbean literature (fiction and poetry), written or translated into English, as well as cultural and literary theory and recent work on visual cultural and ecology. The course poses questions about the various inventions, imaginings, and mappings of bodies and locations; representations of nature, land, island, and archipelago; the architectures offered by literature; and the relation between ecology and war in the greater Caribbean region. T 1:30–3:20

AFAM 822a/AFST 651a/FREN 951a, The Francophone African Novel  Christopher L. Miller
A comprehensive study of the novel—its discourse, aesthetics, and history—in colonial and postcolonial francophone Africa. Authors include Lamine Senghor, Ousmane Socé, Ousmame Sembène, Ferdinand Oyono, Ahmadou Kourouma, Yambo Ouologuem, Mariama Bâ, Aminata Sow Fall, Fatou Diome, Calixthe Beyala, Alain Mabanckou. Readings in French; course conducted in English. TH 1:30–3:20

AFAM 825b/SOCY 660b, Social Science of the Black Community  Marcus Hunter, Gerald Jaynes
This course surveys existing research and theories in the social sciences on a variety of topics pertaining to the notion of a “black community,” including family, politics, urban change, and migration. Texts include a mix of empirical and theoretical insights from the social sciences (i.e., history, economics, sociology, anthropology, and political science). T 3:30–5:20

AFAM 829b/WGSS 715b, American Legal History: Citizenship and Race  Kathleen Cleaver
This seminar examines the evolution of U.S. citizenship as defined and interpreted by courts during the nineteenth and twentieth centuries, with particular attention to the way historical events that defined race have affected citizenship. Topics of study include
the Thirteenth, Fourteenth, and Fifteenth Amendments to the U.S. Constitution; the 1866 Civil Rights Act; Reconstruction legislation; immigration restrictions imposed on Asians; legislation impacting the racial classification of Mexicans; statutes governing the citizenship of indigenous native peoples; racially based prohibitions against voting, education, and employment; and efforts to reduce them by civil rights legislation culminating with the 1964 Civil Rights Act. Each seminar participant has to research several topics and make a presentation to the class on at least one topic. Engagement in seminar discussion and the drafting of research papers are the basis for grading. This seminar is open to seniors. TH 3:30–5:20

AFAM 834b/AMST 658b/WGSS 834b, The Politics of Representation: Visual and Literary Culture and the Black Female Body  Hazel Carby
Utilizing collections held in the Yale Art Gallery, the Center for British Art, and the Beinecke Library, this course juxtaposes literary texts and visual culture to create interdisciplinary conversations about the representation of the black female body with particular emphasis on issues of sexuality, gender, and racial formation. T 1:30–3:20

AFAM 880a or b, Directed Reading
By arrangement with faculty.

AFAM 895, Dissertation Prospectus Workshop  Glenda Gilmore
A noncredit, two-term course, which graduate students in their third year of study must satisfactorily complete. This workshop is intended to support preparation of the dissertation proposal.

For course offerings in African languages, see African Studies.

Languages)

Senior Lectors  Oluseye Adesola (African Languages), Matuku Ngame (French)

Fields of Study

African Studies considers the arts, history, cultures, languages, literatures, politics, reli-
gions, and societies of Africa as well as issues concerning development, health, and the
environment. Considerable flexibility and choice of areas of concentration are offered
because students entering the program may have differing academic backgrounds and
career plans. Enrollment in the M.A. program in African Studies provides students with
the opportunity to register for the many African studies courses offered in the various
departments of the Graduate School of Arts and Sciences and the professional schools.
The Program in African Studies also offers two interdisciplinary seminars to create dialogue and to integrate approaches across disciplines. In addition to the M.A. degree program, the Council on African Studies offers students in the University’s doctoral and other professional degree programs the chance to obtain a Graduate Certificate of Concentration in African Studies by fulfilling a supplementary curriculum (see the section on the African Studies Council, under Non-Degree Granting Programs, Councils, and Research Institutes). Joint degrees are possible with the approval of the director of graduate studies (DGS) and the relevant officials in the schools of Forestry & Environmental Studies, Law, Management, and Public Health.

The African collections of the Yale libraries together represent one of the largest holdings on Africa found in North America. The University now possesses more than 220,000 volumes including, but not limited to, government documents, art catalogues, photographs, manuscripts, correspondence, and theses, many published in Africa.

**Special Admissions Requirement**
The GRE General Test is required.

**Special Requirements for the M.A. Degree**
The Yale University Master of Arts degree program in African Studies was instituted in 1986. The two-year interdisciplinary, graduate-level curriculum is intended for students who will later continue in a Ph.D. program or a professional school, or for those who will enter business, government service, or another career in which a sound knowledge of Africa is essential or valuable. A student may choose one of the following areas of concentration: history; anthropology; political science; sociology; arts and literatures; languages and linguistics; religion; environmental and development studies.

The program requires sixteen courses: two compulsory introductory interdisciplinary seminars, Research Methods in African Studies (AFST 501a) and Topics in African Studies (AFST 764b); four courses of instruction in an African language; four courses in one of the foregoing areas of concentration; four other approved courses offered in the Graduate School or professional schools; and two terms of directed reading and research (AFST 590a and 900b) during which students will complete the required thesis. A student who is able to demonstrate advanced proficiency in an African language may have the language requirement waived and substitute four other approved courses. The choice of courses must be approved by the DGS, with whom students should consult as soon as possible in the first term.

**The Master’s Thesis**
The master’s thesis is based on research on a topic approved by the director of graduate studies and advised by a faculty member with expertise or specialized competence in the chosen topic.

**Program in African Languages**

The language program offers instruction in three major languages from sub-Saharan Africa: Kiswahili (eastern and central Africa), Yorùbá (west Africa), and isiZulu (southern Africa). Language-related courses and language courses for professionals are also offered. African language courses emphasize communicative competence, and instructors use multimedia materials that focus on the contemporary African context. Course sequences are designed to enable students to achieve advanced competence in all skill areas by the end of the third year, and the African Languages program encourages students to spend one summer or term in Africa during their language study.

Noncredited instruction in other African languages is available by application through the Directed Independent Language Study program at the Center for Language Study. Contact the director of the Program in African Languages.

Program materials are available upon request from the Director of Graduate Studies, Council on African Studies, Yale University, PO Box 208206, New Haven CT 06520-8206; e-mail, africanstudies@yale.edu.

**Courses**

**AFST 501au/INRL 516a, Research Methods in African Studies**  Cheryl Doss  
Disciplinary and interdisciplinary research methodologies in African studies. The focus of the course is on field methods and archival research in the social sciences and humanities. Topics include use of African studies and disciplinary sources (including bibliographical databases and African studies archives), research design, interviewing, survey methods, analysis of sources, and the development of databases and research collections.  
**TH 1:30–3:20**

**AFST 531au/HIST 843au, Apartheid and Its Afterlives**  Daniel Magaziner  
Apartheid in South Africa ended in 1994 with the election of Nelson Mandela and the once-banned African National Congress. Yet just as segregation predated the Afrikaner government’s system of minority rule, so too does apartheid continue to “live” past its conventional expiration date. This course compares the past and the present fates of South Africans, Rather than offer a conventional political narrative of setback, struggle, and triumph, the course proceeds thematically to examine how economics, science, literary culture, violence, and memory have figured at various epochs in South African history. We read monographs, biographies, short stories, and novels; view multimedia and photographs; and watch movies about the country’s contested past and present.  
**T 1:30–3:20**

**AFST 532au/HIST 846au, After Colonialism**  Daniel Magaziner  
This course offers a comparative analysis of decolonization and the postcolonial states in selected African countries. We examine various approaches to the national question and liberation in the late colonial era, then consider a comparative accounting for the trajectories of post-colonies. Topics to be considered include Negritude, Pan-Africanism, artistic approaches to the post-colony, religious revival and cultural politics, and the global Cold War. Students read monographs, articles, and novels, view movies, and listen to music.  
**TH 2:30–4:20**
AFST 541b, Comparative Perspectives on African Literatures  Ann Biersteker
Introduction to a wide range of topics in African literature through an examination of English translations of works composed both in African and in European languages. Readings include poetry, novels, plays, essays, nonliterary texts, and autobiographies. Consideration of the symbiotic relationship between composition and transmission. TH 1:30–3:20

AFST 577a/ANTH 577a, Anthropology of the Contemporary: NGOs, States, and International Bodies  M. Kamari Clarke
This class is about the shift from studying small-scale societies to the “studying up” and making sense of the radical transformations in the world around us. We read ethnographies that examine new legal bodies, reconfigured medical formations, state projects, international organizations, NGOs, and new economic arrangements with the goal of considering the art of studying new institutional networks. M 3:30–5:20

AFST 590a, African Studies Colloquium  Ann Biersteker
Students conduct research for the master’s thesis, give presentations on their research, and prepare a bibliography, a prospectus, and a draft chapter of the master’s thesis. Discussion of model essays and other examples of writing. W 1:30–3:20

AFST 598a, Introduction to an African Language I  Kiarie Wa’Njogu and staff
Beginning instruction in an African language other than those regularly offered. Courses offered depend on availability of instructors. Methodology and materials vary with the language studied. Students may also study an African language through the noncredit Directed Independent Language Study program. Prerequisite: permission of the instructor. MTWTHF 9:25–10:15

AFST 599a, Introduction to an African Language II  Sandra Sanneh and staff
Continuing instruction in an African language other than those regularly offered. Courses offered depend on availability of instructors. Methodology and materials vary with the language studied. Students may also study an African language through the noncredit Directed Independent Language Study program. Prerequisites: AFST 598a and permission of the instructor. 5 HTBA

AFST 626a, Performance in Africa  Frederick Lamp
Ten specific works of African performance from antiquity to the twenty-first century are examined in this seminar. Classes consist of a presentation by the instructor or guest lecturers; viewing and examining documentary films, photographs, and audio recordings; critique of readings in performance theory; and case studies, augmented by theater and museum visits.

AFST 633b, Comparative Corruption  Elizabeth Carlson
Corruption is usually considered a bad thing. But what is corruption, exactly? How do we identify and measure it? How serious is the harm it causes? Can it ever be functional or culturally appropriate? Why is corruption so rare in some countries and so commonplace in others? How can a country combat corruption — especially when corruption goes all the way to the top? The course addresses a wide variety of corruption in countries throughout the developed and developing world, but with a particular focus on Africa. W 1:30–3:20
AFST 645a, Political Economy of Natural Disasters  Jennifer Bussell
Natural shocks pose particular threats to developing countries, such as those in South Asia and Africa. In this course, we investigate the incentives of national governments to build capacity to reduce the risk of, prepare for, and respond to natural shocks and resulting disasters. We also consider the role of international actors and local communities, all through examination of case studies, including the Indian Ocean tsunami, flooding in South Asia, and drought in West Africa. W 1:30–3:20

AFST 647a, The Rwandan Genocide in Comparative Context  David Simon
An examination of the 1994 Rwandan genocide: historical sources of the conflict, the motivations of the killers, actions and reactions of outside actors, efforts to reconstruct a post-genocide society, and continuation of the genocidal dynamic within the Great Lakes region. Consideration of other countries in similar situations, as well as other genocides in recent decades. T 3:30–5:20

AFST 650, Second Year in an African Language
By arrangement with faculty. Prerequisite: AFST 599b.

AFST 651a/AFAM 822a/FREN 951a, The Francophone African Novel  Christopher L. Miller
A comprehensive study of the novel – its discourse, aesthetics, and history – in colonial and postcolonial francophone Africa. Authors include Lamine Senghor, Ousmane Socé, Ousmane Sembène, Ferdinand Oyono, Ahmadou Kourouma, Yambo Ouologuem, Mariama Bâ, Aminata Sow Fall, Fatou Diome, Calixthe Beyala, Alain Mabanckou. Readings in French; course conducted in English. TH 1:30–3:20

AFST 660, Third Year in an African Language
By arrangement with faculty. Prerequisite: AFST 650.

AFST 665b, Language and Identity: South Africa  Sandra Sanneh
The role of language in the construction of identity in South Africa. Focus on shifting identities during the apartheid period and since independence. MW 2:30–3:45

AFST 670, Fourth Year in an African Language
By arrangement with faculty. Prerequisite: AFST 660.

AFST 680b, Nigeria and Its Diaspora  Oluseye Adesola
Nigerians in the modern diaspora, both those who endured forced migration and those who migrated voluntarily. Specific reference to the Igbo and the Yorùbás. The preservation and maintenance of Nigerian culture, history, dance, literature, traditional education, theater, politics, art, music, film, religion, and folklore, especially in African American and Nigerian American contexts.

[AFST 764b/ANTH 622b, Topics in African Studies]

AFST 778b/AFAM 728b/HSAR 778b, From West Africa to the Black Americas: The Black Atlantic Visual Tradition  Robert Thompson
Art, music, and dance in the history of key classical civilizations south of the Sahara— Mali, Asante, Dahomey, Yorùbá, Ejagham, Kongon — and their impact on the rise of New World art and music. TTH 11:35–12:50
AFST 814a/REL 914a, Christian-Muslim Dialogue and Understanding  
Lamin Sanneh  
An introductory survey of Islam: its origin, history, law, theology, and religious tradition. An examination of the encounter of the medieval Muslim world with the West, and an assessment of intercultural influences between the two civilizations. The course explores interfaith issues in terms of convergence as well as contrast.

AFST 830a/HIST 839a, Environmental History of Africa  Robert Harms  
An examination of the interaction between people and their environment in Africa and the ways in which this interaction has affected or shaped the course of African history. W 9:25–11:15

AFST 840b/HIST 840b, Colonialism in Africa  Robert Harms  
Discussion of the theory and practices of colonialism in Africa. Topics include the motives for European expansion, the scramble for Africa, early colonialism, direct and indirect rule, “colonization of the mind,” the colonial state, the developmental state, late colonialism, and paths to decolonization. W 9:25–11:15

AFST 900b, Master’s Thesis  David Simon and faculty  
Directed reading and research on a topic approved by the DGS and advised by a faculty member (by arrangement) with expertise or specialized competence in the chosen field. Readings and research are done in preparation for the required master’s thesis.

AFST 951a or b, Directed Reading and Research  David Simon and faculty  
By arrangement with faculty.

SWAH 610au, Beginning Kiswahili I  Kiarie Wa’Njogu  
A beginning course with intensive training and practice in speaking, listening, reading, and writing. Initial emphasis is on the spoken language and conversation. Credit only on completion of SWAH 620b. MTWTHF 9:25–10:15

SWAH 620bu, Beginning Kiswahili II  Kiarie Wa’Njogu  
Continuation of SWAH 610a. Texts provide an introduction to the basic structure of Kiswahili and to the culture of the speakers of the language. Prerequisite: SWAH 610a. MTWTHF 9:25–10:15

SWAH 630au, Intermediate Kiswahili I  Kiarie Wa’Njogu  
Further development of speaking, listening, reading, and writing skills. Prepares students for further work in literary, language, and cultural studies as well as for a functional use of Kiswahili. Study of structure and vocabulary is based on a variety of texts from traditional and popular culture. Emphasis on command of idiomatic usage and stylistic nuance. Prerequisite: SWAH 620b. MTWTHF 11:35–12:25

SWAH 640bu, Intermediate Kiswahili II  Kiarie Wa’Njogu  
Continuation of SWAH 630a. MTWTHF 11:35–12:25

SWAH 650au, Advanced Kiswahili I  Kiarie Wa’Njogu  
Development of fluency through readings and discussions on contemporary issues in Kiswahili. Introduction to literary criticism in Kiswahili. Materials include Kiswahili oral literature, prose, poetry, and plays, as well as texts drawn from popular and political culture. Prerequisite: SWAH 640b. TTH 1–2:15
SWAH 660b\textsuperscript{v}, Advanced Kiswahili II  \quad Kiarie Wa’Njogu
Continuation of SWAH 650a. TTH 1–2:15

SWAH 670a\textsuperscript{v} or b\textsuperscript{v}, Topics in Kiswahili Literature \quad Ann Biersteker
Advanced readings and discussion with emphasis on literary and historical texts. Reading assignments include materials on Kiswahili poetry, Kiswahili dialects, and the history of Kiswahili. Prerequisite: SWAH 660b. TTH 11:35–12:50

YORU 610a\textsuperscript{v}, Beginning Yorùbá I \quad Oluseye Adesola
Training and practice in speaking, listening, reading, and writing. Initial emphasis is on the spoken aspect, with special attention to unfamiliar consonantal sounds, nasal vowels, and tone, using isolated phrases, set conversational pieces, and simple dialogues. Multimedia materials provide audio practice and cultural information. Credit only on completion of YORU 620b. MTWTHF 10:30–11:20

YORU 620b\textsuperscript{v}, Beginning Yorùbá II \quad Oluseye Adesola
Continuing practice in using and recognizing tone through dialogues. More emphasis is placed on simple cultural texts and role playing. Prerequisite: YORU 610a. MTWTHF 10:30–11:20

YORU 630a\textsuperscript{v}, Intermediate Yorùbá I \quad Oluseye Adesola
Refinement of speaking, listening, reading, and writing skills. More natural texts are provided to prepare students for work in literary, language, and cultural studies as well as for a functional use of Yorùbá. Prerequisite: YORU 620b. MTWTHF 11:35–12:25

YORU 640b\textsuperscript{v}, Intermediate Yorùbá II \quad Oluseye Adesola
Students are exposed to more idiomatic use of the language in a variety of interactions, including occupational, social, religious, and educational. Cultural documents include literary and nonliterary texts. Prerequisite: YORU 630a. MTWTHF 11:35–12:25

YORU 650a\textsuperscript{v}, Advanced Yorùbá I \quad Oluseye Adesola
An advanced course intended to improve aural and reading comprehension as well as speaking and writing skills. Emphasis is on acquiring a command of idiomatic usage and stylistic nuance. Study materials include literary and nonliterary texts; social, political, and popular entertainment media such as video movies and recorded poems (\textit{ewi}); and music. Prerequisite: YORU 640b. 3 HTBA

YORU 660b\textsuperscript{v}, Advanced Yorùbá II \quad Oluseye Adesola
Continuing development of aural and reading comprehension, and speaking and writing skills, with emphasis on idiomatic usage and stylistic nuance. Study materials are selected to reflect research interests of the students. Prerequisite: YORU 650a. 3 HTBA

YORU 670a\textsuperscript{v} or b\textsuperscript{v}, Topics in Yorùbá Literature and Culture \quad Oluseye Adesola
The course provides students with the opportunity to acquire Yorùbá up to the superior level. It is designed to give an in-depth discussion on advanced readings on Yorùbá literature and culture. It focuses on Yorùbá history, poetry, novels, dramas, and oral folklore. It also seeks to uncover the basics of the Yorùbá culture in communities where Yorùbá is spoken across the globe, with particular emphasis on Nigeria. It examines movies, texts, and written literature to gain insight into the Yorùbá philosophy and ways of life. TTH 4–5:15
YORU 680au, Advanced Topics in Yorùbá Literature and Culture  Oluseye Adesola
A course for students with advanced proficiency in Yorùbá who are interested in discussion and research in Yorùbá at a level not covered by existing courses. A term paper or its equivalent is required. TTH 1–2:15

YORU 682bu, Advanced Topics in Yorùbá Literature and Culture II  Oluseye Adesola
Continuation of YORU 680a. TTH 1–2:15

ZULU 610au, Beginning isiZulu I  Sandra Sanneh
A beginning course in conversational isiZulu, using Web-based materials filmed in South Africa. Emphasis on the sounds of the language, including clicks and tonal variation, and on the words and structures needed for initial social interaction. Brief dialogues concern everyday activities; aspects of contemporary Zulu culture are introduced through readings and documentaries in English. Credit only on completion of ZULU 620b. MTWTHF 11:35–12:25

ZULU 620bu, Beginning isiZulu II  Sandra Sanneh
Development of communication skills through dialogues and role play. Texts and songs are drawn from traditional and popular literature and songs. Students research daily life in selected areas of South Africa. Prerequisite: ZULU 610a. MTWTHF 11:35–12:25

ZULU 630au, Intermediate isiZulu I  Sandra Sanneh
Development of basic fluency in speaking, listening, reading, and writing isiZulu, using Web-based materials filmed in South Africa. Students describe and narrate spoken and written paragraphs. Review of morphology; concentration on tense and aspect. Materials are drawn from contemporary popular culture, folklore, and mass media. Prerequisite: ZULU 620b. MTWTHF 9:25–10:15

ZULU 640bu, Intermediate isiZulu II  Sandra Sanneh
Students read longer texts from popular media as well as myths and folktales. Students are prepared for initial research involving interaction with speakers of isiZulu in South Africa, and for the study of oral and literary genres. Prerequisite: ZULU 630a. MTWTHF 9:25–10:15

ZULU 650au, Advanced isiZulu I  Sandra Sanneh
Development of fluency in using idioms, speaking about abstract concepts, and voicing preferences and opinions. Excerpts are drawn from oral genres, short stories, and dramas made for television. Introduction to other South African languages and to issues of standardization, dialect, and language attitude. Prerequisite: ZULU 640b. 3 HTBA

ZULU 660bu, Advanced isiZulu II  Sandra Sanneh
Readings may include short stories, a novel, praise poetry, historical texts, or contemporary political speeches, depending on student interests. Study of issues of language policy and use in contemporary South Africa; introduction to the Soweto dialect of isiZulu. Students are prepared for extended research in South Africa involving interviews with isiZulu speakers. Prerequisite: ZULU 650a.
AMERICAN STUDIES

230 Hall of Graduate Studies, 203.432.1186
www.yale.edu/amstud
M.A., M.Phil., Ph.D.

Chair
Joanne Meyerowitz (230 HGS, 203.432.1186)

Director of Graduate Studies
Mary Lui (230 HGS, 203.432.1186)

Associate Professors  Kathryn Lofton, Caleb Smith

Assistant Professors  Birgit Brander Rasmussen, Crystal Feimster, Zareena Grewal, Paige McGinley, Alyssa Mt. Pleasant, Naomi Pabst

Lecturers  James Berger, Ronald Gregg

Fields of Study
Fields include American literature, history, the arts and material culture, philosophy, cultural theory, and the social sciences.

Special Admissions Requirement
A twenty-page writing sample is required with the application.

Special Requirements for the Ph.D. Degree
During the first two years of study students are required to take twelve term courses; at least half of these courses must be in American Studies. First-year students are also required to take AMST 600a, American Scholars (graded Satisfactory/Unsatisfactory). The student's program will be decided in consultation with the adviser and the director of graduate studies (DGS). In each of the two years, the student should take at least one seminar devoted to research or requiring a substantial original paper, and must achieve two grades of Honors, with an average overall of High Pass.

Students are required to show proficiency in a language other than English; they may fulfill this requirement by (1) conducting substantial research in the chosen language as part of the course requirements for one of the twelve required seminars, (2) passing a translation test, offered each term by various language departments, or (3) receiving a
grade of B or higher in a Yale College intermediate- or advanced-level language course or in a Yale language-for-reading course, such as French for Reading or German for Reading.

Upon completion of course work, students in their third year of study are required to participate in at least one term of a monthly prospectus workshop (AMST 902a and b). Intended to complement the work of the prospectus committee, the workshop is designed as a professionalization experience that culminates in students’ presentation of the dissertation prospectus at their prospectus colloquium.

Students should schedule the oral qualifying examinations in four fields, in the fifth term of study. Preparation, submission, and approval of the dissertation prospectus should be completed by the end of the sixth term, with a final deadline at the end of the seventh term with permission from the DGS. Students are admitted to candidacy for the Ph.D. upon completion of all predissertation requirements, including the prospectus. The faculty in American Studies considers training in teaching to be an important part of the program. Students in American Studies normally teach in years three and four.

**Combined Ph.D. Programs**

**AMERICAN STUDIES AND AFRICAN AMERICAN STUDIES**

The American Studies Program also offers, in conjunction with the Department of African American Studies, a combined Ph.D. in American Studies and African American Studies. This combined degree is most appropriate for students who intend to concentrate in and write a dissertation on any aspect of African American history, literature, or culture in the United States and other parts of the Americas. Applicants to the joint program must indicate on their application that they are applying both to American Studies and to African American Studies. All documentation within the application should include this information.

**AMERICAN STUDIES AND FILM STUDIES**

The American Studies Program also offers, in conjunction with the Film Studies Program, a joint Ph.D. in American Studies and Film Studies. For further details, see Film Studies. Applicants to the joint program must indicate on their application that they are applying both to American Studies and to Film Studies. All documentation within the application should include this information.

**Master’s Degrees**

**M.Phil.** See Degree Requirements under Policies and Regulations.

**M.A. (en route to the Ph.D.)** The M.A. is granted upon the completion of seven term courses (two grades must be Honors and the other five grades must average High Pass), and the successful completion of the language requirement. It can be petitioned for in the term following completion of the requirements. Candidates in combined programs will be awarded the master’s degree only when the master’s requirements for both programs have been met.

**Public Humanities Concentration** The M.A. with a concentration in Public Humanities is granted upon the completion of all requirements for the en route M.A. Of the seven
term courses required, students must take four Public Humanities courses, including AMST 903, 904, 905.

**Terminal Master’s Degree Program** The basic requirements for this terminal degree are seven term courses, including a special writing project, and the successful completion of the language examination. The project involves the submission of substantial written work either in conjunction with one course or as a tutorial that substitutes for one course. Students must earn a grade of Honors in two of their courses and an average grade of High Pass in the others.

For further information, see the American Studies Web site: www.yale.edu/amstud.

**Courses**

**AMST 600a, American Scholars** Matthew Jacobson

“What would we really know the meaning of? The meal in the firkin; the milk in the pan; the ballad in the street; the news of the boat; the glance of the eye; the form and the gait of the body. The literature of the poor, the feelings of the child, the philosophy of the street, the meaning of household life, are the topics of the time.”

—Ralph Waldo Emerson, *The American Scholar*, 1837

A half-century ago American studies was a movement; now it is an institution. But it remains an anomaly in the academy, with neither method nor discipline: a modest program, not a department, that immodestly claims the space between disciplines, beyond disciplines, and perhaps encompassing disciplines.

In the early days, American studies was imagined as a home for Emerson’s American scholar; these days Emerson’s scholar is apt to be eyed more skeptically. Nevertheless the philosophy of the street and the meaning of household life continue to be the topics of the time, and American studies remains an oddly Emersonian place for nurturing intellectuals.

To explore the various kinds of American scholars and American studies, the American Scholars colloquium meets weekly. Each week, we ask a member of the American Studies faculty: What are the key works that shape your intellectual project? What works pose the crucial issues? What works engage what you would really know the meaning of? Each speaks briefly and leads a discussion of the works chosen. There is no writing assignment, and students receive a credit for participating. This course is mandatory for first-year American Studies graduate students. W 9:25–11:15

**AMST 601b, Interdisciplinary Research in American Studies** Kathryn Dudley, Joanne Meyerowitz

A practical forum on incorporating interdisciplinary methods and modes of analysis into research in American Studies. Students develop article-length projects of their own design. TH 1:30–3:20

**AMST 622a and 623b/CPLT 622a, Working Group on Globalization and Culture**

Michael Denning

A continuing collective research project, a cultural studies “laboratory,” that has been running since the fall of 2003. The group is made up of graduate students and faculty from
several disciplines. The working group meets regularly to discuss common readings, to develop collective and individual research projects, and to present that research publicly. The general theme for the working group is globalization and culture, with three principal aspects: (1) the globalization of cultural industries and goods, and its consequences for patterns of everyday life as well as for forms of fiction, film, broadcasting, and music; (2) the trajectories of social movements and their relation to patterns of migration, the rise of global cities, the transformation of labor processes, and forms of ethnic, class, and gender conflict; (3) the emergence of and debates within transnational social and cultural theory. The specific focus, projects, and directions of the working group are determined by the interests, expertise, and ambitions of the members of the group, and change as its members change. There are a small number of openings for second-year graduate students. Students interested in participating should contact michael.denning@yale.edu.

AMST 643a/AFAM 505a, Theorizing Racial Formations  Elizabeth Alexander
A required course for all first-year students in the joint Ph.D. program in African American Studies; also open to students in American Studies. This interdisciplinary reading seminar focuses on new work that is challenging the temporal, theoretical, and spatial boundaries of the field. T 9:25–11:15

AMST 650a/ANTH 510a/HIST 807a, Resistance, Rebellion, and Survival Strategies in Modern Latin America  Gilbert Joseph
An interdisciplinary examination of new conceptual and methodological approaches to such phenomena as peasants in revolution, millenarianism, “banditry,” refugee movements, and transnational migration. TH 3:30–5:20

AMST 653a, Recording Vernacular Music  Michael Denning
An introduction to the cultural study of vernacular musics in the era of sound recording. Topics include the rise of the music industry from sheet music to MP3s; the critical debates over vernacular musics associated with figures like Theodor Adorno, Charles Seeger, Alejo Carpentier, and Amiri Baraka; the rise of ethnographic field recording and the twentieth-century revivals of folk musics; the popular urban music cultures of ports and industrial cities; and the global circulation of commercial vernacular musics from jazz, tango, and hula to salsa and hip hop. TTH 1–2:15

AMST 654b/AFAM 743b/ENGL 845b, American Artists and the African American Book  Robert Stepto
The visual art, decoration, and illustration of African American books (prose and poetry) since 1900. Topics include book art of the Harlem Renaissance (with special attention to Aaron Douglas and Charles Cullen), art imported to book production (e.g., Archibald Motley’s paintings used as book art), children’s books (e.g., I Saw Your Face by Kwame Dawes with drawings by Tom Feelings; Ntozake Shange’s Ellington Was Not a Street, illus. by Kadir Nelson), photography and literature (e.g., Paul Laurence Dunbar’s Cabin and Field, with Hampton Institute photographs; Richard Wright’s 12 Million Black Voices). The seminar includes sessions at Beinecke Library and encourages research projects in the Beinecke’s holdings, especially the James Weldon Johnson collection. W 1:30–3:20
AMST 657a/AFAM 816a/WGSS 816a, Place and Space in Caribbean Literature, Theory, and Ecology  Hazel Carby
Readings are drawn from twentieth-century Caribbean literature (fiction and poetry), written or translated into English, as well as cultural and literary theory and recent work on visual culture and ecology. The course poses questions about the various inventions, imaginings, and mappings of bodies and locations; representations of nature, land, island, and archipelago; the architectures offered by literature; and the relation between ecology and war in the greater Caribbean region. T 1:30–3:20

AMST 658b/AFAM 834b/WGSS 834b, The Politics of Representation: Visual and Literary Culture and the Black Female Body  Hazel Carby
Utilizing collections held in the Yale Art Gallery, the Center for British Art, and the Beinecke Library, this course juxtaposes literary texts and visual culture to create interdisciplinary conversations about the representation of the black female body with particular emphasis on issues of sexuality, gender, and racial formation. T 1:30–3:20

AMST 671a/AFAM 746a/HIST 710a, Black Politics and Performance in the Twentieth-Century United States  Jonathan Holloway, Paige McGinley
This course examines black politics and performance from the New Negro Renaissance to the Los Angeles Uprising. Bringing together methods from history and performance studies, the course focuses on questions of race, citizenship, memory, and movement within the framework of black cultural politics. The course moves across many modes of cultural and artistic production, from the Federal Theater Project to the essays of James Baldwin to the verbatim theater of Anna Deavere Smith. TH 1:30–3:20

AMST 678b/AFAM 733b/HIST 717b, Readings on Slavery in the Americas to 1800  Edward Rugemer, Alejandra Dubcovsky
This reading course examines the histories and historiographies of the slave systems of the Americas from about 1500 to 1800. The course has a broad geographical scope, moving away from national histories and engaging with hemispheric, Atlantic, and world history paradigms. T 9:25–11:15

AMST 684b, Music in American Religion  David Stowe
This course introduces students to the role of music in a variety of American religious traditions and to the links between spiritual experience and musical expression. Students gain an enhanced understanding of American religious history, appreciation for the varieties of religious experience, and awareness of the range of American vernacular music. The course is also designed to strengthen students’ skills in critical listening and introduce them to a variety of methods for analyzing the interplay between religious belief and musical practice.

AMST 685b, Disability: Representation, History, Ethics  James Berger
This course provides an introduction to some key topics in contemporary disability studies. Students read sources on the history of the disability rights movement in the United States and texts on modes of theorizing disability and how these theorizations intersect with and sometimes contest the movement’s political assertions. Encounters with artistic and other cultural representations of disability have been central to disability studies, so
students read or view significant literary and cinematic accounts of disability. Finally, the class contends with important recent ethical issues pertaining to disability: questions of eugenics, genetic screening, euthanasia, the ethics of care, and disability in a global perspective. Students write three short essays responding to class readings and a longer research paper. W 1:30–3:20

**AMST 602a/HSAR 730a/JDST 799a, Religion and the Performance of Space**
Margaret Olin, Sally Promey
This interdisciplinary seminar explores categories, interpretations, and strategic articulations of space in a range of religious traditions. In conversation with the work of theorists of space such as Henri Lefebvre, Michel de Certeau, and Jonathan Z. Smith, the seminar examines spatial practices of religion in the United States during the modern era, including the conception, construction, and enactment of religious spaces. It is structured around theoretical issues, including (historical) deployments of secularity as a framing mechanism, ideas about space and place, and relations between property and spirituality. Examples of case studies treated in class include the enactment of rituals within museums, the marking of religious boundaries such as the Jewish *eruv*, and the assignment of “spiritual” ownership in Hawai‘i Volcanoes National Park. Several campus events, including special lectures and symposia, the Religion and Film series, and a concurrent exhibition on the *eruv*, are coordinated with the seminar. Students make presentations and submit papers on topics of their choosing in consultation with the instructors. Prerequisite: permission of the instructors; qualified undergraduates are welcome. T 1:30–3:20

**AMST 700a/HIST 700a, Introduction to the Historiography of the United States**
Ned Blackhawk
Readings and discussion of scholarly work on U.S. history from the settlement era to the present. Members of the department faculty visit the class on a rotating basis. M 1:30–3:20

**AMST 705a/RLST 705a/HIST 720a, Readings in Religion and American History, 1600–2000**
Harry Stout
This seminar explores intersections of religion and society in American history from the colonial period to the present as well as methodological problems important to their study. TH 1:30–3:20

**AMST 706a/AFAM 738a/HIST 711a/WGSS 716a, Readings in African American Women’s History**
Crystal Feimster
The diversity of African American women’s lives from the colonial era through the late twentieth century. Using primary and secondary sources we explore the social, political, cultural, and economic factors that produced change and transformation in the lives of African American women. Through history, fiction, autobiography, art, religion, film, music, and cultural criticism we discuss and explore the construction of African American women’s activism and feminism; the racial politics of the body, beauty, and complexion; hetero- and same-sex sexualities; intraracial class relations; and the politics of identity, family, and work. TH 9:25–11:15
AMST 709b/AFAM 709b/HIST 736b/WGSS 736b, Research in U.S. Political and Social History after 1865  Glenda Gilmore
Projects chosen from the post-Civil War period, with emphasis on twentieth-century social and political history, broadly defined. Research seminar. TH 9:25–11:15

AMST 710b/U/AFAM 588b/U/ENGL 948b/U, Autobiography in America  Robert Stepto
At least a dozen North American autobiographies are studied, mostly from the “American Renaissance” to the present. Discussion of various autobiographical forms and strategies as well as of various experiences of American selfhood and citizenship. Slave narratives, spiritual autobiographies, immigrant narratives, autobiographies of childhood or adolescence, relations between autobiography and class, region, or occupation. M 1:30–3:20

AMST 715b/AFAM 764b/HIST 715b, Readings in Nineteenth-Century America  David Blight
The course explores recent trends and historiography on several problems through the middle of the nineteenth century: sectionalism; expansion; slavery and the Old South; northern society and reform movements; Civil War causation; the meaning of the Confederacy; why the North won the Civil War; the political, constitutional, and social meanings of emancipation and Reconstruction; violence in Reconstruction society; the relationships between social/cultural and military/political history; problems in historical memory; the tension between narrative and analytical history writing; and the ways in which race and gender have reshaped research and interpretive agendas. W 9:25–11:15

AMST 719a, Interrogating the Crisis of Islam  Zareena Grewal

AMST 722a/AFAM 757a/HIST 722a, Research Seminar in Nineteenth-Century U.S. History  David Blight
Some class sessions focus on matters of craft: research techniques, styles of writing narrative and analysis; judging scholarly work; and philosophical dimensions of doing history in the early twenty-first century. The primary focus of the course is for each student to complete his/her own major research paper. Students in any field of American history are welcome. W 9:25–11:15

AMST 737a/HSAR 737a, Craft and Design in Post-World War II America  Edward Cooke, Jr.
In the two decades following World War II, economic prosperity and cultural optimism led to the golden age of American industrial design and the expansion of craft education programs in the universities. The term “designer/craftsman” was a respected label. Yet, by the 1970s, crafts, design, and art were three separate spheres. This seminar draws on period writings and artifactual examination to explore the interconnections of craft and design in the 1950s, their subsequent fragmentation, and recent attempts to build connections. W 9:25–11:15

AMST 739a/HIST 739a, Readings in American Indian History  Alyssa Mt. Pleasant
Conceived as an introduction to the historiography of Native America, this seminar pays particular attention to the development of ethnohistorical inquiry, “new Indian history,” and current debates within the field. The course aims to provide broad chronological
coverage from European contact through the twentieth century. There is similar emphasis on geographic breadth (within the political boundaries of the modern United States). Readings include recent publications and classic texts. The final project is a historiographical essay developing a fine-grained analysis of scholarship about a particular tribe or nation, region, theme, or period in American Indian history. W 9:25–11:15

**AMST 740b/HIST 740b, Research in Western and Frontier History**  
John Mack Faragher, George Miles  
Taught with George Miles, curator of Yale’s extensive collection of Western Americana at the Beinecke Library. Meets at the Beinecke Library. Emphasis on research methods and the use of primary evidence to construct historical arguments. The goal of the seminar is the research and writing of an original and publishable historical essay. W 9:25–11:15

**AMST 741b/HIST 752b, Indians and Empires**  
Ned Blackhawk  
This course explores recent scholarship on Indian-imperial relations throughout North American colonial spheres from roughly 1500 to 1900. It examines indigenous responses to Spanish, Dutch, French, English, and lastly American and Canadian colonialism and interrogates commonplace periodization, geographic, and conceptual approaches to American historiography. It concludes with an examination of American Indian political history, contextualizing it within larger assessments of Indian-imperial and Indian-state relations. TH 1:30–3:20

**AMST 768a/HIST 768a, Asian American History and Historiography**  
Mary Lui  
This reading and discussion seminar examines Asian American history through a selection of recently published texts and established works that have significantly shaped the field. Major topics include the racial formation of Asian Americans in U.S. culture, politics, and law; U.S. imperialism; U.S. capitalist development and Asian labor migration; and transnational and local ethnic community formations. The class considers both the political and academic roots of the field as well as its evolving relationship to “mainstream” American history. T 9:25–11:15

**AMST 776a/HIST 758a, Research in International and Transnational History**  
Jenifer Van Vleck  
This research seminar is designed to enable students to produce an original, article-length paper based on primary research. During the first four weeks of class, we read examples of both classic and new approaches to international history, with the goal of understanding and evaluating different research methodologies. Questions that the course considers include: What does it mean to work across geographical borders (or, indeed, disciplinary borders), conceptually and methodologically? Why might an international/transnational perspective enrich our understandings of national or local histories? How have historians grappled with the logistical challenges of multiarchival research—and how can we understand the archive itself in historical terms, as an institutional site that embodies (and often reproduces) relations of power? With such questions in mind, the remainder of the term is devoted to students’ own research papers, which they discuss and present, workshop-style, at various stages in the process. On a practical level, we discuss strategies for publishing articles in academic journals, for using seminar papers
to advance work on the dissertation, and for finding archival collections and sources at Yale that are relevant to international history. W 3:30–5:20

**AMST 780a/HIST 776a, Class and Capitalism in Twentieth-Century United States**  
Jennifer Klein  
Reading course on class formation, labor, and political economy in the twentieth-century United States; how regionalism, race, and class power shaped development of American capitalism. The course reconsiders the relationships between economic structure and American politics and political ideologies, and between global and domestic political economy. Readings include primary texts and secondary literature (social, intellectual, and political history; geography). TH 1:30–3:20

**AMST 790b/HIST 790b, Narrative and Other Histories**  
John Demos  
An exploration, through readings and discussion, of the recent “literary turn” in historical study. Readings include history, fiction, and some theory. In addition, a month-long practicum focuses on writing by course participants. T 3:30–5:20

**AMST 793b/HIST 793b, Power: Historical and Theoretical Approaches**  
Jean-Christophe Agnew  
An introduction to the widely different ways in which power and its correlative concepts (domination, coercion, oppression, authority, legitimacy, hegemony, resistance, etc.) have been treated by historians, sociologists, anthropologists, and political theorists. Case studies test the various approaches in different contexts. W 1:30–3:20

**AMST 798b/HIST 726b, The Culture of the Gilded Age**  
Cynthia Russett  
This course uses fiction and nonfiction to look at some of the major concerns of late-nineteenth-century America, including political corruption, wealth and poverty, social reform, and the situation of women and minorities. Authors include Edward Bellamy, William Graham Sumner, Jane Addams, W.E.B. DuBois, and Charlotte Perkins Gilman. TH 1:30–3:20

**AMST 799a/HIST 799a, The American Century, 1941–1961**  
Jean-Christophe Agnew  
The seminar looks at recent work in the intellectual and cultural history of WWII and Cold War America—the years between the New Deal and the New Frontier. Secondary readings highlight current directions in historiography as well as the range of research opportunities available, while class assignments and discussions focus for the most part on the different ways one can teach the period and its documentary sources, including literature, film, music, and painting. The seminar aims to suggest the richness and coherence of this period as a subject for intellectual and cultural historians—especially for those wishing to pursue a research topic in this area—and as an occasion to explore the possibilities for interdisciplinary teaching. W 1:30–3:20

**AMST 802a/HIST 702a, Readings in Early National America**  
Joanne Freeman  
An introduction to the early national period and its scholarship, exploring major themes such as nationalism, national identity, the influence of the frontier, the structure of society, questions of race and gender, and the evolution of political cultures. T 1:30–3:20
AMST 814b/FILM 603b, Historical Methods in Film Study  Charles Musser
A range of historiographic issues in film studies, including the roles of technology, exhibition, and spectatorship. Topics include intermediality and intertextuality. Consideration of a range of methodological approaches through a focus on international early cinema and American race cinema of the silent period. Particular attention to the interaction between scholars and archives. TH 1:30–3:20, screenings W 7

AMST 832av and 833bv/FILM 735av and 736bv, Documentary Film Workshop  Charles Musser
This workshop in audiovisual scholarship explores ways to present research through the moving image. Students work within a Public Humanities framework to make a documentary that draws on their disciplinary fields of study. Designed to fulfill requirements for the M.A. in Public Humanities. W 12:30–3:20, screenings T 7

AMST 861b/ARCH 4241b, Built Environments  Dolores Hayden
M 9:25–11:15

AMST 878a/HIST 930a/HSHM 701a, Problems in the History of Medicine and Public Health  John Harley Warner
An examination of the variety of approaches to the social, cultural, and intellectual history of medicine, focusing on the United States. Reading and discussion of the recent scholarly literature on medical cultures, public health, and illness experiences from the early national period through the present. Topics include the role of gender, class, ethnicity, race, religion, and region in the experience of health care and sickness and in the construction of medical knowledge; the interplay between lay and professional understandings of the body; the role of the marketplace in shaping professional identities and patient expectations; citizenship, nationalism, and imperialism; and the visual cultures of medicine. W 1:30–3:20

AMST 900, Independent Research

AMST 901, Directed Reading

AMST 902a and b, Prospectus Workshop  Mary Lui
Upon completion of course work, students are required to participate in at least one term of the prospectus workshop, ideally the term before the prospectus colloquium is held. Open to all students in the program and joint departments, the workshop serves as a forum for discussing the selection of a dissertation topic, refining a project’s scope, organizing research materials, and evaluating work in progress. The workshop meets once a month. M 12–1:30

AMST 903a/HIST 746a, Introduction to Public Humanities  Matthew Jacobson, Laura Wexler
What is the relationship between knowledge produced in the university and the circulation of ideas among a broader public, between academic expertise on the one hand and nonprofessionalized ways of knowing and thinking on the other? What is possible? This seminar provides an introduction to various institutional relations and to the modes of inquiry, interpretation, and presentation by which practitioners in the humanities seek to
invigorate the flow of information and ideas among a public more broadly conceived than the academy, its classrooms, and its exclusive readership of specialists. Topics include public history, museum studies, oral and community history, public art, documentary film and photography, public writing and educational outreach, the socially conscious performing arts, and fundraising. In addition to core readings and discussions, the seminar includes presentations by several practitioners who are currently engaged in different aspects of the Public Humanities. With the help of Yale faculty and affiliated institutions, participants collaborate in developing and executing a Public Humanities project of their own definition and design. Possibilities might include, but are not limited to, an exhibit or installation, a documentary, a set of walking tours, a Web site, a documents collection for use in public schools. Required for the master’s degree in Public Humanities.

M 9:25–11:15

M.A., M.Phil., Ph.D.

Chair
Richard Bribiescas

Director of Graduate Studies
Anne Underhill

Professors  Richard Bribiescas, Richard Burger, M. Kamari Clarke, Michael Dove (Forestry & Environmental Studies), Kathryn Dudley (American Studies), J. Joseph Errington, Inderpal Grewal (Women’s, Gender & Sexuality Studies), Andrew Hill, Marcia Inhorn (Middle East Studies), William Kelly, Roderick McIntosh, Catherine Panter-Brick, Eric Sargis, James Scott (Political Science), Helen Siu, Kalyanakrishnan Sivaramakrishnan, Anne Underhill, David Watts, Harvey Weiss (Near Eastern Languages & Civilizations)

Associate Professors  Michael McGovern, Karen Nakamura, Douglas Rogers

Assistant Professors  Jafari Allen (African American Studies), Brenda Bradley, Sean Brotherton, Oswaldo Chinchilla, Narges Erami (Middle East Studies), Erik Harms (Southeast Asia Studies), Karen Hébert (Forestry & Environmental Studies), William Honeychurch, Sara Shneiderman, Brian Wood

Lecturers  Carol Carpenter (Forestry & Environmental Studies), Madhavi Murty (South Asian Studies)

Edward P. Bass Distinguished Environmental Scholar  Alison Richard

Fields of Study

The department covers three subfields: archaeology; sociocultural and linguistic anthropology; and physical anthropology. Archaeology focuses on ritual complexes and writing, ceramic analysis, warfare, ancient civilizations, origins of agriculture, and museum studies. Sociocultural anthropology provides a range of courses: classics in ethnography and social theory, religion, myth and ritual, kinship and descent, historical anthropology, culture and political economy, agrarian studies, ecology, environment and social change, medical anthropology, emotions, public health, sexual meanings and gender, postcolonial development, ethnicity, identity politics and diaspora, urban anthropology, global mass culture, and alternate modernity. Linguistic anthropology includes language, nationalism and ideology, structuralism and semiotics, and feminist discourse. Physical anthropology focuses on paleoanthropology, evolutionary theory, human functional anatomy, race and human biological diversity, and primate ecology. There is strong geographical coverage in Africa, the Caribbean, East Asia (China and Japan), Latin America and South America, Southeast Asia (Indonesia), South Asia and the Indian Ocean, the Near East, Europe, and the United States.
Special Requirements for the Ph.D. Degree

Although there are a few required courses or seminars for each subfield, more than three-fourths of a student's program consists of electives, including course work in other departments. Admission to candidacy requires (1) completion of two years of course work (sixteen term courses); (2) independent study and research; (3) satisfactory performance on qualifying examinations; and (4) a dissertation research proposal submitted and approved before the end of the third year. Qualifying examinations, normally taken at the end of the second year, consist of eight hours written (four hours on one of the subfields, four hours on the student's special interest), and two hours oral. Dissertations are normally based on field or laboratory research.

Combined Ph.D. Programs

The Anthropology department also offers a combined Ph.D. in Anthropology and Forestry & Environmental Studies in conjunction with the School of Forestry & Environmental Studies, and a combined Ph.D. in Anthropology and African American Studies in conjunction with the Department of African American Studies. These combined programs are ideal for students who intend to concentrate in, and to write dissertations on, thematic and theoretical issues centrally concerned with anthropology and one of these other areas of study. Students in the combined degree programs will be subject to the combined supervision of faculty members in the Anthropology department and in the respective department or school.

Admission into the combined degree program in Anthropology and African American Studies is based on mutual agreement between these two departments. Individual students will develop courses of study in consultation with their academic advisers and with the directors of graduate study for both departments. Students in the program must take core courses in Anthropology and in African American Studies, plus related courses in both departments approved by their advisory committees. In addition, they must successfully complete the African American Studies third-year Research Workshop. Oral and written qualifying examinations must include two topics in the field of African American Studies and two topics in Anthropology. The examination committee must include at least one faculty member from each department. The dissertation prospectus must be submitted to the directors of graduate study of both departments and approved by the faculty of both. The thesis readers committee must also include at least one faculty member from each department, and the faculties of both departments must approve its composition.

Master’s Degrees

M.Phil. See Degree Requirements under Policies and Regulations.

M.A. Applications for a terminal master’s degree are not accepted. The M.A. degree is awarded only to students not continuing in the Ph.D. program. The student must complete eight graduate-level term courses approved for credit in the Anthropology department and maintain an average grade of High Pass.

Courses

**ANTH 500a, The Development of the Discipline: Historical Trajectories**  
William Kelly  
The seminar emphasizes the characteristics of anthropology as a discipline and as a profession, and the historical trajectory of sociocultural anthropology from the late nineteenth century to the 1970s. The seminar is reserved for first-year doctoral students in Anthropology. M 2:30–4:20

**ANTH 500b, The Development of the Discipline: Contemporary Themes**  
Kalyanakrishnan Sivaramakrishnan  
The major theoretical orientations in social and cultural anthropology (especially in the United States and Europe), their historical development and importance, their relation to one another and to other disciplines. The seminar is reserved for first-year doctoral students in Anthropology, and students are presumed to have taken ANTH 500a in the fall term. M 9:25–11:15

**ANTH 501a, Anthropology and Classical Social Theory**  
Erik Harms  
Readings of primary texts in classical social theory, especially the writings of Marx, Weber, and Durkheim. Particular emphasis is placed on the role of these theorists in the early development of anthropology and social science more broadly. The course is reserved for first-year graduate students in Anthropology. TH 2:30–4:20

**ANTH 501b, Anthropology and Contemporary Social Theory**  
Narges Erami  
An overview of central themes and debates in contemporary social theory, with a focus on the integration of theory and research, rather than a hermeneutical analysis of particular theoretical texts. Concentrating on questions of power, inequality, the self, and community, assessment of the relevance of sociological theory to advancing an understanding of the complexities of late twentieth-century Western society. Critical theory, feminist theories, postmodernism, and the contributions of individual theorists reviewed and critiqued. T 1:30–3:20

**ANTH 502a, Research in Sociocultural Anthropology: Design and Methods**  
Marcia Inhorn  
The course offers critical evaluation of the nature of ethnographic research. Research design includes the rethinking of site, voice, and ethnographic authority. M 9:25–11:15

**ANTH 503a, Research in Sociocultural Anthropology: Ethnographic Writing and Representation**  
Jafari Allen  
The course examines the representational practices that inform the doing and making of ethnography, broadly construed as the depiction of social life in the past and present. We consider classic and contemporary approaches to ethnography as a literary form as well as explore precedents and possibilities in the visual and performing arts. This is a core Anthropology graduate program course; others admitted only by permission of the instructor. TH 1:30–3:20
ANTH 510a/AMST 650a/HIST 807a, Resistance, Rebellion, and Survival Strategies in Modern Latin America  Gilbert Joseph
An interdisciplinary examination of new conceptual and methodological approaches to such phenomena as peasants in revolution, millenarianism, “banditry,” refugee movements, and transnational migration. TH 3:30–5:20

ANTH 513b, Language, Culture, and Ideology  J. Joseph Errington
Influential anthropological theories of culture are reviewed with critical reference to theories of language that inspired or informed them. Topics include American and European structuralism; cognitivist and interpretivist approaches to cultural description; work of Bakhtin, Bourdieu, and various “critical theorists.” TH 1:30–3:20

ANTH 517a/F&ES 838a, Producing and Consuming Nature  Karen Hébert
This intermediate to advanced seminar brings together readings in social theory with ethnographic case studies to examine the changing means by which elements of the natural world are drawn into circuits of production, exchange, and consumption. How do environmental goods become conceptualized as natural resources for human ends, and, more specifically, remade into commodities that circulate in global markets? The course explores efforts to rethink classical theories of economic processes in light of shifting forms of natural resource transactions and use. Topics examined include agrarian and fisheries transformations; the rise of green consumerism and product certification regimes; and the market valuation of ecosystem goods and services. Course texts are drawn from anthropology, cultural geography, political ecology, sociology, and science and technology studies. W 3:30–5:20

ANTH 538a/INRL 615a, Culture and Politics in the Contemporary Middle East  Marcia Inhorn
This interdisciplinary seminar is designed to introduce students to some of the most pressing contemporary cultural and political issues shaping life in the Middle East and North Africa, as the region enters a tumultuous new decade. The course aims for broad regional coverage, with particular focus on several important nation-states (e.g., Egypt, Saudi Arabia, Afghanistan, Iran, Iraq) and Western interventions in them. Students should emerge with a keener sense of Middle Eastern regional histories and contemporary social issues, as described by leading scholars in the field of Middle Eastern studies and particularly Middle Eastern anthropology. Following an historical introduction, the course is organized around three core themes—Islam, politics, modernity—with movement from the macropolitical level of Islamic discourse and state politics to the most intimate domains of gender, family life, and contemporary youth culture. Through reading, thinking, talking, and writing about a series of book-length monographs, students gain broad exposure to a number of exigent issues in the Middle Eastern region, as well as to the ethnographic methodologies and critical theories of Middle East anthropologists. Students are graded on seminar participation, leadership of seminar discussions, two review/analysis papers, and a comparative written review of three books. Required for Council on Middle East Studies (CMES) graduate certificate students. Recommended for Middle East concentrators in other disciplines. T 9:25–11:15
ANTH 541a/F&ES 836a/HIST 965a/PLSC 779a, Agrarian Societies: Culture, Society, History, and Development  Peter Perdue, James Scott, Kalyanakrishnan Sivaramakrishnan
An interdisciplinary examination of agrarian societies, contemporary and historical, Western and non-Western. Major analytical perspectives from anthropology, economics, history, political science, and environmental studies are used to develop a meaning-centered and historically grounded account of the transformations of rural society. Team-taught. TH 1:30–5:20

ANTH 542b, Cultures and Markets: Asia Connected through Time and Space  Helen Siu
Historical and contemporary movement of people, goods, and cultural meanings that have connected an Asian region spanning East Asia, Indian Ocean, Middle East, and Africa. The course rethinks state-centered and land-based perspectives by highlighting the dynamism in multiethnic commercial nodes, port cities, transregional institutions, and their impact on local societies. It focuses on agents of trade, colonial encounters, diverse religious traditions, and global finance flows. It examines the cultures of capital and market in the age of empires, the neoliberal and postsocialist worlds. W 1:30–3:20

ANTH 552b, Epistemologies of Health, Medicine, and Science  Sean Brotherton
This seminar reviews theoretical positions and debates in the burgeoning fields of medical anthropology and science and technology studies (STS). We begin by reading Georges Canguilhem’s *The Normal and the Pathological* to explore how “disease” and “health” in the early nineteenth century became inseparable from political, economic, and technological imperatives. By highlighting the epistemological foundations of modern biology and medicine, the remainder of the seminar focuses on major perspectives in, and responses to, critical studies of health and medicine, subjectivity and the body, psychiatric anthropology, global health, and humanitarianism and medicine. M 1:30–3:20

ANTH 555b, China-Africa Encounters  Helen Siu
The seminar focuses on layered structures that linked China and Africa in a broad “Asian” context. It cuts through policy polemics to provide historically informed and ethnographically nuanced perspectives. The density and diversity of Chinese activities in Africa have grown dramatically in the last decade, colored by volatile markets and the global reach of China for oil, and agricultural and mineral commodities. Themes to explore include diasporic experiences (informal economies, cultural strategies, ethnic and religious tensions in migrant communities); land, finance, infrastructure, and daily lives (the intertwined worlds of state planners, global investors, and local communities); and the meaning of aid and development (comparisons between postcolonial, neoliberal and late-socialist models and long-term societal impact). T 1:30–3:20

ANTH 557a, Anthropology of the Body  Sean Brotherton
Drawing on a wide and interdisciplinary range of texts, both classic and more recent, the course examines the theoretical debates of the body as a subject of anthropological, historical, psychological, medical, and literary inquiry. We explore specific themes, for example, the persistence of the mind/body dualism; experiences of embodiment/
alienation; phenomenology of the body; Foucauldian notions of biopolitics, bio-power, and the ethic of the self; the medicalized body; and the gendered body, among other salient themes. W 3:30–5:20

**ANTH 560bU, Representing Iran**  Narges Erami

This course introduces students to major themes in Iranian history and culture, as well as builds a critical framework for understanding some of the challenges that face modern Iran today. In reading modern fiction, ethnography, historical narratives, primary sources, and theoretical texts covering local and oral history, revolutions, Islam and secularism, democracy and theocracy, and the role of cinema, students examine the Western production of knowledge about Iran and rethink what we know about such categories as history, culture, and gender. TH 1:30–3:20

**ANTH 561b/F&ES 877b, Anthropology of the Global Economy for Development and Conservation**  Carol Carpenter

The seminar explores topics in the anthropology of the global economy that are relevant to development and conservation policy and practice. Anthropologists are often assumed to focus on micro- or local-level research, and thus to have limited usefulness in the contemporary, global world of development and conservation policy. In fact, however, they have been examining global topics since at least the 1980s, and very little current anthropological research is limited to the village level. More importantly, the anthropological perspective on the global economy is unique and important.

**ANTH 562au, Unity and Diversity in Chinese Culture and Society**  Helen Siu

An exploration of the Chinese identity as it has been reworked over the centuries. Major works in Chinese anthropology and their intellectual connections with general anthropology and historical studies. Topics include kinship and marriage, marketing systems, rituals and popular religion, ethnicity and state making, and the cultural nexus of power. M 1:30–3:20

**ANTH 564au, Language, Nation, and Globalization**  J. Joseph Errington

A study of the ideologies and practices linking languages and nation-states from the nineteenth century through the current period of change in a globalizing political economy. T 9:25–11:15

**ANTH 571bu, Modern Indonesia**  J. Joseph Errington

Political and cultural dynamics in contemporary Indonesia are studied from historical and anthropological perspectives. Readings on various regions and ethnic groups deal with issues of ethnicity, gender, religion, and economy in situations of rapid social change. W 9:25–11:15

**ANTH 572b/F&ES 869b, Disaster, Degradation, Dystopia: Social Science Approaches to Environmental Perturbation and Change**  Michael Dove

This is an advanced seminar on the long tradition of social science scholarship on environmental perturbation and natural disasters, the relevance of which has been heightened by the current global attention to climate change. The course is divided into three main sections. The first consists of central questions and debates in the field: social dimensions
of natural disasters; the discursive dimensions of environmental degradation, focusing on deforestation; and the current debate about the relationship between resource wealth and political conflict, focusing on the “green war” thesis. The second section focuses on anthropological and interdisciplinary approaches to climate change and related topics, encompassing canonical anthropological work on flood and drought; cyclones, El Niño, and interannual cycles; ethno-ecology; and risk. Additional lectures focus on interdisciplinary work. The final section of the course consists of the classroom presentation of work by the students and teaching fellow. Prerequisite: ANTH 581a or 582b. Three-hour lecture/seminar. Enrollment limited to twenty.

**ANTH 575a**, Urban Anthropology and Global History  Helen Siu
Analysis of urban life in historical and contemporary societies. Topics include capitalist and postmodern transformations, class, gender, ethnicity, migration, and global landscapes of power and citizenship. T 1:30–3:20

**ANTH 577a/AFST 577a, Anthropology of the Contemporary: NGOs, States, and International Bodies**  M. Kamari Clarke
This class is about the shift from studying small-scale societies to the “studying up” and making sense of the radical transformations in the world around us. We read ethnographies that examine new legal bodies, reconfigured medical formations, state projects, international organizations, NGOs, and new economic arrangements with the goal of considering the art of studying new institutional networks. M 3:30–5:20

**ANTH 578b**, Postwar Vietnam  Erik Harms
An introduction to the study of Vietnamese society since the end of the Vietnam War in 1975, with a focus on how economic and political changes intersect with cultural and social life. Examination of the historical challenges of postwar socialism, economic renovation, and the intersection of “market-oriented socialism” with class dynamics, urbanization, gender, health care, and ritual life. TH 3:30–5:20

**ANTH 581a/F&ES 520a, Society and Environment: Introduction to Theory and Method**  Michael Dove
An introductory graduate core course on the scope of social scientific contributions to environmental and natural resource issues. Section I presents an overview of the field and course. Section II deals with the way that environmental problems are initially framed. Case studies focus on placing problems in their wider political context, new approaches to uncertainty and failure, and the importance of how the analytical boundaries to resource systems are drawn. Section III focuses on questions of method, including the dynamics of working within development projects, and the art of rapid appraisal and short-term consultancies. Section IV is concerned with local peoples and the environment, with case studies addressing myths of tropical forest use and abuse development discourse, and with the question of indigenous peoples and knowledge. This is a foundations course for the M.E.M. curriculum and a core course in the curriculum for the joint F&ES/Anthropology doctoral program. Three hours lecture/seminar. Enrollment limited to thirty. TH 2:30–5:20
ANTH 583a, Health Disparities and Health Equity: Biocultural Perspectives
Catherine Panter-Brick
A biocultural perspective on debates in medical anthropology and global health that focus on health disparities and equity. The intersection of biological and cultural issues in matters of health research and intervention. Application of theoretical frameworks to case studies in global health inequality. T 1:30–3:20

ANTH 591b/AFAM 647b/WGSS 689b, Black Feminist Theory and Praxis
Jafari Allen
In this course we analyze black feminisms as both political space and scholarly choice. This framework enables us to examine the continuities between black feminist and womanist theorizing in diverse locations, and to explore how different embodied experiences—including genders, histories, geographies, and genealogies—condition divergent perspectives. Themes explored include slavery, colonialism, diaspora consciousness, multiple genders and sexualities, class difference and inequities of power within black communities; representation in popular culture; state violence; poetics and resistance. We employ a transdisciplinary perspective—including anthropology, history, sociology, literature, and film—and challenge notions of “theory” as the province of the West (and North) and the middle class. TH 3:30–5:20

ANTH 597a/F&ES 839a, Social Science of Development and Conservation
Carol Carpenter
The course provides M.E.M., M.E.Sc., and doctoral students with the opportunity to master the essential social science literature on sustainable development and conservation. Social science makes two contributions to the practice of development and conservation. First, it provides ways of thinking about, researching, and working with social groupings—including rural households and communities, but also development and conservation institutions, states, and NGOs. Second, social science tackles the analysis of the knowledge systems that implicitly shape development and conservation policy and impinge on practice. The goal of the course is to stimulate students to apply informed and critical thinking to whatever roles they play in sustainable development and conservation, in order to move toward more environmentally and socially sustainable projects and policies. Three hours lecture/seminar.

ANTH 602bu/FILM 641bu, Ethnographic Filmmaking and Visual Field Methods
Karen Nakamura
Intensive seminar workshop on visual anthropology production and analysis. Readings include core texts in the analysis of visual culture as well as visual anthropology field methods. Students produce a short ethnographic film, ethnophotographic essay, or article on visual culture. TH 1:30–3:20

ANTH 616au, Invisible Economies: Anthropology of the Illicit
Narges Erami
In this seminar we study theories and ethnographies of marginal, hidden, secret, and invisible economies. We look at the manner in which a globalized world has created “new” economies that may be considered criminal by nation-states, as well as “old” economies that have always remained outside of the legitimate framework. W 3:30–5:20
ANTH 622bu/AFST 764bu, Topics in African Studies

ANTH 661au, The Ethnography of Speaking  J. Joseph Errington
The seminar examines the social use of language and focuses on the interrelationships among verbal form, social function, and cultural meaning in varying modalities of spoken communicative interaction. W 1:30–3:20

ANTH 662bu/INRL 624b, Global Health: Ethnographic Perspectives  Marcia Inhorn
This interdisciplinary seminar, designed for graduate students and advanced undergraduates in Anthropology and Global Health, explores anthropological ethnographies on many of the serious health problems facing populations in resource-poor societies around the globe. The course focuses on three major issues: (1) poverty, structural violence, and health as a human right; (2) struggles with infectious disease; and (3) the health of women and children (and men, too). Many major issues of global health concern are addressed, including the health-demoting effects of poverty, racism, patriarchy, and inhumane conditions of life and labor in many countries; men's and women's sexuality in the era of HIV/AIDS; the politics of epidemic disease control and other disasters, and the role of communities, nation-states, and international organizations in responding to such crises; issues of coercion in population control and the quest for reproductive rights; and how child health is ultimately dependent on the health and well-being of mothers. The underlying purpose of the course is to develop students’ awareness of the political, socioeconomic, ecological, and cultural complexity of most health problems in so-called developing nations and the consequent need for anthropological sensitivity, contextualization, and activist involvement in the field of global health. The course is also designed to expose students to salient health issues in many parts of the world, from the United States to China. However, the primary focus is on global health issues facing sub-Saharan Africa and Latin America. Prerequisite: some background in medical anthropology, global health studies, or other relevant fields. T 9:25–11:30

ANTH 663bu/SAST 619b, Ethnicity and Indigeneity in a Mobile World  Sara Shneiderman
Classical literature on ethnicity in conversation with more recent work on indigeneity and mobility. We consider the relationships between place, belonging, and citizenship in shaping contemporary identity practices and discourses. Readings are primarily ethnographic, with a focus on South Asia, but including material from Latin America, Native North America, Southeast and East Asia, Australia/New Zealand, and Africa. TH 1:30–3:20

ANTH 701au/ARCG 701au, Foundations of Modern Archaeology  Richard Burger
How method, theory, and social policy have influenced the development of archaeology as a set of methods, an academic discipline, and a political tool. Prerequisite: a background in the basics of archaeology equivalent to one of the introductory courses. W 1:30–3:20

ANTH 702a/ARCG 702a, Archaeological Approaches to Art and Iconography  Oswaldo Chinchilla
ANTH 712bU/ARCG 712bU, Ancient Civilizations of Mesoamerica  
Oswaldo Chinchilla  
The Indian civilizations of Mexico and Central America from earliest times through the Spanish conquest.

ANTH 718a/ARCG 718a, Archaeological Study of Craft Specialization  
Anne Underhill  
In this seminar we evaluate methods for investigating the nature of craft specialization in antiquity. We consider methods to identify material traces of production activities and insights gained from ethnoarchaeological and ethnohistoric data. Several types of craft production are included. Another component of the course is discussion of the theoretical significance of the nature of craft specialization. W 9:25–11:15

ANTH 720bU/ARCG 720bU, Mesopotamian Origins  
Harvey Weiss  
Analysis of the archaeological and paleoenvironmental data for rain-fed and irrigation agriculture settlement, subsistence, and politico-economic innovation from the earliest sedentary agriculture villages, to the earliest cities and states, to the earliest empire. What combinations of dynamic social and environmental forces drove these developments in these regions during this ten thousand year span? TH 9:25–11:15

ANTH 726aU/ARCG 726aU, Ancient Civilizations of the Eurasian Steppes  
William Honeychurch  
Peoples of the steppe zone, stretching from Eastern Europe to Mongolia, have played a pivotal role in Old World prehistory, though much about their societies and lifeways is still shrouded in mystery. The archaeology of this macro-region has developed rapidly since the 1990s, and this course presents an overview of major topics and debates in the region based on what archaeologists currently know about Eurasian steppe societies of the past. F 9:25–11:15

ANTH 736bU/ARCG 736bU, The Archaeology of Asian Civilizations  
William Honeychurch  
F 9:25–11:15

ANTH 744bU/ARCG 744bU, Social Archaeology  
Anne Underhill  
This seminar addresses how archaeologists make interpretations about different kinds of social groups that existed in the past. We consider groups at various social scales formed on the basis of residence, gender, class, occupation, and other factors. T 9:25–11:15

ANTH 750bU/ARCG 750bU, Analysis of Lithic Technology  
Oswaldo Chinchilla  
This course is intended to provide an introduction to the analysis of the chipped and ground stone tools found on archaeological sites. As a laboratory course, it includes hands-on instruction: we learn how to manufacture chipped stone tools out of obsidian. We begin by reviewing the development of chipped and ground stone tool technology from the earliest simple pebble tools to historical period tools. We discuss the relevance of lithics research to issues of subsistence, craft specialization, and trade. We also discuss how these artifacts are recorded, analyzed, and drawn, and we review related studies such as sourcing and use-wear analysis.
ANTH 754au/ARCG 754au, Statistics for Archaeological Analysis  
William Honeychurch

An introduction to quantitative data collection, analysis, and argumentation for archaeologists. Lectures, readings, and exercises emphasize the exploration, visualization, and analysis of specifically archaeological data using simple statistical approaches. No prior knowledge of statistics is required. F 2:30–4:20

ANTH 755b/ARCG 755b, Inca Culture and Society  
Richard Burger

The history and organization of the Inca empire and its impact on the nations and cultures conquered by it. The role of archaeology in understanding the transformation of Andean lifeways is explored, as is the interplay between ethnohistoric and archaeological approaches to the subject. T 2:30–4:20

ANTH 763au/ARCG 763au/NELC 589au, Archaeologies of Empire  
Harvey Weiss

Comparative study of origins, structures, efficiencies, and limitations of imperialism, ancient and modern, in the Old and New World, from Akkad to “Indochine,” and from Wari to Aztec. The contrast between ancient and modern imperialisms examined from the perspectives of nineteenth- and twentieth-century archaeology and political economy. TH 2:30–4:20

ANTH 764au/ARCG 764au, Archaeology of the Aztecs  
Oswaldo Chinchilla

An anthropological and ethnohistorical examination of the Aztec civilization that dominated much of Mexico from the fourteenth century until the Spanish Conquest of 1521.

ANTH 771bu/ARCG 771bu, Early Complex Societies  
Richard Burger, Roderick McIntosh

A consideration of theories and methods developed by archaeologists to recognize and understand complex societies in prehistory. Topics include the nature of social differentiation and stratification as applied in archaeological interpretation; emergence of complex societies in human history; case studies of societies known ethnographically and archaeologically. MW 9–10:15

ANTH 773bu/ARCG 773bu/F&ES 793b/NELC 588bu, Abrupt Climate Change and Societal Collapse  
Harvey Weiss

Collapse documented in the archaeological and early historical records of the Old and New Worlds, including Mesopotamia, Mesoamerica, the Andes, and Europe. Analysis of politico-economic vulnerabilities, resiliencies, and adaptations in the face of abrupt climate change, anthropogenic environmental degradation, resource depletion, “barbarian” incursions, or class conflict. TH 1:30–3:20

ANTH 776bu/ARCG 776bu, GIS and Spatial Analysis for Archaeology  
William Honeychurch

Introduction to the practice of Geographical Information Systems in anthropology with attention to archaeological applications. The growing use of GIS among anthropologists has transformed the way we carry out research and conceive of space. The course draws on research examples from a range of theoretical, analytical, and geographical contexts and introduces students to current software. Emphasis is placed on understanding how anthropological archaeologists have employed GIS as part of generating evidence to assess their hypotheses. F 2:30–4:20
ANTH 785bu/ARCG 785bu, Archaeological Ceramics I  Anne Underhill
This seminar addresses how archaeologists analyze and interpret ceramics, arguably the most common type of object found in ancient sites. Readings, discussions, and opportunities for practical work focus on what different aspects of ceramic vessels reveal about the people who made and used them. TTH 1–2:15

ANTH 812au, Topics in Anthropological Genetics  Brenda Bradley
A detailed examination of molecular approaches to understanding human evolution and diversity. Emphasis is on current research findings and new methodologies exploring topics such as human origins and hominin evolution, population genomics, molecular adaptations, epigenetics, and gene–culture interactions. We also consider relevant social and ethical issues, including commercial DNA testing and ownership of biological samples. M 2:30–4:20

ANTH 820bu, Primate Genomics  Brenda Bradley
A detailed exploration of molecular approaches to understanding primate behavior, ecology, and evolution. The course examines how the new wealth of genomic data aid primatological research on issues such as sexual selection; sociality and cooperation among kin and non-kin; phylogenomics and taxonomy; dietary, morphological, and behavioral adaptations; and migration, distribution, and conservation. W 2:30–4:20

ANTH 822a/ARCG 822a, Topics and Issues in Human Evolution  Andrew Hill
Topics from the span of primate evolution are covered: the early primates, origin of modern-type primates, anthropoid origins, monkey and hominoid evolution. Readings and discussions focus on issues of taxonomy—judging morphological similarities and differences among fossils. Specific attention paid to traits paleontologists use to assign fossils to species and functional/behavioral significance of those traits. Lectures and lab use of fossils provide background on fossil evidence. Open to qualified undergraduates. TH 1:30–3:20

[ANTH 829b, Primate Evolution]

ANTH 835bu/E&EB 842bu, Primate Diversity and Evolution  Eric Sargis
Examination of the diversity and evolutionary history of living and extinct primates. Focus on major controversies in primate systematics and evolution, including the origins and relationships of several groups. Consideration of both morphological and molecular studies. Morphological diversity and adaptations explored through museum specimens and fossil casts. W 1:30–3:20

ANTH 843a, Evolutionary Biology of Human Aging  Richard Bribiescas
Aging is an aspect of evolutionary biology that is common to the life histories all organisms, including humans. Moreover, humans exhibit biological characteristics of aging that are both unique to our species and common to other organisms. This seminar aims to address how human aging has evolved and how it may inform our present understanding of age-related diseases. Topics to be covered include the somatic and behavioral aspects of aging, male and female reproductive senescence, the relationship between investment in reproduction and rates of aging, as well as the comparative physiology of aging. Open to advanced undergraduates with permission of the instructor. T 1:30–3:20
ANTH 856aU/ARCG 856aU, Reconstructing Human Evolution: An Ecological Approach  Andrew Hill
If human evolutionary change has been determined or affected by ecological factors, such as changes in climate, competition with other animals, and availability and kinds of food supply, then it is important to determine ecological and environmental information about the regions and time period in which human evolution has occurred. Examination of methods for obtaining data relevant to such information, and for evaluating the techniques and results of such other fields as geology, paleobotany, and paleozoology. Ethnographic, primatological, and other biological models of early human behavior. W 1:30–3:20

ANTH 864bU/ARCG 864bU, Human Osteology  Eric Sargis
A lecture and laboratory course focusing on the characteristics of the human skeleton and its use in studies of functional morphology, paleodemography, and paleopathology. Laboratories familiarize students with skeletal parts; lectures focus on the nature of bone tissue, its biomechanical modification, sexing, aging, and interpretation of lesions. TTH 2:30–3:45

ANTH 941a and b, Research Seminar in Japan Anthropology  William Kelly
The seminar offers professional preparation for doctoral students in Japan anthropology through systematic readings and analysis of the anthropological literature, in English and in Japanese. Prerequisite: permission of the instructor.

ANTH 942b, Research Seminar in South Asia Anthropology  Kalyanakrishnan Sivaramakrishnan
The seminar is for students preparing to become scholars of South Asia. It consists of systematic reading, analysis, discussion, and writing about the anthropological literature in English. It deals with a selection of key ethnographic monographs that cover important topics and debates in the anthropology of South Asia and India including caste, class, community, gender, language, development, environment, politics, and popular culture. Students actively prepare and lead discussions, and write either a proposal or research paper at the end of the term. The seminar is designed for doctoral students working on South Asia. Others with appropriate background and interests may be admitted by permission of the instructor. W 1:30–3:20

ANTH 951a and b, Directed Research in Ethnology and Social Anthropology
By arrangement with faculty.

ANTH 952a and b, Directed Research in Linguistics
By arrangement with faculty.

ANTH 953a and b, Directed Research in Archaeology and Prehistory
By arrangement with faculty.

ANTH 954a and b, Directed Research in Biological Anthropology
By arrangement with faculty.
APPLIED MATHEMATICS

A. K. Watson Hall, 203.432.1278
www.cs.yale.edu/appliedmath2
M.S., M.Phil., Ph.D.

Director of Graduate Studies
Peter Jones

Professors  Andrew Barron (Statistics), Donald Brown (Economics; Mathematics; School of Management), Joseph Chang (Statistics), Ronald Coifman (Mathematics; Computer Science), Gustave Davis (Pathology), Eric Denardo (Operations Research), Stanley Eisenstat (Computer Science), Michael Fischer (Computer Science), Roger Howe (Mathematics), Peter Jones (Mathematics), David Pollard (Statistics), Nicholas Read (Physics; Applied Physics; Mathematics), Vladimir Rokhlin (Computer Science; Mathematics), Herbert Scarf (Emeritus, Economics), Martin Schultz (Emeritus, Computer Science), Mitchell Smooke (Mechanical Engineering & Materials Science; Applied Physics), Daniel Spielman (Computer Science), Van Vu (Mathematics), Günter Wagner (Ecology & Evolutionary Biology), Xiao-Jing Wang (Neurobiology), John Wettlaufer (Geology & Geophysics; Physics), Huibin Zhou (Statistics), Steven Zucker (Computer Science; Biomedical Engineering)

Associate Professors  John Emerson (Statistics), Josephine Hoh (Public Health), Yuval Kluger (Pathology), Michael Krauthammer (Pathology), Sekhar Tatakonda (Electrical Engineering; Statistics; Computer Science)

Assistant Professors  Lisha Chen (Statistics), Kim Dang, Thierry Emonet (Molecular, Cellular & Developmental Biology; Physics), Mokshay Madiman (Statistics), Andrei Osipov, Ronen Talmon

Fields of Study

The graduate Program in Applied Mathematics comprises the study and application of mathematics to problems motivated by a wide range of application domains. Areas of concentration include the analysis of data in very high-dimensional spaces, the geometry of information, computational biology, and randomized algorithms. Topics covered by the program include classical and modern applied harmonic analysis, linear and nonlinear partial differential equations, numerical analysis, scientific computing and applications, discrete algorithms, combinatorics and combinatorial optimization, graph algorithms, geometric algorithms, discrete mathematics and applications, statistical theory and applications, probability theory and applications, information theory, econometrics, financial mathematics, statistical computing, and applications of mathematical and computational techniques to fluid mechanics, combustion, and other scientific and engineering problems.

Requirements for the Ph.D. in Applied Mathematics

All students are required to: (1) complete twelve term courses (including reading courses) at the graduate level, at least two with Honors grades; (2) pass a qualifying examination
on their general applied mathematical knowledge (in algebra, analysis, and probability and statistics) by the end of their second year; (3) submit a dissertation prospectus; (4) participate in the instruction of undergraduates; (5) be in residence for at least three years; and (6) complete a dissertation that clearly advances understanding of the subject it considers. Prior to registering for a second year of study, and in addition to all other academic requirements, students must successfully complete MATH 991a, Ethical Conduct of Research, or another approved course on responsible conduct in research. Teaching is considered an integral part of training at Yale University, so all students are expected to complete two terms of teaching within their first two years. The normal time for completion of the Ph.D. program is four years.

Requirement (1) normally includes four core courses in each of the methods of applied analysis, numerical computation, algorithms, and probability; these should be taken during the first year. The qualifying examination is normally taken by the end of the third term and will test knowledge of the core courses as well as more specialized topics. The thesis is expected to be independent work, done under the guidance of an adviser. This adviser should be contacted not long after the student passes the qualifying examinations. A student is admitted to candidacy after completing requirements (1)–(5) and obtaining an adviser.

In addition to the above, all first-year students (including terminal M.S. students) must successfully complete one course on the responsible conduct of research (e.g., MATH 991 or CPSC 991) and AMTH 525, Seminar in Applied Mathematics.

**Honors Requirement**

Students must meet the Graduate School’s Honors requirement by the end of the fourth term of full-time study.

**Master’s Degrees**

**M. Phil.** See Degree Requirements under Policies and Regulations.

**M.S. (en route to the Ph.D.)** The M.S. degree is a terminal degree and is not awarded en route to the Ph.D. Students who withdraw from the Ph.D. program may be eligible for the M.S. if they meet the requirements of the terminal master’s degree program (below).

**Terminal Master’s Degree Program** Students may also be admitted to a terminal master’s degree program directly. This program is normally completed in one year, but a part-time program may be spread over as many as four years. To qualify for the M.S., the student must pass ten graduate-level courses. Courses taken as part of the M.S. program must be preapproved by the director of graduate studies to ensure that a suitable distribution of topics is covered.

Program materials and additional information concerning degrees offered and admissions requirements are available upon request to the Graduate School of Arts and Sciences, Yale University, PO Box 208323, New Haven CT 06520-8323.
Courses

**AMTH 525, Seminar in Applied Mathematics**
This course consists of weekly seminar talks given by a wide range of speakers. Required for all first-year students.

**AMTH 561a/CPSC 662a, Spectral Graph Theory**  Daniel Spielman
An applied approach to spectral graph theory. The combinatorial meaning of the eigenvalues and eigenvectors of matrices associated with graphs. Applications to optimization, numerical linear algebra, error-correcting codes, computational biology, and the discovery of graph structure.

**[AMTH 562aU/CPSC 562aU, Graphs and Networks]**

**[AMTH 605b/ENAS 503b/STAT 667b, Probabilistic Networks, Algorithms, and Applications]**

**[AMTH 664aU, Topics in Computational Biology]**

**AMTH 665bU/CB&B 561b/MCDB 561bU/PHYS 529b, Systems Modeling in Biology**
Thierry Emonet, Steven Kleinstein, Kathryn Miller-Jensen, Xiao-Jing Wang, Steven Zucker
An introduction to the techniques of integrating knowledge from mathematics, physics, and engineering into the analysis of complex living systems. Use of these techniques to address key questions about the design principles of biological systems. Discussion of experiments and corresponding mathematical models. Reading of research papers from the literature. Students build their own models using MATLAB. **TTH 2:30–3:45**

**AMTH 666b/ASTR 666b/G&G 666b, Statistical Thermodynamics for Astrophysics and Geophysics**  John Wettlaufer
Classical thermodynamics is derived from statistical thermodynamics. Using the multi-particle nature of physical systems, we derive ergodicity, the central limit theorem, and the elemental description of the second law of thermodynamics. We then develop kinetics, transport theory, and reciprocity from the linear thermodynamics of irreversible processes. Topics of focus include Onsager reciprocal relations, the Fokker-Planck equation, stability in the sense of Lyapunov, and time invariance symmetry. We explore phenomena that are of direct relevance to astrophysical and geophysical settings. No quantum mechanics is necessary as a prerequisite.

**AMTH 667b, Advanced Computational Vision**  Steven Zucker
An advanced course in computational vision, with emphasis on object recognition, shape analysis, learning, and perceptual organization. A background in computer vision, biological vision, or equivalent is necessary. Prerequisite: CPSC 575b or equivalent, or permission of the instructor.
APPLIED PHYSICS

Becton Center, 203.432.9654
www.yale.edu/appliedphysics
M.S., M.Phil., Ph.D.

Chair
A. Douglas Stone

Director of Graduate Studies
Michel Devoret (413 BCT, 203.432.4277)

Associate Professors  Jack Harris, Sohrab Ismail-Beigi

Assistant Professors  Liang Jiang, Peter Rakich

Fields of Study
Fields include areas of theoretical and experimental condensed-matter and materials physics, optical and laser physics, quantum engineering, and nanoscale science. Specific programs include surface and interface science, first principles electronic structure methods, photonic materials and devices, complex oxides, magnetic and superconducting artificially engineered systems, quantum computing and superconducting device research, quantum transport and nanotube physics, quantum optics, and random lasers.

Special Admissions Requirements
The prerequisites for work toward a Ph.D. degree in Applied Physics include a sound undergraduate training in physics and a good mathematical background. The GRE General Test is required, and the Subject Test in Physics is strongly recommended.

Integrated Graduate Program in Physical and Engineering Biology (IGPPEB)
The Yale IGPPEB program brings together faculty drawn mainly from five member areas (MB&B, MCDB, Physics, Applied Physics, and Engineering). All faculty involved recognize the importance of interdisciplinary research at the interface of the biological and physical sciences, and have recently developed interdisciplinary research collaborations among IGPPEB colleagues. Core courses for Applied Physics students in this Ph.D. program are listed below.

Special Requirements for the Ph.D. Degree
The student plans his/her course of study in consultation with faculty advisers (the student’s advisory committee). A minimum of twelve term courses is required. These
courses must be full-credit graduate courses with clear technical, scientific, or mathematical focus, and they are to be completed in the first two years. These twelve courses must include seven core courses. The first core course satisfies the math requirement, must be fulfilled in the first year, and is met by taking Mathematical Methods I (APHY 500a) or Mathematical Methods of Physics (PHYS 506a). The remaining six core courses are Solid State Physics I (APHY 548a) and II (APHY 549b), Quantum Mechanics I (PHYS 508a) and II (PHYS 608b), Electromagnetic Theory I (PHYS 502b), and Statistical Physics I (PHYS 512b). It is expected that most of these six core courses will be taken in the first year; no more than two may be taken in the second year. No more than two of the twelve courses can be Special Investigations, and at least two must be outside the area of the dissertation.

Students in the IGPPEB program must also take Methods and Logic in Interdisciplinary Research (ENAS 517a), Biological Physics (ENAS 541a), Biology Boot Camp (MB&B 520a1), Integrated Workshop (ENAS 991b), and Systems Modeling in Biology (MCDB 561b).

Well-prepared students may be able to place out of up to two of the seven required core courses after demonstrating equivalent training and competence by passing a written exam in the relevant subject. Success in such an exam will reduce the total course requirement by one for each exam passed.

All students must complete the one-term course Responsible Conduct of Research (APHY 508b) in the first year of study.

Each term, the faculty review the overall performance of the student and report their findings to the director of graduate studies (DGS), who determines whether the student may continue toward the Ph.D. degree. By the end of the second term, it is expected that a faculty member has agreed to accept the student as a research assistant. By December 5 of the third year, an area examination must be passed and a written prospectus submitted before dissertation research is begun. These events result in the student's admission to candidacy. Subsequently, the student will report orally each year to the full advisory committee on progress. When the research is nearing completion, but before the thesis writing has commenced, the full advisory committee will advise the student on the thesis plan. A final oral presentation of the dissertation research is required to be given during term time.

There is no foreign language requirement.

Teaching experience is regarded as an integral part of the graduate training program at Yale University, and all Applied Physics graduate students are required to serve as a Teaching Fellow for one term, typically during year two. Teaching duties normally involve assisting in laboratories or discussion sections and grading papers and are not expected to require more than ten hours per week. Students are not permitted to teach during the first year of study.

If a student was admitted to the program having earned a score of less than 26 on the Speaking Section of the Internet-based TOEFL, the student will be required to take an English as a Second Language (ESL) course each term at Yale until the Graduate School's Oral English Proficiency standard has been met. This must be achieved by the end of the third year in order for the student to remain in good standing.
Honors Requirement

Students must meet the Graduate School’s Honors requirement in at least two term courses (excluding Special Investigations) by the end of the second term of full-time study. An extension of one term may be granted at the discretion of the DGS.

Master’s Degrees

M.Phil.  See Degree Requirements under Policies and Regulations.

M.S. (en route to the Ph.D.)  To qualify for the M.S., the student must pass eight term courses; no more than two may be Special Investigations. An average grade of at least High Pass is required, with at least one grade of Honors.

Terminal Master’s Degree Program  Students may also be admitted directly to a terminal master’s degree program. The requirements are the same as for the M.S. en route to the Ph.D., although there are no core course requirements for students in this program. This program is normally completed in one year, but a part-time program may be spread over as many as four years. Some courses are available in the evening, to suit the needs of students from local industry.

Program materials are available upon request to the Director of Graduate Studies, Department of Applied Physics, Yale University, PO Box 208267, New Haven CT 06520-8267; e-mail, applied.physics@yale.edu; Web site, www.yale.edu/appliedphysics.

Courses

The list of courses may be slightly modified by the time the term begins. Please check the Web site http://students.yale.edu/oci for the most up-to-date course listing.

APHY 500a/ENAS 500a, Mathematical Methods I  Paul Van Tassel
A beginning, graduate-level introduction to ordinary and partial differential equations, vector analysis, linear algebra, and complex functions. Laplace transform, series expansion, Fourier transform, and matrix methods are given particular attention. Applications to problems frequently encountered in engineering practice are stressed throughout.

TTH 9–10:15

APHY 506au, Basic Quantum Mechanics  Sohrab Ismail-Beigi
Basic concepts and techniques of quantum mechanics essential for solid state physics and quantum electronics. Topics include the Schrödinger treatment of the harmonic oscillator, atoms and molecules and tunneling, matrix methods, and perturbation theory.

TTH 2:30–3:45

APHY 508b/ENAS 508b, Responsible Conduct of Research
Required for first-year students. Presentation and discussion of topics and best practices relevant to responsible conduct of research including academic fraud and misconduct, conflict of interest and conflict of commitment, data acquisition and human subjects, use and care of animals, publication practices and responsible authorship, mentor/trainee responsibilities and peer review, and collaborative science.
A two-term sequence covering the principles underlying the electrical, thermal, magnetic, and optical properties of solids, including crystal structures, phonons, energy bands, semiconductors, Fermi surfaces, magnetic resonance, phase transitions, and superconductivity. Fall: TTH 1–2:15; Spring: TTH 2:30–3:45

APHY 610b/PHYS 610b, Quantum Many-Body Theory  Leonid Glazman
Second quantization, quantum statistical mechanics, Hartree-Fock approximation, linear response theory, random phase approximation, perturbation theory and Feynman diagrams, Landau theory of Fermi liquids, BCS theory, Hartree-Fock-Bogoliubov method. Applications to solids and finite-size systems such as quantum dots, nuclei, and nanoparticles. TTH 11:35–12:50

[APHY 633b/PHYS 633b, Introduction to Superconductivity]

[APHY 634a/PHYS 634a, Mesoscopic Physics I]

[APHY 667b/PHYS 667b, Special Topics in Condensed Matter Physics: Quantum Hall Effect and Conformal Field Theory]

APHY 675a/PHYS 675a, Principles of Optics with Applications  Hui Cao
Introduction to the principles of optics and electromagnetic wave phenomena with applications to microscopy, optical fibers, laser spectroscopy, nanophotonics, plasmonics, and metamaterials. Topics include propagation of light, reflection and refraction, guiding light, polarization, interference, diffraction, scattering, Fourier optics, and optical coherence. TTH 11:35–12:50

APHY 677a/PHYS 677a, Noise, Dissipation, Amplification, and Information  Michel Devoret
Graduate-level non-equilibrium statistical physics applied to noise phenomena, both classical and quantum. The aim of the course is to explain the fundamental link between the random fluctuations of a physical system in steady state and the response of the same system to an external perturbation. Several key examples in which noise appears as a resource rather than a limitation are treated: spin relaxation in nuclear magnetic resonance (motional narrowing), Johnson-Nyquist noise in solid state transport physics (noise thermometry), photon correlation measurements in quantum optics (Hanbury Brown-Twiss experiment), and so on. The course explores both passive and active systems. It discusses the ultimate limits of amplifier sensitivity and speed in physics measurements. MW 9–10:15

APHY 679a/PHYS 679a, Nonlinear Optics and Lasers  Hui Cao
APHY 816a/PHYS 816a, Techniques of Microwave Measurements and RF Design
Robert Schoelkopf
An advanced course covering the concepts and techniques of radio-frequency design and their application in making microwave measurements. The course begins with a review of lumped element and transmission line circuits, network analysis, and design of passive elements, including filters and impedance transformers. We continue with a treatment of passive and active components such as couplers, circulators, amplifiers, and modulators. Finally, we employ this understanding for the design of microwave measurement systems and techniques for modulation and signal recovery, to analyze the performance of heterodyne/homodyne receivers and radiometers. MW 11:35–12:50
ARCHAEOLOGICAL STUDIES

10 Sachem Street, 203.432.3670
www.yale.edu/archaeology
M.A.

Chair and Director of Graduate Studies
Richard Burger (Anthropology)

Professors  Richard Burger (Anthropology), Edward Cooke, Jr. (History of Art), John Darnell (Near Eastern Languages & Civilizations), Eckart Frahm (Near Eastern Languages & Civilizations), Valerie Hansen (History), Leo Hickey (Geology & Geophysics), Andrew Hill (Anthropology), Diana Kleiner (Classics; History of Art), Roderick McIntosh (Anthropology), Mary Miller (History of Art), Eric Sargis (Anthropology), Ronald Smith (Geology & Geophysics), Anne Underhill (Anthropology), Harvey Weiss (Near Eastern Languages & Civilizations)

Assistant Professors  Oswaldo Chinchilla (Anthropology), Milette Gaifman (History of Art; Classics), William Honeychurch (Anthropology), Colleen Manassa (Near Eastern Languages & Civilizations)

Lecturer  Karen Foster (Near Eastern Languages & Civilizations)

The aims of the program are to give students the academic background needed for careers in museums, the conservation of archaeological resources, and teaching in community colleges and secondary schools, and to provide the opportunity for teachers, curators, and administrators to refresh themselves on recent developments in archaeology. In addition, the program allows some of our students to strengthen their background in archaeology before applying to Ph.D. programs. The program is administered by Yale’s Council on Archaeological Studies, with faculty from the departments of Anthropology, Classics, Geology & Geophysics, History, History of Art, and Near Eastern Languages & Civilizations.

Special Admissions Requirements
The GRE General Test; an archaeology background is recommended but not required.

Special Requirements for the M.A. Degree
Courses are drawn from the graduate programs of the participating departments and from those undergraduate courses that are also open to graduate students. Eight courses are required. Unless previously taken for credit, these will include the archeological laboratory overview; at least one additional laboratory course; a course related to archaeology in each of the following three groups: (1) Anthropology; (2) Classics, History of Art, or Near Eastern Languages & Civilizations; (3) Ecology & Evolutionary Biology, Forestry & Environmental Studies, or Geology & Geophysics; and three electives. All students are required to participate in an approved summer field project. In addition, each student will write a master’s thesis. Degree candidates are required to pay a minimum of one year of full tuition. Full-time students can complete the course requirements in one academic
year, and all students are expected to complete the program within a maximum period of three academic years.

For further information, visit the Archaeological Studies Web site, www.yale.edu/archaeology. Inquiries may be directed to Director of Graduate Studies, c/o Registrar, Archaeological Studies, Department of Anthropology, Yale University, PO Box 208277, New Haven CT 06520-8277, or via e-mail, archaeology@yale.edu.

Courses

**ARCG 623au/NELC 620au/WGSS 622au, Lives in Ancient Egypt**  Colleen Manassa
Introduction to the social history of ancient Egypt, from 3100 to 30 B.C.E., with particular focus on the lives of individuals attested in the textual and archaeological record, from pharaohs and queens to artists, soldiers, and farmers. Readings of primary sources in translation, and course projects integrating ancient objects in Yale collections. **MW 10:30–11:20**

**ARCG 701au/ANTH 701au, Foundations of Modern Archaeology**  Richard Burger
How method, theory, and social policy have influenced the development of archaeology as a set of methods, an academic discipline, and a political tool. Prerequisite: a background in the basics of archaeology equivalent to one of the introductory courses. **W 1:30–3:20**

**ARCG 702a/ANTH 702a, Archaeological Approaches to Art and Iconography**  Oswaldo Chinchilla

**ARCG 712bu/ANTH 712bu, Ancient Civilizations of Mesoamerica**  Oswaldo Chinchilla
The Indian civilizations of Mexico and Central America from earliest times through the Spanish conquest.

**ARCG 718a/ANTH 718a, Archaeological Study of Craft Specialization**  Anne Underhill
In this seminar we evaluate methods for investigating the nature of craft specialization in antiquity. We consider methods to identify material traces of production activities and insights gained from ethnoarchaeological and ethnohistoric data. Several types of craft production are included. Another component of the course is discussion of the theoretical significance of the nature of craft specialization. **W 9:25–11:15**

**ARCG 720bu/ANTH 720bu, Mesopotamian Origins**  Harvey Weiss
Analysis of the archaeological and paleoenvironmental data for rain-fed and irrigation agriculture settlement, subsistence, and politico-economic innovation from the earliest sedentary agriculture villages, to the earliest cities and states, to the earliest empire. What combinations of dynamic social and environmental forces drove these developments in these regions during this ten thousand year span? **TH 9:25–11:15**

**ARCG 726au/ANTH 726au, Ancient Civilizations of the Eurasian Steppes**  William Honeychurch
Peoples of the steppe zone, stretching from Eastern Europe to Mongolia, have played a pivotal role in Old World prehistory, though much about their societies and lifeways is
still shrouded in mystery. The archaeology of this macro-region has developed rapidly since the 1990s, and this course presents an overview of major topics and debates in the region based on what archaeologists currently know about Eurasian steppe societies of the past. F 9:25–11:15

ARCG 736b/ANTH 736b, The Archaeology of Asian Civilizations  
William Honeychurch  
F 9:25–11:15

ARCG 744b/ANTH 744b, Social Archaeology  
Anne Underhill  
This seminar addresses how archaeologists make interpretations about different kinds of social groups that existed in the past. We consider groups at various social scales formed on the basis of residence, gender, class, occupation, and other factors. T 9:25–11:15

ARCG 750b/ANTH 750b, Analysis of Lithic Technology  
Oswaldo Chinchilla  
This course is intended to provide an introduction to the analysis of the chipped and ground stone tools found on archaeological sites. As a laboratory course, it includes hands-on instruction: we learn how to manufacture chipped stone tools out of obsidian. We begin by reviewing the development of chipped and ground stone tool technology from the earliest simple pebble tools to historical period tools. We discuss the relevance of lithics research to issues of subsistence, craft specialization, and trade. We also discuss how these artifacts are recorded, analyzed, and drawn, and we review related studies such as sourcing and use-wear analysis.

ARCG 754a/ANTH 754a, Statistics for Archaeological Analysis  
William Honeychurch  
An introduction to quantitative data collection, analysis, and argumentation for archaeologists. Lectures, readings, and exercises emphasize the exploration, visualization, and analysis of specifically archaeological data using simple statistical approaches. No prior knowledge of statistics is required. F 2:30–4:20

ARCG 755b/ANTH 755b, Inca Culture and Society  
Richard Burger  
The history and organization of the Inca empire and its impact on the nations and cultures conquered by it. The role of archaeology in understanding the transformation of Andean lifeways is explored, as is the interplay between ethnohistoric and archaeological approaches to the subject. T 2:30–4:20

ARCG 762b/EMD 548b/F&ES 726b/G&G 562b, Observing Earth from Space  
Ronald Smith  
A practical introduction to satellite image analysis of Earth’s surface. Topics include the spectrum of electromagnetic radiation, satellite-borne radiometers, data transmission and storage, computer image analysis, the merging of satellite imagery with GIS and applications to weather and climate, oceanography, surficial geology, ecology and epidemiology, forestry, agriculture, archaeology, and watershed management.

ARCG 763a/ANTH 763a/NELC 589a, Archaeologies of Empire  
Harvey Weiss  
Comparative study of origins, structures, efficiencies, and limitations of imperialism, ancient and modern, in the Old and New World, from Akkad to “Indochine,” and from
Wari to Aztec. The contrast between ancient and modern imperialisms examined from the perspectives of nineteenth- and twentieth-century archaeology and political economy. TH 2:30–4:20

**ARCG 764a/ANTH 764a, Archaeology of the Aztecs**  Oswaldo Chinchilla
An anthropological and ethnohistorical examination of the Aztec civilization that dominated much of Mexico from the fourteenth century until the Spanish Conquest of 1521.

**ARCG 771b/ANTH 771b, Early Complex Societies**  Richard Burger, Roderick McIntosh
A consideration of theories and methods developed by archaeologists to recognize and understand complex societies in prehistory. Topics include the nature of social differentiation and stratification as applied in archaeological interpretation; emergence of complex societies in human history; case studies of societies known ethnographically and archaeologically. MW 9–10:15

**ARCG 773b/ANTH 773b/F&ES 793b/NELC 588b, Abrupt Climate Change and Societal Collapse**  Harvey Weiss
Collapse documented in the archaeological and early historical records of the Old and New Worlds, including Mesopotamia, Mesoamerica, the Andes, and Europe. Analysis of politico-economic vulnerabilities, resiliencies, and adaptations in the face of abrupt climate change, anthropogenic environmental degradation, resource depletion, “barbarian” incursions, or class conflict. TH 1:30–3:20

**ARCG 776b/ANTH 776b, GIS and Spatial Analysis for Archaeology**  William Honeychurch
Introduction to the practice of Geographical Information Systems in anthropology with attention to archaeological applications. The growing use of GIS among anthropologists has transformed the way we carry out research and conceive of space. The course draws on research examples from a range of theoretical, analytical, and geographical contexts and introduces students to current software. Emphasis is placed on understanding how anthropological archaeologists have employed GIS as part of generating evidence to assess their hypotheses. F 2:30–4:20

**ARCG 785b/ANTH 785b, Archaeological Ceramics I**  Anne Underhill
This seminar addresses how archaeologists analyze and interpret ceramics, arguably the most common type of object found in ancient sites. Readings, discussions, and opportunities for practical work focus on what different aspects of ceramic vessels reveal about the people who made and used them. TTH 1–2:15

**ARCG 822a/ANTH 822a, Topics and Issues in Human Evolution**  Andrew Hill
Topics from the span of primate evolution are covered: the early primates, origin of modern-type primates, anthropoid origins, monkey and hominoid evolution. Readings and discussions focus on issues of taxonomy – judging morphological similarities and differences among fossils. Specific attention paid to traits paleontologists use to assign fossils to species and functional/behavioral significance of those traits. Lectures and lab use of fossils provide background on fossil evidence. Open to qualified undergraduates. TH 1:30–3:20
ARCG 856au/ANTH 856au, Reconstructing Human Evolution: An Ecological Approach  Andrew Hill
If human evolutionary change has been determined or affected by ecological factors, such as changes in climate, competition with other animals, and availability and kinds of food supply, then it is important to determine ecological and environmental information about the regions and time period in which human evolution has occurred. Examination of methods for obtaining data relevant to such information, and for evaluating the techniques and results of such other fields as geology, paleobotany, and paleozoology. Ethnographic, primatological, and other biological models of early human behavior.

W 1:30–3:20

ARCG 864bu/ANTH 864bu, Human Osteology  Eric Sargis
A lecture and laboratory course focusing on the characteristics of the human skeleton and its use in studies of functional morphology, paleodemography, and paleopathology. Laboratories familiarize students with skeletal parts; lectures focus on the nature of bone tissue, its biomechanical modification, sexing, aging, and interpretation of lesions.

TTH 2:30–3:45

ARCG 953a or b, Directed Research in Archaeology and Prehistory
By arrangement with faculty.
ARCHITECTURE

M.Phil., Ph.D.

Dean
Robert A. M. Stern

Director of Graduate Studies
Kurt Forster (316 Rudolph, 203.432.0692, kurt.forster@yale.edu)

Professors  Michelle Addington, Mario Carpo, Peggy Deamer, Keller Easterling, Peter Eisenman, Kurt Forster, Dolores Hayden, Stanislaus von Moos, Alan Plattus, Robert A. M. Stern

Associate Professors  Mark Foster Gage, Keith Krumwiede, Eeva-Liisa Pelkonen, Emmanuel Petit

Assistant Professor  Kyoung Sun Moon

Adjunct Faculty  Thomas Beeby, Deborah Berke, Kent Bloomer, Turner Brooks, Alexander Garvin, Steven Harris, John Jacobson, Fred Koetter, Edward Mitchell, Joel Sanders

Fields of Study

The five-year doctoral program prepares candidates for careers in university teaching, cultural advocacy and administration, museum curatorship, and publishing. It aims chiefly, however, to educate teachers capable of effectively instructing future architects in the history of their own field and its manifold connections with the culture at large. The program forges a unique combination of professional knowledge with a historical and analytical grasp of key phases in the history of architecture, especially those that have a demonstrable share in the field’s current state and its critical issues.

The program secures sound training in historical study and historiography, imparting technical knowledge and awareness of intellectual trends that inform the reception and role of architecture around the world. The history of science and technology (as well as its reception in popular culture and the arts), the history of media, and an understanding of architectural practice are as important as the fine arts and literature.

Admission Requirements

Applicants shall have appropriate academic credentials (an M.Arch degree or an equivalent master’s degree in Architecture, Engineering, Environmental Design, or, exceptionally, in a related field) and at least one year of work experience in an appropriate professional setting. The Graduate Record Examination (GRE) General Test taken no more than five years prior to application is required. All applicants whose native language is not English are required to take the Internet-based Test of English as a Foreign Language (TOEFL iBT), a test that includes a section on spoken English. The TOEFL
requirement is waived only for applicants who will have received a baccalaureate degree, or its international equivalent, prior to matriculation at Yale, from a college or university where English is the primary language of instruction. In addition to meeting qualifying criteria, candidates are required as part of the application to submit a portfolio of their own architectural work, a writing sample in the form of a research paper or publication, and an explanation of their motivation for engaging in this course of study. Qualified applicants may be invited to interview with a member of the doctoral faculty.

The portfolio should be a well-edited representation of the applicant’s creative work. Portfolios may not contain discs or videos. Anything submitted that is not entirely the applicant’s own work must be clearly identified as such.

**Special Requirements for the Ph.D. Degree**

Entering students with sound professional preparation engage in a concerted course of study that leads directly to dissertation research and a doctoral degree.

All students must spend their first two years in residence at Yale enrolled as full-time students in the School of Architecture. During the first two years of study, students will normally take at least eight courses, consisting of graduate seminars. During each of the four terms in residence, a student must take a Ph.D. seminar taught by members of the Ph.D. committee, which will introduce the student to various methodologies and areas of study. Some seminars will encourage primary research on a narrow topic or focus on producing a collective body of work, such as an exhibition, symposium, or publication. Others offer a broader survey of historiographies or a close reading of a body of texts. These four required seminars form the methodological core of the program.

Students will be encouraged to take courses outside the School of Architecture but related to their specific areas of interest. For example, a student working on Italian modernism would be encouraged to take a course in Italian history or literature. Typically, at least two of the four elective seminars would be in related fields. Students can also opt to do independent readings with individual faculty members on their specific areas of interest.

Students will also be expected to demonstrate competence in at least one foreign language relevant to their field of study, not later than the end of the second year. Language competence is more than a formality and requires some acquaintance with the literature in the chosen language. Competency may be determined by either a grade of B or better in a yearlong intermediate-level language course or by an examination.

Ideally, the student’s field of interest will be defined in the course of the second year. At this point, the student will be assigned an adviser by the director of graduate studies (DGS). After the second year, doctoral students will work with a thesis committee and an adviser. One member of the thesis committee should be from outside the School of Architecture, with selection based on the student’s area of interest, and in consultation with the Ph.D. adviser and the DGS.

Upon completion of all course requirements and the language requirement, normally during the second year, doctoral students will take a qualifying exam, which requires an approximately 8,000-word research paper and an oral examination during which members of his/her dissertation committee will question the candidate in three fields of
study. During the third year, candidates will present and defend a preliminary proposal for a dissertation topic, consisting of a thesis statement, program of research and study, and annotated bibliography.

By the end of the third year, students will begin a period of dissertation research and writing. A student is asked to submit a draft of the dissertation half a year before the final defense. After successful completion of the defense, students are given three months to complete the final submission.

**Graduate Research Assistant and Teaching Fellow Experience**

The program in Architecture considers teaching to be an important part of graduate training. Therefore, before completing the Ph.D., all candidates will be required to have at least two terms of teaching experience in their area of study at the School of Architecture or elsewhere in the University. At least one of these should be a history and theory survey course requiring direction of a discussion session. Students will also be encouraged to assist in studio teaching. Students in the Ph.D. program normally serve as teaching fellows for four terms.

**Master’s Degree**

**M.Phil.** The M.Phil. degree is awarded en route to the Ph.D. The minimum requirements for this degree are that a student shall have completed all requirements for the Ph.D. except the teaching fellow experience, the prospectus, and the dissertation.

For information on the master’s degrees offered by the Yale School of Architecture (the Master of Architecture and the Master of Environmental Design), visit the School’s Web site, www.architecture.yale.edu, or contact Office of Admissions, Yale School of Architecture, PO Box 208242, New Haven CT 06520-8242.

**Courses**

For courses and their descriptions, see the School of Architecture bulletin, online in both html and pdf versions at www.yale.edu/bulletin.
ASTRONOMY

J. W. Gibbs Laboratories, 203.432.3000
www.astro.yale.edu
M.S., M.Phil., Ph.D.

Chair
Pieter van Dokkum

Director of Graduate Studies
Robert Zinn (203.432.3017, robert.zinn@yale.edu)

Professors  Charles Bailyn, Charles Baltay (Physics), Sarbani Basu, Paolo Coppi, Pierre Demarque (Emeritus), Debra Fischer, Jeffrey Kenney, Richard Larson (Emeritus), Priyamvada Natarajan, Peter Parker (Physics), Sabatino Sofia (Emeritus), C. Megan Urry (Physics), William van Altena (Emeritus), Pieter van Dokkum, Robert Zinn

Associate Professors  Héctor Arce, Marla Geha, Frank van den Bosch

Fields of Study
Fields include observational and theoretical galactic astronomy, solar and stellar astrophysics, astrometry, exoplanets, extragalactic astronomy, radio astronomy, high-energy astrophysics, and cosmology.

Special Admissions Requirements
Applicants are expected to have a strong undergraduate preparation in physics and mathematics. Although some formal training in astronomy is useful, it is by no means a prerequisite for admission. Applicants are required to take the General GRE as well as the subject test in Physics.

Special Requirements for the Ph.D. Degree
A typical program of study includes twelve courses taken during the first four terms, and must include the core courses listed below:

  Computational Methods in Astrophysics and Geophysics (ASTR 520), Observational Astronomy (ASTR 555), Interstellar Matter and Star Formation (ASTR 560), either Stellar Populations (ASTR 510) or Stellar Astrophysics (ASTR 550), and either Galaxies (ASTR 530) or The Evolving Universe (ASTR 565).

Students require the permission of the instructor and the director of graduate studies (DGS) to skip a core class if they think that they have sufficient knowledge of the field. Students will be required to demonstrate their knowledge of the field before they are allowed to skip any core class.

Two of the twelve courses must be research credits, each earned by working in close collaboration with a faculty member. Of the two research credits, one must be earned doing a theoretical project and one doing an observational research project. The students need to present the results of the project as a written report and will be given an evaluation of their performance.
The choice of the five remaining courses depends on the candidate's interest and background and must be decided in consultation with the DGS and/or the prospective thesis adviser. Advisers may require students to take particular classes and obtain a specified minimum grade in order for a student to work with them for their thesis. Students must take any additional course that their supervisors require even after their fourth term. In addition, all students, regardless of their term of study, have to attend Professional Seminar (ASTR 710) every term. The fall term of this course discusses ethics and responsible conduct in scientific research and fulfills the requirement stipulated by the National Science Foundation for all students and for all postdoctoral researchers funded by the NSF. Note that ASTR 710 may not be used to fulfill the twelve-course requirement.

Students are encouraged to take graduate courses in physics or related subjects. On an irregular basis, special topic courses and seminars are offered, which provide the opportunity to study some fields in greater depth than is possible in standard courses. To achieve both breadth and depth in their education, students are encouraged to take a few courses beyond their second year of study.

There is no foreign language requirement. A written comprehensive examination, normally taken at the end of the fourth term of graduate work, tests the student's familiarity with the entire field of astronomy and related branches of physics and mathematics. Particular attention will be paid to the student's performance in the field in which the student plans to do research. An oral examination, held a few weeks after the written examination, is based on the student's chosen field of research. Satisfactory performance in these examinations, an acceptable record in course and research work, and an approved dissertation prospectus are required for admission to candidacy for the Ph.D. degree. The dissertation should present the results of an original and thorough investigation, worthy of publication. Most importantly, it should reflect the candidate's capacity for independent research. An oral dissertation defense is required.

Teaching experience is an integral part of graduate education in astronomy. All students will serve as teaching fellows and complete a total of nine TF units. Both the level of teaching assignments and the scheduling of teaching are flexible and determined by the needs of the department. By the end of the third term, however, most students will have completed six TF units. The additional three TF units will normally be carried out after the fourth term of study.

**Honors Requirement**

Students must meet the Graduate School's Honors requirement by the end of the fourth term of full-time study.

**Master’s Degrees**

**M.Phil.** Upon application, the department will recommend for the award of the M.Phil. degree any student who has completed all the requirements of the Ph.D. degree, except the Ph.D. dissertation. A written master's thesis containing original astronomical research is also required. Students are not admitted for this degree.

**M.S. (en route to the Ph.D.)** Upon application, the department will recommend for the award of the M.S. degree any student who has taken at least nine courses (not including
ASTR 710) and one research project (ASTR 580). The student should have a grade average of High Pass in the courses and a grade of High Pass or above in the research project.

Program materials are available upon request to the Director of Graduate Studies, Department of Astronomy, Yale University, PO Box 208101, New Haven CT 06520-8101.

Courses

**ASTR 510b**, **Stellar Populations**  Robert Zinn
The stellar population of our galaxy and the galaxies of the local group. The properties of stars and star clusters, stellar evolution, and the structure and evolution of our galaxy. MW 4–5:15

*[ASTR 518b, Stellar Dynamics]*

**ASTR 520a/G&G 538a, Computational Methods in Astrophysics and Geophysics**  Paolo Coppi
The analytic and numerical/computational tools necessary for effective research in astronomy, geophysics, and related disciplines. Topics include numerical solutions to differential equations, spectral methods, and Monte Carlo simulations. Applications are made to common astrophysical and geophysical problems including fluids and N-body simulations. MW 4–5:15

**ASTR 530a**, **Galaxies**  Jeffrey Kenney
The formation and evolution of galaxies. Topics include the morphology and structure of galaxies, stellar populations, central black holes, galaxy mergers, and galaxy properties as a function of environment. TTH 4–5:15

**ASTR 540b/G&G 501b, Radiative Processes in Astrophysics/Stellar Atmospheres**  Debra Fischer
Theory of radiation fields and their propagation through media. Applications to stellar and planetary atmospheres and the interstellar medium including planetary energy balance and climate, terrestrial optical phenomena, solar physics, high-energy phenomena, and remote sensing. MW 9–10:15

**ASTR 550a**, **Stellar Astrophysics**  Sarbani Basu
An introduction to the physics of stellar atmospheres and interiors. The basic equations of stellar structure, nuclear processes, stellar evolution, white dwarfs, and neutron stars. MW 9–10:15

**ASTR 555a**, **Observational Astronomy**  Pieter van Dokkum
The design and use of optical telescopes, cameras, spectrographs, and detectors to make astronomical observations. The reduction and analysis of photometric and spectroscopic observations. TTH 9–10:15

*[ASTR 560b, Interstellar Matter and Star Formation]*

*[ASTR 565a, The Evolving Universe]*
ASTR 570b/PHYS 570b, High-Energy Astrophysics  Priyamvada Natarajan
A survey of current topics in high-energy astrophysics, including accreting black hole and neutron star systems in our galaxy, pulsars, active galactic nuclei and relativistic jets, gamma-ray bursts, and ultra-high-energy cosmic rays. The basic physical processes underlying the observed high-energy phenomena are also covered. TTH 4–5:15

[ASTR 575b, Exoplanets]

ASTR 580a or b, Research
By arrangement with faculty.

ASTR 585b, Radio Astronomy  Héctor Arce
Introduction to radio astronomy, theory, and techniques. Includes radiation fundamentals, antenna theory, and an introduction to radio interferometry. Discussion of spectral line radio emission and of thermal and nonthermal radio emission mechanisms in the context of galactic and extragalactic astronomical observations. TTH 9–10:15

[ASTR 590b, Solar Physics]

[ASTR 600a*/PHYS 600a, Cosmology]

ASTR 610a, The Theory of Galaxy Formation  Frank van den Bosch
The physical processes of galaxy formation and evolution. Topics include Newtonian perturbation theory, the spherical collapse model, formation and structure of dark matter haloes, cooling and feedback processes, star formation, stellar population synthesis, chemical enrichment, and the statistical treatment of the large-scale distribution of galaxies. TTH 9–10:15

ASTR 666b/AMTH 666b/G&G 666b, Statistical Thermodynamics for Astrophysics and Geophysics  John Wettlaufer
Classical thermodynamics is derived from statistical thermodynamics. Using the multiparticle nature of physical systems, we derive ergodicity, the central limit theorem, and the elemental description of the second law of thermodynamics. We then develop kinetics, transport theory, and reciprocity from the linear thermodynamics of irreversible processes. Topics of focus include Onsager reciprocal relations, the Fokker–Planck equation, stability in the sense of Lyapunov, and time invariance symmetry. We explore phenomena that are of direct relevance to astrophysical and geophysical settings. No quantum mechanics is necessary as a prerequisite.

ASTR 710a and b, Professional Seminar
A weekly seminar covering science and professional issues in astronomy and ethics.
BIOMEDICAL ENGINEERING

Dunham Laboratory, 203.432.4250
M.S., M.Phil., Ph.D.

Chair
W. Mark Saltzman

Director of Graduate Studies
Richard Carson (richard.e.carson@yale.edu)

Professors  Richard Carson, Todd Constable, James Duncan, Jay Humphrey, Fahmeed Hyder, Laura Niklason, Douglas Rothman, W. Mark Saltzman, Fred Sigworth, Steven Zucker (Computer Science)

Associate Professors  Robin de Graaf, Tarek Fahmy, Themis Kyriakides, Michael Levene, Evan Morris, Xenophon Papademetris, Lawrence Staib, Hemant Tagare

Assistant Professors  Joerg Bewersdorf, Michael Choma, Rong Fan, Anjelica Gonzalez, Kathryn Miller-Jensen, Smita Sampath

Fields of Study
Fields include the physics of image formation (MRI, optics, ultrasound, nuclear medicine, and X-ray), MRI, MRS, PET and modeling, digital image analysis and processing, computer vision, biological signals and sensors, biomechanics, physiology and human factors engineering, drug delivery, biotechnology, biophotonics, immune response to biomaterials, tissue engineering, and biomedical device systems biology and medicine.

For admissions and degree requirements, and for course listings, see Engineering & Applied Science.
CELL BIOLOGY

C-207 Sterling Hall of Medicine, 203.737.5603
www.cellbiology.yale.edu
M.S., M.Phil., Ph.D.

Chair
James Rothman

Director of Graduate Studies
Carl Hashimoto (C-425c SHM, 203.737.2746, carl.hashimoto@yale.edu)

Professors  Michael Caplan (Cellular & Molecular Physiology), Lynn Cooley (Genetics), Peter Cresswell (Immunobiology), Pietro De Camilli, Jorge Galán (Microbial Pathogenesis), Fred Gorelick, Carl Hashimoto, James Jamieson, Diane Krause (Laboratory Medicine), Thomas Lentz (Emeritus), Haifan Lin, Vincent Marchesi (Pathology), Mark Mooseker (Molecular, Cellular & Developmental Biology), Michael Nathanson (Internal Medicine/Digestive Diseases), Thomas Pollard (Molecular, Cellular & Developmental Biology), James Rothman, Martin Schwartz (Internal Medicine/Cardiology), Michael Simons (Internal Medicine/Cardiology), Elisabetta Ullu (Internal Medicine/Infectious Diseases), Sandra Wolin

Associate Professors  Christopher Burd, David Calderwood (Pharmacology), Topher Carroll, Karin Reinisch, Elke Stein (Molecular, Cellular & Developmental Biology), Derek Toomre, Agnes Vignery (Orthopaedics), Tobias Walther

Assistant Professors  Joerg Bewersdorf, Jonathan Bogan (Internal Medicine/Endocrinology), Daniel Colón-Ramos, Eric Dufresne (Mechanical Engineering & Materials Science), Shawn Ferguson, Megan King, Patrick Lusk, Thomas Melia, Peter Takizawa, Jie Yao, Yongli Zhang

Fields of Study
Fields include membrane traffic and protein sorting, organelle biogenesis, epithelial cell polarity, membrane function in the nervous system (synapse formation and function), axon guidance, neural circuit development, cell biology of protozoan parasites and of pathogen/host interactions, cell biology of the immune response, mRNA biogenesis and localization, RNA folding, non-coding RNAs, stem cells, the cytoskeleton, nuclear structure and dynamics, cellular signaling and motility, cytokinesis. Approaches to these topics include biochemistry, biophysics, molecular biology, and crystallography; bacterial, yeast, Drosophila, C. elegans, and mouse genetics; immunocytochemistry and electron microscopy; live cell and super-resolution imaging.

Special Admissions Requirements
An undergraduate major in the biological sciences is recommended. GRE General Test is required; GRE Subject Test is recommended (in Biology or in Biochemistry, Cell and Molecular Biology).
To enter the Ph.D. program, students apply to an interest-based track, usually the Molecular Cell Biology, Genetics, and Development track, in the combined program in Biological and Biomedical Sciences (BBS), http://info.med.yale.edu/bbs.

**Special Requirements for the Ph.D. Degree**

Students are required to take at least five graduate-level courses. No specific curriculum of courses is required, but CBIO 602 (Molecular Cell Biology) is recommended for all students to attain a solid foundation in molecular cell biology. Also recommended is a seminar course, such as CBIO 603 (Seminar in Molecular Cell Biology), in which students can develop the skill for critical analysis of research papers. Students design their own curriculum of courses to meet individual interests and needs, in consultation with the director of graduate studies. During the first year, students participate in three laboratory rotations. In the second year, a committee of faculty members determines whether each student is qualified to continue in the Ph.D. program. There is an oral qualifying examination by the end of the third term. In order to be admitted to candidacy, students must have met the Graduate School Honors requirement, maintained a High Pass average in course work, passed the qualifying examination, submitted an approved prospectus, and received a positive evaluation of their laboratory work from the thesis committee. All students are required to present a talk at the departmental progress report series each year after passing the qualifying exam. The remaining degree requirements include completion of the dissertation project and the writing of the dissertation and its oral defense, the formal submission of copies of the written dissertation to the Graduate School, and the deposit of an additional copy with the department. Laboratory rotations and thesis research may be conducted outside of the department.

An important aspect of graduate training in cell biology is the acquisition of teaching skills through participation in courses appropriate for the student’s scientific interests. These opportunities can be drawn from a diverse menu of lecture, laboratory, and seminar courses given at the undergraduate, graduate, and medical school levels. Ph.D. students are required to participate in two terms (or the equivalent) of teaching. Students are not expected to teach during their first year.

In addition to all other requirements, students must successfully complete CBIO 901b, First-Year Introduction to Research — Ethics: Scientific Integrity in Biomedical Research, prior to the end of their first year of study.

**M.D./Ph.D. Students**

M.D./Ph.D. students are required to take a total of five graduate-level courses for a grade, including Molecules to Systems (CBIO 502), Molecular and Cellular Basis of Human Disease (CBIO 601), and a seminar course that involves the reading and class discussion of research papers. The two remaining courses can be in areas such as Genetics, Neurobiology, Immunology, Microbiology, Pharmacology, and Physiology. Students must meet the Graduate School requirement of a grade of Honors in two courses, if necessary taking additional courses beyond the five required in the department to fulfill this requirement. Students must also maintain an average grade of High Pass in all courses. One term of teaching is required.
Master’s Degrees

M.Phil. Requirements for the M.Phil. degree are the same as for admission to candidacy (see above).

M.S. This degree is normally granted only to students who are withdrawing from the Ph.D. program. To be eligible for the degree, a student must have completed at least five graduate-level term courses at Yale, including CBIO 602a (Molecular Cell Biology) and a seminar course, with a grade of Pass and at least one grade of Honors or three of High Pass. In addition to these five courses, the student must have received a Satisfactory grade in the following five courses: CBIO 900a (First-Year Introduction to Research—Grant Writing and Scientific Communication), CBIO 901b (First-Year Introduction to Research—Ethics: Scientific Integrity in Biomedical Research), CBIO 911a (First Laboratory Rotation), CBIO 912b (Second Laboratory Rotation), and CBIO 913b (Third Laboratory Rotation).

Prospective applicants are encouraged to visit the BBS Web site (http://info.med.yale.edu/bbs), MCGD Track. Program materials are available upon request to the Director of Graduate Studies, Department of Cell Biology, Yale University, PO Box 208002, New Haven CT 06520-8002.

Courses

CBIO 502a/b, Molecules to Systems Peter Takizawa, Fred Gorelick, James Jamieson, Thomas Lentz, and staff

This full-year course is designed to provide medical students with a current and comprehensive review of biologic structure and function at the cellular, tissue, and organ system levels. Areas covered in the first term include replication and transcription of the genome; regulation of the cell cycle and mitosis; protein biosynthesis and membrane targeting; cell motility and the cytoskeleton; signal transduction; nerve and muscle function. The second term covers cell and tissue organization of organ systems including respiratory, renal, gastrointestinal, endocrine, and reproductive systems. Clinical correlation sessions, which illustrate the contributions of cell biology to specific medical problems, are interspersed in the lecture schedule. Histophysiology laboratories provide practical experience with an understanding of exploring cell and tissue structure. The course is offered only to M.D. and M.D./Ph.D. students. It runs from September to mid-May and is equivalent to three graduate credits.

CBIO 601a/b, Molecular and Cellular Basis of Human Disease Fred Gorelick, James Jamieson, and staff

The course emphasizes the connections between diseases and basic science using a lecture and seminar format. It is designed for students who are committed to a career in medical research, those who are considering such a career, or students who wish to explore scientific topics in depth. The first half of the course is organized in four- to five-week blocks that topically parallel CBIO 502a/b. Examples of blocks from past years include “Diseases of protein folding” and “Diseases of ion channels.” Each topic is introduced with a lecture given by the faculty. The lecture is followed by sessions in which students
review relevant manuscripts under the supervision of a faculty mentor. The second half of the course focuses on the relationship of basic science to disease processes while emphasizing translational and clinical research. In addition, sessions are devoted to academic careers and cover subjects such as obtaining an academic position, promotions, and grant writing. The course is open to M.D. and M.D./Ph.D. students who are taking or have taken CBIO 502a/b. Student evaluations are based on attendance, participation in group discussions, formal presentations, and a written review of an NIH proposal. The course runs from September to mid-May and is equivalent to three graduate credits.

**CBIO 602a/MB&B 602a/MCDB 602a, Molecular Cell Biology**  Sandra Wolin, Michael Caplan, Craig Crews, Pietro De Camilli, Megan King, Thomas Melia, In-Hyun Park, Thomas Pollard, James Rothman, Martin Schwartz

A comprehensive introduction to the molecular and mechanistic aspects of cell biology for graduate students in all programs. Emphasizes fundamental issues of cellular organization, regulation, biogenesis, and function at the molecular level. MW 1:45–3

**CBIO 603a/MCDB 603a, Seminar in Molecular Cell Biology**  Megan King, Michael Caplan, Craig Crews, Pietro De Camilli, Thomas Melia, Thomas Pollard, James Rothman, Martin Schwartz, Sandra Wolin

A graduate-level seminar course in modern cell biology. The class is devoted to the reading and critical evaluation of classical and current papers. The topics are coordinated with the CBIO 602a lecture schedule. Thus, concurrent enrollment in CBIO 602a is required. TH 9–11

**CBIO 604b, Systems Cell Biology**  Carl Hashimoto, Daniel Colón-Ramos, and faculty

Introduction to the organization and function of cells within complex multicellular systems as encountered in the human body. Covers major tissues and organs as well as the cardiovascular, immune, and nervous systems, with special emphasis on the molecular and cellular bases of developmental processes and human diseases. Lectures supplemented by electronic-based tutorials on the histology of tissues and organs. T 9:30–10:30, TH 9:30–11

**CBIO 606b, Advanced Topics in Cell Biology**  Karin Reinisch and faculty

This seminar course, which meets once weekly, covers advanced topics in cell biology. Each topic is spread over two or three sessions, which start with an introductory overview and are followed by a discussion of key papers led by an expert in the field. Special emphasis is given to application of state-of-the-art imaging techniques to topical areas covering a wide range of contemporary cell biology. T 4:15–6

**CBIO 701b, Illuminating Cellular Function**  Derek Toomre, Joerg Bewersdorf, and faculty

Introduction to the principles and practical methods of live cell imaging. Covers principles of fluorescent microscopy (including genetically encoded probes and physiological indicators), image formation, image detection, and image analysis. Includes hands-on demonstrations of state-of-the-art instrumentation, such as video-rate confocal and multi-photon microscopes. WF 12:30–1:30
CBIO 900a/GENE 900a/MCDB 900a, First-Year Introduction to Research—Grant Writing and Scientific Communication  Frank Slack and faculty
Grant writing, scientific communication, and laboratory rotation talks for Molecular Cell Biology, Genetics, and Development track students. M 4–5:30

CBIO 901b/GENE 901b/MCDB 901b, First-Year Introduction to Research—Ethics: Scientific Integrity in Biomedical Research  Megan King
Ethics and laboratory rotation talks for Molecular Cell Biology, Genetics, and Development track students. TH 4–5:30

CBIO 903a or b, Reading Course in Cell Biology  Carl Hashimoto
Independent study of specific topics in cell biology through directed reading of the literature under faculty supervision. Student may choose any topic and any Yale faculty subject to approval by the Cell Biology DGS. Open to Cell Biology students, and to students in other departments with approval from their respective DGS. Term paper required.

CBIO 911a/GENE 911a/MCDB 911a, First Laboratory Rotation  Carl Hashimoto and faculty
First laboratory rotation for Molecular Cell Biology, Genetics, and Development track students.

CBIO 912b/GENE 912b/MCDB 912b, Second Laboratory Rotation  Valerie Reinke and faculty
Second laboratory rotation for Molecular Cell Biology, Genetics, and Development track students.

CBIO 913a/GENE 913b/MCDB 913b, Third Laboratory Rotation  Frank Slack and faculty
Third laboratory rotation for Molecular Cell Biology, Genetics, and Development track students.
CELLULAR AND MOLECULAR PHYSIOLOGY

B147 Sterling Hall of Medicine, 203.785.4041
www.physiology.yale.edu
M.S., M.Phil., Ph.D.

Chair
Michael Caplan

Director of Graduate Studies
Emile Boulpaep (SHM B142, 203.785.4055, emile.boulpaep@yale.edu)

Professors  Peter Aronson (Internal Medicine/Nephrology), Emile Boulpaep, Thomas Brown (Psychology), Cecilia Canessa, Lloyd Cantley (Internal Medicine/Nephrology), Michael Caplan, Nancy Carrasco, Lawrence Cohen, Barbara Ehrlich (Pharmacology), Biff Forbush III, John Geibel (Surgery), Leonard Kaczmarek (Pharmacology), Patricia Preisig (Internal Medicine/Nephrology), W. Mark Saltzman (Biomedical Engineering), Joseph Santos-Sacchi (Surgery/Otolaryngology), Gerald Shulman (Internal Medicine/Endocrinology), Fred Sigworth, Carolyn Slayman (Genetics), Clifford Slayman, Fred Wright (Internal Medicine/Nephrology), Lawrence Young (Internal Medicine/Cardiology), Z. Jimmy Zhou (Ophthalmology)

Associate Professors  Nadia Ameen (Pediatrics), Angelique Bordey (Neurosurgery), Jonathan Demb (Ophthalmology), Marie Egan (Pediatrics), Michael Nitabach, Vincent Pieribone, Susumu Tomita, David Zenisek

Assistant Professors  Nii Addy (Psychiatry), Sviatoslav Bagriantsev, Elena Gracheva, Erdem Karatekin, Richard Kibbey (Internal Medicine/Endocrinology), Satinder Singh, Jesse Rinehart, Xiaoyong Yang (Comparative Medicine)

Fields of Study

Fields of study range from cellular and molecular physiology to integrative medical biology. Areas of current interest include: ion channels, transporters and pumps, membrane biophysics, cellular and systems neurobiology, protein trafficking, epithelial transport, signal transduction pathways, cardiovascular biology, organ physiology, genetic models of human disease, pathophysiology, structural biology of membrane proteins, and physiological genomics.

Special Admissions Requirements

We welcome applications from students with backgrounds in the biological, chemical, and/or physical sciences. These include majors in biology, biochemistry, physiology, genetics, chemistry, physics, mathematics, engineering, computer science, and psychology. Courses in biology, biochemistry, organic and physical chemistry, and mathematics through elementary calculus are recommended. The GRE General Test is required. To enter the Ph.D. program, students will apply to the Physiology and Integrative Medical Biology track within the interdepartmental graduate program in the Biological and Biomedical Sciences.
Special Requirements for the Ph.D. Degree

Formal requirements for the Ph.D. degree include two or three terms of course work, a qualifying examination taken by the end of the second year, submission of a thesis prospectus, two terms of teaching, and completion and satisfactory defense of the thesis.

Students are expected to design a suitable program of courses in consultation with a faculty adviser. The director of graduate studies (DGS) will provide general oversight of the course selections. These courses will provide a coherent background for the expected area of thesis research and also satisfy the department’s subject and proficiency requirements. Students must satisfactorily pass at least six graduate-level courses, including C&MP 550a, 560b, and 630a. Also during the first two terms, each student should explore research projects by performing rotations in at least three laboratories to create an informed basis upon which to select a thesis project by the end of the first year. There is no foreign language requirement. The qualifying examination, which must be passed by the end of the student’s fourth term, will cover areas of physiology that complement the student’s major research interest.

An important dimension of graduate training in Cellular and Molecular Physiology is the acquisition of teaching skills through participation in courses appropriate for the student’s academic interests. Ph.D. students are expected to participate in two terms (or the equivalent) of teaching, at least at the level of Teaching Fellow 2. Students are not expected to teach during their first year.

In addition to all other requirements, students must successfully complete C&MP 650, Ethics, prior to the end of their first year of study.

After satisfying the departmental predissertation requirements, passing the qualifying examination, submitting a satisfactory thesis prospectus, and presenting a satisfactory report to the appropriate thesis advisory committee, students are admitted to candidacy. The completed dissertation must describe original research making a significant contribution to knowledge.

Honors Requirement

Students must meet the Graduate School’s Honors requirement by the end of the fourth term of full-time study.

Master’s Degrees

M.Phil. See Degree Requirements under Policies and Regulations. Awarded to students who have fulfilled all the requirements for the Ph.D. except the prospectus, teaching requirement, and dissertation, normally at the end of the second year. Students are not admitted for this degree.

M.S. Awarded only to students who are not continuing for the Ph.D. degree but who have successfully completed one year of the doctoral program (i.e., passing of at least four courses, including two Honors grades, and three successful laboratory rotations). Students are not admitted for this degree.

Program materials are available upon request to the Department Registrar, Department of Cellular and Molecular Physiology, Yale School of Medicine, PO Box 208026, New Haven CT 06520-8026.
Courses

[C&M 535a/NSCI 645a/PSYC 535a, Foundations of Behavioral Neuroscience]

C&M 550a/ENAS 550a/MCDB 550a/PHAR 550a, Physiological Systems
Emile Boulpaep, W. Mark Saltzman
The course develops a foundation in human physiology by examining the homeostasis of vital parameters within the body, and the biophysical properties of cells, tissues, and organs. Basic concepts in cell and membrane physiology are synthesized through exploring the function of skeletal, smooth, and cardiac muscle. The physical basis of blood flow, mechanisms of vascular exchange, cardiac performance, and regulation of overall circulatory function are discussed. Respiratory physiology explores the mechanics of ventilation, gas diffusion, and acid-base balance. Renal physiology examines the formation and composition of urine and the regulation of electrolyte, fluid, and acid-base balance. Organs of the digestive system are discussed from the perspective of substrate metabolism and energy balance. Hormonal regulation is applied to metabolic control and to calcium, water, and electrolyte balance. The biology of nerve cells is addressed with emphasis on synaptic transmission and simple neuronal circuits within the central nervous system. The special senses are considered in the framework of sensory transduction. Weekly discussion sections provide a forum for in-depth exploration of topics. Graduate students evaluate research findings through literature review and weekly meetings with the instructor.
MWF 9:25–10:15

C&M 560b/ENAS 570b/MCDB 560b/PHAR 560b, Cellular and Molecular Physiology: Molecular Machines in Human Disease
Emile Boulpaep, Fred Sigworth
The course focuses on understanding the processes that transfer molecules across membranes at the cellular, molecular, biophysical, and physiological levels. Students learn about the different classes of molecular machines that mediate membrane transport, generate electrical currents, or perform mechanical displacement. Emphasis is placed on the relationship between the molecular structures of membrane proteins and their individual functions. The interactions among transport proteins in determining the physiological behaviors of cells and tissues are also stressed. Molecular motors are introduced and their mechanical relationship to cell function is explored. Students read papers from the scientific literature that establish the connections between mutations in genes encoding membrane proteins and a wide variety of human genetic diseases. MWF 9:25–10:15

C&M 570b, Sensory Physiology
David Zenisek, Joseph Santos-Sacchi, Z. Jimmy Zhou
The course provides an overview of the mammalian special sensory systems, including molecular and cellular bases of vision, audition, taste, olfaction, and somatosensation. Faculty with focus in those areas lead presentations and discussions on peripheral and central mechanisms. Psychophysical aspects of sensation are introduced. TTH 2:30–3:45

C&M 600, Medical Physiology Case Conferences
Emile Boulpaep and staff
Two-term course taught in groups of 10–12 students by the same group leader(s) throughout the year. Workshop format permits students to apply basic concepts of physiology to clinical syndromes and disease processes. Students are expected to participate
actively in a weekly discussion of a clinical case that illustrates principles of human physiology and pathophysiology at the whole-body, system, organ, cellular, or molecular level. Prerequisites: C&MP 550a and permission of the instructor. Credit for full year only. TH 11–12:30

C&MP 610, Medical Research Scholars Program: Mentored Clinical Experience
Raymond Russell, Michael Caplan
The goals of the course are to introduce MRSP students to aspects of clinically important human diseases. Students explore each disease over three one-and-one-half-hour sessions led by a clinician-scientist who is an expert in the relevant organ system. Students explore two disease processes per term. The first of the three sessions is devoted to a discussion of the clinical presentation, natural history, pathology, epidemiology, treatment, and prognosis of the disease process. During this session students have the opportunity to view gross or microscopic specimens of diseased tissue in association with members of the Pathology faculty. Students are assigned readings in pathology, pathophysiology, and clinical texts to prepare for the first class session. The second session focuses on translational aspects of the disease process. Students read and present papers relevant to the molecular basis of the disease and cutting-edge approaches to its therapy. In the third session students meet with patients who have experienced the disease and/or visit and explore facilities associated with diagnosis and treatment of the disease process. Prior to the third session students receive guidance as to what they will observe and how to approach the experience; and at the end of the session, the group discusses its thoughts and impressions. Students are expected to prepare for sessions, to participate actively, and to be scrupulously respectful of patients and patient facilities.

C&MP 620b/NBIO 610b, Fundamentals in Neurophysiology
Vincent Pieribone, Fred Sigworth
The course is designed for students who wish to gain a theoretical and practical knowledge of modern neurophysiology. Graduate students specializing in neurophysiology and non-neurophysiology are encouraged to attend, as the course begins at a very basic level and progresses to more complicated topics. Topics include properties of ion channels, firing properties of neurons, synaptic transmission, and neurophysiology methodology.

C&MP 630a/PATH 680a/PHAR 502a, Seminar in Molecular Medicine, Pharmacology, and Physiology
Sven-Eric Jordt, Don Nguyen, Susumu Tomita
Readings and discussion on a diverse range of current topics in molecular medicine, pharmacology, and physiology. The class emphasizes analysis of primary research literature and development of presentation and writing skills. Contemporary articles are assigned on a related topic every week, and a student leads discussions with input from faculty who are experts in the topic area. The overall goal is to cover a specific topic of medical relevance (e.g., cancer, neurodegeneration) from the perspective of three primary disciplines (i.e., physiology: normal function; pathology: abnormal function; and pharmacology: intervention). M 3–5
C&MP 650/PATH 660/PHAR 580, Ethics  Barbara Ehrlich, Michael Robek, Satinder Singh
Organized to foster discussion, the course is taught by faculty in the Pharmacology, Pathology, and Physiology departments and two or three senior graduate students. Each session is based on case studies from primary literature, reviews, and two texts: Francis Macrina’s Scientific Integrity and Kathy Barker’s At the Bench. Each week, students are required to submit a reaction paper discussing the reading assignment. Students take turns leading the class discussion; a final short paper on a hot topic in bioethics is required.

C&MP 710b/MB&B 710b4, Electron Cryo-Microscopy for Protein Structure Determination  Fred Sigworth, Charles Sindelar
Understanding cellular function requires structural and biochemical studies at an ever-increasing level of complexity. The course is an introduction to the concepts and applications of high-resolution electron cryo-microscopy. This rapidly emerging new technique is the only method that allows biological macromolecules to be studied at all levels of resolution from cellular organization to near atomic detail. Counts as 0.5 credit. TTH 9–10:15

[C&MP 750b/NSCI 614b/PSYC 750b, Research Topics in the Neurobiology of Learning and Memory]
CHEMICAL & ENVIRONMENTAL ENGINEERING

Dunham Laboratory, 203.432.4250

Chair
Paul Van Tassel

Director of Graduate Studies
William Mitch (william.mitch@yale.edu)

Professors  Eric Altman, Gaboury Benoit, Ruth Blake, Menachem Elimelech, Abbas Firoozabadi (Adjunct), Thomas Graedel, Gary Haller, Edward Kaplan, Yehia Khalil (Adjunct), Michael Loewenberg, Robert McGraw (Adjunct), Lisa Pfefferle, Joseph Pignatello (Adjunct), Daniel Rosner, James Saiers, W. Mark Saltzman, Udo Schwartz, T. Kyle Vanderlick, Paul Van Tassel, Kurt Zilm

Associate Professors  Michelle Bell, Tarek Fahmy, William Mitch, Jordan Peccia, Julie Zimmerman

Assistant Professors  Eric Dufresne, Chinedum Osuji, Andre Taylor, Corey Wilson

Fields of Study
Fields include nanomaterials, soft matter, interfacial phenomena, biomolecular engineering, energy, water, and sustainability.

For admissions and degree requirements, and for course listings, see Engineering & Applied Science.
CHEMISTRY

Sterling Chemistry Laboratory, 203.432.3913
www.chem.yale.edu
M.S., Ph.D.

Chair
Scott Miller (1 SCL, 203.432.3912, chemistry.chair@yale.edu)

Director of Graduate Studies
J. Patrick Loria (1 SCL, 203.432.3913, chemistry.dgs@yale.edu)

Professors  Sidney Altman (Molecular, Cellular & Developmental Biology), Victor Batista, Jerome Berson (Emeritus), Gary Brudvig, Robert Crabtree, Craig Crews (Molecular, Cellular & Developmental Biology), R. James Cross, Jr. (Emeritus), Donald Crothers (Emeritus), Jonathan Ellman, John Faller (Emeritus), Gary Haller (Engineering & Applied Science), Francesco Iachello (Physics), Mark Johnson, William Jorgensen, J. Patrick Loria, J. Michael McBride, Scott Miller, Peter Moore (Emeritus), Andrew Phillips, Anna Pyle (Molecular, Cellular & Developmental Biology), Lynne Regan (Molecular Biophysics & Biochemistry), James Rothman (Cell Biology), Martin Saunders, Alanna Schepartz, Charles Schmuttenmaer, Dieter Söll (Molecular Biophysics & Biochemistry), Thomas Steitz (Molecular Biophysics & Biochemistry), Scott Strobel (Molecular Biophysics & Biochemistry), John Tully, Patrick Vaccaro, Harry Wasserman (Emeritus), Kenneth Wiberg (Emeritus), Frederick Ziegler (Emeritus), Kurt Zilm

Assistant Professors  Richard Baxter, Jason Crawford, Nilay Hazari, Seth Herzon, David Spiegel, Elsa Yan

Fields of Study
Fields include bio-inorganic chemistry, bio-organic chemistry, biophysical chemistry, chemical biology, chemical physics, inorganic chemistry, organic chemistry, physical chemistry, physical-inorganic chemistry, physical-organic chemistry, synthetic-organic chemistry, and theoretical chemistry.

Special Admissions Requirements
Applicants are expected to have completed or be completing a standard undergraduate chemistry major including a year of elementary organic chemistry, with laboratory, and a year of elementary physical chemistry. Other majors are acceptable if the above requirements are met. The GRE General Test is required. The GRE Subject Test is strongly recommended though not required. Students whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and the Test of Spoken English (TSE) if the TOEFL Internet-based test is not taken.

Special Requirements for the Ph.D. Degree
A foreign language is not required. Three term courses are required in each of the first two terms of residence, and participation in additional courses is encouraged in subsequent terms. Courses are chosen according to the student’s background and research area. To
be admitted to candidacy a student must (1) receive at least two term grades of Honors, exclusive of those for research; (2) pass one oral examination (organic students) or two oral examinations (nonorganic students) by the end of the second year of study; and (3) submit a thesis prospectus no later than the end of the third year of study. Remaining degree requirements include completing a third-year formal proposal (inorganic students) and a fourth-year research proposal (organic and chemical biology students), a written thesis describing the research, and an oral defense of the thesis. The ability to communicate scientific knowledge to others outside the specialized area is crucial to any career in chemistry. Therefore, all students are required to teach a minimum of two terms at the level of Teaching Fellow 3 or higher. All students are required to take CHEM 590a, Ethical Conduct and Scientific Research, in the fall term of their first year of study.

**Master’s Degree**

**M.S. (en route to the Ph.D.)** A student must pass at least five graduate-level term courses in the Chemistry department exclusive of seminars and research. In addition, an overall average (exclusive of seminars and research) of High Pass must be maintained in all courses. One full year of residence is required.

Program materials are available upon request to the Director of Graduate Studies, Department of Chemistry, Yale University, PO Box 208107, New Haven CT 06520-8107.

[**CHEM 505a, Alternative Energy**]

**CHEM 518a**, **Advanced Organic Chemistry** William Jorgensen
Concise overview of structure, properties, thermodynamics, kinetics, reactions, and intermolecular interactions for organic molecular systems. MW 11:35–12:50

[**CHEM 519b, Advanced Organic Chemistry II**]

**CHEM 521a**, **Chemical Biology** Jason Crawford, David Spiegel
A one-term introduction to the origins and emerging frontiers of chemical biology. Discussion of the key molecular building blocks of biological systems and the history of macromolecular research in chemistry. TTH 9–10:15

**CHEM 522b, Chemical Biology II** Alanna Schepartz
A comprehensive introduction to the origins and emerging frontiers of chemical biology. This course develops the fundamental chemistry of molecules found in nature, a quantitative description of their interactions with themselves and each other, and subsequent effects on biological function. Topics include protein design, molecular evolution, chemical genetics, metabolic engineering, and methods in genomics and proteomics research. TTH 9–10:15

**CHEM 523b**, **Synthetic Methods in Organic Chemistry** Jonathan Ellman
A discussion of modern methods. Functional group manipulation, synthesis and functionalization of stereodefined double bonds, carbonyl addition chemistry, and synthetic designs. Normally taken only by students with a special interest in organic synthesis; for others, CHEM 518a is more appropriate. TTH 11:35–12:50
CHEM 524b, Advanced Synthetic Methods in Chemistry

CHEM 525bu, Spectroscopic Methods of Structure Determination  Martin Saunders
The background and use of spectroscopic methods emphasizing NMR in organic chemistry. The course includes the use of programs for simulating spin-spin coupling and rapid rearrangement reactions in NMR. All methods commonly used by organic chemists for determining molecular structures of species in solution, in the gas phase, and in solids are included. MWF 11:35–12:25

CHEM 526bu, Computational Chemistry and Biochemistry

CHEM 527a, Fundamentals of Organic Reaction Mechanisms  Jason Crawford, David Spiegel
Introduction to problem-solving techniques in organic chemistry and chemical biology, focusing on fundamental mechanistic paradigms for synthetic and biosynthetic transformations. Course meetings maximize interaction between students and faculty with the goal of providing students with a strong conceptual skill set in preparation for full-time research.

CHEM 528a, Natural Product Synthesis  Seth Herzon
Survey of natural products syntheses, with an emphasis on those that contain unique strategies, transformations, or reagents. Key transformations are introduced in the context of various syntheses. Retrosynthetic analysis and synthetic planning are discussed. MWF 11:35–12:50

CHEM 530bu, Statistical Methods and Thermodynamics  Victor Batista
The fundamentals of statistical mechanics developed and used to elucidate gas phase and condensed phase behavior, as well as to establish a microscopic derivation of the postulates of thermodynamics. Topics include ensembles; Fermi, Bose, and Boltzmann statistics; density matrices; mean field theories; phase transitions; chemical reaction dynamics; time-correlation functions; Monte Carlo and molecular dynamics simulations. MWF 9:25–10:15

CHEM 535a, Chemical Dynamics

CHEM 537au, Chemistry of Isotopes  Martin Saunders
Advanced applications of isotopes to chemical problems and the theory associated with them, including kinetic and equilibrium isotope effects, tracer applications, and dating. MWF 9:25–10:15

CHEM 540au, Molecules and Radiation I  Kurt Zilm
An integrated treatment of quantum mechanics and modern spectroscopy. Basic wave and matrix mechanics, perturbation theory, angular momentum, group theory, time-dependent quantum mechanics, selection rules, coherent evolution in two-level systems, line shapes, and NMR spectroscopy. MWF 8:20–9:10

CHEM 542bu, Molecules and Radiation II  Mark Johnson
An extension of the material covered in CHEM 540a to atomic and molecular spectroscopy, including rotational, vibrational, and electronic spectroscopy, as well as an introduction to laser spectroscopy. MW 11:35–12:50
CHEM 547b, Electron Paramagnetic Resonance

CHEM 548b, Nuclear Magnetic Resonance in Liquids

CHEM 551au, Biophysics I  Richard Baxter
A detailed discussion of several important experimental techniques used to study the properties of biological macromolecules, focusing on the application of Fourier methods and concepts to NMR spectroscopic, optical, and electron microscopy, image reconstruction, X-ray scattering/diffraction, and mass spectrometry. Emphasis on the physical chemistry that underlies both the execution of such experiments and the interpretation of the resulting data. TTH 9–10:15

CHEM 550bu, Theoretical and Inorganic Chemistry

CHEM 552au, Organometallic Chemistry  Robert Crabtree
A survey of the organometallic chemistry of the transition elements and of homogeneous catalysis. TTH 9–10:15

CHEM 553b, Small Molecule Crystallography  Nilay Hazari, Michael Takase
An introduction to small molecule crystallography. The course covers both theoretical and applied concepts and includes hands-on experience on how to solve and refine the structure of small molecules. TTH 10:30–11:45

CHEM 554b, Bio-Inorganic Chemistry  Gary Brudvig
An advanced introduction to biological inorganic chemistry. Important topics in metalloprotein chemistry are illustrated. Objective is to define and understand function in terms of structure. Topics include catalysis with and without electron transfer, and carbon, oxygen, and nitrogen metabolism. TTH 9–10:15

CHEM 555b, Inorganic Mechanisms

CHEM 556b, Biochemical Rates and Mechanisms  J. Patrick Loria
An advanced treatment of enzymology. Topics include transition state theory and derivation of steady-state and pre-steady-state rate equations. The role of entropy and enthalpy in accelerating chemical reactions is considered, along with modern methods for the study of enzyme chemistry. These topics are supplemented with in-depth analysis of the primary literature. TTH 9–10:15

CHEM 557au, Modern Coordination Chemistry  John Faller
The principles of modern inorganic chemistry. Main group and transition element chemistry: reactions, bonding, structure, and spectra. TTH 11:35–12:50

CHEM 558b, Biophysics II: Biophysical Spectroscopy  Elsa Yan
A discussion of application of spectroscopy to biomolecules. Topics include Raman, single-molecule, fluorescence, FTIR, optical ultrafast, NMR and EPR spectrosopies. Emphasis is placed on interpreting spectroscopic data to gain structural and dynamic information to answer biological questions at the molecular level. MWF 10:30–11:20

CHEM 560La, Advanced Physical Methods in Molecular Science I  Patrick Vaccaro
A laboratory course introducing physical chemistry tools used in the experimental and
theoretical investigation of large and small molecules. Modules include electronics, vacuum technology, optical spectroscopy and lasers, and computer programming. F 3–4

CHEM 561Lb, Advanced Physical Methods in Molecular Science II
A laboratory course introducing physical chemistry tools used in the experimental and theoretical investigation of large and small molecules. Modules include machining materials, magnetic resonance, optical spectroscopy and lasers, and computational tools. F 3–4

CHEM 562L, Laboratory in Instrument Design and the Mechanical Arts  Kurt Zilm, David Johnson
Familiarization with modern machine shop practices and techniques. Use of basic metalworking machinery and instruction in techniques of precision measurement and properties of commonly used metals, alloys, and plastics.

CHEM 564L, Advanced Mechanical Instrumentation  Kurt Zilm, David Johnson
A course geared for both the arts and sciences that goes beyond the basic introductory shop courses, offering an in-depth foundation study utilizing hands-on instructional techniques that must be learned from experience. Prerequisite: CHEM 562L.

CHEM 565L, Introduction to Glass Blowing  Patrick Vaccaro, Daryl Smith
The course provides a basic introduction to the fabrication of scientific apparatus from glass. Topics covered include laboratory setup, the fundamental skills and techniques of glass blowing, the operation of glass fabrication equipment, and requisite safety procedures.

CHEM 570a, Introductory Quantum Chemistry  Victor Batista
The elements of quantum mechanics developed and illustrated with applications to chemical problems. Suitable for first-year graduate students in chemistry who have had some exposure to quantum mechanics as part of an undergraduate chemistry course. TTH 9–10:15

CHEM 572b, Advanced Quantum Mechanics  John Tully
Topics in quantum mechanics that are essential for understanding modern chemistry, physics, and biophysics. Topics include the interaction of radiation with matter, and using quantized radiation fields, and may include time-dependent quantum theory, scattering, semiclassical methods, angular momentum, density matrices, and electronic structure methods. Prerequisite: CHEM 570a or the equivalent. TTH 9–10:15

CHEM 590a, Ethical Conduct and Scientific Research  Jonathan Parr
A survey of ethical questions relevant to the conduct of research in the sciences with particular emphasis on chemistry. A variety of issues, including plagiarism, the falsification of data, and financial malfeasance, are discussed, using as examples recent cases of misconduct by scientists. Enrollment is restricted to graduate students in chemistry.

CHEM 600–670, Research Seminars
Presentation of a student’s research results to his/her adviser and fellow research group members. Extensive discussion and literature review are normally a part of the series.

CHEM 700, Laboratory Rotation for First-Year Biophysical and Chemical Biology
Graduate Students  Gary Brudvig, Craig Crews
CHEM 720, Current Topics in Organic Chemistry
A seminar series based on invited speakers in the general area of organic chemistry.

CHEM 730, Molecular Science Seminar
A seminar series based on invited speakers in the areas of physical, inorganic, and biological chemistry.

CHEM 990, Research
Individual research for Ph.D. degree candidates in the Department of Chemistry, under the direct supervision of one or more faculty members.
CLASSICS

402 Phelps Hall, 203.432.0977
www.yale.edu/classics
M.A., M.Phil., Ph.D.

Chair
Kirk Freudenburg

Director of Graduate Studies
Egbert Bakker [F] (404 Phelps, 203.432.0980)
Irene Peirano [Sp] (307A Phelps, 203.432.8536)

Professors  Egbert Bakker (on leave [Sp]), Victor Bers, Kirk Freudenburg, Emily Greenwood, Verity Harte (Classics; Philosophy; on leave [Sp]), Donald Kagan (Classics; History), Diana Kleiner (Classics; History of Art), Christina Kraus (on leave [F]), J.G. Manning (Classics; History), John Matthews (Classics; History), William Metcalf (Adjunct; Curator of Coins & Medals, Art Gallery)

Associate Professor  Milette Gaifman (Classics; History of Art)

Assistant Professors  Joshua Billings, Jay Fisher, Andrew Johnston, Pauline LeVen, Irene Peirano

Lecturers  Alexander Loney (ACLS), Timothy Robinson, Joseph Solodow

Affiliated Faculty  Susanne Bobzien (Philosophy), Dimitri Gutas (Near Eastern Languages & Civilizations), Bentley Layton (Religious Studies), Dale Martin (Religious Studies), Susan Matheson (Curator of Ancient Art, Art Gallery), David Quint (Comparative Literature), Barbara Sattler (Philosophy), Barbara Shailor (Deputy Provost; Paleography)

Fields of Study
The degree program in Classical Philology seeks to provide an overall knowledge of Greek and Roman civilization, combined with specialized work in a number of fields or disciplines within the total area of classical antiquity.

Admission Requirements
A minimum of three years (four preferred) of college training in one of the classical languages and two years (three preferred) in the other.

Requirements for the Ph.D. Degree in Classics
1. Diagnostic sight translations in Greek and Latin (these are taken before the beginning of the first term and also, if necessary, before the beginning of the third) are given to assess the student’s proficiency and progress in both languages.
2. A proseminar offering an introduction to the discipline of Classics and its various subdisciplines.
3. Departmental reading examinations in French (or Italian) and German. The first (in either language) is to be passed by the end of the first year, the second by the end of the second year in residence.

4. A minimum of fourteen term courses: (i) two yearlong survey courses in the history of Greek and Latin literature (four courses in total); (ii) at least four seminars, of which two have to be literary seminars in one language, and one in the other; (iii) one course in historical or comparative linguistics; (iv) one course in ancient history (either an 800-level seminar or a 600-level materials course), and one in classical art and archaeology; (v) of these fourteen courses, twelve must be taken in the first two years of study; the last two, which must be 800-level seminars, are to be taken in the third year, normally one in each term.

5. Greek and Latin composition (this requirement may but need not be satisfied by courses taken under [4] above).

6. Oral examinations in Greek and Latin literature, based on the Classics Ph.D. reading list. These are to be taken closely following the surveys in the respective literatures, as follows: the first, at the end of the second term (May of the first year), the second at the end of the fourth term (May of the second year).

7. Translation examinations in Greek and Latin, based on the Classics Ph.D. reading list, by the beginning of the fifth term in residence.

8. Special fields oral examinations will occur at the beginning of the sixth term, and consist of four areas of special concentration selected by the candidate in consultation with the director of graduate studies. One of the special fields should be related to the student’s chosen dissertation topic; the three other fields are in each of the two ancient languages/cultures; one historical topic, or a topic with historical potential, is advised. In addition to the oral exam, the student will be asked to write a short summary of the dissertation topic and submit this summary and a working dissertation title to the special fields examiners and to the dissertation adviser (who may or may not have worked on the project as a “special topic” with the student). The summary should discuss where the student’s work stands at the beginning of the term and how the student expects the research will progress over the course of the sixth term as he or she writes the formal dissertation prospectus.

10. A dissertation. All students at the end of each term of dissertation research and writing will present their work in progress in a “chapter colloquium,” which will mimic the prospectus defense in format (i.e., a discussion with interested faculty of a presubmitted chunk of written work). If no chapter or written work is presentable at the time of the colloquium, the student would have to justify this.

In addition to the Graduate School’s requirement of Honors grades in at least one year course or two term courses, students must have a High Pass average in the remaining courses. Admission to candidacy for the Ph.D. is granted upon completion of all predisertation requirements not later than the end of the seventh term of study.

The faculty considers experience in the teaching of language and literature to be an important part of this program. Students in Classics typically teach in their third and fourth years of study.
Combined Programs

CLASSICS AND ANCIENT HISTORY

Admission requirements  Students may apply to either the Department of Classics or the Department of History. In the former case, the requirements are the same as for Classical Philology; in addition, at least two term courses in Greek or Roman history are required for admission to the program.

Requirements for the Ph.D. degree in Classics and Ancient History

1. Diagnostic sight translations in Greek and Latin (these are taken before the beginning of the first term and also, if necessary, before the beginning of the third) are given to assess the student’s proficiency and progress in both languages.

2. A proseminar offering an introduction to the discipline of Classics and its various subdisciplines.

3. Departmental reading examinations in French (or Italian) and German. The first (in either language) is to be passed by the end of the first year, the second by the end of the second year in residence.

4. A minimum of fourteen term courses: (i) one yearlong survey (two courses) in the history of Greek or Latin literature; (ii) one seminar in Greek or Latin literature; (iii) six courses in Greek and Roman history (three of these must be either seminars or materials courses, two in one language, one in the other); (iv) two courses in another period of history; (v) of these fourteen courses, thirteen must be taken in the first two years of study; the remaining course must be taken in the third year, normally in the first term; this has to be an 800-level seminar.

5. An oral examination in Greek or Latin literature, based on the Ancient History Ph.D. reading list, in May following the yearlong survey of the language in question.

6. A translation examination in the language (Greek or Latin) for which the survey course was followed, based on the Ancient History Ph.D. reading list, by the beginning of the fifth term in residence; the student will write an exam in the other language based on a reading list created in consultation with the director of graduate studies.

7. Special fields oral examinations will occur at the beginning of the sixth term, and consist of four areas of special concentration selected by the candidate in consultation with the director of graduate studies. One of the special fields should be related to the student’s chosen dissertation topic; the three other fields are in each of the two ancient languages. In addition to the oral exam, the student will be asked to write a short summary of the dissertation topic and submit this summary and a working dissertation title to the special fields examiners and to the dissertation adviser (who may or may not have worked on the project as a “special topic” with the student). The summary should discuss where the student’s work stands at the beginning of the term and how the student expects the research will progress over the course of the sixth term as he or she writes the formal dissertation prospectus.

8. A dissertation prospectus by the end of the sixth term in residence.

9. A dissertation. All students at the end of each term of dissertation research and writing will present their work in progress in a “chapter colloquium,” which will mimic the prospectus defense in format (i.e., a discussion with interested faculty of
a presubmitted chunk of written work). If no chapter or written work is presentable at the time of the colloquium, the student would have to justify this.

CLASSICAL ART AND ARCHAEOLOGY

The program is designed to give a general knowledge of the development of art and architecture in the classical world from the Bronze Age to Late Antiquity, combined with a detailed study of one particular period and area; and an acquaintance with the contribution made by field archaeology. The program has a strong art historical component, and it is expected that each student will take advantage of available opportunities to visit the major sites and monuments.

Requirements for the Ph.D. degree in Classical Art and Archaeology

1. Diagnostic sight translations in Greek and Latin (these are taken before the beginning of the first term and also, if necessary, before the beginning of the third) are given to assess the student’s proficiency and progress in both languages.
2. A proseminar offering an introduction to the discipline of Classics and its various subdisciplines.
3. Departmental reading examinations in Italian (or French) and German. The first (in either language) is to be passed by the end of the first year, the second by the end of the second year in residence.
4. A minimum of fourteen term courses: (i) a minimum of six courses should be in Greek and/or Roman art and/or archaeology (at least four must be seminars); (ii) a minimum of two courses should be in a related field of the history of art, for example Medieval or Renaissance; (iii) a minimum of two courses should be in Greek or Roman history, numismatics, or papyrology; (iv) students must demonstrate a competence in Greek and Latin, usually by passing at least one 400/700-level course in each language; (v) of the remaining four courses, at least two should be seminars in Greek or Latin literature.
5. A written examination in classical art and archaeology, by the beginning of the sixth term. The examination consists of identifications of works of art and architecture, essays, and a twenty-four-hour research paper, followed by an oral exam in four areas of Greek and Roman art and architecture (time period, locale, genre, free choice), with specific topics within those categories agreed upon in advance by the candidate, adviser, and the Classics director of graduate studies. Consideration is normally given to the probable dissertation topic and the way in which preparation for the orals might enhance the writing of the dissertation prospectus.
6. A dissertation prospectus, normally by the end of the sixth term in residence.
7. A dissertation. All students at the end of each term of dissertation research and writing will present their work in progress in a “chapter colloquium,” which will mimic the prospectus defense in format (i.e., a discussion with interested faculty of a presubmitted chunk of written work). If no chapter or written work is presentable at the time of the colloquium, the student would have to justify this.

CLASSICS AND COMPARATIVE LITERATURE

Admission requirements Prerequisites for admission through the Department of Classics: same as for Classical Philology. (For admission requirements in the Department of
After admission to the Department of Classics, qualified students may apply to be admitted to this joint program, normally during the first term of residence; the directors of graduate studies of both departments should be consulted before application to the joint program is made.

Requirements for the Ph.D. degree in Classics and Comparative Literature

1. Diagnostic sight translations in Greek and Latin (these are taken before the beginning of the first term and also, if necessary, before the beginning of the third) are given to assess the student’s proficiency and progress in both languages.

2. A proseminar offering an introduction to the discipline of classics and its various subdisciplines.

3. A minimum of fourteen term courses: (i) at least seven in Classics; (ii) including two yearlong surveys (four courses) in the history of Greek and Latin literature; (iii) two 800-level seminars; (iv) at least six courses in Comparative Literature; (v) of these at least four courses should be on postclassical European literature; (vi) and two courses on literary theory or methodology; (vii) of these fourteen courses, twelve must be taken in the first two years of study; the last two, which must be Classics 800-level seminars, are to be taken in the third year, normally one in each term.

4. Literary proficiency in German and in one other modern language, to be demonstrated by the end of the second year in residence.

5. Oral examinations in Greek and Latin literature, based on the Classics Ph.D. reading list. These are to be taken closely following the surveys in the respective literatures, as follows: the first, at the end of the second term (May of the first year), the second at the end of the fourth term (May of the second year).

6. Translation examinations in Greek and Latin, based on the Classics Ph.D. reading list, by the beginning of the fifth term in residence.

7. An oral examination in the Comparative Literature department on six topics appropriate to both disciplines, selected in consultation with the two directors of graduate studies, by the middle of the sixth term. One of the topics studied will be related to the student’s dissertation topic.

9. A dissertation. All students at the end of each term of dissertation research and writing will present their work in progress in a “chapter colloquium,” which will mimic the prospectus defense in format (i.e., a discussion with interested faculty of a presubmitted chunk of written work). If no chapter or written work is presentable at the time of the colloquium, the student would have to justify this.

CLASSICS AND PHILOSOPHY JOINT-PH.D. PROGRAM

The Classics and Philosophy Program is a joint program, offered by the Departments of Classics and Philosophy, for students wishing to pursue graduate study in ancient philosophy. Suitably qualified students may apply for entry to the program either through the Classics department for the Classics track, details of which are given below, or through the Philosophy department for the Philosophy track, details of which may be found at www.yale.edu/philos/grad_classics.html.

Applicants for the Classics track of the joint program must satisfy the general requirements for admission to the Classics graduate program, in addition to the requirements
of the Classics track of the joint program. Applicants for the Philosophy track of the joint program must satisfy the general requirements for admission to the Philosophy graduate program, in addition to the requirements of the Philosophy track of the joint program.

The program is overseen by an interdepartmental committee currently consisting of Professors Susanne Bobzien, Verity Harte, and Barbara Sattler, together with the DGS in Classics and the DGS in Philosophy.

Requirements of the Classics track of the Classics and Philosophy Program

1. Diagnostic sight translations in Greek and/or Latin as follows: diagnostic sight translations in either Greek or Latin (taken at the beginning of the first term, at the beginning of the second year and, where deemed appropriate, also at the beginning or end of the second term) will be given to assess the student's progress in the classical languages. The same pattern is repeated for the second language in the second year. Students with sufficient language proficiency may take the tests in both languages in the first year.

2. A proseminar offering an introduction to the discipline of Classics and its various subdisciplines.

3. Departmental reading examinations in French (or Italian) and German. The first (in either language) is to be passed by the end of the first year, the second by the end of the second year in residence.

4. A minimum of fourteen term courses, of which (i) at least four should be in ancient philosophy, including at least two involving original language work; (ii) of ten remaining courses, five should be in Classics, five in Philosophy, including (a) of five in Classics, two terms of history of Greek or Latin literature, two courses at 700/800-level in Greek or Latin; and (b) of five in Philosophy, one in history of philosophy other than ancient philosophy, three in nonhistorical philosophy. It is recommended that students without formal training in logic take a logic course appropriate to their philosophical background.

5. Translation examinations in Greek and Latin, based on the Classics and Philosophy Ph.D. reading list, by the beginning of the fifth term in residence.

6. Oral examinations in Greek and Latin literature, based on the Classics and Philosophy Ph.D. reading list, by the end of the fifth term in residence.

7. One of the two qualifying papers required for the Ph.D. in Philosophy by the end of the sixth term in residence; this paper should be on a philosophical topic other than ancient philosophy.

8. Oral examinations/special fields in two areas of concentration, one of which must be in ancient philosophy and which will in addition include a written component, while the other must cover a classical topic other than ancient philosophy, by the end of the sixth term in residence.

10. A dissertation. All students at the end of each term of dissertation research and writing will present their work in progress in a “chapter colloquium,” which will mimic the prospectus defense in format (i.e., a discussion with interested faculty of a presubmitted chunk of written work). If no chapter or written work is presentable at the time of the colloquium, the student would have to justify this.
CLASSICS AND RENAISSANCE STUDIES

Admission requirements Same as for Classical Philology. Applications should be submitted directly to Classics with an indication that the student wishes to apply for the combined degree in Classics and Renaissance Studies.

Requirements for the Ph.D. degree in Classics and Renaissance Studies

1. Diagnostic sight translations in Greek and Latin (these are taken before the beginning of the first term and also, if necessary, at the beginning of the third) are given to assess the student's proficiency and progress in both languages.

2. A proseminar offering an introduction to the discipline of Classics and its various subdisciplines.

3. Sixteen term courses, divided equally between Classics and Renaissance Studies: (i) eight courses in Classics; (ii) including two yearlong surveys (four courses) of Greek and Latin literature; (iii) at least three seminars; (iv) eight courses in Renaissance Studies; (v) two terms of the Renaissance Studies Core Course; (vi) six additional term courses to be taken in at least two disciplines (such as literature, history, history of art, music, religious studies, etc.); one of these courses should meet the normal Classics requirements of a course in classical art or archaeology; (vii) of these sixteen courses, fourteen must be taken in the first two years of study; the last two, which must be Classics 800-level seminars, are to be taken in the third year, normally one in each term.

4. Literary proficiency in Italian, as examined by Renaissance Studies, and in a second language, normally German or French.

5. Oral examinations in Greek and Latin literature, based on the Classics Ph.D. reading list. These are to be taken closely following the surveys in the respective literatures, as follows: the first, at the end of the second term (May of the first year), the second at the end of the fourth term (May of the second year).

6. Translation examinations in Greek and Latin, based on the Classics and Renaissance Studies Ph.D. reading list, by the end of the fifth term in residence.

7. Oral examinations on special fields appropriate to both disciplines, by the beginning of the sixth term. Seventy-five minutes on three or four topics in classical Greek and Latin literature; and forty-five minutes (three fifteen-minute questions) on Renaissance topics to be divided between at least two disciplines, i.e., literature, history, history of art, etc., selected in consultation with the directors of graduate studies in both disciplines. One of the fields studied will be related to the student’s dissertation topic. In addition to the oral exam, the student will be asked to write a short summary of his or her dissertation topic and submit this summary and a working dissertation title to the special fields examiners and to the dissertation adviser (who may or may not have worked on the project as a “special topic” with the student). The summary should discuss where the student’s work stands at the beginning of the term and how the student expects the research will progress over the course of the sixth term as he or she writes the formal dissertation prospectus.

9. A dissertation. All students at the end of each term of dissertation research and writing will present their work in progress in a “chapter colloquium,” which will
mimic the prospectus defense in format (i.e., a discussion with interested faculty of a presubmitted chunk of written work). If no chapter or written work is presentable at the time of the colloquium, the student would have to justify this.

For information about the Ph.D. program in Graeco-Arabic Studies, please contact Professor Gutas, Department of Near Eastern Languages and Civilizations.

**Master’s Degrees**

**M.Phil.** See Degree Requirements under Policies and Regulations.

**M.A.** The Department of Classics does not admit students for a terminal master’s degree, nor does it award an M.A. en route to the Ph.D. degree. If, however, a student admitted for the Ph.D. leaves the program prior to completion of the doctoral degree, he or she may be eligible to receive a terminal master’s degree upon completion of eight courses, ordinarily with a High Pass average in two successive terms.

Program materials are available upon request to the Director of Graduate Studies, Department of Classics, Yale University, PO Box 208266, New Haven CT 06520-8266.

**Courses**

**GREK 705b**, Daily Life in the Greek Papyri  
J.G. Manning  
Introduction to the language and the content of Greek papyri from Egypt. Emphasis on documents of various kinds. **MW 4–5:15**

**GREK 714b**, Homeric Hymns  
Pauline LeVen  
Translation and study of selections from Hesiod’s *Theogony* and *Works and Days* and from the Homeric hymns, with attention to poetics, myths, and connections with Homeric epic. **MW 2:30–3:45**

**GREK 726a/PHIL 601au**, Plato’s *Laws X*  
Verity Harte, Raphael Woolf  
The course focuses on the Greek text of Plato’s *Laws*, Book X, which offers one of the earliest surviving characterizations of atheism, against which it argues that gods exist, that they have concern for human beings, and that they are just. **W 3:30–5:20**

**GREK 760au**, Lyric Poetry: Pindar and Bacchylides  
Egbert Bakker  
Close reading of the lyric poetry of Pindar and Bacchylides. Focus on victory odes (epinicians), with additional readings from paens and dithyrambs. Discussion of composition, themes, and poetics, as well as issues of genre and performance. The poems’ relations to contemporary religious and social practices. Introduction to a range of modern critical approaches. **TTH 1–2:15**

**GREK 790au**, Greek Syntax and Stylistics  
Victor Bers  
Stylistic analysis and extended prose composition in imitation of particular genres and “subgenres,” concentrating on classical Attic prose. Students enrolled in GREK 790a are normally required to attend and do the work in GREK 390a, a review of accidence and syntax, elementary composition, and stylistic analysis of Greek prose of the fifth and fourth centuries B.C., including a comparison of “prosaic” and “poetic” syntax. **TTH 9–10:15, T 10:30–11:20**
LATN 721a, Vergil’s Aeneid  Irene Peirano
An in-depth study of Vergil’s Aeneid within its political context. MW 1–2:15

LATN 755b, Martial  Irene Peirano
A study of Martial’s epigrams. Topics include poetics and the book, sex and gender, the city of Rome, and Martial’s role in the history of the epigrammatic genre. TTH 1–2:15

LATN 759a, Latin Biography  Andrew Johnston
A reading of a variety of Latin biographies (and autobiographies) from the Augustan period to Late Antiquity in their cultural and political contexts. Selected readings from other ancient works and modern scholarship in English. Emphasis on the development of the genre, and the constructed distinctions between biography and historiography, such as purpose, themes, evidence, and rhetorical techniques. TTH 11:35–12:50

LATN 760b, Petronius  Kirk Freudenburg
Close reading and discussion of the Latin text of Petronius’s Satyricon, with attention to grammar, syntax, and style, as well as to larger issues of literature and culture in Neronian Rome. MW 1–2:15

LATN 790b, Latin Syntax and Stylistics  Joseph Solodow
A systematic review of syntax and an introduction to Latin style. Selections from Latin prose authors are read and analyzed, and students compose short pieces of Latin prose. For students with some experience reading Latin literature who desire a better foundation in forms, syntax, idiom, and style. MW 9–10:15

CLSS 644a/HIST 519a, Documents of Roman History  William Metcalf
An introduction to principal documents, preserved primarily on stone or in metal, that bear on Roman history from the fifth century B.C. to the fourth century A.D. Selected documents are either themselves important (e.g., the Twelve Tables) or are paradigmatic for occurrences that are extensive in time and space (e.g., imperial rescripts, city and colonial charters). Documents are in Latin or Greek and are accompanied by English translations. M 2:30–4:20

CLSS 645b/HIST 507b, Numismatics  William Metcalf
An introduction to the history of ancient coinage and the modern methodology of numismatic study. Brief consideration of the Greek background is followed by detailed treatment of the Roman republic and empire. Prerequisite: proficiency in Greek and Latin. M 2:30–4:20

CLSS 807b, Aeschylus’s Oresteia  Victor Bers
Poetic technique, political controversy, and textual matters in Aeschylus’s trilogy, with special attention to the Agamemnon. T 2:30–4:20

CLSS 808b/HIST 501b, Diocletian’s Prices Edict  John Matthews
Diocletian’s Edict on Maximum Prices of 301 C.E., transmitted to us by epigraphic fragments from around fifty cities of the Greek east, was an attempt to control inflation by attaching maximum legal prices to a vast range of products and services, which are listed under thirty-five headings containing more than a thousand individual entries, presented in both Latin and Greek. The seminar approaches the edict not so much as
a specific document of late Roman economic history, but as a presentation of the commercial and other resources available in the Roman empire in the period of its greatest prosperity and regional extent. The text is divided into topics corresponding to the main areas of economic activity that it includes (food and drink, manufactured products and building materials, labor costs and professional services, luxury items, spices and drugs, transport costs, and so on), and its study is directed to yield a portrait of the economy of the Roman empire and commercial relations within it. Attention is given to linguistic and lexicographical aspects, and to such supporting texts as Pliny’s *Natural History* and the *Theodosian Code*. Open to senior undergraduates with a sufficient knowledge of Latin and Greek. M 2:30–4:20

**CLSS 827b/HSAR 558b, Materiality in Greek Art**  Milette Gaifman

This course takes advantage of recent scholarship in Classical art history in order to focus on the importance of media such as marble, bronze, clay, ivory, and gems in ancient visual culture. We examine the relationship between materials, technology, style, and subject matter across a range of contexts, such as the role played by bronze in the development of Greek naturalism; the influence of chryselephantine techniques on depictions of the gods; the relationship between colored marbles and the iconography of political power; and the use of precious and semiprecious stones as personal seals. Throughout, our emphasis is not only on the relationship between medium and facture, but also on the phenomenological qualities of different materials and their influence on ancient habits of viewing and representation. As the second class to be taught as part of the Yale-Cornell Consortium for the Study of Ancient Art, this course will also bring students of both institutions together in a mini-conference at Cornell University, combining student presentations with a workshop focused on the Cornell cast collection, in which we consider the relationship between materiality, replication, and the historiography of ancient sculpture. W 2:30–4:20

**CLSS 838a, Ancient Commentaries**  Irene Peirano

A study of the ancient commentary tradition with special emphasis on Homer and Vergil. Topics to be considered include poetics (narrative, characterization, plot, style, etc.), representation of the critic’s role, textual traditions of ancient commentaries and their reception in modern scholarship, textual criticism in the *scholia*, Homeric *scholia* and their influence on Servius, commentaries and their reception in poetic texts. TH 2:30–4:20

**CLSS 851a/HIST 515a, Theory and Methods in Ancient History**  J.G. Manning

This seminar examines recent trends and work in ancient history with respect to methodology and the use of theory. Special attention is paid to sources, including archaeology, and to work in comparative history. TH 3:30–5:20

**CLSS 862b, Roman Elegy before Ovid**  Christina Kraus

Study of the elegiac verse of Catullus, Propertius, and Tibullus, with attention to the development of the genre. Supplementary readings from Gallus, Sulpicia, and epitaphic poems. Topics include the role of Catullus in the formation of “love” elegy; the relation of form to content, and the challenge of epic; Tibullus and the city/country divide; Propertius’s exploration of the metapoetics of elegy, and his opening up of the genre; elegy’s ventriloquism of women; voyeurism and necrophilia. Weekly secondary readings, at least one in-class presentation of a smaller topic, and a seminar paper. W 2:30–4:20
CLSS 881a, Proseminar: Classical Studies  Egbert Bakker
An introduction to the bibliography and disciplines of classical scholarship. Faculty address larger questions of method and theory, as well as specialized subdisciplines such as linguistics, papyrology, epigraphy, and numismatics. Required for all entering graduate students. TTH 11:35–12:50

CLSS 884b/HIST 517b, The Thirty Tyrants  Donald Kagan
A study of the rule of the Thirty at Athens after the Athenian defeat in the Peloponnesian War. The ancient sources, chiefly the relevant passages in Xenophon's *Hellenica*, Diodorus Siculus, and Plutarch's *Lives*, are read in the original. Reading knowledge of French, German, or Italian desirable. TH 1:30–3:20

CLSS 890a/HSAR 581a, Roman Painting: Achievement and Legacy  Diana Kleiner
Roman mural painting in all its aspects and innovations. Individual scenes and complete ensembles in palaces, villas, and houses in Rome and Pompeii are explored, as are their rediscovery and revival in the Renaissance and Neo-Classical period. Special attention is paid to the four architectural styles; history and mythological painting; the impact of the theater; the part played by landscape, genre, and still life; the accidental survival of painted portraiture; and the discovery and rejection of trompe l’oeil illusionism and linear perspective. T 1:30–3:20

CLSS 891a, Translation and the Classics  Emily Greenwood
This course examines translations of a wide range of Greek and Latin texts in the context of translation studies. As well as exploring the practice and theory of translation in ancient Greece and Rome, including the intersection of translation, tradition, and reception, we also address modern texts that are literary classics in their own right, and which are also in some sense translations/adaptations/versions of Greek and Roman classics. Individual seminars focus on the translation of Homer, Sappho, Catullus, Horace, and Ovid, and topics for discussion include the dialogue between translations of Greco-Roman “classics” and theories of translation and gender; postcolonial translation; and intralingual translation. Against the backdrop of debates about what we lose from studying Classics in translation, this course is alert to what traditional philology gains from studying Classics in translation and from theorizing the activity of translation. T 2:30–4:20

CLSS 896a, History of Greek Literature I  Pauline LeVen
A comprehensive treatment of Greek literature from Homer to the imperial period, with an emphasis on archaic and Hellenistic poetry. The course prepares for the comprehensive oral qualifying examinations. The student is expected to read extensively in the original language, working toward familiarity with the range and variety of the literature. MW 2:30–3:45

CLSS 897b, History of Greek Literature II  Victor Bers
Continuation of CLSS 896a. TTH 10:30–11:20

CLSS 900a/b, Directed Reading
By arrangement with faculty.

CLSS 910a/b, Directed Reading
By arrangement with faculty.
COMPARATIVE LITERATURE

451 College Street, Rm. 202, 203.432.2760
www.yale.edu/complit
M.A., M.Phil., Ph.D.

Chair
Dudley Andrew

Director of Graduate Studies
To be announced

Professors  Dudley Andrew, Katerina Clark, Roberto González Echevarría, Carol Jacobs, Rainer Nägele, David Quint, Katie Trumpener

Associate Professors  Moira Fradinger, Martin Hägglund

Assistant Professors  Ben Conisbee Baer, David Gabriel

Lecturers  Stefan Esposito, Adriana Jacobs

Emeritus  Peter Brooks, Peter Demetz, Shoshana Felman, Benjamin Harshav, Geoffrey Hartman, Michael Holquist

Affiliated Faculty  Rolena Adorno (Spanish & Portuguese), R. Howard Bloch (French), Rüdiger Campe (German), Francesco Casetti (Film Studies), Kang-I Sun Chang (East Asian Languages & Literatures), Michael Denning (American Studies), Wai Chee Dimock (English), Paul Fry (English), Beatrice Gruendler (Near Eastern Languages & Civilizations), Karsten Harries (Philosophy), Tinu Lu (East Asian Languages & Literatures), John MacKay (Slavic Languages & Literatures), Giuseppe Mazzotta (Italian), Christopher L. Miller (French), Joseph Roach (English), Maurice Samuels (French), Henry Sussman (Visiting, German), Christopher Wood (History of Art), Ruth Yeazell (English)

Fields of Study

The Department of Comparative Literature introduces students to the study and understanding of literature beyond linguistic or national boundaries; the theory, interpretation, and criticism of literature; and its interactions with adjacent fields like visual and material culture, linguistics, film, psychology, law, and philosophy. The comparative perspective invites the exploration of such transnational phenomena as literary or cultural periods and trends (Renaissance, Romanticism, Modernism, postcolonialism) or genres and modes of discourse. Students may specialize in any cultures or languages, to the extent that they are sufficiently covered at Yale. The Ph.D. degree qualifies the candidate to teach comparative literature as well as the national literature(s) of her or his specialization.

Special Admissions Requirements

Applicants must hold a B.A. or equivalent degree and should normally have majored in comparative literature, English, a classical or foreign literature, or in an interdepartmental major that includes literature. They must be ready to take advanced courses in two foreign literatures in addition to English upon admission. The GRE General Test is
required. A ten- to twenty-page writing sample, written in English, should be submitted with the application.

**Special Requirements for the Ph.D. Degree**

Students must successfully complete fourteen term courses, including the departmental proseminar and at least six further courses listed under the departmental heading. The student’s overall schedule must fulfill the following requirements: (1) at least one course in medieval or classical European literature, philology, or linguistics (or their equivalents in other cultures); one course in the Renaissance or Baroque (or equivalents); and one course in the modern period; (2) three courses in literary theory or methodology; (3) at least one course each in poetry, narrative fiction, and drama; (4) course work that deals with texts from three literatures, one of which may be English or American; and (5) a substantive focus on one or two national or language-based literatures. Any course may be counted for several requirements simultaneously.

**Languages**  Literary proficiency in four languages (including English, at least one other modern language, and one classical or ancient language, such as Latin, Greek, Biblical Hebrew, Classical Arabic, Classical Chinese, Provençal). The fulfillment of this requirement will be demonstrated by a written exam consisting of a translation of a literary or critical text, to be held by the end of the sixth term; or by an equivalent level in the student’s course work.

**Orals**  An oral examination to be taken in the third year of studies, demonstrating both the breadth and specialization as well as the comparative scope of the student’s acquired knowledge. The examination consists of six topics that include texts from at least three national literatures and several historical periods (at least one modern and one before the Renaissance). The texts discussed should also include representatives of the three traditional literary genres (poetry, drama, narrative fiction).

**Ph.D. dissertation**  Supervised by a dissertation director (or directors) — at least one from the core departmental faculty — and approved by the departmental faculty at large, the dissertation completes the degree. Its initial step is a dissertation prospectus, to be submitted and approved by the dissertation director and a standing faculty committee no later than halfway through the seventh term of study. Admission to candidacy for the Ph.D. is granted after six terms of residence and the completion of all requirements (courses, languages, orals, prospectus) except the dissertation.

**Teaching**  Training in teaching, through teaching fellowships, is an important part of every student’s program. Normally students will teach in their third and fourth years.

**Combined Ph.D. Programs**

**Comparative Literature and Classics**

**Course work**  Students concentrating in Comparative Literature and Classics are required to complete fourteen graduate term courses (plus the Classics proseminar). In Classics, at least seven courses, including the Classics proseminar and four courses (two year-long sequences) in the history of Greek and Latin literature (usually taken in successive
years, each to be followed by the respective oral in that field) and two 800-level Classics seminars (generally taken in each term of the third year). In Comparative Literature, the departmental proseminar and at least five further Comparative Literature courses, including at least four courses in postclassical European literature. The course work across the two programs should also include at least two courses in literary theory or methodology, and at least one course each in poetry, narrative fiction, and drama. At least two courses, excluding directed readings, need to receive the grade of Honors. At least thirteen of the fifteen required courses are to be taken in the first two years; the last two, which must be Classics 800-level seminars, are to be taken in the third year, normally one in each term.

**Languages** To assess each student’s proficiency and progress in both key languages, two sight translation examinations each in Greek and Latin (taken before the beginning of the first and third terms). During the first two years, literary proficiency, demonstrated in course work, in Greek, Latin, and English, as well as reading proficiency in German and one other modern language (usually French).

**Orals** 
- **Classics**: Oral examinations in Greek and Latin literature, based on the Classics Ph.D. reading list. These are to be taken closely following the surveys in the respective literatures, as follows: the first, at the end of the second term (May of the first year), the second at the end of the fourth term (May of the second year). By the end of the fifth term, translation examinations in Greek and Latin literature, based on the Classics Ph.D. reading list. *Comparative Literature*: oral examination (six topics appropriate to both disciplines, balancing a range of kinds of topics and including poetry, narrative fiction, and drama, and at least one significant cluster of postclassical texts), to be taken by the middle of the sixth term. Lists will be worked out with individual examiners, primarily under the guidance of the Comparative Literature DGS, but also with the approval of the Classics DGS. One of the topics studied will be relevant to the student’s planned dissertation topic.

**Prospectus and dissertation** The prospectus must be approved by the DGS in each department (and by the Comparative Literature prospectus committee) by the end of the sixth term in residence. At least one dissertation director must come from the Comparative Literature core faculty. At the end of each term, each dissertation student will presubmit, then discuss their work in progress in a Classics “chapter colloquium” discussion with interested faculty.

**COMPARATIVE LITERATURE AND FILM STUDIES**

Applicants to the joint program must indicate on their application that they are applying both to the program in Film Studies and to Comparative Literature. All documentation within the application should include this information.

**Course work** Students in the joint program are required to complete fifteen graduate term courses. In Comparative Literature, the proseminar and at least five further courses, including at least one course in literary theory or methodology beyond the proseminar; at least one course each in poetry, narrative fiction, and drama; two courses before 1900, including at least one before 1800; a wide range of courses with a focus on one or two
national or language-based literatures; and at least two courses with the grade of Honors. In Film Studies, two core seminars (FILM 601 and FILM 603) and four additional seminars.

Languages At least two languages (besides English) with excellent reading ability (normally one of these languages is French).

Orals Students must pass the Film Studies oral examination. They must also pass the six-field Comparative Literature oral examination, with at least one examiner from the core Comparative Literature faculty; at least three fields involving literary topics, and readings including poetry, fiction, and drama; the other topics may be on film or film-related subjects; some lists may combine film and literature.

Prospectus and dissertation At least one dissertation director must be from Comparative Literature and at least one from Film Studies (in some cases, a single adviser may fulfill both roles). The prospectus must be approved by the Comparative Literature subcommittee and ratified by the Film Studies faculty. The dissertation must pass a pre-submission Public Defense of Work (with at least one examiner from the graduate Film Studies committee, and at least one member from Comparative Literature).

COMPARATIVE LITERATURE AND RENAISSANCE STUDIES

Course work Students are required to complete sixteen graduate term courses, at least seven of these (including the Comparative Literature proseminar) in the Department of Comparative Literature. Students must take at least ten courses in the field of Renaissance Studies (offered in several departments), including two terms of the Renaissance Studies core seminar and three courses in two disciplines other than literature (such as history, history of art, or religious studies). At least three of a student’s overall list of courses must be in literary theory, criticism, or methodology; at least one course each in poetry, narrative fiction, and drama; and at least one course each in ancient or medieval literature and Enlightenment or modern literature. At least two courses must be completed with the grade of Honors. In general, students should take a wide range of courses with a focus on one or two national or language-based literatures.

Languages Latin and Italian, as set by Renaissance Studies—one hour of Renaissance Latin prose; one hour of sixteenth-century Italian prose, one of modern Italian scholarship—and two additional languages, at least one of them European.

Orals The joint oral examination will consist of seven twenty-minute questions (two topics in Renaissance literature from a comparative perspective; three on non-Renaissance literature, including at least one theoretical or critical question; and two questions on Renaissance topics in nonliterary disciplines). Orals should be completed no later than the end of the sixth term.

Prospectus and dissertation The prospectus should be completed in September of the fourth year. Procedures regarding the dissertation will follow departmental practice, although the final readers will normally include at least one member of the Renaissance Studies Executive Committee.
Master’s Degrees

M.Phil. See Degree Requirements under Policies and Regulations. Additionally, students in Comparative Literature are eligible to pursue a supplemental M.Phil. degree in Medieval Studies. For further details, see Medieval Studies.

M.A. (en route to the Ph.D.) Students enrolled in the Ph.D. program may receive the M.A. upon completion of ten courses with at least two grades of Honors and a maximum of three grades of Pass, and the demonstration of proficiency in two of the languages, ancient or modern, through course work or departmental examinations. No student is admitted to a terminal M.A.

Program materials are available upon request to the Director of Graduate Studies, Department of Comparative Literature, Yale University, PO Box 208299, New Haven CT 06520-8299, or stacey.hampton@yale.edu.

Courses

CPLT 513b/FREN 933b, One Hundred Years of Swann’s Way  Alice Kaplan
The first volume of Proust’s *Recherche* has inspired generations of literary critics, psychoanalysts, philosophers, historians, translators, and critical theorists. Reading *Du côté de chez Swann* in light of their responses to the novel allows us to construct an intellectual and literary history of a century of reading Proust. TH 1:30–3:20

CPLT 515a, Proseminar in Comparative Literature  Dudley Andrew
Introductory proseminar for all first-year students in Comparative Literature (and other interested graduate students). Reflections and exercises that aim to grasp the roots and follow developments of this discipline, such as: philology, thematics, historical poetics, hermeneutics, deconstruction, translation theory, comparative arts, world literature. T 9:25–11:15

CPLT 517a/GMAN 605au, Interpretation and Authority  Carol Jacobs
Close readings of works on problems of authority and interpretation by Sigmund Freud, Roland Barthes, Paul de Man, and Walter Benjamin. Exploration of their writing as a performance that questions simplistic notions of truth. Consideration of the problem of how to interpret texts that unsettle the very nature of interpretation. M 1:30–3:20

CPLT 518b, Derrida: Writing, Ethics, and Literature  Martin Hägglund
This course examines Jacques Derrida as a thinker of time in relation to major questions in the humanities. First, we explore his notion of “writing” as a model for the constitution of identity and the very possibility of persistence over time. Second, we analyze his rethinking of ethical notions such as responsibility and hospitality, elucidating the temporality of judgment, as well as Derrida’s critical engagements with Kierkegaard and Levinas. Third, we interrogate the resources for literary studies in Derrida’s writings on autobiography, the signature, and the date of an irreplaceable time, drawing on his readings of James Joyce and Paul Celan. T 1:30–3:20

CPLT 527b/FILM 828b/RUSS 746b, Art and Ideology  Katerina Clark
Examination of texts identified as ideological art, focusing on the relationship between the conventions they use and the ideology they seek to advance. Theoretical readings
include works by Benjamin, Jameson, Lukács, Bakhtin, Marx, Althusser, and Judith Butler; literary works by Balzac, Brecht, Tretiakov, Ostrovsky, Orwell, Koestler, and others; films by Eisenstein, Leni Riefenstahl, and others. W 1:30–3:20

**CPLT 539b/ENGL 846b, American Literature: Regional, National, Global**
Wai Chee Dimock

How does the choice of scale affect our understanding of American literature: its histories, its webs of relations, the varieties of genres that make up its landscape? Through three interlocking prisms—regional, national, and global—we explore multiple permutations of locality and distance; the size of events; lengths and widths of causal connection; and the expanding or contracting spheres of race and gender. Authors include Anne Bradstreet, Nathaniel Hawthorne, Henry James, Sarah Orne Jewett, Ernest Hemingway, Gertrude Stein, Ezza Pound, Paul Bowles, Langston Hughes, Robert Lowell, Monique Truong, Edwidge Danticat. W 1:30–3:20

**CPLT 560b/GMAN 559b, Rilke and Yeats** Carol Jacobs

Reading and discussion of the works of Rainer Maria Rilke and William Butler Yeats. M 1:30–3:20

**CPLT 569b/FILM 771b/RUSS 750b, Montage, Collage, and Political Art**
John MacKay

Monuments of early Soviet film and their relationship to political-aesthetic debates surrounding montage and collage practice. Theories of montage; montage practices across the arts; twentieth-century conceptions of political art; debates about montage/collage practice and avant-gardism since World War II. M 3:30–5:20

**CPLT 572a/ENGL 516a/MDVL 561a, Medieval Celtic Literature** David Gabriel

Major texts of Celtic literature, focusing on works from the birth of vernacular literature in the Middle Ages to the early modern period. Cultural, historical, and literary issues surrounding works in the Irish and Welsh languages; literary culture in Breton, Cornish, Scottish Gaelic, and Manx. Genres include lyric and bardic poetry, heroic and religious narrative, and early Arthurian works. All texts are available in translation, but students have some opportunity to learn basic reading in one or more languages. T 1:30–3:20

**CPLT 590b/FREN 968b/WGSS 620b, Writing Women: Gender and Nation Building in the Francophone Arab World** Edwige Tamalet Talbayev

This course investigates the ways in which the related discourses of nationalism, Islam, and feminism can fruitfully intersect to illuminate the corpus of women’s literature from the former French colonies in the Arab world. With an emphasis on issues of social justice, citizenship, and feminism, both locally and transnationally, we interrogate the ways in which literature mediates the construction of women as historical subjects. Although the focus of the course is on francophone texts, we address the literary landscape of the former Maghrebi and Middle Eastern colonies and mandates as a whole, reading Arabic texts in translation alongside texts written in French and English. Proposed readings include Fatima Mernissi, *Dreams of Trespass*; Kateb Yacine, *Noljima*; Tahar Ben Jelloun, *Lettre à Delacroix*; Joumana Haddad, *I Killed Scheherazade*; Leila Abouzeid, *The Year of the Elephant*; Fawzi Mellah, *Le Conclave des pleureuses*; Ahlam Mosteghanemi, *Memory*
in the Flesh; Malika Mokeddem, Des rêves et des assassins. Reading knowledge of French recommended. W 3:30–5:20

CPLT 622a/AMST 622a and 623b, Working Group on Globalization and Culture
Michael Denning
A continuing collective research project, a cultural studies “laboratory,” that has been running since the fall of 2003. The group is made up of graduate students and faculty from several disciplines. The working group meets regularly to discuss common readings, to develop collective and individual research projects, and to present that research publicly. The general theme for the working group is globalization and culture, with three principal aspects: (1) the globalization of cultural industries and goods, and its consequences for patterns of everyday life as well as for forms of fiction, film, broadcasting, and music; (2) the trajectories of social movements and their relation to patterns of migration, the rise of global cities, the transformation of labor processes, and forms of ethnic, class, and gender conflict; (3) the emergence of and debates within transnational social and cultural theory. The specific focus, projects, and directions of the working group are determined by the interests, expertise, and ambitions of the members of the group, and change as its members change. There are a small number of openings for second-year graduate students. Students interested in participating should contact michael.denning@yale.edu. M 1:30–3:20

CPLT 630a/GMAN 562a+, The Concept of Time
Paul North
The historical formation of the concept of time, a fundamental idea in the humanities and sciences. The benefits and pitfalls of the specifically modern plan to ground thought and being in a theory of time. Texts in German intellectual history by Kant, Husserl, Heidegger, and Einstein, with reference to Marcel Proust’s novel In Search of Lost Time. T 1:30–3:20

CPLT 647a/FILM 704a/HSAR 647a, Perspectives on the Panorama
Tim Barringer, Katie Trumpener
This course explores the cultural, aesthetic, and historical significance of the panorama. The first panoramas were massive 360-degree paintings generating a sense of immersion in an event or environment. Later panoramas took many shapes, anticipating the formats of photography, film, and digital imagery. We treat the panorama as a utopian, imperial, and didactic medium, tracing its cultural impact on painting, literature, popular culture, and contemporary art. We devote particular attention to its afterlife in cinema, from the earliest moving pictures to postwar experimental works and a long series of feature films with key panoramic sequences. T 1:30–3:20

CPLT 649b/GMAN 663b, Desire of Knowledge/Knowledge of Desire
Rainer Nägele
The relationship between knowledge and desire is analyzed through close reading of Sophocles’ Oedipus Tyrannos, Goethe’s Faust, and Kafka’s “Forschungen eines Hundes.” W 3:30–5:20

CPLT 651a/GMAN 647a+/PHIL 606a+, Systems and Their Theory
Henry Sussman
This course spans the developments between two of the most original and still-telling early system-makers, Kant and Hegel, and some important twentieth-century fiction
writers, among them Kafka, Proust, Borges, Calvino, and Pynchon, whose works built and played upon the architecture of systems. We read a number of scholars and scientists who have thought about the systematic dimensions of culture and life: Gregory Bateson, *Steps to an Ecology of Mind*; Fritjof Capra, *The Web of Life*; Anthony Wilden, *System and Structure*; and James Gleick, *Chaos*. Seminars are divided between elucidations of systematic pictures of the world and specific instances from criticism, literature, and other art forms. We work to discern the follow-through between conceptual systems and the systematic dimensions of our everyday lives, whether legal, institutional, or familial.

**M 3:30–5:20**

**CPLT 680b/ENGL 977b, Literary Studies and the Critique of Power**  
Caleb Smith  
Explores how the discipline of literary studies has engaged with the theoretical tradition known as the “critique of power.” Problems of subjectivity and subjection, racial and gendered identities, and the relations between power and knowledge. Readings include major theoretical works as well as a few primary sources and works of literary and cultural criticism. Theorists may include Nietzsche, Foucault, Butler, Deleuze, and others. Literary texts may include works by Sade, Bentham, Harriet Jacobs, and others.

**TH 1:30–3:20**

**CPLT 681a/ENGL 681a, The Mock-Heroic Moment: Milton to Eliot**  
Claude Rawson  
The course begins with Milton’s critique of military epic in *Paradise Lost*. It deals with the changes in the status of the heroic following the decline of the traditional military epic in the seventeenth century, partly under the pressure of increasing antiwar sentiment, and of the domestication of subject matter which led to the so-called rise of the novel. Boileau, Dryden, Swift (*Battle of the Books*), Pope, Gay, Fielding, Byron, Shelley, Eliot, Joyce, and Auden.

**T 1:30–3:20**

**CPLT 694b/ENGL 967b/HSAR 694b, Edwardian Modernities**  
Tim Barringer, Angus Trumble  
This seminar explores the complex and heterogeneous culture of Edwardian Britain and its empire, 1901–1910, and in the following years leading to the First World War. Recent scholarship has emphasized the transitional nature of Edwardian culture. Radical shifts in social, political, and economic structures, and demands for the representation of women, for Indian and Irish independence, coincided with displays of opulence and imperial bravado. New technologies such as the motor car proliferated, and popular culture took on distinctively modern forms through the music halls, illustrated press, gramophone, and cinema. This was the moment of the emergence of distinctively British forms of modern art, literature, and music. Particular emphasis is placed on relationships between the arts: paintings by Sargent, Orpen, Conder, and Vanessa Bell; the literary work of Hardy, H.G. Wells, and Rudyard Kipling; and music by Elgar, Delius, and Vaughan Williams. Architecture and urbanism in Britain, its colonies, and dominions are also considered. The seminar is organized to coincide with the major exhibition *Edwardian Opulence* at the Yale Center for British Art, and it concludes with a trip to the UK to explore sites and collections especially redolent of the Edwardian era, including London’s imperial institutions, museum architecture and collections, the country houses of Edwin Lutyens, and the gardens of Gertrude Jekyll.

**W 1:30–3:20**
CPLT 695b/FREN 833b, Montaigne and the Essay Tradition  David Quint
The course covers most of Montaigne’s Essais, including all of the essays of the Third Book and the “Apologie de Raimond Sebond.” Attention is paid to the literary form of the essays as well as to their historical context and their models (Seneca, Plutarch, Erasmus). The end of the course looks at Montaigne’s English imitators (Bacon, Browne, Cornwallis). T 1:30–3:20

CPLT 786a/GMAN 614a, Literature and the Humanities  Rüdiger Campe
The course discusses the place of literature and literary reading with regard to the ensemble of the humanities. Rather than addressing “literary theory,” the focus is on the epistemology of literature and literary criticism and their significance in and for the humanities. Main readings are Giambattista Vico (New Science), Friedrich Schlegel (Dialogue on Poetry), Wilhelm Dilthey (Introduction to the Human Sciences), and Maurice Blanchot and Michel Foucault (“ontology of literature”). Reading and discussion in English. Reading knowledge of Italian, German, and French welcome. T 3:30–5:20

CPLT 827bU/ HIST 827bU, Myth and Memory in the Persian Book of Kings  Abbas Amanat
This course examines Ferdowsi’s Shahnameh, one the great epics of all times, with emphasis on six of its essential legends. Around the text (in English translation but also the original Persian) we explore political culture, historical context, and collective memories over the course of a millennium since its composition. Prerequisite: knowledge of Persian or familiarity with Persian history and culture. W 7–8:50

CPLT 856a/ENGL 916a, Imperial and Anti-Imperial Epic  Joe Cleary
The collapse of the European empires and the rise of the American empire as the supervening world power in the twentieth century have inspired a wide variety of ambitious novelistic epic and tragic narratives, some focalized from the standpoint of the modern imperial metropoles, others from that of the colonial peripheries. Interleaving literary narratives and theoretical texts, and engaging matters of style and form as well as the difficulties of narrating historical transition, anticolonial insurrection, and the uneven nature of global capitalism, this seminar considers the complex relationship between the history of modern imperialism and the history of modern epic and tragic literary narration. Authors discussed may include Hegel, Lukács, Bakhtin, Moretti, Melville, Conrad, C.L.R. James, Malraux, Achebe, Vargas Llosa, and Yourcenar. W 1:30–3:20

CPLT 899a/FREN 893a, Realism and Naturalism  Maurice Samuels
This seminar interrogates the nineteenth-century French Realist and Naturalist novel in light of various efforts to define its practice. How does critical theory constitute Realism as a category? How does Realism articulate the aims of theory? And how do nineteenth-century Realist and Naturalist novels intersect with other discourses besides the literary? In addition to several works by Balzac, novels to be studied include Stendhal’s Le Rouge et le Noir, Sand’s Indiana, Flaubert’s Madame Bovary, and Zola’s Nana. Some attention also paid to Realist painting. T 1:30–3:20

CPLT 900a, Directed Reading

CPLT 900b, Directed Reading
CPLT 901a, Individual Research

CPLT 901b, Individual Research

CPLT 902b/FILM 718b/GMAN 636b, Theatricality in Film  Brigitte Peucker
Examination of the multiple implications of theatricality in and for the cinema. Theatricality as excess; the appropriation of theatrical modes for film; theatricality as modernist self-reflexivity; performance and the relation of theatricality to subjectivity (performing the self); ritual and reenactment in film; theatricality and the real; the material image.  T 3:30–5:20

CPLT 914b/ENGL 962b, Drama, Performance, Mass Culture  Joseph Roach
Taking account of the genealogy of modern drama in eighteenth-century performance, this seminar considers critical theories of the culture industry in relationship to selected canonical plays and popular theater-historical events from *The Beggar's Opera* (1728) to *The Threepenny Opera* (1928). Topics include the transformation of classical genres into the *drame*, the commercialization of leisure through the mass-marketing of vicarious experience, and the emerging culture of celebrity. Critical readings include selections from the Frankfurt School, Walter Benjamin, Bertolt Brecht, Raymond Williams, Roland Barthes, and Jean Baudrillard. Plays are drawn from popular comedies, Sheridan to Shaw (*Pygmalion* and *My Fair Lady*), and long-running bourgeois dramas, beginning with Lillo's *The London Merchant*.  M 3:30–5:20

CPLT 925b, The Practice of Literary Translation  Peter Cole
Intensive readings in the history and theory of translation paired with practice in translating. Case studies from ancient languages (the Bible, Greek and Latin classics), medieval languages (classical Arabic literature), and modern languages (poetic texts).  T 1–2:15

CPLT 942b/SPAN 912b, The Borges Effect  Roberto González Echevarría
Since the publication of *Ficciones* in 1944 and especially since achieving worldwide acclaim after receiving *ex-aequo* with Samuel Beckett the Formentor Group's Prix International in 1961, Jorge Luis Borges has become one of the most influential modern writers. He is a recognizable and often acknowledged presence in the work of novelists and short-story writers, as well as in that of philosophers and literary theorists. A Borges “effect” can be perceived in John Barth, Julio Cortázar, Gabriel García Márquez, Italo Calvino, and Umberto Eco, and in Maurice Blanchot, Michel Foucault, Gérard Genette, and Jacques Derrida, among others. That effect is also projected retrospectively in Borges’s particular way of reading classics like Homer, Dante, and Cervantes. An elegant, playfully ironic skepticism, together with a fondness for aporias, enigmas, puzzles, and labyrinths as well as for minor genres such as the detective story, are the most recognizable components of Borges’s style and thought. Taken together these components suggest theories about writing and reading. We read closely Borges’s most influential stories, such as “Tlön, Uqbar, Orbis Tertius,” “Pierre Menard, Author of the *Quijote*,” and “The Garden of Forking Paths,” as well as his essays on Homer, Dante, and Cervantes. We then follow his track in the writers mentioned. Readings in English or the French, Spanish, or Italian originals; conducted in English.  W 3:30–5:20
CPLT 963a/SPAN 943a, El Neobarroco  Roberto González Echevarría
A study of the reevaluation of baroque literature (Góngora, Calderón, Quevedo, Sor Juana) by the Spanish Generation of 27, Dámaso Alonso, Pedro Salinas, Jorge Guillén, and twentieth-century Latin American writers such as Alejo Carpentier, José Lezama Lima, Severo Sarduy, Octavio Paz, and others. Theoretical essays such as Alonso’s *La lengua poética de Góngora*, Guillén’s *Lenguaje y poesía*, and Pedro Salinas’s *Reality and the Poet in Spanish Poetry*. Lezama’s *La expresión americana*, Carpentier’s *Tientos y diferencias*, Sarduy’s *Barroco*, and Paz’s *Sor Juana o las trampas de la fe* are analyzed, as are literary works such as Carpentier’s *Concierto barroco*, Lezama’s *Paradiso*, Sarduy’s *Cobra*, and Paz’s *Blanco*. In Spanish. W 3:30–5:20
COMPUTATIONAL BIOLOGY AND BIOINFORMATICS

300 George Street, Suite 501, 203.737.6029
http://cbb.yale.edu
M.S., Ph.D.

Directors of Graduate Studies
Mark Gerstein (Bass 432A, 203.432.6105, mark.gerstein@yale.edu)
Hongyu Zhao (300 George St., Suite 503, 203.737.2903, hongyu.zhao@yale.edu)

Professors James Aspnes (Computer Science), Joseph Chang (Statistics), Ronald Coifman (Mathematics; Computer Science), Xing Wang Deng (Molecular, Cellular & Developmental Biology), Donald Engelman (Molecular Biophysics & Biochemistry), Mark Gerstein (Biomedical Informatics; Molecular Biophysics & Biochemistry; Computer Science), William Jorgensen (Chemistry), Douglas Kankel (Molecular, Cellular & Developmental Biology), Kenneth Kidd (Genetics; Ecology & Evolutionary Biology), Paul Lizardi (Pathology), Elias Lolis (Pharmacology), Perry Miller (Anesthesiology; Medical Informatics; Molecular, Cellular & Developmental Biology), Willard Miranker (Computer Science), Anna Pyle (Molecular Biophysics & Biochemistry), Lynne Regan (Molecular Biophysics & Biochemistry; Chemistry), Martin Schultz (Computer Science), Gordon Shepherd (Neuroscience), Abraham Silberschatz (Computer Science), Dieter Söll (Molecular Biophysics & Biochemistry; Chemistry), Günter Wagner (Ecology & Evolutionary Biology), Xiao-Jing Wang (Neurobiology), Heping Zhang (Public Health; Statistics), Hongyu Zhao (Public Health; Genetics), Steven Zucker (Computer Science; Electrical Engineering; Biomedical Engineering)

Associate Professors Kei-Hoi Cheung (Anesthesiology; Computer Science; Genetics), Alison Galvani (Public Health), Yuval Kluger (Pathology), Michael Krauthammer (Pathology), Andrew Miranker (Molecular Biophysics & Biochemistry), Corey O’Hern (Mechanical Engineering & Materials Science; Physics), Valerie Reinke (Genetics)

Assistant Professors Chris Cotsapas (Neurology), Thierry Emonet (Molecular, Cellular & Developmental Biology), Antonio Giraldez (Genetics), Tae Hoon Kim (Genetics), Steven Kleinstein (Pathology), Jun Lu (Genetics), Steven Ma (Public Health), James Noonan (Genetics), Jeffrey Townsend (Ecology & Evolutionary Biology), Jing Zhang (Statistics)

Fields of Study

Computational biology and bioinformatics (CB&B) is a rapidly developing multidisciplinary field. The systematic acquisition of data made possible by genomics and proteomics technologies has created a tremendous gap between available data and their biological interpretation. Given the rate of data generation, it is well recognized that this gap will not be closed with direct individual experimentation. Computational and theoretical approaches to understanding biological systems provide an essential vehicle to help close this gap. These activities include computational modeling of biological processes, computational management of large-scale projects, database development
and data mining, algorithm development, and high-performance computing, as well as statistical and mathematical analyses.

To enter the Ph.D. program, students apply to an interest-based track within the interdepartmental program in the Biological and Biomedical Sciences.

Special Admissions Requirements
Applicants are expected (1) to have a strong foundation in the basic sciences, such as biology, chemistry, and mathematics, and (2) to have training in computing/informatics, including significant computer programming experience. The Graduate Record Examination (GRE) General Test is required, and the GRE Subject Test in cell and molecular biology, biology, biochemistry, chemistry, computer science, or other relevant discipline is recommended. Alternatively, the Medical College Admission Test (MCAT) may be substituted for the GRE tests. Applicants for whom English is not their native language are required to submit results from the Test of English as a Foreign Language (TOEFL).

Special Requirements for the Ph.D. Degree
With the help of a faculty advisory committee, each student plans a program that includes courses, seminars, laboratory rotations, and independent reading. Students are expected to gain competence in three core areas: (1) computational biology and bioinformatics, (2) biological sciences, and (3) informatics (including computer science, statistics, and applied mathematics). While the courses taken to satisfy the core areas of competency may vary considerably, all students are required to take the following courses: CB&B 561b, 740a, and 752a. A typical program will include nine courses. Completion of the core curriculum will typically take three to four terms, depending in part on the prior training of the student. With approval of the CB&B director of graduate studies (DGS), students may take one or two undergraduate courses to satisfy areas of minimum expected competency. Students will typically take two to three courses each term and three research rotations during the first year. After the first year, students will start working in the laboratory of their Ph.D. thesis supervisor. Students must pass a qualifying examination normally given at the end of the second year or the beginning of the third year. There is no language requirement. Students will serve as teaching assistants in two term courses. In addition to all other requirements, students must successfully complete MB&B 676b, Responsible Conduct in Research (or another course that covers the material).

M.D./Ph.D. Students
Students pursuing the joint M.D./Ph.D. degrees must satisfy the course requirements listed above for Ph.D. students. With approval of the DGS, some courses taken toward the M.D. degree can be counted toward the nine required courses. Such courses must have a graduate course number, and the student must register for them as graduate courses (in which grades are received). Laboratory rotations are available but not required. One teaching assistantship is required.
**Master’s Degree**

**M.S. (en route to the Ph.D.)**  To qualify for the awarding of the M.S. degree a student must (1) complete two years (four terms) of study in the Ph.D. program, with nine required courses taken at Yale, (2) complete the required course work for the Ph.D. program with an average grade of High Pass, (3) successfully complete three research rotations, and (4) meet the Graduate School’s Honors requirement.

**Terminal Master’s Degree Program**  The CB&B terminal master’s program has limited availability and is intended primarily for postdoctoral fellows supported by training grants and for students with sponsored funding, e.g., from industry. The curriculum requirements are the same as in the CB&B Ph.D. program, except that there are no requirements for laboratory research rotations, for serving as a teaching assistant, and for a Ph.D. dissertation. Terminal M.S. students will be expected to complete an M.S. project, including a project report. Completion of the terminal M.S. degree will typically take four terms of full-time study. Applicants should contact the CB&B registrar before submitting an M.S. application.

**Courses**

**CB&B 561b/AMTH 665bu/MCDB 561bu/PHYS 529b, Systems Modeling in Biology**  Thierry Emonet, Steven Kleinstein, Kathryn Miller-Jensen, Xiao-Jing Wang, Steven Zucker  An introduction to the techniques of integrating knowledge from mathematics, physics, and engineering into the analysis of complex living systems. Use of these techniques to address key questions about the design principles of biological systems. Discussion of experiments and corresponding mathematical models. Reading of research papers from the literature. Students build their own models using MATLAB.  TTH 2:30–3:45

**CB&B 645b/BIS 692b/STAT 645b, Statistical Methods in Genetics and Bioinformatics**  Heping Zhang  Introduction to problems, algorithms, and data analysis approaches in computational biology and bioinformatics; stochastic modeling and statistical methods applied to problems such as mapping disease-associated genes, analyzing gene expression microarray data, sequence alignment, and SNP analysis. Statistical methods include maximum likelihood, EM, Bayesian inference, Markov chain Monte Carlo, and some methods of classification and clustering; models include hidden Markov models, Bayesian networks, and the coalescent. The limitations of current models, and the future opportunities for model building, are critically addressed. Prerequisite: STAT 538a, 542b, or 661a. Prior knowledge of biology is not required, but some interest in the subject and a willingness to carry out calculations using R is assumed.

**CB&B 740a, Clinical and Translational Informatics**  Richard Shiffman, Michael Krauthammer  The course provides an introduction to clinical and translational informatics. Topics include (1) overview of biomedical informatics, (2) design, function, and evaluation of clinical information systems, (3) clinical decision making and practice guidelines,
(4) clinical decision support systems, (5) informatics support of clinical research, (6) privacy and confidentiality of clinical data, (7) standards, (8) issues in defining the clinical phenotype, and (9) topics in translational bioinformatics. Permission of the instructor required.

CB&B 752a/CPSC 752a/MB&B 752a/MCDB 752a, Bioinformatics: Practical Application of Simulation and Data Mining  Mark Gerstein

Bioinformatics encompasses the analysis of gene sequences, macromolecular structures, and functional genomics data on a large scale. It represents a major practical application for modern techniques in data mining and simulation. Specific topics to be covered include sequence alignment, large-scale processing, next-generation sequencing data, comparative genomics, phylogenetics, biological database design, geometric analysis of protein structure, molecular-dynamics simulation, biological networks, normalization of microarray data, mining of functional genomics data sets, and machine learning approaches for data integration. Prerequisites: biochemistry and calculus, or permission of the instructor. MW 1–2:15

Additional courses focused on the biological sciences and on areas of informatics are selected by the student in consultation with CB&B faculty.
COMPUTER SCIENCE

A. K. Watson Hall, 203.432.1246
www.cs.yale.edu
M.S., M.Phil., Ph.D.

Chair
Holly Rushmeier

Director of Graduate Studies
Vladimir Rokhlin (108 AKW, 203.432.1283, vladimir.rokhlin@yale.edu)

Professors  Dana Angluin, James Aspnes, Dirk Bergeman (Economics), Julie Dorsey, Stanley Eisenstat, Joan Feigenbaum, Michael Fischer, David Gelernter, Mark Gerstein (Molecular Biophysics & Biochemistry), Paul Hudak, Drew McDermott, Vladimir Rokhlin, Holly Rushmeier, Martin Schultz (Emeritus), Zhong Shao, Avi Silberschatz, Daniel Spielman, Steven Zucker

Associate Professors  Brian Scassellati, Yang Richard Yang

Assistant Professors  Daniel Abadi, Bryan Ford, Frederick Shie (Child Study Center)

Fields of Study
Artificial intelligence (vision, robotics, planning, computational neuroscience, knowledge representation, neural networks); programming languages (functional programming, parallel languages and architectures, programming environments, formal semantics, compilation techniques, modern computer architecture, type theory/systems, and meta-programming); systems (databases, operating systems, networks, software engineering); scientific computing (numerical linear algebra, numerical solution of partial differential equations, mathematical software, parallel algorithms); theory of computation (algorithms and data structures, complexity, distributed systems, learning, online algorithms, graph algorithms, geometric algorithms, fault tolerance, reliable communication, cryptography, security, and electronic commerce); and topics of discrete mathematics with application to computer science (combinatorics, graph theory, combinatorial optimization).

Research Facilities
The department operates a high-bandwidth, local-area computer network based mainly on distributed workstations and servers, with connections to worldwide networks. Workstations include Dell dual-processor PCs (running Linux or Windows/XP). Laboratory contains specialized equipment for graphics, vision, and robotics research. Various printers, including color printers, as well as image scanners, are also available. The primary educational facility consists of thirty-seven PC workstations supported by a large Intel PC server. This facility is used for courses and unsponsored research by Computer Science majors and first-year graduate students. Access to computing, through both the workstations and remote login facilities, is available to everyone in the department.
Special Admissions Requirements
Applicants for admission should have strong preparation in mathematics, engineering, or science. They should be competent in programming but need no computer science beyond that basic level. The GRE General Test and a pertinent Subject Test are required.

Special Requirements for the Ph.D. Degree
There is no foreign language requirement. To be admitted to candidacy, a student must (1) pass ten courses (including CPSC 690 and CPSC 691) with at least two grades of Honors, the remainder at least High Pass, including three advanced courses in an area of specialization; (2) take six advanced courses in areas of general computer science; (3) successfully complete a research project in CPSC 690, 691, and submit a written report on it to the faculty; (4) pass a qualifying examination in an area of specialization; (5) be accepted as a thesis student by a regular department faculty member; (6) serve as a teaching assistant for two terms (four TF units); and (7) submit a written dissertation prospectus, with a tentative title for the dissertation. To satisfy the distribution requirement (requirement 2 above), the student must take one course in programming languages or systems, one programming-intensive course, two theory courses, and two in application areas. In order to gain teaching experience, all graduate students are required to serve as teaching assistants for two terms during their first three years of study. All requirements for admission to candidacy must be completed prior to the end of the third year. In addition to all other requirements, students must successfully complete CPSC 991, Ethical Conduct of Research, prior to the end of their first year of study. This requirement must be met prior to registering for a second year of study.

Master’s Degrees
M.Phil. See Degree Requirements under Policies and Regulations.

M.S. (en route to the Ph.D.) To qualify for the M.S., the student must pass eight courses at the 500 level or above from an approved list. An average grade of at least High Pass is required, with at least one grade of Honors.

Terminal Master’s Degree Program Students may also be admitted to a terminal master’s degree program directly. The requirements are the same as for the M.S. en route to the Ph.D. This program is normally completed in one year, but a part-time program may be spread over as many as four years.

A brochure providing additional information about the department, faculty, courses, and facilities is available from the Graduate Coordinator, Department of Computer Science, Yale University, PO Box 208285, New Haven CT 06520-8285; e-mail, cs-admissions@cs.yale.edu.

Courses
CPSC 521au, Compilers and Interpreters Zhong Shao
Compiler organization and implementation: lexical analysis, formal syntax specification, parsing techniques, execution environment, storage management, code generation and
optimization, procedure linkage, and address binding. The effect of language-design decisions on compiler construction.

**CPSC 522b**, Operating Systems  Bryan Ford
The design and implementation of operating systems. Topics include synchronization, deadlocks, process management, storage management, file systems, security, protection, and networking.

[CPSC 524b, Parallel Programming Techniques]

**CPSC 526a**, Building Decentralized Systems

**CPSC 527a**, Object-Oriented Programming  Michael Fischer
Object-oriented programming as a means to efficient, reliable, modular, reusable code. Use of classes, derivation, templates, name-hiding, exceptions, polymorphic functions, and other features of C++. TTH 2:30–3:45

**CPSC 528b**, Language-Based Security

[CPSC 530a, Formal Semantics]

**CPSC 531b**, Computer Music: Algorithmic and Heuristic Composition  Paul Hudak
Study of the theoretical and practical fundamentals of computer-generated music. Music and sound representations, acoustics and sound synthesis, scales and tuning systems, algorithmic and heuristic composition, and programming languages for computer music. Theoretical concepts are supplemented with pragmatic issues expressed in a high-level programming language.

[CPSC 532b, Computer Music: Sound Representation and Synthesis]

[CPSC 533b, Computer Networks]

**CPSC 534a**, Mobile Computing and Wireless Networking  Yang Richard Yang
An introduction to the principles of mobile computing and its enabling technologies. Topics include principles of mobile computing wireless systems; information management; location-independent and dependent computing models; disconnected or weakly connected operation models; human-computer interactions; mobile applications and services; security; power management; and sensor networks.

[CPSC 535b, Internet-Scale Applications]

**CPSC 536a/ENAS 960a**, Networked Embedded Systems and Sensor Networks  Andreas Savvides and staff
Introduction to the fundamental concepts of networked embedded systems and wireless sensor networks, presenting a cross-disciplinary approach to the design and implementation of smart wireless embedded systems. Topics include embedded systems programming concepts; low-power and power-aware design; radio technologies; communication protocols for ubiquitous computing systems; and mathematical foundations of sensor behavior. Laboratory work includes programming assignments on low-power wireless devices.
CPSC 537b, Introduction to Databases  Avi Silberschatz

CPSC 538b, Database System Implementation and Architectures  Daniel Abadi
A study of systems programming techniques, with a focus on database systems. In the first half of the term, students analyze the design of a traditional DBMS and build components of a DBMS prototype, e.g., a catalog-manager, a buffer-manager, and a query execution engine. In the second half, students examine nontraditional architectures such as parallel databases, data warehouses, stream databases, and Web databases.

CPSC 540b, Numerical Computation  Vladimir Rokhlin
Algorithms for numerical problems in the physical, biological, and social sciences: solution of linear and nonlinear systems of equations, interpolation and approximation of functions, numerical differentiation and integration, optimization.

CPSC 545a, Introduction to Data Mining  Vladimir Rokhlin
A study of algorithms and systems that allow computers to find patterns and regularities in databases, to perform prediction and forecasting, and to improve their performance generally through interaction with data. MW 1–2:15

[CPSC 555a/U/ECNS 563a, Economics and Computation]
[CPSC 557a/U, Sensitive Information in a Wired World]
[CPSC 562a/U/AMTH 562a/U, Graphs and Networks]
[CPSC 563b/U, Machine Learning]
[CPSC 565a/U, Theory of Distributed Systems]

CPSC 567b, Cryptography and Computer Security  Michael Fischer
A survey of such private and public key cryptographic techniques as DES, RSA, and zero-knowledge proofs, and their application to problems of maintaining privacy and security in computer networks. Focus on technology, with consideration of such societal issues as balancing individual privacy concerns against the needs of law enforcement, vulnerability of societal institutions to electronic attack, export regulations and international competitiveness, and development of secure information systems.

CPSC 568a, Computational Complexity  Joan Feigenbaum

CPSC 569b, Randomized Algorithms  James Aspnes
Beginning with an introduction to tools from probability theory including some inequalities like Chernoff bounds, the course covers randomized algorithms from several areas: graph algorithms, algorithms in algebra, approximate counting, probabilistically checkable proofs, and matrix algorithms.
CPSC 570a, Artificial Intelligence  Brian Scassellati
Introduction to artificial intelligence research, focusing on reasoning and perception. Topics include knowledge representation, predicate calculus, temporal reasoning, vision, robotics, planning, and learning. MWF 10:30–11:20

CPSC 571a, Topics in Artificial Intelligence  Drew McDermott
An in-depth study of one area of artificial intelligence. Topics vary from year to year. The topic for 2012–2013 is artificial intelligence and philosophy of mind.

CPSC 573b, Intelligent Robotics  Brian Scassellati
Introduction to the construction of intelligent, autonomous systems. Sensory–motor coordination and task-based perception. Implementation techniques for behavior selection and arbitration, including behavior-based design, evolutionary design, dynamical systems, and hybrid deliberative-reactive systems. Situated learning and adaptive behavior.

CPSC 575a/ENAS 575a, Computational Vision and Biological Perception  Steven Zucker
An overview of computational vision with a biological emphasis. Suitable as an introduction to biological perception for computer science and engineering students, as well as an introduction to computational vision for mathematics, psychology, and physiology students.

CPSC 578b, Computer Graphics  Julie Dorsey
Introduction to the basic concepts of two- and three-dimensional computer graphics. Topics include affine and projective transformations, clipping and windowing, visual perception, scene modeling and animation, algorithms for visible surface determination, reflection models, illumination algorithms, and color theory.

[CPSC 579a, Advanced Topics in Computer Graphics]

CPSC 662a/AMTH 561a, Spectral Graph Theory  Daniel Spielman
An applied approach to spectral graph theory. The combinatorial meaning of the eigenvalues and eigenvectors of matrices associated with graphs. Applications to optimization, numerical linear algebra, error-correcting codes, computational biology, and the discovery of graph structure.

CPSC 671a, Advanced Artificial Intelligence  Drew McDermott
This course looks at different facets of artificial intelligence in different terms. The topic this term is artificial general intelligence, or AGI. After about fifty years, AI has scored some impressive successes but has not yet produced a satisfying “artificial person,” that is, an entity that possesses a person’s ability to cope with many different situations, including linguistic discourse. Some think this is because the field has made a wrong turn toward overly specialized research. They have created a series of conferences on AGI to address the need for research that keeps its eyes on the long-term prize—the artificial person. This course is oriented around research papers in both the AGI subfield and its competition, narrow AI work on robotics. Students have opportunities to present and discuss these papers.
[CPSC 675b, Computational Vision and Biological Perception]

CPSC 690a or b, Independent Project I
By arrangement with faculty.

CPSC 691a or b, Independent Project II
By arrangement with faculty.

CPSC 692a or b, Independent Project
Individual research for students in the M.S. program. Requires a faculty supervisor and the permission of the director of graduate studies.

[CPSC 721b, Advanced Programming Language Topics]

CPSC 752a/v/MB&B 752a/v/MCDB 752a/v, Bioinformatics: Practical Application of Simulation and Data Mining  Mark Gerstein
Bioinformatics encompasses the analysis of gene sequences, macromolecular structures, and functional genomics data on a large scale. It represents a major practical application for modern techniques in data mining and simulation. Specific topics to be covered include sequence alignment, large-scale processing, next-generation sequencing data, comparative genomics, phylogenetics, biological database design, geometric analysis of protein structure, molecular-dynamics simulation, biological networks, normalization of microarray data, mining of functional genomics data sets, and machine learning approaches for data integration. Prerequisites: biochemistry and calculus, or permission of the instructor. MW 1–2:15

John Treat (307 HGS, john.treat@yale.edu)

Professors Kang-i Sun Chang, Aaron Gerow, Edward Kamens, Tina Lu, John Treat, Jing Tsu

Assistant Professors William Fleming, Michael Hunter, Chloë Starr (Divinity School)

Senior Lecturers Pauline Lin, Koichi Shinohara (Religious Studies)

Senior Lectors Hsiu-hsien Chan, Min Chen, Seungja Choi, Koichi Hiroe, Angela Lee-Smith, Rongzhen Li, Ninghui Liang, Fan Liu, Yoshiho Maruyama, Ling Mu, Michiaki Murata, Hiroyo Nishimura, Masahiko Seto, Jianhua Shen, Mari Stever, Wei Su, Haiwen Wang, Yu-lin Wang Saussy, Peisong Xu, William Zhou

Lectors Yukie Mammoto, Chuanmei Sun, Shucheng Zhang

Fields of Study

Fields for doctoral study are Chinese literature and Japanese literature. (See also the Combined Ph.D. Program in Film Studies.) Although the primary emphasis is on these East Asian subjects, the department welcomes applicants who are seeking to integrate their interests in Chinese or Japanese literature with interdisciplinary studies in such fields as history, history of art, linguistics, religious studies, comparative literature, film studies, literary theory and criticism, and the social sciences.

Special Admissions Requirements

The department requires entering students in Chinese or Japanese (and the Combined Program in Film Studies) to have completed at least three years of study, or the equivalent, of either Chinese or Japanese. Students applying in Chinese are expected to have completed at least one year of literary Chinese. Students applying in premodern Japanese are expected to have completed at least one year of literary Japanese. This is a doctoral program; no students are admitted for terminal master’s degrees.

Special Requirements for the Ph.D. Degree

During the first three years of study, students are required to take at least fourteen term courses. Usually students complete twelve term courses in the first and second years, and then take two tutorials or two seminars in the third year. Students concentrating in
Chinese or Japanese literature are encouraged to take at least one term course in Western literature or literary theory. By the end of the second year, all students must prove their proficiency in a language other than their primary language of study that is relevant to their course of study and is approved by the director of graduate studies (DGS). By the end of the third year, students specializing in premodern Japanese literature must pass a reading test in literary Chinese. At the end of the second full academic year, the student must take a written examination in the language of his or her specialization, including both its modern and premodern forms.

At the end of each academic year, until a student is admitted to candidacy, a faculty committee will review the student’s progress. For the second-year review, the student must submit a revised seminar research paper, on a topic selected in consultation with the adviser, no later than April 1 of the fourth term. No later than the end of the sixth term the student will take the qualifying oral examination. The exam will cover three fields distinguished by period and/or genre in one or more East Asian national literatures or in other fields closely related to the student’s developing specialization. These fields and accompanying reading lists will be selected in consultation with the examiners and the director of graduate studies in order to allow the student to demonstrate knowledge and command of a range of topics. After having successfully passed the qualifying oral examination, students will be required to submit a dissertation prospectus to the department for approval by October 1 of the seventh term in order to complete the process of admission to candidacy for the Ph.D.

Opportunities to obtain experience in teaching language and literature form an important part of this program. Students in East Asian Languages and Literatures normally teach in their third and fourth years in the Graduate School.

**Combined Ph.D. Program**

The Department of East Asian Languages and Literatures also offers, in conjunction with the Film Studies Program, a combined Ph.D. in East Asian Languages and Literatures and Film Studies. For further details, see Film Studies. Applicants to the combined program must indicate on their application that they are applying both to Film Studies and to East Asian Languages and Literatures. All documentation within the application should include this information.

**Master’s Degrees**

**M.Phil.** The successful completion of all predissertation requirements, including the qualifying examination, will make a student eligible for an M.Phil. degree.

**M.A. (en route to the Ph.D.)** The successful completion of twelve term courses and languages required in the first two years of study will make a student eligible for an M.A. degree.

Additional program materials are available at the department Web site, www.yale.edu/call.
Courses

EALL 550b/RLST 558b, Lotus Sūtra: Scripture and Commentaries  Koichi Shinohara
The seminar is devoted to the reading of Kumārajīva’s Chinese translation (T. 261) and the study of Chinese commentaries, particularly the commentaries by Jizang and Tiantai Zhiyi (T. 1718). Prerequisite: students must be prepared to read Chinese Buddhist texts in the original (or in kanbun). T 1:30–3:20

EALL 565b/HIST 875b, History and Literature of Modern China  Peter Perdue, Jing Tsu
Discussion of selected literary and historical texts of nineteenth- and twentieth-century China, including primary and secondary works. Readings are primarily in English, but Chinese and Japanese texts are included for students who can read them. Topics include violence in practice and imagination; national identity formation within and beyond mainland China; linguistic transformation and media technology; journalism, aesthetic values, and political activism; literature and political influence of Chinese in the diaspora; and others as determined by the class. Research paper required. W 9:25–11:15

Courses in Chinese language at the elementary, intermediate, and advanced levels are listed in Yale College Programs of Study.

CHNS 500au, Man and Nature in Chinese Literature  Kang-i Sun Chang
An exploration of man and nature in traditional Chinese literature, with special attention to aesthetics and cultural meanings. Topics include Daoism, Chan Buddhism, and lyricism; *The Book of Changes* as an inspiration for literature; body, sexuality, and nature; contemplation and self-cultivation; travel in literature; loss, lament, and self-reflection in song lyrics; nature and the supernatural in classical tales; landscape and the art of description; images of Utopian communities as compared to the Western notion of Utopia; ideas of self-identity; religious pilgrimage and allegory (as seen in the novel *The Journey to the West*). No knowledge of Chinese required. Chinese texts provided from time to time for students who read Chinese. TTH 1–2:15

CHNS 512au, Ancient Chinese Thought  Michael Hunter
An introduction to the foundational works of ancient Chinese thought, from the ruling ideologies of the earliest historical dynasties through the diverse writings of the Warring States “masters” and including intellectual developments under the Qin and Han empires. TTH 11:35–12:50

CHNS 560au, Introduction to Literary Chinese I  Michael Hunter
Reading and interpretation of texts in various styles of literary Chinese (*wenyan*), with attention to basic problems of syntax and literary style. Prerequisite: CHNS 151b or 153b or equivalent. TTH 9–10:15

CHNS 570bu, Advanced Readings in Modern Chinese  Jing Tsu
A rigorous introduction to literary criticism and analysis using texts in the original language. Focus on the contemporary period, drawing from fiction written in Chinese in
different parts of the world, from mainland China to Taiwan and from Malaysia to Hong Kong. Texts in both simplified and traditional characters. Prerequisite: CHNS 163b or 165b or equivalent. W 2:30–4:20

**CHNS 571b U, Introduction to Literary Chinese II**  Pauline Lin
Continuation of CHNS 560a. Prerequisite: CHNS 560a or equivalent. TTH 11:35–12:50

**CHNS 581a U, Chinese Informal Prose**  Tina Lu
Translation and discussion of classical essays: first, models of guwen (ancient-style prose) from the Tang and Song dynasties, and second, the transformation of these models in the late Ming and early Qing into xiaopin (“lesser works”). Guwen as a choice both for philosophical and speculative writing and for describing the minutiae of everyday life. MW 11:35–12:50

**CHNS 602a U, Readings in Classical Chinese Prose**  Kang-i Sun Chang
Readings of classical Chinese prose with commentaries and notes in modern Chinese. Exploration of a variety of themes and styles. Lectures and discussion in English and sometimes in Chinese. Because readings are different year to year, this course may be repeated for credit. W 1:30–3:20

**CHNS 820b, The Five Classics**  Michael Hunter
This seminar is an introduction to the texts that comprise the early Chinese canon: the Changes, Documents, Odes, Rituals, and Annals. After exploring the establishment of the Five Classics under the Han, we devote the rest of the term to reading lengthy selections from these traditions, each of which presents a unique set of interpretive challenges. Discussion topics include the development of early textual culture, processes of textual formation, the Five Classics in excavated manuscripts, and the use of database tools for the study of early Chinese texts. TH 2:30–4:30

**CHNS 836b/HIST 852b, Early Chinese Narratives: Readings in the Zuo Commentary and Sima Qian**  Annping Chin
The course focuses on the structure, the historical context, and the writing of the Zuo Commentary (Zuozhuan) and Sima Qian's Records of the Grand Historian (Shiji). Students also learn to read the commentaries to these texts and come to understand the knowledge that traditional scholarship can offer. Readings are in Chinese and English. M 3:30–5:20

**CHNS 872a, Methods and Approaches to Modern Chinese Literature**  Jing Tsu
The course considers the different conceptual and comparative problems in the field of modern Chinese literary studies. Topics vary and may include national and world literatures, regionalism and urbanization, war and revolution, westernization, national and ethnic identities, and transdisciplinary approaches to literary studies. TH 3:30–5:30

**CHNS 900, Directed Readings**
Offered by permission of instructor and DGS to meet special needs not met by regular courses.

**CHNS 990, Directed Research**
Offered as needed with permission of instructor and DGS for student preparation of dissertation prospectus.
Courses in Japanese language at the elementary, intermediate, and advanced levels are listed in *Yale College Programs of Study*.

**JAPN 569a, Literature and the Humanities**  
John Treat  
Canonical Japanese short stories and essays read in line-by-line translation. Use of reference works and the Internet to research structures and vocabulary. Intended for those at the fourth-year level in their study of modern Japanese, this course is designed to help students prepare for either graduate-level courses in Japanese literature or independent study of written Japanese. TTH 1–2:15

**JAPN 570au, Introduction to Literary Japanese**  
Edward Kamens  
Introduction to the grammar and style of the premodern literary language (*bungotai*) through a variety of texts. Prerequisite: JAPN 151 or equivalent. MWF 9:25–10:15

**JAPN 571bu, Readings in Literary Japanese**  
William Fleming  
Close analytical reading of a selection of texts from the Nara through Tokugawa period: prose, poetry, and various genres. Introduction of *kanbun*. Prerequisite: JAPN 570a or equivalent. MW 9–10:15

**JAPN 581bu, Japanese Literature after 1970**  
John Treat  
Study of Japanese literature published between 1970 and the present. Writers may include Murakami Ryu, Maruya Saiichi, Shimada Masahiko, Nakagami Kenji, Yoshimoto Banana, Yamada Eimi, Murakami Haruki, and Medoruma Shun. No knowledge of Japanese required. TTH 1–2:15

**JAPN 587au/FILM 881a, Japanese Cinema after 1960**  
Aaron Gerow  
The development of Japanese cinema after the breakdown of the studio system, through the revival of the late 1990s, to the present. MW 2:30–3:45, screenings W 7–9:30

**JAPN 701a, Readings in Heian and Kamakura Period Literature**  
Edward Kamens  
Close reading of texts in various genres and styles; research in traditional and contemporary criticism. This year, the seminar focuses on Buddhist poetry and tales (*shakkyōka* and *setsuwa*). TH 9–11:15

**JAPN 708a, Early Modern Japanese Literature**  
William Fleming  
Close reading of a wide range of prose, poetry, and drama from the Edo period (1600–1868), supplemented with relevant secondary scholarship; introduction to the reading of original materials in cursive calligraphic style (*kuzushi*). T 2:30–4:30

**JAPN 885b, Modern Japanese Novel**  
John Treat  
A seminar primarily designed as a three-year course in which graduate students specializing in Japanese literature are required to read major works of modern Japanese fiction in the original. W 11:35–12:50
JAPN 871b/FILM 871b, Readings in Japanese Film Theory  Aaron Gerow
Theorizations of film and culture in Japan from the 1910s to the present. Through readings in the works of a variety of authors, the course explores both the articulations of cinema in Japanese intellectual discourse and how this embodies the shifting position of film in Japanese popular cultural history. T 1:30 – 3:20, with screenings

JAPN 900, Directed Readings
Offered by permission of instructor and DGS to meet special needs not met by regular courses.

JAPN 990, Directed Research
Offered as needed with permission of instructor and DGS for student preparation of dissertation prospectus.

Courses in Korean language at the elementary, intermediate, and advanced levels are listed in Yale College Programs of Study.
EAST ASIAN STUDIES

The MacMillan Center
320 Luce Hall, 203.432.3426
http://eastasianstudies.research.yale.edu
M.A.

Chair
Daniel Botsman (LUCE 345, 203.432.3197, daniel.botsman@yale.edu)

Director of Graduate Studies
Aaron Gerow (311 HGS, 203.432.7082, aaron.gerow@yale.edu)

Professors  Daniel Botsman (History), Kang-i Sun Chang (East Asian Languages & Literatures), Deborah Davis (Sociology), Aaron Gerow (East Asian Languages & Literatures; Film Studies), Valerie Hansen (History), Edward Kamens (East Asian Languages & Literatures), William Kelly (Anthropology), Tina Lu (East Asian Languages & Literatures), Peter Perdue (History), Frances Rosenbluth (Political Science), Helen Siu (Anthropology), William Summers (Therapeutic Radiology; History of Science & Medicine), John Treat (East Asian Languages & Literatures), Jing Tsu (East Asian Languages & Literatures), Anne Underhill (Anthropology), Mimi Hall Yiengpruksawan (History of Art)

Associate Professor  Karen Nakamura (Anthropology)

Assistant Professors  Seok-Ju Cho (Political Science), Fabian Drixler (History), William Fleming (East Asian Languages & Literatures), William Honeychurch (Anthropology), Andrew Quintman (Religious Studies), Chloë Starr (Divinity; East Asian Languages & Literatures), Jeremy Wallace (Visiting), Eric Weese (Economics), Jessica Weiss (Political Science)

Senior Lecturers  Annping Chin (History), Koichi Shinohara (Religious Studies; East Asian Languages & Literatures)

Lecturers  Martin Bale, Amy Lelyveld, Di Yin Lu, Akira Shimizu

Senior Lectors  Hsiu-hsien Chan, Min Chen, Seungja Choi, Koichi Hiroe, Zhengguo Kang, Angela Lee-Smith, Rongzhen Li, Ninghui Liang, Fan Liu, Yoshiko Maruyama, Ling Mu, Michiaki Murata, Hiroyo Nishimura, Masahiko Seto, Jianhua Shen, Mari Stever, Wei Su, Haiwen Wang, Yu-lin Wang Saussy, Peisong Xu, William Zhou

Lector  Yukie Mammoto

Fields of Study

The Master of Arts program in East Asian Studies offers a concentrated course of study designed to provide a broad understanding of the people, history, culture, contemporary society, politics, and economy of China, Japan, or a transnational region within East Asia. This program is designed for students preparing to go on to the doctorate in one of the disciplines of East Asian Studies (i.e., anthropology; economics; history; history of art; language and literature including comparative literature, film studies, and theater
studies; political science; sociology; etc.), as well as for those students seeking a terminal M.A. degree before entering the business world, the media, government service, or a professional school.

Course of Study for the M.A. Degree
The program is designed to be completed by successfully taking eight courses approved for graduate credit by the director of graduate studies (DGS) over the course of one academic year. A program of study for completion of the degree in one year consists of two terms of language study at or above Yale's third-year level (unless the language requirement has already been met through previous study or native fluency) and six other term courses selected from the current year's offerings of advanced language courses and lecture courses or seminars in any relevant subject area, with the approval of the DGS.

Special Requirements for the M.A. Degree
Students must earn two Honors grades (“H”) over the course of their two terms at Yale. Honors grades earned in any beginning or intermediate language class cannot be counted toward satisfying this requirement, except with the permission of the DGS.

Joint-Degree Programs
As the East Asian Studies M.A. degree is a one-year program, there are no joint-degree programs available. Students interested in pursuing additional degrees in the Yale professional schools should consider applying separately to those programs in order to complete such degrees before or after the East Asian Studies M.A. degree.

Program materials are available upon request to the Council on East Asian Studies, Yale University, PO Box 208206, New Haven CT 06520-8206; e-mail, eastasian.studies@yale.edu; Web site, http://eastasianstudies.research.yale.edu. Applications are available online at www.yale.edu/graduateschool/admissions; e-mail, graduate.admissions@yale.edu.

Courses
Please consult the course information available online at http://eastasianstudies.research.yale.edu/academic.php and http://students.yale.edu/oci for a complete list of East Asian-related courses offered at Yale University.
ECOLOGY AND EVOLUTIONARY BIOLOGY

Osborn Memorial Laboratories, 203.432.3837
www.eeb.yale.edu
M.S., Ph.D.

Chair
Paul Turner

Director of Graduate Studies
David Post (OML 426B, david.post@yale.edu)

Professors  Leo Buss, Peter Crane (Forestry & Environmental Studies), Michael
Donoghue, Vivian Irish (Molecular, Cellular & Developmental Biology), Kenneth Kidd
(Genetics; Psychiatry), Nancy Moran, Howard Ochman, Jeffrey Powell (on leave [Sp]),
Richard Prum, Eric Sargis (Anthropology), Oswald Schmitz (Forestry & Environmental
Studies), David Skelly (Forestry & Environmental Studies), Stephen Stearns, Paul Turner,
J. Rimas Vaisnys (Electrical Engineering), Günter Wagner

Associate Professors  Suzanne Alonzo, Alison Galvani (Public Health), Walter Jetz,
Thomas Near, David Post

Assistant Professors  Antónia Monteiro, Jeffrey Townsend (on leave [Sp]), David
Vasseur

Senior Lecturer  Marta Martínez Wells

Lecturers  Adalgisa Caccone, Mary Beth Decker

Fields of Study

The Department of Ecology and Evolutionary Biology (E&EB) offers training programs
in organismal biology, ecology, and evolutionary biology including molecular evolution,
phylogeny, molecular population genetics, developmental evolution, and evolutionary
theory.

Special Admissions Requirements

Applicants should have had training in one of the following fields: biology, mathematics,
chemistry, physics, statistics, and/or geology. Candidates are selected, regardless of their
major, based on overall preparation for a career in research in ecology and evolutionary
biology. Some, planning for careers in applied fields, may have prepared with courses in
public policy, economics, and agriculture.

Special Requirements for the Ph.D. Degree

Each entering student, in consultation with the director of graduate studies (DGS),
develops a specific program of courses, seminars, laboratory research, and independent
reading tailored to the student’s interests, background, and goals. There are normally no
foreign language requirements. All first-year students carry out two research rotations.
Students have the option of a rotation over their first summer. Students must participate
in (1) E&EB 500, Advanced Topics in Ecology and Evolutionary Biology; (2) E&EB 545b, a course on the responsible conduct of research; (3) weekly E&EB seminars; and (4) symposia of faculty and graduate student research. In addition, during their first two years of study, graduate students must enroll in a minimum of three additional graduate-level courses (numbered 500 and above). Teaching experience is regarded as an integral part of the graduate training program. All students are required to teach three courses, normally at the TF 3 level, during their first two years of study.

By the middle of the fourth term of study, each student organizes a formal pre-prospectus consultative meeting with his/her advisory committee to discuss the planned dissertation research. Before the beginning of the fifth term, students present and defend their planned dissertation research at a prospectus meeting, at which the department determines the viability and appropriateness of the student’s Ph.D. proposal. A successful prospectus meeting and completion of course requirements result in admission to candidacy for the Ph.D. The remaining requirements include completion, presentation, and successful defense of the dissertation, and submission of copies of the dissertation to the Graduate School and to the Center for Science and Social Science Information.

In cases where the dissertation committee decides that preliminary field work during the summer after the fourth term is necessary prior to the prospectus, the prospectus meeting can be delayed by one term. A request for a delay must come from the dissertation committee adviser and must be approved by the DGS. In these exceptional cases admission to candidacy may not be required for registration for the third year of graduate study.

**Honors Requirement**

Students must meet the Graduate School’s requirement of Honors in two courses by the end of the fourth term of study. The E&EB department also requires an average grade of at least High Pass in course work during the first two years of study.

**Master’s Degree**

**M.S. (en route to the Ph.D.)** Satisfactory completion of the first two years of study leading to the Ph.D. up to, but not necessarily including, the prospectus.

Additional material providing information on the department, faculty, courses, and facilities is available from Karen Broderick, Office of the Director of Graduate Studies, Department of Ecology and Evolutionary Biology, Yale University, PO Box 208106, New Haven CT 06520-8106; e-mail, karen.broderick@yale.edu; tel., 203.432.3837; fax, 203.432.2374; Web site, www.eeb.yale.edu.

**Courses**

**E&EB 500a/b, Advanced Topics in Ecology and Evolutionary Biology**
Topics to be announced. M 2:30–4:30

**E&EB 510a/STAT 501a, Introduction to Statistics: Life Sciences**  Walter Jetz, Jonathan Reuning-Scherer

Statistical and probabilistic analysis of biological problems presented with a unified foundation in basic statistical theory. Problems are drawn from genetics, ecology,
epidemiology, and bioinformatics. Graduate students are expected to finish a course project in addition to regular homework and exams. TTH 1–2:15

**E&EB 520au, General Ecology**  David Post, David Vasseur
A broad consideration of the theory and practice of ecology, including the ecology of individuals, population dynamics and regulation, community structure, ecosystem function, and ecological interactions on broad spatial and temporal scales. Topics such as climate change, fisheries management, and infectious disease are placed in an ecological context. MWF 10:30–11:20

**E&EB 523Lbu, Laboratory for Principles of Evolution, Ecology, and Behavior**  Marta Martínez Wells
Experimental approaches to organismal and population biology, including study of the diversity of life. TWTH 1:30–4:30

**E&EB 525bu, Evolutionary Biology**  Nancy Moran, Michael Donoghue
An overview of evolutionary biology as the discipline uniting all of the life sciences. Evolution explains the origin of life and Earth’s biodiversity, and how organisms acquire adaptations that improve survival and reproduction. This course uses reading and discussion of scientific papers to emphasize that evolutionary biology is a dynamic science, involving active research to better understand the mysteries of life. We discuss principles of population genetics, paleontology, and systematics; application of evolutionary thinking in disciplines such as developmental biology, ecology, microbiology, molecular biology, and human medicine. TTH 10:30–11:20, 1 HTBA

**E&EB 526Lbu, Laboratory for Evolutionary Biology**  Adalgisa Caccone
The companion laboratory to E&EB 525b. Study of patterns and processes of evolution, including collection and interpretation of molecular and morphological data in a phylogenetic context. Focus on methods of analysis of species-level and population-level variation in natural populations. TH 1:30–4:30

**E&EB 530au, Field Ecology**  Linda Puth
A field-based introduction to ecological research. Experimental and descriptive approaches, comparative analysis, and modeling are explored through field and small-group projects. TTH 1–5

**E&EB 535a, Evolution and Medicine**  Stephen Stearns
Survey of evolutionary insights that make important differences in medical research and clinical practice, including evolutionary mechanisms and the medical issues they affect. Individual genetic variation in susceptibility; evolutionary conflicts and trade-offs in reproductive medicine; the evolution of antibiotic resistance and virulence in pathogens; emerging diseases; the evolution of aging; cancer as an evolutionary process. MWF 11:35–12:25

**E&EB 540au, Animal Behavior**  Suzanne Alonzo
An introduction to the study of animal behavior from an evolutionary and ecological perspective. History and methods of studying animal behavior. Topics include foraging, predation, communication, reproduction, cooperation, and the role of behavior in conservation. MW 11:30–12:45, 1 HTBA
E&EB 545b, Problems in Bioethics/Ethics Course for Advanced Topics  
David Post
M 2:30–4:30

E&EB 546aU, Plant Diversity and Evolution  
Michael Donoghue
Introduction to the major plant groups and their evolutionary relationships, with an emphasis on the diversification and global importance of flowering plants. MW 1–2:15

E&EB 547LaU, Laboratory for Plant Diversity and Evolution  
Michael Donoghue
Hands-on experience with the plant groups examined in the accompanying lectures; local field trips. T 1–4

E&EB 550aU, Biology of Terrestrial Arthropods  
Marta Martínez Wells
Evolutionary history and diversity of terrestrial arthropods (body plan, phylogenetic relations, fossil record); physiology and functional morphology (water relations, thermoregulation, energetics of flying and singing); reproduction (biology of reproduction, life cycles, metamorphosis, parental care); behavior (migration, communication, mating systems, evolution of sociality); ecology (parasitism, mutualism, predator-prey interactions, competition, plant-insect interactions). TTH 11:35–12:50

E&EB 551LaU, Laboratory for Biology of Terrestrial Arthropods  
Marta Martínez Wells
Comparative anatomy, dissections, identification, and classifications of terrestrial arthropods; specimen collection; field trips. W 1:30–4:30

E&EB 564aU, Ichthyology  
Thomas Near
A survey of fish diversity, including jawless vertebrates, chimaeras and sharks, lungfishes, and ray-finned fishes. Topics include the evolutionary origin of vertebrates, the fossil record of fishes, evolutionary diversification of major extant fish lineages, biogeography, ecology, and reproductive strategies of fishes. MWF 1:30–2:20

E&EB 565aU, Laboratory for Ichthyology  
Thomas Near
Laboratory and field studies of fish diversity, form, function, behavior, and classification. The course primarily involves study of museum specimens and of living and fossil fishes. T 1:30–4:30

E&EB 575a, Biological Oceanography  
Mary Beth Decker
Exploration of a range of coastal and pelagic ecosystems. Relationships between biological systems and the physical processes that control the movements of water and productivity of marine systems. Anthropogenic impacts on oceans, such as the effects of fishing and climate change. Includes three Friday field trips. TTH 11:35–12:50

[E&EB 630a/F&ES 730a, Ecosystem Ecology]

[E&EB 660bU, Conservation Genetics]

E&EB 672bU, Ornithology  
Richard Prum
An overview of avian biology and evolution, including the structure, function, behavior, and diversity of birds. The evolutionary origin of birds, avian phylogeny, anatomy, physiology, neurobiology, breeding systems, and biogeography. MWF 9:25–10:15
E&EB 673Lbu, Laboratory for Ornithology  Richard Prum
Laboratory and field studies of avian morphology, diversity, phylogeny, classification, identification, and behavior. T 1:30–5

E&EB 678b, Mathematical Models and Quantitative Methods in Evolution and Ecology  Suzanne Alonzo
In this course, we focus on how quantitative approaches are used to allow scientific inference. We discuss general principles for generating hypotheses that are testable (i.e., quantifiable). The course also examines a variety of approaches used to model population-level processes in evolution and ecology, including an overview of population genetics, quantitative genetics, optimality models, game theory, and population dynamic equations. We also discuss experimental design, statistical analyses, inference, and other quantitative methods. The course assumes a basic background in algebra, calculus, probability theory, and statistics. Please address any questions regarding the course to suzanne.alonzo@yale.edu. W 9:30–11:30

E&EB 680bu, Life History Evolution  Stephen Stearns
Life history evolution studies how the phenotypic traits directly involved in reproductive success are shaped by evolution to solve ecological problems. Nowhere is the interplay between evolution and ecology more intimate. TTH 11:35–12:50

E&EB 690a, Evolution of Development  Antónia Monteiro
An introduction to the ways that developmental mechanisms change through time to give rise to organismal diversity. Topics include how mutations influence the processes of gene regulation, tissue growth, and cell and organ differentiation. TTH 9–10:15

E&EB 712b, Foundations of Ecology  David Vasseur
This seminar is intended to familiarize students with the evolution of key themes in ecology. Each week, students lead discussions of a classic and recent paper from the ecological literature with particular emphasis on how a theme has transitioned and/or shaped current knowledge. Presentation leaders are responsible for providing an overview of the citation history of the classic paper (based on ISI Web of Science database) and for selecting a recent paper that builds upon and advances themes covered by the classic paper. In addition, students are responsible for writing an NSF DDIG (or equivalent) proposal building on one of the key themes covered in class and for participating in an NSF-style review panel of the proposals.

E&EB 715b, Speciation and Adaptive Radiation  Thomas Near
E&EB 716a, Evolution of Cancer  Jeffrey Townsend
This seminar is designed to give graduate students a survey of the research literature on the evolution of cancer, senescence, and aging. We read papers whose focus is on qualitative and quantitative modeling of the evolutionary forces that lead to these phenomena. Cancer is the primary focus, but its obvious connections to aging and cellular senescence are also covered. Students develop an understanding of why cancer, senescence, and aging may be expected from an evolutionary perspective, and consider how that perspective may inform research efforts to overcome them. The class is conducted
in a literature review fashion, in which students are broken into groups to elucidate the key components of sections of the papers or figures within the papers to the whole class. Students are expected to read all assignments carefully and to prepare and lead a discussion of one or more papers.

**E&EB 717a, Macroevolution** Richard Prum

[E&EB 728b, Infectious Diseases]

**E&EB 842b/ANTH 835b, Primate Diversity and Evolution** Eric Sargis

Examination of the diversity and evolutionary history of living and extinct primates. Focus on major controversies in primate systematics and evolution, including the origins and relationships of several groups. Consideration of both morphological and molecular studies. Morphological diversity and adaptations explored through museum specimens and fossil casts. W 1:30–3:20

**E&EB 900a–b, First-Year Introduction to Research and Rotations** DGS

**E&EB 930a, Seminar in Systematics**

**E&EB 950a or b, Second-Year Research**

By arrangement with faculty.

**E&EB 960b/EMD 695b, Studies in Evolutionary Medicine I** Stephen Stearns, Durland Fish, Alison Galvani, Paul Turner

The first term of a two-term course that begins in January. Students learn the major principles of evolutionary biology and apply them to issues in medical research and practice by presenting and discussing original papers from the current research literature. Such issues include lactose and alcohol tolerance; the hygiene hypothesis and autoimmune disease; human genetic variation in drug response and pathogen resistance; spontaneous abortions, immune genes, and mate choice; parental conflicts over reproductive investment mediated by genetic imprinting; life history trade-offs and the evolution of aging; the evolution of virulence and drug resistance.

**E&EB 961a/EMD 695a, Studies in Evolutionary Medicine II** Paul Turner

Continuation of E&EB 960b.
ECONOMICS

28 Hillhouse Avenue, 203.432.3575

M.A., M.Phil., Ph.D.

Chair
Benjamin Polak (28 Hillhouse, 203.432.3571)

Director of Graduate Studies
Truman Bewley (30 Hillhouse, Rm. 30, 203.432.3719, truman.bewley@yale.edu)

Professors  Joseph Altonji, Donald Andrews, Dirk Bergemann, Steven Berry, Truman Bewley, Donald Brown, Xiaohong Chen, Zhiwu Chen (School of Management), Eduardo Engel, Ray Fair, Howard Forman (School of Public Health), John Geanakoplos, Pinelope Goldberg, Timothy Guinnane, Philip Haile, Koichi Hamada, Johannes Hörner, Jonathan Ingersoll (School of Management), Gerald Jaynes, Dean Karlan, Yuichi Kitamura, Alvin Klevorick, Naomi Lamoreaux, Richard Levin, Giovanni Maggi, Costas Meghir, Robert Mendelsohn (Forestry & Environmental Studies), Giuseppe Moscarini, William Nordhaus, Peter Phillips, Benjamin Polak, Mark Rosenzweig, Larry Samuelson, Robert Shiller, Anthony Smith, Aleh Tsyvinski, Christopher Udry, Edward Vytlacil

Associate Professors  Taisuke Otsu, Ebonya Washington

Assistant Professors  Konstantinos Arkolakis, Timothy Armstrong, David Atkin, Eduardo Faingold, Mitsuru Igami, Daniel Keniston, Amanda Kowalski, Nancy Qian, Kareen Rozen, Melissa Tartari, Eric Weese

Fields of Study
Fields include economic theory, including microeconomics, macroeconomics; mathematical economics; econometrics; economic history; labor economics; industrial organization; financial economics; behavioral finance; public economics; public finance; international trade; international finance; economic development; behavioral economics; law and economics.

Special Admissions Requirements
Please see www.econ.yale.edu/graduate/application_info.htm.

Special Requirements for the Ph.D. Degree
The following requirements must be satisfied in addition to those prescribed by the Graduate School.

Prior to registration for the second year. (a) Students must have taken for credit and passed at least six economics graduate courses. (b) Students must pass written comprehensive examinations in micro- and macroeconomics. These examinations, which are given in May and late August of each year, must be taken in the spring term of the
first year. Each exam will be graded separately, and in the event of failure, students will retake only the part of the exam they did not pass. Students may take the comprehensive examination no more than twice.

Prior to registration for the third year. (a) Students must have taken at least fourteen term courses in Economics and have received a grade of at least Pass in each of them. With the permission of the director of graduate studies, courses in related fields and independent reading courses can be used to fulfill this requirement. Workshops may not be used to satisfy it. All workshops are graded on a Satisfactory/Unsatisfactory basis. (b) Students must have received an average of at least High Pass in the courses they have taken. The admissibility of courses for this requirement is the same as for the fourteen-course requirement mentioned above. Grades within the Economics department include pluses and minuses. A failure counts as a zero, a P– as a 1, a P as a 2, a P+ as a 3, and so on up to a 9 for H+. The arithmetic average of these numbers must be at least 4.5.

Admission to candidacy. Students must be admitted to candidacy prior to registration for the fourth year of study. Students are recommended to the Graduate School for admission to candidacy by the Department of Economics after having completed department requirements listed above, the Graduate School’s prospectus requirement, and the following additional requirements: (a) Students must have completed two one-term prospectus workshops. In order for workshops to count toward the prospectus requirement, students must make a presentation in each workshop and present original work in one of them. If students can find no workshop whatsoever in their areas of interest, they may substitute independent study guided by a faculty member, provided the independent study leads to a dissertation prospectus that is accepted. (b) Students must receive a grade of High Pass– or better in ECON 551b (Econometrics II) or 552b (Econometrics III). More advanced courses may be substituted for these with special permission of the director of graduate studies. (c) Students must receive a grade of Satisfactory on an applied econometrics paper, which is evaluated by the faculty adviser of the paper and another faculty member. (d) Students must complete with a grade of at least High Pass– a term of economic history, drawn from a list of courses approved by the director of graduate studies and economic history instructors. (e) Students must pass an oral examination in two fields. At least one field must have substantial empirical and institutional content. The choice of fields must be approved by the director of graduate studies. In the event of failure, students may take the oral examination no more than twice.

Submitting the dissertation. A student’s dissertation research is guided by a committee of two Graduate School faculty members, at least one of whom must be a member of the Economics department. One of the committee members is designated as chair. When a first draft of the dissertation is completed, the director of graduate studies appoints a third reader.

Programs in Law and Economics

The Economics department participates in the J.D./M.A. and J.D./Ph.D. programs, which are described under Policies and Regulations.
Master’s Degrees

M.Phil. The M.Phil. degree is awarded to students in the Ph.D. program upon completion of fourteen term courses, with at least two grades of Honors. In addition, students must satisfy the qualifying requirements in economic theory, econometrics, economic history, and two special fields, as well as the oral examination.

M.A. (en route to the Ph.D.) The M.A. degree is awarded upon completion of eight term courses with an average grade of High Pass. Students must complete at least two of the three two-course sequences in microeconomics, macroeconomics, or econometrics for first-year graduate students.

The M.A. in International and Development Economics is described under International and Development Economics.

Program materials are available on our Web site: www.econ.yale.edu.

Courses

ECON 500a, General Economic Theory: Microeconomics  Truman Bewley, Kareen Rozen
Introduction to optimization methods and partial equilibrium. Theories of utility and consumer behavior production and firm behavior. Introduction to uncertainty and the economics of information, and to noncompetitive market structures.

ECON 501b, General Economic Theory: Microeconomics  Eduardo Faingold, Johannes Hörner

ECON 502a, Mathematics for Economists
This course covers mathematical methods important in economic theory, including Kuhn-Tucker theory, continuous time optimal control theory, dynamic programming, zero sum games, and repeated sum games.

ECON 510a, General Economic Theory: Macroeconomics  Aleh Tsyvinski, Michael Peters
Analysis of short-run determination of aggregate employment, income, prices, and interest rates in closed and open economies. Stabilization policies.

ECON 511b, General Economic Theory: Macroeconomics  Eduardo Engel, Giuseppe Moscarini
Theories of saving, investment, portfolio choice, and financial markets. Longer-run developments; economic growth, capital accumulation, income distribution.

ECON 520a, Advanced Microeconomic Theory I  Johannes Hörner, Tomasz Strzalecki
A formal introduction to game theory and information economics. Alternative non-cooperative solution concepts are studied and applied to problems in oligopoly, bargaining, auctions, strategic social choice, and repeated games.
ECON 521b, Advanced Microeconomic Theory II    Dirk Bergemann, Juuso Välimäki
Contracts and the economics of organization. Topics may include dynamic contracts (both explicit and implicit), career concerns, hierarchies, Bayesian mechanism design, renegotiation, and corporate control.

ECON 522a and 523b, Microeconomic Theory Lunch
A forum for advanced students to critically examine recent papers in the literature and present their own work.

ECON 524a, Behavioral Applied Theory

ECON 525a, Advanced Macroeconomics I    Anthony Smith, Per Krusell
Heterogeneous agent economics, investment, scrapping and firing, nonquadratic adjustment costs, financial constraints, financial intermediation, psychology of decision making under risk, optimal risk management, financial markets, consumption behavior, monetary policy, term structure of interest rates.

ECON 526b, Advanced Macroeconomics II    Eduardo Engel, Giuseppe Moscarini
Macroeconomic equilibrium in the presence of uninsurable labor income risk. Implications for savings, asset prices, unemployment.

ECON 527b/LAW 21458/MGT 565b, Behavioral and Institutional Economics    Robert Shiller
Behavioral economics incorporates insights from other social sciences, such as psychology and sociology, into economic models, and attempts to explain anomalies that defy standard economic analysis. Institutional economics is the study of the evolution of economic organizations, laws, contracts, and customs as part of a historical and continuing process of economic development. Behavioral economics and institutional economics are naturally treated together, since so much of the logic and design of economic institutions has to do with complexities of human behavior. The course emphasizes two main topics — behavioral macroeconomics and behavioral finance — though references are made to other branches of economics as well. Because macroeconomics is a major part of this course, it is part of the graduate macroeconomics sequence (including also ECON 510a, 511b, 525a, and 526b). However, this course does not list these other courses as requirements.

ECON 530a, Mathematical Economics I    John Geanakoplos
This is a first course in general equilibrium analysis of market economies. The focus of the course is Walrasian competition, monopolistic competition, and competition in markets with affective agents, i.e., affective competition. Topics include testable implications of these models, counterfactual analysis, and algorithms for solving calibrated models. The mathematical framework is Tame Topology and O-minimal Structures, where the Tarski-Seidenberg Theorem on Quantifier Elimination and Laskowski’s Theorem on the VC-Dimension of Definable Sets are the basis of our analysis.

ECON 531b, Mathematical Economics II    Eduardo Faingold, Juuso Toikka
This course examines the foundations of money and finance from the perspective of general equilibrium with incomplete markets. The relevant mathematical tools from
elementary stochastic processes to differential topology are developed in the course. Topics include asset pricing, variations of the capital asset pricing model, the “Hahn paradox” on the value of flat money, default and bankruptcy, collateral equilibrium, market crashes, adverse selection and moral hazard with perfect competition, credit card equilibrium, and general equilibrium with asymmetric information.

[ECON 535a and b, Prospectus Workshop in Mathematical Economics]

ECON 537a and 538b, Microeconomic Theory Workshop
Presentations by research scholars and participating students.

ECON 540a and 541b, Student Workshop in Macroeconomics
A course that gives third- and fourth-year students doing research in macroeconomics an opportunity to prepare their prospectuses and to present their dissertation work. Each student is required to make at least two presentations per term. For third-year students and beyond, at least one of the presentations in the first term should be a mock job talk.

ECON 542a and 543b, Macroeconomics Workshop
A forum for presentation and discussion of state-of-the-art research in macroeconomics. Presentations by research scholars and participating students of papers in closed economy and open economy macroeconomics and monetary economics.

ECON 545a, Microeconomics  Michael Boozer
A survey of the main features of current economic analysis and of the application of the theory to a number of important economic questions, covering microeconomics and demand theory, the theory of the firm, and market structures. For IDE students.

ECON 546b, Macroeconomics  Irasema Alonso
This course presents a basic framework to understand macroeconomic behavior and the effects of macroeconomic policies. Topics include consumption and investment, labor market, short-run income determinations, unemployment, inflation, growth, and the effects of monetary and fiscal policies. The emphasis is on the relation between the underlying assumptions of macroeconomic framework and policy implications derived from it. For IDE students.

ECON 550a, Econometrics I  Donald Andrews
Probability: concepts and axiomatic development. Data: tools of descriptive statistics and data reduction. Random variables and probability distributions; univariate distributions (continuous and discrete); multivariate distributions; functions of random variables and transformations; the notion of statistical inference; sampling concepts and distributions; asymptotic theory; point and interval estimation; hypothesis testing.

ECON 551b, Econometrics II  Xiaohong Chen
Provides a basic knowledge of econometric theory, and an ability to carry out empirical work in economics. Topics include linear regression and extensions, including regression diagnostics, generalized least squares, statistical inference, dynamic models, instrumental variables and maximum likelihood procedures, simultaneous equations, nonlinear and qualitative-choice models. Examples from cross-section, time series, and panel data applications.
ECON 552b, Econometrics III  Yuichi Kitamura
The treatment of the subject is rigorous, attentive to modern developments, and proceeds
to research level in several areas. Linear models from core curriculum. Topics include
linear estimation theory, multiple and multivariate regressions, Kruskal’s theorem and
its applications, classical statistical testing by likelihood ratio, Lagrange multiplier and
Wald procedures, bootstrap methods, specification tests, Stein-like estimation, instru-
mental variables, and an introduction to inferential methods in simultaneous stochastic
equations.

ECON 553a, Econometrics IV: Time Series Econometrics
A sequel to ECON 552, the course proceeds to research level in time series econometrics.
Topics include an introduction to ergodic theory, Wold decomposition, spectral theory,
martingales, martingale convergence theory, mixing processes, strong laws, and central
limit theory for weak dependent sequences with applications to econometric models and
model determination.

ECON 554b, Econometrics V  Xiaohong Chen
The first half of this course is about nonlinear parametric models. Specification, estima-
tion, and testing within the Likelihood and Generalized Method of Moments frame-
works. First-order asymptotics for both smooth and non-smooth objective functions.
Efficiency and robustness. A short account of high-order asymptotics for smooth prob-
lems. The second part is on nonparametric and semiparametric methods. Nonparametric
estimation by kernels, series, splines, and other methods. Bias reduction and bandwidth
selection. The course of dimensionality and additive models. Specification and estima-
tion of semiparametric models. U-statistics and asymptotic properties. Efficiency and
adaptation.

ECON 555b, Applied Econometrics II: Microeconometrics  Toru Kitagawa,
Sung Jae Jun
This course develops the concepts needed to approach empirical problems in micro-
economics with econometrics. The focus is less on developing a catalogue of econometric
methods than on developing a conceptual basis for understanding how data, econometric
methodology, and assumptions combine to produce statistical inference.

ECON 556b, Topics in Empirical Economics and Public Policy  Costas Meghir,
Pinelope Goldberg, Petra Todd

ECON 557a, Econometrics VI  Hiroaki Kaido

ECON 558a, Econometrics  Michael Boozer
Application of statistical analysis to economic data. Basic probability theory, linear regres-
sion, specification and estimation of economic models, time series analysis, and forecast-
ing. The computer is used. For IDE students.

[ECON 561a, Computational Method for Economic Dynamics]

[ECON 563a/CPSC 555au, Economics and Computation]
ECON 567a and 568b, Econometrics Workshop
A forum for state-of-the-art research in econometrics. Its primary purpose is to disseminate the results and the technical machinery of ongoing research in theoretical and applied fields.

ECON 570a and 571b, Prospectus Workshop in Econometrics
A course for third- and fourth-year students doing research in econometrics to prepare their prospectus and present dissertation work.

ECON 580a, General Economic History: Western Europe  Timothy Guinnane
A survey of some major events and issues in the economic development of Western Europe during the eighteenth and nineteenth centuries, stressing the causes, nature, and consequences of the industrial revolution in Britain and on the Continent, and the implications of the historical record for modern conceptions of economic growth. Prerequisites: simultaneous enrollment in or successful completion of ECON 500a and ECON 510a; permission of the instructor.

ECON 581b, American Economic History  Melanie Miller
This course examines both the long-term factors (such as industrialization and the development of markets) and the epochal events (such as the Revolution, Civil War, and Great Depression) that have shaped the development of the American economy. The objectives of this course are to familiarize students with the major topics and debates in American economic history. Prerequisites: concurrent enrollment in or successful completion of ECON 501b and ECON 510a.

[ECON 582a, General Economic History: Latin America]

[ECON 583a, Topics in Economic History]

[ECON 585b, Readings in Economic History]

ECON 588a and 589b, Economic History Workshop  Timothy Guinnane
A forum for discussion and criticism of research in progress. Presenters include graduate students, Yale faculty, and visitors. Topics concerned with long-run trends in economic organization are suitable for the seminar. Special emphasis given to the use of statistics and of economic theory in historical research.

ECON 600a, Industrial Organization I  Steven Berry, Philip Haile
 Begins by locating the study of industrial organization within the broader research traditions of economics and related social sciences. Alternative theories of decision making, of organizational behavior, and of market evolution are sketched and contrasted with standard neoclassical theories. Detailed examination of the determinants and consequences of industrial market structure.

ECON 601b, Industrial Organization II  Steven Berry, Mitsuru Igami
Examination of alternative modes of public control of economic sectors with primary emphasis on antitrust and public utility regulation in the U.S. economy. Public policy issues in sectors of major detailed governmental involvement.
ECON 606a and 607b, Prospectus Workshop in Industrial Organization
For third-year students in microeconomics, intended to guide students in the early stages of theoretical and empirical dissertation research. Emphasis on regular writing assignments and oral presentations.

ECON 608a and 609b, Industrial Organization Seminar
For advanced graduate students in applied microeconomics, serving as a forum for presentation and discussion of work in progress of students, Yale faculty members, and invited speakers.

ECON 630a, Labor Economics  Joseph Altonji, Costas Meghir
Topics include static and dynamic approaches to demand, human capital and wage determination, wage income inequality, unemployment and minimum wages, matching and job turnover, immigration and international trade, unions, implicit contract theory, and efficiency wage hypothesis.

ECON 631b, Labor Economics  Joseph Altonji, Melissa Tartari
Topics include static and dynamic models of labor supply, human capital wage function estimation, firm-specific training, compensating wage differentials, discrimination, household production, bargaining models of household behavior, intergenerational transfers, and mobility.

ECON 638a and 639b, Labor and Population Workshop
A forum primarily for graduate students to present their research plans and findings. Discussions encompass empirical microeconomic research relating to both high- and low-income countries.

ECON 640a/b, Prospectus Workshop in Labor Economics and Public Finance
Workshop for students doing research in labor economics and public finance.

ECON 670a/MGMT 740a, Financial Economics I  Zhiwu Chen
Current issues in theoretical financial economics are addressed through the study of current papers. Focuses on the development of the problem-solving skills essential for research in this area.

ECON 671b/MGMT 741b, Financial Economics II  Jonathan Ingersoll
Continuation of ECON 670a/MGMT 740a.

ECON 672a/MGMT 745a, Financial Behavior  Nicholas Barberis
Much of modern financial economics works with models in which agents are rational, in that they maximize expected utility and use Bayes’s law to update their beliefs. Behavioral finance is a large and active field that studies models in which some agents are less than fully rational. Such models have two building blocks: limits to arbitrage, which make it difficult for rational traders to undo the dislocations caused by less rational traders; and psychology, which catalogues the kinds of deviations from full rationality we might expect to see. We discuss these two topics and then consider a number of applications: asset pricing (the aggregate stock market and the cross-section of average returns); individual trading behavior; and corporate finance (security issuance, corporate investment, and mergers).
ECON 674b/MGMT 746b, Financial Crises  Gary Gorton, Andrew Metrick
An elective doctoral course covering theoretical and empirical research on financial crises. The first half of the course focuses on general models of financial crises and historical episodes from the nineteenth and twentieth centuries. The second half of the course focuses on the recent financial crisis. Prerequisites: MGMT 740a and 741b (doctoral students in Economics may substitute the core microeconomics sequence), and permission of the instructor.

ECON 680a, Public Finance I  Amanda Kowalski

ECON 681b, Public Finance II

ECON 702a, International Economics  Domingo Cavallo
International monetary theory and its implications for economic policy. Topics include mechanisms of adjustment in the balance of payments; fiscal, monetary, and exchange rate policy for internal and external balance; international movements of capital. For IDE students.

ECON 709a, International Economics and Open Economy Macroeconomics

ECON 720a, International Trade I  Pinelope Goldberg, Giovanni Maggi
This course covers the theory of international trade, policy, and institutions. Discussion of Classical, Neo-classical, and more recent imperfect-Competition-Scale-Economies-based static models of trade. The course presents dynamic extensions of some of the models that explore the relations among trade, innovation, and growth. The analytics of trade policy issues, such as gains from trade, tariffs and quotas, customs unions and free trade areas, and the political economy of trade policy making, are discussed.

ECON 721b, International Trade II  Pinelope Goldberg, Giovanni Maggi
The course covers empirical topics in international trade with particular emphasis on current research areas. Topics include tests of international trade theories; studies of the relationship between international trade, labor markets, and income distribution; recent trade liberalization episodes in developing countries; empirical assessment of various trade policies, such as VERs and Anti-Dumping; productivity (and its relation to international trade liberalization); and exchange rates, market integration, and international trade. Methodologically, the course draws heavily on empirical models used in the fields of industrial organization and to a lesser degree labor economics; taking these courses is thus recommended though not required.

ECON 724b, International Finance

ECON 730a, Economic Development I
Development theory at both aggregate and sectoral levels; analysis of growth, employment, poverty, and distribution of income in both closed and open developing economy contexts.

ECON 731b, Economic Development II
Analysis of development experiences since World War II. Planning and policy making across countries and time. Models of development, growth, foreign trade, and investment.
Trade, capital, and technology flows and increasing interdependence. The political economy of policy making and policy reform.

**ECON 732b, Economic Development IDE**  Michael Boozer
Examines the models of classical and modern economists to explain the transition of developing economies into modern economic growth, as well as their relevance to income distribution, poverty alleviation, and human development. For IDE students.

**ECON 735b, Economics of Agriculture**

**ECON 736a, Economics of Technology**

**ECON 737a, Economics of Natural Resources**  Robert Mendelsohn
Linking of abstract economic concepts to concrete policy and management decisions. Application of theoretical tools of economics to global warming, pollution control, fisheries, forestry, recreation, and mining.

**ECON 738a or b, Workshop on Environmental and Natural Resources**  
William Nordhaus, Robert Mendelsohn

**ECON 749a and 750b, Trade and Development Workshop**
A forum for graduate students and faculty with an interest in the economic problems of developing countries. Faculty, students, and a limited number of outside speakers discuss research in progress.

**ECON 756a/b, Prospectus Workshop in Development**
Workshop for students doing research in development to present and discuss work.

**ECON 776b, Economics of Population**

**ECON 790b, Political Economy**  Ebonya Washington

**ECON 899a or b, Individual Reading and Research**
By arrangement with faculty.
ELECTRICAL ENGINEERING

Dunham Laboratory, 203.432.4250
M.S., M.Phil., Ph.D.

Chair
Jung Han

Director of Graduate Studies
Sekhar Tatikonda [F] (sekhar.tatikonda@yale.edu)
Hongxing Tang [Sp] (hong.tang@yale.edu)

Professors  Richard Barker (Emeritus), James Duncan, Jung Han, Roman Kuc,
Tso-Ping Ma, A. Stephen Morse, Kumpati Narendra, Mark Reed, Peter Schultheiss
(Emeritus), J. Rimas Vaisnys

Associate Professors  Eugenio Culurciello (Adjunct), Peter Kindlmann (Adjunct),
Richard Lethin (Adjunct), Yiorgos Makris (Adjunct), Andreas Savvides, Lawrence
Staib, Hemant Tagare, Hongxing Tang (on leave [F]), Sekhar Tatikonda, Yang Richard
Yang, Edmund Yeh (Adjunct)

Assistant Professor  Minjoo Lee

Fields of Study
Fields include biomedical sensory systems, communications and signal processing,
computer engineering, control systems, microelectromechanical and nanomechanical
systems (MEMS and NEMS), nanoelectronic science and technology, neural networks,
optoelectronic materials and devices, sensor networks, semiconductor materials and
devices, wireless networks, and VLSI design and testing.

For admissions and degree requirements, and for course listings, see Engineering &
Applied Science.
ENGINEERING & APPLIED SCIENCE

Dunham Laboratory, 203.432.4250
www.seas.yale.edu
M.S., M.Phil., Ph.D.

Dean
T. Kyle Vanderlick

Deputy Dean
Vincent Wilczynski

Associate Dean for Educational Affairs
Roman Kuc

Programs of study are offered in the areas of applied mechanics, mechanical engineering and materials science, chemical and environmental engineering, electrical engineering, and biomedical engineering. All programs are under the School of Engineering & Applied Science.

Biomedical Engineering

Chair
W. Mark Saltzman

Director of Graduate Studies
Richard Carson (richard.e.carson@yale.edu)

Professors  Richard Carson, Todd Constable, James Duncan, Jay Humphrey, Fahmeed Hyder, Laura Niklason, Douglas Rothman, W. Mark Saltzman, Fred Sigworth, Steven Zucker (Computer Science)

Associate Professors  Robin de Graaf, Tarek Fahmy, Themis Kyriakides, Michael Levene, Evan Morris, Xenophon Papademetris, Lawrence Staib, Hemant Tagare

Assistant Professors  Joerg Bewersdorf, Michael Choma, Rong Fan, Anjelica Gonzalez, Kathryn Miller-Jensen, Smita Sampath

FIELDS OF STUDY
Fields include the physics of image formation (MRI, optics, ultrasound, nuclear medicine, and X-ray), MRI, MRS, PET and modeling, digital image analysis and processing, computer vision, biological signals and sensors, biomechanics, physiology and human factors engineering, drug delivery, biotechnology, biophotonics, immune response to biomaterials, tissue engineering, and biomedical device systems biology and medicine.

Chemical & Environmental Engineering

Chair
Paul Van Tassel

Director of Graduate Studies
William Mitch (william.mitch@yale.edu)
Professors  Eric Altman, Gaboury Benoit, Ruth Blake, Menachem Elimelech, Abbas Firoozabadi (Adjunct), Thomas Graedel, Gary Haller, Edward Kaplan, Yehia Khalil (Adjunct), Michael Loewenberg, Robert McGraw (Adjunct), Lisa Pfefferle, Joseph Pignatello (Adjunct), Daniel Rosner, James Saiers, W. Mark Saltzman, Udo Schwartz, T. Kyle Vanderlick, Paul Van Tassel, Kurt Zilm

Associate Professors  Michelle Bell, Tarek Fahmy, William Mitch, Jordan Peccia, Julie Zimmerman

Assistant Professors  Eric Dufresne, Chinedum Osuji, Andre Taylor, Corey Wilson

FIELDS OF STUDY
Fields include nanomaterials, soft matter, interfacial phenomena, biomolecular engineering, energy, water, and sustainability.

Electrical Engineering
Chair
Jung Han

Director of Graduate Studies
Sekhar Tatikonda [F] (sekhar.tatikonda@yale.edu)
Hongxing Tang [Sp] (hong.tang@yale.edu)

Professors  Richard Barker (Emeritus), James Duncan, Jung Han, Roman Kuc, Tso-Ping Ma, A. Stephen Morse, Kumpati Narendra, Mark Reed, Peter Schultheiss (Emeritus), J. Rimas Vaisnys

Associate Professors  Eugenio Culurciello (Adjunct), Peter Kindlmann (Adjunct), Richard Lethin (Adjunct), Yiorgos Makris (Adjunct), Andreas Savvides, Lawrence Staib, Hemant Tagare, Hongxing Tang (on leave [F]), Sekhar Tatikonda, Yang Richard Yang, Edmund Yeh (Adjunct)

Assistant Professor  Minjoo Lee

FIELDS OF STUDY
Fields include biomedical sensory systems, communications and signal processing, computer engineering, control systems, microelectromechanical and nanomechanical systems (MEMS and NEMS), nanoelectronic science and technology, neural networks, optoelectronic materials and devices, sensor networks, semiconductor materials and devices, wireless networks, and VLSI design and testing.

Mechanical Engineering & Materials Science
Chair
Mitchell Smooke

Director of Graduate Studies
Udo Schwarz (udo.schwarz@yale.edu)

Associate Professors  Eric Dufresne, Corey O’Hern, Jan Schroers

Assistant Professors  Aaron Dollar, Nicholas Ouellette

Lecturers  Beth Anne Bennett, Kailasnath Purushothaman

FIELDS OF STUDY

Fluids and thermal sciences  Dynamics and stability of drops and bubbles; dynamics of thin liquid films; macroscopic and particle-scale dynamics of emulsions, foams, and colloidal suspensions; electrospray theory and characterization; electrical propulsion applications; combustion and flames; computational methods for fluid dynamics and reacting flows; turbulence; particle tracking in fluid mechanics; laser diagnostics of reacting and nonreacting flows.

Soft matter/complex fluids  Jamming and slow dynamics in gels, glasses, and granular materials; mechanical properties of soft and biological materials; dynamics of macromolecules. Several faculty in Mechanical Engineering are also affiliated with the Integrated Graduate Program in Physical and Engineering Biology (www.peb.yale.edu).

Materials science  Characterization of crystallization and other phase transformations; studies of thin films; MEMS; smart materials such as shape memory alloys, amorphous metals, and nanomaterials including nanocomposites; NEMS; nano-imprinting; classical and quantum optomechanics; atomic-scale investigations of surface interactions and properties; classical and quantum nanomechanics; nanotribology.

Robotics/mechatronics  Machine and mechanism design; dynamics and control; robotic grasping and manipulation; human-machine interface; rehabilitation robotics; haptics; electromechanical energy conversion; biomechanics of human movement; human-powered vehicles.

Integrated Graduate Program in Physical and Engineering Biology (IGPPEB)

The Yale IGPPEB program brings together faculty drawn mainly from five member areas (MB&B, MCDB, Applied Physics, Physics, and Engineering). All faculty involved recognize the importance of interdisciplinary research at the interface of the biological and physical sciences, and have recently developed interdisciplinary research collaborations among IGPPEB colleagues. Core courses for Engineering students in this Ph.D. program are listed in the core course list below for each participating department.

Special Requirements for the Ph.D. Degree

A pamphlet titled Qualification Procedure for the Ph.D. Degree in Engineering & Applied Science describes the requirements in detail. The student is strongly encouraged to read it carefully. Here, key requirements are briefly summarized.
The student plans his/her course of study in consultation with faculty advisers (the student’s advisory committee). A minimum of ten term courses is required, to be completed in the first two years. Well-prepared students may petition for course waivers based on courses taken in a previous graduate degree program. Similarly, students may place out of certain ENAS courses via an examination prepared by the course instructor. Placing out of the course will not reduce the total number of required courses. Core courses, as identified by each department/program, should be taken in the first year unless otherwise noted by the department. With the permission of the departmental director of graduate studies (DGS), students may substitute more advanced courses that cover the same topics. No more than two courses can be Special Investigations, and at least two must be outside the area of the dissertation. All students must complete a one-term course, ENAS 508b, Responsible Conduct of Research, in the first year of study.

Each term, the faculty review the overall performance of the student and report their findings to the DGS who, in consultation with the associate dean, determines whether the student may continue toward the Ph.D. degree. By the end of the second term, it is expected that a faculty member has agreed to accept the student as a research assistant. By December 5 of the third year, an area examination must be passed and a written prospectus submitted before dissertation research is begun. These events result in the student’s admission to candidacy. Subsequently, the student will report orally each year to the full advisory committee on progress. When the research is nearing completion, but before the thesis writing has commenced, the full advisory committee will advise the student on the thesis plan. A final oral presentation of the dissertation research is required to be given during term time. There is no foreign language requirement.

Teaching experience is regarded as an integral part of the graduate training program at Yale University, and all Engineering graduate students are required to serve as a Teaching Fellow for one term, typically during year two. Teaching duties normally involve assisting in laboratories or discussion sections and grading papers and are not expected to require more than ten hours per week. Students are not permitted to teach during the first year of study.

If a student was admitted to the program having earned a score of less than 26 on the Speaking Section of the Internet-based TOEFL, the student will be required to take an English as a Second Language (ESL) course each semester at Yale until the Graduate School’s Oral English Proficiency standard has been met. This must be achieved by the end of the third year in order for the student to remain in good standing.

Core Course Requirements for the Ph.D. Degree

The core courses for each department and program are as follows:

**Biomedical Engineering**  Physiological Systems (ENAS 550), Physical and Chemical Basis of Bioimaging and Biosensing (ENAS 510). One of these courses may be taken in the second year. In addition, there is a math requirement that must be met by taking Mathematical Methods I (ENAS 500) or Advanced Engineering Mathematics (ENAS 505) in the first year.

**Chemical & Environmental Engineering (Chemical track)**  Classical and Statistical Thermodynamics (ENAS 521), Energy, Mass, and Momentum Processes (ENAS 603),
Chemical Reaction Engineering (ENAS 602). In addition, there is a math requirement that must be met by taking Mathematical Methods I (ENAS 500) or Advanced Engineering Mathematics (ENAS 505) in the first year. Students in the IGPPEB program must also take Methods and Logic in Interdisciplinary Research (ENAS 517), Biological Physics (ENAS 541), Boot Camp Biology (MB&B 520), Integrated Workshop (ENAS 991), and Systems Modeling in Biology (MCDB 561).

**Chemical & Environmental Engineering (Environmental track)** Aquatic Chemistry (ENAS 640), Biological Processes in Environmental Engineering (ENAS 641), Environmental Physicochemical Processes (ENAS 642). In addition, there is a math requirement that must be met by taking one of the following courses in the first year: Mathematical Methods I (ENAS 500), Advanced Engineering Mathematics (ENAS 505), Applied Spatial Statistics (F&ES 781), Multivariate Statistical Analysis in the Environmental Sciences (F&ES 758), or Multivariate Statistical Methods for the Social Sciences (STAT 660).

**Electrical Engineering (Computer Engineering track)** Introduction to VLSI System Design (ENAS 875), Advanced Topics in Computer Engineering (ENAS 921).

**Electrical Engineering (Microelectronics track)** Two of the following four courses: Photonics and Optical Electronics (ENAS 511), Heterojunction Devices (ENAS 718), Solid State Physics I (ENAS 850), Semiconductor Silicon Devices and Technology (ENAS 986).

**Electrical Engineering (System and Signals track)** Linear Systems (ENAS 902), Stochastic Processes (ENAS 502).

**Mechanical Engineering & Materials Science** Students must demonstrate competence in one of four areas: Fluid and Thermal Sciences, Soft Matter/Complex Fluids, Materials Science, or Robotics/Mechatronics. As a minimum requirement, students must take at least one of the following courses in the first year of study: Intelligent Robotics (CPSC 573), Classical and Statistical Thermodynamics (ENAS 521), Biological Physics (ENAS 541), Polymer Physics (ENAS 606), Synthesis of Nanomaterials (ENAS 615), Statistical Physics II (PHYS 628), Theoretical Fluid Dynamics (ENAS 704), Fundamentals of Combustion (ENAS 708), Introduction to Robot Analysis (ENAS 777), Intermolecular and Surface Forces (ENAS 787), Soft Condensed Matter Physics (ENAS 848), Solid State Physics I (ENAS 850), Solid State Physics II (ENAS 851), Linear Systems (ENAS 902) – if not used to satisfy the math requirement – and Systems and Control (ENAS 936). In addition, there is a math requirement that must be met by taking Mathematical Methods I (ENAS 500), Mathematical Methods of Physics (PHYS 506), or Linear Systems (ENAS 902), depending on the research area. Students in the IGPPEB program must also take Methods and Logic in Interdisciplinary Research (ENAS 517), Biological Physics (ENAS 541), Boot Camp Biology (MB&B 520), Integrated Workshop (ENAS 991), and Systems Modeling in Biology (MCDB 561).

**Honors Requirement**

Students must meet the Graduate School’s Honors requirement in at least two term courses (excluding Special Investigations) by the end of the second term of full-time study. An extension of one term may be granted at the discretion of the DGS.
Master’s Degrees

M.Phil.  See Degree Requirements under Policies and Regulations.

M.S. (en route to the Ph.D.)  To qualify for the M.S., the student must pass eight term courses; no more than two may be Special Investigations. An average grade of at least High Pass is required, with at least one grade of Honors.

Terminal Master’s Degree Program  Students may also be admitted directly to a terminal master’s degree program. The requirements are the same as for the M.S. en route to the Ph.D., although there are no core course requirements for students in this program. This program is normally completed in one year, but a part-time program may be spread over as many as four years. Some courses are available in the evening, to suit the needs of students from local industry.

Program materials are available upon request to the Office of Graduate Studies, School of Engineering & Applied Science, Yale University, PO Box 208267, New Haven CT 06520-8267; e-mail, engineering@yale.edu; Web site, www.seas.yale.edu.

Courses

The list of courses may be slightly modified by the time term begins. Please check the Web site http://students.yale.edu/oci for the most updated course listing.

ENAS 500a/APHY 500a, Mathematical Methods I  Paul Van Tassel
A beginning, graduate-level introduction to ordinary and partial differential equations, vector analysis, linear algebra, and complex functions. Laplace transform, series expansion, Fourier transform, and matrix methods are given particular attention. Applications to problems frequently encountered in engineering practice are stressed throughout. TTH 9–10:15

ENAS 501b, Mathematical Methods II  Juan de la Mora
Special functions, the Laplace transformations, Fourier series, Fourier integrals, and partial differential equations including separation of variables, methods of characteristics, variational techniques, and a brief discussion of numerical methods. TTH 1–2:15

ENAS 502bu, Stochastic Processes  Sekhar Tatikonda

[ENAS 503b/AMTH 605b/STAT 667b, Probabilistic Networks, Algorithms, and Applications]

[ENAS 505a, Advanced Engineering Mathematics]
ENAS 506b, Ethics and Professional Development for Biomedical Engineers and Scientists  Evan Morris
A seminar class that explores ethical issues, frameworks for understanding issues, and boundaries of honorable execution of science and engineering through relevant reading of a broad variety of historical nonfiction, novels, case studies, newspaper and magazine articles, and other resource material. Lively but reasoned and respectful debate is encouraged and expected. Essentials of the practice of science are also addressed. Short writing exercises are used to foster good writing, thinking, and communication skills. Acquired skills are applied to ethical issues of science and engineering in the news. F 1:30–3:20

ENAS 508b/APHY 508b, Responsible Conduct of Research
Required for first-year students. Presentation and discussion of topics and best practices relevant to responsible conduct of research including academic fraud and misconduct, conflict of interest and conflict of commitment, data acquisition and human subjects, use and care of animals, publication practices and responsible authorship, mentor/trainee responsibilities and peer review, and collaborative science.

ENAS 509au, Electronic Materials: Fundamentals and Applications  Jung Han
Survey and review of fundamental issues associated with modern microelectronic and optoelectronic materials. Topics include band theory, electronic transport, surface kinetics, diffusion, materials defects, elasticity in thin films, epitaxy, and Si integrated circuits. MW 11:35–12:50

ENAS 510au, Physical and Chemical Basis of Bioimaging and Biosensing  Douglas Rothman, Fred Sigworth, Richard Carson, Fahmeed Hyder
Basic principles and technologies for imaging and sensing the chemical, electrical, and structural properties of living tissues and biological macromolecules. Topics include magnetic resonance spectroscopy, MRI, positron emission tomography, and molecular imaging with MRI and fluorescent probes. TTH 1–2:15

ENAS 511bu, Photonics and Optical Electronics  Jung Han
A survey of the enabling components and devices that constitute modern optical communication systems. Focus on the physics and principles of each functional unit, its current technological status, design issues relevant to overall performance, and future directions. Permission of the instructor required. MW 1–2:15

ENAS 513au, Introduction to Analysis
Foundations of real analysis, including metric spaces and point set topology, infinite series, and function spaces. TTH 1–2:15

ENAS 514bu, Real Analysis  Philip Gressman
The Lebesgue integral, Fourier series, applications to differential equations. TTH 1–2:15

ENAS 517b/MB&B 517b3/MCDB 517b3/PHYS 517b3, Methods and Logic in Interdisciplinary Research  Lynne Regan, Enrique De La Cruz, Eric Dufresne, Thierry Emonet, Paul Forscher, Megan King, Michael Levene, Simon Mochrie, Corey O’Hern, Thomas Pollard, Elizabeth Rhoades, Corey Wilson, and staff
This half-term IGPPEB class is intended to introduce students to integrated approaches to research. Each session is led by faculty with complementary expertise and discusses
papers that use different approaches to the same topic (for example, physical and biological or experiment and theory). Counts as 0.5 credit toward graduate course requirements. Required for students in IGPPEB. MW 5–7

[ENAS 518a/MB&B 635a, Mathematical Methods in Biophysics]

ENAS 521a, Classical and Statistical Thermodynamics  Abbas Firoozabadi
A unified approach to bulk-phase equilibrium thermodynamics, bulk-phase irreversible thermodynamics, and interfacial thermodynamics in the framework of classical thermodynamics, and an introduction to statistical thermodynamics. Both the activity coefficient and the equations of state are used in the description of bulk phases. Emphasis on classical thermodynamics of multicomponents, including concepts of stability and criticality, curvature effect, and gravity effect. The choice of Gibbs free energy function covers applications to a broad range of problems in chemical, environmental, biomedical, and petroleum engineering. The introduction includes theory of Gibbs canonical ensembles and the partition functions, fluctuations, and Boltzmann’s statistics, Fermi-Dirac and Bose-Einstein statistics. Application to ideal monatomic and diatomic gases is covered. MW 9–10:15

ENAS 525a, Optimization I  Eric Denardo
A problem-based introduction to linear programs and their generalizations. Includes theory, algorithms, uses and connections to economic reasoning. Optimality conditions for linear and nonlinear programs. Solution methods for linear, integer, and nonlinear programs. Solution concepts for games. Computation of Nash equilibria and Brouwer fixed points. TTH 1–2:15

[ENAS 530a, Optimization Techniques]

ENAS 534a, Biomaterials  Anjelica Gonzalez
Introduction to materials, classes of materials from atomic structure to physical properties. Major classes of materials: metals, ceramics and glasses, and polymers, addressing their specific characteristics, properties, and biological applications. Throughout the presentation of the synthesis, characterization, and properties of the classes of materials, a connection is made to the selection of materials for use in specific biological applications by matching the material’s properties to those necessary for success in the application. Case studies address the successes and failures of particular materials from each of the classes in biological applications. TTH 9–10:15

ENAS 535b/PATH 630b, Biomaterial-Tissue Interactions  Themis Kyriakides
The course addresses the interactions between tissues and biomaterials, with an emphasis on the importance of molecular- and cellular-level events in dictating the performance and longevity of clinically relevant devices. In addition, specific areas such as biomaterials for tissue engineering and the importance of stem/progenitor cells, and biomaterial-mediated gene and drug delivery are addressed. TTH 9–10:15

ENAS 541a/MB&B 523a/PHYS 523a, Biological Physics  Eric Dufresne
An introduction to the physics of several important biological phenomena, including molecular motors, protein folding, bacterial locomotion, and allostery. The material and
approach are positioned at the interface of the physical and biological sciences. Required for students in IGPPEB. TTH 2:30–3:45

**ENAS 549b, Biomedical Data Analysis**  Richard Carson
The course focuses on the analysis of biological and medical data associated with applications of biomedical engineering. It provides basics of probability and statistics, and analytical approaches for determination of quantitative biological parameters from noisy, experimental data. Programming in MATLAB to achieve these goals is a major portion of the course. Applications include Michaelis–Menten enzyme kinetics, Hodgkin Huxley, neuroreceptor assays, receptor occupancy, MR spectroscopy, PET neuroimaging, brain image segmentation and reconstruction, and molecular diffusion. MWF 9:25–10:15

**ENAS 550a/C&MP 550a/MCDB 550a/PHAR 550a, Physiological Systems**
Emile Boulpaep, W. Mark Saltzman
The course develops a foundation in human physiology by examining the homeostasis of vital parameters within the body, and the biophysical properties of cells, tissues, and organs. Basic concepts in cell and membrane physiology are synthesized through exploring the function of skeletal, smooth, and cardiac muscle. The physical basis of blood flow, mechanisms of vascular exchange, cardiac performance, and regulation of overall circulatory function are discussed. Respiratory physiology explores the mechanics of ventilation, gas diffusion, and acid-base balance. Renal physiology examines the formation and composition of urine and the regulation of electrolyte, fluid, and acid-base balance. Organs of the digestive system are discussed from the perspective of substrate metabolism and energy balance. Hormonal regulation is applied to metabolic control and to calcium, water, and electrolyte balance. The biology of nerve cells is addressed with emphasis on synaptic transmission and simple neuronal circuits within the central nervous system. The special senses are considered in the framework of sensory transduction. Weekly discussion sections provide a forum for in-depth exploration of topics. Graduate students evaluate research findings through literature review and weekly meetings with the instructor. MWF 9:25–10:15

**ENAS 551a, Biotransport and Kinetics**  Kathryn Miller-Jensen
Creation and critical analysis of models of biological transport and reaction processes. Topics include mass and heat transport, biochemical interactions and reactions, and thermodynamics. Examples from diverse applications, including drug delivery, biomedical imaging, and tissue engineering. TTH 11:35–12:50

**ENAS 553b, Immuno-Engineering**  Tarek Fahmy
An advanced class that introduces immunology principles and methods to engineering students. The course focuses on biophysical principles and biomaterial applications in understanding and engineering immunity. The course is divided into three parts. The first part introduces the immune system: organs, cells, and molecules. The second part introduces biophysical characterization and quantitative modeling in understanding immune system interactions. The third part focuses on intervention, modulation, and techniques for studying the immune system with emphasis on applications of biomaterials for intervention and diagnostics. TTH 2:30–3:45
ENAS 554b, Continuum Biomechanics  Jay Humphrey
This course is designed to enable students to learn advanced and state-of-the-art methods of continuum and computational biomechanics, especially related to the need to formulate new theories of soft tissue growth, remodeling, disease progression, healing, and aging. Emphasis is placed on ensuring that the mechanics is driven by advances in the vascular mechanobiology.

ENAS 555b, Vascular Mechanics  Jay Humphrey
This course is designed to enable students to apply methods of continuum biomechanics to study diverse vascular conditions and treatments, including hypertension, atherosclerosis, aneurysms, vein grafts, and tissue-engineered constructs from an engineering perspective. Emphasis is placed on ensuring that the mechanics is driven by advances in the vascular mechanobiology. TTH 2:30–3:45

ENAS 557b, Musculoskeletal Biomechanics  Jing Zhou
This course is an introduction to mechanical principles of musculoskeletal system, including bones, cartilages, joints, muscle, etc. Students learn how to apply these basic mechanical principles to understanding the structure and function of biological systems and how mechanical environment modulates the development, remodeling, and repairing of biological systems. The topics cover from tissue/organ level, to cellular level, and even to molecular level. The frontier area of mechanobiology in stem cell therapy and regenerative medicine is discussed.

[ENAS 563b, Fault Tolerant Computer Systems]

ENAS 564b, Tissue Engineering  Laura Niklason
Introduction to the major aspects of tissue engineering, including materials selection and information on synthetic and natural scaffolds; cell biology considerations including cues for replication, differentiation, adhesion, and senescence; bioreactor design at laboratory and commercial scale and bioreactor design considerations; and tissue- and organ-level physiology with a focus on design criteria for engineered tissue replacements. Course involves team laboratory project to engineer a connective tissue. Class sessions include lectures and hands-on laboratory work. MW 9:25–10:15, W 2:30–4:20

ENAS 570b/C&MP 560b/MCDB 560b/PHAR 560b, Cellular and Molecular Physiology: Molecular Machines in Human Disease  Emile Boulpaep, Fred Sigworth
The course focuses on understanding the processes that transfer molecules across membranes at the cellular, molecular, biophysical, and physiological levels. Students learn about the different classes of molecular machines that mediate membrane transport, generate electrical currents, or perform mechanical displacement. Emphasis is placed on the relationship between the molecular structures of membrane proteins and their individual functions. The interactions among transport proteins in determining the physiological behaviors of cells and tissues are also stressed. Molecular motors are introduced and their mechanical relationship to cell function is explored. Students read papers from the scientific literature that establish the connections between mutations in genes encoding membrane proteins and a wide variety of human genetic diseases. MWF 9:25–10:15
ENAS 575au/CPSC 575au, Computational Vision and Biological Perception  
Steven Zucker  
An overview of computational vision with a biological emphasis. Suitable as an introduction to biological perception for computer science and engineering students, as well as an introduction to computational vision for mathematics, psychology, and physiology students.

ENAS 580a, Clinical Research in Biomedical Engineering  
W. Mark Saltzman, James Duncan  
The course is designed to provide graduate students in Biomedical Engineering with a broad perspective of research topics in their field, with a particular focus on topics directed toward clinically oriented research. Students attend a series of lectures by speakers from both inside and outside the Yale BME research community covering the areas of biomaterials/tissue engineering, drug delivery systems, biomechanics, and bioimaging. The week after each lecture, students gather to address questions posed by the lecturing faculty and the course organizers, with discussion led by the students themselves. In addition, each student picks a topic related to one of the lectures given during the term and submits an extended written analysis.

ENAS 585bu, Fundamentals of Neuroimaging  
Fahmeed Hyder, Douglas Rothman  
The neuroenergetic and neurochemical basis of several dominant neuroimaging methods, including fMRI. Topics range from technical aspects of different methods to interpretation of the neuroimaging results. Controversies and/or challenges for application of fMRI and related methods in medicine are identified.

ENAS 600au, Computer-Aided Engineering  
Marshall Long  
Aspects of computer-aided design and manufacture including reasons for increased use of CAD/CAM, the computer’s role in the mechanical engineering design and its manufacturing process, hardware and software elements of typical commercial systems, and computer graphics and drafting. TTH 9–10:15

ENAS 601b, Materials Chemistry

ENAS 602b, Chemical Reaction Engineering  
Eric Altman  
Applications of physical-chemical and chemical-engineering principles to the design of chemical process reactors. Ideal reactors treated in detail in the first half of the course, practical homogeneous and catalytic reactors in the second. TTH 1–2:15

ENAS 603b, Energy, Mass, and Momentum Processes  
Daniel Rosner  
Application of continuum mechanics approach to the understanding and prediction of fluid flow systems that may be chemically reactive, turbulent, or multiphase.

ENAS 605b, Colloidal Chemical Engineering

ENAS 606b, Polymer Physics

ENAS 608b, Surface and Surface Processes
ENAS 610a, Biomolecular Engineering  Corey Wilson
A survey of the principles and scope of biomolecular engineering. Discussion of concepts at the interface of applied mathematics, biology, biophysical chemistry, and chemical engineering that are used to develop novel molecular tools, materials, and approaches based on biological building blocks and machinery. Modeling the physicochemical properties that confer function in biological systems; low- and high-resolution protein engineering; the design of synthetic interactomes.

ENAS 611a, Separation Processes  Daniel Rosner
Theory and design of separation processes for multicomputer and/or multiphase mixtures via equilibrium and rate phenomena. Included are single-stage and cascaded absorption, adsorption, extraction, distillation, filtration, and crystallization processes.

MW 9–10:15

ENAS 612a, Biomolecular Engineering Laboratory  Corey Wilson
A survey of biomolecular engineering laboratory methods and strategies. An advanced workshop on a broad range of concepts at the interface of applied mathematics, biology, biophysical chemistry, and chemical engineering whose express purpose is developing novel molecular tools, materials, and approaches based on biological building blocks and machinery. Topics include understanding and modeling the physicochemical properties that confer function in biological systems, low- and high-resolution protein engineering, and the design of synthetic interactomes.

[ENAS 614b, Surface and Thin-Film Characterization]
[ENAS 615b, Synthesis of Nanomaterials]
[ENAS 616b, Multiscale Modeling and Design in Biology]
[ENAS 618a, Principles and Practice of Heterogeneous Catalysis]
[ENAS 626a, Chemical Engineering Process Control]
[ENAS 628b, Sensors and Biosensors]

ENAS 638a, Water Chemistry  William Mitch
Aqueous inorganic chemistry for environmental engineering. Topics include acid-base chemistry, alkalinity, the carbonate system, speciation, precipitation/dissolution, redox chemistry, EH/pH diagrams. TTH 1–2:15

ENAS 639a, Management of Water Resources and Environmental Systems  Gideon Oron
Management tools to analyze problems related to water resources and environmental systems. A focus on characterizing, defining, and solving natural and water resources (quality, location, treatment) and environmental problems (soil, water, air pollution, risks) implementing Operation Research (OR) methods. Topics include introduction to OR methods and their role in natural resources and water resources, environmental systems, economic criteria, and optimization criteria. Management modeling refers to application of linear programming (e.g., river contamination), integer programming and fixed
charge problems (e.g., solid waste disposal and renovation), nonlinear programming (e.g., optimal water blending), goal programming, and Analytic Hierarchy Processes (AHP) (selection of preferable membrane treatment systems; selection of preferable waste treatment method). Main principles of multi-objective optimization are presented.

**ENAS 640b/F&ES 707b, Aquatic Chemistry**  Gabriel Benoit
A detailed examination of the principles governing chemical reactions in water. Emphasis is on developing the ability to predict the aqueous chemistry of natural and perturbed systems based on a knowledge of their biogeochemical setting. Focus is on inorganic chemistry, and topics include elementary thermodynamics, acid-base equilibria, alkalinity, speciation, solubility, mineral stability, redox chemistry, and surface complexation reactions. Illustrative examples are taken from the aquatic chemistry of estuaries, lakes, rivers, wetlands, soils, aquifers, and the atmosphere. A standard software package used to predict chemical equilibria may also be presented. **TTH 11:35–12:50**

**ENAS 641a, Biological Processes in Environmental Engineering**

**ENAS 642b, Environmental Physicochemical Processes**  Menachem Elimelech
Fundamental and applied concepts of physical and chemical (“physicochemical”) processes relevant to water quality control. Topics include chemical reaction engineering, overview of water and wastewater treatment plants, colloid chemistry for solid-liquid separation processes, physical and chemical aspects of coagulation, coagulation in natural waters, filtration in engineered and natural systems, adsorption, membrane processes, disinfection and oxidation, disinfection by-products. **TTH 2:30–3:45**

**ENAS 643a, Transport and Fate of Organic Chemicals in the Environment**

**ENAS 644b, Environmental Chemical Kinetics**

**ENAS 645b/F&ES 884b, Industrial Ecology**  Thomas Graedel
Industrial ecology is an organizing concept that is increasingly applied to define various interactions of today’s technological society with both natural and altered environments. Technology and its potential for modification and change are central to this topic, as are implications for government policy and corporate response. The course discusses how industrial ecology is being applied in corporations to minimize the environmental impacts of products, processes, and services, and shows how industrial ecology serves as a technological framework for science, policy, and management in government and society. **MW 1–2:15**

**ENAS 646b/F&ES 714b, Environmental Hydrology**  James Saiers
Exploration of the roles of natural processes and anthropogenic activities in regulating the quantity, distribution, and chemical composition of the Earth’s freshwater. Students gain exposure to theoretical and applied elements of surface and subsurface hydrology. The theory covered in the course focuses on hydrologic phenomena of societal and environmental importance, including stream-flow generation, wetland-water cycling, groundwater-flow dynamics, contaminant migration in surface and groundwater, and water use and redistribution by plants. Application of theory is accomplished through student use of hydrologic simulation models, which are expressions of theory and
essential tools of water-resource management and assessment. Intended as a first course in scientific hydrology; appropriate for M.E.M., M.E.Sc., and Ph.D. students, as well as for advanced undergraduates. Because hydrology is a quantitative science, treatment of the course subject matter involves mathematics. The course is designed for students who typically do not have previous course work in mathematics beyond one semester of college-level calculus. Students who have not completed a college-level calculus course can succeed in the course provided that they are comfortable with arithmetic operations and algebra and are willing to learn a few, very basic principles of introductory calculus. Although students use hydrologic simulation models, the course does not involve any computer programming and requires no special computer skills.

**ENAS 648a**, Environmental Transport Processes  William Mitch
Analysis of transport phenomena governing the fate of chemical and biological contaminants in environmental systems. Emphasis on quantifying contaminant transport rates and distributions in natural and engineered environments. Topics include distribution of chemicals between phases; diffusive and convective transport; interfacial mass transfer; contaminant transport in groundwater, lakes, and rivers; analysis of transport phenomena involving particulate and microbial contaminants. TTH 4–5:15

**ENAS 640a/MGT 611a, Policy Modeling**  Edward Kaplan
Building on earlier course work in quantitative analysis and statistics, Policy Modeling provides an operational framework for exploring the costs and benefits of public policy decisions. The techniques employed include “back of the envelope” probabilistic models, Markov processes, queuing theory, and linear/integer programming. With an eye toward making better decisions, these techniques are applied to a number of important policy problems. In addition to lectures, assigned articles and text readings, and short problem sets, students are responsible for completing a take-home midterm exam and a number of cases. In some instances, it is possible to take a real problem from formulation to solution, and compare the student’s own analysis to what actually happened. Prerequisites: Decision Analysis and Game Theory, Data Analysis and Statistics, or a demonstrated proficiency in quantitative methods.

**ENAS 655a**, Environmental Risk Assessment

**ENAS 658a, MEMS Design**

**ENAS 660b/F&ES 885b, Green Engineering and Sustainability**  Paul Anastas
The course focuses on a green engineering design framework, the Twelve Principles of Green Engineering, highlighting the key approaches to advancing sustainability through engineering design. The class begins with discussions on sustainability, metrics, general design processes, and challenges to sustainability. The current approach to design, manufacturing, and disposal is discussed in the context of examples and case studies from various sectors. This provides a basis for what and how to consider when designing products, processes, and systems to contribute to furthering sustainability. The fundamental engineering design topics to be addressed include toxicity and benign alternatives, pollution prevention and source reduction, separations and disassembly, material and energy efficiencies and flows, systems analysis, biomimicry, and life cycle design, management, and analysis.
ENAS 704a, Theoretical Fluid Dynamics  Juan de la Mora
Derivation of the equations of fluid motion from basic principles. Potential theory, viscous flow, flow with vorticity. Topics in hydrodynamics, gas dynamics, stability, and turbulence. TTH 11:35–12:50

ENAS 708a, Fundamentals of Combustion  Alessandro Gomez

ENAS 711b, Biomedical Microtechnology and Nanotechnology  Rong Fan
Principles and applications of micro- and nanotechnologies for biomedicine. Approaches to fabricating micro- and nanostructures. Fluid mechanics, electrokinetics, and molecular transport in microfluidic systems. Integrated biosensors and microTAS for laboratory medicine and point-of-care uses. High-content technologies including DNA, protein microarrays, and cell-based assays for differential diagnosis and disease stratification. Emerging nanobiotechnology for systems medicine. Prerequisites: CHEM 112a, 114a, or 118a, and ENAS 194a or b. TTH 10:30–11:20

[ENAS 718au, Heterojunction Devices]

ENAS 747au, Applied Numerical Methods I  Beth Anne Bennett
The derivation, analysis, and implementation of various numerical methods. Topics include root-finding methods, numerical solution of systems of linear and nonlinear equations, eigenvalue/eigenvector approximation, polynomial-based interpolation, and numerical integration. Additional topics such as computational cost, error analysis, and convergence are addressed in a variety of contexts. TTH 11:35–12:50

ENAS 748bu, Applied Numerical Methods II  Beth Anne Bennett
The derivation, analysis, and implementation of numerical methods for the solution of ordinary and partial differential equations, both linear and nonlinear. Additional topics such as computational cost, error estimation, and stability analysis are studied in several contexts throughout the course. ENAS 747a is not a prerequisite. TTH 11:35–12:50

[ENAS 761a/G&G 525a, Introduction to Continuum Mechanics]

[ENAS 777, Introduction to Robot Analysis]

[ENAS 787a, Intermolecular and Surface Forces]

[ENAS 802au, Nano and Microsystem Technology]

ENAS 805bu, Biotechnology and the Developing World  Anjelica Gonzalez
This interactive course explores how advances in biotechnology enhance the quality of life in the developing world. Implementing relevant technologies in developing countries is not without important challenges; technical, practical, social, and ethical aspects of the growth of biotechnology are explored. Readings from Biomedical Engineering for Global Health as well as recent primary literature; case studies, in-class exercises, and current events presentations. Guest lecturers include biotechnology researchers, public
policy ethicists, preventive research physicians, public-private partnership specialists, and engineers currently implementing health-related technologies in developing countries. TTH 1–2:15

**ENAS 806a**, **Photovoltaic Energy**  Minjoo Lee
Survey of photovoltaic energy devices, systems, and applications, including review of optical and electrical properties of semiconductors. Topics include solar radiation, solar cell design, performance analysis, solar cell materials, device processing, photovoltaic systems, and economic analysis. MW 1–2:15

**ENAS 812b/NSCI 612b, Molecular Transport and Intervention in the Brain**  W. Mark Saltzman, Richard Carson
A graduate-level seminar on mechanisms and rates of movement of molecules in the brain and the design of novel drug delivery systems. Topics include mathematical methods for modeling diffusion and flow processes, diffusion in the brain interstitium, fluid flows in the brain and spinal cord, the blood-brain barrier, microdialysis measurements, controlled release systems, microfluidic approaches for drug delivery. Weekly readings are assigned from neuroscience and engineering texts; current papers from the literature are used to guide discussion each week.

**ENAS 821b**, **Physics of Medical Imaging**  Todd Constable
The physics of image formation with special emphasis on techniques with medical applications. Concepts that are common to different types of imaging are emphasized, along with an understanding of how information is limited by the basic physical phenomena involved. Mathematical concepts of image analysis, the formation of images by ionizing radiation, ultrasound, NMR, and other energy forms, and methods of evaluating image quality. MW 11:35–12:50

**ENAS 825b, Physics of Magnetic Resonance Spectroscopy in Vivo**  Graeme Mason, Robin de Graaf
The physics of chemical measurements performed with nuclear magnetic resonance spectroscopy, with special emphasis on applications to measurement studies in living tissue. Concepts that are common to magnetic resonance imaging are introduced. Topics include safety, equipment design, techniques of spectroscopic data analysis, and metabolic modeling of dynamic spectroscopic measurements. MW 11:35–12:50

**ENAS 836b**, **Biophotonics and Optical Microscopy**  Michael Levene
A review of linear and nonlinear optical microscopies and other biophotonics applications. Topics include wide-field techniques, linear and nonlinear laser scanning microscopy, fundamentals of geometrical and physical optics, optical image formation, laser physics, single molecule techniques, fluorescence correlation spectroscopy, and light scattering. Discussion of fluorescence and the underlying physics of light-matter interactions that provide biologically relevant signals. MW 4–5:15

[**ENAS 848, Soft Condensed Matter Physics**]
ENAS 850a^ and 851b^/PHY 548a^ and 549b^/PHYS 548a^ and 549b^, Solid State Physics I and II  Victor Henrich [F], A. Douglas Stone [Sp]
A two-term sequence covering the principles underlying the electrical, thermal, magnetic, and optical properties of solids, including crystal structures, phonons, energy bands, semiconductors, Fermi surfaces, magnetic resonance, phase transitions, and superconductivity. Fall: TTH 1–2:15; Spring: TTH 2:30–3:45

[ENAS 866a, MOS Device Physics and Technology]

ENAS 875a^, Introduction to VLSI System Design  Richard Lethin
Chip design. Provides background in integrated devices, circuits, and digital subsystems needed for design and implementation of silicon logic chips. Historical context, scaling, technology projections, physical limits. CMOS fabrication overview, complementary logical circuits, design methodology, computer-aided design techniques, timing, and area estimation. Case studies of recent research and commercial chips. Objectives of the course are (1) to give students the ability to complete the course project (design of a digital CMOS subsystem chip through layout), and (2) to understand the directions that future chip technologies may take. Selected projects are fabricated and packaged for testing by students. Prerequisite: circuits at the level of introductory physics and computer programming. TH 1:30–3:20

ENAS 880a/NSCI 523a, Imaging Drugs in the Brain  Evan Morris, Kelly Cosgrove
Seminar course to explore the uses of PET, SPECT, and fMRI to study the mechanisms of action and long-term effects of drugs (legal and illegal) on brain function. Basic research is the main focus, augmented by two class periods allotted to uses of imaging in drug development by Pharma. Syllabus is comprised of review articles, book chapters, and journal articles. Some class periods begin with a short lecture to cover methodological concepts, followed by discussion of reading material. Topics include basic understanding of imaging technology (physics, biochemistry, and mathematics) as it relates to imaging of drugs, receptors, neurotransmitters; understanding the primary outcomes of imaging experiments; imaging experiment design; recent findings related to drug abuse; common neurophysiological pathways of addictive drugs; and uses of imaging in drug development (what do drug companies want to measure?). T 3:30–5:20

ENAS 900b, Distributed Computation and Decision Making  A. Stephen Morse
Topics to include consensus and flocking problems, the multi-agent rendezvous problem, distributed averaging, localization of sensors in a multi-sensor network, and the distributed management of multi-agent formations. Related concepts from spectral graph theory, rigid graph theory, nonhomogeneous Markov chain theory, stability theory, and linear system theory are covered.

ENAS 902a, Linear Systems  A. Stephen Morse
Background linear algebra; finite-dimensional, linear-continuous, and discrete dynamical systems; state equations, pulse and impulse response matrices, weighting patterns, transfer matrices. Stability, Lyapunov’s equation, controllability, observability, system reduction, minimal realizations, equivalent systems, McMillan degree, Markov matrices. Recommended for all students interested in robotics, systems, and information sciences. MW 1–2:15
ENAS 912au, Biomedical Image Processing and Analysis  James Duncan, Lawrence Staib
A study of the basic computational principles related to processing an analysis of biomedical images (e.g., magnetic resonance, computed X-ray tomography, fluorescence microscopy). Basic concepts and techniques related to discrete image representation, multidimensional frequency transforms, image enhancement/restoration, image segmentation, and image registration. MW 4–5:15

[ENAS 920b, Programming for Image Analysis]

ENAS 921a, Advanced Topics in Computer Engineering
Review of current topics and principles of modern computing systems, including concepts from computer architecture, computer-aided design, reconfigurable computing, VLSI design and testing, as well as hardware security. Reading material is based on recent research papers and other similar sources. Laboratory work consists of the completion of a project using computer-aided design and test tools as well as reconfigurable or custom hardware design platforms. Prerequisite: permission of the instructor. M 2:30–4:20

[ENAS 930b, Advanced Semiconductor Fundamentals]

ENAS 936bu, Systems and Control  Kumpati Narendra
Design of feedback control systems with applications to engineering, biological, and economic systems. Topics include state-space representation, stability, controllability, and observability of discrete-time systems; system identification; optimal control of systems with multiple outputs. TTH 11:35–12:50

ENAS 944au, Digital Communications Systems
An introduction to the rapidly expanding field of mobile and fixed, voice and data communications systems. A review of analog and digital signals and their time and frequency domain representations. Topics include modulation methods, including amplitude; frequency and time division multiplexing for continuous and discrete/digital signals; an overview of modern voice and data communications networks; and an overview of information theory, including entropy, the quantification of information, data rates, coding, and compression. Examples and demonstrations are drawn from radio, telephone, television, computer, cellular, and satellite communications networks. TTH 1–2:15

[ENAS 954bU/STAT 664bU, Information Theory]

ENAS 960aU/CPSC 536aU, Networked Embedded Systems and Sensor Networks  Andreas Savvides and staff
Introduction to the fundamental concepts of networked embedded systems and wireless sensor networks, presenting a cross-disciplinary approach to the design and implementation of smart wireless embedded systems. Topics include embedded systems programming concepts; low-power and power-aware design; radio technologies; communication protocols for ubiquitous computing systems; and mathematical foundations of sensor behavior. Laboratory work includes programming assignments on low-power wireless devices.

[ENAS 964b, Communication Networks]
ENAS 986bu, **Semiconductor Silicon Devices and Technology**  Minjoo Lee
Introduction to integrated circuit technology, theory of solid state devices, and principles of device design and fabrication. Laboratory involves the fabrication and analysis of semiconductor devices, including Ohmic contacts, Schottky diodes, p-n junctions, MOS capacitors, MOSFETS, and integrated circuits. **MW 9–10:15**

ENAS 990a and b, **Special Investigations**
Faculty-supervised individual projects with emphasis on research, laboratory, or theory. Students must define the scope of the proposed project with the faculty member who has agreed to act as supervisor, and submit a brief abstract to the director of graduate studies for approval.

ENAS 991b/MB&B 591b/MCDB 591b/PHYS 991b, **Integrated Workshop**
Lynne Regan, Eric Dufresne, Thierry Emonet, Paul Forscher, Simon Mochrie
This required course for students in IGPPEB involves hands-on laboratory modules with students working in pairs. A biology student is paired with a physics or engineering student; a computation/theory student is paired with an experimental student. The modules are devised so that a range of skills are acquired, and students learn from each other.
ENGLISH LANGUAGE AND LITERATURE

Brian Walsh, R. John Williams

Lecturer  Natalia Cecire

Fields of Study
Fields include English language and literature from Old English to the present, American
literature, and Anglophone literature.

Special Admissions Requirements
Application should be accompanied by scores from the GRE and the GRE “Literature in
English” subject test, a personal statement of purpose, and a ten- to fifteen-page writing
sample.

Special Requirements for the Ph.D. Degree
In order to fulfill the basic requirements for the program, a student must:
1. Complete twelve courses—six courses with at least one grade of Honors and a
maximum of one grade of Pass by July 15 following the first year; at least twelve
courses with grades of Honors in at least four of these courses and not more than one
Pass by July 15 following the second year. One of these twelve courses must be The
Teaching of English (ENGL 990). Courses selected must include one medieval, one
eyear-modern, one eighteenth- and/or nineteenth-century, one twentieth- and/or
twenty-first-century.
2. Satisfy the language requirement in one of three ways by the end of the second year.

   Two languages, by course and exam: one language to be completed by passing an advanced literature course at Yale (graduate or upper-level undergraduate course taught in and requiring papers in the language in question) with a grade of Honors or High Pass; the other to be passed by departmental exam (reading knowledge with dictionary).

   Two languages by exam: strong reading knowledge of one language, as demonstrated by passing a departmental exam without use of a dictionary; reading knowledge of a second language, demonstrated by passing a departmental exam with dictionary.

   Three languages by departmental exam or, in the case of an ancient language, by satisfactory completion of two terms of introductory Latin or Greek (GREK 110–111 or LATN 110–111). Languages to be selected from the following: (a) Latin or Greek; (b) French or German; (c) one of the preceding languages or Biblical Hebrew, Italian, Russian, Spanish, or another language agreed upon by the director of graduate studies (DGS). Students specializing in periods after 1750 may, with the permission of the DGS, substitute a third language for selection (a). Two terms of Old English (or one term of Old English and one of the History of the Language) may be substituted for selection (c).

3. Pass the oral examination before or as early as possible in the fifth term of residence.

   The exam consists of questions on five topics, developed by the student in consultation with examiners and subject to approval by the DGS.

4. Submit a dissertation prospectus, normally by January 15 of the third year.

5. Teach a minimum of two terms.

   Upon completion of all predissertation requirements, including the prospectus, students are admitted to candidacy for the Ph.D. Admission to candidacy must take place by the end of the third year of study.

**Combined Ph.D. Programs**

**ENGLISH AND AFRICAN AMERICAN STUDIES**

The Department of English Language and Literature also offers, in conjunction with the Department of African American Studies, a combined Ph.D. degree in English Language and Literature and African American Studies. For further details, see African American Studies.

**ENGLISH AND FILM STUDIES**

The Department of English Language and Literature also offers, in conjunction with the Film Studies Program, a combined Ph.D. degree in English Language and Literature and Film Studies. For further details, see Film Studies.

**ENGLISH AND RENAISSANCE STUDIES**

The Department of English Language and Literature also offers, in conjunction with the Renaissance Studies Program, a combined Ph.D. in English Language and Literature and Renaissance Studies. For further details, see Renaissance Studies.
Master’s Degrees

M.Phil. See Degree Requirements under Policies and Regulations. Additionally, students in English are eligible to pursue a supplemental M.Phil. degree in Medieval Studies. For further details, see Medieval Studies.

M.A. (en route to the Ph.D.) Students enrolled in the Ph.D. program may receive the M.A. upon completion of seven courses with at least one grade of Honors and a maximum of one grade of Pass, and the passing of two of the languages by departmental examinations.

Terminal Master’s Degree Program Students enrolled in the master’s degree program must complete either seven term courses or six term courses and a special project within the English department (one or two of these courses may be taken in other departments with approval of the DGS). There must be at least one grade of Honors, and there may not be more than one grade of Pass. Students must also pass examinations in two languages, ancient or modern. Full-time students normally complete the program in one year.

Courses

ENGL 500a/LING 500a, Introduction to Old English Language and Literature
Robert Frank

ENGL 501b/LING 501b, Beowulf and the Northern Heroic Tradition
Robert Frank
A close reading of the poem Beowulf, with some attention to shorter heroic poems. TH 9:25–11:15

ENGL 516au/CPLT 572a/MDVL 561a, Medieval Celtic Literature
David Gabriel
Major texts of Celtic literature, focusing on works from the birth of vernacular literature in the Middle Ages to the early modern period. Cultural, historical, and literary issues surrounding works in the Irish and Welsh languages; literary culture in Breton, Cornish, Scottish Gaelic, and Manx. Genres include lyric and bardic poetry, heroic and religious narrative, and early Arthurian works. All texts are available in translation, but students have some opportunity to learn basic reading in one or more languages. T 1:30–3:20

ENGL 534a, Piers Plowman
Ian Cornelius
A study of Piers Plowman, the brilliant and expansive poem probably authored by William Langland in three versions between the 1360s and about 1390. We make a sequential reading of what is called the “C version.” Special attention to sociohistorical and textual aspects of the poem’s early circulation. W 9:25–11:15

ENGL 539b/MDVL 552b, Literature and Theology in English, 1360–1410
Denys Turner, Alastair Minnis
There was an extraordinary flowering of religious writing in English during the period extending roughly from 1360, the approximate date of the first version of Piers Plowman,
182  Graduate School of Arts and Sciences 2012–2013

to 1410, the year in which Nicholas Love submitted his *Mirror of the Blessed Life of Jesus Christ* to Thomas Arundel, Archbishop of Canterbury, for his approval, in the context of new restrictions placed on vernacular writings as a response to the Lollard or “Wycliffite” heresy. This course considers some of that writing’s major theological achievements, concentrating on selections from *Piers Plowman* and Chaucer’s *Canterbury Tales* together with *Pearl*, *The Cloud of Unknowing*, and Julian of Norwich’s *Revelations*. The consequences of Lollardy are investigated in a class on Walter Brut, a Welsh Lollard tried in 1391–3 (and eulogized in John Foxe’s *Book of Martyrs*), and the course ends with Love’s *Mirror*, often cited as the model of orthodox meditative practice.

**ENGL 561b, Studies in Seventeenth-Century English Literature**  John Rogers
A survey of seventeenth-century poetry and prose, exclusive of Milton. Authors include Bacon, Donne, Hobbes, Herbert, Browne, Crashaw, Marvell, Cavendish, Bunyan, and Dryden. T 1:30–3:20

**ENGL 577a, Renaissance Poetry**  David Quint
A survey of major sixteenth- and early-seventeenth-century poets, with attention to the development of genres, explorations of subjectivity and love, classical and continental models. Authors include Skelton, Wyatt, Sidney, Davies, Gascoigne, Shakespeare, Campion, Raleigh, Daniel, Marlowe, and Donne. TH 1:30–3:20

**ENGL 601a, Shakespeare and Collaboration**  David Scott Kastan
This course seeks to understand collaboration as a normal, perhaps even a necessary, procedure in the early modern theater, and seeks to see Shakespeare as working within this familiar economy (not, as is usually the case, as the exception to it). Looking at a number of collaboratively written plays, as well as thinking about collaboration in a more radical sense—in terms of the inescapable collaborations of the theater and the book trade that are necessary to get a play on stage or into print—we explore the conditions of the early modern theatrical world in which Shakespeare flourished. W 1:30–3:20

**ENGL 606b, History and Historical Drama in the Age of Shakespeare**  Lawrence Manley
A study of the representation of history on the English stage in the reigns of Elizabeth I and James I. Plays by Shakespeare, Marlowe, Peele, Dekker, Webster, Ford, and others in relation to both nondramatic forms of historical writing and contemporary affairs. W 3:30–5:20

**ENGL 681a/CPLT 681a, The Mock-Heroic Moment: Milton to Eliot**  Claude Rawson
The course begins with Milton’s critique of military epic in *Paradise Lost*. It deals with the changes in the status of the heroic following the decline of the traditional military epic in the seventeenth century, partly under the pressure of increasing antiwar sentiment, and of the domestication of subject matter which led to the so-called rise of the novel. Boileau, Dryden, Swift (*Battle of the Books*), Pope, Gay, Fielding, Byron, Shelley, Eliot, Joyce, and Auden. T 1:30–3:20
ENGL 721a, Edmund Burke: Empire and Revolution  
David Bromwich
A partial survey of the political writings of Burke in the context of the theory of empire and of revolution. We emphasize his writings on India and France, which reveal a common theme: innovation—sudden change in a way of life—always depends on violence, whether its agents are internal or external to the society. We touch on a wider subject: the birth of modern ideology, from the demand for systematic excuses to justify empire and revolution. M 9:25–11:15

ENGL 725b/WGSS 771b, The Eighteenth-Century Novel  
Jill Campbell
Studies in the emergence of the “novel” as a category of literature and of “fiction” as a basis for experience in the course of the long eighteenth century. Likely authors include Behn, Haywood, Defoe, Richardson, Fielding, Sterne, Austen, Maria Edgeworth, and Mary Shelley. Special emphasis on the forms of selfhood developed by the novel; the claims to attention of suppositional persons in fictional forms; and eighteenth- and early-nineteenth-century experimentation with the uses of fiction for didactic and political ends. Readings also include a sampling of prose fiction for children and of nonfictional, polemical prose. W 9:25–11:15

ENGL 807a, Charles Dickens and George Eliot  
Stefanie Markovits
An overview of the careers of Charles Dickens and George Eliot exploring a series of paired texts that will allow perspective on two different approaches to a variety of novelistic modes, including the Bildungsroman, the historical novel, and the political novel. M 1:30–3:20

ENGL 810b, Victorian Poetry  
Leslie Brisman
The major Victorian poets, Tennyson and Browning, in the context of the Romanticism they inherit and transform. Significant attention to Barrett Browning’s Aurora Leigh, and some attention to Swinburne, the Rossettis, and Morris. TTH 11:35–12:50

ENGL 831b, Character, Things, and the Nineteenth-Century Novel  
Ruth Bernard Yeazell
Reading of selected nineteenth-century novels from Jane Austen to Henry James in light of the recent revival of critical interest in fictional character, on the one hand, and the representation of material objects, on the other. In addition to Austen and James, readings probably include works by Charles Dickens, George Eliot, Wilkie Collins, and Anthony Trollope, as well as a range of critical and theoretical commentary. M 1:30–3:20

ENGL 843b, Eighteenth-Century American Literature  
Michael Warner
An introduction to both the primary texts and the current scholarship in the field, including transatlantic and hemispheric perspectives; the public sphere; evangelicalism and the secular; the rise of African American public intellectuals; cultural geographies of literary capitals and the backcountry; nationalism; polite letters and popular genres; Native American literacies; the early American novel; and the modern social imaginary. Writers and preachers studied include Cotton Mather, Jonathan Edwards, Benjamin Franklin, Phillis Wheatley, John Marrant, Thomas Jefferson, Thomas Paine, Judith Sargent Murray, Timothy Dwight, Samson Occom, and Anonymous. T 1:30–3:20
ENGL 845bu/AFAM 743bu/AMST 654bu, American Artists and the African American Book  
Robert Stepto
The visual art, decoration, and illustration of African American books (prose and poetry) since 1900. Topics include book art of the Harlem Renaissance (with special attention to Aaron Douglas and Charles Cullen), art imported to book production (e.g., Archibald Motley’s paintings used as book art), children’s books (e.g., I Saw Your Face by Kwame Dawes with drawings by Tom Feelings; Ntozake Shange’s Ellington Was Not a Street, illus. by Kadir Nelson), photography and literature (e.g., Paul Laurence Dunbar’s Cabin and Field, with Hampton Institute photographs; Richard Wright’s 12 Million Black Voices). The seminar includes sessions at Beinecke Library and encourages research projects in the Beinecke’s holdings, especially the James Weldon Johnson collection. W 1:30–3:20

ENGL 846b/CPLT 539b, American Literature: Regional, National, Global  
Wai Chee Dimock
How does the choice of scale affect our understanding of American literature: its histories, its webs of relations, the varieties of genres that make up its landscape? Through three interlocking prisms — regional, national, and global — we explore multiple permutations of locality and distance; the size of events; lengths and widths of causal connection; and the expanding or contracting spheres of race and gender. Authors include Anne Bradstreet, Nathaniel Hawthorne, Henry James, Sarah Orne Jewett, Ernest Hemingway, Gertrude Stein, Ezra Pound, Paul Bowles, Langston Hughes, Robert Lowell, Monique Truong, Edwidge Danticat. W 1:30–3:20

ENGL 916a/CPLT 856a, Imperial and Anti-Imperial Epic  
Joe Cleary
The collapse of the European empires and the rise of the American empire as the superimposing world power in the twentieth century have inspired a wide variety of ambitious novelistic epic and tragic narratives, some focalized from the standpoint of the modern imperial metropoles, others from that of the colonial peripheries. Interleaving literary narratives and theoretical texts, and engaging matters of style and form as well as the difficulties of narrating historical transition, anticolonial insurrection, and the uneven nature of global capitalism, this seminar considers the complex relationship between the history of modern imperialism and the history of modern epic and tragic literary narration. Authors discussed may include Hegel, Lukács, Bakhtin, Moretti, Melville, Conrad, C.L.R. James, Malraux, Achebe, Vargas Llosa, and Yourcenar. W 1:30–3:20

ENGL 926a, Post-1945 American Fiction  
Amy Hungerford
This seminar examines what writers and critics have imagined to be the most pressing aesthetic and cultural concerns of the second half of the twentieth century as these pertain to fiction. Of particular interest to the seminar: novel and history, the writer’s relation to her writing, modernism/postmodernism, literature and the market, technology and the novel, how to organize or periodize the second half of the twentieth century. T 9:25–11:15

ENGL 942a/AFAM 807a, African American Literary Criticism and Theory  
Jacqueline Goldsby
In this course we survey works that have shaped current research and critical debates in African American literary studies. What categories and methods of analysis presently structure the field’s critical imaginary? What texts — or, more precisely, what kinds of
texts—comprise the canon of African American literary studies, and what theoretical cases are made for those works of art? How might these projects lead you to shape your own critical pursuits? Studies may include Elizabeth McHenry on the literary societies and reading practices among free blacks during slavery; Daphne Brooks on transatlantic “performances of freedom” during the late nineteenth and early twentieth centuries; Brent Edwards on the Harlem Renaissance’s translation to (and reconfiguration in) the scene of 1920s Paris; Lawrence Jackson’s “narrative history” of mid-twentieth-century African American writing; Candice Jenkins on the “politics of respectability” in contemporary black women’s writing; Madhu Dubey on the anxieties and aesthetics that animate black postmodern fiction; Kenneth Warren on the politics of canon formation and periodization. Also, since the Birmingham School’s cultural studies approach has proven decisive to the field’s development in the past two decades, we discuss its migration from England to the U.S. academy through select works by Stuart Hall, Hazel Carby, and Paul Gilroy. We read mostly monographs. Article-length works are defined through independent reading shaped by students’ research interests. Students write three short book reviews, lead class discussions, and submit a longer review essay.

ENGL 948bu/AFAM 588bu/AMST 710bu, Autobiography in America Robert Stepto

At least a dozen North American autobiographies are studied, mostly from the “American Renaissance” to the present. Discussion of various autobiographical forms and strategies as well as of various experiences of American selfhood and citizenship. Slave narratives, spiritual autobiographies, immigrant narratives, autobiographies of childhood or adolescence, relations between autobiography and class, region, or occupation.

ENGL 962b/CPLT 914b, Drama, Performance, Mass Culture Joseph Roach

Taking account of the genealogy of modern drama in eighteenth-century performance, this seminar considers critical theories of the culture industry in relationship to selected canonical plays and popular theater-historical events from The Beggar’s Opera (1728) to The Threepenny Opera (1928). Topics include the transformation of classical genres into the drame, the commercialization of leisure through the mass-marketing of vicarious experience, and the emerging culture of celebrity. Critical readings include selections from the Frankfurt School, Walter Benjamin, Bertolt Brecht, Raymond Williams, Roland Barthes, and Jean Baudrillard. Plays are drawn from popular comedies, Sheridan to Shaw (Pygmalion and My Fair Lady), and long-running bourgeois dramas, beginning with Lillo’s The London Merchant.

ENGL 967b/CPLT 694b/HSAR 694b, Edwardian Modernities Tim Barringer, Angus Trumble

This seminar explores the complex and heterogeneous culture of Edwardian Britain and its empire, 1901–1910, and in the following years leading to the First World War. Recent scholarship has emphasized the transitional nature of Edwardian culture. Radical shifts in social, political, and economic structures, and demands for the representation of women, for Indian and Irish independence, coincided with displays of opulence and imperial bravado. New technologies such as the motor car proliferated, and popular culture took on distinctively modern forms through the music halls, illustrated press, gramophone, and cinema. This was the moment of the emergence of distinctively British
forms of modern art, literature, and music. Particular emphasis is placed on relationships between the arts: paintings by Sargent, Orpen, Conder, and Vanessa Bell; the literary work of Hardy, H.G. Wells, and Rudyard Kipling; and music by Elgar, Delius, and Vaughan Williams. Architecture and urbanism in Britain, its colonies, and dominions are also considered. The seminar is organized to coincide with the major exhibition *Edwardian Opulence* at the Yale Center for British Art, and it concludes with a trip to the UK to explore sites and collections especially redolent of the Edwardian era, including London’s imperial institutions, museum architecture and collections, the country houses of Edwin Lutyens, and the gardens of Gertrude Jekyll. W 1:30–3:20

**ENGL 977b/CPLT 680b, Literary Studies and the Critique of Power**  Caleb Smith
Explores how the discipline of literary studies has engaged with the theoretical tradition known as the “critique of power.” Problems of subjectivity and subjection, racial and gendered identities, and the relations between power and knowledge. Readings include major theoretical works as well as a few primary sources and works of literary and cultural criticism. Theorists may include Nietzsche, Foucault, Butler, Deleuze, and others. Literary texts may include works by Sade, Bentham, Harriet Jacobs, and others. TH 1:30–3:20

**ENGL 985a, Meaning and Affect in Literature and Film**  Paul Grimstad
In this course we read and discuss works of fiction, criticism, film, and philosophy in order to address the variable relations between meaning and affect, significance and feeling. What is the relation of meaning to experience in an artwork? Is experience synonymous with affect? How does genre (western, detective story, science-fiction, melodrama, thriller) inflect the relation of meaning to affect? How do such questions intersect with or illuminate the recent “affective turn” in the humanities? Authors may include Hammett, Cavell, Fried, Michaels, Ashton, Pippin, Ngai, Leys, Farber. Screenings may include films by Huston, Ford, Hitchcock, Sirk, Lynch, Malick. M 3:30–5:20

**ENGL 990a, The Teaching of English**  Sam See
An introduction to the teaching of literature and writing with attention to the history of the profession and current issues in higher education. Weekly seminars address a series of issues about teaching: guiding classroom discussion; introducing students to various literary genres; formulating aims and assignments; grading and commenting on written work; lecturing and serving as a teaching assistant; preparing syllabuses and lesson plans. W 3:30–5:20

**ENGL 992a, Advanced Pedagogy**  Janice Carlisle
Training for graduate students teaching introductory expository writing. Students plan a course of their own design on a topic of their own choosing, and they then put theories of writing instruction into practice by teaching a writing seminar. Prerequisite: open only to graduate students teaching ENGL 114.

**ENGL 995a/b, Directed Reading**
Designed to help fill gaps in students’ programs when there are corresponding gaps in the department’s offerings. By arrangement with faculty and with the approval of the DGS.

The European Studies Council formulates and implements new curricular and research programs to reflect current developments in Europe. The geographical scope of the council's activities extends from Ireland to the lands of the former Soviet Union. Its concept of
Europe transcends the conventional divisions into Western, Central, and Eastern Europe, and includes the Balkans and Russia. In 2010 the U.S. Department of Education again designated the council a National Resource Center under its HEA Title VI program. Further information on the council and the Graduate Certificate of Concentration in European Studies is provided under Non-Degree-Granting Programs, Councils, and Research Institutes in this bulletin.

The council administers an M.A. program in European and Russian Studies. This M.A. program is unusual in its embrace of the entire spectrum of European nations and cultures. The requirements permit students to choose a particular national or thematic focus, geared to their individual interests and language skills, while requiring that they acquaint themselves with the traditions and issues associated with the other parts of Europe. Students specializing in Russia and Eastern Europe, for example, will concentrate their efforts in that area, but will also take courses that may concern Europe-wide problems or the countries of Central or Western Europe. In this way, the program translates the political realities and challenges of the post-Cold War era into a flexible and challenging academic opportunity.

Fields of Study
European languages and literatures; economics; history; political science; law; music; sociology and other social sciences.

Special Requirements for the M.A. Degree
When applying to the program, students will specify as an area of primary concentration either (1) Russia and Eastern Europe, or (2) Central and Western Europe. All students must complete sixteen term courses (or their equivalent) in the various fields related to European and Russian studies. E&RS 900, Europe: Who, What, When, Where?, is required in addition to the sixteen courses and should be taken in the first year of the program. E&RS 900 is taken as Satisfactory/Unsatisfactory and may not be taken for audit.

Students are required to take at least one course in at least three of the four fields relevant to the program, specifically, history, literature, social sciences, and law (i.e., three courses altogether). For the purposes of this program, “history” includes history of art, history of science, and history of music. One of the sixteen term courses may be taken for audit. For students focusing on Russia and Eastern Europe, two of the sixteen required courses (excluding language courses) must concern the nations of Central and Western Europe. Conversely, for those focusing on Central and Western Europe, two courses must concern Russia and Eastern Europe.

For the purposes of this program, language courses in European languages count toward the sixteen required courses, even though they have undergraduate course numbers. If students take a course of language study to fulfill degree requirements, the language course may not be taken for audit. Students with previous language preparation may in certain cases receive documentation of their language proficiency on the basis of this work. By the time the degree is completed, all students must demonstrate L4 or better proficiency in two European languages besides English. Those wishing to focus on Russia and Eastern Europe will need to demonstrate knowledge of Russian or an Eastern European language; those focusing on Central and Western Europe will need...
to demonstrate knowledge of one of the appropriate languages. In all cases, students are required to demonstrate proficiency in two European languages by the end of the third term at Yale. The only exception to this rule is completion of the appropriate full sequence of Yale language classes, certified by the Yale instructor or the director of graduate studies. Students who wish to take Yale department examinations in French, German, Italian, Spanish, or other West European languages should register for a complete examination (with reading, oral, and grammar portions) with the appropriate Yale department. Students with Russian competence must receive the grade of 1+ or higher on the ACTFL/ETS Rating Scale as administered by the Slavic Languages and Literatures department at Yale, including reading, oral, and grammar portions. Students with competence in an East European language (such as Polish, Czech, Ukrainian, Hungarian, and others by special arrangement) or other European languages must take Yale department-administered examinations.

In all cases, students will comply with the Policies and Regulations of the Yale Graduate School of Arts and Sciences, especially regarding degree requirements and academic standing.

Through agreements the MacMillan Center has negotiated with the professional schools, the European Studies Council now offers joint master’s degrees with the School of Forestry & Environmental Studies, the Law School, the School of Management, and the School of Public Health. Application for admission must be made both to the Graduate School and to the appropriate professional school, with notation made on each application that this is to be considered for the joint-degree program. Contact the European Studies director of graduate studies (DGS) for up-to-date information.

The Master’s Thesis
A master’s thesis is required. The master’s thesis is based on research in a topic approved by the DGS and advised by a faculty member with specialized competence in the chosen topic. M.A. students must register for E&RS 950, which may count toward the sixteen required courses. E&RS 950 may not be taken for audit. Students may register for an additional independent study to prepare topics and begin research. The master’s thesis must be prepared according to department guidelines and is due in two copies in the student’s second year on an early-April date as specified by the department.

Program materials are available upon request to the European Studies Council, Yale University, PO Box 208206, New Haven CT 06520-8206.

Courses
E&RS 642a, Topics in European and Russian Studies
Each year this course focuses on the specialty of the visiting professor from the École des Hautes Études en Sciences Sociales (France).

E&RS 900a, Proseminar in European and Russian Studies. Europe: Who, What, When, Where?
An interdisciplinary seminar designed to provide broad exposure to key topics in modern European studies. Special attention is given to Eastern and Western Europe as well as the
humanities and social science disciplines. The seminar is framed by some key theoretical questions, including: What are Europe’s boundaries? When and where is “Europe”? Is there a narrative to European history? If so, what is it? What makes a European? Seminar meetings are combined with the Modern Europe Colloquia and feature speakers from the Yale faculty and from other academic institutions. The course is required for all first-year European and Russian Studies M.A. students but is open to all graduate and professional students. W 3:30–5:20

E&RS 940a or b, Independent Study

Director of Graduate Studies
Gerald Shadel (BML 371, 203.785.2475, gerald.shadel@yale.edu)

Professors  Richard Bucala (Internal Medicine), David Chhieng, Young Choi, José Costa (Internal Medicine/Oncology), S. Evans Downing (Emeritus), Gary Friedlaender (Orthopaedics), Earl Glusac (Dermatology), Robert Homer, S. David Hudnall, Michael Kashgarian (Emeritus, Molecular, Cellular & Developmental Biology), Jung Kim (Emeritus), Diane Krause (Laboratory Medicine), Paul Lizardi, Joseph Madri, Nita Jane Maahle (Obstetrics, Gynecology & Reproductive Sciences), Vincent Marchesi (Director, Boyer Center for Molecular Medicine; Cell Biology), Jennifer McNiff (Dermatology), Mark Mooseker (Molecular, Cellular & Developmental Biology), Jon Morrow (Molecular, Cellular & Developmental Biology), Jordan Pober (Immunobiology; Dermatology), David Rimm, Marie Robert (Internal Medicine), John Rose, Gerald Shadel, John Sinard (Ophthalmology), Jeffrey Sklar (Laboratory Medicine), David Stern, Fattaneh Tavassoli (Obstetrics, Gynecology & Reproductive Sciences), A. Brian West

Associate Professors  Marcus Bosenberg (Dermatology), Demetrios Braddock, Janet Brandsma (Comparative Medicine), Shawn Cowper (Dermatology), G. Kenneth Haines III, Liming Hao, Pei Hui, Dhanpat Jain, Yuval Kluger, Christine Ko (Dermatology), Diane Kowalski (Surgery/Otolaryngology), Michael Krauthammer, Gary Kupfer (Pediatrics), Themis Kyriakides, Rossitza Lazova (Dermatology), Robert Means, Wang Min, Gilbert Moeckel, Raffaella Morotti, Vinita Parkash, Manju Prasad, Michael Robek, Antonio Subtil-Deoliveira (Dermatology), Alexander Vortmeyer, Zenta Walther

Assistant Professors  Adebowale Adenrian, Veerle Bossuyt, Natalia Buza, Guoping Cai, Paul Cohen, Akosua Domfeh, Angela Galan, Joanna Gibson, Malini Harigopal, Michael Hurwitz (Yale Cancer Center; Medicine), Anita Huttner, Anita Kamath, Barton Kenney, Sihem Khelifa, Steven Kleinstein, Angelique Levi, Kisha Mitchell, Don Nguyen, Marguerite Pinto, Katerina Politi (Yale Cancer Center), Ozlen Saglam, Constantine Theoharis, Narendra Wajapeyee, Qin Yan

Fields of Study

Fields include molecular and cellular basis of diseases, including cancer; biology, biochemistry, genetics, and pathology of molecules, cells, tissues, and organ systems, including plasma membrane dynamics, mitochondrial dysfunction, signal transduction, and response to stimuli of connective tissue; assembly of viruses and their interactions with animal cells; somatic cell genetics and birth defects; biology of endothelial cells; and computational and high-throughput approaches to understanding disease pathology.
Special Admissions Requirements

A strong background in basic sciences is recommended for applicants to the program, including biology, chemistry through organic and physical chemistry, mathematics through calculus, biochemistry, genetics, or immunology. GRE General Test or MCAT is required.

To enter the Ph.D. program, students apply to an interest-based track, usually the Pharmacological Sciences and Molecular Medicine track, within the interdepartmental graduate program in the Biological and Biomedical Sciences (see the entry on Biological and Biomedical Sciences, under Non-Degree-Granting Programs, Councils, and Research Institutes).

Special Requirements for the Ph.D. Degree

Course requirements Experimental Pathology students must take PATH 650b, Cellular and Molecular Biology of Cancer, and PATH 690a, Molecular Mechanisms of Disease. Three additional courses are required, which can include courses in biochemistry, genetics, immunology, cell biology, and pathology, to be chosen in consultation with the director of graduate studies (DGS), according to the student’s background and interest. All requirements of the Graduate School of Arts and Sciences, including the Honors requirement, must be met. In year one, students must also take a seminar course (one in each term) and do three laboratory rotations. Prior to registering for a second year of study, students must successfully complete PATH 660, Ethics.

Qualifying examination The qualifying examination of the Experimental Pathology graduate program comprises (1) two literature reading periods, (2) a research proposal broadly based on the proposed thesis research project, and (3) an oral exam in which the student is examined by the qualifying exam committee on the research proposal, the reading periods, and general knowledge of experimental pathology. This exam is usually taken in the second term of the second year and is described below.

1. The qualifying examination committee consisting of three faculty members will be chosen to examine the student. At least one of the committee members must have a primary appointment in the Department of Pathology and the thesis adviser is not on the exam committee. The student will read with two committee members and write the research proposal with initial guidance from the third committee member. At the oral exam itself one member of the committee will be selected as the chairperson responsible for documenting the results of the exam for submission to the DGS. Members of the exam committee should have expertise in areas chosen for reading. The exam committee and topics must be approved by the DGS.

2. Prior to the examination, the student will prepare a research proposal of approximately ten pages in the general area of the thesis project. The proposal will consist of the following sections: Specific Aims, Background and Significance, Experimental Plan, and Literature Cited. The proposal should describe three years of work in the topic area by a single postdoctoral fellow (i.e., similar to an NIH postdoctoral fellowship application).
3. All oral exams will follow the same general format. The oral examination will focus on the student’s ability to present and defend the research proposal. The student should come to the exam with a short (30–40 minute) presentation of the thesis-related proposal with visual aids. The actual presentation will take longer since exam committee faculty will interrupt with questions. The committee can also ask questions on topics covered during the reading period and general topics in experimental pathology that will have been covered in courses. The final evaluation by the exam committee faculty takes into account the student’s performance on the examination and performance in lab (based on the adviser’s evaluation, solicited by the DGS). A written summary of the qualifying examination evaluation will be prepared by the examination committee chairperson and submitted to the DGS. If the student does not pass the exam, the committee has the option of recommending an additional course of reading and/or written work. The DGS has final discretion in approving or modifying the recommendations of the committee.

**Prospectus**  Upon successful completion of the qualifying examination, the student will constitute a dissertation committee including at minimum three members in addition to the dissertation/thesis adviser. At least two of the committee members must be Pathology department faculty. The membership of the committee must be approved by the DGS. The student will prepare a written thesis prospectus, consisting of a summary of background information in the field of interest, the specific questions to be answered, a rationale for choosing those questions, and a research plan for addressing those questions. Upon completing the course requirement with at least two terms of Honors, passing the qualifying examination, and submitting a thesis prospectus, students will be admitted to candidacy. This should take place by the end of the third year, and preferably in the second year. Students must then submit a written thesis describing the research and present a thesis research seminar.

**Additional requirements**  There is no foreign language requirement. In accordance with the BBS program, Ph.D. students are expected to participate in two terms (or the equivalent) of teaching.

**M.D./Ph.D. Students**

M.D./Ph.D. students must satisfy the requirements listed above for the Ph.D. with the following modifications: Two laboratory rotations are required. Assisting in teaching of one course is required. With the approval of the DGS and associate dean, some courses taken toward the M.D. degree can be counted toward the five courses required for the Ph.D., although PATH 650b, Cellular and Molecular Biology of Cancer, and PATH 690a, Molecular Mechanisms of Disease, are still required.

**Master’s Degrees**

**M.Phil.**  See Degree Requirements under Policies and Regulations. Awarded only to students who are continuing for the Ph.D. Students are not admitted for this degree.

**M.S.**  Students are not admitted for this degree. On a case-by-case basis and subject to faculty vote, students who are not continuing for the Ph.D. may be considered for this
degree if they have successfully completed the course requirements for the Ph.D. degree (three laboratory rotations, PATH 650b, PATH 660, PATH 690a, three elective courses, and two seminar courses), and received a grade of Honors in at least one core course (i.e., excluding rotations and seminar courses).

Program materials are available upon request to the Director of Graduate Studies, Department of Experimental Pathology, Yale University, PO Box 208023, New Haven CT 06520-8023; Web site, www.yalepath.org/edu/ExPath/index.htm.

Courses

Note: Pathology 600, 616, 617, and 618b are primarily geared toward medical students, but may be taken by graduate students with the permission of the director of medical studies.

PATH 600, Pathological Basis of Human Disease  David Rimm and staff
Fundamental principles underlying the pathological alterations in function and structure that constitute the reaction of the organism to injury. Pathology of diseases involving neoplasia and special organs and systems. Correlation of the clinical and anatomical manifestations is emphasized. For EPH graduate students and MSTP students who are required to take PATH 100 for graduate credit.

PATH 616, Autopsy Pathology  John Sinard and staff
Participation in the autopsy service with members of the house staff in Pathology. Participation in autopsies and the presentation and review of the clinical and anatomical findings of postmortem examinations with senior members of the department. Opportunities exist for correlation studies with previous biopsies, and clinical investigative and cell biologic techniques in relation to necropsy material. Six weeks minimum, full-time. Enrollment limited to two students.

PATH 617, Anatomic Pathology Elective  G. Kenneth Haines and staff
The department offers an elective to medical students in the third and fourth years that provides a broad experience in general diagnostic techniques. Students have opportunities to participate in surgical pathology and cytopathology. A daily diagnostic conference is scheduled for both residents and students. In addition to direct responsibilities in the handling of the cases, the student has opportunities to participate in electron microscopy, immunohistochemistry, molecular diagnostics, and flow cytometry techniques. One or two students every two or four weeks.

PATH 618b, Clinical and Pathologic Correlates in Renal Disease  Gilbert Moeckel
A series of clinical-pathologic conferences designed to illustrate clinicopathologic correlates in renal disease. At each session, one student acts as clinician and another as pathologist in the evaluation and discussion of case material from autopsies or renal biopsies. Discussions are informal, but require preparation in advance and all participants are expected to contribute in each session. One two-hour session per week for six weeks. Given once in spring term. Limited to twelve students.

PATH 620a and b, Laboratory Rotations in Experimental Pathology  Michael Robek
Laboratory rotations for first-year graduate students.
PATH 630b/ENAS 535b, Biomaterial-Tissue Interactions  Themis Kyriakides
The course addresses the interactions between tissues and biomaterials, with an emphasis on the importance of molecular- and cellular-level events in dictating the performance and longevity of clinically relevant devices. In addition, specific areas such as biomaterials for tissue engineering and the importance of stem/progenitor cells, and biomaterial-mediated gene and drug delivery are addressed. TTH 9–10:15

PATH 634a/GENE 734a/MB&B 734a/MBIO 734a, Molecular Biology of Animal Viruses  Robert Means, Daniel DiMaio, I. George Miller, and staff
Lecture course with emphasis on mechanisms of viral replication, oncogenic transformation, and virus-host cell interactions. Class meets every Monday and Wednesday, but only occasional Fridays; see the instructor for additional information. MWF 9–10:15

PATH 650b, Cellular and Molecular Biology of Cancer  David Stern, Qin Yan
A comprehensive survey of cancer research from the cellular to the clinical level. The relation of cancer to intracellular and intercellular regulation of cell proliferation is emphasized, as are animal models for cancer research. Background in molecular genetics and cell biology is assumed. Open to advanced undergraduates with permission of the organizers. MWF 1–2

PATH 660/C&MP 650/PHAR 580, Ethics  Barbara Ehrlich, Michael Robek, Satinder Singh
Organized to foster discussion, the course is taught by faculty in the Pharmacology, Pathology, and Physiology departments and two or three senior graduate students. Each session is based on case studies from primary literature, reviews, and two texts: Francis Macrina’s Scientific Integrity and Kathy Barker’s At the Bench. Each week, students are required to submit a reaction paper discussing the reading assignment. Students take turns leading the class discussion; a final short paper on a hot topic in bioethics is required.

PATH 670b, Biological Mechanisms of Reaction to Injury  Joseph Madri, Michael Kashgarian, Jon Morrow, Jeffrey Sklar
An introduction to human biology and disease as a manifestation of reaction to injury. Topics include organ structure and function, cell injury, circulatory and inflammatory responses, disordered physiology, and neoplasia.

PATH 680a/C&MP 630a/PHAR 502a, Seminar in Molecular Medicine, Pharmacology, and Physiology  Sven-Eric Jordt, Don Nguyen, Susumu Tomita
Readings and discussion on a diverse range of current topics in molecular medicine, pharmacology, and physiology. The class emphasizes analysis of primary research literature and development of presentation and writing skills. Contemporary articles are assigned on a related topic every week, and a student leads discussions with input from faculty who are experts in the topic area. The overall goal is to cover a specific topic of medical relevance (e.g., cancer, neurodegeneration) from the perspective of three primary disciplines (i.e., physiology: normal function; pathology: abnormal function; and pharmacology: intervention). M 3–5
PATH 690a, Molecular Mechanisms of Disease  Michael Robek
This course covers aspects of the fundamental molecular and cellular mechanisms under-
lying various human diseases. Many of the disorders discussed represent major forms
of infectious, degenerative, vascular, neoplastic, and inflammatory disease. Additionally,
certain rarer diseases that illustrate good models for investigation and/or application of
basic biologic principles are covered in the course. The objective is to highlight advances
in experimental and molecular medicine as they relate to understanding the pathogenesis
of disease and the formulation of therapies. TTH 2–3:30
FILM STUDIES
53 Wall Street, Rm. 216, 203.436.4668
www.yale.edu/filmstudiesprogram
M.Phil., Ph.D.

Chair
John MacKay

Director of Graduate Studies
Francesco Casetti (53 Wall St., Rm. 213, francesco.casetti@yale.edu)

Professors  Dudley Andrew,* Francesco Casetti,* Katerina Clark,* J.D. Connor,*
Aaron Gerow,* David Joselit,* Thomas Kavanagh,* John MacKay,* Millicent

Roach

*Member of the Graduate Committee

Fields of Study
Film Studies is an interdisciplinary field drawing on the study of the history of art,
national cultures and literatures, literary theory, philosophy, anthropology, feminist and
queer studies, race and representation, and other areas. To study film at Yale, every doc-
toral student must be accepted into a combined program involving another discipline.
Film Studies offers a combined Ph.D. with African American Studies, American Studies,
Comparative Literature, East Asian Languages and Literatures, English, French, German,
History of Art, Italian, and Slavic Languages and Literatures. In addition to acquiring a
firm grounding in the methods and core material of both film studies and another dis-
cipline, the candidate is advised to coordinate a plan of study involving comprehensive
knowledge of one or more areas of specialization. Such areas include:
1. Historiography, including archival history, history of technology, silent film.
3. European film: British-Irish, French, German and Nordic, Italian, Slavic.
5. World film: global image exchange; cinema in Asia, Latin America, and Africa.
6. Documentary as an aesthetic, cultural, and ideological practice.
7. Cinema in its relations with other arts and other media.
8. Screen cultures, screened images, post-cinema, theory and history of media.
Through course work, examinations, and the dissertation, the candidate links a film specialty with material and methods coming from the participating discipline. Directors of graduate studies from both programs monitor the candidate’s plans and progress.

**Special Admissions Requirements**

Combined-program applicants should familiarize themselves fully not only with the Film Studies entrance requirements but with those of the other graduate program as well. Since combined-program applicants must be admitted by both Film Studies and the other department, candidates should make sure that the material they submit with the application clearly addresses the requirements and mission of both graduate programs.

The application for Film Studies is administered by the Office of Graduate Admissions. All applications are to be completed online and can be accessed by visiting its Web site at www.yale.edu/graduateschool/admissions. In the “Programs of Study” section of the application, the applicant should do the following: choose Film Studies in Step 1 and the combined department in Step 3. All applications including writing samples are read by the admissions committees in both units.

**Special Requirements for the Ph.D. Degree**

Every student selected for the combined program is subject to the supervision of the Film Studies program and the relevant participating department. A written protocol between each department and Film Studies outlines the requirements and schedule to be borne in mind as a plan of study is worked out in consultation with the director of graduate studies of Film Studies and the director of graduate studies of the participating department. In all cases, students are required to take two core seminars in Film Studies (FILM 601 and FILM 603) as well as at least four additional Film Studies seminars. Course requirements vary for participating departments but comprise a total of sixteen courses (fourteen for American Studies, fifteen for History of Art). A student advances to candidacy by completing a qualifying examination and a dissertation prospectus.

1. Qualifying examinations follow the regulations of the participating department with at least one member of the Film Studies Graduate Committee participating.
2. The dissertation prospectus is presented to a faculty committee involving at least one member of the other department who is not a member of the Film Studies Graduate Committee and may include the entire faculty of that other department. The prospectus is also circulated to the entire Film Studies Graduate Committee for their information and ratification. Once the student and dissertation adviser deem the dissertation finished or near completion, a defense shall be held involving at least one member of the Film Studies Graduate Committee and one member of the participating department who is not on that committee.

The faculty in Film Studies considers participation in the Teaching Fellows Program to be essential to the professional preparation of graduate students. Students normally teach in years three and four. Every student is expected to serve two assignments as a teaching fellow, preferably in film courses such as Introduction to Film; Film Theory; World Cinema.
Master’s Degree

M.Phil.  See Degree Requirements under Policies and Regulations.

Courses

FILM 603b/AMST 814b, Historical Methods in Film Study  Charles Musser
A range of historiographic issues in film studies, including the roles of technology, exhibition, and spectatorship. Topics include intermediality and intertextuality. Consideration of a range of methodological approaches through a focus on international early cinema and American race cinema of the silent period. Particular attention to the interaction between scholars and archives. TH 1:30–3:20, screenings W 7

FILM 635b/ITAL 596b, New Italian Cinema  Millicent Marcus
The course is dedicated to an examination, at once panoramic and detailed, of Italian filmmaking since the year 2000. Despite dire predictions of the medium’s decline, new developments and emerging talents have contributed to a revival of the cinematic art within the context of a constantly changing cultural environment. The course is organized around a series of case studies that reveal the rise of new auteurs, the formation of generic trends, and the updating of the traditions and conventions that typified an earlier age. Of special interest is the “postmodernization” of filmic language and its problematic relationship to the tradition of realism, with its imperative to civic “reference.” Technological issues, above all the shift from analog to digital filmmaking, are among our concerns in the course. We screen a film each week and devote the seminar to a close interpretation of the work, making extensive use of video clips, and relating our analysis to the theoretical and critical issues that necessarily arise. A tentative list of the films includes I cento passi; La finestra di fronte; Il Divo; Gomorrah; Il vento fa il suo giro; Buongiorno, notte; Romanzo criminale; Fame chimica; and, in a flashback to the 1990s, Caro diario. TH 3:30–5:20, screenings W 7:30

FILM 641bu/ANTH 602bu, Ethnographic Filmmaking and Visual Field Methods  Karen Nakamura
Intensive seminar workshop on visual anthropology production and analysis. Readings include core texts in the analysis of visual culture as well as visual anthropology field methods. Students produce a short ethnographic film, ethnophotographic essay, or article on visual culture. TH 1:30–3:20

FILM 704a/CPLT 647a/HSAR 647a, Perspectives on the Panorama  Tim Barringer, Katie Trumpener
This course explores the cultural, aesthetic, and historical significance of the panorama. The first panoramas were massive 360-degree paintings generating a sense of immersion in an event or environment. Later panoramas took many shapes, anticipating the formats of photography, film, and digital imagery. We treat the panorama as a utopian, imperial, and didactic medium, tracing its cultural impact on painting, literature, popular culture, and contemporary art. We devote particular attention to its afterlife in cinema, from the earliest moving pictures to postwar experimental works and a long series of feature films with key panoramic sequences. T 1:30–3:20
FILM 712bu/AFAM 673bu, The Filmworks of Spike Lee  Terri Francis
Survey of Spike Lee’s films and writings, in the contexts of African American cultural movements and American independent films. TH 3:30–5:20, screenings W 7–9:30

FILM 715a/AFAM 717a, African American Cinema  Terri Francis
A survey of African American cinema from Oscar Micheaux’s *Within Our Gates* (1919) to Julie Dash’s *Daughters of the Dust* (1991) and beyond. Topics include the concept of a black aesthetic, the relationship between commercial and independent filmmaking practices, and the question of genre. TH 3:30–5:30, screenings M 7–9

FILM 718bu/CPLT 902b/GMAN 636bu, Theatricality in Film  Brigitte Peucker
Examination of the multiple implications of theatricality in and for the cinema. Theatricality as excess; the appropriation of theatrical modes for film; theatricality as modernist self-reflexivity; performance and the relation of theatricality to subjectivity (performing the self); ritual and reenactment in film; theatricality and the real; the material image. T 3:30–5:20

FILM 719b/AFAM 734b/WGSS 632b, Film Race Gender  Terri Francis
Film aesthetics and intellectual history of African American cinema. Shifting views on race/racism and gender/sex/sexism within the overall context of the Hollywood industry. American independent/experimental filmmaking practices and African diaspora aesthetics. African American cinema as a case of cross-cultural contact, complicity, and creativity. Issues of stereotypes, authorship, and performance. Shared problematics and passions between African American film and literature. Film positioned less as a window and more as a palimpsest, a refracting medium with its own aesthetics and, within its own traditions, working over “race” and perceptions of particular cultures through plot devices, lighting, and sound, in particular, often in unexpected ways. Films alongside materials drawn from film, drama, literature, social history, journalism, television, photography, painting, dance, and other arts. Special unit on Josephine Baker, embodying the crucial conceptual bridge between black modernism and primitivism and between American race films and European colonial films. Baker through the lens of a recast Harlem Renaissance that emphasizes the modernist concerns of the body, life as art, migration, memory, and intercultural collaboration in a multidisciplinary canon. Readings from canonical, controversial, and recent publications in African American studies, film and media studies, and gender/sexuality studies. Oscar Micheaux and his circle, the L.A. Rebellion, “New” Black Cinema, and beyond. W 3:30–5:20

FILM 720a, Media Shifts and the U.S. Presidential Elections, 1892–2012  Charles Musser
Explores the changing media formations with which U.S. presidential campaigns have been pursued, focusing on audiovisual media at moments when they undergo fundamental transformations: from lantern shows to cinema in 1892/1896, from film to television in 1948/1952, and from cinema/DVDs to YouTube/Web 2.0 in 2004/2008. The course also examines the uses of audiovisual media during the current (2012) U.S. presidential campaign. T 3:30–5:20, screenings M 7–10
FILM 732a/ITAL 595a, Cinematic Neorealism  Millicent Marcus
The course considers the complex relationship between the theory and practice of Italian cinematic neorealism. We screen a film weekly and analyze it in the context of an evolving theoretical paradigm, beginning with Rossellini’s Open City (1945) and Paisan (1946), and flashing back to the proto-neorealist Ossessione (Visconti, 1943). We devote a great deal of attention to De Sica’s contributions to neorealism, including Shoeshine (1946), Bicycle Thief (1948), Miracle in Milan (1951), and Umberto D (1952), in addition to De Santis’s Bitter Rice (1949) and Visconti’s La terra trema (1948). The course also includes a study of the movement’s afterlife in Bellissima (Visconti, 1951), and the later revisitations of neorealism in Icicle Thief (Nichetti, 1989) and Celluloide (Lizzani, 1996), before concluding with Gianni Amelio’s Stolen Children (1992), which has been hailed as the harbinger of a realist revival in the 1990s. In English. M 3:30–5:20, screenings TH 7:30

FILM 735aU and 736bU/AMST 832aU and 833bU, Documentary Film Workshop  Charles Musser
This workshop in audiovisual scholarship explores ways to present research through the moving image. Students work within a Public Humanities framework to make a documentary that draws on their disciplinary fields of study. Designed to fulfill requirements for the M.A. in Public Humanities. W 12:30–3:20, screenings T 7

FILM 771b/CPLT 569b/RUSS 750b, Montage, Collage, and Political Art  John MacKay
Monuments of early Soviet film and their relationship to political-aesthetic debates surrounding montage and collage practice. Theories of montage; montage practices across the arts; twentieth-century conceptions of political art; debates about montage/collage practice and avant-gardism since World War II. M 3:30–5:20

FILM 807a/HSAR 710a, Hollywood Classicism: Movies and Methods  J.D. Connor
Representative films in light of canonical and contemporary scholarship. Debates over classicism (rules, norms, subversion); authors (director, star, studio, genre); systematicity (origins, efflorescence, breakdown, and integration); aesthetics; and social and cultural determinants of production and reception. TH 1:30–3:20

FILM 828b/CPLT 527b/RUSS 746b, Art and Ideology  Katerina Clark
Examination of texts identified as ideological art, focusing on the relationship between the conventions they use and the ideology they seek to advance. Theoretical readings include works by Benjamin, Jameson, Lukács, Bakhtin, Marx, Althusser, and Judith Butler; literary works by Balzac, Tretiakov, Ostrovsky, Orwell, Koestler, and others; films by Eisenstein, Leni Riefenstahl, and others. W 1:30–3:20

FILM 829, Post-Cinema: Textuality, Spectatorship, Apparatus  Francesco Casetti
This seminar analyzes the transformation of cinema after the media convergence. Attention is placed on the new formats and new languages that characterize films—and that challenge the very notion of film as text. The seminar also explores the new scopic regimes that move the spectator away from his/her traditional role, making him/her “perform” his/her vision. The notion of apparatus is reexamined in the light of the new technical devices and the new spatial environments in which the filmic vision is caught.
FILM 871b/JAPN 871b, Readings in Japanese Film Theory  Aaron Gerow
Theorizations of film and culture in Japan from the 1910s to the present. Through readings in the works of a variety of authors, the course explores both the articulations of cinema in Japanese intellectual discourse and how this embodies the shifting position of film in Japanese popular cultural history. T 1:30–3:20, with screenings

FILM 881a/JAPN 587aU, Japanese Cinema after 1960  Aaron Gerow
The development of Japanese cinema after the breakdown of the studio system, through the revival of the late 1990s, and to the present. MW 2:30–3:45, screenings W 7–9:30

FILM 900, Directed Reading

FILM 901, Individual Research
FORESTRY & ENVIRONMENTAL STUDIES

Kroon Hall, 203.432.5100
http://environment.yale.edu
M.S., M.Phil., Ph.D.

Dean
Peter Crane

Director of Doctoral Studies
David Skelly (208 Kroon, 203.432.3603, david.skelly@yale.edu)

Professors  Mark Ashton, Michele Bell, Gaboury Benoit, Graeme Berlyn, Benjamin Cashore, Peter Crane, Michael Dove, Daniel Esty (on leave), Thomas Graedel, Timothy Gregoire, Xuhui Lee, Robert Mendelsohn, Chadwick Oliver, Peter Raymond (on leave [Sp]), James Saiers, Oswald Schmitz, David Skelly, John Wargo

Associate Professors  Robert Bailis, Marian Chertow (on leave [Sp]), Matthew Kotchen, Karen Seto, Julie Zimmerman

Assistant Professors  Mark Bradford, Alexander Felson (on leave [F]), Kenneth Gillingham, Karen Hébert, Nadine Unger (on leave)

Non-Ladder Faculty  Paul Anastas, Shimon Anisfeld, Richard Burroughs, Ann Camp, Carol Carpenter, Susan Clark, Amity Doolittle, Paul Draghi, Helmut Ernstberger, Gordon Geballe, Bradford Gentry, John Grim, Arnulf Grubler, Anthony Leiserowitz, Reid Lifset, Florencia Montagnini, Rajendra Pachauri, Jonathan Reuning-Scherer, Mary Evelyn Tucker

Courtesy Joint Appointments  Michelle Addington, Ruth Blake, Kelly Brownell, Adalgisa (Gisela) Caccone, David Cromwell, Gary Desir, Michael Donoghue, Menachem Elimelech, Durland Fish, Willis Jenkins, Douglas Kysar, Brian Leaderer, William Mitch, William Nordhaus, Jeffrey Powell, Richard Prum, Eric Sargis, James Scott, Kalyanakrishnan Sivaramakrishnan, Ronald Smith, Harvey Weiss, Ernesto Zedillo

Visiting Faculty, Fellows, Adjunct Faculty, and Faculty with primary appointments elsewhere  Maureen Burke, Douglas Daly, Mary Beth Decker, William Ellis, Ona Ferguson, Michael Ferrucci, James Fickle, Lawrence Kelly, Katherine Kennedy, Yehia Khalil, Roy Lee, Lin Heng Lye, James Lyons, James MacBroom, David Mattson, Fabian Michaelangeli, Julie Newman, John Nolon, Michael Northrop, Christine Padoch, Charles Peters, Stephen Ramsey, Nicholas Robinson, Marjorie Shansky, Deborah Spalding, Dennis Stevenson, Fred Strebeigh, Charles Dana Tomlin, William Vance, Ina Vanderbroek

Fields of Study

Fields include agroforestry; biodiversity conservation; biostatistics and biometry; climate science; community ecology; ecosystems ecology; ecosystems management; environmental anthropology; environmental biophysics and meteorology; environmental
chemistry; environmental ethics; environmental governance; environmental health risk assessment; environmental history; environmental law and politics; environmental and resource policy; forest ecology; hydrology; industrial ecology; industrial environmental management; plant physiology and anatomy; pollution management; population ecology; resource economics; energy and the environment, silviculture, social ecology; stand development, tropical ecology and conservation; urban planning; water resource management; environmental management and social ecology in developing countries; urban ecology.

**Special Admissions Requirements**

Applicants should hold a bachelor’s or master’s degree in a field related to natural resources, such as forestry, or in a relevant discipline of the natural or social sciences, such as biology, chemistry, economics, or mathematics. The GRE General Test is required but Subject Tests are optional.

**Special Requirements for the Ph.D. Degree**

Students are required to take the Doctoral Student Seminar before the second term of their program. Aside from this requirement, there is no required curriculum of credit courses and no formal language requirement. Courses of study are individually designated through consultation between degree candidates and their advisers and dissertation committees. The amount of course work required will depend on the previous training of the student, but the normal requirement for a student with no previous graduate training is three or four courses per term for four terms. The program of each student will be evaluated at the end of the first year of residence. At least two term grades of Honors are required in the first two years of study; however, it is anticipated that grades of Honors or High Pass will be achieved in two-thirds of all courses taken. A written and oral qualifying examination is required upon completion of the course requirements. Students are expected to take the examination by the end of their second year, although this can be extended to the third year in cases with appropriate extenuating circumstances. At the time of the qualifying examination, the student must present a prospectus of the research work proposed for the dissertation. Successful completion of the qualifying examination and submission of the prospectus will result in admission to candidacy. Upon completion of the dissertation, the candidate must make unbound copies of the dissertation available to the faculty and appear for an oral examination at a time and place designated by the director of doctoral studies. Copies of the approved dissertation must be submitted to the Graduate School. Depending upon the nature of the dissertation topic, completion of the Ph.D. degree normally requires four years.

Teaching and research experiences are regarded as integral parts of the graduate training program in Forestry & Environmental Studies. All students are required to serve as teaching fellows (10 hours per week) for four terms. The nature of the teaching assignment is determined in cooperation with the student’s major adviser and the director of doctoral studies.

In addition to all other requirements, students must successfully complete E&EB 545b, Problems in Bioethics/Ethics Course for Advanced Topics, prior to the end of their first year of study.
Master's Degrees

M.Phil. (en route to the Ph.D.) Students may petition for this degree after they have passed the qualifying exam and advanced to candidacy. Applications for this master’s degree are not accepted.

M.S. (en route to the Ph.D.) This degree is normally granted only to students who are withdrawing from the Ph.D. program. Applications for this master’s degree are not accepted. Requirements that must be met for award of the M.S. are (1) successful completion of two years of course work in residence with two grades of Honors; (2) a written prospectus; (3) fulfillment of one term of the teaching requirement.

For information on the terminal master’s degrees offered by the Yale School of Forestry & Environmental Studies (the Master of Forestry, Master of Forest Science, Master of Environmental Management, and Master of Environmental Science degrees), visit the School's Web site, www.yale.edu/environment, or contact Admissions Director, Yale School of Forestry & Environmental Studies, 195 Prospect Street, New Haven CT 06511.

Courses

For course descriptions, see the School of Forestry & Environmental Studies bulletin, available online in both html and pdf versions at www.yale.edu/bulletin.

FOUNDATIONS
[F&ES 500a, Landscape Ecology]
F&ES 505a, Economics of the Environment
F&ES 510a, Introduction to Statistics in the Environmental Sciences
F&ES 515a, Physical Sciences for Environmental Management
F&ES 520a/ANTH 581a, Society and Environment: Introduction to Theory and Method
F&ES 525a, The Politics and Practice of Environmental and Resource Policy
F&ES 530a, Ecosystems and Landscapes

INTEGRATIVE FRAMEWORKS
F&ES 600b, Linkages of Sustainability
F&ES 610a, Science to Solutions: How Should We Manage Water?
[F&ES 620b, Integrative Assessment]

CAPSTONE
[F&ES 950a, Life Cycle Assessment Practicum]
[F&ES 951b, Managing the Global Carbon Cycle]
[F&ES 952b, Property Rights and Natural Resource Management]
F&ES 953a,b, Business and the Environment Consulting Clinic
F&ES 954a, Management Plans for Protected Areas
F&ES 955a,b, Seminar in Research Analysis, Writing, and Communication
F&ES 963b, Payments for Ecosystem Services
[F&ES 964b, Large-Scale Conservation: Integrating Science, Management, and Policy]
[F&ES 965b, Advanced Readings: Social Science of Development and Conservation]
F&ES 966b, The Entrepreneurial Approach to Environmental Problem Solving
[F&ES 969b, Rapid Assessments in Forest Conservation]

**ECOLOGY**

**Ecosystem Ecology**
[F&ES 730a/E&EB 630a, Ecosystem Ecology]
F&ES 731b, Tropical Field Botany
F&ES 732a, Tropical Forest Ecology
F&ES 733b, Ecosystem Pattern and Process
F&ES 734a, Biological Oceanography
[F&ES 735a, Biogeography and Conservation]
F&ES 741b, Introduction to Indigenous Silviculture

**Wildlife Ecology and Conservation Biology**
[F&ES 736b, Ecology Seminar]
[F&ES 738a, Aquatic Ecology]
F&ES 739b, Species and Ecosystem Conservation: An Interdisciplinary Approach
F&ES 740b, Dynamics of Ecological Systems

**Environmental Education and Communication**
F&ES 745a, Environmental Writing
F&ES 746a, Archetypes and the Environment
F&ES 747a, Global Communication Skills
F&ES 900a, Doctoral Student Seminar

**FORESTRY**

**Forest Biology**
F&ES 650b, Fire: Science and Policy
F&ES 651b, Forest Ecosystem Health
[F&ES 652b, Seminar in Ecological Restoration]
[F&ES 653b, Agroforestry Systems: Productivity, Environmental Services, and Rural Development]
F&ES 654a/MCDB 660a, Structure, Function, and Development of Trees and Other Vascular Plants
[F&ES 655b, Research Methods of the Anatomy and Physiology of Trees]
F&ES 656b, Physiology of Trees and Forests
F&ES 671a, Natural History and Taxonomy of Trees

**Forest Management**
F&ES 657b, Managing Resources
F&ES 658a, Global Resources, International Resource Exchanges, and the Environment
F&ES 659b, Principles in Applied Ecology: The Practice of Silviculture
F&ES 660a, Forest Dynamics: Growth and Development of Forest Stands
F&ES 661b, Analysis and Development of Silvicultural Prescriptions
F&ES 663b, Invasive Species: Ecology, Policy, and Management
F&ES 668b, Field Trips in Forest Resource Management and Silviculture
F&ES 669b, Forest Management Operations for Professional Foresters
F&ES 670b, Southern Forest and Forestry Field Trip
F&ES 680a, Forest and Ecosystem Finance
PHYSICAL SCIENCES

Atmospheric Sciences
F&ES 700b, Alpine, Arctic, and Boreal Ecosystems Seminar
F&ES 701b, Climate Change Policy and Science Seminar
[F&ES 702b, Climate Change Seminar]
[F&ES 703b, Climate and Life]
F&ES 704a, An Atmospheric Perspective of Global Change
[F&ES 705b, Climate and Air Pollution]
[F&ES 722b, Boundary Layer Meteorology]
[F&ES 771a, Climate Modeling]

Environmental Chemistry
F&ES 706b, Organic Pollutants in the Environment
F&ES 707b<sub>u</sub>/ENAS 640b, Aquatic Chemistry
F&ES 708a, Biogeochemistry and Pollution
F&ES 743a<sub>u</sub>, Environmental Chemical Analysis
F&ES 773a, Air Pollution
F&ES 777b, Water Quality Control

Soil Science
F&ES 709a, Soil Science
[F&ES 723b, Seminar in Soil Conservation and Management]

Water Resources
F&ES 710b, Coastal Governance
[F&ES 712b, Water Resource Management]
F&ES 713a, Coastal Ecosystems: Natural Processes and Anthropogenic Impacts
F&ES 714b/ENAS 646b, Environmental Hydrology
F&ES 719a, River Processes and Restoration
[F&ES 724b, Watershed Cycles and Processes]
F&ES 729b, Caribbean Coastal Development: Cesium and CZM

QUANTITATIVE AND RESEARCH METHODS
F&ES 550a, Natural Science Research Methods
F&ES 551a, Social Science Qualitative Research Methods
F&ES 552b, Master's Student Research Colloquium
F&ES 725a, Remote Sensing of Land Cover and Land Use Change
F&ES 726b/ARCG 762b<sub>u</sub>/EMD 548b/G&G 62b<sub>u</sub>, Observing Earth from Space
F&ES 751a, Sampling Methodology and Practice
F&ES 753b, Regression Modeling of Ecological and Environmental Data
F&ES 755b, Modeling Geographic Space
F&ES 756a, Modeling Geographic Objects
[F&ES 757b, Statistical Design of Experiments]
F&ES 758b, Multivariate Statistical Analysis in the Environmental Sciences
[F&ES 780a, Seminar in Forest Inventory]
F&ES 781b/STAT 674b, Applied Spatial Statistics
SOCIAL SCIENCES

Economics
F&ES 800b, Energy Economics and Policy Analysis
F&ES 802b, Valuing the Environment
[F&ES 803b, Green Markets: Voluntary and Information Approaches to Environmental Management]
F&ES 804a, Economics of Natural Resource Management
F&ES 805a,b, Seminar in Environmental and Natural Resource Economics
F&ES 806b, Economics of Pollution Management
F&ES 890a/MGT 820a, Energy Markets Strategy
F&ES 904a, Doctoral Seminar in Environmental and Energy Economics
[F&ES 905b, Doctoral Seminar in Environmental Economics]

Environmental Policy
F&ES 807a/MGT 688a, Environmental Management and Strategy
F&ES 814a, Energy Systems Analysis
[F&ES 815a, The New Corporate Social Responsibility: Public Problems, Private Solutions, and Strategic Responses]

**FRENCH**

82-90 Wall Street, 3d floor, 203.432.4900  
www.yale.edu/french  
M.A., M.Phil., Ph.D.

**Chair**  
Alice Kaplan

**Director of Graduate Studies**  
Christopher L. Miller (82-90 Wall St., Rm. 322, 203.432.4466)

**Professors** R. Howard Bloch (*on leave*), Edwin Duval, Marie-Hélène Girard (*Visiting*), Alice Kaplan, Thomas Kavanagh (*on leave [Sp]*)

**Assistant Professors** Thomas Connolly, Christopher Semk (*on leave*), Edwige Tamalet Talbayev, Yue Zhuo

**Lecturer** Jonathan Cayer

**Affiliated Faculty** Dudley Andrews (*Film Studies*), Carol Armstrong (*History of Art*), John Merriman (*History*), Charles Walton (*History*)

**Fields of Study**  
Fields include French literature, criticism, theory, and culture from the early Middle Ages to the present, and the French-language literatures of Africa, the Caribbean, and the Maghreb.

**Special Admissions Requirements**  
A thorough command of French is expected, as well as a good preparation in all fields of French literature. Applicants should submit a twenty-page writing sample in French. This can consist of one twenty-page paper or several shorter papers that total twenty pages.

**Special Requirements for the Ph.D. Degree**

(1) Candidates must demonstrate a reading knowledge of Latin (or, with approval, of Arabic or Creole) and a second language by passing department-administered examinations, Yale undergraduate courses, or Yale Summer Language Institute courses with at least a B or High Pass grade. Students must fulfill the Latin requirement before the beginning of their third term of study. The other language requirement must be satisfied before the beginning of the fifth term, and before the oral qualifying examination.  

(2) During the first two years of study, students normally take sixteen term courses. These must include Old French and at least two graduate-level term courses outside the department. They may include one term of a language course (Latin or other) taken as a means of fulfilling one of the language requirements, and as many as four graduate-level term courses outside the department. A grade of Honors must be obtained in at least four of the sixteen courses, two or more of which must be in courses offered by the department.
(3) A qualifying oral examination takes place during the sixth term. The examination is designed to demonstrate students’ mastery of the French language, their knowledge and command of selected topics in literature, and their capacity to present and discuss texts and issues. (4) After having successfully passed the qualifying oral examination, students are required to submit a dissertation prospectus for approval, normally no later than the end of the term following the oral examination.

In order to be admitted to candidacy for the Ph.D., students must complete all pre-dissertation requirements, including the prospectus. Students must be admitted to candidacy by the end of the seventh term.

Teaching is considered an integral part of the preparation for the Ph.D. degree, and all students are required to teach for at least one year. Opportunities to teach undergraduate courses normally become available to candidates in their third year, after consideration of the needs of the department and of the students’ capacity both to teach and to fulfill their final requirements. Prior to teaching, students take a language-teaching methodology course.

**Combined Ph.D. Program**

The French department also offers three combined Ph.D.s: one in French and African American Studies (in conjunction with the Department of African American Studies), one in French and Renaissance Studies (in conjunction with the Renaissance Studies Program), and one in French and Film Studies (in conjunction with the Film Studies Program). Students in both of these combined degree programs are subject to all the requirements for a Ph.D. in French. In addition, they must fulfill certain requirements particular to the conjoined program.

The combined Ph.D. in French and African American Studies is most appropriate for students who intend to concentrate in and write a dissertation on the literature of the francophone Caribbean. Students must complete two core courses in African American Studies and a third year colloquium. For this degree, the French department’s requirement for a language in addition to Latin will normally be filled by demonstrating reading competence in a Creole language of the Caribbean or in Spanish. The students’ oral examinations normally include two topics of African American content. The dissertation prospectus must be approved by the director of graduate studies both in the French department and in African American Studies, and final approval of the dissertation must come from both departments. For further details see African American Studies.

Students in the combined Ph.D. program in French and Renaissance Studies will take nine classes in French and seven in Renaissance Studies. Students must learn Latin and Italian. The oral examination will consist of seven topics: four in French and three in Renaissance Studies. Both the dissertation prospectus and the final dissertation must be approved by the French department and the program in Renaissance Studies. For further details see Renaissance Studies.

For students in the combined Ph.D. program in French and Film Studies, the oral examination will normally include one topic on film theory and one on French film. Both the dissertation prospectus and the final dissertation must be approved by the French department and the program in Film Studies. In addition, Film Studies requires a dissertation defense. For further details see Film Studies.
Master’s Degrees

**M.Phil.** See Degree Requirements under Policies and Regulations. Additionally, students in French are eligible to pursue a supplemental M.Phil. degree in Medieval Studies. For further details, see Medieval Studies.

**M.A. (en route to the Ph.D.)** Students enrolled in the Ph.D. program may petition for the M.A. degree after a minimum of one year of study in residence, upon completion of the Latin requirement, and of eight courses, of which at least six are in French. Two grades of Honors in French graduate courses are required.

Program materials are available upon request to the Administrative Assistant to the Director of Graduate Studies, Department of French, Yale University, PO Box 208251, New Haven CT 06520-8251.

Courses

[FREN 610a, Old French]

FREN 751a, **Rousseau**  Thomas Kavanagh  
This seminar examines the relation between Rousseau the literary figure and Rousseau the political philosopher. Reading such works as *La Nouvelle Héloïse*, *Les Confessions*, and *Les Rêveries* on the one hand, and the two *Discours*, *Émile*, *Du contrat social*, and the *Essai sur l’origine des langues* on the other, we aim at understanding Rousseau’s paradoxical relation to what has come to be called the Enlightenment. M 9:25–11:15

FREN 828b, **Les Années 30 du XVIème siècle**  Edwin Duval  
Focus on the literature of a watershed decade, in which we find the first expressions of a conscious break with the newly invented and disparagingly named Moyen Âge. Readings include the first printed works by three great writers of the new modern age that will eventually come to be called the Renaissance: François Rabelais, Marguerite de Navarre, and Clément Marot. W 1:30–3:20

FREN 833b/CPLT 695b, **Montaigne and the Essay Tradition**  David Quint  
The course covers most of Montaigne’s *Essais*, including all of the essays of the Third Book and the “Apologie de Raimond Sebond.” Attention is paid to the literary form of the essays as well as to their historical context and their models (Seneca, Plutarch, Erasmus). The end of the course looks at Montaigne’s English imitators (Bacon, Browne, Cornwallis). T 1:30–3:20

FREN 880b, **Le poème en prose**  Thomas Connolly  
This seminar looks at the development of the poème en prose, from its beginnings as a response to the inadequacy of French verse forms, which were said to lend themselves poorly to the translation of ancient epic, to its emergence as an independent genre. What constitutes a prose poem, and why do we need to distinguish it from prose, poetry, and even poetic prose? Readings include work by Fénelon, Parny, Baudelaire, Bertrand, Rimbaud, Laforgue, Nerval, Mallarmé, Jacob, Michaux, Ponge, and Char, as well as Hölderlin, Poe, and Rilke. M 9:25–11:15
FREN 803a/CPLT 809a, Realism and Naturalism  Maurice Samuels
This seminar interrogates the nineteenth-century French Realist and Naturalist novel in light of various efforts to define its practice. How does critical theory constitute Realism as a category? How does Realism articulate the aims of theory? And how do nineteenth-century Realist and Naturalist novels intersect with other discourses besides the literary? In addition to several works by Balzac, novels to be studied include Stendhal’s Le Rouge et le Noir, Sand’s Indiana, Flaubert’s Madame Bovary, and Zola’s Nana. Some attention also paid to Realist painting. T 1:30–3:20

FREN 923a/HIST 636a, Community and Communication in French Thought  Yue Zhuo
This seminar traces the intellectual history of an important trend in twentieth-century French thought that challenges the foundations of traditional communities. How is community possible when it seeks to break away from religious, national, and political identities? The first part of the course looks into a series of theoretical developments, such as Georges Bataille’s notion of “negative community,” Maurice Blanchot’s “unavowable community,” Jean-Luc Nancy’s “inoperative community,” as well as Giorgio Agamben and Philippe Lacoue-Labarthe’s reflections on the political. The second part of the course explores the social implications of these critical thoughts, in particular how to rethink the question of communication within the context of new emerging forms of mass media. We read social critics such as Roland Barthes, Edgar Morin, and Guy Debord. Conducted in English. W 1:30–3:20

FREN 925a/HIST 745a/JDST 800a, Judging the Holocaust: Law, History, and Politics  Henry Rousso
For the first time in history, the perpetrators of a mass crime were sued after 1945 in an international court, while many others were hunted across the world over seven decades. Judging the crimes committed during the Holocaust led to new legal qualifications (genocide, crimes against humanity), as well as new conceptions of time, history, and memory. This seminar, which is partly based on films and video excerpts, deals with some of the major war crimes trials (Nuremberg, Eichmann, Barbie, Papon) and other judicial cases related to the Holocaust (the Kasztner affair, the laws against the deniers). It focuses on their moral and political impact, as well as their effectiveness in providing “historical narratives” or preventing new forms of racism and anti-Semitism. T 9:25–11:15

FREN 933b/CPLT 513b, One Hundred Years of Swann’s Way  Alice Kaplan
The first volume of Proust’s Recherche has inspired generations of literary critics, psycho-analysts, philosophers, historians, translators, and critical theorists. Reading Du côté de chez Swann in light of their responses to the novel allows us to construct an intellectual and literary history of a century of reading Proust. TH 1:30–3:20

FREN 951a/AFAM 822a/AFST 651a, The Francophone African Novel  Christopher L. Miller
A comprehensive study of the novel—its discourse, aesthetics, and history—in colonial and postcolonial francophone Africa. Authors include Lamine Senghor, Ousmane Socé, Ousmane Sembène, Ferdinand Oyono, Ahmadou Kourouma, Yambo Ouologuem, Mariama Bâ, Aminata Sow Fall, Fatou Diome, Calixthe Beyala, Alain Mabanckou. Readings in French; course conducted in English. TH 1:30–3:20
FREN 968b/CPLT 590b/WGSS 620b, Writing Women: Gender and Nation Building in the Francophone Arab World  Edwige Tamalet Talbayev

This course investigates the ways in which the related discourses of nationalism, Islam, and feminism can fruitfully intersect to illuminate the corpus of women’s literature from the former French colonies in the Arab world. With an emphasis on issues of social justice, citizenship, and feminism, both locally and transnationally, we interrogate the ways in which literature mediates the construction of women as historical subjects. Although the focus of the course is on francophone texts, we address the literary landscape of the former Maghrebi and Middle Eastern colonies and mandates as a whole, reading Arabic texts in translation alongside texts written in French and English. Proposed readings include Fatima Mernissi, *Dreams of Trespass*; Kateb Yacine, *Nedjma*; Tahar Ben Jelloun, *Lettre à Delacroix*; Joumana Haddad, *I Killed Scheherazade*; Leila Abouzeid, *The Year of the Elephant*; Fawzi Mellah, *Le Conclave des pleureuses*; Ahlam Mosteghanemi, *Memory in the Flesh*; Malika Mokeddem, *Des rêves et des assassins*. W 3:30–5:20
GENETICS

I-313 Sterling Hall of Medicine, 203.785.5846
http://info.med.yale.edu/genetics
M.S., M.Phil., Ph.D.

Chair
Richard Lifton

Director of Graduate Studies
To be announced

Professors
Allen Bale, Susan Baserga (Molecular Biophysics & Biochemistry), Douglas Brash (Therapeutic Radiology), W. Roy Breg, Jr. (Emeritus), Lynn Cooley, Daniel DiMaio, Patrick Gallagher (Pediatrics), Joel Gelernter (Psychiatry; Neurobiology), Peter Glazer (Therapeutic Radiology), Jeffrey Gruen (Pediatrics), Murat Gunel (Neurosurgery), Arthur Horwich, Kenneth Kidd, Richard Lifton (Internal Medicine/Nephrology; Molecular Biophysics & Biochemistry), Haifan Lin (Cell Biology), Maurice Mahoney, Charles Radding (Emeritus), Shirleen Roeder (Molecular, Cellular & Developmental Biology), Margretta Seashore, Gerald Shadel (Pathology), Carolyn Slayman, Stefan Somlo (Internal Medicine/Nephrology), Joann Sweasy (Therapeutic Radiology), Peter Tattersall (Laboratory Medicine), Sherman Weissman, Tian Xu, Hongyu Zhao (Public Health; Biostatistics)

Associate Professors
Martina Brueckner (Pediatrics/Cardiology), Judy Cho ( Internal Medicine), Antonio Giraldez, Mustafa Khokha (Pediatrics), Peining Li, Arya Mani (Internal Medicine), Michael Nitabach (Cellular & Molecular Physiology), Valerie Reinke, Matthew State (Child Study Center), Zhaoxia Sun

Assistant Professors
Chris Cotsapas (Neurology), Valentina Greco, Mark Hammarlund, Natalia Ivanova, Tae Hoon Kim, Janghoo Lim, Jun Lu, James Noonan, In-Hyun Park, Scott Weatherbee, Andrew Xiao, Hui Zhang

Fields of Study

Special Admissions Requirements

The department welcomes applicants who have a bachelor’s or master’s degree in biology, chemistry, or a related field, with experience (from course work and/or research) in the field of genetics. GRE General Test scores are required. A pertinent Subject Test in Biochemistry and Molecular Biology, Biology, or Chemistry is recommended.

To enter the Ph.D. program, students apply to the Molecular Cell Biology, Genetics, and Development (MCGD) track within the interdepartmental graduate program in the Biological and Biomedical Sciences (BBS).

Special Requirements for the Ph.D. Degree

The Ph.D. program in Genetics is designed to provide the student with a broad background in general genetics and the opportunity to conduct original research in a specific area of genetics. The student is expected to acquire a broad understanding of genetics, spanning knowledge of at least three basic areas of genetics, which include molecular, cellular, organismal, and population genetics. Normally this requirement is accomplished through the satisfactory completion of formal courses, many of which cover more than one of these areas. Students are required to pass at least six graduate-level courses that are taken for a grade. Advanced graduate study becomes increasingly focused on the successful completion of original research and the preparation of a written dissertation under the direct supervision of a faculty adviser along with the guidance of a thesis committee.

A qualifying examination is given during the second year of study. This examination consists of a period of directed reading with the faculty followed by the submission of two written proposals and an oral examination. Following the completion of course work and the qualifying examination, the student submits a dissertation prospectus and is admitted to candidacy for the Ph.D. degree. There is no language requirement. An important aspect of graduate training in genetics is the acquisition of communication and teaching skills. Students participate in presentation seminars and two terms (or the equivalent) of teaching. Teaching activities are drawn from a diverse menu of lecture, laboratory, and seminar courses given at the undergraduate, graduate, and medical school levels. Students are not expected to teach during their first year. In addition to all other requirements, students must successfully complete GENE 901b, First-Year Introduction to Research—Ethics: Scientific Integrity in Biomedical Research, prior to the end of their first year of study.

Honors Requirement

Students must meet the Graduate School’s Honors requirement by the end of the fourth term of full-time study.

M.D./Ph.D. Students

M.D./Ph.D. students affiliate with the Department of Genetics graduate program via a different route than other incoming graduate students in the department, resulting in some modification of the academic requirements for the Ph.D. portion of the M.D./Ph.D. degree. Typically, one or more research rotations is done during the first two years of medical school (in many cases, the first rotation is done during the summer between
years one and two). No set number of research rotations is required. M.D./Ph.D. students officially affiliate with the Department of Genetics after selecting a thesis adviser and consulting with the DGS. M.D./Ph.D. students interested in Genetics are required to consult with the DGS prior to formal affiliation to determine an appropriate set of courses tailored to the student’s background and interests.

The courses, rotations, and teaching requirements for M.D./Ph.D. students entering the Genetics graduate program (see below) are modified from the normal requirements for Ph.D. students. Besides the modifications in these three requirements, M.D./Ph.D. students in the Department of Genetics are subject to all of the same requirements as the other graduate students in the department.

**Courses**

Four graduate-level courses taken for a grade are required (two Yale graduate-level courses taken for a grade during medical school may be counted toward this requirement at the discretion of the DGS). Course work is aimed at providing a firm basis in genetics and in cellular molecular mechanisms, with graduate-level proficiency in genetics, cell biology, and biochemistry.

- **Required courses:** In addition to the four graduate-level courses, all M.D./Ph.D. students must take: Basic Concepts of Genetic Analysis (GENE 625a); Graduate Student Seminar: Critical Analysis and Presentation of Scientific Literature (2 terms; GENE 675a and b, graded Sat/Unsat); Ethics: Scientific Integrity in Biomedical Research (as part of GENE 901b, graded Sat/Unsat).

- **Recommended courses:** Advanced Eukaryotic Molecular Biology (GENE 743b); Biochemical and Biophysical Approaches in Molecular and Cellular Biology (MCDB 630b); Molecules to Systems (CBIO 502); Molecular and Cellular Basis of Human Disease (CBIO 601).

- **Electives:** Other courses may be taken in a wide variety of fields relevant to the biological and biomedical sciences.

**Laboratory rotations**

One or more rotations are necessary to identify a thesis adviser. No set number of research rotations is required.

**Teaching**

One term of teaching is required. Previous teaching while enrolled at the Yale School of Medicine may count toward this requirement at the discretion of the DGS.

**Qualifying exam**

M.D./Ph.D. students take their qualifying exam in the term following the completion of their course work. The structure of the qualifying exam is identical to that for other Ph.D. students in Genetics. Students read with three faculty members for five weeks, one of whom supervises the reading on the thesis research topic, but who is not the thesis adviser. The following two weeks are devoted to writing two research proposals, one on the student’s thesis research. An oral exam follows in the eighth week.

**Prospectus**

M.D./Ph.D. students submit their prospectus once their qualifying exam has been completed, but no later than the 30th of June following their exam.

**Candidacy**

M.D./Ph.D. students will be admitted to candidacy once they have completed their course work, obtained two Honors grades, passed their qualifying exam, and submitted their dissertation prospectus.
Thesis committee M.D./Ph.D. students are required to have one thesis committee meeting per year, beginning the term after passing their qualifying exam. However, students are strongly encouraged to consider having additional meetings if they feel their project could benefit from the assistance of members of the thesis committee.

Master’s Degrees

M.Phil. See Degree Requirements under Policies and Regulations.

M.S. Students are not admitted for this degree. They may receive this recognition if they leave Yale without completing the qualifying exam but have satisfied the course requirements as described above, as well as the Graduate School’s Honors requirement. Prospective applicants are encouraged to visit the BBS Web site (info.med.yale.edu/bbs), MCGD Track.

Courses

GENE 500b, Principles of Human Genetics Allen Bale
A genetics course taught jointly for graduate students and medical students, covering current knowledge in human genetics as applied to the genetic foundations of health and disease. HTBA

GENE 603b/IBIO 603b, Teaching in the Science Education Outreach Program (SEOP) Paula Kavathas
TAs, along with volunteers, teach three projects in genetics to seventh-graders in two or three New Haven schools. In addition, TAs take a short course on teaching and serve as science judges. Dates and times to be determined. For more details visit www.seop.yale.edu. Contact Professor Kavathas.

GENE 625a/MB&B 625au/MCDB 625au, Basic Concepts of Genetic Analysis Tian Xu and staff
The universal principles of genetic analysis in eukaryotes are discussed in lectures. Students also read a small selection of primary papers illustrating the very best of genetic analysis and dissect them in detail in the discussion sections. While other Yale graduate molecular genetics courses emphasize molecular biology, this course focuses on the concepts and logic underlying modern genetic analysis. MW 11:35–12:50

[GENE 645a/BIS 645a, Statistical Methods in Human Genetics Offered every other year]

GENE 655a, Stem Cells: Biology and Application In-Hyun Park and staff
This course is designed for first-year or second-year students to learn the fundamentals of stem cell biology and to gain familiarity with current research in the field. The course is presented in a lecture and discussion format based on primary literature. Topics include stem cell concepts, methodologies for stem cell research, embryonic stem cells, adult stem cells, cloning and stem cell reprogramming, and clinical applications of stem cell research. Prerequisite: undergraduate-level cell biology, molecular biology, and genetics. TH 1:30–3
GENE 675a and b, Graduate Student Seminar: Critical Analysis and Presentation of Scientific Literature  Valentina Greco and staff
Students gain experience in preparing and delivering seminars and in discussing presentations by other students. A variety of topics in molecular, cellular, developmental, and population genetics are covered. Required for all second-year students in Genetics. Graded Satisfactory/Unsatisfactory. W 1:15–2:45

[GENE 703b, The Mouse in Biomedical Research  Offered every other year]

GENE 734a/MB&B 734a/MBIO 734a/PATH 634a, Molecular Biology of Animal Viruses  Robert Means, Daniel DiMaio, I. George Miller, and staff
Lecture course with emphasis on mechanisms of viral replication, oncogenic transformation, and virus-host cell interactions. Class meets every Monday and Wednesday, but only occasional Fridays; see the instructor for additional information. MWF 9–10:15

GENE 743b/MB&B 743b/MB/MCDB 743b, Advanced Eukaryotic Molecular Biology  Mark Hochstrasser, Anthony Koleske, Patrick Sung
Selected topics in transcriptional control, regulation of chromatin structure, mRNA processing, mRNA stability, RNA interference, translation, protein degradation, DNA replication, DNA repair, site-specific DNA recombination, somatic hypermutation. Prerequisite: biochemistry or permission of the instructor. TTH 11:35–12:50

GENE 749a/MB&B 749a/MCDB 677b, Medical Impact of Basic Science  Joan Steitz, Mark Hochstrasser, I. George Miller, Andrew Miranker, David Schatz, Patrick Sung, and staff
Consideration of examples of recent discoveries in basic science that have elucidated the molecular origins of disease or that have suggested new therapies for disease. Emphasis is placed on the fundamental principles on which these advances rely. Reading is from the primary scientific and medical literature, with emphasis on developing the ability to read this literature critically. Aimed primarily at undergraduates. Prerequisite: biochemistry or permission of the instructor. MW 1–2:15

GENE 760b, Genomic Methods for Genetic Analysis  James Noonan
Introduction to the analysis and interpretation of genomic datasets. The focus is on next-generation sequencing (NGS) applications including RNA-seq, ChIP-seq, and exome and whole genome sequencing. By the end of the course, each student will be able to process and analyze large-scale NGS datasets and interpret the results. This course is intended only for graduate students who are interested in genomic approaches but who have had little prior experience in genomics or bioinformatics. Enrollment limited to twenty. Prerequisite: permission of the instructor.

GENE 777b/MCDB 677b, Mechanisms of Development  Valerie Reinke, Lynn Cooley, Scott Holley, Timothy Nelson, Zhaoxia Sun, Scott Weatherbee
An advanced course on mechanisms of animal and plant development focusing on the genetic specification of cell organization and identity during embryogenesis and somatic differentiation. The use of evolutionarily conserved signaling pathways to carry out developmental decisions in a range of animals is highlighted. Course work includes student participation in critical analysis of primary literature and a research proposal term paper. M 9–10:15, F 2:30–3:45
GENE 840a and b, Medical Genetics  Margretta Seashore
Clinical rotation offering medical and graduate students the opportunity to participate
in the Genetic Consultation Clinic, genetic rounds, consultation rounds, and genetic
analysis of clinical diagnostic problems.

GENE 900a/CBIO 900a/MCDB 900a, First-Year Introduction to Research—Grant
Writing and Scientific Communication  Frank Slack and faculty
Grant writing, scientific communication, and laboratory rotation talks for Molecular Cell
Biology, Genetics, and Development track students. M 4–5:30

GENE 901b/CBIO 901b/MCDB 901b, First-Year Introduction to Research—Ethics:
Scientific Integrity in Biomedical Research  Megan King
Ethics and laboratory rotation talks for Molecular Cell Biology, Genetics, and Develop-
ment track students. TH 4–5:30

GENE 911a/CBIO 911a/MCDB 911a, First Laboratory Rotation  Carl Hashimoto
and faculty
First laboratory rotation for Molecular Cell Biology, Genetics, and Development track
students.

GENE 912b/CBIO 912b/MCDB 912b, Second Laboratory Rotation  Valerie Reinke
and faculty
Second laboratory rotation for Molecular Cell Biology, Genetics, and Development track
students.

GENE 913b/CBIO 913a/MCDB 913b, Third Laboratory Rotation  Frank Slack and
faculty
Third laboratory rotation for Molecular Cell Biology, Genetics, and Development track
students.

GENE 921a and b, Reading Course in Genetics and Molecular Biology
Directed reading with faculty. Term paper required. Prerequisite: permission of Genet-
ics DGS.
GEOL OGY AND GEOPHYSICS

Kline Geology Laboratory, 203.432.3124
http://earth.yale.edu
M.S., M.Phil., Ph.D.

Chair
To be announced

Director of Graduate Studies
Mark Pagani

Professors  Jay Ague, David Bercovici, Ruth Blake, Mark Brandon, Derek Briggs, Peter Crane, David Evans, Alexey Federov, Debra Fischer, Jacques Gauthier, Leo Hickey, Shun-ichiro Karato, Jun Korenaga, Mark Pagani, Jeffrey Park, Danny Rye, Brian Skinner, Ronald Smith, Elisabeth Vrba, John Wettlaufer

Associate Professor  Hagit Affek

Assistant Professors  William Boos, Kanani Lee, Maureen Long, Trude Storelvmo, Mary-Louise Timmermans, Nadine Unger, Zhengrong Wang

Lecturer  Ellen Thomas

Fields of Study
Fields include geochemistry and petrology, geophysics, ice physics, mineral physics, seismology and geodynamics, structural geology and tectonics, paleontology and paleoclimatology, oceanography, meteorology, cryospheric dynamics, and climatology.

Special Admissions Requirements
The department welcomes applicants oriented toward the earth sciences who have a bachelor’s or master’s degree in such fields as biology, chemistry, engineering, mathematics, meteorology, or physics, as well as those trained in geological, geophysical, and geochemical sciences. Scores from a pertinent GRE Subject Test are desirable but not required. The TOEFL or IELTS exam is required for all applicants for whom English is a second language.

Special Requirements for the Ph.D. Degree
There is no formal language requirement and no required curriculum. Students plan their course of study in consultation with their adviser to meet individual interests and needs and to lay the foundations for dissertation research. At the end of the first year the faculty reviews the standing of each student. A student recommended for continuation in the Ph.D. program will be so notified. Some students may be encouraged at that time to pursue only the M.S. degree. At the end of the second year the faculty reviews each student’s overall performance to determine whether he or she is qualified to continue for the Ph.D. degree. In order to qualify, a student must have met the Graduate School Honors requirement and maintained a better than passing record in the areas of concentration.
Also, a student must have satisfied the requirements of the Qualifying Exam by having completed two Research Discourses termed (according to their degree of development) the Minor and the Major Discourses. The Major Discourse will be presented at the Qualifying Presentation, followed by an extended question period wherein the student must successfully defend both Discourses. Remaining degree requirements include a dissertation review in the third year; the preparation and defense of the dissertation; and the submission of the dissertation to the Graduate School. The department requires that an additional copy, for which the student will be reimbursed, be deposited with the librarian of the Kline Geology Library.

Teaching experience is regarded as an integral part of the graduate training program in Geology and Geophysics. For that reason all students are required to serve as teaching fellows (5 hours per week) for two terms during the course of their predoctoral training.

In addition to all other requirements, students must successfully complete G&G 710b, Responsible and Ethical Conduct of Research, prior to the end of their first year of study.

Master’s Degrees

M.Phil.  See Degree Requirements under Policies and Regulations.

M.S.  Awarded only to students who are not continuing for the Ph.D. Students are not admitted for this degree. Minimum requirements include satisfactory performance in a course of study (typically six or more courses) that is approved by the director of graduate studies (DGS), and a research project with the approval of the DGS and the student’s thesis committee.

Program materials are available at www.geology.yale.edu or upon request to the Director of Graduate Studies, Department of Geology and Geophysics, Yale University, PO Box 208109, New Haven CT 06520-8109; e-mail, dgs@geology.yale.edu.

Courses

[G&G 500bU, Mineral Deposits]

G&G 501bU/ASTR 540bU, Radiative Processes in Astrophysics/Stellar Atmospheres  
Debra Fischer  
Theory of radiation fields and their propagation through media. Applications to stellar and planetary atmospheres and the interstellar medium including planetary energy balance and climate, terrestrial optical phenomena, solar physics, high-energy phenomena, and remote sensing. MW 9–10:15

[G&G 502aU, Introduction to Geochemistry]

[G&G 504aU, Minerals and Human Health]

G&G 508b, The Global Carbon Cycle  
Hagit Affek  
The course discusses the isotopic composition of atmospheric gases. It focuses primarily on carbon dioxide and the use of its isotopes to balance the atmospheric carbon budget, and discusses other gases associated with the global carbon cycle. MW 9–10:15
G&G 510a, Introduction to Isotope Geochemistry  Danny Rye, Zhengrong Wang  
An overview of the fundamental principles of stable and radiogenic isotope geochemistry. Emphasis is placed on applications to specific geologic problems, including petrogenesis, geochronology, geothermometry, surface processes, hydrology, and biogeochemistry. MWF 9:25–10:15

[G&G 511a, Stratigraphic Principles and Applications]

G&G 512a↑, Structure and Deformation of the Lithosphere  Mark Brandon  
An introduction to structure and deformation of tectonic plates. Topics include structure of the crust and mantle; deformation processes at low and high temperatures; origin of folds, faults, and earthquakes; and formation and evolution of plate boundaries and collisional mountain belts. Laboratory exercises and field trips.

[G&G 513a↑, Invertebrate Paleontology: Evolving Form and Function]

G&G 515b↑, Palaeobotany  Leo Hickey  
A detailed survey of the evolutionary history of plants through geological time, the origin and diversification of their major lineages and of plant communities, and the interaction of plants and their physical environment. Laboratory exercises involve the study of fossil and modern plants. TTH 9–10:15, lab TH 1:30–4:30

[G&G 518a↑, Trace Fossil Analysis]
G&G 526a*, Introduction to Earth and Planetary Physics  Shun-ichiro Karato  
Composition and structure of the Earth; seismological models; geochemical models; material properties in the Earth (elasticity, anelasticity, viscosity); specific topics on Earth structure (crust, mantle, core).

G&G 528b, Science of Complex Systems  Jun Korenaga  
Introduction to the qualitative and quantitative analysis of complex systems with many degrees of freedom. Emphasis is placed on understanding key concepts (predictability, self-organized criticality, renormalization, etc.) through various examples in physical and biological sciences.

[G&G 529b, Introduction to Geodynamics]

G&G 533a*, Paleogeography  David Evans  
Quantitative methods for measuring horizontal motions on the surface of the Earth. Histories of continental motions and supercontinents during the past three billion years. True polar wander. Foundations of paleomagnetism, including experience with field sampling and laboratory data acquisition.

G&G 535a*, Physical Oceanography  Alexey Fedorov  
An introduction to ocean dynamics and physical processes controlling the large-scale ocean circulation, ocean stratification, the Gulf Stream, wind-driven waves, tides, tsunamis, coastal upwelling, and other ocean phenomena. Equations of motion. Modern observational, theoretical, and numerous other techniques used to study the ocean. The ocean role in climate and global climate change. MW 11:35–12:50

[G&G 536b, Atmospheric Waves, Convection, and Vortices]

G&G 538a/ASTR 520a, Computational Methods in Astrophysics and Geophysics  Paolo Coppi  
The analytic and numerical/computational tools necessary for effective research in astronomy, geophysics, and related disciplines. Topics include numerical solutions to differential equations, spectral methods, and Monte Carlo simulations. Applications are made to common astrophysical and geophysical problems including fluids and N-body simulations. MW 4–5:15

G&G 540a*, Methods in Geomicrobiology  Ruth Blake  
A laboratory-based course providing interdisciplinary practical training in geomicrobiological methods including microbial enrichment and cultivation techniques; light, epifluorescence, and electron microscopy; and molecular methods (DNA extraction, PCR, T-RFLP, FISH). TTH 1–2:15

G&G 545a, Marine Micropaleontology  Ellen Thomas  
A survey of the most common marine microfossil groups. Because of their enormous abundance these minuscule organisms are important components of oceanic ecosystems and modulate biogeochemical cycles (e.g., organic and inorganic carbon, calcium, nitrogen, sulfur, phosphorus). Changes in microfossil abundance and species composition provide detailed records of the interaction between Earth's climate and oceanic biota,
especially because their skeletons are used to obtain trace element and isotopic proxies for such environmental parameters as temperature, carbonate saturation, pH, primary and export productivity, and deep-sea circulation. Emphasis is on marine and marginally marine eukaryotic unicellular groups during the last 170 million years of Earth history.

G&G 550a, Paleontology and Evolutionary Theory   Elisabeth Vrba
Current concepts in evolutionary and systematic theory with particular reference to how they apply to the fossil record. Emphasis on use of palaeontological data to study evolutionary processes. TTH 11:35–12:50

[G&G 555b, Petrogenesis of Mountain Belts]

[G&G 556a, Introduction to Seismology]

[G&G 557b, Advanced Seismology]

G&G 562b/ARCG 762b/EMD 548b/F&ES 726b, Observing Earth from Space   Ronald Smith
A practical introduction to satellite image analysis of Earth's surface. Topics include the spectrum of electromagnetic radiation, satellite-borne radiometers, data transmission and storage, computer image analysis, the merging of satellite imagery with GIS and applications to weather and climate, oceanography, surficial geology, ecology and epidemiology, forestry, agriculture, archaeology, and watershed management.

[G&G 567b, Geochemical Approaches to Archaeology]

G&G 570b, Cloud Physics and Dynamics   Trude Storelvmo
Basic concepts of cloud microphysics, cloud dynamics, and precipitation. Principles of cloud modeling; field observations of clouds.

G&G 602b, Paleoclimates   Mark Pagani
A study of the dynamic evolution of Earth's climate. Topics include warm (the Cretaceous, the Eocene, the PETM, the Pliocene) and cold (the “snowball Earth”) climates of the past, glacial cycles, abrupt climate changes, the climate of the past thousand years, and the climate of the twentieth century.

G&G 610b, Advanced Topics in Macroevolution   Elisabeth Vrba
A seminar for graduate students, and selected undergraduates with a suitable prior background, in which we read and discuss publications on various macroevolutionary topics and current debates. The particular subject matter varies from year to year, often being decided by student request for a specific topic, and is announced before the start of the term. Prerequisite: permission of the instructor.

[G&G 611a, Advanced Stratigraphy]

[G&G 616a, Advanced Petrology]

[G&G 617b, Leaf Architecture of the Flowering Plants]

G&G 618a, Petrology of Light Stable Isotopes   Danny Rye
The principles and applications of light stable isotopes to geological materials.
G&G 621b, Geochemistry of Heavy and Radioactive Isotopes in Rock Systems
   Danny Rye
The principles and application of radioactive and radiogenic isotopes to geological materials.

G&G 631a, Vertebrate Paleontology: Phylogeny of Vertebrates   Jacques Gauthier
The seminar offers a detailed look at current issues in the phylogeny, anatomy, and evolution of fossil and recent vertebrates. Lectures review the broad outline of vertebrate phylogeny and evolution. Lab section is required. HTBA

[G&G 644b, Mantle Dynamics and Geochemistry]

[G&G 650bU, Deformation of Earth Materials]

G&G 655aU, Extraordinary Glimpses of Past Life   Derek Briggs

[G&G 657a, Marine, Atmospheric, and Surficial Geochemistry]

[G&G 658b, Seismic Data Analysis]

[G&G 659a, Time Series Analysis with Geoscience Applications]

[G&G 660a, Diagenesis, Weathering, and Geochemical Cycles]

G&G 666b/AMTH 666b/ASTR 666b, Statistical Thermodynamics for Astrophysics and Geophysics   John Wettlaufer
Classical thermodynamics is derived from statistical thermodynamics. Using the multiparticle nature of physical systems, we derive ergodicity, the central limit theorem, and the elemental description of the second law of thermodynamics. We then develop kinetics, transport theory, and reciprocity from the linear thermodynamics of irreversible processes. Topics of focus include Onsager reciprocal relations, the Fokker-Planck equation, stability in the sense of Lyapunov, and time invariance symmetry. We explore phenomena that are of direct relevance to astrophysical and geophysical settings. No quantum mechanics is necessary as a prerequisite.

G&G 675b, Quantitative Tectonics   Mark Brandon
Introduction to the use of quantitative methods for the study of tectonic processes. The focus of the course shifts each year, covering topics such as flexural isostasy; coupling between climate, surface erosion, and deformation; kinematics of plate motion; thermal methods for studying erosion and faulting; processes and products of deformation. The course consists of a combination of lectures and seminar discussions. Students develop and complete a significant research project, either on their own or as a group. TF 2:30–4:20

G&G 690a and b, Directed Research in Geology and Geophysics
By arrangement with faculty.

G&G 691a or b, Independent Research
In addition to the seminars noted below, others on special topics like evolution, invertebrate and vertebrate paleontology, statistical mechanics and spectroscopy, structural geology and tectonics, petrology, volcanology, and physics of oceans and atmospheres
are offered according to student interest, by arrangement with departmental faculty. Seminars are often organized around the research interests of visiting faculty as well. Prerequisite: approval of DGS and adviser.

G&G 703a and b, Seminar in Systematics  Jacques Gauthier
3 HTBA

G&G 710b, Responsible and Ethical Conduct of Research  Mark Pagani
A 5-to-6-week lecture course (1 hour) that is required for all graduate students and must be completed within the first year. Course topics include record keeping and data management/retention; plagiarism and fraud; collaboration, coauthorship, and ownership of research materials and intellectual property; laboratory dynamics and sexual harassment. G&G 710b is in addition to the existing online ethics module, “The Yale Guide to Professional Ethics” (https://www.sis.yale.edu/pls/rcr/login_c_pkg.go_to_front_door), that must be completed by all GSAS students within the first term of study, regardless of source of financial support.

G&G 720a, Caves, Chemistry, and Climate

G&G 735a, Principles in Organic Geochemistry  Mark Pagani
The seminar focuses on advanced concepts in organic geochemistry with an emphasis on paleoenvironmental reconstruction. Each week specific topics are explored and debated using published journal articles. Topics include compound-specific carbon and hydrogen isotope analysis, and temperature and CO2 reconstruction. Meets twice a week.

G&G 740a, Student Research Seminar

G&G 742a, Seminar in Ocean and Atmosphere Dynamics  Mary-Louise Timmermans
This seminar is a forum for reading and understanding a selection of fundamental papers in ocean and atmosphere dynamics. Paper topics are explored further through the use of idealized laboratory experiments. Each paper is discussed over two weeks in combination with a related rotating tank laboratory demonstration.

G&G 746a or b, Seminar in Global Change

G&G 747a or b, Topics in Geochemistry  Zhengrong Wang

G&G 757b, Studies in Global Geoscience  Mark Brandon

G&G 767b, Seminar in Ice Physics  John Wettlaufer
We bring together the basic thermodynamics and statistical mechanics of crystal growth, surface phase transitions, metastability, and instability to explore the many faces of the surface of ice. These processes control the macroscopic growth shapes of ice crystals, underlie the enigma of the snowflake, and have implications in, inter alia, the atmosphere, the oceans, basic materials science, and astrophysics.

G&G 775a and b, Seminar in Tectonics  Mark Brandon, David Evans
The seminar focuses on advanced topics in the evolution and structure of the lithosphere. The theme for the seminar changes each term, covering topics such as the restoration
of continents in deep time, true polar wander, lithospheric instabilities, orogenesis at
convergent plate boundaries, interactions between climate and tectonics. Meetings are
for 1.5 hours, once a week, and are organized around readings from the primary research
literature.

G&G 800a or b, Tutorial in Paleobiology

[G&G 805a or b, Fossil Floras]

G&G 810a or b, Tutorial in Structural Geology and Tectonics or Solid Earth
Geophysics

G&G 820a or b, Tutorial in Meteorology, Oceanography, or Fluid Dynamics

G&G 830a or b, Tutorial in Geochemistry, Petrology, or Mineralogy

G&G 840a or b, Tutorial in Sedimentology

G&G 860a or b, Tutorial in Remote Sensing
GERMANIC LANGUAGES AND LITERATURES

W. L. Harkness Hall, 203.432.0788
www.yale.edu/german/graduate.html
M.A., M.Phil., Ph.D.

Chair
Rüdiger Campe

Director of Graduate Studies
Carol Jacobs [F] (310 WLH, carol.jacobs@yale.edu)
Rainer Nägele [Sp] (304 WLH, rainer.nagele@yale.edu)

Professors  Rüdiger Campe, Carol Jacobs, Rainer Nägele (on leave [F]), Brigitte Peucker, Henry Sussman (Visiting)

Associate Professor  Kirk Wetters

Assistant Professor  Paul North

Lecturer  William Whobrey

Affiliated Faculty  Jeffrey Alexander (Sociology), Seyla Benhabib (Political Science; Philosophy), Karsten Harries (Philosophy), Patrick McCreless (Music), Steven Smith (Political Science), Adam Tooze (History), Katie Trumpener (Comparative Literature; English), Jay Winter (History), Christopher Wood (History of Art)

Fields of Study
German literature and culture from the Reformation to the twenty-first century in Germany, Austria, and Switzerland; medieval literature; literary and cultural theory; literature and philosophy; literature and science; visuality and German cinema.

Special Admissions Requirement
All students must provide evidence of mastery of German upon application.

Requirements for the Ph.D. Degree
Students are required to demonstrate, besides proficiency in German, a reading knowledge of one other foreign language by the beginning of the third term of study. French is recommended, although occasionally, on consultation with the director of graduate studies (DGS), other relevant languages may be substituted. The faculty in German considers teaching to be essential to the professional preparation of graduate students. Students normally teach undergraduate language courses under supervision beginning in the third year of study for at least two years.

In the first two years of study, students take four courses per term. Three of these sixteen courses in the first four terms may be audited.

Oral examinations must be passed in the fifth and sixth terms of study, and a dissertation prospectus should be submitted no later than the end of the sixth term. All students will be asked to defend the prospectus in an informal discussion with the faculty. The
defense will take place before the prospectus is officially approved, usually in May of the sixth term. Students are admitted to candidacy for the Ph.D. upon completion of all predissertation requirements, including the prospectus.

After the submission of the prospectus, the student’s time is devoted to the preparation of the dissertation. A dissertation committee will be set up for each student at work on the dissertation. It is expected that students will periodically pass their work along to members of their committee, so that faculty members in addition to the dissertation adviser can make suggestions well before the dissertation is submitted. Drafts of each chapter must be submitted in a timely fashion to all members of the student’s committee: The first chapter should be submitted to the committee by February 1 of the fourth year of study; the second chapter should be submitted by January 1 of the fifth year. There will be a formal review of the first chapter.

Two concentrations are available to graduate students: Germanic Literature and German Studies. There is a special joint degree with Film Studies; see below.

Special Requirements for the Germanic Literature Concentration
During the first two years of study, students are required to take sixteen term courses, four of which may be taken outside the department. Three courses may be audited.

Special Requirements for the German Studies Concentration
During the first two years of study, students are required to take sixteen term courses, seven of which may be taken outside the department. Three of those courses may be audited. Students are asked to define an area of concentration upon entry, and will meet with appropriate advisers from both within and outside the department.

Joint Ph.D. Program with Film Studies
The Department of Germanic Languages and Literatures also offers, in conjunction with the Film Studies Program, a joint Ph.D. in Germanic Languages and Literatures and Film Studies. For further details, see Film Studies. Applicants to the joint program must indicate on their application that they are applying both to Film Studies and to Germanic Languages and Literatures. All documentation within the application should include this information.

Master’s Degrees
M.Phil. See Degree Requirements under Policies and Regulations.

M.A. (en route to the Ph.D.) Students enrolled in the Ph.D. program may qualify for the M.A. degree upon completion of a minimum of eight graduate term courses and the demonstration of reading knowledge in either Latin or French.

Further information is available upon request to the Registrar, Department of Germanic Languages and Literatures, Yale University, PO Box 208210, New Haven CT 06520-8210; e-mail, german@yale.edu.
Courses

GMAN 559b/CPLT 560b, Rilke and Yeats  Carol Jacobs
Reading and discussion of the works of Rainer Maria Rilke and William Butler Yeats. M 1:30–3:20

GMAN 562a/CPLT 630a, The Concept of Time  Paul North
The historical formation of the concept of time, a fundamental idea in the humanities and sciences. The benefits and pitfalls of the specifically modern plan to ground thought and being in a theory of time. Texts in German intellectual history by Kant, Husserl, Heidegger, and Einstein, with reference to Marcel Proust's novel In Search of Lost Time. T 1:30–3:20

GMAN 605a/CPLT 517a, Interpretation and Authority  Carol Jacobs
Close readings of works on problems of authority and interpretation by Sigmund Freud, Roland Barthes, Paul de Man, and Walter Benjamin. Exploration of their writing as a performance that questions simplistic notions of truth. Consideration of the problem of how to interpret texts that unsettle the very nature of interpretation. M 1:30–3:20

GMAN 608a, The Manesse Codex and Middle High German Poetry  William Whobrey
Examination of the Manesse Codex, a richly illuminated manuscript of the early fourteenth century, now in Heidelberg, which contains a large portion of the corpus of Middle High German poetry (1170–1300). Topics include the visualization of courtly love and the role of the knight; Gothic paleography; the role of antiquarian collections in the later Middle Ages; related manuscripts and reconstructed sources; modern editions; and the poetry and poets in their historical and cultural contexts. Prerequisite: reading knowledge of German. TTH 11:35–12:50

GMAN 612b, Science and Literature in Modernism  Rüdiger Campe
The course explores modernist writing as codeveloped in science and literature between 1880 and 1930. Starting from Zola's notion of the “experimental novel,” strategies of writing and narrating in both science and literature are discussed, including the questions of case study, metaphor and concept, protocol sentence, and automatic writing. Literary authors include Zola, Schnitzler, Döblin, Musil, Benn, Hofmannsthal, Breton, Gertrude Stein; scientific authors are Claude Bernard, Freud, Mach, Carnap, William James. Reading and discussion in English; reading the German and French texts in the original is encouraged. W 1:30–3:20

GMAN 614a/CPLT 786a, Literature and the Humanities  Rüdiger Campe
The course discusses the place of literature and literary reading with regard to the ensemble of the humanities. Rather than addressing “literary theory,” the focus is on the epistemology of literature and literary criticism and their significance in and for the humanities. Main readings are Giambattista Vico (New Science), Friedrich Schlegel (Dialogue on Poetry), Wilhelm Dilthey (Introduction to the Human Sciences), and Maurice Blanchot and Michel Foucault (“ontology of literature”). Reading and discussion in English. Reading knowledge of Italian, German, and French welcome. T 3:30–5:20
GMAN 619a, The Question of Form  Carol Jacobs
The concept of art in relation to form and deformation. The Platonic tradition in *The Republic* and echoed in twentieth-century philosophy (Heidegger), modern literature (Keats, Hardy, Kleist, Poe, Kafka), and film (Godard, Egoyan, Dreyer, Sun Zhou, and Wong Kar-Wai). TH 1:30–3:20

GMAN 624au, Overcoming Classicism  Kirk Wetters
Modern literature's dependencies on and independence from the inherited forms of classical antiquity are explored in specific case studies, Goethe's “Orphic Primal Words” and Hölderlin's “Pindar Fragments.” This central focus is discussed in the context of eighteenth- and nineteenth-century conceptions of artistic modernity (Winckelmann, Schiller, Friedrich Schlegel) and reflected in twentieth-century literary critical and philosophical discourses (Heidegger, Szondi, and Lacoue-Labarthe). TH 3:30–5:20

GMAN 626b/HIST 650b, Theories of History in Germany from Benjamin to Kluge and Negt  Paul North, Adam Tooze
Theories and philosophies of history in Germany from the interwar period to the late twentieth century, from Walter Benjamin to the renegades of the Frankfurt School, Alexander Kluge and Oskar Negt. This is a reading seminar based on the original texts with a limited amount of secondary historiography and commentary. The materials are made available in English. Those students wishing to read in German are encouraged to do so. T 1:30–3:20

GMAN 630b, Illegitimacy  Kirk Wetters
Theoretical exploration of legitimacy as a fundamental historical, legal, and political concept; authors include Weber, Schmitt, Blumenberg, Luhmann. This conceptual study is combined with literary readings on illegitimacy in the specific sense of “born out of wedlock”; main authors are Shakespeare, Goethe, Kleist, Dostoevsky, and Gide. TH 3:30–5:20

GMAN 636bu/CPLT 902b/FILM 718bu, Theatricality in Film  Brigitte Peucker
Examination of the multiple implications of theatricality in and for the cinema. Theatricality as excess; the appropriation of theatrical modes for film; theatricality as modernist self-reflexivity; performance and the relation of theatricality to subjectivity (performing the self); ritual and reenactment in film; theatricality and the real; the material image. T 3:30–5:20

GMAN 647a/CPLT 651a/PHIL 606a, Systems and Their Theory  Henry Sussman
This course spans the developments between two of the most original and still-telling early system-makers, Kant and Hegel, and some important twentieth-century fiction writers, among them Kafka, Proust, Borges, Calvino, and Pynchon, whose works built and played upon the architecture of systems. We read a number of scholars and scientists who have thought about the systematic dimensions of culture and life: Gregory Bateson, *Steps to an Ecology of Mind*; Fritjof Capra, *The Web of Life*; Anthony Wilden, *System and Structure*; and James Gleick, *Chaos*. Seminars are divided between elucidations of systematic pictures of the world and specific instances from criticism, literature, and other art forms. We work to discern the follow-through between conceptual systems and the
systematic dimensions of our everyday lives, whether legal, institutional, or familial.

**M 3:30–5:20**

**GMAN 663b/CPLT 649b, Desire of Knowledge/Knowledge of Desire**  
Rainer Nägele  
The relationship between knowledge and desire is analyzed through close readings of Sophocles’ *Oedipus Tyrannos*, Goethe’s *Faust*, and Kafka’s “Forschungen eines Hundes.”

**W 3:30–5:20**

**GMAN 680a/DRAM 456a/MU 847a, Wagner in and on Production**  
Gundula Kreuzer  
An exploration of Wagner’s ideas of the *Gesamtkunstwerk* and their role in the theory and history of opera since the mid-nineteenth century. The seminar contextualizes Wagner’s theories of staging and his attempts at creating a lasting, “correct” production within contemporary theatrical practices and discusses their consequences for both historical and modern stagings, with a special focus on *Tannhäuser*, the *Ring* cycle, and (possibly) *Parsifal*. We broach such methodological issues as theories and analyses of performance, multimedia, and the operatic work; approaches to and reconstructions of historical stagings; and the increasing mediatization of opera. Ultimately, the seminar seeks to understand opera more broadly in its liminal state between fixity and ephemerality. **T 9:25–11:15**

**GMAN 900a,b, Directed Reading**  
By arrangement with the faculty.
HISTORY

240 Hall of Graduate Studies, 203.432.1366
www.yale.edu/history
M.A., M.Phil., Ph.D.

Acting Chair
George Chauncey

Director of Graduate Studies
Anders Winroth (236 HGS, 203.432.1361)

Associate Professors  Bruno Cabanes, Patrick Cohrs, Naomi Rogers, Edward Rugemer, Charles Walton

Assistant Professors  Paola Bertucci, Fabian Drixler, Alejandra Dubcovsky, Daniel Magaziner, Alan Mikhail, Alyssa Mt. Pleasant, William Rankin, Paul Sabin, Marci Shore, Jenifer Van Vleck

Lecturers*  Adel Allouche, Annping Chin (Senior Lecturer), Becky Conekin (Senior Lecturer), Veronika Grimm, William Metcalf, Stuart Semmel (Senior Lecturer)

*For a complete list of lecturers, see the undergraduate bulletin, Yale College Programs of Study.

Fields of Study

Fields include ancient, medieval, early modern, and modern Europe (including Britain, Russia, and Eastern Europe), United States, Latin America, East Asia, Southeast Asia, Middle East, Africa, Jewish history; and diplomatic, environmental, ethnic, intellectual, labor, military, political, religious, social, and women's history, as well as the history of science and medicine (see the section in this bulletin on the History of Science and Medicine).

Special Admissions Requirements

The deadline for submission of the application for the History graduate program is December 15.
The department requires a short book review (maximum two pages) to accompany the application. It should cover the book that has most shaped the applicant's understanding of the kind of work he or she would like to do as a historian.

In addition, the department requires submission of an academic writing sample of not more than 25 pages, double spaced. Normally, the writing sample should be based on research in primary source materials.

**Special Requirements for the Ph.D. Degree**

All students must pass examinations in at least two foreign languages, one by the end of the first year. Students are urged to do everything in their power to acquire adequate linguistic training before they enter Yale and should at a minimum be prepared to be examined in at least one language upon arrival. Typical language requirements for major subfields are as follows:

**African** Either (1) French and German or Portuguese or Dutch-Afrikaans; or (2) French or German or Portuguese and Arabic; or (3) French or German or Portuguese or Dutch-Afrikaans and an African language approved by the director of graduate studies (DGS) and the faculty adviser.

**American** Two languages relevant to the student’s research interests, or a high level of proficiency in one language; competence in statistics or other mathematical skill may substitute for a natural language under appropriate circumstances.

**Ancient** French, German, Greek, and Latin.

**Byzantine** Greek, Latin, French, German, and any additional language, e.g., Russian, required for dissertation research.

**Chinese** Chinese and Japanese; additional languages like French, Russian, or German may be necessary for certain dissertation topics.

**East European** The language of the country of the student’s concentration plus two of the following: French, German, Russian, or an approved substitution.

**Japanese** Japanese and French or German; Chinese may be necessary for certain fields of Japanese history.

**Jewish** Modern Hebrew and German, and additional languages such as Latin, Arabic, Yiddish, Russian, or Polish, as required by the student’s areas of specialization.

**Latin American** Spanish, Portuguese, and French.

**Medieval** French, German, and Latin.

**Middle East** Arabic, Persian, or Turkish (or modern Hebrew, depending on area of research) and a major European research language (French, German, Russian, or an approved substitute).

**Modern Western European (including British)** French and German; substitutions are permitted with the approval of the DGS.
**Russian** Russian plus French or German with other languages as required.

**Southeast Asian** Choice of Dutch, French, Spanish, Portuguese, Chinese, Sanskrit, or Arabic, plus one or more Southeast Asian language (e.g., Bahasa Indonesian, Burmese, Khmer, Lao, Malay, Tagalog, Thai, Tetum, or Vietnamese). In certain cases, Ph.D. dissertation research on Southeast Asia may also require knowledge of a regional or local language, e.g., Balinese or Cham.

Foreign students whose native language is not English may receive permission during their first year to hand in some written work in their own language. Since, however, the dissertation must be in English, they should be advised to bring their writing skills up to the necessary level at the earliest opportunity.

During the first two years of study, students normally take twelve term courses, at least eight of which shall be chosen from those offered by the department, and must achieve Honors in at least two courses in the first year, and Honors in at least four courses by the end of the second year, with a High Pass average overall. If a student does not meet this standard by the end of the first or second year, the relevant members of the department will consult and promptly advise the student whether the student will be allowed to register for the fall of the following academic year. Courses graded in the Satisfactory/Unsatisfactory mode count toward the course work requirement but do not count toward the Honors requirement.

Three of the twelve courses must be research seminars in which the student produces an original research paper from primary sources. All graduate students, regardless of field, will be required to take two seminar courses in a time period other than their period of specialty.

In the second year, there are two special seminar requirements.

1. **Prospectus Tutorial**
   This course, normally taken in the second year, must result in a draft prospectus for the dissertation. Its purpose is to familiarize the student with debates in the relevant field and to prepare the student for fieldwork. The prospectus tutorial (HIST 995) counts as one of the three research seminars.

2. **Orals Tutorial**
   Another of the twelve courses, normally taken in the second year, must be a tutorial in any one of the selected orals fields (see below). The orals tutorial (HIST 994) provides an opportunity for students to read for an orals field with one of the future orals committee members and can take the form of one-on-one meetings, small group meetings, or a normally scheduled reading seminar on the topic of the orals field. In some cases, orals tutorial credit will be retroactively granted to students who have taken a course in a reading seminar subject provided that they submit an orals reading list to the DGS for approval. Students seeking retroactive credit for an orals tutorial will still need to complete twelve term courses. The completion of these tutorials is a precondition for enrollment in the third year.

   In the third year, students are expected to hold a prospectus colloquium and sit an oral examination.
1. The prospectus colloquium offers the student an opportunity to discuss the dissertation prospectus with the faculty committee in order to gain the committee's advice on the research and writing of the dissertation and its approval for the project. The dissertation prospectus provides the basis of grant proposals for doing research away from Yale in the fourth year. The prospectus colloquium and any further language requirements normally will be completed before the student takes his/her oral examination.

2. The oral examination for all graduate students must contain one minor field that deals 50 percent or more with the historiography of a region of the world other than the area of the student's major field. Students will have a choice of selecting three or four fields of concentration: a major field and either two or three minor fields. If the student selects the four-field option, the major field will be examined for 30 minutes. In that case, the student's orals tutorial must be in the major field. If the student selects the three-field option, the major field will be examined for 60 minutes and each minor field for 30 minutes. Completion of these requirements will qualify a student for admission to candidacy for the Ph.D., which must take place by the end of the third year of study.

During the third year of study, almost all students serve as teaching fellows in order to acquire crucial professional training. During their first term of teaching, students must attend several training sessions run by the department in conjunction with the Graduate Teaching Center.

Students usually complete the requirements for admission to candidacy in the sixth term, but it is also possible for students who have completed extensive graduate work prior to entering the Ph.D. program to petition for candidacy sooner. Students may petition for credit for previous graduate work only after successful completion of the first year.

In the fourth year, once students have advanced to candidacy, they may continue their studies while serving as teaching fellows or they may decide to pursue their research, either at Yale or elsewhere, using external funding.

In the fifth year, strongly preferably in the fall term, students are required to submit a chapter of the dissertation (not necessarily the first chapter) to the dissertation committee. This chapter will then be discussed with the student by members of the committee, preferably in a colloquium, to give the student additional advice and counsel on the progress of the dissertation. This conference is designed to be an extension of the conversation begun in the prospectus colloquium and is not intended as a defense: its aim is to give students early feedback on the research, argument, and style of the first writing accomplished on the dissertation.

The dissertation is expected to demonstrate ability to use sources in a discriminating and original way.

Students are eligible to receive the University Dissertation Fellowship (UDF) provided that they have advanced to candidacy. Students may take the UDF in the fifth year, but they must take the fellowship no later than the sixth year. They should apply for the fellowship in the term prior to which they wish to receive it. Students may serve as teaching fellows when they are not on the UDF.
The department strongly recommends that the student apply for a UDF only after completing the first chapter conference, and that students on a UDF should have completed at least two dissertation chapters before starting the fellowship. Many students apply for jobs in the year in which they receive the UDF, and the department urges that students apply for academic positions only when they have two chapters ready to send out to potential employers.

In short, a student making timely progress should expect to finish at least one chapter by December of the fifth year, and to complete the dissertation in the sixth year, when the submission deadline for May graduation is on or about March 15.

Registration in the seventh year is not required for students submitting their dissertations by the October deadline (which the majority of students do). If students are unable to make the October deadline, they can petition the Graduate School for extended registration. The petition, delivered first to the History DGS, will explain the particular circumstances that have prevented completion of the dissertation within the normal timetable and offer a specific plan that describes how the dissertation will be completed in the seventh year. Only students who have completed the first chapter conference will be considered for extended registration.

**Combined Ph.D. Programs**

**HISTORY AND AFRICAN AMERICAN STUDIES**
The Department of History also offers, in conjunction with the Department of African American Studies, a combined Ph.D. in History and African American Studies. For further details, see African American Studies.

**HISTORY AND RENAISSANCE STUDIES**
The Department of History also offers, in conjunction with the Renaissance Studies Program, a combined Ph.D. in History and Renaissance Studies. For further details, see Renaissance Studies.

**Master’s Degrees**

**M.Phil.** Students who have completed all requirements for admission to candidacy for the Ph.D. may receive the M.Phil. degree. Additionally, students in History are eligible to pursue a supplemental M.Phil. degree in Medieval Studies. For further details, see Medieval Studies.

**M.A. (en route to the Ph.D.)** Students enrolled in the Ph.D. program may qualify for the M.A. degree upon completion of a minimum of seven graduate term courses at Yale, of which two must have earned Honors grades and the other five courses must average High Pass overall. Students must also pass an examination in one foreign language. A student in the American Studies program who wishes to obtain an M.A. in History, rather than an M.A. in American Studies, must include in the courses completed at least two research seminars in the History department.

**Terminal Master’s Degree Program** For this terminal master’s degree, students must pass seven term courses, four of which must be in History; substantial written work must
be submitted in conjunction with at least two of these courses, and Honors grades are expected in two courses, with a High Pass average overall. All students in this program must pass an examination in one foreign language. Financial aid is not available for this program.

Program materials are available upon request to the Director of Graduate Studies, Department of History, Yale University, PO Box 208324, New Haven CT 06520-8324.

Courses

**HIST 500a, Classics and Methods**  Valerie Hansen
An introduction to historical methods, led by faculty in rotation, exploiting influential works of theory as well as exemplary works of historical scholarship. TH 3:30–5:20

**HIST 501b/CLSS 808b, Diocletian’s Prices Edict**  John Matthews
Diocletian’s Edict on Maximum Prices of 301 C.E., transmitted to us by epigraphic fragments from around fifty cities of the Greek east, was an attempt to control inflation by attaching maximum legal prices to a vast range of products and services, which are listed under thirty-five headings containing more than a thousand individual entries, presented in both Latin and Greek. The seminar approaches the edict not so much as a specific document of late Roman economic history, but as a presentation of the commercial and other resources available in the Roman empire in the period of its greatest prosperity and regional extent. The text is divided into topics corresponding to the main areas of economic activity that it includes (food and drink, manufactured products and building materials, labor costs and professional services, luxury items, spices and drugs, transport costs, and so on), and its study is directed to yield a portrait of the economy of the Roman empire and commercial relations within it. Attention is given to linguistic and lexicographical aspects, and to such supporting texts as Pliny’s *Natural History* and the *Theodosian Code*. Open to senior undergraduates with a sufficient knowledge of Latin and Greek. M 2:30–4:20

**HIST 507bu/CLSS 645bu, Numismatics**  William Metcalf
An introduction to the history of ancient coinage and the modern methodology of numismatic study. Brief consideration of the Greek background is followed by detailed treatment of the Roman republic and empire. Prerequisite: proficiency in Greek and Latin. M 2:30–4:20

**HIST 515a/CLSS 851a, Theory and Methods in Ancient History**  J.G. Manning
This seminar examines recent trends and work in ancient history with respect to methodology and the use of theory. Special attention is paid to sources, including archaeology, and to work in comparative history. TH 3:30–5:20

**HIST 517b/CLSS 884b, The Thirty Tyrants**  Donald Kagan
A study of the rule of the Thirty at Athens after the Athenian defeat in the Peloponnesian War. The ancient sources, chiefly the relevant passages in Xenophon’s *Hellenica*, Diodorus Siculus, and Plutarch’s *Lives*, are read in the original. Reading knowledge of French, German, or Italian desirable. TH 1:30–3:20
HIST 519a/CLSS 644a, Documents of Roman History  
William Metcalf
An introduction to principal documents, preserved primarily on stone or in metal, that bear on Roman history from the fifth century B.C. to the fourth century A.D. Selected documents are either themselves important (e.g., the Twelve Tables) or are paradigmatic for occurrences that are extensive in time and space (e.g., imperial rescripts, city and colonial charters). Documents are in Latin or Greek and are accompanied by English translations. M 2:30–4:20

HIST 535a/JDST 761a/RLST 773a, History of the Jews and Their Diasporas to Early Modern Times  
Ivan Marcus
A broad introduction to the history of the Jews from biblical beginnings until the European Reformation and the Ottoman Empire. Focus on the formative period of classical rabbinic Judaism and on the symbiotic relationships among Jews, Christians, and Muslims. An overview of Jewish society and culture in its biblical, rabbinic, and medieval settings. TTH 11:35–12:50

HIST 540b, Introduction to Research in Medieval History  
Anders Winroth
The seminar provides an introduction to research in medieval European history: often-used source genres, methods, and research tools. We focus on working with primary sources in original languages, occasionally in their original form. A working knowledge of a medieval language is, therefore, desirable. In 2013, the seminar focuses on medieval saints. M 1:30–3:20

HIST 550a/MDVL 552a, Medieval Social History  
Paul Freedman
Aspects of the social history of the Middle Ages. The bonds holding together societies with weak states and frequent local wars. Topics include the peasantry, definitions of noble status, the growth of towns, gender, the church in society. Attention is given to both the material conditions and mental constructs of Europe between about 1000 and 1500. Reading or research seminar. T 1:30–3:20

HIST 560b/RLST 691b, Society and the Supernatural in Early Modern Europe  
Carlos Eire
Readings in primary texts from the period 1500–1700 that focus on definitions of the relationship between the natural and supernatural realms, both Catholic and Protestant. Among the topics to be covered: mystical ecstasy, visions, apparitions, miracles, and demonic possession. All assigned readings in English translation. W 3:30–5:20

HIST 565a/RLST 522a, Early Modern Spain  
Carlos Eire
Reading and discussion in sixteenth- and seventeenth-century Spanish texts (all available in English translation) and also in recent scholarship on early modern Spain. TH 3:30–5:20

HIST 608a, Readings in the Social and Economic History of Britain, 1500–1750  
Keith Wrightson
Reading and discussion of central works in the social and economic history of the period. The class begins with the fundamental issues of population dynamics, price trends, and agrarian change. Thereafter the weekly agenda is decided in consultation, selecting from such topics as social structure and class; urbanization; poverty; family relationships;
gender; crime and the law; protest and rebellion; education and literacy; material culture; popular beliefs; early industrialism; internal commerce and overseas trade. W 3:30–5:20

HIST 612a, Readings in Early Modern British and Early Modern Atlantic History
Steven Pincus
This course offers students a wide-ranging set of readings investigating historiographical problems both in British and Atlantic history ca. 1600–ca. 1800. Readings focus on British domestic history, imperial history, and colonial history. While the course focuses largely on the English-speaking world, it also includes comparisons with Iberian, French, and Dutch empires. TH 9:25–11:15

HIST 626b, Phenomenology and Existentialism as Intellectual History
Marci Shore
This seminar focuses on the history of the phenomenological-turned-existentialist movement in Europe beginning with Edmund Husserl in the early twentieth century. Attention is paid to the different ways in which historians, as opposed to philosophers, approach both the development of this philosophy itself and the ways in which some of its most interesting thinkers (including Martin Heidegger, Jean-Paul Sartre, Jan Patočka, and Leszek Kolakowski, among others) became involved in political ideologies. Readings include both primary and secondary texts. W 1:30–3:20

HIST 635a, Readings in Modern French History
John Merriman
Readings and discussion of recent work on the social, political, economic, and cultural history of modern France. T 9:25–11:15

HIST 636a/FREN 923a, Community and Communication in French Thought
Yue Zhuo
This seminar traces the intellectual history of an important trend in twentieth-century French thought that challenges the foundations of traditional communities. How is community possible when it seeks to break away from religious, national, and political identities? The first part of the course looks into a series of theoretical developments, such as Georges Bataille’s notion of “negative community,” Maurice Blanchot’s “unavowable community,” Jean-Luc Nancy’s “inoperative community,” as well as Giorgio Agamben and Philippe Lacoue-Labarthe’s reflections on the political. The second part of the course explores the social implications of these critical thoughts, in particular how to rethink the question of communication within the context of new emerging forms of mass media. We read social critics such as Roland Barthes, Edgar Morin, and Guy Debord. Conducted in English. W 1:30–3:20

HIST 637b, Research in Modern French History
John Merriman

HIST 650b/GMAN 626b, Theories of History in Germany from Benjamin to Kluge and Negt
Paul North, Adam Tooze
Theories and philosophies of history in Germany from the interwar period to the late twentieth century, from Walter Benjamin to the renegades of the Frankfurt School, Alexander Kluge and Oskar Negt. This is a reading seminar based on the original texts with
a limited amount of secondary historiography and commentary. The materials are made available in English. Those students wishing to read in German are encouraged to do so. T 1:30–3:20

HIST 666a, Russian History to 1725  Paul Bushkovitch
The major phases of Russian history from the tenth century, covering the major historiographical controversies and sources. Russian or German helpful but not required. T 1:30–3:20

HIST 673a, Revolutionary Russia in European Context  Laura Engelstein
This seminar examines the Russian Revolutions of 1917 in relation to World War I and political events in Europe. It explores the Russian case as part of the broader historical moment, which included mutinies in France, revolutions in Germany and Hungary, and the emergence of the Soviet Union and the international Communist movement. It covers the civil war that extended across the territory of the former Russian Empire, as well as the diplomatic aftermath of the world war. Readings in English. W 9:25–11:15

HIST 681b, Eastern Orthodoxy and Society, 850–1700  Paul Bushkovitch
The development of Eastern Orthodoxy in its interaction with state and society in Byzantium, the Balkans, and Russia to 1700. A basic introduction to Orthodoxy and its different regional variants, including topics such as monasticism and political power, the problem of popular piety, and responses to heresy, paganism, and Islam. T 1:30–3:20

HIST 683b, Global History of Eastern Europe  Timothy Snyder
A thematic survey of major issues in medieval, early modern, and modern east European history, with emphasis on recent historiography. A reading course with multiple brief writing assignments. TH 3:30–5:20

HIST 700a/AMST 700a, Introduction to the Historiography of the United States  Ned Blackhawk
Readings and discussion of scholarly work on U.S. history from the settlement era to the present. Members of the department faculty visit the class on a rotating basis. M 1:30–3:20

HIST 702a/AMST 802a, Readings in Early National America  Joanne Freeman
An introduction to the early national period and its scholarship, exploring major themes such as nationalism, national identity, the influence of the frontier, the structure of society, questions of race and gender, and the evolution of political cultures. T 1:30–3:20

HIST 710a/AFAM 746a/AMST 671a, Black Politics and Performance in the Twentieth-Century United States  Jonathan Holloway, Paige McGinley
This course examines black politics and performance from the New Negro Renaissance to the Los Angeles Uprising. Bringing together methods from history and performance studies, the course focuses on questions of race, citizenship, memory, and movement within the framework of black cultural politics. The course moves across many modes of cultural and artistic production, from the Federal Theater Project to the essays of James Baldwin to the verbatim theater of Anna Deavere Smith. TH 1:30–3:20
HIST 711a/AFAM 738a/AMST 706a/WGSS 716a, Readings in African American Women’s History  Crystal Feimster
The diversity of African American women’s lives from the colonial era through the late twentieth century. Using primary and secondary sources we explore the social, political, cultural, and economic factors that produced change and transformation in the lives of African American women. Through history, fiction, autobiography, art, religion, film, music, and cultural criticism we discuss and explore the construction of African American women’s activism and feminism; the racial politics of the body, beauty, and complexion; hetero- and same-sex sexualities; intraracial class relations; and the politics of identity, family, and work. TH 9:25–11:15

HIST 715b/AFAM 764b/AMST 715b, Readings in Nineteenth-Century America  David Blight
The course explores recent trends and historiography on several problems through the middle of the nineteenth century: sectionalism; expansion; slavery and the Old South; northern society and reform movements; Civil War causation; the meaning of the Confederacy; why the North won the Civil War; the political, constitutional, and social meanings of emancipation and Reconstruction; violence in Reconstruction society; the relationships between social/cultural and military/political history; problems in historical memory; the tension between narrative and analytical history writing; and the ways in which race and gender have reshaped research and interpretive agendas. W 1:30–3:20

HIST 717b/AFAM 733b/AMST 678b, Readings on Slavery in the Americas to 1800  Edward Rugemer, Alejandra Dubcovsky
This reading course examines the histories and historiographies of the slave systems of the Americas from about 1500 to 1800. The course has a broad geographical scope, moving away from national histories and engaging with hemispheric, Atlantic, and world history paradigms. T 9:25–11:15

HIST 718a/INRL 622a, Social Movements in Comparative Perspective  Becky Conekin
In this seminar we explore post-WWII social movements and their legacies across Western Europe and the United States. Examining both the actuality and symbolic character of these movements in contemporary history, we analyze the political, social, and cultural meanings of protest and its impact on class, generational, gender, and racial relations in Western Europe and North America. In addition, if students have specific interests in Eastern European and/or Latin American countries, they may bring these into the discussion and write on them in a comparative perspective in their final paper. We discuss different national histories and discourses about identity, while exploring the varied geographies of the Cold War. We then move to a more thematic approach focusing on, for example, civil rights, antiwar and student protests, and countercultural politics. We conclude with a brief look at the social movements that developed out of the 1960s. T 9:25–11:15
HIST 720a/AMST 705a/RLST 705a, Readings in Religion and American History, 1600–2000  Harry Stout
This seminar explores intersections of religion and society in American history from the colonial period to the present as well as methodological problems important to their study. TH 1:30–3:20

HIST 722a/AFAM 757a/AMST 722a, Research Seminar in Nineteenth-Century U.S. History  David Blight
Some class sessions focus on matters of craft: research techniques, styles of writing narrative and analysis; judging scholarly work; and philosophical dimensions of doing history in the early twenty-first century. The primary focus of the course is for each student to complete his/her own major research paper. Students in any field of American history are welcome. W 9:25–11:15

HIST 726b/AMST 798b, The Culture of the Gilded Age  Cynthia Russett
This course uses fiction and nonfiction to look at some of the major concerns of late-nineteenth-century America, including political corruption, wealth and poverty, social reform, and the situation of women and minorities. Authors include Edward Bellamy, William Graham Sumner, Jane Addams, W.E.B. DuBois, and Charlotte Perkins Gilman. TH 1:30–3:20

HIST 733b, The United States in the Twentieth Century  Beverly Gage
An introduction to the historiography of the United States in the twentieth century. Emphasis on methodology and major interpretive problems. Readings include “classics” as well as exemplary recent works. TH 1:30–3:20

HIST 736b/AFAM 709b/AMST 709b/WGSS 736b, Research in U.S. Political and Social History after 1865  Glenda Gilmore
Projects chosen from the post-Civil War period, with emphasis on twentieth-century social and political history, broadly defined. Research seminar. TH 9:25–11:15

HIST 739a/AMST 739a, Readings in American Indian History  Alyssa Mt. Pleasant
Conceived as an introduction to the historiography of Native America, this seminar pays particular attention to the development of ethnohistorical inquiry, “new Indian history,” and current debates within the field. The course aims to provide broad chronological coverage from European contact through the twentieth century. There is similar emphasis on geographic breadth (within the political boundaries of the modern United States). Readings include recent publications and classic texts. The final project is a historiographical essay developing a fine-grained analysis of scholarship about a particular tribe or nation, region, theme, or period in American Indian history. W 9:25–11:15

HIST 740b/AMST 740b, Research in Western and Frontier History  John Mack Faragher, George Miles
Taught with George Miles, curator of Yale’s extensive collection of Western Americana at the Beinecke Library. Meets at the Beinecke Library. Emphasis on research methods and the use of primary evidence to construct historical arguments. The goal of the seminar is the research and writing of an original and publishable historical essay. W 9:25–11:15
HIST 745a/FREN 925a/JDST 800a, Judging the Holocaust: Law, History, and Politics  Henry Rousso

For the first time in history, the perpetrators of a mass crime were sued after 1945 in an international court, while many others were hunted across the world over seven decades. Judging the crimes committed during the Holocaust led to new legal qualifications (genocide, crimes against humanity), as well as new conceptions of time, history, and memory. This seminar, which is partly based on films and video excerpts, deals with some of the major war crimes trials (Nuremberg, Eichmann, Barbie, Papon) and other judicial cases related to the Holocaust (the Kasztner affair, the laws against the deniers). It focuses on their moral and political impact, as well as their effectiveness in providing “historical narratives” or preventing new forms of racism and anti-Semitism. T 9:25–11:15

HIST 746a/AMST 903a, Introduction to Public Humanities  Matthew Jacobson, Laura Wexler

What is the relationship between knowledge produced in the university and the circulation of ideas among a broader public, between academic expertise on the one hand and nonprofessionalized ways of knowing and thinking on the other? What is possible? This seminar provides an introduction to various institutional relations and to the modes of inquiry, interpretation, and presentation by which practitioners in the humanities seek to invigorate the flow of information and ideas among a public more broadly conceived than the academy, its classrooms, and its exclusive readership of specialists. Topics include public history, museum studies, oral and community history, public art, documentary film and photography, public writing and educational outreach, the socially conscious performing arts, and fundraising. In addition to core readings and discussions, the seminar includes presentations by several practitioners who are currently engaged in different aspects of the Public Humanities. With the help of Yale faculty and affiliated institutions, participants collaborate in developing and executing a Public Humanities project of their own definition and design. Possibilities might include, but are not limited to, an exhibit or installation, a documentary, a set of walking tours, a Web site, a documents collection for use in public schools. M 9:25–11:15

HIST 747a/LAW 20102, American Legal History through 1860  Claire Priest

This course examines the foundations of the American legal, political, and economic order from the colonial period through 1860, with an emphasis on the founding era. We analyze the emergence of American property law, slavery, inheritance policy, women’s legal history, intellectual property, and corporate law as well as federalism, the Constitution, and judicial review. The course readings consist of contemporary sources, recently published works, and classics in the field. Self-scheduled examination (online) or paper option. TTH 2:10–3:30

HIST 752b/AMST 741b, Indians and Empires  Ned Blackhawk

This course explores recent scholarship on Indian-imperial relations throughout North American colonial spheres from roughly 1500 to 1900. It examines indigenous responses to Spanish, Dutch, French, English, and lastly American and Canadian colonialism and interrogates commonplace periodization, geographic, and conceptual approaches to American historiography. It concludes with an examination of American Indian political
history, contextualizing it within larger assessments of Indian-imperial and Indian-state relations. TH 1:30–3:20

**HIST 758a/AMST 776a, Research in International and Transnational History**  
Jenifer Van Vleck

This research seminar is designed to enable students to produce an original, article-length paper based on primary research. During the first four weeks of class, we read examples of both classic and new approaches to international history, with the goal of understanding and evaluating different research methodologies. Questions that the course considers include: What does it mean to work across geographical borders (or, indeed, disciplinary borders), conceptually and methodologically? Why might an international/transnational perspective enrich our understandings of national or local histories? How have historians grappled with the logistical challenges of multiaxial research—and how can we understand the archive itself in historical terms, as an institutional site that embodies (and often reproduces) relations of power? With such questions in mind, the remainder of the term is devoted to students’ own research papers, which they discuss and present, workshop-style, at various stages in the process. On a practical level, we discuss strategies for publishing articles in academic journals, for using seminar papers to advance work on the dissertation, and for finding archival collections and sources at Yale that are relevant to international history. W 3:30–5:20

**HIST 760b/LAW 21063, American Legal History, 1861–1968**  
John Witt

Selected topics in the history of American law, legal thought, legal institutions, and the legal profession. Follows the Law School academic calendar. MW 8:40–10

**HIST 768a/AMST 768a, Asian American History and Historiography**  
Mary Lui

This reading and discussion seminar examines Asian American history through a selection of recently published texts and established works that have significantly shaped the field. Major topics include the racial formation of Asian Americans in U.S. culture, politics, and law; U.S. imperialism; U.S. capitalist development and Asian labor migration; and transnational and local ethnic community formations. The class considers both the political and academic roots of the field as well as its evolving relationship to “mainstream” American history. T 9:25–11:15

**HIST 776a/AMST 780a, Class and Capitalism in Twentieth-Century United States**  
Jennifer Klein

Reading course on class formation, labor, and political economy in the twentieth-century United States; how regionalism, race, and class power shaped development of American capitalism. The course reconsiders the relationships between economic structure and American politics and political ideologies, and between global and domestic political economy. Readings include primary texts and secondary literature (social, intellectual, and political history; geography). TH 1:30–3:20

**HIST 790b/AMST 790b, Narrative and Other Histories**  
John Demos

An exploration, through readings and discussion, of the recent “literary turn” in historical study. Readings include history, fiction, and some theory. In addition, a month-long practicum focuses on writing by course participants. T 3:30–5:20
HIST 792a/MUSI 844a, Musical Consumerism  Emily Green
In the first half of the course we consider interdisciplinary models of consumerism, authorship, and materialism. We then investigate the history of musical print culture (1500–1800), from the first typesetting to engraving, examining the ways in which changing economies affected both the livelihood of the composer and the identity of the consumer. We engage with music as a tangible object; little to no musical literacy is required. T 1:30–3:20

HIST 793b/AMST 793b, Power: Historical and Theoretical Approaches  Jean-Christophe Agnew
An introduction to the widely different ways in which power and its correlative concepts (domination, coercion, oppression, authority, legitimacy, hegemony, resistance, etc.) have been treated by historians, sociologists, anthropologists, and political theorists. Case studies test the various approaches in different contexts. W 1:30–3:20

HIST 799a/AMST 799a, The American Century, 1941–1961  Jean-Christophe Agnew
The seminar looks at recent work in the intellectual and cultural history of WWII and Cold War America—the years between the New Deal and the New Frontier. Secondary readings highlight current directions in historiography as well as the range of research opportunities available, while class assignments and discussions focus for the most part on the different ways one can teach the period and its documentary sources, including literature, film, music, and painting. The seminar aims to suggest the richness and coherence of this period as a subject for intellectual and cultural historians—especially for those wishing to pursue a research topic in this area—and as an occasion to explore the possibilities for interdisciplinary teaching. W 1:30–3:20

HIST 804a/PHIL 656a/PLSC 605a, Rethinking Sovereignty: Human Rights and Cosmopolitanism  Adam Tooze, Seyla Benhabib
This course explores conceptions of sovereignty, cosmopolitanism, and human rights as basic elements of the international political order from the dawn of the modern age to the present in historical, philosophical, and jurisprudential aspects. W 1:30–3:20

HIST 807a/AMST 650a/ANTH 510a, Resistance, Rebellion, and Survival Strategies in Modern Latin America  Gilbert Joseph
An interdisciplinary examination of new conceptual and methodological approaches to such phenomena as peasants in revolution, millenarianism, “banditry,” refugee movements, and transnational migration. TH 3:30–5:20

HIST 810a, Introduction to Brazilian History  Stuart Schwartz
An introduction to the historical problems and historiography of Brazil. Readings of basic books in the field and discussion of the historiographical traditions. Basic readings are in English, but students are encouraged to use Portuguese. TH 1:30–3:20

HIST 820b, Problems in Modern Mexican History: People, State, and Nation in Historical Motion  Gilbert Joseph
Focusing on the relationship between forms of the state and grassroots political culture, the course examines prevailing trends and controversies in historical writing on Mexico, with special attention given to the Mexican Revolution and its legacies. F 1:30–3:20
HIST 827b/U/CPLT 827b/U, Myth and Memory in the Persian Book of Kings  
Abbas Amanat  
This course examines Ferdowsi’s *Shahnameh*, one of the great epics of all times, with emphasis on six of its essential legends. Around the text (in English translation but also the original Persian) we explore political culture, historical context, and collective memories over the course of a millennium since its composition. Prerequisite: knowledge of Persian or familiarity with Persian history and culture. W 7–8:50

HIST 829a/NELC 830a, From Medina to Constantinople: The Middle East from 600 to 1517  
Adel Allouche  
The seminar discusses the religious and political events that shaped the Middle East from the rise of Islam to the Ottoman conquest of Egypt. It encompasses Arab lands, Iran, and Turkey. TH 1:30–3:20

HIST 834a/U, Narratives of Modern Iran  
Abbas Amanat  
Close reading, content analysis, and contextual study of modern Persian historical narratives, autobiographies, reform literature, memoirs, travel accounts, and selective documents as well as major studies on the themes of power, morality and violence, Islam and politics, modernity, and contested identities. W 3:30–5:20

HIST 836a/U, From the Great Game to the Great Satan  
Abbas Amanat  
This seminar explores encounters between Iran, Iraq, Persian Gulf, Afghanistan, and southern Central Asian principalities on the one hand and Britain, Russia, and the United States since the early nineteenth century. Topics in the first part include travels, diplomacy, spies, war, geopolitics, and imperial hegemony. In the second part, the course looks at movements of national resistance, Cold War and regional tensions, and anti-Western trends. M 3:30–5:20

HIST 839a/AFST 839a, Environmental History of Africa  
Robert Harms  
An examination of the interaction between people and their environment in Africa and the ways in which this interaction has affected or shaped the course of African history. W 9:25–11:15

HIST 840b/AFST 840b, Colonialism in Africa  
Robert Harms  
Discussion of the theory and practices of colonialism in Africa. Topics include the motives for European expansion, the scramble for Africa, early colonialism, direct and indirect rule, “colonization of the mind,” the colonial state, the developmental state, late colonialism, and paths to decolonization. W 9:25–11:15

HIST 843a/U/AFST 531a/U, Apartheid and Its Afterlives  
Daniel Magaziner  
Apartheid in South Africa ended in 1994 with the election of Nelson Mandela and the once-banned African National Congress. Yet just as segregation predated the Afrikaner government’s system of minority rule, so too does apartheid continue to “live” past its conventional expiration date. This course compares the past and the present fates of South Africans. Rather than offer a conventional political narrative of setback, struggle, and triumph, the course proceeds thematically to examine how economics, science, literary culture, violence, and memory have figured at various epochs in South African
history. We read monographs, biographies, short stories, and novels; view multimedia and photographs; and watch movies about the country’s contested past and present.

T 1:30–3:20

HIST 846a/AFST 532a, After Colonialism Daniel Magaziner
This course offers a comparative analysis of decolonization and the post-colonial state in selected African countries. We examine various approaches to the national question and liberation in the late colonial era, then consider a comparative accounting for the trajectories of post-colonies. Topics to be considered include Negritude, Pan-Africanism, artistic approaches to the post-colony, religious revival and cultural politics, and the global Cold War. Students read monographs, articles, and novels, and view movies and listen to music. TH 2:30–4:20

HIST 851b, Twentieth-Century Vietnam: Colonialism, War, and Society Benedict Kiernan
French colonial rule, cultural change, Japanese occupation, and the origins, course, and aftermath of the Vietnamese-American conflict. War and society from the formation of a modern national identity to the rise of communism, the resurgence of Buddhism, independence and division, the U.S. intervention, escalation and defeat, the postwar Cambodian conflict and the 1979 Chinese invasion, regional integration, and economic reform. Readings, discussion, and research. W 3:30–5:20

HIST 852b/CHNS 836b, Early Chinese Narratives: Readings in the Zuo Commentary and Sima Qian Annping Chin
The course focuses on the structure, the historical context, and the writing of the Zuo Commentary (Zuozhuan) and Sima Qian’s Records of the Grand Historian (Shiji). Students also learn to read the commentaries to these texts and come to understand the knowledge that traditional scholarship can offer. Readings are in Chinese and English. M 3:30–5:20

HIST 862a, Documents in Tang, Song, and Yuan Dynasties Valerie Hansen
A survey of the historical genres of premodern China: the dynastic histories, other chronicles, gazetteers, literati notes, and Buddhist and Daoist canons. How to determine what different information these sources contain for research topics in different fields. Prerequisite: at least one term of classical Chinese. TH 1:30–3:20

HIST 864b, Islam in China Valerie Hansen
The history of Islam in China, focusing on Gansu and Xinjiang in the northwest, from the earliest evidence of Muslims in the seventh and eighth centuries to the modern era. Emphasis on the analysis of primary sources in English. M 1:30–3:20

HIST 867b, Social History of the Chinese Silk Road Valerie Hansen
An introduction to artifacts and documents excavated from the most important sites on the Northern and Southern Silk Routes in China, including Niya, Kizil, Turfan, and Dunhuang. All assigned readings in English, but given sufficient student interest, a separate section can be formed for those wishing to read documents in classical Chinese from Turfan and Dunhuang. T 1:30–3:20
HIST 875b/EALL 565b, History and Literature of Modern China  Peter Perdue, Jing Tsu
Discussion of selected literary and historical texts of nineteenth- and twentieth-century China, including primary and secondary works. Readings are primarily in English, but Chinese and Japanese texts are included for students who can read them. Topics include violence in practice and imagination; national identity formation within and beyond mainland China; linguistic transformation and media technology; journalism, aesthetic values, and political activism; literature and political influence of Chinese in the diaspora; and others as determined by the class. Research paper required. W 9:25–11:15

HIST 884a, Readings in the History of Twentieth-Century Japan  Daniel Botsman
This course offers an overview of recent scholarship on the history of Japan in the twentieth century. Topics covered include the prewar Japanese empire, the legacies of the Meiji period, the meanings of “Taisho democracy” and “Showa fascism,” the Asia-Pacific Wars, the postwar “economic miracle” and its social consequences, gender relations, and environmental issues. W 1:30–3:20

HIST 887b, Research Seminar in Japanese History  Fabian Drixler
This seminar on Japan's early modern and modern history has three parts. We first read a number of outstanding books and articles to inform and inspire our own research agenda. We then familiarize ourselves with the different types of sources and reference materials. The final six weeks of the course are devoted to individual research projects, which we hone through several cycles of presentations, drafts, and peer review. While the course is designed for graduate students with a reading knowledge of Japanese, it welcomes participants who wish to pursue a Japan-centered project with sources in other languages. W 1:30–3:20

HIST 899a/HSHM 713a, Geography and History  William Rankin
A research seminar focused on methodological questions of geography and geographic analysis in historical scholarship. We consider approaches ranging from the Annales School of the early twentieth century to contemporary research in environmental history, history of science, urban history, and more. We also explore interdisciplinary work in social theory, historical geography, and anthropology and grapple with the promise (and drawbacks) of GIS. Students may write their research papers on any time period or geographic region, and no previous experience with geography or GIS is necessary. Undergraduates are admitted with permission. M 1:30–3:20

HIST 900b/HSHM 716b, Early Modern Science and Medicine  Paola Bertucci
The course focuses on recent works in the history of science and medicine in the early modern world. We discuss how interdisciplinary approaches—including economic and urban history, sociology and anthropology of science, gender studies, art and colonial history—have challenged the classic historiographical category of “the Scientific Revolution.” We also discuss the avenues for research that new approaches to early modern science and medicine have opened up, placing special emphasis on the circulation of knowledge, practices of collecting, and visual and material culture. T 1:30–3:20
HIST 902a/EAST 525a/EMD 588a/HSHM 707a, Impact of Epidemic Disease in Context: Focus on Asia  William Summers
The course brings historical, geopolitical, medical, and public health perspectives to bear on the study of specific epidemics, with a focus on Asia. Case studies include major epidemics such as cholera in the Philippines and plague in Manchuria in the early twentieth century, the story of Japan’s biological warfare Unit 731 in World War II, recurrent influenza pandemics, and more recently, Nipah virus outbreaks in Malaysia, SARS in China, and pneumonic plague in Gujarat, India. T 3:30–5:20

HIST 921a/HSHM 710a, Methods for the Social Studies of Science, Technology, and Medicine  Joanna Radin
Exploration of the methods and debates in the social studies of science, technology, and medicine. This course covers the history of the field and its current intellectual, social, and political positioning. It emphasizes the debates on constructivism and relativism and provides critical tools to address the relationships among science, technology, medicine, and society.

HIST 930a/AMST 878a/HSHM 701a, Problems in the History of Medicine and Public Health  John Harley Warner
An examination of the variety of approaches to the social, cultural, and intellectual history of medicine, focusing on the United States. Reading and discussion of the recent scholarly literature on medical cultures, public health, and illness experiences from the early national period through the present. Topics include the role of gender, class, ethnicity, race, religion, and region in the experience of health care and sickness and in the construction of medical knowledge; the interplay between lay and professional understandings of the body; the role of the marketplace in shaping professional identities and patient expectations; citizenship, nationalism, and imperialism; and the visual cultures of medicine. W 1:30–3:20

HIST 931b/HSHM 702b, Problems in the History of Science  William Rankin
Close study of recent secondary literature in the history of the physical and life sciences. An inclusive overview of the emergence and diversity of scientific ways of knowing, major scientific theories and methods, and the role of science in politics, capitalism, war, and everyday life. Discussions focus on historians’ different analytic and interpretive approaches. M 1:30–3:20

HIST 938a/HSHM 676a/LAW 20332, The Engineering and Ownership of Life  Daniel Kevles
The seminar explores the historical development of intellectual property protection in living matter. Focusing on the United States in world context, it examines arrangements outside the patent system as well as within it. Topics include agriculture, medicine, biotechnology, and law. May be taken as a reading or research course. W 3:30–5:20

HIST 943b/HSHM 736b/WGSS 730b, Health Politics, Body Politics  Naomi Rogers
A reading seminar on struggles to control, pathologize, and normalize human bodies, with a particular focus on science, medicine, and the state, both in North America and in
a broader global health context. Topics include colonialism and prostitution; repression and regulation of birth control; the teaching of sex education; the public celebration and denial of sexual difference; politics of sexually transmitted diseases, including HIV/AIDS; public health and legal efforts to define and restrict abortion; the pathologizing and identity politics of transgendered people; and the development and regulation of artificial insemination and other methods of reproductive technology.

**HIST 957au/JDST 767au, Marriage and Kinship in Medieval Near East**
Eve Krakowski

Kinship relationships and family life in the Cairo Geniza documents. The legal and social construction of marriage; parents and children; the structure and function of the extended patriarchal family; slaves and other non-kin in the household; kinship and social capital. MW 11:35–12:50

**HIST 958bu/JDST 771bu/RLST 769bu, Jewish Law in the Islamic State, 900–1500**
Eve Krakowski

Jewish legal identity and the social practice of Jewish law in the medieval Islamic Near East. Islamic political contexts of Jewish communal institutions; leadership, authority, and coercion; practices and functions of legal courts; comparative readings of response, legal documents, and prescriptive legal codes. T 9:25–11:15

**HIST 959bu/JDST 794bu, Early Modern Jewish History, 1450–1789**
Marc Saperstein

A study of Jewish historical experience during the transitional period from the Expulsion of 1492, which ended the millennial experience of Jews in Spain, to the French Revolution, which elevated Jews to a status of equality in a framework that refused to recognize distinctions of legal status. The course examines the dynamics of Jewish life in Portugal, Italy, Germany, eastern Europe, Amsterdam, and England. Challenges to traditional Jewish life are highlighted: skeptical critique of Jewish tradition, the messianic movement of Sabbatai Zevi, Hasidism, and Haskalah (Enlightenment). Emphasis is on new trends in historiography (studies written in the past generation by American and Israeli scholars). T 1:30–3:20

**HIST 965a/ANTH 541a/F&ES 836a/PLSC 779a, Agrarian Societies: Culture, Society, History, and Development**
Peter Perdue, James Scott, Kalyanakrishnan Sivaramakrishnan

An interdisciplinary examination of agrarian societies, contemporary and historical, Western and non-Western. Major analytical perspectives from anthropology, economics, history, political science, and environmental studies are used to develop a meaning-centered and historically grounded account of the transformations of rural society. Team-taught. TH 1:30–5:20

**HIST 971a, History and Memory**
Jay Winter

This seminar explores the historical literature surrounding issues of individual memory, collective memory, and commemoration. The focus is on twentieth-century Europe, though the literature surveyed addresses issues beyond the confines of Europe. After a survey of interdisciplinary approaches to the field focusing on social agency,
representation, trauma studies, and cognitive psychological research, two different kinds of evidence are examined. The first relates to historical sites—monuments, ruins, battlefields, landscapes—as well as social spaces—families, trials, museums; the second to representations and languages of remembrance through the narratives of mental illness, fiction, memoir, testimonial literature, photography, and film. The focus is on civil society rather than primarily on the state and its manipulations of commemorative forms.

T 1:30–3:20

HIST 979b/JDST 788b/RLST 768b, Holocaust in Historical Perspective
Marc Saperstein
A survey of the major historical issues raised by the Holocaust, including the roots of Nazism; different theoretical perspectives and ways of accounting for genocide; the behavior of perpetrators, victims, and bystanders; and problems of representation.
TTH 10:30–11:20, 1 HTBA

HIST 980a, Genocide in History and Theory
Benedict Kiernan
Comparative research and analysis of genocidal occurrences from ancient times to the present; theories and case studies; and interregional, interdisciplinary perspectives.
Readings and discussion, guest speakers, research paper.
TH 1:30–3:20

HIST 981a, The Body in Modern Warfare
Bruno Cabanes
Interdisciplinary study of modern warfare as bodily experience. Topics include masculinity, primary groups, and warfare; gender relations; wounds and mutilations; torture, trauma; homecoming of disabled veterans.
M 3:30–5:20

HIST 985b/MGT 984b/PLSC 715b, Studies in Grand Strategies, Part I
John Gaddis, Charles Hill
This two-term course begins in January with readings in classical works from Sun Tzu to Clausewitz to Kissinger. Students identify principles of strategy and examine the extent to which these were or were not applied in historical case studies from the Peloponnesian War to the post-Cold War period. During the summer students undertake research projects or internships designed to apply resulting insights to the detailed analysis of a particular strategic problem or aspect of strategy. Written reports are presented and critically examined early in the fall term. Students must take both terms, fulfill the summer research/internship, and attend additional lectures to be scheduled throughout the spring and fall terms. Admission is by competitive application only; deadline is early November. Please visit www.yale.edu/iss/gs for application information.
M 3:30–5:20

HIST 985a/MGT 984a/PLSC 716a, Studies in Grand Strategies, Part II
John Gaddis, Paul Kennedy, Charles Hill
Part II of the two-term linked seminar offered during the calendar year 2012. Research seminar.
M 3:30–5:20

HIST 987a, The Holocaust and the Historians
Timothy Snyder
An evaluation of classical and recent historiography on the Holocaust, with emphasis on critical issues such as causality, comparability, ideology, motivation, and collaboration. A research course with multiple brief writing assignments and a longer paper.
TH 3:30–5:20
HIST 988b, Readings in the History of War  Bruno Cabanes
Readings and discussion of major works on the history of war in the modern era. T 7–8:50

HIST 994a/b, Oral Exam Tutorial
Graded Satisfactory/Unsatisfactory.

HIST 995a/b, Prospectus Tutorial
Graded Satisfactory/Unsatisfactory.

HIST 998a/b, Directed Readings
Offered by permission of the instructor and DGS to meet special requirements not covered by regular courses. Graded Satisfactory/Unsatisfactory.

HIST 999a/b, Directed Research
Offered by arrangement with the instructor and permission of DGS to meet special requirements.
HISTORY OF ART

Loria Center, Rm. 252, 203.432.2668
www.yale.edu/arthistory
M.A., M.Phil., Ph.D.

Chair
Edward Cooke, Jr. (Loria 654, 203.432.2724, edward.cooke@yale.edu)

Director of Graduate Studies
Christopher Wood (Loria 751, 203.432.2674, christopher.wood@yale.edu)

Professors  Brian Allen (Adjunct), Carol Armstrong, Tim Barringer, Edward
Cooke, Jr., David Joselit, Diana Kleiner, Kobena Mercer, Amy Meyers (Adjunct), Mary
Miller, Robert Nelson, Jock Reynolds (Adjunct), Vincent Scully (Emeritus), Robert
Thompson, Christopher Wood, Mimi Hall Yiengpruksawan

Associate Professors  Milette Gaifman, Kishwar Rizvi

Assistant Professors  J. D. Connor, Erica James, Jacqueline Jung, Joost Keizer, Youn-mi
Kim, Tamara Sears, Sebastian Zeidler

Lecturers  Mia Genoni, Jennifer Gross

Fields of Study
Fields include Greek and Roman; Medieval and Byzantine; Renaissance; Early Modern;
eighteenth-, nineteenth-, and twentieth-century European; Modern Architecture; Afri-
can; African American; American; American Decorative Arts; British; Pre-Columbian;
Islamic; Chinese; Japanese; South Asian; and Film.

Special Requirements for the Ph.D. Degree
Students in the history of Western art must pass examinations in German and one other
language pertinent to their field of study. One examination must be passed during the
first year of study, the other not later than the beginning of the third term. Students of
non-Western art must qualify in two languages selected by agreement with the adviser
and the director of graduate studies (DGS). They have an extra year in which to do so.
During the first two years of study, students normally take twelve term courses. Normally
by March of the second year, students submit a qualifying paper that should demonstrate
the candidate’s ability successfully to complete a Ph.D. dissertation in art history. During
the fall term of the third year, students are expected to take the qualifying examination.
Candidates must demonstrate knowledge of their field and related areas, as well as a good
grounding in method and bibliography. By the end of the second term of the third year,
students are expected to have established a dissertation topic. A prospectus outlining
the topic must be approved by a committee at a colloquium by the end of the third year.
Students are admitted to candidacy for the Ph.D. upon completion of all predissertation
requirements, including the prospectus and qualifying examination. Admission to can-
didacy must take place by the end of the third year.
The faculty considers teaching to be an important part of the professional preparation of graduate students. Students are required to do four terms of teaching. This requirement is fulfilled in the second and third years. Students may also serve as a graduate research assistant at either the Yale University Art Gallery or the Yale Center for British Art. This can be accepted in lieu of one or two terms of teaching, but students may accept a graduate research assistant position at any time after the end of their first year. Application for these R.A. positions is competitive.

**Combined Ph.D. Programs**

**HISTORY OF ART AND AFRICAN AMERICAN STUDIES**

The Department of the History of Art offers, in conjunction with the Department of African American Studies, a combined Ph.D. in History of Art and African American Studies. Students in the combined-degree program must take five courses in African American Studies as part of the required twelve courses and are subject to the language requirement for the Ph.D. in History of Art. The dissertation prospectus and the dissertation itself must be approved by both History of Art and African American Studies. For further details, see African American Studies.

**HISTORY OF ART AND FILM STUDIES**

The Department of the History of Art offers, in conjunction with the Film Studies Program, a combined Ph.D. in the History of Art and Film Studies. Students are required to meet all departmental requirements, but many courses may count toward completing both degrees at the discretion of the directors of graduate studies in History of Art and Film Studies. For further details, see Film Studies.

**HISTORY OF ART AND RENAISSANCE STUDIES**

The Department of the History of Art offers, in conjunction with the Renaissance Studies Program, a combined Ph.D. in the History of Art and Renaissance Studies. For further details, see Renaissance Studies.

**The Center for the Study of American Art and Material Culture**

The Center for the Study of American Art and Material Culture provides a programmatic link among the Yale faculty, museum professionals, and graduate students who maintain a scholarly interest in the study, analysis, and interpretation of American art and material culture. It brings together colleagues from a variety of disciplines – from History of Art and American Studies to Anthropology, Archaeological Studies, and Geology and Geophysics – and from some of Yale’s remarkable museum collections, from the Art Gallery and Peabody Museum to Beinecke Library. Center activities will focus upon one particular theme each year and will include hosting one or more visiting American Art and Material Culture Fellows to teach a course each term and interact with Yale colleagues; weekly lunch meetings in which a member makes a short presentation centered on an artifact or group of artifacts followed by lively discussion about methodology, interpretation, and context; and an annual three-day Yale-Smithsonian Seminar on Material Culture.
Master’s Degrees

M.Phil. See Degree Requirements under Policies and Regulations. Additionally, students in the History of Art are eligible to pursue a supplemental M.Phil. degree in Medieval Studies. For further details, see Medieval Studies.

M.A. (en route to the Ph.D.) This degree is awarded after the satisfactory completion of eight term courses and after evidence of proficiency in one required foreign language.

Program materials are available upon request to the Director of Graduate Studies, Department of the History of Art, Yale University, PO Box 208272, New Haven CT 06520–8272.

Courses

HSAR 500a, Introduction to the History of Art  Christopher Wood
How have cultures figured the historicity of art to themselves? How are ideas about representation, performance, objecthood, materiality, art, originality, individuality, divinity, modernity, technology, time, and meaning registered in art historical paradigms? How has art-writing interacted with art-making? What is the genealogy of the modern academic discipline of art history? How are art history, art criticism, and philosophy of art differentiated? What are the tensions and affinities between art history and other fields of thought and research? These questions are approached through readings and discussion. This course is normally limited to first-year graduate students in History of Art. M 1:30–3:20

HSAR 506a or b, The Teaching of the History of Art
By arrangement with faculty. History of Art graduate students only.

HSAR 512a or b, Directed Research
By arrangement with faculty.

HSAR 514a or b, Graduate Research Assistantship

HSAR 558b/CLSS 827b, Materiality in Greek Art  Milette Gaifman
This course takes advantage of recent scholarship in Classical art history in order to focus on the importance of media such as marble, bronze, clay, ivory, and gems in ancient visual culture. We examine the relationship between materials, technology, style, and subject matter across a range of contexts, such as the role played by bronze in the development of Greek naturalism; the influence of chryselephantine techniques on depictions of the gods; the relationship between colored marbles and the iconography of political power; and the use of precious and semiprecious stones as personal seals. Throughout, our emphasis is not only on the relationship between medium and facture, but also on the phenomenological qualities of different materials and their influence on ancient habits of viewing and representation. As the second class to be taught as part of the Yale-Cornell Consortium for the Study of Ancient Art, this course will also bring students of both institutions together in a mini-conference at Cornell University, combining student presentations with a workshop focused on the Cornell cast collection, in which we consider the relationship between materiality, replication, and the historiography of ancient sculpture. W 2:30–4:20
HSAR 581a/CLSS 890a, Roman Painting: Achievement and Legacy  Diana Kleiner
Roman mural painting in all its aspects and innovations. Individual scenes and complete ensembles in palaces, villas, and houses in Rome and Pompeii are explored, as are their rediscovery and revival in the Renaissance and Neo-Classical period. Special attention is paid to the four architectural styles; history and mythological painting; the impact of the theater; the part played by landscape, genre, and still life; the accidental survival of painted portraiture; and the discovery and rejection of trompe l’oeil illusionism and linear perspective. T 1:30–3:20

HSAR 588a, Studies in Medieval Sculpture, 900–1500  Jacqueline Jung
For much of the period known as the Middle Ages, figural sculpture — both monumental works affixed to buildings and independent pieces displayed on altars and shrines — was the artistic medium most familiar, accessible, and powerful to men and women of all social stations and ranks. For much of the history of art history, medieval figural sculpture was the field on which the greatest practitioners of the discipline, from Panofsky to Shapiro to Baxandall, trained their sights. Yet in the latter half of the twentieth century, in the wake of the impact of iconographical and sociohistorical methods of inquiry, medieval sculpture receded from the center of North American art history. Through a series of case studies of important sculptural objects and monuments, principally from France and Germany — including reliquary statues, tomb effigies, crucifixes, altarpieces, and the great sculpture programs of Romanesque and Gothic buildings — this seminar reexamines the place of medieval sculpture both in the larger history of figural arts and in the history of our discipline. Although we pay close attention to the formal and iconographical peculiarities of the respective works, special emphasis is placed on their mediating function for distinct audiences and their shifting conditions of production and reception. Readings include classic texts by Hans Belting, Michael Baxandall, Ilene Forsyth, Émile Mâle, Erwin Panofsky, Meyer Shapiro, and Wilhelm von, as well as more recent literature. Reading knowledge of French and German is strongly recommended. T 1:30–3:20

HSAR 605b/RUSS 603b, Russian Realist Literature and Painting  Molly Brunson
An interdisciplinary examination of the development of nineteenth-century Russian Realism in the literary and visual arts. Topics include the Natural School and the formulation of a realist aesthetic; the artistic strategies and polemics of critical Realism; narrative, genre, and the rise of the novel; the Wanderers and the articulation of a Russian school of painting. Readings include novels, short stories, and critical works by Dostoevsky, Turgenev, Goncharov, Tolstoy, Chekhov, and others. Painters of focus include Fedotov, Perov, Shishkin, Repin, and Kramskoy. Special attention is given to the particular methodological demands of inter-art analysis. TH 1:30–3:20

HSAR 607a, Medieval Revivals  Robert Nelson
In some senses, the Middle Ages never ceased. Cathedrals continued to be used, manuscripts preserved and treasured, liturgies celebrated. In another sense, the term itself suggests something in the past, and after the Renaissance and especially the Enlightenment, the medieval period again gained favor. This course looks at the creation and collecting of medieval art from the eighteenth into the twentieth century for its contributions to the art and architecture of those years and the impact upon scholarship of medieval art. W 1:30–3:20
HSAR 609b, Venice and Byzantium  Robert Nelson
The history of Venice’s artistic interactions with Byzantium. While that history spanned the centuries of the Middle Ages and the Mediterranean east of Venice, the course focuses on Venice itself and the political, religious, and artistic uses it made of Byzantine artifacts during and after the medieval period. T 1:30–3:20

HSAR 647a/CPLT 647a/FILM 704a, Perspectives on the Panorama  Tim Barringer, Katie Trumpener
This course explores the cultural, aesthetic, and historical significance of the panorama. The first panoramas were massive 360-degree paintings generating a sense of immersion in an event or environment. Later panoramas took many shapes, anticipating the formats of photography, film, and digital imagery. We treat the panorama as a utopian, imperial, and didactic medium, tracing its cultural impact on painting, literature, popular culture, and contemporary art. We devote particular attention to its afterlife in cinema, from the earliest moving pictures to postwar experimental works and a long series of feature films with key panoramic sequences. T 1:30–3:20

HSAR 682a, The Genre of Still Life  Carol Armstrong
This seminar concerns the history of still-life painting and photography from the seventeenth through the twentieth century, with an emphasis on the nineteenth century in France. We consider the genre of painting that was the lowest on the old hierarchy of genres as a site of contemplation of the following themes of modernity and modernism: materiality and commodification, medium-specificity, the gendering of the private sphere, fetishism, fantasy and displacement, subject/object relations, relations between the optical and the tactile, and the transformation of the artist’s studio. We also consider the theory of the genres to which this particular genre belonged. M 3:30–5:20

HSAR 687b, The Photographic Book  Carol Armstrong
This seminar looks at the history of the photographic book from the moment of the announcement of photography’s invention in France and England to the present time. Using the rich resources in Yale’s collections (the Beinecke, the Yale Art Gallery, and the Yale Center for British Art) as well as elsewhere (the New York Public Library, for one), we consider the variety of things the photographic book has been and is now, both in context and in depth: books about photography itself; scientific books; travel and other kinds of albums; books of poetry and literature illustrated with photographs; documentary picture-stories; the photo-illustrated press; artist’s books and portfolios; and so on. In short, we consider the photograph as the library’s, more than the museum’s, subject. Topics addressed include notions of scientific evidence; questions of narrative; the relation between the visual and the verbal, the artist and the writer; the history of print mediums and photomechanical reproduction; the printing press, different mediums of illustration, and the specificity of the photograph; the series, sequencing, and the role of editing; the relation of the book to film and video. The seminar is conducted through reading assignments, in-class discussions, visits to the above-mentioned collections, and student presentations and papers, which are directed at close readings of individual books. M 3:30–5:20
**HSAR 688a, Soviet Constructivism**  Sebastian Zeidler

This seminar is designed as an introduction to one of the pivotal moments of modern art: the decade after 1917, when a generation of Russian artists suddenly found themselves empowered to invent a revolutionary art to match a successful political revolution. We consider the spectacular breadth of the efforts by Malevich, Lissitzky, Tatlin, Rodchenko, and others to meet that daunting brief across all media and genres, whether with painting, photography, exhibition design, or the Constructivist “object.” Up to one-third of the seminar is devoted to architecture. TH 3:30–5:20

**HSAR 693b, Popular, Prosaic, Profane: European Art 1250–1550**  Christopher Wood

Hans Blumenberg argued that modern art did not open onto its full potential until it introduced subjective and self-realizing experience as its content. Adapting Husserl’s concept of the life-world (*Lebenswelt*), Blumenberg suggested that we need to be open to the idea of “pre-critical” experiential reality if we are going to understand the momentum of art in the modern world. This seminar tests this hypothesis by taking as its topic the introduction of factual reality, the rhythms of everyday life, sensual and affective experience, and the lay, vernacular point of view into sacred art in Europe of the late middle ages and early modern period. One guiding text is Erich Auerbach's *Mimesis: The Representation of Reality in Western Literature*, which despite its fame has never had much resonance in art history. The seminar addresses the representation of domesticity, labor, and leisure; portraiture; anecdote and storytelling; “popular culture,” “folklore,” and “folk art”; satire and parody as secularizing forces; exoteric vs. esoteric religion; the boundary between sacred and profane. This is a research seminar; students are expected to conduct original research using primary sources. W 3:30–5:20

**HSAR 694b/CPLT 694b/ENGL 967b, Edwardian Modernities**  Tim Barringer, Angus Trumble

This seminar explores the complex and heterogeneous culture of Edwardian Britain and its empire, 1901–1910, and in the following years leading to the First World War. Recent scholarship has emphasized the transitional nature of Edwardian culture. Radical shifts in social, political, and economic structures, and demands for the representation of women, for Indian and Irish independence, coincided with displays of opulence and imperial bravado. New technologies such as the motor car proliferated, and popular culture took on distinctively modern forms through the music halls, illustrated press, gramophone, and cinema. This was the moment of the emergence of distinctively British forms of modern art, literature, and music. Particular emphasis is placed on relationships between the arts: paintings by Sargent, Orpen, Conder, and Vanessa Bell; the literary work of Hardy, H.G. Wells, and Rudyard Kipling; and music by Elgar, Delius, and Vaughan Williams. Architecture and urbanism in Britain, its colonies, and dominions are also considered. The seminar is organized to coincide with the major exhibition *Edwardian Opulence* at the Yale Center for British Art, and it concludes with a trip to the UK to explore sites and collections especially redolent of the Edwardian era, including London’s imperial institutions, museum architecture and collections, the country houses of Edwin Lutyens, and the gardens of Gertrude Jekyll. W 1:30–3:20
HSAR 710a/FILM 807a, Hollywood Classicism: Movies and Methods  J.D. Connor
Representative films in light of canonical and contemporary scholarship. Debates over classicism (rules, norms, subversion); authors (director, star, studio, genre); systematicity (origins, efflorescence, breakdown, and integration); aesthetics; and social and cultural determinants of production and reception. TH 1:30–3:20

HSAR 717b, The Société Anonyme: Modernism for America  Jennifer Gross
A seminar that reviews the history of the artists of the Société Anonyme and the singular contribution they made to art history through its programs and the collections deposited at Yale. Limited to twelve graduate students in the history of art or studio art. M 1:30–3:20

HSAR 715b, Cubism  Sebastian Zeidler
This seminar takes a close look at the work of Braque and Picasso circa 1907 to 1913, with sideways glances to Duchamp (painting) and Dada (collage). The idea is to use Cubist painting, an art that demands and rewards sustained attention, as a means of teaching graduate students a skill they ought to possess but frequently do not: visual analysis. Other, more theoretical issues (formalism, semiology, art and science) arise in due course and are dealt with accordingly. The seminar has a modernist focus, but everyone who wants to practice looking at art is welcome to join. TH 3:30–5:20

HSAR 730a/AMST 692a/JDST 799a, Religion and the Performance of Space  Margaret Olin, Sally Promey
This interdisciplinary seminar explores categories, interpretations, and strategic articulations of space in a range of religious traditions. In conversation with the work of theorists of space such as Henri Lefebvre, Michel de Certeau, and Jonathan Z. Smith, the seminar examines spatial practices of religion in the United States during the modern era, including the conception, construction, and enactment of religious spaces. It is structured around theoretical issues, including (historical) deployments of secularity as a framing mechanism, ideas about space and place, and relations between property and spirituality. Examples of case studies treated in class include the enactment of rituals within museums, the marking of religious boundaries such as the Jewish eruv, and the assignment of “spiritual” ownership in Hawai‘i Volcanoes National Park. Several campus events, including special lectures and symposia, the Religion and Film series, and a concurrent exhibition on the eruv, are coordinated with the seminar. Students make presentations and submit papers on topics of their choosing in consultation with the instructors. Prerequisite: permission of the instructors; qualified undergraduates are welcome. T 1:30–3:20

HSAR 737a/AMST 737a, Craft and Design in Post-World War II America  Edward Cooke, Jr.
In the two decades following World War II, economic prosperity and cultural optimism led to the golden age of American industrial design and the expansion of craft education programs in the universities. The term “designer/craftsman” was a respected label. Yet, by the 1970s, crafts, design, and art were three separate spheres. This seminar draws on period writings and artifactual examination to explore the interconnections of craft and design in the 1950s, their subsequent fragmentation, and recent attempts to build connections. W 9:25–11:15
HSAR 777b/AFAM 741b, Mambo in the Media, 1949–2011  
Robert Thompson
The impact of a midcentury dance on novels, films, aesthetic criticism, photography, and painting from 1949 to 2011. Discussion includes the novels of Jack Kerouac, Carlos Fuentes, and Gonzalo Martré; the films of Almodóvar and Fellini; and the history of mambo dance in Havana, Mexico City, New York, Tokyo, and London. TH 3:30–5:20

HSAR 778b/AFAM 728b/AFST 778b, From West Africa to the Black Americas: The Black Atlantic Visual Tradition  
Robert Thompson
Art, music, and dance in the history of key classical civilizations south of the Sahara—Mali, Asante, Dahomey, Yorùbá, Ejagham, Kongon—and their impact on the rise of New World art and music. TTH 11:35–12:50

HSAR 779a/AFAM 729a, New York Mambo: Microcosm of Black Creativity  
Robert Thompson
Art, music, and dance in the history of key classical civilizations of the world of New York mambo and salsa. Emphasis on Palmieri, Cortijo, Roena, Harlow, and Colón. Examination of panel traditions such as New York Haitian art, Dominican merengue and rastas of Jamaican Brooklyn, and the New York school of Brazilian capoeira. TTH 11:35–12:50

HSAR 780a/AFAM 727a, Running Backs and Wide Receivers: The Influence of African Dance on American Sport  
Robert Thompson
Starting with an intensive study of the main organizing principles in African dance and their variations among four key civilizations, Mandé, Yorùbá, Igbo, and Kongo, the seminar systematically compares these traits and gestures first with key black American dancing and then with action styles in black American sport. Emphasis is given to the transformation of soccer by the black superstar Pelé, and black influence in the reshaping of NFL football. TH 3:30–5:20

HSAR 785a/AFAM 736a/WGSS 788a, Bodies and Borders: Sexuality, Race, and Representation  
Kobena Mercer
Introducing methods from cultural studies, postcolonial studies, and psychoanalysis, this seminar examines representations of black bodies in modern art and visual culture. Abolitionist, Orientalist, and primitivist painting and sculpture are investigated through concepts of fetishism, fantasy, and the gaze, and in light of post-1960s artistic practices addressing interracial border zones as sites of cross-cultural hybridity. Artists include Carl Van Vechten, Wifredo Lam, Adrian Piper, Robert Mapplethorpe, Kara Walker, and Renée Cox; texts include Mikhail Bakhtin, Homi Bhabha, Frantz Fanon, and Griselda Pollock. TH 1:30–3:20

HSAR 786b/AFAM 745b, Black Atlantic Visual Arts since 1980  
Kobena Mercer
Surveying developments by which African American and other Black Atlantic artists have questioned the core tenets of twentieth-century modernism, this seminar explores aesthetic strategies alongside contextual shifts from multiculturalism to globalization, thus introducing contemporary conceptions of diaspora. Artists include Alison Saar, Kerry James Marshall, Glenn Ligon, Keith Piper, Lorna Simpson, Fred Wilson, Yinka Shonibare, Kehinde Wiley, Mickalene Thomas; texts include Guy Brett, Okwui Enwezor, Jean Fisher, Nikos Papastergiadis, Michele Wallace, Judith Wilson. TH 1:30–3:20
The emergence of the Indian temple, as a monument fashioned through the medium of stone, in the fifth century marked a critical moment in the history of world architecture. The temple, as it evolved over the course of the first millennium, became both a highly complex architectural form and a supremely symbolic monument that worked at the levels of both ritual and space. This seminar examines the materiality and meanings of Indian temples through architectural form, sculptural imagery, and religious contexts. Readings include a range of scholarly essays on Indian architecture, religion, philosophy, and architectural theory as well as primary textual sources (all accompanied by English translations). Class sessions consist of both discussions and hands-on workshops that may better allow the group to interrogate the nature of the architecture through an exploration of the processes of its making and its potential as a medium. In addition, we consider the agency of the temple’s various audiences, including patrons and architects, sculptors and stonemasons, and a wide range of devotional communities.  

HSAR 788b, The Temple in Southern Asia  
Tamara Sears

W 1:30–3:20
HISTORY OF SCIENCE AND MEDICINE

The Graduate Program in the History of Science and Medicine is a semi-autonomous graduate track within the Department of History. The program’s students are awarded degrees in History, with a concentration in the History of Science and Medicine.

207 Hall of Graduate Studies, 203.432.1365
http://hshm.yale.edu
M.A., M.Phil., Ph.D.

Chair
Frank Snowden

Director of Graduate Studies
John Warner [F]
To be announced [Sp]

Faculty
Paola Bertucci (History), Mariola Espinosa (History of Medicine), Daniel Kevles (History), Joanna Radin (History of Medicine), William Rankin (History), Naomi Rogers (History of Medicine; Women’s, Gender & Sexuality Studies), Frank Snowden (History; History of Medicine), William Summers (Molecular Biophysics & Biochemistry), John Harley Warner (History of Medicine; History)

Affiliated Faculty
Toby Appel (Librarian for Medical History), Bruno Cabanes (History), Veronika Grimm (Classics), Dimitri Gutas (Near Eastern Languages & Civilizations), Ann Hanson (Classics), Bettyann Kevles (History), Jennifer Klein (History), Michael McBride (Chemistry), Joanne Meyerowitz (History), Amy Meyers (Center for British Art), Alan Mikhail (History), Sherwin Nuland (Surgery), Kevin Repp (Curator, Modern European Books & Manuscripts, Beinecke Library), Cynthia Russett (History), Paul Sabin (History), Gordon Shepherd (Neuroscience), Rebecca Tannenbaum (History), Jenifer Van Vleck (History)

Fields of Study
All subjects and periods in the history of science and history of medicine, especially the modern era. Special fields represented include American and European science and medicine; disease, therapeutics, psychiatry, drug abuse, and public health; physics; science and national security; science and law, science and religion, life sciences, human genetics, eugenics, molecular biology, biotechnology, microbiology, intellectual property, gender, race, and science/medicine; bioethics and medical research.

Special Admissions Requirements
Applicants should have a strong undergraduate background in history and in a science relevant to the direction of their graduate interests. These requirements will be applied with flexibility, and outstanding performance in any field pertinent to the program will be taken into consideration.
Special Requirements for the Ph.D. Degree

Either French and German or two languages relevant to the student’s research interests and approved by the director of graduate studies (DGS) of the program. Students may fulfill the requirement either by passing an approved language course for credit or by passing a language test administered by the program faculty.

Students will ordinarily take twelve term courses during the first two years. All students will normally take the two-term core seminar sequence HSHM 701a/702b or equivalents, HSHM 710a, four additional graduate seminars in history of science or medicine, and at least one graduate course in a field of history outside of science or medicine. The remaining courses can be taken in history of medicine or science, history, science, or any other field of demonstrated special relevance to the student’s scholarly objectives. Two of the twelve courses must be graduate research seminars in the History of Science and Medicine.

During the first two years of study, students must achieve Honors in at least two courses in the first year and Honors in at least four courses by the end of the second year, with a High Pass average overall. If a student does not meet this standard by the end of the first or second year, the relevant members of the department will consult and promptly advise the student whether the student will be allowed to register for the fall of the following academic year.

Students who enter having previously completed graduate work may obtain some credit toward the completion of the total course requirement, the amount being contingent on the extent and nature of the previous work and its fit with their intended course of study at Yale.

All students are expected, prior to entering on their dissertation work, to develop a broad general knowledge of the discipline. This knowledge may be acquired through a combination of course work taken at Yale or elsewhere, regular participation in the program colloquia and workshops, and preparation for the qualifying oral examination.

Students will normally spend the summer following their second year preparing for the oral qualifying examination, which will be taken in the third year, preferably during the first half.

The qualifying examination will cover four areas of chosen concentration:

1 & 2. two fields in the history of science and/or history of medicine;
3. a field in an area of history outside of medicine and/or science;
4. a field of special interest, the content and boundaries to be established with the adviser for the field. The student may elect to do a second field in history outside of history of science or medicine; or a field in one of the sciences; or a field in a subject such as bioethics, health policy, public health, medical anthropology, medical sociology, science and law, science and national security, science and religion, science and culture, biotechnology, gender, science and medicine; race, science and medicine, or cultural studies.

During their first term in the program, all students will be advised by the DGS. During the second term and thereafter, each student will be advised by a faculty member of his or her choosing. The adviser will provide guidance in selecting courses and preparing for the qualifying examination. The adviser may also offer help with the development of
ideas for the dissertation, but students are free to choose someone else as the dissertation supervisor when the time comes to do so. Students are encouraged to discuss their interests and program of study with other members of the faculty.

Students are encouraged to begin thinking about their dissertation topics during the second year. They are required to prepare a dissertation prospectus as soon as possible following the qualifying examination and to defend the prospectus orally before being admitted to full candidacy for the doctoral degree. Ordinarily the prospectus defense is held in the second term of the third year, with advancement to candidacy before the start of the fourth year.

Teaching is an important part of the professional preparation of graduate students in History of Science and Medicine. Students will teach, usually in the third and fourth years of study. They may, however, teach in the second term of the second year, deferring the completion of their required course work to the first term of the third year. Students are also encouraged to participate in the programs to develop teaching skills offered by the Graduate School. Two terms of teaching are required of all students; four terms are required of students on Yale-supported fellowships.

In the fourth or fifth year, and preferably no later than the fall term of the fifth year, students are required to submit a chapter of the dissertation (not necessarily the first chapter) to the dissertation committee. This chapter will then be discussed with the student by members of the committee, preferably in a colloquium, to give the student additional advice and counsel on the progress of the dissertation. This conference is designed to be an extension of the conversation begun in the prospectus defense and is not intended as another defense; its aim is to give students early feedback on the research, argument, and style of the first writing accomplished on the dissertation.

**M.D./Ph.D. and J.D./Ph.D. Joint-Degree Programs**

Students may pursue a doctorate in History of Science and Medicine jointly with a degree in Medicine or Law. Standard graduate financial support is provided for the doctoral phase of work toward such a joint degree. Candidates for the joint degree in Law must apply for admission to both the Law School and the Graduate School. Information about the joint-degree program with Medicine can be obtained from the Web site of the Yale School of Medicine (http://medicine.yale.edu/mdphd) and from the Web site of the Section of the History of Medicine (http://medicine.yale.edu/histmed).

**Master’s Degrees**

**M.Phil. and M.A. (en route to the Ph.D.)** See Degree Requirements under Policies and Regulations.

**Terminal Master’s Degree Program** The terminal M.A. program is designed particularly for those who plan to combine teaching or scholarship in these fields with a professional career in medicine or science. Students who enroll in the terminal master’s degree program leading to the M.A. are expected to complete six term courses during two terms of study, to fulfill one foreign language requirement, and to submit an acceptable master’s paper. Course work must include the graduate seminar HSHM 701a/702b and one
additional graduate seminar in history of science or medicine. The remaining courses are
to be chosen in consultation with the DGS or a faculty adviser.

For more information about the History of Science and Medicine program and admission
to the Graduate School, see http://hshm.yale.edu and www.yale.edu/graduateschool/
admissions; or contact Barbara McKay (barbara.mckay@yale.edu).

Courses

HSHM 676a/HIST 938a/LAW 20322, The Engineering and Ownership of Life
Daniel Kevles
The seminar explores the historical development of intellectual property protection in
living matter. Focusing on the United States in world context, it examines arrangements
outside the patent system as well as within it. Topics include agriculture, medicine, bio-
technology, and law. May be taken as a reading or research course. W 3:30–5:20

HSHM 701a/AMST 878a/HIST 930a, Problems in the History of Medicine and
Public Health John Harley Warner
An examination of the variety of approaches to the social, cultural, and intellectual his-
tory of medicine, focusing on the United States. Reading and discussion of the recent
scholarly literature on medical cultures, public health, and illness experiences from the
early national period through the present. Topics include the role of gender, class, eth-
nicity, race, religion, and region in the experience of health care and sickness and in the
construction of medical knowledge; the interplay between lay and professional under-
standings of the body; the role of the marketplace in shaping professional identities and
patient expectations; citizenship, nationalism, and imperialism; and the visual cultures
of medicine. W 1:30–3:20

HSHM 702b/HIST 931b, Problems in the History of Science William Rankin
Close study of recent secondary literature in the history of the physical and life sciences.
An inclusive overview of the emergence and diversity of scientific ways of knowing,
major scientific theories and methods, and the role of science in politics, capitalism, war,
and everyday life. Discussions focus on historians’ different analytic and interpretive
approaches. M 1:30–3:20

HSHM 707a/EAST 525a/EMD 588a/HIST 902a, Impact of Epidemic Disease in
Context: Focus on Asia William Summers
The course brings historical, geopolitical, medical, and public health perspectives to bear
on the study of specific epidemics, with a focus on Asia. Case studies include major epi-
demics such as cholera in the Philippines and plague in Manchuria in the early twentieth
century, the story of Japan’s biological warfare Unit 731 in World War II, recurrent influ-
enza pandemics, and more recently, Nipah virus outbreaks in Malaysia, SARS in China,
and pneumonic plague in Gujarat, India. T 3:30–5:20

HSHM 710a/HIST 921a, Methods for the Social Studies of Science, Technology, and
Medicine Joanna Radin
Exploration of the methods and debates in the social studies of science, technology, and
medicine. This course covers the history of the field and its current intellectual, social,
and political positioning. It emphasizes the debates on constructivism and relativism and provides critical tools to address the relationships among science, technology, medicine, and society.

**HSHM 713a/HIST 899a, Geography and History**  William Rankin
A research seminar focused on methodological questions of geography and geographic analysis in historical scholarship. We consider approaches ranging from the Annales School of the early twentieth century to contemporary research in environmental history, history of science, urban history, and more. We also explore interdisciplinary work in social theory, historical geography, and anthropology and grapple with the promise (and drawbacks) of GIS. Students may write their research papers on any time period or geographic region, and no previous experience with geography or GIS is necessary. Undergraduates are admitted with permission. M $1:30–3:20$

**HSHM 716b/HIST 900b, Early Modern Science and Medicine**  Paola Bertucci
The course focuses on recent works in the history of science and medicine in the early modern world. We discuss how interdisciplinary approaches—including economic and urban history, sociology and anthropology of science, gender studies, art and colonial history—have challenged the classic historiographical category of “the Scientific Revolution.” We also discuss the avenues for research that new approaches to early modern science and medicine have opened up, placing special emphasis on the circulation of knowledge, practices of collecting, and visual and material culture. T $1:30–3:20$

**HSHM 736b/HIST 943b/WGSS 730b, Health Politics, Body Politics**  Naomi Rogers
A reading seminar on struggles to control, pathologize, and normalize human bodies, with a particular focus on science, medicine, and the state, both in North America and in a broader global health context. Topics include colonialism and prostitution; repression and regulation of birth control; the teaching of sex education; the public celebration and denial of sexual difference; politics of sexually transmitted diseases, including HIV/AIDS; public health and legal efforts to define and restrict abortion; the pathologizing and identity politics of transgendered people; and the development and regulation of artificial insemination and other methods of reproductive technology. W $1:30–3:20$

**HSHM 914a or b, Research Tutorial I**  By arrangement with faculty.

**HSHM 915a or b, Research Tutorial II**  By arrangement with faculty.

**HSHM 920a or b, Independent Reading**  By arrangement with faculty.

**HSHM 930a or b, Independent Research**  By arrangement with faculty.
IMMUNOBIOLOGY

Anlyan Center (TAC) S625, 203.785.3857
http://info.med.yale.edu/immuno
M.S., M.Phil., Ph.D.

Chair
Richard Flavell

Director of Graduate Studies
First-year students: David Schatz (203.737.2255; david.schatz@yale.edu)
Other students: Peter Cresswell (203.737.2157; peter.cresswell@yale.edu)

Student Services Officer
Barbara Giamattei (TAC S625, 203.785.3857, barbara.giamattei@yale.edu)

Professors  Jeffrey Bender (Internal Medicine), Alfred Bothwell, Lieping Chen, Joseph Craft (Internal Medicine), Peter Cresswell, Madhav Dhodapkar (Internal Medicine), Jack Elias (Internal Medicine), Richard Flavell, David Hafler (Neurology), Kevan Herold, Akiko Iwasaki, Paula Kavathas (Laboratory Medicine), Ruslan Medzhitov, Jordan Pober, Nancy Ruddle (Public Health), David Schatz, Mark Shlomchik (Laboratory Medicine), Robert Tigelaar (Dermatology)

Associate Professors  Tian Chi, Daniel Goldstein, Susan Kaech (on leave), Eric Meffre, Warren Shlomchik (Internal Medicine), Bing Su

Assistant Professors  João Pereira, Carla Rothlin

Fields of Study

The Immunobiology graduate program is designed to prepare students for independent careers in research and teaching in immunology or related disciplines. The educational program emphasizes interdisciplinary training and collaborative and interactive research, an approach based on the idea that solving difficult problems requires the integration of individuals with common goals but differing expertise. Graduate students are diverse in their interests and ethnic backgrounds, and more than 50 percent are women.

Research Areas

Research focuses on the molecular, cellular, and genetic underpinnings of immune system function and development, on host-pathogen interactions, and on a variety of autoimmune disorders. These research interests break down into six major themes, spanning almost all aspects of the immune system and its role in disease prevention.

Lymphocyte development  A central focus of research is to understand the molecular events underlying the development of B and T lymphocytes. Areas of major interest include the receptors and signals that control lymphocyte lineage commitment, cell maturation, cell proliferation, and cell death; the establishment of the proper environments
for lymphocyte development; mechanisms that regulate the state of chromatin during lymphocyte development; and the mechanisms by which antibody and T cell receptor genes are assembled and diversified.

**Mounting an immune response** An effective immune response requires the coordinated action of numerous cell types. A critical first step is the activation of cells of the innate immune system, including monocytes, macrophages, dendritic cells, and neutrophils; and the receptors and signaling molecules that control this process are under intensive study. The mechanism by which cells take up, process, and present antigen is a major interest, as is the recognition of this antigen by T cell receptors on T lymphocytes. Cytoplasmic signal transduction molecules, nuclear transcription factors, and mechanisms controlling gene expression are all under study.

**Regulating the immune response** The immune response is tightly regulated through the interaction of cell surface receptors with secreted cytokines and with one another, and the mechanisms by which these interactions exert their regulatory influences are studied in several laboratories. Another major interest is in learning how specialized cells or anatomic locations, such as vascular endothelial cells or the epidermis, regulate and direct the immune response.

**Consequences of an immune response** Apart from the obvious consequence of the elimination of an invading organism, an appropriate immune response results in immunological memory and large numbers of activated lymphocytes, which must be eliminated. The mechanisms controlling immunological memory, tolerance, and apoptosis, as well as those leading to autoimmunity, are a major interest of many faculty. Diabetes, multiple sclerosis, lupus, and rheumatoid arthritis are just some of the autoimmune diseases under study. Much of this work takes place in the context of the new Section of Human and Translational Immunology.

**Infectious disease and the host-pathogen interaction** A major interest is the study of infectious organisms—bacterial, viral, and parasitic—and the immune response to them. A great deal of effort is directed toward understanding the strategies used by infectious agents to avoid the immune system. HIV, HBV (hepatitis B virus), herpes simplex virus, parvoviruses, *Candida albicans*, *Borrelia burgdorferi* (the causative agent of Lyme disease), *Leishmania*, *Streptococcus pneumoniae*, and *Legionella pneumophila* are all under study.

**Structural analysis of immune system receptors and effectors** There is a growing interest in using structural approaches to understand the function of key molecules of the immune response. For example, a major effort is devoted toward understanding how the Toll-like receptors, despite their similarity in extracellular-ligand recognition regions, are able to specifically recognize such a wide variety of pathogen-associated molecular patterns (PAMPS). Another effort is aimed at understanding the mechanism of APOBEC enzymes in controlling viruses such as HIV.

**Facilities**

More than thirty laboratories are actively involved in research in immunology. Many share immediately adjoining or nearby laboratory space on the top three floors of the
Anlyan Center (TAC), and four faculty are funded by the Howard Hughes Medical Institute. The Department of Immunobiology provides one of the largest, highest-ranked integrated training programs in immunology in the country, led by a faculty with a reputation for excellence in research. The Department of Immunobiology maintains a wide variety of major equipment, and Dr. Richard Flavell, chair of the department, oversees a very active transgenic mouse/ES cell/knockout facility to which members of the department have access.

**Program Entry**

Most students enter the Immunobiology graduate program through the Immunology track of the Program in Biological and Biomedical Sciences (BBS). Other types of students enter from the M.D./Ph.D. program (see below), the MRSP (see below), or another BBS track, with approval of the Immunobiology director of graduate studies (DGS) and the faculty adviser.

The faculty and students of the BBS program are organized into interest-based tracks. Immunobiology, being one of eight tracks, encourages individualized attention to maximize scientific interactions. There is complete freedom to work with any of the 290 faculty members affiliated within any of the tracks and to take courses offered by any of the BBS departments or programs. Students are encouraged to supplement core courses in molecular and cellular immunology with additional courses selected from the wide range available in cell biology, molecular biology, developmental biology, biochemistry, genetics, pharmacology, molecular medicine, neurobiology, and bioinformatics. Research seminars and informal interactions with other graduate students, postdoctoral fellows, and faculty also form an important part of graduate education.

The section of Human Translational Immunology (HTI) is a new program administered by the Immunobiology department and located at 10 Amistad Street and 300 George Street. Its mission is to accelerate the application of new developments in the field of immunology to the treatment of human diseases. HTI faculty study the immunologic aspects of a very broad range of human diseases, encompassing investigations in the fields of cancer; transplantation of solid organs and stem cells; autoimmune diseases; and neurologic disease.

The Medical Research Scholars Program (MRSP) is open to students who have already been accepted into the BBS program. A separate application is also required, and is to be submitted to the BBS. A total of eight students each year (four first-years and four second-years) will be enrolled as Medical Research Scholars. They remain in their BBS tracks or departments but participate in the additional MRSP curriculum. The program bridges barriers between traditional predoctoral and medical training by providing Yale Ph.D. students with both medically oriented course work and a mentored clinical experience. This combination of medical knowledge and face-to-face interaction with patients and their doctors provides a new perspective to Ph.D. students and enhances the rigorous training in basic science already provided.

**Admission requirements** In addition to meeting general BBS requirements, applicants are expected to have a firm foundation in the biological and physical sciences. It is preferred that students have taken courses in biology, organic chemistry, biochemistry,
genetics, cell biology, physics, and mathematics. Actual course requirements, however, are not fixed, and students with outstanding records in any area of the biological sciences may qualify for admission. There are no specific grade requirements for prior course work, but a strong performance in basic science courses is of great importance for admission. In special cases, the Medical College Admission Test (MCAT) may be substituted.

**Special Requirements for the Ph.D. Degree**

Students are required to take seven courses for a grade in the Yale Graduate School.

Required graded courses for first- and second-year students are:

- IBIO 530a, Biology of the Immune System (Students have the option of passing out of 530 by taking the final exam from the previous year.)
- IBIO 531b, Advanced Immunology

Two Immunobiology seminar courses are also required for second-year students and beyond. They are listed under the following numbers: IBIO 536, 537, 538, and 539. Immunobiology seminars can be audited if a student has grades in seven other science courses and has taken an IBIO seminar course for a grade. To accommodate the growth of the graduate program, we have expanded the number of Immunology seminar courses offered from one course per year to three courses every two years.

All first-year BBS Immunology students must take IBIO 600a, Introduction to Research (taught every fall as a credit-only course).

Additional courses are determined based on the individual needs of the student, and include courses in biochemistry, cell biology, genetics, molecular biology of prokaryotes, molecular biology of eukaryotes, animal viruses, the structure of nucleic acids and proteins, microbiology, and disease mechanisms. Students choose courses after consulting the DGS and the thesis adviser.

**Honors** The Graduate School uses grades of Honors, High Pass, Pass, or Fail. Students are required to earn a grade of Honors in at least two courses in the first two years, and are expected to maintain a High Pass average. There is no foreign language requirement.

**Responsible Conduct of Research Training** In addition to all other requirements, students must successfully complete IBIO 601b, Fundamentals of Research: Responsible Conduct of Research, by the end of their first year of study.

**Teaching** Students are required to serve as TA (teaching assistant) for two terms before the end of their sixth term. Teaching protocol and rules are as follows: (1) two term-long courses are required as a fulfillment of the Ph.D.; (2) first-year students do not teach; (3) IBIO 603b, Teaching in the Science Education Outreach Program (SEOP), is an approved teaching credit only when taught as the second teaching experience; (4) teaching opportunities are first given to students who need the credit; (5) teaching for additional income is available when openings exist after those selected for credit are hired; and (6) the maximum teaching allowable is one course per term corresponding to a TF4 position. All courses taught outside of the lab for extra income must be approved by both the thesis adviser and the DGS.
A Yale McDougal Center one-day seminar entitled “Teaching at Yale” is offered each year. Attending this seminar is recommended prior to teaching.

Early in their fourth term, students make a thirty-minute presentation to the section of their proposed research and initial results. Thereafter, they meet with their prospectus committee, which assigns four or five broad areas of biology and immunology that are of particular relevance to the proposed research and on which the student will be examined in the prospectus exam. During the next several months, students prepare a formal research proposal (in NIH grant format) concerning the proposed thesis research and study for the exam. The exam is oral, and covers all aspects of immunology generally, with a focus on the assigned areas mentioned above. The student is also questioned on aspects of the thesis proposal.

Requirements for admission to candidacy, which usually takes place after six terms of residence, are (1) completion of course requirements and teaching requirements; (2) completion of the prospectus examination; and (3) certification of the student’s research abilities by vote of the faculty upon recommendation from the student’s thesis committee.

Progress in thesis research in the third and later years is monitored carefully by the student’s thesis committee (composed of the adviser and three or four other faculty). All students are required to have two meetings with their thesis committee annually, to provide an update on progress and an opportunity for the committee to provide feedback and suggestions.

**M.D./Ph.D. Students Majoring in Immunobiology**

**Required** Seven courses for a grade. Out of the seven courses the following are mandatory:

1. IBIO 530a, Biology of the Immune System (Students have the option of passing out of 530 by taking the final exam from the previous year.)
2. IBIO 531b, Advanced Immunology
3. Two Immunobiology seminar courses: IBIO 536a, 537a, 538a, 539a (the second seminar course can be audited if a student has grades in seven other courses and has taken one seminar course already).

**Also required** Two grades of Honors: Yale University graduate courses taken for a grade at the School of Medicine may be counted toward the Honors fulfillment and the seven total required courses. Verification must be provided to the DGS. One semester of teaching: Previously taught courses in the School of Medicine may count toward this requirement. To request credit for previous teaching experience, a note from the course director describing the teaching experience (duration of the teaching experience, frequency of class meetings, number of students taught, materials covered, dates, and for whom) should be provided to the Immunobiology DGS.

M.D./Ph.D. students are not required to take IBIO 600a, Introduction to Research, but may if they wish.

IBIO 601b, Fundamentals of Research: Responsible Conduct of Research. A note from the DGS of the M.D./Ph.D. program must be forwarded to the Immunobiology DGS stating that the student has taken a course in Research Conduct and Ethics, or its
equivalent in the School of Medicine. Include dates, titles, and faculty. If the student has not taken this course, then registration in this class is required.

**Annual committee meetings** Each student is required by the Immunobiology section to have a committee meeting every year. Departmental Research in Progress talks can count if there is a follow-up committee meeting. The committee supervisor will then submit the form to the DGS summarizing the student’s progress.

**Master’s Degrees**

**M.Phil.** Following successful completion of the prospectus examination, the student will be entitled to the M.Phil. degree. Once all course work and departmental requirements have been met, the student will advance to candidacy and be A.B.D. (“all but dissertation”). At that point the student will normally focus on research and the writing of the dissertation.

**M.S. (en route to the Ph.D.)** Students who complete at least one year of resident graduate study at Yale with the quality of work judged satisfactory by the Section of Immunobiology faculty may petition for the award of the M.S. degree. At the present time “satisfactory” is defined as having completed five graduate courses with an average grade of High Pass. Students must petition through the Registrar’s Office of the Graduate School.

The Web site at http://info.med.yale.edu/bbs offers complete information on the Biological and Biomedical Sciences Program (BBS) and the more than 200 participating faculty.

**Courses**

For a complete listing of immunology-related courses, see http://info.med.yale.edu/bbs.

**IBIO 530a/MCDB 530a**, Biology of the Immune System  
Akiko Iwasaki, Peter Cresswell, Kevan Herold, Susan Kaech, Ruslan Medzhitov, Eric Meffre, João Pereira, Carla Rothlin, David Schatz, Mark Shlomchik  
The development of the immune system. Cellular and molecular mechanisms of immune recognition. Effector responses against pathogens. Immunologic memory and vaccines. Human diseases including allergy, autoimmunity, cancer, immunodeficiency, HIV/AIDS.  
MWF 9:25–10:15

**IBIO 531b, Advanced Immunology**  João Pereira and staff  
The historical development and central paradigms of key areas in immunology. The course attempts to develop a clear understanding of how these paradigms were established experimentally. Landmark studies are discussed to determine how the conclusions were obtained and why they were important at the time they were done. Lecture and discussion format; readings of primary research papers and review articles. Prerequisite: IBIO 530a or equivalent. Enrollment limited to fifteen. MW 4–6

**IBIO 532b, Inflammation** Ruslan Medzhitov  
This course covers fundamentals of inflammation from a broad biological perspective. Both physiological and pathological aspects of inflammation are the focus.
IBIO 538a, Lymphoid Organ Development  João Pereira, Ann Haberman,  
Nancy Ruddle
This series of seminars covers the cellular dynamics and mechanisms controlling the  
development and maintenance of secondary lymphoid organs, and the interplay between  
immune cells and stromal niches during the course of immune responses. The course also  
covers key aspects of the development and function of tertiary lymphoid structures. T 2–4

IBIO 539b, Inflammatory Diseases  Jordan Pober, Jeffrey Bender, Carla Rothlin
This seminar begins with a review of the processes of mechanisms of acute and chronic  
inflammation and then focuses on a critical reading of the current scientific literature  
regarding the role of inflammatory mechanisms of tissue injury and repair in a select  
number of diseases such as inflammatory bowel disease, rheumatoid arthritis, athero-  
sclerosis, vasculitis, obesity and the metabolic syndrome, asthma, and chronic obstructive  
pulmonary disease. Registration limited to advanced immunobiology graduate students  
except by permission of the instructors. T 2–3:50

IBIO 600a, Introduction to Research  Alfred Bothwell and staff
Introduction to the research interests of the faculty. Required for all first-year Immunol-  
ogy/BBS students. Pass/Fail. TH 5

IBIO 601b, Fundamentals of Research: Responsible Conduct of Research  
Alfred Bothwell and staff
A weekly seminar presented by faculty trainers on topics relating to proper conduct of  
research. Required for first-year Immunobiology students and training grant-funded  
postdocs. Pass/Fail. T 5

IBIO 603b/GENE 603b, Teaching in the Science Education Outreach Program  
(SEOP)  Paula Kavathas
TAs, along with volunteers, teach three projects in genetics to seventh-graders in two or  
three New Haven schools. In addition, TAs take a short course on teaching and serve as  
science judges. Dates and times to be determined. For more details visit www.seop.yale.  
edu. For teaching credit. In Immunobiology, this TA position must follow a TA position  
in a regular course. Contact Paula Kavathas.

IBIO 611a, Research Rotation 1  Alfred Bothwell and staff
Intensive experience in the design and execution of experiments in immunology or other  
areas of biology. Students design a focused research project in consultation with a faculty  
mentor and execute the designed experiments in the mentor’s laboratory. Students are  
expected to read relevant background papers from the literature, design and perform  
experiments, interpret the resulting data, and propose follow-up experiments. Students  
are also expected to attend the mentor’s weekly lab meeting(s) as well as weekly Immu-  
nobiology departmental seminars and Research in Progress seminars. The course con-  
cludes with the student giving a brief presentation of the work performed at Rotation  
Talks, attended by other first-year immunology-track graduate students. Evaluation is  
by the mentor; students also evaluate the rotation experience. Students must turn in a  
prioritized list of four possible mentors to Barbara Giamattei in the office of the director  
of graduate studies at least one week prior to the beginning of the course. Mentors are
assigned by the DGS. Graded Pass/Fail. Course dates are Oct. 1–Dec 15. (1 course credit; minimum of 20 hours/week). Required for all first-year Immunology/BBS students.

**IBIO 612b, Research Rotation 2**  Alfred Bothwell and staff
See description under IBIO 611a. Course dates are Jan. 7–March 15.

**IBIO 613b, Research Rotation 3**  Alfred Bothwell and staff
See description under IBIO 611a. Course dates are March 16–May 31.
INTERNATIONAL AND DEVELOPMENT ECONOMICS

Economic Growth Center
27 Hillhouse Avenue, 203.432.3610
www.yale.edu/ide
M.A.

Director
Michael Boozer

The Department of Economics offers a one-year program of study in International and Development Economics, leading to the Master of Arts degree. IDE students are diverse in terms of their nationalities and their career paths. Many of our students now come directly from their undergraduate school or a few years of work experience, although we do not exclude any candidate on the basis of work experience or country of origin. After completion of the program, IDE students have gone into various paths, including working in research for academic and nonacademic agencies such as the World Bank, the United Nations, and the Poverty Action Lab. Other students have gone on to further academic work such as law school and to Ph.D. programs in economics, environmental sciences, public health, and similar programs. Many students have returned to their home countries to work for their government or for funding agencies there.

Some students entering the program are required to complete the summer program in English and Mathematics for Economists offered by Yale University. This requirement may be waived for applicants demonstrating exceptional training in economic analysis and a good command of English. The Graduate Record Examination (GRE) and the Test of English as a Foreign Language (TOEFL) examinations are also required. The TOEFL requirement is waived only for applicants who will have received a degree, prior to matriculation at Yale, from a college or university where English is the primary language of instruction.

Yale fellowship funds are not available for the IDE program, and students are required to produce certification of the necessary funding prior to enrollment.

The course program requires the completion of eight term courses, five of which make up the core elements of the IDE program and are required; the remaining three are graduate electives. The required courses are Microeconomics; Macroeconomics; Econometrics; International Economics; and Development Economics. These required courses are designed to provide a rigorous understanding of the economic theory necessary for economic policy analysis.

An option of a second year of nondegree elective study is available to qualified students. The Development Studies Certificate offered through the MacMillan Center, for example, could be completed during this time.

Joint-program options for study with the School of Forestry & Environmental Studies (F&ES) and the School of Public Health (YSPH) are also available. Application to F&ES or YSPH must be made simultaneously with the application to the IDE program. Admission to these joint programs is determined by the participating professional school and must be obtained prior to beginning the program. Joint-degree students earn the
Master of Arts degree in IDE and the Master of Environmental Studies (F&ES) or Master of Public Health (YSPH) degree.

Prospective applicants are encouraged to visit the IDE program Web site at www.yale.edu/ide. Program materials are available upon request to Louise Danishevsky, Senior Administrative Assistant, International and Development Economics Program, Yale University, PO Box 208269, New Haven CT 06520-8269; e-mail, ide@yale.edu.

James Levinsohn (141 RKZ, 203.432.6671, james.levinsohn@yale.edu)

Director of Student Affairs
Cristin Siebert (148 RKZ, 203.432.5954, cristin.siebert@yale.edu)

Professors Julia Adams (Sociology), Elizabeth Bradley (Public Health), John Gaddis (History), Jeffrey Garten (School of Management), Jacob Hacker (Political Science), Oona Hathaway (Law), Stathis Kalyvas (Political Science), Paul Kennedy (History), James Levinsohn (Global Affairs; School of Management), Catherine Panter-Brick (Global Affairs; Anthropology), W. Michael Reisman (Law), Susan Rose-Ackerman (Law; Political Science; Political Science; Law), Kenneth Scheve (Political Science), Peter Schott (Economics; School of Management), Ian Shapiro (Political Science), Adam Tooze (History), Aleh Tsyvinski (Economics), Christopher Udry (Economics), Steven Wilkinson (Political Science), Elisabeth Wood (Political Science), Ernesto Zedillo (International Economics & Politics)

Associate Professors Patrick Cohrs (History; Global Affairs), Thad Dunning (Political Science), Susan Hyde (Political Science; Global Affairs), Kaveh Khoshnood (Public Health), Ellen Lust (Political Science), Michael McGovern (Anthropology)

Assistant Professors Costas Arkolakis (Economics), David Atkin (Economics), Christopher Blattman (Political Science), Lorenzo Caliendo (Economics; School of Management), Ana De La O Torres (Political Science), Lloyd Grieger (Global Affairs; Sociology), Daniel Keniston (Economics; Global Affairs), Jason Lyall (Political Science), Ahmed Mushfiq Mobarak (School of Management), Nuno Monteiro (Political Science), Nancy Qian (Economics), Thania Sanchez (Political Science; Global Affairs), Tariq Thachil (Political Science), Jessica Weiss (Political Science), Jonathan Wyrtzen (Sociology; International Affairs)

Senior Lecturers Cheryl Doss (Global Affairs; Economics), Charles Hill (International Security Studies), Michael Moore (Global Affairs)

Lecturers Michael Boozer (Economics), Pia Rebello Britto (Global Affairs; Child Study Center), Robert Hopkins (Global Affairs), Matthew Koche (Political Science), Jonathan Schell (Global Affairs), Sean Smith (Political Science; Global Affairs)

Visiting Professors* Raymond Guiteras (Global Affairs), Jolyon Howorth (Political Science; Global Affairs), Murray Leibbrandt (Global Affairs), Jeremy Wallace (East Asian Studies; Global Affairs)
Senior Fellows* Domingo Cavallo (Global Affairs), Alexander Evans (Global Affairs), Thomas Graham (Global Affairs), Michele Malvesti (Global Affairs), Mario Mancuso (Global Affairs), Stanley McChrystal (Global Affairs), Rakesh Mohan (Global Affairs; Management), John Negroponte (International Security Studies; Global Affairs), Stephen Roach (Global Affairs), Emma Sky (Global Affairs)

*For a complete list of visiting professors and senior fellows, see the Jackson Institute Web site.

The Jackson Institute for Global Affairs nurtures degree programs and scholarship with a strong interdisciplinary and policy-oriented international focus. The programmatic interests of the institute focus on development and security.

The Jackson Institute for Global Affairs administers the Master’s Degree in International Relations. The fifty to sixty students in this program combine fundamental training in core disciplines of international relations with an individualized concentration that has relevance to current international issues. In addition to courses in the International Relations program, students take courses throughout the Yale Graduate School of Arts and Sciences and Yale’s professional schools.

Fields of Study

The two-year program is designed to combine breadth of knowledge of the basic disciplines of international relations with depth of specialization in a particular academic discipline, geographic area, specialized functional issue, and/or professional field. It is designed primarily for students seeking an M.A. degree before beginning a career in global affairs. Joint degrees are offered with the School of Forestry & Environmental Studies, the Law School, the School of Management, and the School of Public Health.

Special Admissions Requirements

Applicants must take the GRE General Test; students whose native language is not English and who did not earn their undergraduate degree at an English-language university must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). The minimum score on the TOEFL is 610 on the paper-based test or 102 on the Internet-based test. Entering students must have taken introductory courses in microeconomics and macroeconomics prior to matriculation.

Special Requirements for the Master’s Degree

The M.A. in International Relations requires two years of graduate study at Yale. To complete the degree, students must take sixteen courses that fulfill the core and concentration requirements, demonstrate proficiency in a modern language, complete a summer internship or project, and maintain the grade average specified below.

CORE 1

This substantive core consists of seven graduate-level courses: two history courses (one regional and one comparative international); two in political science (one in comparative politics and one in international relations theory); two in economics (one economic analysis and one international economic analysis); and INRL 791 (taken during the first
term). Each term, a list of courses meeting these requirements is available from the International Relations registrar.

**CORE II**

Students choosing this streamlined core take INRL 771, 781, and 791 during the first term.

**CONCENTRATION**

Beyond the core courses, each student must identify and demonstrate the academic integrity of a coherent set of courses as a proposed concentration for approval by the director of graduate studies (DGS). For students following Core I, the concentrations require a minimum of eight courses in the fields selected. For students in Core II, a minimum of twelve courses in the fields selected is required. Some of the courses may be cross-listed in two or more departments. Students are able to develop concentrations based on a topical, regional, or disciplinary focus, or a combination of a topical and regional focus. Sample concentrations are available from the Jackson Institute Web site.

**LANGUAGE REQUIREMENT**

The equivalence of four terms of language study at Yale is required to graduate. This competence must be demonstrated through successful completion of a Yale L4 class or by testing into a Yale L5 class. International students who completed secondary school or a university degree in a language other than English will be considered to have met the language requirement. Students may study language as part of their Yale program. Students pursuing joint-degree programs are encouraged to fulfill all language requirements before beginning the program.

**SUMMER INTERNSHIP REQUIREMENT**

All students enrolled in the International Relations program are required to use the summer between the first and second years of the program to further their professional or academic education. It is expected that this requirement be fulfilled by obtaining experience through employment or an internship, lasting 8–10 weeks. The requirement may also be fulfilled by completing language study, other relevant course work, or independent research on an approved topic.

Each first-year student must file a form with the director of career services before June 1 stating the nature of his or her summer internship or approved alternative.

**RESEARCH REQUIREMENT**

Students who entered the program prior to fall 2012 are required to demonstrate that they have completed a major research paper, either through their course work or an independent study project. Students must submit the paper to the program registrar as part of the final approval process.

**EXPECTATION OF ACADEMIC PERFORMANCE**

M.A. candidates are required to achieve at least two grades of Honors, and their remaining grades must average to at least High Pass. (To have a High Pass average, any grade of Pass must be offset with an additional grade of Honors beyond the required two.) Students are expected to complete eight graduate term courses in their first year, earning
at least one Honors, with a High Pass average in the remaining courses. At the end of the first year, students who do not have at least a High Pass average in eight graduate term courses will not be allowed to continue in the program.

**Special Requirements for the Joint-Degree Programs**

Joint-degree candidates must fulfill all of the requirements of both programs in which they are enrolled before receiving either degree. Joint-degree candidates are required to fulfill the core and concentration requirements of the International Relations program. An overlap of two courses is allowed between the core and concentration, with a maximum of two additional courses credited toward both degrees. Students following Core I reduce their concentration electives by four; the core remains the same. Joint-degree students must take at least twelve graduate-level courses in Arts and Sciences departments or in professional schools other than the one granting the joint degree. Under no circumstances will students be allowed an International Relations concentration in the functional area in which they will be receiving a joint degree.

Applicants to the joint-degree programs must apply separately, by the appropriate deadline, to the Graduate School for the International Relations program and to the professional school involved. Decisions on admissions and fellowship support are made independently by each school. Students are encouraged to apply to both programs simultaneously. They may also apply during their first year at Yale to the second program for a joint degree. If accepted into the new program, they must receive approval for credit allocation upon registration from both degree programs.

For more information, visit http://jackson.yale.edu/ma-degree, e-mail jackson.institute@yale.edu, or call 203.432.3418.

**Courses**

**INRL 514a/ARCH 4216a**, Globalization Space: Global Infrastructure and Extrastatecraft  
Keller Easterling  
Infrastructure space as a primary medium of change in global polity. Considers networks of trade, energy, communication, transportation, spatial products, finance, and management and labor, as well as new strains of political opportunity that reside within their spatial disposition. Case studies include free zones and automated ports around the world, satellite urbanism in South Asia, high-speed rail in Japan and the Middle East, agripoles in southern Spain, fiber-optic submarine cable in East Africa, spatial products of tourism in the DPRK, and ISO management platforms. **MW 10:30–11:20, 1 HTBA**

**INRL 516a/AFST 501a**, Research Methods in African Studies  
Cheryl Doss  
Disciplinary and interdisciplinary research methodologies in African studies. The focus of the course is on field methods and archival research in the social sciences and humanities. Topics include use of African studies and disciplinary sources (including bibliographical databases and African studies archives), research design, interviewing, survey methods, analysis of sources, and the development of databases and research collections. **TH 1:30–3:20**
Billions lack access to basic medical care, and global health inequalities are wide and growing. Such radical disparities cast doubt on the justice of supranational institutional arrangements (such as the TRIPS Agreement) and also pose ethical challenges for the global health community, especially international and domestic health and development institutions. Seeking to illuminate the normative issues involved, the course features a series of distinguished visitors, including academics as well as a few important representatives of international organizations, politics, foundations, NGOs, and relevant industries. Follows Law School academic calendar.

INRL 525au, Methods and Ethics in Global Health Research  Kaveh Khoshnood
Introduction to research methods in global health that recognize the influence of political, economic, social, and cultural factors. Quantitative, qualitative, and mixed-method approaches; ethical aspects of conducting research in resource-constrained settings; the process of obtaining human subjects' approval. Students develop proposals for short-term global health research projects conducted in resource-constrained settings.

INRL 559au/MGT 640a, Evolution of Central Banking and Responses to Crises  Rakesh Mohan
Changes in the contours of policy making by central banks since the turn of the twentieth century. Theoretical and policy perspectives as well as empirical debates in central banking. The recurrence of financial crises in market economies. Monetary policies that led to economic stability in the period prior to the collapse of 2007–2008. Prerequisite: intermediate macroeconomics.

INRL 574au/MGT 911a, The Next China  Stephen Roach
Born out of necessity in the post-Cultural Revolution chaos of the late 1970s, modern China is about reforms, opening up, and transition. The Next China will be driven by the transition from an export- and investment-led development model to a pro-consumption model. China's new model could unmask a dual identity crisis — underscored by China's need to embrace political reform and the West's long-standing misperceptions about China. Prerequisite: basic undergraduate macroeconomics.
INRL 610b, Topics in Modern Middle East Studies
The course is intended for students who plan to obtain the Graduate Certificate of Concentration in Modern Middle East Studies. A major requirement of the course is attendance at weekly brown bag seminars hosted by the Council on Middle East Studies, which include speakers from a variety of academic disciplines and other backgrounds addressing political, economic, social, cultural, and historical issues across the Middle East/North Africa region. Students attend the presentations and separate discussion sections, and fulfill writing assignments. W 12–1:20, 1 HTBA

INRL 614b, The New Iraq  Emma Sky
The interlinked factors of patrimonialism, the political economy of oil, and the use of violence were regarded as determining the course of the Iraqi state prior to 2003. This course considers the impact of U.S. policy, state collapse, sectarian rivalry, and the emergence of violent non-state actors following the U.S.-led invasion in 2003, examining the influence of external intervention and domestic legacies on the trajectory of the new Iraq. It examines whether, by the end of the U.S. era, Iraq had become a democracy, or had reverted to authoritarianism.

INRL 615a/ANTH 538a, Culture and Politics in the Contemporary Middle East  Marcia Inhorn
This interdisciplinary seminar is designed to introduce students to some of the most pressing contemporary cultural and political issues shaping life in the Middle East and North Africa, as the region enters a tumultuous new decade. The course aims for broad regional coverage, with particular focus on several important nation-states (e.g., Egypt, Saudi Arabia, Afghanistan, Iran, Iraq) and Western interventions in them. Students should emerge with a keener sense of Middle Eastern regional histories and contemporary social issues, as described by leading scholars in the field of Middle Eastern studies and particularly Middle Eastern anthropology. Following an historical introduction, the course is organized around three core themes—Islam, politics, modernity—with movement from the macropolitical level of Islamic discourse and state politics to the most intimate domains of gender, family life, and contemporary youth culture. Through reading, thinking, talking, and writing about a series of book-length monographs, students gain broad exposure to a number of exigent issues in the Middle Eastern region, as well as to the ethnographic methodologies and critical theories of Middle East anthropologists. Students are graded on seminar participation, leadership of seminar discussions, two review/analysis papers, and a comparative written review of three books. Required for Council on Middle East Studies (CMES) graduate certificate students. Recommended for Middle East concentrators in other disciplines. T 9:25–11:15

INRL 622a/HIST 718a, Social Movements in Comparative Perspective  Becky Conekin
In this seminar we explore post-WWII social movements and their legacies across Western Europe and the United States. Examining both the actuality and symbolic character of these movements in contemporary history, we analyze the political, social, and cultural meanings of protest and its impact on class, generational, gender, and racial relations in Western Europe and North America. In addition, if students have specific
interests in Eastern European and/or Latin American countries, they may bring these into the discussion and write on them in a comparative perspective in their final paper. We discuss different national histories and discourses about identity, while exploring the varied geographies of the Cold War. We then move to a more thematic approach focusing on, for example, civil rights, antiwar and student protests, and countercultural politics. We conclude with a brief look at the social movements that developed out of the 1960s. T 9:25–11:15

INRL 624b/ANTH 662b, Global Health: Ethnographic Perspectives
Marcia Inhorn
This interdisciplinary seminar, designed for graduate students and advanced undergraduates in Anthropology and Global Health, explores anthropological ethnographies on many of the serious health problems facing populations in resource-poor societies around the globe. The course focuses on three major issues: (1) poverty, structural violence, and health as a human right; (2) struggles with infectious disease; and (3) the health of women and children (and men, too). Many major issues of global health concern are addressed, including the health-damaging effects of poverty, racism, patriarchy, and inhumane conditions of life and labor in many countries; men's and women's sexuality in the era of HIV/AIDS; the politics of epidemic disease control and other disasters, and the role of communities, nation-states, and international organizations in responding to such crises; issues of coercion in population control and the quest for reproductive rights; and how child health is ultimately dependent on the health and well-being of mothers. The underlying purpose of the course is to develop students’ awareness of the political, socioeconomic, ecological, and cultural complexity of most health problems in so-called developing nations and the consequent need for anthropological sensitivity, contextualization, and activist involvement in the field of global health. The course is also designed to expose students to salient health issues in many parts of the world, from the United States to China. However, the primary focus is on global health issues facing sub-Saharan Africa and Latin America. Prerequisite: some background in medical anthropology, global health studies, or other relevant fields. T 9:25–11:30

INRL 628a, Conflict, Resilience, and Health
Catherine Panter-Brick
Review of the many intersections of health, resilience, and conflict—including military, ethnic, religious, and interpersonal conflict. We examine the impact of violence on physical, emotional, and social well-being; the nature and drivers of collective, interpersonal, and structural violence; the personal, family, community, and governmental dimensions of resilience; the ethics of research and interventions. TH 1:30–3:20

INRL 654b, Violence: State and Society
Matthew Kocher
The course examines violence that occurs mainly within the territory of sovereign states. We focus on violence as an object of study in its own right. For the most part, we look at violence as a dependent variable, though in some instances it functioned as an independent variable, a mechanism, or an equilibrium. We ask why violence happens, how it “works” or fails to work, why it takes place in some locations and not others, why violence takes specific forms (e.g., insurgency, terrorism, mass killing), what explains its magnitude (the number of victims), and what explains targeting (the type or identity of
victims). Special attention to connecting theoretical literatures in the social sciences with policy-relevant debates in government and nongovernmental service.

**INRL 690b, Leadership**  Stanley McChrystal  
This course examines the practical execution of leadership in today's environment. Using a combination of historical case studies and recent events, we review how dramatic changes in technology, society, politics, media, and globalization have increased the complexity of the tasks facing modern leaders. Although the course includes the military aspects of leadership, the overall objective is to study leadership in a wider context, identifying the common factors shared by politics, business, education, warfare, and other fields. Specific topics include the changing leadership environment; the role of the leader; driving change; making difficult decisions; dealing with risk; coping with failure; navigating politics; and the effect of modern media.

**INRL 694b, The European Union as a Security and Defense Actor**  Jolyon Howorth  
During the Cold War, European security was guaranteed by NATO, and the European Union remained a purely "civilian" actor. After 1989, however, under U.S. urging and the pressure of events (the Balkan Wars), the EU has taken greater responsibility for its own security. In 1999 it launched a new policy area: the Common Security and Defense Policy (CSDP). Since 2003 it has mounted almost thirty overseas crisis management missions. This course analyzes the huge challenges faced by the twenty-seven-member bloc in pooling, sharing, and rationalizing military capacity, in merging sovereignty in this sensitive area, and in generating a common strategic culture.

**INRL 695b, Strategies of World Order**  Charles Hill  
Tracking and evaluating major intellectual conceptions on which today's international politics, wars, revolutions, diplomacy, and structures for peace and security are grounded. The continuing influence of ideas from the works of Thucydides, Plato, Aristotle, Tacitus, Augustine, Aquinas, Machiavelli, Hobbes, Locke, Rousseau, Kant, Burke, Marx, Tocqueville, and contemporary thinkers is examined in the context of how strategic thought has developed in response to big societal transformations. Weekly sessions combine presentations, mini-lectures, and seminar discussions. A substantial paper and a final examination.

**INRL 697a/MGT 866a/LAW 20631, Innovation in Government**  Eric Braverman  
Across the globe, governments of every size face the same urgent imperative: rising demand for services running headlong into the reality of limited resources. The emerging answer—from some unlikely places—is bold, rapid management innovation. These disruptive moves are transforming the twenty-first-century state. Some of the most broadly applicable, cutting-edge innovations come from the edge: governments that believe they have no choice but to take bold risks. Others come from the most developed nations, who feel more pressure than ever to do more with less. This interdisciplinary course blends perspectives from management, public policy, and law in exploring why governments must innovate and how ideas from the public sector, private sector, and civil society are shaping the future. We complete the course with a conference with senior leaders from each sector to share new ideas and explore the implications of those ideas.
for governments around the world. Follows School of Management academic calendar, meeting the week of Oct. 22 through Dec. 10. 0.5 GSAS credits. M 3–6

**INRL 711b/MGT 585b, Washington and Wall Street: Markets, Policy, and Politics**  
Stephen Roach, Jeffrey Garten  
The purpose of the course is to give students a sense of how the financial center of the United States relates to the political center, and vice versa. It focuses on the intersection of markets, policy, and politics in the United States, with considerable attention as well to the global implications. There is a historical dimension to the class, looking at other periods of history when the balance between private and public power was in great transition, and examining some of the individuals who were at the center of these shifts. As the United States digs its way out of the current financial crisis, the course evaluates what the future of financial institutions, financial innovation, and financial regulation might look like, and what the implications are for both economics and politics in the years ahead. Prerequisite: permission of the instructors. T 6–9

**INRL 713b, Critical Issues in Development Policy**  
Pia Rebello Britto  
The focus of the course is on national policy development. Students are exposed to the relationship among international agencies, international development frameworks, human rights instruments, and national governments in formulating national social and public policies with respect to economic and social development. The course uses early childhood, an epoch of human development, as an example to study national policy making. A policy laboratory methodology is employed to demonstrate application of policy development knowledge learned in class to a real-world setting. TH 3:30–5:20

**INRL 724b, National Security Decision Making: Theory and Practice**  
Michele Malvesti  
This seminar examines national security decision making both from a theoretical perspective and from its execution in practice. The seminar focuses on how decisions are made rather than on national security policy or strategy or theories of international relations. It is divided into three sections. The first—drawn, in part, from the instructor’s nearly six years on the National Security Council staff—introduces students to the current structures, processes, institutions, and primary actors involved in national security decision making. The second section delves into analytic and theoretical models of decision making. The seminar concludes with discussions on practical application and execution, has students participate in a crisis simulation, and explores possible reforms. Emphasis throughout is placed on the national security decision-making system of the United States (and particularly the executive branch), but seminar participants are encouraged to examine the systems of other states as well.

**INRL 730a, The United Nations and the Maintenance of International Security**  
Jean Krasno  
Consideration of the role of the UN in preventive diplomacy, using force for peacekeeping, peace enforcement, and peace building, with consideration of the evolution of the UN and its role in a post-Cold War international system. For International Relations students and IS/PLSC undergraduates only. W 1:30–3:20
INRL 765b, Contemporary Issues in American Diplomacy and National Security
John Negroponte
The seminar addresses key issues in U.S. foreign policy and how they are being addressed by the current administration. Readings and discussion deal with selected regional and functional topics, with emphasis on those with the most pressing national security implications. The course is taught from the perspective of a diplomatic practitioner with additional experience in other aspects of national security. M 9:25–11:15

INRL 771a, Applied Methods of Analysis  Lloyd Grieger
The course focuses on useful analytical approaches in public policy and the social sciences. The first part of the course focuses on mathematical skills. The second part focuses on methods for analyzing empirical data and builds on the mathematical skills from the first part of the course. Special focus is devoted to developing the skills necessary to synthesize and evaluate empirical evidence from the social sciences. Students leave the class with an applied understanding of how quantitative methods are used as tools for analysis in public affairs.

INRL 781a, Economics: Principles and Applications  Michael Moore
This course introduces students to the application of economics to problems of interest in international relations. Principles of supply and demand, market equilibrium, and comparative static analysis form the analytic core. These principles are then applied to problems including international trade (gains from trade, trade policy), welfare analysis, “failures” of markets and governments (monopolies and cartels, coordination problems, information asymmetries, externalities, rent-seeking), capital accumulation (human and physical), intellectual property protection in developed and underdeveloped countries, and global competition policy.

INRL 791a, History of the Present  Adam Tooze
The course looks at the forces of dynamic change and at the efforts at ordering and governance that have shaped the modern world. Among the forces for change and upheaval in world history to which sessions are devoted: demography, economic growth, great power competition, nationalism and religious and political ideologies, war and genocide. The second half focuses on efforts at ordering, including the tradition of diplomacy, the liberal aspiration of international law, biopolitics and the politics of gender, technocratic economic management, and the effort to face up to global environmental challenges. Open to first-year International Relations M.A. candidates only.

INRL 900a or b, Directed Reading
By arrangement with faculty.

INRL 910a or b, Independent Project
By arrangement with Jackson Institute Senior Fellows.
INVESTIGATIVE MEDICINE

Office of Financial Operations
100 Church Street South, Suite 100, 203.785.6842
http://medicine.yale.edu/investigativemedicine
Ph.D.

Director of Graduate Studies
Joseph Craft (invmed@info.med.yale.edu)

Deputy Director
Eugene Shapiro

Professors Karen Anderson (Pharmacology), Henry Binder (Internal Medicine), Joseph Craft (Internal Medicine; Immunobiology), David Fiellin (Internal Medicine; Epidemiology; Investigative Medicine), Thomas Gill (Internal Medicine; Epidemiology; Investigative Medicine), Fred Gorelick (Internal Medicine; Cell Biology), Jeffrey Gruen (Pediatrics; Genetics; Investigative Medicine), Harlan Krumholz (Internal Medicine; Epidemiology; Investigative Medicine), Eugene Shapiro (Pediatrics; Epidemiology; Investigative Medicine), George Tellides (Surgery; Investigative Medicine), Mary Tinetti (Internal Medicine; Epidemiology; Investigative Medicine)

Fields of Study
The Investigative Medicine program offers a special training pathway for highly select physicians in clinical departments who are interested in careers in clinical research. The program is designed to develop a broad knowledge base, analytical skills, creative thinking, and the hands-on experience demanded of clinical researchers devoted to disease-oriented and patient-oriented investigation. The program provides the student with individualized experience encompassing formal course work and practical experience, under the supervision and mentorship of a senior faculty member.

Students will enter the program with a broad range of experience and interests. Students can undertake thesis work in a variety of disciplines. These include:
1. Evaluating risk factors and interventions for disease using modern concepts in quantitative methods and clinical study design.
2. Investigating the biochemical, physiologic, and genetic basis of disease in the setting of a Clinical Research Center.
3. Exploring the molecular basis of a disease from the laboratory standpoint.

Special Admissions Requirements
The Investigative Medicine program is designed for students with an M.D. or D.O. degree. To be eligible for admission, applicants must have completed two or more years of postgraduate clinical training and be eligible to practice in the United States. Prospective students who are already in a residency or subspecialty clinical fellowship program at Yale may apply to the Investigative Medicine program anytime during the first two years of that training (approximate). Application to the program may be made concurrently
with application for residency or fellowship training in a clinical department at the Yale School of Medicine. Special arrangements will be made for a deferred acceptance by the Graduate School.

The most important criteria for selection into the program are commitment to rigorous training in clinical investigation and evidence of high academic achievement in undergraduate and medical school courses, and on scores from the USMLE.

**Special Requirements for the Ph.D. Degree**

The minimum overall course requirements for the doctorate program are nine (9) courses. Full-time course work will extend for twelve months, starting in July. The majority of the course requirements are to be completed by the end of the first year of study. Prior to registering for a second year of study, students must successfully complete IMED 630a, Ethical and Practical Issues in Clinical Investigation. Electives are often taken in the second year, with the expectation that they be completed by the end of the second year. To be eligible to take the comprehensive qualifying examination, students must achieve the grade of Honors in two courses (one course if a full-year course), have a minimum grade average of High Pass, and have completed a minimum of six courses. When requirements are met (typically by December 31 of the second year), students submit their thesis proposal and undertake the comprehensive qualifying examination. In order to be admitted to candidacy, students must pass both the written and oral comprehensive qualifying examinations and submit a thesis prospectus that has been approved by their qualifying committee. The remaining degree requirements include completion of the dissertation project, writing of the dissertation, and its oral defense. It is expected that most students will complete the program in three to five years. There is no foreign language requirement. The required curriculum for each program of study is as follows:

**COURSE REQUIREMENTS FOR LABORATORY-BASED PATIENT-ORIENTED RESEARCH**

IMED 625, Principles of Clinical Research  
IMED 630, Ethical and Practical Issues in Clinical Investigation  
IMED 635, Directed Reading in Investigative Medicine  
IMED 645, Introduction to Biostatistics in Clinical Investigation  
IMED 655, Writing Your First Grant Proposal  
IMED 680, Topics in Human Investigation  
CBIO 601, Molecular and Cellular Basis of Human Disease (spring and fall)  
CB&B 740, Clinical and Translational Informatics  
Elective (1)

**COURSE REQUIREMENTS FOR CLINICALLY BASED PATIENT-ORIENTED RESEARCH**

IMED 630, Ethical and Practical Issues in Clinical Investigation  
IMED 635, Directed Reading in Investigative Medicine  
IMED 655, Writing Your First Grant  
IMED 660, Methods in Clinical Research (summer)  
IMED 661, Methods in Clinical Research (fall)
IMED 662, Methods in Clinical Research (spring)
IMED 680, Topics in Human Investigation
Electives (2)

Courses

**IMED 625a, Principles of Clinical Research**  Eugene Shapiro
The purpose of this intensive two-week course is to provide an overview of the objectives, research strategies, and methods of conducting patient-oriented research. Topics include competing objectives of clinical research, principles of observational studies, principles of clinical trials, principles of meta-analysis, interpretation of diagnostic tests, prognostic studies, causal inference, qualitative research methods, and decision analysis. Sessions generally combine a lecture on the topic with discussion of articles that are distributed in advance of the sessions. Consent of instructor required. Two weeks, July 23–August 3, 2012. MTWTHF 2–4

**IMED 630a, Ethical and Practical Issues in Clinical Investigation**  Henry Binder
This termlong course addresses topics that are central to the conduct of clinical investigation, including ethics of clinical investigation, scientific fraud, technology transfer, and interfacing with the pharmaceutical industry. Practical sessions include scientific presentations and teaching, NIH peer review process, journal peer review process, and career development models of academia. The course provides guidelines and a framework for the clinical investigator to obtain funding for, conduct, and present a clinical study. Format consists of didactic presentation followed by discussion. Consent of instructor required. T 3:30–5

**IMED 635a or b, Directed Reading in Investigative Medicine**  Joseph Craft
An independent study course for first-year students in the Investigative Medicine program. Topics are chosen by the student, and reading lists are provided by faculty for weekly meetings to discuss articles. Six sessions are required; dates/times by arrangement. Consent of instructor required.

**IMED 645a, Introduction to Biostatistics in Clinical Investigation**  Henry Binder
The course provides an introduction to statistical concepts and techniques commonly encountered in medical research. Previous course work in statistics or experience with statistical packages is not a requirement. Topics to be discussed include study design, probability, comparing sample means and proportions, survival analysis, and sample size/power calculations. The computer lab incorporates lecture content into practical application by introducing the statistical software package SPSS to describe and analyze data. Consent of instructor required. Two weeks, July 9–20, 2012. MTWTHF 8:30–11:15

**IMED 655b, Writing Your First Grant Proposal**  Eugene Shapiro
In this termlong course, students gain intensive, practical experience in evaluating and preparing grant proposals, including introduction to NIH study section format. The course gives new clinical investigators the essential tools to design and to initiate their own proposals for obtaining grants to do research and to develop their own careers. The course is limited to students who plan to submit grant proposals (usually for either
a K-23 or a K-08 grant). Attendance and active participation are required. Consent of instructor required. W 2–4

IMED 660c, Methods in Clinical Research, Part I  Eugene Shapiro

IMED 661a, Methods in Clinical Research, Part II  Eugene Shapiro

IMED 662b, Methods in Clinical Research, Part III  Eugene Shapiro
This yearlong course, presented by the Robert Wood Johnson Clinical Scholars Program, presents in depth the methodologies used in patient-oriented research, including methods in biostatistics, clinical epidemiology, health services research, community-based research, and health policy. Consent of instructor required.

IMED 680b, Topics in Human Investigation  Joseph Craft, Karen Anderson
The course teaches students about the process through which novel therapeutics are designed, clinically tested, and approved for human use. It is divided into two main components, with the first devoted to moving a chemical agent from the bench to the clinic, and the second to outlining the objectives and methods of conducting clinical trials according to the FDA approval process. The first component describes aspects of structure-based drug design and offers insight into how the drug discovery process is conducted in the pharmaceutical industry. The format includes background lectures with discussions, labs, and computer tutorials. The background lectures include a historical perspective on drug discovery, the current paradigm, and important considerations for future success. The second component of the course provides students with knowledge of the basic tools of clinical investigation and how new drugs are tested in humans. A series of lectures and discussions provide an overview of the objectives, research strategies, and methods of conducting patient-oriented research, with a focus on design of trials to test therapeutics. Each student is required to participate (as an observer) in an HIC review in addition to active participation in class. Consent of instructor required. TH 3–4:30
ITALIAN LANGUAGE AND LITERATURE

82-90 Wall Street, 203.432.0595
www.yale.edu/italian
M.A., M.Phil., Ph.D.

Chair
Giuseppe Mazzotta

Director of Graduate Studies
Millicent Marcus (82-90 Wall St., Rm. 426, 203.432.0599)

Professors  Millicent Marcus, Giuseppe Mazzotta

Associate Professor  Susanna Barsella (Visiting [F])

Assistant Professor  Angela Capodivacca

Senior Lector II and Language Program Director  Risa Sodi

Visiting faculty from other universities are regularly invited to teach courses in the department.

Fields of Study
The Italian department brings together several disciplines for the study of the Italian language and its literature. Although the primary emphasis is on a knowledge of the subject throughout the major historical periods, the department welcomes applicants who seek to integrate their interests in Italian with wider methodological concerns and discourses, such as history, rhetoric and critical theories, comparison with other literatures, the figurative arts, religious and philosophical studies, medieval, Renaissance, and modern studies, and the contemporary state of Italian writing. Interdepartmental work is therefore encouraged and students are accordingly given considerable freedom in planning their individual curriculum, once they have acquired a broad general knowledge of the field through course work and supplementary independent study.

Special Admissions Requirements
The department recognizes that good preparation in Italian literature is unusual at the college level and so suggests that applicants begin as soon as possible to acquire a broad general knowledge of the field through outside reading. At the end of the first and second years, students’ progress is analyzed in an evaluative colloquium. Applicants who have had little or no experience in Italy are generally urged to do some work abroad during the course of their graduate program. For all students of Italian, a reading knowledge of Latin is essential. This may be acquired during the course of the first year, but applicants are reminded that it is difficult to schedule beginning language courses in addition to a normal graduate program. Students are advised to acquire proficiency in the languages required for the doctoral program before matriculation.
Special Requirements for the Ph.D. Degree

Candidates must demonstrate a reading knowledge of a second Romance language, Latin, and a non-Romance language (German recommended). The Latin examination must be passed, usually before the beginning of the third term of study, and all language requirements must be fulfilled before the Ph.D. qualifying examination. Students are required to take two years of course work (as a rule sixteen courses), including two graduate-level term courses outside the Italian department. After consultation with the director of graduate studies (DGS), students who join the graduate program with an M.A. in hand may have up to four courses waived. The comprehensive qualifying examination must take place during the third year of residence. It is designed to demonstrate the student’s mastery of the language and acquaintance with the literature. The examination, which is both written and oral, will be devised in consultation with members of the department. In the term following the qualifying examination, the student will discuss, in a session with the departmental faculty, a prospectus describing the subject and aims of the dissertation. Students are admitted to candidacy for the Ph.D. upon completion of all predissertation requirements, including the prospectus. Admission to candidacy normally occurs by the end of the sixth term.

Teaching is considered to be an important component of the doctoral program in Italian. Students will be appointed as teaching fellows in the third and fourth years of study. Guidance in teaching is provided by the faculty of the department and specifically by the director of language instruction.

Combined Ph.D. Programs

ITALIAN AND FILM STUDIES

The Department of Italian also offers, in conjunction with the Film Studies Program, a joint Ph.D. in Italian and Film Studies. For further details, see Film Studies. Applicants to the joint program must indicate on their application that they are applying both to Film Studies and to Italian. All documentation within the application should include this information.

ITALIAN AND RENAISSANCE STUDIES

The Department of Italian also offers, in conjunction with the Renaissance Studies Program, a combined Ph.D. in Italian and Renaissance Studies.

Master’s Degrees

Only candidates for the Ph.D. degree will be admitted to the program, but the department will, upon request, offer the M.A. and the M.Phil. degrees to students who have completed the general Graduate School requirements for those degrees (see Degree Requirements under Policies and Regulations). Additionally, students in Italian are eligible to pursue a supplemental M.Phil. degree in Medieval Studies. For further details, see Medieval Studies.

Program materials are available upon request to the Director of Graduate Studies, Italian Language and Literature, Yale University, PO Box 208311, New Haven CT 06520-8311.
Courses

ITAL 525b, Theories and Techniques of Teaching Foreign Languages  Risa Sodi
This course explores relevant areas of foreign language research and their application to the task of teaching a modern foreign language such as Italian. Through readings, lectures, and practical demonstrations, students are exposed to second language acquisition theories, the principles of proficiency, and a variety of approaches to language teaching. Students actively explore classroom techniques designed to develop listening, reading, speaking, and writing skills while integrating culture. Approaches to developing, implementing, and assessing testing and the evaluation of instructional materials are also highlighted. F 1:30–3:20

ITAL 533a, Worlds of Boccaccio  Susanna Barsella
This course examines a number of texts from Boccaccio’s early experiments (Filostrato, Ninfale fiesolano, Elegia di Madonna Fiammetta) to his mature works (Decameron, Genealogy of the Gentile Gods, and the Commentary on Dante). Its aim is to show the radical innovations of his art in terms of form, redefinition of moral values, and general sense of medieval traditions of Provençal poetry (conventions of ethics, nature, and love, the place of women, etc.). T 3:30–5:20

ITAL 575a, Italian Theater from Antiquity to the Renaissance  Giuseppe Mazzotta
The influence of Aristotle’s Poetics on the theatrical premises of theater and on Florentine intellectual life in the late fifteenth century; Machiavelli’s writings and the theatrical spectacles of Italian sixteenth-century politics; Ariosto’s Negromante and traditions of sacre rappresentazioni and the commedia dell’arte; aesthetics of the theater as an original mode of knowing characters and the worlds they inhabit. TH 3:30–5:20

ITAL 595a/FILM 732a, Cinematic Neorealism  Millicent Marcus
The course considers the complex relationship between the theory and practice of Italian cinematic neorealism. We screen a film weekly and analyze it in the context of an evolving theoretical paradigm, beginning with Rossellini’s Open City (1945) and Paisan (1946), and flashing back to the proto-neorealist Ossessione (Visconti, 1943). We devote a great deal of attention to De Sica’s contributions to neorealism, including Shoeshine (1946), Bicycle Thief (1948), Miracle in Milan (1951), and Umberto D (1952), in addition to De Santis’s Bitter Rice (1949) and Visconti’s La terra trema (1948). The course also includes a study of the movement’s afterlife in Bellissima (Visconti, 1951), and the later revisitations of neorealism in Icicle Thief (Nichetti, 1989) and Celluloide (Lizzani, 1996), before concluding with Gianni Amelio’s Stolen Children (1992), which has been hailed as the harbinger of a realist revival in the 1990s. In English. M 3:30–5:20, screenings TH 7:30

ITAL 596b/FILM 635b, New Italian Cinema  Millicent Marcus
The course is dedicated to an examination, at once panoramic and detailed, of Italian filmmaking since the year 2000. Despite dire predictions of the medium’s decline, new developments and emerging talents have contributed to a revival of the cinematic art within the context of a constantly changing cultural environment. The course is organized around a series of case studies that reveal the rise of new auteurs, the formation of generic trends, and the updating of the traditions and conventions that typified an earlier age. Of special interest is the “postmodernization” of filmic language and its
problematic relationship to the tradition of realism, with its imperative to civic “reference.” Technological issues, above all the shift from analog to digital filmmaking, are among our concerns in the course. We screen a film each week and devote the seminar to a close interpretation of the work, making extensive use of video clips, and relating our analysis to the theoretical and critical issues that necessarily arise. A tentative list of the films includes I cento passi; La finestra di fronte; Il Divo; Gomorra; Il vento fa il suo giro; Buongiorno, notte; Romanzo criminel; Fame chimica; and, in a flashback to the 1990s, Caro diario. TH 3:30–5:20, screenings W 7:30

ITAL 666b, Machiavelli and the Machiavel  Angela Capodivacca
This course aims to read closely Machiavelli’s most influential works (Selected Letters, L’asino d’oro, Selected Poems, Principe, Mandragola, Discorsi, Clizia, the Florentine Histories) and consider their influence on modern thought in the works of Hegel, Marx, Nietzsche, De Sanctis, Benedetto Croce, Gramsci, Hannah Arendt, Leo Strauss, and Pocock. W 2:30–4:20

ITAL 703b, Alessandro Manzoni: From “Tragedies” to History  Giuseppe Mazzotta
This course seeks to reveal the full force of the most important Italian writer of the nineteenth century, Alessandro Manzoni. He was quite aware of the new directions in modern philosophy, political ideologies, and radical experiments, which he identified with Kant, with the French and British Enlightenment, and with the excesses of the French Revolutions. These events he considered variously as signs and causes of the modern European crisis, its mixture of spiritual dissolution and utopianism. In reaction to these phenomena, which he witnessed while living in Paris, Manzoni devoted his creative efforts to clearing a path to a new literary and historical way of thinking. His early tragedies, his poetry, his great historical novel, and his reflections on aesthetics, language, and morality encompass the facets of his engagement with the challenges of his time. The course begins by examining his two tragedies, Adelchi and Il conte di Carmagnola. It pays attention to his essay on the French Revolution (written with Burke’s model in mind) and studies his essay on the persecutions and legalisms triggered by the seventeenth-century plague in Milan (inspired by Cesare Beccaria’s Dei delitti e delle pene). But the main focus is on his “Discourse on the Historical Novel”; the Inni Sacri—the poem on Napoleon’s death; and, above all, his masterpiece, I Promessi Sposi. In English. T 3:30–5:20
LAW

Sterling Law Building, 203.432.1696
www.law.yale.edu/phd
Ph.D.

Dean
Robert Post

Director of Graduate Studies
To be determined

Professors  To be determined

Fields of Study
The three-year Ph.D. program prepares students who have earned a J.D. to enter law teaching or other careers that require a scholarly mastery of law. The program is designed to give students a broad foundation in the canonical texts and methods of legal scholarship and to support students in producing their own scholarship in the form of a dissertation. The program strongly encourages, but does not require, interdisciplinary approaches to the study of law.

Admissions Requirements
All applicants must have a J.D. from a United States law school at the time they apply for admission to the Ph.D. in Law program. As a result, incoming students will have at least one year of post-J.D. experience. Applicants must have taken the LSAT (Law School Admission Test). For other admissions requirements, please see the Ph.D. in Law program’s Web site, www.law.yale.edu/phd.

Special Requirements for the Ph.D. Degree
Students will take up to six courses in their first year. A two-term proseminar on legal theory and methods is required for all students. Students may take other courses in the Law School or in other departments or schools at Yale University. Each student will have an advisory committee, which will help select appropriate courses. The committee may also waive up to four courses. The proseminar may not be waived.

Each Ph.D. student will take two qualifying examinations. The first, administered at the end of the first year, will be a written examination based on the proseminar. It will test the student’s breadth of knowledge across the legal canon, including knowledge of canonical texts, methods, and principles. The second will be an oral examination that will be administered by the student’s advisory committee at the end of the first summer. The oral examination will test whether the student has a sufficiently deep knowledge of the scholarship, theories, and methodologies relevant to the student’s area of study. Both qualifying examinations will be graded on a pass/fail basis. If the student fails a qualifying examination, he or she may retake it the following term. In the interim, he or she will remain a student in good standing in the program.
After completion of the second qualifying examination, the student will assemble a dissertation committee and prepare a dissertation prospectus. Upon approval of the prospectus, usually by the end of the third term, the student will devote the remaining time in the program to writing a dissertation. The final dissertation must be approved by both the student’s dissertation committee and the Ph.D. Policy Committee.

**Graduate Research Assistant and Teaching Fellow Experience**

As part of their training, Ph.D. students must complete two terms of teaching experience. There are a number of ways in which students can fulfill this requirement, which may vary by year. They include: (1) serving as a teaching assistant for a Law School course; (2) serving as a teaching assistant for a course in Yale College or another school at Yale; (3) co-teaching a class with a faculty member; and (4) in unusual situations, teaching their own class. In all cases, students engaged in teaching will have faculty supervision and feedback from their advisers.

**Master’s Degrees**

No master’s degree is awarded en route to the Ph.D. in Law.

Program materials are available upon request to the Graduate Programs Office, Yale Law School, 127 Wall Street, New Haven CT 06511.

**Courses**

For Law School courses and their descriptions, see the Law School bulletin, online in both html and pdf versions at www.yale.edu/bulletin. For courses in other Schools at Yale University, please see their respective bulletins. Specific course selections will be approved by the student’s advisory committee and by the Director of Doctoral Studies.

Chair
Robert Frank

Director of Graduate Studies
Stephen Anderson

Professors  Stephen Anderson, Robert Frank, Roberta Frank (English), Laurence Horn, Frank Keil (Psychology), Zoltán Szabó (Philosophy), Raffaella Zanuttini

Associate Professors  Ann Biersteker (African Language Program), Claire Bowern, Maria Piñango, Kenneth Pugh (Haskins Laboratory)

Assistant Professors  Ryan Bennett, Ashwini Deo, Gaja Jarosz, Jelena Krivokapić

Lecturers  Benjamin George, Hannah Haynie, Einar Mencl, James Wood

Supporting faculty in other departments  J. Joseph Errington (Anthropology)

Fields of Study
Fields include phonetics, phonology, morphology, syntax, semantics, pragmatics, neuropsycholinguistics, computational linguistics, historical linguistics, and descriptive study in a variety of languages.

Special Requirements for the Ph.D. Degree

Program Vision
Linguistics at Yale has a long and storied history in traditional approaches to the study of language. Today the department takes a distinctively integrative and interdisciplinary approach in investigating the systems of knowledge that comprise our linguistic competence. We are convinced that an understanding of the human language faculty will arise only through the mutually informing relationship between formally explicit theories and insights from wide-ranging descriptive and experimental work. Thus at Yale, theoretical inquiry grounded in introspection proceeds in partnership with historical and comparative studies, fieldwork, experimental investigations of normal and impaired language processing, cognitive neuroscience, laboratory phonetic analysis, and computational and mathematical modeling. Students in the Ph.D. program are exposed to these methodological approaches, while receiving firm grounding in the traditional domains of linguistics. Ph.D. students participate in research in phonetics, phonology, morphology, syntax, semantics, pragmatics, and historical linguistics, and explore data from a wide variety of languages, both well studied and less well documented, with particular faculty expertise in the Slavic, Romance, Australian, and Indo-Aryan languages.
COURSE WORK

The conception of linguistics embraced by the Yale Ph.D. program requires that students receive training that is both deep in its coverage of areas of linguistic inquiry and broad in the range of methodological approaches. The course work requirements are designed to accomplish these complementary goals. This course work must include a set of core courses, designed to expose students to core theoretical ideas, together with courses exposing students to a range of methodologies in linguistic research.

During their first six terms, students must complete a minimum of fourteen term courses at the graduate level, of which seven must be completed during the first two terms, and twelve during the first four terms. During the initial two years of course work, students must receive at least three grades of H (= Honors). Two grades of F, or three of P or F, during the initial two-year period constitute grounds for dismissal from the Ph.D. program.

Core courses  The core requirement ensures that students achieve expertise at the level of the following courses: LING 580, Morphology; LING 612, Linguistic Change; LING 620, General Phonetics (formerly 520); LING 635, Phonological Theory (formerly 535); LING 654, Syntax II; LING 663, Semantics.

The usual way to demonstrate this expertise will be to take all of these courses. Because several of these courses have prerequisites, students will typically need to take more basic courses in order to prepare themselves for the courses listed here. For example, LING 632, Introduction to Phonological Analysis, serves as a prerequisite for LING 635; and LING 653, Syntax I, is a prerequisite for LING 654; entering students usually take both of these prerequisite courses in the first term. However, students entering the Ph.D. program with sufficient background will be able to place out of antecedent courses. To facilitate placement, reading lists covering the material in the following basic courses will be provided, and students may request to take placement exams in areas in which their previous preparation is such that they could proceed directly to more advanced course work: LING 512, Historical Linguistics; LING 620, General Phonetics (formerly 520); LING 632, Introduction to Phonological Analysis (formerly 532); LING 653, Syntax I (formerly 553); LING 663, Semantics.

By August 1, entering students may send a request to the DGS for a placement exam in any of these five areas. The exams will be given during the week prior to the fall term. Passing an exam allows the student to place out of the corresponding course. Students placing out of courses are nonetheless expected to complete the same requirement of a minimum of fourteen term courses in the first three years.

Methodology courses  For the methodology requirement, students must take three relevant courses. The following courses, which are offered regularly by the department, qualify, but other courses may as well, to be determined in consultation with the adviser and DGS: LING 600, Experimentation in Linguistics; LING 624, Formal Foundations for Linguistic Theory; LING 627, Language and Computation (formerly 541); LING 630, Techniques in Neurolinguistics; LING 631, Neurolinguistics; LING 641, Field Methods.

One of the methodology courses must be taken during the first year of the program, and two must be completed by the end of the second year.
Seminar courses  Starting in year three and continuing until the prospectus is approved, students are expected to enroll in one seminar course for credit each term. Students should use such seminars as opportunities both for exploring new research areas and, especially, for pushing current research interests in novel directions.

RESEARCH

The primary focus of a Ph.D. program is independent research. In the course of our Ph.D. program, students will learn to carry out cutting-edge linguistic research, culminating in the completion of a dissertation. To help students in the transition from “consuming” to also “producing” linguistic research, there are a number of structures and requirements in place.

1. Research adviser and first-year directed readings. By the end of the first term of the program, students will need to find a department faculty member who is willing to serve as their research adviser. This choice should be made on the basis of compatibility of research interests and discussions between the student and faculty member. Starting from the spring term of the first year, the student will, with the help of his or her adviser, define a topic of research interest, meeting regularly (minimally once every three weeks) and carrying out a series of readings on this topic. Students are required to keep a research journal, describing their readings and how they fit in with work in the area, and chronicling the development of their thinking about the research topic. It is the faculty’s expectation that this exploration will form the foundation for the research reported in the student’s first qualifying paper (on which see below). Note however that the initial choice of research adviser is not set in stone: students who want to change their choice of topic or adviser for whatever reason may do so, so long as they are able to find a faculty member who is willing to serve as their adviser on a new topic. It is the student’s responsibility to find a suitable adviser, and students are expected to have a faculty adviser at all times during their enrollment in the program.

2. Portfolio. At the conclusion of the first year of the program, students must submit to the faculty a portfolio of two research papers, in two distinct subfields from the following: syntax/semantics, phonology/phonetics, historical linguistics. These papers should demonstrate a student’s mastery of the material in these fields to the level covered in the core courses in the area, as well as the ability to identify a significant research question and argue for a possible solution. In short, such papers should be at the level of an excellent term paper, representative of a student’s best work during the first year of course work. The faculty do not expect students to write papers expressly for the portfolio. Rather, the portfolio will typically consist of versions of term papers from classes taken during the first year in the program, which are then lightly revised on the basis of comments received from the course instructors. The deadline for the submission of these papers is June 15.

3. Annotated bibliography/research plan. On the basis of the research journal begun during the first year in the program, students will prepare an annotated bibliography and research plan (ABRP) for their first qualifying paper. The ABRP, which should be approximately twenty pages in length, should lay out the question that the student
wants to explore, motivating its importance through a presentation and synthesis of relevant past literature on the topic. The deadline for submission of the ABRP is September 1.

4. **Qualifying papers.** Once the ABRP has been completed, the student will proceed to work on his or her qualifying papers (QPs). The goal of the QPs is to develop a student’s ability to conduct independent research in linguistics at the level of current scholarship in two different areas of linguistics. The faculty expect a QP to report on the results of a substantial project, which are written up in a manner consistent with the standards of the field. Because the transition from student to scholar can be a difficult one, we have broken the process of writing the first QP into a number of smaller steps with specific deadlines for each (all during the second year of the program): (a) Students are required to make a presentation of their preliminary results in an appropriate venue (lab meeting, reading group, seminar, etc.) by no later than the end of the fall term. (b) Also by the end of the fall term, the student will send a request for a QP reader to the DGS. This request must include a title and abstract of the project, and may also request specific faculty members to be involved. On the basis of research area and faculty availability, the DGS will identify a faculty member other than the adviser to serve as a QP reader. This reader will be involved in the ultimate evaluation of the QP once it is completed. Because it is useful to get a range of feedback on one’s work, we encourage students to make the best use of their QP reader by meeting with them and keeping them up to date on the progress of the project. (c) Students must submit a first draft of their QP to their adviser and reader no later than February 1. (d) Students must submit the final version of the paper to their adviser and reader by the first day of classes after Spring Break. (e) Once the QP has been submitted, the student must make an oral presentation of his or her work. This oral presentation may take place in the department (typically at a Friday Lunch Talk). Alternatively, the oral presentation requirement may be satisfied via a presentation at a professional conference, provided at least one member of the department faculty is in attendance.

Toward the end of the spring term of the second year, the student should begin to explore possible areas and advisers for the second QP, and must have identified an area and adviser by September 1 of the third year. Students must follow the same steps and deadlines listed above for the second QP, this time during the third year.

5. **Prospectus.** No later than the beginning of the seventh term, students must choose a dissertation topic and find a faculty member who is willing to serve as dissertation adviser. By the end of the seventh term, students will present a dissertation prospectus to the entire faculty. The prospectus should lay out clearly the student’s proposed dissertation topic. It should motivate the importance of the topic, present the core idea of the proposed work together with its promise and viability, and demonstrate how this work fits into past research in the area. The prospectus should also identify a dissertation committee. The committee must include at least three faculty members (including the adviser), two of whom must be members of the Linguistics department. The prospectus document should be fifteen to twenty pages in length. After the document is submitted, the prospectus must be defended orally in front of
the faculty. Upon successful completion of the prospectus defense, students advance to Ph.D. candidacy.

6. **Dissertation.** By the end of the eighth term, students must complete a chapter of the dissertation, together with a detailed outline of the dissertation and comprehensive bibliography. At this point (and at one-term intervals thereafter until the completion of the dissertation), the student will meet with the entire dissertation committee, to evaluate progress toward the dissertation. When this committee approves the chapter and dissertation outline, students are eligible for a University Dissertation Fellowship, which will support them in their fifth year of graduate study.

   Students are expected to complete their dissertations by the end of the fifth year. At least one month prior to the dissertation filing date, the completed dissertation must be orally defended. This defense will typically involve a public presentation of the main results of the dissertation and oral examination by the members of the dissertation committee. Committee members must be given the completed dissertation no less than two weeks prior to the date of the defense.

**FEEDBACK AND EVALUATION**

At the conclusion of each academic year, all Ph.D. students will receive a written evaluation of their performance in the program, highlighting their strengths and accomplishments, as well as mentioning areas for improvement. Because of the fundamental role played by research in the Ph.D. program, we expect the completion of the research requirements to take highest priority. It is particularly important that students make satisfactory progress toward the first QP and complete all work by the deadlines given above. Failure to do so may result in being asked to leave the program.

**LANGUAGE REQUIREMENT**

Students are expected to exhibit some breadth in their knowledge of the languages of the world beyond those most commonly studied (including but not confined to Romance, Germanic, and Slavic languages) and those most similar in structure to the student’s first language. LING 641, Field Methods, fulfills this requirement; alternatively, with the permission of the DGS, the student may instead take an appropriate language structure class, or one or more classes characterized as L3 or higher at Yale or the equivalent elsewhere. This requirement must be completed before the prospectus defense, when the student advances to Ph.D. candidacy.

**TEACHING FELLOW/RESEARCH ASSISTANT REQUIREMENTS**

The faculty regard teaching experience as an integral part of the graduate training program in Linguistics. All students are required to serve as Teaching Fellows for a minimum of two terms, usually beginning in the first term of the third year. In addition, students must complete two additional terms of assistantship. These may be either as a Teaching Fellow, or through participation in externally supported, supervised research as a Research Fellow. Research assistantships may be provided by the Linguistics faculty and by various Yale and Yale-affiliated units. Before accepting a research assistantship in fulfillment of this requirement, students must receive approval from the DGS. To be approved, a research assistantship must meet the following criteria:
1. It must be supervised by a Linguistics department faculty member or a faculty member from an affiliated unit, such as Haskins Laboratories or the Yale School of Medicine.
2. It must provide research experience that complements the student’s academic plan of study.
3. It must provide at least ten hours of experience per week.

If an approved research assistantship is accepted that does not provide a stipend equal to the standard departmental stipend, a University Fellowship will be provided to augment the stipend so as to bring it up to the departmental standard.

**Master’s Degrees**

**M.Phil.** See Degree Requirements under Policies and Regulations.

**M.A. (en route to the Ph.D.)** Students in the doctoral program who successfully complete the course work, examinations, and work samples required by the end of the second year of graduate study (see above) may petition for the M.A. degree.

Program materials are available online at www.ling.yale.edu.

**Courses**

**LING 500a/ENGL 500a, Introduction to Old English Language and Literature**

Roberta Frank

**LING 501b/ENGL 501b, Beowulf and the Northern Heroic Tradition**

Roberta Frank
A close reading of the poem *Beowulf*, with some attention to shorter heroic poems. TH 9:25–11:15

[**LING 502a, Advanced Old English**]

**LING 510au, Introduction to Linguistics**

Ryan Bennett
The goals and methods of linguistics. Basic concepts in phonology, morphology, syntax, and semantics. Techniques of linguistic analysis and construction of linguistic models. Trends in modern linguistics. The relations of linguistics to psychology, logic, and other disciplines. MW 1–2:15

**LING 512au, Historical Linguistics**

Hannah Haynie
Introduction to language change and language history. Types of change that a language undergoes over time: sound change, analogy, syntactic and semantic change, borrowing. Techniques for recovering earlier linguistic stages: philology, internal reconstruction, the comparative method. The role of language contact in language change. Evidence from language in prehistory. MW 2:30–3:20, 1 HTBA
LING 515a/U/SKRT 510a/U, Introductory Sanskrit I  David Brick
An introduction to Sanskrit language and grammar. Focus on learning to read and translate basic Sanskrit sentences in the Indian Devanagari script. No prior background in Sanskrit assumed. Credit only on completion of LING 525b/SKRT 520b. MTWTHF 9:25–10:15

LING 517a/U, Language and Mind  Maria Piñango
Knowledge of language as a component of the mind: mental grammars, the nature and subdivisions of linguistic knowledge in connection to the brain. The logical problem of language acquisition. The “universal grammar hypothesis,” according to which all humans have an innate ability to acquire language. The connection between language acquisition and general cognitive abilities. TTH 11:35–12:50

LING 525b/U/SKRT 520b/U, Introductory Sanskrit II  David Brick
Continuation of LING 515a/SKRT 510a. Focus on the basics of Sanskrit grammar; readings from classical Sanskrit texts written in the Indian Devanagari script. Prerequisite: LING 515a/SKRT 510a. MTWTHF 9:25–10:15

LING 538a/U, Intermediate Sanskrit I  David Brick
The first half of a two-term sequence aimed at helping students develop the skills necessary to read texts written in Sanskrit. Readings include selections from the Hitopadesa, Kathasaritasagara, Mahabharata, and Bhagavadgita. Prerequisite: LING 525b or equivalent. MTWTHF 10:30–11:20

[LING 540b/U/PSYC 506b, Computational Models in Cognitive Science]

[LING 546b/U, Language, Sex, and Gender]

LING 548b/U, Intermediate Sanskrit II  David Brick
Continuation of LING 538a, focusing on Sanskrit literature from the kavya genre. Readings include selections from the Jatakamala of Aryasura and the opening verses of Kalidasa's Kumarasambhava. Prerequisite: LING 538a or equivalent. MTWTHF 10:30–11:20

[LING 569a/U, Meaning]

[LING 580b/U, Morphology]

LING 600b/U, Experimentation in Linguistics  Jelena Krivokapić
Principles and techniques of experimental design and research in linguistics. Linguistic theory as the basis for framing experimental questions. The development of theoretically informed hypotheses, notions of control and confounds, human subject research, statistical analysis, data reporting, and dissemination. TH 9:25–11:15

[LING 601a, Neurological Basis of Prosody and Meaning]

LING 612b/U, Linguistic Change  Stephen Anderson
Principles governing linguistic change in phonology, morphology, and syntax. Status and independence of proposed mechanisms of change. Relations between the principles of historical change and universals of language. Systematic change as the basis of linguistic comparison; assessment of other attempts at establishing linguistic relatedness. Prerequisites: LING 512a, 632a, and 653a. MW 2:30–3:45
LING 620a\textsuperscript{u}, General Phonetics  Jelena Krivokapić  
Investigation of possible ways of describing the speech sounds of human languages. Tools to be developed: acoustics and physiology of speech; computer synthesis of speech; practical exercises in producing and transcribing sounds. TTH 9–10:15 (formerly LING 520a)

[LING 621b\textsuperscript{u}, Topics in Phonetics: Intonation]

[LING 622b\textsuperscript{u}, Speech Timing]

LING 624b\textsuperscript{w}, Formal Foundations of Linguistic Theories I  Gaja Jarosz  
Mathematical methods in linguistics. Topics include set theory, logic and formal systems, model theory, lambda calculus, formal language theory, elementary statistics, and probability. No prerequisites. MW 1–2:15

[LING 626b\textsuperscript{w}, Formal Foundations of Linguistic Theories II]

LING 627a\textsuperscript{w}, Language and Computation  Gaja Jarosz  
Design and analysis of computational models of language. Topics include finite state tools, computational morphology and phonology, grammar and parsing, lexical semantics, and the use of linguistic models in applied problems. Prerequisite: prior programming experience or permission of the instructor. MW 2:30–3:45 (formerly LING 541a)

LING 630b\textsuperscript{w}, Techniques in Neurolinguistics  Einar Mencl  
The first section of this course is focused on obtaining a basic understanding of neuroimaging data acquisition and analysis techniques, primarily MRI, with application to the study of language. Technique subareas include MRI acquisition; preprocessing; single- and multi-subject data analysis; visualization; and network analysis. Classes pair lecture presentation and in-class interactive demonstrations with relevant datasets. The second section focuses on selected readings in the study of language using these techniques. Topic areas include speech production and perception, reading, and dyslexia. Readings are primarily drawn from journal articles in the field in general, but also from within Haskins Laboratories, allowing access and hands-on analysis and exploration of existing datasets. Prerequisite: LING 510b. T 9:25–11:15

LING 631b\textsuperscript{w}, Neurolinguistics  Maria Piñango  
The study of language as a cognitive neuroscience. The interaction between linguistic theory and neurological evidence from brain damage, degenerative diseases (e.g., Alzheimer’s disease), mental illness (e.g., schizophrenia), neuroimaging, and neurophysiology. The connection of language as a neurocognitive system to other systems such as memory and music. TTH 11:35–12:50

LING 632a\textsuperscript{w}, Introduction to Phonological Analysis  Gaja Jarosz  
The structure of sound systems in particular languages. Phonemic and morphophonemic analysis, distinctive-feature theory, formulation of rules, and problems of rule interpretation. Emphasis on problem solving. Prerequisite: LING 510b or 620a. MW 11:35–12:50 (formerly LING 532a)
LING 635b, Phonological Theory  Ryan Bennett
Topics in the architecture of a theory of sound structure. Levels of representation; classical phonological rules and their interaction. Ordering paradoxes; cyclicity and lexical phonology. Motivations for replacing a system of rules with a system of constraints. Optimality theory: constraint types and their interactions. Correspondence theory. Opacity and stratal OT. Prerequisite: LING 632a or permission of the instructor. TTH 11:35–12:50 (formerly LING 535b)

LING 636b, Articulatory Phonology  Jelena Krivokapić
Introduction to phonology as a system for combining units of speech (constriction gestures of the vocal organs) into larger structures. Analysis of articulatory movement data; modeling using techniques of dynamical systems. Emphasis on universal vs. language-particular aspects of gestural combination and coordination. Prerequisite: LING 520a or permission of the instructor. T 3:30–5:20

LING 641a, Field Methods  Hannah Haynie
Principles of phonetics, phonology, morphology, syntax, and semantics applied to the collection and interpretation of novel linguistic data. Data are collected and analyzed by the class as a group, working directly with a speaker of a relatively undocumented language. TTH 2:30–3:45

LING 642b, Topics in Phonology: Probability

LING 647b, The Indigenous Languages of Australia  Claire Bowern
A general introduction to the indigenous languages of Australia. Issues in phonology, morphology, syntax, sociolinguistics, prehistory (e.g., theories of colonization and spread), and language endangerment and revitalization. T 9:25–11:15 (formerly LING 547b)

LING 651b, Learnability and Development

LING 653a, Syntax I  Raffaella Zanuttini
An introduction to the syntax (sentence structure) of natural language. Introduction to generative syntactic theory and key theoretical concepts. Syntactic description and argumentation. Topics include phrase structure, transformations, and the role of the lexicon. TTH 1–2:15 (formerly LING 553a)

LING 654b, Syntax II  Robert Frank
Recent developments in syntactic theory: government and binding, principles and parameters, and minimalist frameworks. In-depth examination of the basic modules of grammar (lexicon, X-bar theory, theta-theory, case theory, movement theory). Comparison and critical evaluation of specific syntactic analyses. Prerequisite: LING 653a. MW 11:35–12:50

LING 655b, Subjects

LING 656a, Grammatical Relations

LING 657a, Classic Readings in Syntax
LING 660au/PSYC 650au, Topics in Syntax: The Mental Lexicon

LING 661au, Current Trends in Syntax

LING 663au, Semantics  Benjamin George
Introduction to truth-conditional compositional semantics. Set theory, first- and higher-order logic, and the lambda calculus as they relate to the study of natural language meaning. Some attention to analyzing the meanings of tense/aspect markers, adverbs, and modals. TTH 4–5:15

LING 664bu, Semantic Theory

LING 665au, Semantic Change

LING 671a, Philosophy of Language

LING 675bu, Pragmatics

LING 690au, Negation and Polarity

LING 671b, Philosophy of Language

LING 675b, Pragmatics

LING 710b, Predication

LING 720b, Origins of Sound Structure  Gaja Jarosz
What explains phonological typology? Universal Grammar? Sound change? Learning biases? Phonetics? This course tackles this fundamental question from a broad perspective, considering a diverse range of proposals and approaches. A major goal of the course is to integrate the contributions from this array of perspectives to gain a deeper understanding of the major issues, debates, and kinds of evidence that can be brought to bear on these questions. Prerequisite: LING 632a; LING 635b is recommended but not required. W 3:30–5:30

LING 721au, Topics in Phonetics: Prosody  Jelena Krivokapic
Survey of structural and phonetic properties of prosody. Theories of prosodic hierarchies, manifestations of prosodic structure in acoustics and articulation, factors influencing prosodic boundary placement, prosody in speech perception, and prosodic transcription. Laboratory exercises examine acoustic properties of prosodic structure. Prerequisite: LING 620a or permission of the instructor. T 3:30–5:20

LING 740au, Topics in Phonology: Foot Structure  Ryan Bennett
Arguments for and against the existence of foot structure in natural language. Evidence drawn from stress systems, prosodic morphology, foot-conditioned segmental phonotactics, and experimental studies. Other possible topics include prosodic hierarchy theory and competing views of metrical structure; opacity effects in metrically conditioned phenomena; and the typology of foot structure and possible sources for observed crosslinguistic regularities in footing. M 9:25–11:15

LING 755bu, Doubling in Syntax  Raffaella Zanuttini
Syntactic structures that exhibit doubling effects, and syntactic mechanisms that can give rise to them. Double modal constructions (“I might could go with you tomorrow”); clitic doubling (“Lo vimos a Juan”); monoclausal versus biclausal analyses of tags in questions
(“John takes everything seriously, doesn’t he?”) and declaratives (“He takes everything seriously, John does”). TTH 11:35–12:50

LING 760a, Compositional Syntax  Robert Frank
Grammatical frameworks in which the properties of the operations for constructing syntactic structure play a central explanatory role. Comparison of minimalism, tree adjoining grammar, and combinatory categorial grammar, with attention to their implications for syntactic phenomena such as agreement, displacement, and word order variation, as well as their consequences for the nature of the syntax-semantics interface. Prerequisite: LING 654b or equivalent, or permission of the instructor. W 9:25–11:15

LING 772b, Meaning, Concepts, and Words  Maria Piñango
The only way a finite brain can produce an unlimited number of novel thoughts is by storing a finite system. It is proposed that part of this system is a large collection of stored parts, which we call “concepts” and which are further combined and recombined via predetermined principles. In order to allow us to express our thoughts, our finite brain must also include a system of associating combinations of concepts with combinations of words and sentences. In this seminar we investigate proposals and empirical evidence from cognitive psychology, linguistics, and cognitive neuroscience, seeking to explain this connection between the ways we combine our concepts and the ways we combine our words and phrases. W 9:25–11:15

LING 775b/PHIL 708b, Questions and Attitudes  Benjamin George, Zoltán Szabó
An exploration of the semantics of embedded and unembedded questions, with an emphasis on attitude ascription constructions relating an individual to a wh-question. Topics include question embedding under “know,” the question-answer relationship, and some of the important ambiguities associated with questions. M 7–8:50

LING 776b/PHIL 633b, Implicature and Pragmatic Theory  Laurence Horn
Theories of conversational and conventional implicature. Diverse approaches to the characterization of what is said and what is meant. Pragmatic intrusion into truth-conditional meaning in neo-Gricean pragmatics and relevance theory; the problem of “embedded implicatures” and the grammatical view of scalar implicature. Experimental studies of implicature and the grammar/pragmatics interface. Prerequisite: one course in semantics or pragmatics, or permission of the instructor. W 9:25–11:15 (formerly LING 676b)

LING 790a, Research Methods in Linguistics  Maria Piñango
An introduction to research methods in linguistics. Observational and experimental approaches to research in the field. Topics include collection and organization of linguistic data, basic field methods, and use of language corpora and databases. Introduction to research in language acquisition and language change. Prerequisites: one course in syntax and one course in phonology. W 3:30–5:20

LING 830a or b, Directed Research in Linguistics
By arrangement with faculty.

LING 831a or b, Directed Research in Phonetics
By arrangement with faculty.
LING 840a or b, Directed Research in Phonology
By arrangement with faculty.

LING 850a or b, Directed Research in Grammar
By arrangement with faculty.

LING 860a or b, Directed Research in Semantics
By arrangement with faculty.
MANAGEMENT

135 Prospect Street, 203.432.5957
http://phd.som.yale.edu
M.A., M.Phil., Ph.D.

Dean
Edward Snyder

Director of Graduate Studies
Subrata Sen (52 Hillhouse, Rm. 221, 203.432.6028, subrata.sen@yale.edu)

Associate Professors  Keith Chen, James Choi, Jiwoong Shin, Heather Tookes, Amy Wrzesniewski, Hongjun Yan

Fields of Study
Current fields include accounting, financial economics, marketing, and organizations and management. Other applied management fields may be added in subsequent years.

Special Admissions Requirements
The GRE General Test or the GMAT Test is required by the Graduate School. Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL).

Special Requirements for the Ph.D. Degree
Admission to candidacy will be based on the requirements of the Graduate School, which include the submission of a prospectus, duly approved by the faculty. Students must maintain a satisfactory grade record in the first year to remain in the program. Students shall, in addition, fulfill the requirements stated below. The process of admission to candidacy will include a faculty review of the student’s entire academic record once all
requirements have been successfully completed, and must be concluded by the end of the third year.

**CORE REQUIREMENTS**

Two core courses are required of each student, General Economic Theory: Microeconomics, and Policy Modeling. During the first two years in the program, each student is required to complete a two-course sequence in empirical methods and a two-course sequence in one of the social sciences. Both of these sequences are usually taken during the first year. In addition, each student must prepare an original paper during his or her first summer and submit it to the faculty at the beginning of the third term in residence. Further, a second-year research paper must be submitted to the faculty by November 1 of the fifth term in residence.

**IN-DEPTH REQUIREMENT**

The in-depth requirement consists of five courses selected by the student with the consent of the area faculty and the director of graduate studies (DGS). This in-depth study is designed to focus on a particular research paradigm and to prepare the student for the dissertation. In addition, a qualifying examination prepared by the area faculty must be passed. Currently offered in-depth areas are accounting, financial economics, marketing, and organizations and management.

**BREADTH REQUIREMENT**

The breadth requirement consists of one course that is outside of the student’s depth area. The breadth course is selected by the student with the consent of the area faculty and the DGS.

**COURSE REQUIREMENT**

Each student must complete a total of fourteen courses, achieving a grade of Honors in at least two courses and a High Pass average in the other twelve courses.

**TEACHING**

Teaching is considered to be an important part of the doctoral program in Management. The program expects students to serve as teaching fellows, beginning in the spring term of the first year and continuing through the fourth year of study.

**Master’s Degrees**

**M.Phil.** A student who is admitted to candidacy will be eligible to receive the M.Phil. upon the recommendation of the program’s faculty and the approval of the Graduate School.

**M.A. (en route to the Ph.D.)** A student who completes the fourteen required courses with a High Pass average and the first-year paper will be eligible for the M.A. degree upon the recommendation of the program’s faculty and the approval of the Graduate School.

Program materials are available upon request to the Director of Graduate Studies, Management, Yale University, PO Box 208200, New Haven CT 06520-8200. For information on the M.B.A. degree, please contact the admissions office at the School of Management.
Courses

MGMT 700a/MGT 910a, Seminar in Accounting Research I  Rick Antle, Shyam Sunder
Study of analytical modeling techniques in accounting research that covers topics such as performance measurement for incentives, the consequences of asymmetric information in economic relationships and the role of accounting therein, information sharing within and across firms, and the pricing of related-party transactions.

MGMT 702b, Seminar in Accounting Research III  Alina Lerman
Study of empirical accounting research that covers topics such as valuation, pricing of accounting information, earnings management, reporting issues, accounting regulation, analyst forecasts, and auditing.

MGMT 703a, Experimental Economics  Shyam Sunder
This term-long seminar introduces participants to experimental methods in economics research and conducts a survey of experimental results. Depending on the interests of the participants, we cover topics from auctions, asset markets, game theory, monetary theory, public goods, corporate finance, market microstructure, institutional economics, and so on. Participants are expected to design and conduct their own experiment, make class presentations, and write a term paper. Enrollment limited. Prerequisite: permission of the instructor.

MGMT 740a/ECON 670a, Financial Economics I  Zhiwu Chen
Current issues in theoretical financial economics are addressed through the study of current papers. Focuses on the development of the problem-solving skills essential for research in this area.

MGMT 741b/ECON 671b, Financial Economics II  Jonathan Ingersoll
Continuation of MGMT 740a/ECON 670a.

MGMT 742a, Corporate Finance and Market Microstructure  Matthew Spiegel
The course covers recent journal articles in the area of corporate finance, market microstructure, and asset pricing. Topics from corporate finance include optimal debt levels, bankruptcy, security design, initial public offerings, and mergers and acquisitions. The half of the course on market microstructure and asset pricing covers inventory models, trading with asymmetric information in the presence of strategic and competitive traders, the social welfare impact of informed trading, bid-ask spreads, and issues relating to delegated portfolio management.

MGMT 745a/ECON 672a, Financial Behavior  Nicholas Barberis
Much of modern financial economics works with models in which agents are rational, in that they maximize expected utility and use Bayes's law to update their beliefs. Behavioral finance is a large and active field that studies models in which some agents are less than fully rational. Such models have two building blocks: limits to arbitrage, which make it difficult for rational traders to undo the dislocations caused by less rational traders; and psychology, which catalogues the kinds of deviations from full rationality we might expect to see. We discuss these two topics and then consider a number of applications: asset pricing (the aggregate stock market and the cross-section of average returns);
individual trading behavior; and corporate finance (security issuance, corporate investment, and mergers).

**MGMT 746b/ECON 674b, Financial Crises**  Gary Gorton, Andrew Metrick

An elective doctoral course covering theoretical and empirical research on financial crises. The first half of the course focuses on general models of financial crises and historical episodes from the nineteenth and twentieth centuries. The second half of the course focuses on the recent financial crisis. Prerequisites: MGMT 740a and 741b and permission of the instructor.

**MGMT 750b, Seminar in Marketing II**  Jiwoong Shin

Current issues in marketing related to product planning, pricing, advertising, promotion, sales force management, channels of distribution, and marketing strategy are addressed through the study of state-of-the-art papers.

**MGMT 752a and b, Marketing Workshop**  Jiwoong Shin

A series of presentations of their latest research by top marketing scholars from the United States and abroad.

**MGMT 753a/PSYC 553a, Behavioral Decision Making I: Choice**  Nathan Novemsky, Ravi Dhar

The seminar examines research on the psychology of decision making, focusing on choice. Although the normative issue of how choice should be made is relevant, the descriptive issue of how choices are made is the main focus of the course. Topics of discussion include choice framing and mental accounting, prospect theory and loss aversion, context effects, task effects, goal-directed choice, preference reversals, intertemporal choice, and behavioral economics, among others. The goal of the seminar is threefold: to foster a critical appreciation of existing research in behavioral decision theory as applied to consumer choice, to develop the students' skills in identifying and testing interesting research ideas, and to explore research opportunities for adding to that knowledge. Students generally enroll from a variety of disciplines including cognitive and social psychology, behavioral economics, finance, marketing, political science, medicine, and public health.

**MGMT 758b, Foundations of Behavioral Economics**  Shane Frederick

The course explores foundational topics in behavioral economics and discusses the dominant prescriptive models (which propose what decision makers should do) and descriptive models (which aim to describe what decision makers actually do). The course incorporates perspectives from economics, psychology, philosophy, decision theory, and finance, and engages long-standing debates about rational choice.

**MGMT 780a and b, Ph.D. Student Research Workshop**  Subrata Sen

**MGMT 781a and b, Accounting/Finance Workshop**

**MGMT 782-01a and b, Accounting Doctoral Student Pre-Workshop Seminar**  Tsahi Versano

**MGMT 782-02a and b, Financial Economics Doctoral Student Pre-Workshop Seminar**
MGMT 782-03a and b, Marketing Doctoral Student Pre-Workshop Seminar
Jiwoong Shin

MGMT 791a or b, Independent Reading and Research
By arrangement with individual faculty.

MGMT 792a or b, Predissertation Research
By arrangement with individual faculty.
MATHMATICS

10 Hillhouse Avenue, 203.432.4172
www.math.yale.edu
M.S., M.Phil., Ph.D.

Chair
Yair Minsky

Director of Graduate Studies
Mikhail Kapranov

Professors Donald Brown (Economics), Andrew Casson, Ronald Coifman, Michael Frame (Adjunct), Igor Frenkel, Howard Garland, Alexander Goncharov (on leave), Roger Howe, Peter Jones, Gil Kalai (Adjunct), Ravindran Kannan (Computer Science), Mikhail Kapranov, Alexander Lubotzky (Adjunct), Gregory Margulis, Yair Minsky, Vincent Moncrief (Physics), David Pollard (Statistics), Vladimir Rokhlin (Computer Science), Van Vu, Gregg Zuckerman

Assistant Professors Amanda Folsom, Alex Kontorovich, Sam Payne

Gibbs Assistant Professors Yael Algom Kfir, Swarnendu Datta, Yen Quang Do, Daniel Fresen, Asaf Hadari, Marketa Havlickova, Jiuzu Hong, Garving Kevin Luli, Zhenqi Wang, Zhiren Wang, Peng Zhao

Lecturer Anna Lachowska

Simons Fellow Tobias Dyckerhoff

Fields of Study

Fields include real analysis, complex analysis, functional analysis, classical and modern harmonic analysis; linear and nonlinear partial differential equations; dynamical systems and ergodic theory; geometric analysis; kleinian groups, low dimensional topology and geometry; differential geometry; finite and infinite groups; geometric group theory; finite and infinite dimensional Lie algebras, Lie groups, and discrete subgroups; representation theory; automorphic forms, L-functions; algebraic number theory and algebraic geometry; derived algebraic geometry, motives; mathematical physics, relativity; numerical analysis; combinatorics and discrete mathematics.

Special Requirements for the Ph.D. Degree

All students are required to: (1) complete eight term courses at the graduate level, at least two with Honors grades; (2) demonstrate a reading knowledge of two of the following languages: French, German, or Russian; (3) pass qualifying examinations on their general mathematical knowledge; (4) submit a dissertation prospectus; (5) participate in the instruction of undergraduates; (6) be in residence for at least three years; and (7) complete a dissertation that clearly advances understanding of the subject it considers. The normal time for completion of the Ph.D. program is five years. Requirement (1) normally includes basic courses in algebra, analysis, and topology; these should be
taken during the first year. The first language examination must be completed by the beginning of the third year of study, the second no later than the end of that year. A sequence of three qualifying examinations (algebra and number theory, real and complex analysis, topology) is offered each term, at intervals of about one month. All qualifying examinations must be taken by the end of the third term. The thesis is expected to be independent work, done under the guidance of an adviser. This adviser should be contacted not long after the student passes the qualifying examinations. A student is admitted to candidacy after completing requirements (1)–(6) and obtaining an adviser.

In addition to all other requirements, students must successfully complete MATH 991a, Ethical Conduct of Research, prior to the end of their first year of study. This requirement must be met prior to registering for a second year of study.

**Honors Requirement**

Students must meet the Graduate School’s Honors requirement by the end of the fourth term of full-time study.

**Teaching**

Teaching is regarded as an integral part of the graduate training process in Mathematics. We provide our graduate students the essential skills and experience without impeding their progress toward the Ph.D. degree. During the first two years, teaching duties are kept light, i.e., calculus or problem-solving tutors, and grading assignment in one term of each year. In the second year, graduate students attend a seminar devoted to issues of teaching that provides an opportunity to practice teaching. In the third, fourth, and fifth years of study, graduate students are responsible for teaching a section of calculus or the equivalent during one term of each year.

**Master’s Degrees**

**M.Phil.** In addition to the Graduate School's Degree Requirements (see under Policies and Regulations), a student must undertake a reading program of at least two terms’ duration in a specific significant area of mathematics under the supervision of a faculty adviser and demonstrate a command of the material studied during the reading period at a level sufficient for teaching and research.

**M.S. (en route to the Ph.D.)** A student must complete six term courses with at least one Honors grade, pass one language examination, perform adequately on the general qualifying examination, and be in residence at least one year. The M.S. degree is conferred only en route to the Ph.D.; there is no separate master’s program in Mathematics.

Program materials are available upon request to the Director of Graduate Studies, Mathematics Department, Yale University, PO Box 208283, New Haven CT 06520-8283.

MATH 991a/CPSC 991a, Ethical Conduct of Research
MECHANICAL ENGINEERING & MATERIALS SCIENCE

Dunham Laboratory, 203.432.4250
M.S., M.Phil., Ph.D.

Chair
Mitchell Smooke

Director of Graduate Studies
Udo Schwarz (udo.schwarz@yale.edu)

Associate Professors  Eric Dufresne, Corey O’Hern, Jan Schroers

Assistant Professors  Aaron Dollar, Nicholas Ouellette

Lecturers  Beth Anne Bennett, Kailasnath Purushothaman

Fields of Study

Fluids and thermal sciences  Dynamics and stability of drops and bubbles; dynamics of thin liquid films; macroscopic and particle-scale dynamics of emulsions, foams, and colloidal suspensions; electrospray theory and characterization; electrical propulsion applications; combustion and flames; computational methods for fluid dynamics and reacting flows; turbulence; particle tracking in fluid mechanics; laser diagnostics of reacting and nonreacting flows.

Soft matter/complex fluids  Jamming and slow dynamics in gels, glasses, and granular materials; mechanical properties of soft and biological materials; dynamics of macromolecules. Several faculty in Mechanical Engineering are also affiliated with the Integrated Graduate Program in Physical and Engineering Biology (www.peb.yale.edu).

Materials science  Characterization of crystallization and other phase transformations; studies of thin films; MEMS; smart materials such as shape memory alloys, amorphous metals, and nanomaterials including nanocomposites; NEMS; nano-imprinting; classical and quantum optomechanics; atomic-scale investigations of surface interactions and properties; classical and quantum nanomechanics; nanotribology.

Robotics/mechatronics  Machine and mechanism design; dynamics and control; robotic grasping and manipulation; human-machine interface; rehabilitation robotics; haptics; electromechanical energy conversion; biomechanics of human movement; human-powered vehicles.

For admissions and degree requirements, and for course listings, see Engineering & Applied Science.
MEDIEVAL STUDIES
53 Wall Street, Rm. 310, 203.432.0672
www.yale.edu/medieval
M.A., M.Phil., Ph.D.

Chair and Director of Graduate Studies
To be announced

Executive Committee  R. Howard Bloch, Jessica Brantley, Roberta Frank, Paul Freedman, Dimitri Gutas, Ivan Marcus, Giuseppe Mazzotta, María Rosa Menocal, Alastair Minnis, Robert Nelson, Denys Turner, Anders Winroth

Faculty associated with the program  R. Howard Bloch, Gerhard Böwering, Jessica Brantley, Walter Cahn (Emeritus), Ian Cornelius, Stephen Davis, Roberta Frank, Paul Freedman, Creighton Gilbert (Emeritus), Harvey Goldblatt, Frank Griffel, Beatrice Gruendler, Dimitri Gutas, Valerie Hansen, Peter Hawkins, Jacqueline Jung, Traugott Lawler (Emeritus), Bentley Layton, David Lummus, Ivan Marcus, Vasileios Marinis, John Matthews, Giuseppe Mazzotta, María Rosa Menocal, Mary Miller, Alastair Minnis, Robert Nelson, Lee Patterson (Emeritus), Kevin Poole, Fred Robinson (Emeritus), Denys Turner, Anders Winroth, Mimi Yiengpruksawan

Lecturers  Adel Allouche, Marcia Colish, Walter Goffart, Barbara Shailor, William Whobrey

Fields of Study
Fields in this interdisciplinary program include history, history of art, history of music, religious studies, languages and literatures, linguistics, and philosophy.

Special Admissions Requirements
The General Test of the GRE is required. A writing sample of ten to twenty pages should be included with the application.

Special Requirements for the Ph.D. Degree
Languages required are Latin, French, and German. Latin may be replaced with Arabic, Greek, or Hebrew when appropriate. Proficiency in Latin, Arabic, Greek, and Hebrew is tested with an examination administered and evaluated by the department during the first term. Proficiency in French and German is demonstrated by passing the departmental examinations and should be achieved by the third term. Students will design their programs in close contact with the director of graduate studies (DGS). During the first two years students take fourteen term courses, and must receive an Honors grade in at least four term courses the first year. Students take an oral examination, usually in the fifth term, on a set of three topics worked out in consultation with the DGS. Then, having nurtured a topic of particular interest, the student submits a dissertation prospectus that must be approved by the end of the third year. Upon completion of all predissertation requirements, including the prospectus, students are admitted to candidacy for the Ph.D.
degree. What remains, then, is the writing, submission, and approval of the dissertation during the final two years.

Students in Medieval Studies participate in the Teaching Fellows Program in the third and fourth years.

Master's Degrees

M.Phil. See Degree Requirements under Policies and Regulations. In addition, the program offers an M.Phil. in Medieval Studies for students enrolled in the Ph.D. programs of relevant humanities departments. Requirements for this degree are (1) eight courses in the medieval area, six of which must be from departments other than that in which the student is enrolled (two of these will normally be the Medieval Studies interdisciplinary seminar and a course in either research methodology or paleography); (2) proficiency in Latin, Arabic, Greek, or Hebrew as tested by an examination administered and evaluated by the department; and (3) an oral examination. The M.Phil. in Medieval Studies requires an additional year of course work in addition to the requirements of the student's home department. Fellowships that provide support for this extra year are available from the Graduate School; application forms may be obtained from the program in Medieval Studies.

M.A. (en route to the Ph.D.) Students enrolled in the Ph.D. program may qualify for the M.A. degree upon satisfactory completion of three terms of course work. Minimum requirements include a High Pass average in courses and passing the Latin examination.

Terminal Master's Degree Program For the terminal master's degree, students must take at least eight term courses with a general average of High Pass and with at least one term course of Honors. Two languages are required: Latin and either French or German. No thesis is required.

Courses

MDVL 550a or b, Directed Reading
By arrangement with faculty.

MDVL 552a/HIST 550a, Medieval Social History  Paul Freedman
Aspects of the social history of the Middle Ages. The bonds holding together societies with weak states and frequent local wars. Topics include the peasantry, definitions of noble status, the growth of towns, gender, the church in society. Attention is given to both the material conditions and mental constructs of Europe between about 1000 and 1500. Reading or research seminar. T 1:30–3:20

MDVL 552b/ENGL 539b, Literature and Theology in English, 1360–1410  Denys Turner, Alastair Minnis
There was an extraordinary flowering of religious writing in English during the period extending roughly from 1360, the approximate date of the first version of Piers Plowman, to 1410, the year in which Nicholas Love submitted his Mirror of the Blessed Life of Jesus Christ to Thomas Arundel, Archbishop of Canterbury, for his approval, in the context of new restrictions placed on vernacular writings as a response to the Lollard or “Wycliffite” heresy. This course considers some of that writing’s major theological
achievements, concentrating on selections from *Piers Plowman* and Chaucer’s *Canterbury Tales* together with *Pearl, The Cloud of Unknowing*, and Julian of Norwich’s *Revelations*. The consequences of Lollardy are investigated in a class on Walter Brut, a Welsh Lollard tried in 1391–3 (and eulogized in John Foxe’s *Book of Martyrs*), and the course ends with Love’s *Mirror*, often cited as the model of orthodox meditative practice.

**MDVL 561a/CPLT 572a/ENGL 516a**, *Medieval Celtic Literature*  
David Gabriel  
Major texts of Celtic literature, focusing on works from the birth of vernacular literature in the Middle Ages to the early modern period. Cultural, historical, and literary issues surrounding works in the Irish and Welsh languages; literary culture in Breton, Cornish, Scottish Gaelic, and Manx. Genres include lyric and bardic poetry, heroic and religious narrative, and early Arthurian works. All texts are available in translation, but students have some opportunity to learn basic reading in one or more languages. T 1:30–3:20

Medicine), Jeffrey Townsend (Ecology & Evolutionary Biology)

Fields of Study

The Graduate Program in Microbiology is a multidepartmental, interdisciplinary Ph.D.
program in training and research in the study of microorganisms and their effects on
their hosts. The faculty of the program share the view that understanding the biology
of microorganisms requires a multidisciplinary approach; therefore, the Microbiology
graduate program emphasizes the need for strong multidisciplinary training. The pro-
gram is designed to provide individualized education in modern microbiology and to pre-
pare students for independent careers in research and teaching. Students can specialize
in various areas, including bacteriology, virology, microbe-host interactions, microbial
pathogenesis, cell biology and immunobiology of microbial infections, microbial genetics and physiology, parasitology, and microbial ecology and evolution.

**Special Admissions Requirements**

To enter the Ph.D. program, students apply to the Microbiology track within the interdepartmental graduate program in the Biological and Biomedical Sciences. An undergraduate major in biology, biophysics, biochemistry, microbiology, or molecular biology is recommended; the GRE General Test or MCAT is required.

**Special Requirements for the Ph.D. Degree**

Course work generally occupies the first two years of study. Each student, together with a faculty committee, outlines a course of study tailored to the individual’s background and career goals. A program of course work may include general microbiology, virology, parasitology, and/or microbial genetics, as well as complementary courses in such areas as epidemiology, cell biology, immunology, biochemistry, genetics, ecology, vector biology, and statistics. The program also sponsors journal clubs and seminars in microbiology and related areas. All students participate in three laboratory rotations (MBIO 670a and b), with different faculty members, in their area of interest. Laboratory rotations ensure that students quickly become familiar with the variety of research opportunities available in the program. An individualized qualifying exam on topics selected by each student, in consultation with the faculty, is given before the end of the second year. Students then undertake an original research project under the direct supervision of a faculty member. In the third year, students organize their thesis committee and prepare a dissertation prospectus, which is submitted to the Graduate School after approval by their committee. The student is then admitted to candidacy. Upon completion of the student’s research project, the Ph.D. requirements conclude with the writing of a dissertation and its oral defense.

An important aspect of graduate training in microbiology is the acquisition of teaching skills through participation in courses appropriate for the student’s scientific interests. These opportunities can be drawn from a diverse menu of lecture, laboratory, and seminar courses given at the undergraduate, graduate, and medical school levels. Ph.D. students are expected to participate in two terms (or the equivalent) of teaching. Students are not permitted to teach during their first year.

In addition to all other requirements, students must successfully complete MB&B 676b, Responsible Conduct of Research, prior to the end of their first year of study. This requirement must be met prior to registering for a second year of study.

**Master’s Degree**

**M.Phil.** See Degree Requirements under Policies and Regulations. Although the program does not formally offer a master’s degree, students who have been admitted to candidacy qualify for an M.Phil.

Program materials are available upon request to Yin Jiang in the Microbiology Graduate Program, Section of Microbial Pathogenesis, BCMM 354A, Yale University, New Haven CT 06526.
Courses

MBIO 547b/EMD 547b, Vaccines: Concepts in Biology  Diane McMahon-Pratt
Vaccines are one of the major public health preventive approaches for disease control. However, the underlying biological mechanisms are still being explored, with the purpose of designing better and more efficacious vaccines. Vaccine-preventable diseases now include many infectious diseases as well as cancer. This course briefly reviews the immunological basis of immunity to infection and disease. Topics then include the basic science underlying vaccine development, current vaccine-preventable diseases, as well as vaccines under development. Prerequisites: immunology and microbiology. MW 10–11:20

MBIO 670a,b, Laboratory Rotation  Craig Roy
Rotation in three laboratories. Required for all first-year graduate students.

MBIO 680a/EMD 680a, Molecular and Cellular Processes of Parasitic Eukaryotes  Diane McMahon-Pratt, Christian Tschudi
An introductory topic-based course in modern parasitology. For each topic there is an introductory lecture followed by a journal club-like discussion session of relevant papers selected from the literature. The course provides an introduction to basic biological concepts of parasitic eukaryotes causing diseases in humans. Topics include strategies used by parasitic eukaryotes to establish infections in the host and approaches to disease control, through either chemotherapy, vaccines, or genomics. In addition, emphasis is placed on evaluating the quality and limitation of scientific publications and developing skills in scientific communication. Prerequisite: permission of the instructor. MW 10:45–12

MBIO 685b, Molecular Mechanisms of Microbial Pathogenesis  John MacMicking
This interdisciplinary course focuses on current topics related to host-pathogen interactions. Each week a lecture is given on the topic, followed by student presentations of seminal papers in the field. All participants are required to present a paper. TTH 10–11:30

MBIO 686a, Bacterial Determinants of Pathogenesis  Hervé Agaisse
The course provides an introduction to basic principles in bacterial pathogenesis. Topics focus on the bacterial determinants mediating infection and pathogenesis, as well as strategies to prevent and treat diseases. Each week a lecture is given on the topic, followed by student presentations of seminal papers in the field. All participants are required to present a paper. TTH 10–11:30

MBIO 700a, Seminal Papers on the Foundations of Modern Microbiology  Peter Tattersall
A required course for Microbiology first- and second-year students; not for credit. The course is offered every other year, alternating with MBIO 703a, so that it can be taken once during each student’s tenure in the program. Students present and discuss papers describing fundamental discoveries in areas related to microbiology. The goal is to familiarize students with the process of scientific discovery, and with the history of major developments in the field. Topics include important discoveries involving major human pathogens, fundamental processes in molecular biology, and the development of technology that has a major impact on current biomedical research. W 5–6:30
MBIO 701a,b, Research in Progress  Craig Roy
All students, beginning in their third year, are required to present their research once a year at the Graduate Student Research in Progress. These presentations are intended to give each student practice in presenting his or her own work before a sympathetic but critical audience and to familiarize the faculty with the research.  M 2

MBIO 702a,b, Microbiology Seminar Series  Craig Roy
All students are required to attend all Microbiology seminars scheduled throughout the academic year. Microbiologists from around the world are invited to describe their research.  TH 4

[MBIO 703a, Evasion of Host Defenses by Viruses, Bacteria, and Eukaryotic Parasites  Offered every other year]

MBIO 734a/GENE 734a/MB&B 734a/PATH 634a, Molecular Biology of Animal Viruses  Robert Means, Daniel DiMaio, I. George Miller, and staff
Lecture course with emphasis on mechanisms of viral replication, oncogenic transformation, and virus-host cell interactions. Class meets every Monday and Wednesday, but only occasional Fridays; see the instructor for additional information.  MWF 9–10:15
Molecular Biophysics and Biochemistry

301 Josiah Willard Gibbs Laboratories, 203.432.5662

M.S., M.Phil., Ph.D.

Chair
Patrick Sung

Director of Graduate Studies
Mark Solomon (301 JWG, 203.432.5662, nessie.stewart@yale.edu)

Professors  Karen Anderson (Pharmacology), Susan Baserga, Ronald Breaker (Molecular, Cellular & Developmental Biology), Gary Brudvig (Chemistry), Donald Crothers (Emeritus, Chemistry), Enrique De La Cruz, Daniel DiMaio (Genetics; Therapeutic Radiology), Donald Engelman, Alan Garen, Mark Gerstein, Nigel Grindley (Emeritus), Mark Hochstrasser, Anthony Koleske, William Konigsberg, Peter Lengyel (Emeritus), J. Patrick Loria (Chemistry), I. George Miller (Pediatric Infectious Diseases; Public Health), Andrew Miranker, Peter Moore (Emeritus, Chemistry), Nancy Moran (Ecology & Evolutionary Biology), Thomas Pollard (Molecular, Cellular & Developmental Biology), Lynne Regan, David Schatz (Immunobiology), Robert Shulman (Emeritus), Dieter Söll, Mark Solomon, Joan Steitz, Thomas Steitz, Scott Strobel, William Summers (Therapeutic Radiology), Patrick Sung, Kenneth Williams (Adjunct; Research), Sandra Wolin (Cell Biology)

Associate Professors  Thomas Biederer, Michael Koelle, Yorgo Modis, Elizabeth Rhoades, Yong Xiong

Assistant Professors  Richard Baxter (Chemistry), Christian Schlieker, Matthew Simon, Charles Sindelar, Corey Wilson (Chemical & Environmental Engineering)

Fields of Study

The principal objective of members of the department is to understand living systems at the molecular level. Laboratories in MB&B focus on a diverse collection of problems in biology. Some specialize in the study of DNA dynamics, including replication, recombination, transposition, and/or functional genomics. Others focus on transcriptional regulation, from individual transcription factors to the control of lymphocyte activation, the interferon response, and organismal development. Other groups study RNA catalysis, RNA-protein interactions, and ribonucleoproteins including spliceosomes and the ribosome. Additionally there are those that emphasize protein folding and design, transmembrane signaling, and control of the cell cycle. Structural and computational biology is a strong component of many of these research efforts.

Special Admissions Requirements

Courses in introductory biology, general chemistry, organic chemistry, physical chemistry, mathematics through differential equations, and one year of physics with calculus are required for admission. Biochemistry is strongly recommended. Applicants must take the GRE General Test, which is preferred, or the MCAT.
To enter the Ph.D. program, students apply to an interest-based track within the interdepartmental graduate program in the Biological and Biomedical Sciences.

**Special Requirements for the Ph.D. Degree**

All first-year students (except M.D./Ph.D.) perform three laboratory rotations (MB&B 650, Lab Rotation for First-Year Students). All students are required to take, for credit, seven one-term science courses. To obtain the desired breadth and depth of education, students are required to take the core graduate courses offered by the department in biochemistry, molecular genetics, and structural biology (MB&B 720a, 721b, 730a, 743b).

Students entering in the fall of 2012 should take at least two approved module courses in place of MB&B 721b and may take one of the approved courses in place of MB&B 743b. Additional courses, chosen from within MB&B or from related graduate programs, should form a coherent background for the general area in which the student expects to do dissertation research. All students also attend MB&B 676b, Responsible Conduct of Research. Students with an extensive background in biochemistry or biophysics are permitted to substitute advanced courses for the introductory courses. There is no foreign language requirement. The student’s research committee (see below) makes the final decision concerning the number and selection of courses required of each student.

All students are required to assist in teaching two terms as a TF-2 during their graduate careers, usually during the second and third years. The student selects a research adviser by the end of the second term of residence. At that time two additional faculty members are chosen to form a research committee, with the total committee including at least two members of MB&B. Students are required to meet with this committee in the spring of years two and three, and in both the fall and spring of subsequent years. The qualifying examination, usually taken in the fall of the second year, is an oral defense of two short written research proposals, one in the same area as the student’s thesis research and one in a different area; the three-member oral examination committee usually includes at least one of the two members of the research committee excluding the thesis adviser.

Requirements for admission to candidacy, which usually takes place after four terms of residence, include (1) completion of course requirements; (2) completion of the qualifying examination; (3) certification of the student’s research abilities by vote of the faculty upon recommendation from the student’s research committee; and (4) submission of a brief prospectus of the proposed thesis research. Completion of the teaching requirement is not required for admission to candidacy. Once final drafts of the thesis chapters have been approved by the research committee, the student presents a dissertation seminar to the entire department, and only afterward may the thesis be submitted. Students must have written at least one first-author paper that is submitted, in press, or published by the time of the thesis seminar.

**Honors Requirement**

Students must meet the Graduate School’s Honors requirement by the end of the fourth term of full-time study; see Degree Requirements under Policies and Regulations. Students must also maintain an overall High Pass average. Student progress toward these goals is reviewed at the ends of the first and second terms.
M.D./Ph.D. Students

M.D./Ph.D. students must satisfy the requirements listed above for the Ph.D. with the following modifications: Laboratory rotations are not required but are available. Assisting in teaching of one lecture course is required. With approval of the director of graduate studies (DGS), some courses taken toward the M.D. degree can be counted toward the seven courses required for the Ph.D. provided that the course carries a graduate course number, and that the student has registered for it as a graduate course. M.D./Ph.D. students should still take MB&B 720a, 721b, 730a, and 743b, or the approved substitutions described above.

Master’s Degree

M.Phil. See Degree Requirements under Policies and Regulations. Awarded only to students admitted to candidacy who are continuing for the Ph.D. Students need not have completed their teaching requirement to receive the M.Phil. Students are not admitted for this degree.

M.S. May be awarded to a student in the Ph.D. program who is in good standing upon completion of at least two terms of graduate study and who will not continue in the Ph.D. program. A student must receive grades of Pass or higher in at least five courses approved by the DGS as counting toward a graduate degree, exclusive of seminars or research. Students must have taken at least ten courses. A typical schedule would consist of six traditional courses, two terms of MB&B 650, and one term each of MB&B 675a and 676b. A student must also meet the Graduate School’s Honors requirement for the Ph.D. program and maintain a High Pass average.

More detailed program materials are available upon request to the Director of Graduate Admissions, Department of Molecular Biophysics and Biochemistry, Yale University, PO Box 208114, New Haven CT 06520–8114.

Courses

MB&B 500b/MCDB 500b, Biochemistry Ronald Breaker, Nicole Clay, Donald Engelman
An introduction to the biochemistry of animals, plants, and microorganisms, emphasizing the relations of chemical principles and structure to the evolution and regulation of living systems.

MB&B 517b3/ENAS 517b/MCDB 517b3/PHYS 517b3, Methods and Logic in Interdisciplinary Research Lynne Regan, Enrique De La Cruz, Eric Dufresne, Thierry Emonet, Paul Forscher, Megan King, Michael Levene, Simon Mochrie, Corey O’Hern, Thomas Pollard, Elizabeth Rhoades, Corey Wilson, and staff
This half-term IGPPEB class is intended to introduce students to integrated approaches to research. Each session is led by faculty with complementary expertise and discusses papers that use different approaches to the same topic (for example, physical and biological or experiment and theory). Counts as 0.5 credit toward MB&B graduate course requirements. Required for students in IGPPEB. MW 5–7
MB&B 520a1, Boot Camp Biology  Lynne Regan, Mark Hochstrasser, Valerie Horsley, Anthony Koleske, Christian Schlieker, and staff
An intensive introduction to biological nomenclature, systems, processes, and techniques for graduate students with previous backgrounds in non-biological fields including physics, engineering, and computer science who wish to perform graduate research in the biological sciences. Counts as 0.5 credit toward MB&B graduate course requirements. Required for students in IGPPEB.

MB&B 523a/ENAS 541a/PHYS 523a, Biological Physics  Eric Dufresne
An introduction to the physics of several important biological phenomena, including molecular motors, protein folding, bacterial locomotion, and allostery. The material and approach are positioned at the interface of the physical and biological sciences. 
TTH 2:30–3:45

MB&B 545b, Methods and Logic in Molecular Biology  Anthony Koleske, Mark Hochstrasser, Dieter Söll
An examination of fundamental concepts in molecular biology through analysis of landmark papers. Development of skills in reading the primary scientific literature and in critical thinking. Open only to MB&B students pursuing the B.S./M.S. degree. TH 7–8:50

MB&B 591b/ENAS 991b/MCDB 591b/PHYS 991b, Integrated Workshop  Lynne Regan, Eric Dufresne, Thierry Emonet, Paul Forscher, Simon Mochrie
This required course for students in IGPPEB involves hands-on laboratory modules with students working in pairs. A biology student is paired with a physics or engineering student; a computation/theory student is paired with an experimental student. The modules are devised so that a range of skills are acquired, and students learn from each other. Receives no course credit toward MB&B graduate course requirements. With permission of the DGS, can be used by IGPPEB students to replace the third rotation of MB&B 650b but will receive no separate course credit toward MB&B course requirements.

MB&B 600a1, Principles of Biochemistry I  Thomas Biederer, Michael Koelle
Discussion of the physical, structural, and functional properties of proteins, lipids, and carbohydrates, three major classes of molecules in living organisms. Energy metabolism, hormone signaling, and muscle contraction as examples of complex biological processes whose underlying mechanisms can be understood by identifying and analyzing the molecules responsible for these phenomena. TTH 11:35–12:50

MB&B 601b, Principles of Biochemistry II  Patrick Sung, Christian Schlieker
A continuation of MB&B 600a that considers the chemistry and metabolism of nucleic acids, the mechanism and regulation of protein and nucleic acid synthesis, and selected topics in macromolecular biochemistry. TTH 11:35–12:50

MB&B 602a/CBIO 602a/MCDB 602a, Molecular Cell Biology  Sandra Wolin, Michael Caplan, Craig Crews, Pietro De Camilli, Megan King, Thomas Melia, In-Hyun Park, Thomas Pollard, James Rothman, Martin Schwartz
A comprehensive introduction to the molecular and mechanistic aspects of cell biology for graduate students in all programs. Emphasizes fundamental issues of cellular organization, regulation, biogenesis, and function at the molecular level. MW 1:45–3
MB&B 625a/GENE 625a/MCDB 625a, Basic Concepts of Genetic Analysis
Tian Xu and staff
The universal principles of genetic analysis in eukaryotes are discussed in lectures. Students also read a small selection of primary papers illustrating the very best of genetic analysis and dissect them in detail in the discussion sections. While other Yale graduate molecular genetics courses emphasize molecular biology, this course focuses on the concepts and logic underlying modern genetic analysis. MW 11:35–12:50

MB&B 630b/MCDB 630b, Biochemical and Biophysical Approaches in Molecular and Cellular Biology
Anna Pyle, Enrique De La Cruz, Thomas Pollard
This graduate course introduces the theory and application of biochemical and biophysical methods to study the structure and function of biological macromolecules. The course considers the basic physical chemistry required in cellular and molecular biology but does not require a previous course in physical chemistry. One class per week is a lecture introducing a topic. The second class is a discussion of one or two research papers utilizing those methods. Does not count for graduate course credit for BBSB graduate students. TTH 2:30–3:45

[MB&B 635a/ENAS 518a, Mathematical Methods in Biophysics]

MB&B 650, Lab Rotation for First-Year Students
Mark Solomon
Required for all first-year BBSB graduate students. Credit for full year only.

MB&B 675a, Seminar for First-Year Students
Charles Sindelar
Required for all first-year BBSB graduate students.

MB&B 676b, Responsible Conduct of Research
Susan Baserga and staff
Designed for students who are beginning to do scientific research. The course seeks to describe some of the basic features of life in contemporary research and some of the personal and professional issues that researchers encounter in their work. Approximately six sessions, run in a seminar/discussion format. Required for all first-year BBSB graduate students. F 3

MB&B 710b4/C&MP 710b, Electron Cryo-Microscopy for Protein Structure Determination
Fred Sigworth, Charles Sindelar
Understanding cellular function requires structural and biochemical studies at an ever-increasing level of complexity. The course is an introduction to the concepts and applications of high-resolution electron cryo-microscopy. This rapidly emerging new technique is the only method that allows biological macromolecules to be studied at all levels of resolution from cellular organization to near atomic detail. Counts as 0.5 credit toward MB&B graduate course requirements. TTH 9–10:15

MB&B 720a, Macromolecular Structure and Biophysical Analysis
Thomas Steitz, Donald Engelman, Andrew Miranker, Charles Sindelar
An in-depth analysis of macromolecular structure and its elucidation using modern methods of structural biology and biochemistry. Topics include architectural arrangements of proteins, RNA, and DNA; practical methods in structural analysis; and an introduction to diffraction and NMR. Prerequisites: physical chemistry (may be taken concurrently) and biochemistry. TTH 11:35–12:50
MB&B 722b, Optical Spectroscopy of Biomolecules

MB&B 723a2, Macromolecular Interactions: Atoms to Networks

MB&B 730a, Methods and Logic in Molecular Biology  Mark Solomon, Enrique De La Cruz, Anthony Koleske, Lynne Regan, and staff
The course examines fundamental concepts in molecular biology through intense critical analysis of the primary literature. The objective is to develop primary literature reading and critical thinking skills. Required of and open only to first-year graduate students in BBSB. TTH 5–8

MB&B 734a/GENE 734a/MBIO 734a/PATH 634a, Molecular Biology of Animal Viruses  Robert Means, Daniel DiMaio, I. George Miller, and staff
Lecture course with emphasis on mechanisms of viral replication, oncogenic transformation, and virus-host cell interactions. Class meets every Monday and Wednesday, but only occasional Fridays; see the instructor for additional information. MWF 9–10:15

MB&B 743b/U/GENE 743b/MCDB 743b, Advanced Eukaryotic Molecular Biology  Mark Hochstrasser, Anthony Koleske, Patrick Sung
Selected topics in transcriptional control, regulation of chromatin structure, mRNA processing, mRNA stability, RNA interference, translation, protein degradation, DNA replication, DNA repair, site-specific DNA recombination, somatic hypermutation. Prerequisite: biochemistry or permission of the instructor. TTH 11:35–12:50

MB&B 749a/U/GENE 749a, Medical Impact of Basic Science  Joan Steitz, Mark Hochstrasser, I. George Miller, Andrew Miranker, David Schatz, Patrick Sung, and staff
Consideration of examples of recent discoveries in basic science that have elucidated the molecular origins of disease or that have suggested new therapies for disease. Emphasis is placed on the fundamental principles on which these advances rely. Reading is from the primary scientific and medical literature, with emphasis on developing the ability to read this literature critically. Aimed primarily at undergraduates. Prerequisite: biochemistry or permission of the instructor. May not be taken by MB&B B.S./MS. students for graduate course credit. MW 1–2:15

MB&B 750a2, Biological Membranes  Thomas Biederer, Donald Engelman
Biological membranes and their resident proteins are essential for cellular function; yet comparatively little is known about their structure and dynamics. This class provides an introduction to the biochemistry and biophysics of lipids, lipid bilayers, and lipid-derived second messengers. In addition, structural as well as functional aspects of the different classes of membrane proteins are discussed along with an outline of experimental approaches used to achieve an understanding of membrane protein structure and function at a molecular level. Counts as 0.5 credit toward MB&B graduate course requirements. Prerequisite: biochemistry. MW 9–10:15

MB&B 752a/U/CB&B 752a/CPSC 752a/U/MCDB 752a/U, Bioinformatics: Practical Application of Simulation and Data Mining  Mark Gerstein
Bioinformatics encompasses the analysis of gene sequences, macromolecular structures, and functional genomics data on a large scale. It represents a major practical application
for modern techniques in data mining and simulation. Specific topics to be covered include sequence alignment, large-scale processing, next-generation sequencing data, comparative genomics, phylogenetics, biological database design, geometric analysis of protein structure, molecular-dynamics simulation, biological networks, normalization of microarray data, mining of functional genomics data sets, and machine learning approaches for data integration. Prerequisites: biochemistry and calculus, or permission of the instructor. MW 1–2:15

**MB&B 753a1, Bioinformatics: Practical Application of Data Mining**  Mark Gerstein
Bioinformatics encompasses the analysis of gene sequences, macromolecular structures, and functional genomics data on a large scale. It represents a major practical application for modern techniques in data mining and simulation. This module focuses on the first of these techniques, data mining. Specific topics to be covered include sequence alignment, comparative genomics and phylogenetics, biological databases, microarray normalization, and machine-learning approaches to data integration. Counts as 0.5 credit toward MB&B graduate course requirements. Prerequisites: biochemistry and calculus, or permission of the instructor. MW 1–2:15

**MB&B 754a2, Bioinformatics: Practical Application of Simulation**  Mark Gerstein
Bioinformatics encompasses the analysis of gene sequences, macromolecular structures, and functional genomics data on a large scale. It represents a major practical application for modern techniques in data mining and simulation. This module focuses on the second of these techniques, simulation. Specific topics to be covered include geometric analysis of protein structure, molecular-dynamics simulation, and biological networks. Counts as 0.5 credit toward MB&B graduate course requirements. Prerequisites: biochemistry and calculus, or permission of the instructor. MW 1–2:15

**MB&B 760b3, Principles of Macromolecular Crystallography**  Yong Xiong and staff
Rigorous introduction to the principles of macromolecular crystallography, aimed at students who are planning to carry out structural studies involving X-ray crystallography or who want to obtain in-depth knowledge for critical analysis of published crystal structures. Counts as 0.5 credit toward MB&B graduate course requirements. Prerequisites: physical chemistry and biochemistry. TTH 9–10:15

**MB&B 761b4, X-ray Crystallography Workshop**  Yong Xiong and staff
This laboratory course provides hands-on training in the practical aspects of macromolecular structure determination by X-ray crystallography. Topics include data collection, data reduction, phasing by multi-wavelength anomalous diffraction and molecular replacement, solvent flattening, noncrystallographic symmetry averaging, electron density interpretation, model building, structure refinement, and structure validation. The course includes training in the use of computer programs used to perform these calculations. Counts as 0.5 credit toward MB&B graduate course requirements. Prerequisites: MB&B 760b3 and a working exposure to the Unix operating system.

**MB&B 800a, Advanced Topics in Molecular Medicine**  Susan Baserga, William Konigsberg, and staff
The seminar, which covers topics in the molecular mechanisms of disease, illustrates timely issues in areas such as protein chemistry and enzymology, intermediary
metabolism, nucleic acid biochemistry, gene expression, and virology. M.D. and M.D./Ph.D. students only. Prerequisite: biochemistry (may be taken concurrently). M 11–1

**MB&B 900a or 901b, Reading Course in Biophysics**  Mark Solomon
Directed reading course in biophysics. Term paper required. By arrangement with faculty. Open only to graduate students in MB&B. Please see syllabus for additional requirements.

**MB&B 902a or 903b, Reading Course in Molecular Genetics**  Mark Solomon
Directed reading course in molecular genetics. Term paper required. By arrangement with faculty. Open only to graduate students in MB&B. Please see syllabus for additional requirements.

**MB&B 904a or 905b, Reading Course in Biochemistry**  Mark Solomon
Directed reading course in biochemistry. Term paper required. By arrangement with faculty. Open only to graduate students in MB&B. Please see syllabus for additional requirements.

The following course is for students in the joint B.S./M.S. program with Yale College:

**MB&B 570a or MB&B 571b, Intensive Research for B.S./M.S. Candidates**  
Michael Koelle, Mark Solomon
MOLECULAR, CELLULAR, AND DEVELOPMENTAL BIOLOGY

Kline Biology Tower, 203.432.3538
www.biology.yale.edu
M.S., Ph.D.

Chair
Ronald Breaker

Director of Graduate Studies
Frank Slack (936 KBT, 203.432.3492, frank.slack@yale.edu)

Professors  Sidney Altman, Ronald Breaker, John Carlson, Lynn Cooley (Genetics),
Craig Crews, Stephen Dellaporta, Xing-Wang Deng, Paul Forscher, Jo Handelsman,
Mark Hochstrasser (Molecular Biophysics & Biochemistry), Vivian Irish, Christine
Jacobs-Wagner, Douglas Kankel, Paula Kavathas (Immunobiology), Haig Keshishian,
Perry Miller (Anesthesiology), Mark Mooseker, Jon Morrow (Pathology), Timothy
Nelson, Thomas Pollard, Anna Pyle, Joel Rosenbaum, Alanna Schepartz (Chemistry),
Frank Slack, Hugh Taylor (Obstetrics/Gynecology), Robert Wyman

Associate Professors  Martín García-Castro, Scott Holley, Akiko Iwasaki (Immunobiol-
yogy), Elke Stein, Weimin Zhong

Assistant Professors  Murat Acar, Sreeganga Chandra (Neurology/CNNR), Nicole
Clay, Thierry Emonet, Valerie Horsley, Farren Isaacs, Kathryn Miller-Jensen (Biomedi-
cal Engineering), Matthew Rodeheffer (Comparative Medicine)

Fields of Study

Research in genetics and molecular biology encompasses studies of non-coding RNAs,
cell cycle regulation, chromosome segregation, genetic recombination, mutation, trans-
posons, and oncogenes. Research topics in cellular and developmental biology include
structure of the cell cytoskeleton, molecular motors, chemical biology, cell surface recep-
tors, protein transport, hormone action, mammalian transcription factors, microRNAs,
and the regulation of cell proliferation and differentiation. Research in neurobiology
focuses on sensory signal transduction, animal color vision, growth cone motility, neu-
ral differentiation, synaptogenesis, and the formation of topographic maps. A Special
Program in Plant Sciences provides research and training in the molecular genetics
of flowering, the developmental biology of leaves, the physiology of hormone action,
pathogen defense systems, sex determination, and the cellular and molecular biology of
photomorphogenesis. Because of the breadth of the department, students are provided
with unique opportunities for interdisciplinary studies.

To enter the Ph.D. program, students apply to the Molecular Cell Biology, Genetics,
and Development (MCGD) track within the interdepartmental graduate program in the
Biological and Biomedical Sciences (BBS).
Special Admissions Requirements

Applicants should have obtained training in the structure, development, and physiology of organisms; the structure, biochemistry, and physiology of cells; genetics; elementary calculus; elementary physics; inorganic and organic chemistry; statistics or advanced mathematics. Lack of some prerequisites can be made up in the first year of graduate study. Students having different science training, such as degrees in chemistry, physics, or engineering, are encouraged to apply. In addition to the GRE General test, a Subject Test is recommended, preferably in Biology, or in Biochemistry, Cell and Molecular Biology.

Special Requirements for the Ph.D. Degree

Each student is expected to take at least three courses, in addition to MCDB 900/901, First-Year Introduction to Research. With the help of a faculty committee, each student will plan a specific program that includes appropriate courses, seminars, laboratory rotations, and independent reading fitted to individual needs and career goals. There is no foreign language requirement. Late in the third term of study, the student meets with a faculty committee to decide on a preliminary topic for dissertation work and to define the research areas in which he or she is expected to demonstrate competence. By the end of the second year, each student prepares a dissertation prospectus outlining the research proposed for the Ph.D. The student is admitted to candidacy for the Ph.D. when (1) the prospectus is accepted by a dissertation committee of faculty members, (2) the committee is satisfied that the student has demonstrated competence in the areas necessary to conduct the proposed work, and (3) the other requirements indicated above are fulfilled. The student should complete the requirements for admission to candidacy no later than the end of the second year of study. Following admission to candidacy, each student is required to meet with his/her thesis advisory committee at least once a year. The remaining requirements include completion of the dissertation research, presentation and defense of the dissertation, and submission of acceptable copies of the dissertation to the Graduate School and to the Kline Science Library. All students are required to teach in two one-term courses during their Ph.D. study, but not during the first year of graduate study. Requirements for M.D./Ph.D. students are the same as for Ph.D. students, except that a single term of teaching is required. During their first year of study, students must successfully complete MCDB 901b, First-Year Introduction to Research—Ethics: Scientific Integrity in Biomedical Research, to fulfill the responsible conduct and ethics in research requirement. This requirement must be met prior to registering for a second year of study.

Honors Requirement

Students must meet the Graduate School’s Honors requirement by the end of the fourth term of full-time study (see Course and Honors Requirements under Policies and Regulations).

Master’s Degree

M.S. (en route to the Ph.D.) The minimum requirements for award of the Master of Science degree are (1) two academic years registered and in residence full-time in the
graduate program; (2) satisfactory completion of the first two years of study and research leading to the Ph.D.; this requirement may be met either (a) by completing a minimum of five courses with an average grade of High Pass and at least one Honors grade, in addition to satisfactory performance in MCDB 900/901, or (b) by (i) successfully completing at least three courses with an average grade of High Pass and at least one Honors grade, (ii) satisfactory performance in MCDB 900/901, and (iii) passing the prospectus examination; (3) recommendation by the department for award of the degree, subject to final review and approval by the appropriate degree committee. No courses that were taken prior to matriculation in the graduate program, or in Yale College, or in summer programs may be applied toward these requirements.

Prospective applicants are encouraged to visit the BBS Web site (info.med.yale.edu/bbs), MCGD Track.

Courses

**MCDB 500bU/MB&B 500bU, Biochemistry**  
Ronald Breaker, Nicole Clay, Donald Engel

An introduction to the biochemistry of animals, plants, and microorganisms, emphasizing the relations of chemical principles and structure to the evolution and regulation of living systems.

**MCDB 517b3/ENAS 517b3/MB&B 517b3/PHYS 517b3, Methods and Logic in Interdisciplinary Research**  
Lynne Regan, Enrique De La Cruz, Eric Dufresne, Thierry Emonet, Paul Forscher, Megan King, Michael Levene, Simon Mochrie, Corey O’Hern, Thomas Pollard, Elizabeth Rhoades, Corey Wilson, and staff

This half-term IGPPEB class is intended to introduce students to integrated approaches to research. Each session is led by faculty with complementary expertise and discusses papers that use different approaches to the same topic (for example, physical and biological or experiment and theory). Counts as 0.5 credit toward graduate course requirements. Required for students in IGPPEB. **MW 5–7**

**MCDB 530aU/IBIO 530a, Biology of the Immune System**  
Akiko Iwasaki, Peter Cresswell, Kevan Herold, Susan Kaech, Ruslan Medzhitov, Eric Meffre, João Pereira, Carla Rothlin, David Schatz, Mark Shlomchik

**MCDB 550aU/C&MP 550aU/ENAS 550aU/PHAR 550a, Physiological Systems**  
Emile Boulpaep, W. Mark Saltzman

The course develops a foundation in human physiology by examining the homeostasis of vital parameters within the body, and the biophysical properties of cells, tissues, and organs. Basic concepts in cell and membrane physiology are synthesized through exploring the function of skeletal, smooth, and cardiac muscle. The physical basis of blood flow, mechanisms of vascular exchange, cardiac performance, and regulation of overall circulatory function are discussed. Respiratory physiology explores the mechanics of
ventilation, gas diffusion, and acid-base balance. Renal physiology examines the formation and composition of urine and the regulation of electrolyte, fluid, and acid-base balance. Organs of the digestive system are discussed from the perspective of substrate metabolism and energy balance. Hormonal regulation is applied to metabolic control and to calcium, water, and electrolyte balance. The biology of nerve cells is addressed with emphasis on synaptic transmission and simple neuronal circuits within the central nervous system. The special senses are considered in the framework of sensory transduction. Weekly discussion sections provide a forum for in-depth exploration of topics. Graduate students evaluate research findings through literature review and weekly meetings with the instructor. MWF 9:25–10:15

[MCDB 551a, Experimental Strategies in Molecular Cell Biology]
[MCDB 555a, Molecular Basis of Development]

MCDB 560b/C&MP 560b/ENAS 570b/PHAR 560b, Cellular and Molecular Physiology: Molecular Machines in Human Disease Emile Boulpaep, Fred Sigworth

The course focuses on understanding the processes that transfer molecules across membranes at the cellular, molecular, biophysical, and physiological levels. Students learn about the different classes of molecular machines that mediate membrane transport, generate electrical currents, or perform mechanical displacement. Emphasis is placed on the relationship between the molecular structures of membrane proteins and their individual functions. The interactions among transport proteins in determining the physiological behaviors of cells and tissues are also stressed. Molecular motors are introduced and their mechanical relationship to cell function is explored. Students read papers from the scientific literature that establish the connections between mutations in genes encoding membrane proteins and a wide variety of human genetic diseases. MWF 9:25–10:15

MCDB 561b/AMTH 665b/CB&B 561b/PHYS 529b, Systems Modeling in Biology Thierry Emonet, Steven Kleinstein, Kathryn Miller-Jensen, Xiao-Jing Wang, Steven Zucker

An introduction to the techniques of integrating knowledge from mathematics, physics, and engineering into the analysis of complex living systems. Use of these techniques to address key questions about the design principles of biological systems. Discussion of experiments and corresponding mathematical models. Reading of research papers from the literature. Students build their own models using MATLAB. TTH 2:30–3:45

MCDB 570b, Biotechnology Xing-Wang Deng, Farren Isaacs, Kenneth Nelson, Joseph Wolenski

The principles and applications of cellular, molecular, and chemical techniques that advance biotechnology. Topics include the most recent tools and strategies used by government agencies, industrial labs, and academic research to adapt biological and chemical compounds as medical treatments, as industrial agents, or for the further study of biological systems. MW 11:35–12:50
MCDB 591b/ENAS 991b/MB&B 591b/PHYS 991b, Integrated Workshop
Lynne Regan, Eric Dufresne, Thierry Emonet, Paul Forscher, Simon Mochrie
This required course for students in IGPPEB involves hands-on laboratory modules with students working in pairs. A biology student is paired with a physics or engineering student; a computation/theory student is paired with an experimental student. The modules are devised so that a range of skills are acquired, and students learn from each other.

MCDB 602a/CBIO 602a/MB&B 602a, Molecular Cell Biology  Sandra Wolin, Michael Caplan, Craig Crews, Pietro De Camilli, Megan King, Thomas Melia, In-Hyun Park, Thomas Pollard, James Rothman, Martin Schwartz
A comprehensive introduction to the molecular and mechanistic aspects of cell biology for graduate students in all programs. Emphasizes fundamental issues of cellular organization, regulation, biogenesis, and function at the molecular level. MW 1:45–3

MCDB 603a/CBIO 603a, Seminar in Molecular Cell Biology  Megan King, Michael Caplan, Craig Crews, Pietro De Camilli, Thomas Melia, Thomas Pollard, James Rothman, Martin Schwartz, Sandra Wolin
A graduate-level seminar course in modern cell biology. The class is devoted to the reading and critical evaluation of classical and current papers. The topics are coordinated with the MCDB 602a lecture schedule. Thus, concurrent enrollment in MCDB 602a is required. TH 9–11

MCDB 625a'/GENE 625a/MB&B 625a', Basic Concepts of Genetic Analysis  Tian Xu and staff
The universal principles of genetic analysis in eukaryotes are discussed in lectures. Students also read a small selection of primary papers illustrating the very best of genetic analysis and dissect them in detail in the discussion sections. While other Yale graduate molecular genetics courses emphasize molecular biology, this course focuses on the concepts and logic underlying modern genetic analysis. MW 11:35–12:50

MCDB 630b/MB&B 630b, Biochemical and Biophysical Approaches in Molecular and Cellular Biology  Anna Pyle, Enrique De La Cruz, Thomas Pollard
This graduate course introduces the theory and application of biochemical and biophysical methods to study the structure and function of biological macromolecules. The course considers the basic physical chemistry required in cellular and molecular biology but does not require a previous course in physical chemistry. One class per week is a lecture introducing a topic. The second class is a discussion of one or two research papers utilizing those methods. TTH 2:30–3:45

MCDB 660a/F&ES 654a, Structure, Function, and Development of Trees and Other Vascular Plants  Graeme Berlyn
Morphogenesis and adaptation of vascular plants considered from seed formation and germination to maturity. Physiological and developmental processes associated with structural changes in response to environment discussed from both a phylogenetic and an adaptive point of view. MW 4–5:20
MCDB 670b, Advanced Seminar in Biochemistry and Genetics  Sidney Altman, Ronald Breaker, Frank Slack
New aspects of the molecular biology of RNA, ribonucleoproteins, and prions. Topics include the localization and function of RNA and ribonucleoproteins; siRNAs and microRNAs; the role of RNA in dosage compensation, chromosome silencing, and gene regulation; novel ribozymes and RNA technology; prions. Discussion; involvement and attendance are required. W 1:30–3:30

MCDB 677b/GENE 777b, Mechanisms of Development  Valerie Reinke, Lynn Cooley, Scott Holley, Timothy Nelson, Zhaoxia Sun, Scott Weatherbee
An advanced course on mechanisms of animal and plant development focusing on the genetic specification of cell organization and identity during embryogenesis and somatic differentiation. The use of evolutionarily conserved signaling pathways to carry out developmental decisions in a range of animals is highlighted. Course work includes student participation in critical analysis of primary literature, and a research proposal term paper. M 9–10:15, F 2:30–3:45

MCDB 720a/NBIO 720a/NSCI 720a, Neurobiology  Haig Keshishian, Paul Forscher
Examination of the excitability of the nerve cell membrane as a starting point for the study of molecular, cellular, and intercellular mechanisms underlying the generation and control of behavior. MWF 11:35–12:25

MCDB 721Lau, Laboratory for Neurobiology  Haig Keshishian, Robert Wyman
Optional laboratory. Introduction to the neurosciences. Projects include the study of neuronal excitability, sensory transduction, CNS function, synaptic physiology, and neuroanatomy. T or W 1:30–5:30

[MCDB 730b/NSCI 502b, Cell Biology of the Neuron]

MCDB 735bu/NSCI 504b, Seminar in Brain Development and Plasticity  Weimin Zhong
Weekly seminars and discussion sessions to explore recent advances in our understanding of brain development and plasticity, including neuronal determination, axon guidance, synaptogenesis, and developmental plasticity. MWF 11:35–12:25

MCDB 743b/GENE 743b/MB&B 743bu, Advanced Eukaryotic Molecular Biology  Mark Hochstrasser, Anthony Koleske, Patrick Sung
Selected topics in transcriptional control, regulation of chromatin structure, mRNA processing, mRNA stability, RNA interference, translation, protein degradation, DNA replication, DNA repair, site-specific DNA recombination, somatic hypermutation. Prerequisite: biochemistry or permission of the instructor. TTH 11:35–12:50

MCDB 752au/CB&B 752a/CPSC 752au/MB&B 752au, Bioinformatics: Practical Application of Simulation and Data Mining  Mark Gerstein
Bioinformatics encompasses the analysis of gene sequences, macromolecular structures, and functional genomics data on a large scale. It represents a major practical application for modern techniques in data mining and simulation. Specific topics to be covered include sequence alignment, large-scale processing, next-generation sequencing data, comparative genomics, phylogenetics, biological database design, geometric analysis
of protein structure, molecular-dynamics simulation, biological networks, normalization of microarray data, mining of functional genomics data sets, and machine learning approaches for data integration. Prerequisites: biochemistry and calculus, or permission of the instructor. **MW 1–2:15**

**MCDB 861b/F&ES 770b, The Human Population Explosion**  Robert Wyman  

**MCDB 900a/CBIO 900a/GENE 900a, First-Year Introduction to Research – Grant Writing and Scientific Communication**  Frank Slack and faculty  
Grant writing, scientific communication, and laboratory rotation talks for Molecular Cell Biology, Genetics, and Development track students. **M 4–5:30**

**MCDB 901b/CBIO 901b/GENE 901b, First-Year Introduction to Research – Ethics: Scientific Integrity in Biomedical Research**  Megan King  
Ethics and laboratory rotation talks for Molecular Cell Biology, Genetics, and Development track students. **TH 4–5:30**

**MCDB 902a and 903b, Advanced Graduate Seminar**  Timothy Nelson, Matthew Rodeheffer  
The course allows students to hone their presentation skills through yearly presentation of their dissertation work. Two students each give thirty-minute presentations in each class session. Students are required to present every year beginning in their third year in the MCDB program. Each MCDB graduate student is expected to attend at least 80 percent of the class sessions. Two faculty members co-direct the course, attend the seminars, and provide feedback to the students.

**MCDB 911a/CBIO 911a/GENE 911a, First Laboratory Rotation**  Carl Hashimoto and faculty  
First laboratory rotation for Molecular Cell Biology, Genetics, and Development track students.

**MCDB 912b/CBIO 912b/GENE 912b, Second Laboratory Rotation**  Valerie Reinke and faculty  
Second laboratory rotation for Molecular Cell Biology, Genetics, and Development track students.

**MCDB 913b/CBIO 913b/GENE 913b, Third Laboratory Rotation**  Frank Slack and faculty  
Third laboratory rotation for Molecular Cell Biology, Genetics, and Development track students.

**MCDB 950a and 951b, Second-Year Research**  
By arrangement with faculty.
The following courses are required for students in the joint B.S./M.S. program with Yale College:

**MCDB 585b, Research in MCDB for B.S./M.S. Candidates**
A two-credit course taken in the third-to-last term (typically the second term of the junior year). At the start of this course, each student forms a committee composed of his or her adviser and two faculty members that meets to discuss the research project. At the end of this course, students complete a detailed prospectus describing their thesis project and the work completed thus far. The committee evaluates an oral and written presentation of this prospectus; the evaluation determines whether the student may continue in the combined program.

**MCDB 595, Intensive Research in MCDB for B.S./M.S. Candidates**
A four-credit, yearlong course (two credits each term) that is similar to MCDB 495 and is taken during the senior year. During this course, students give an oral presentation describing their work. At the end of the course, a student is expected to present his or her work to the department in the form of a poster presentation. In addition, the student is expected to give an oral thesis defense, followed by a comprehensive examination of the thesis conducted by the thesis committee. Upon successful completion of this examination, as well as other requirements, the student is awarded the combined B.S./M.S. degree.
MUSIC
Stoeckel Hall, 203.432.2986
www.yale.edu/yalemus
M.A., M.Phil., Ph.D.

Chair
Daniel Harrison

Director of Graduate Studies
Sarah Weiss (Stoeckel, 203.432.2986, dgs.music@yale.edu)

Professors  Kathryn Alexander (Adjunct), Richard Cohn (on leave [Sp]), Michael Friedmann (Adjunct), Daniel Harrison, Paul Hawkshaw (Adjunct), James Hepokoski, Richard Lalli (Adjunct), Patrick McCreless, Ian Quinn, Ellen Rosand (on leave [F]), Gary Tomlinson (on leave [Sp]), Michael Veal (on leave [Sp]), Craig Wright (on leave [Sp])

Associate Professors  Robert Holzer (Adjunct), Gundula Kreuzer, Markus Rathey (Adjunct), Sarah Weiss

Assistant Professors  Brian Kane, Michael Klingbeil (on leave), Ève Poudrier (on leave [F])

Lecturers  Emily Green, Lynda Paul

Fields of Study
Fields include music history, music theory, and ethnomusicology. (Students interested in degrees in performance, conducting, or composition should apply to the Yale School of Music.)

Special Admissions Requirements
Previous training in music theory or music history is required. Samples of the applicant’s previous work such as extended papers, advanced exercises, and analyses must be submitted. The GRE General Test is required by the Graduate School. Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL).

Special Requirements for the Ph.D. Degree
For students who matriculated before fall 2012  Two years of course work, comprising a minimum of fourteen courses. Eleven are graduate seminars within the Department of Music; one is Readings for Qualifying Examination, normally taken during the final term of course work. With DGS approval, the remaining two may be graduate seminars, or non-introductory undergraduate courses, in other departments or schools within the University.

For students who matriculate in fall 2012 and after  Two years of course work, comprising a minimum of fourteen courses. All students must take the proseminars in ethnomusicology, music history, and music theory. In addition, students in the theory program
must take both of the history of theory and aesthetics seminars; students in the music history program must take one history of theory and aesthetics seminar; and students in the ethnomusicology program must take at least two but no more than five graduate seminars or non-introductory undergraduate courses in other departments or schools within the University. In consultation with the DGS, history and theory students may elect to take up to two graduate seminars or non-introductory courses outside the department. Consult the Music Graduate Student Handbook for further details specific to each program.

For all students A student must receive at least four Honors grades in departmental seminars in order to proceed to the qualifying examination, administered in August following the second year. Reading proficiency in two languages — for historians and theorists, German and usually either French or Italian; for ethnomusicologists, two languages relevant to their research, one of which must be a European language — is demonstrated by examinations (with dictionary access) offered at the beginning of the fall term and the end of the spring term (with German being offered in December as well). Third-year students attend a weekly prospectus/dissertation colloquium. Approval of the dissertation prospectus admits a student to candidacy, provided that all other requirements are met. Only students admitted to candidacy can continue into the fourth year of study. Fourth- and fifth-year students attend the dissertation colloquium in the spring terms.

The faculty considers teaching to be essential to the professional preparation of graduate students in Music. Students in Music participate in the Teaching Fellows Program in their third and fourth years.

Combined Ph.D. Program: Music and Renaissance Studies

The Department of Music offers, in conjunction with the Renaissance Studies Program, a combined Ph.D. in Music and Renaissance Studies. For further details, see Renaissance Studies.

Master’s Degrees

M.Phil. See Degree Requirements under Policies and Regulations.

M.A. (en route to the Ph.D.) Students enrolled in the Ph.D. program qualify for the M.A. degree upon the successful completion of seven courses, at least six of which are seminars given in the department, along with the passing of an examination in one foreign language. Of the six departmental seminars, at least two grades must be Honors; the remaining five grades must average High Pass.

Terminal Master’s Degree Program The department offers admission to a small number of students in a terminal M.A. program. Candidates must pass seven term courses achieving an average of High Pass and at least one Honors, complete a special project, and pass an examination in one foreign language.
Courses

MUSI 506b, World Music Theories, Aesthetics, and Practice  Sarah Weiss
Examination of the musical processes of various mode-based musical systems, selected from Indian raga, Arab maqam, Irish tune family, Javanese pathet, Persian dastgah, Vietnamese Dieu. Topics for discussion include the aesthetics and performance discourses of the various music cultures; debate about and practices of transcription, analytical issues, and problems and processes of representation. Students transcribe examples from every musical system we study.

MUSI 555b/MUS 675b/REL 911b, Music, Ritual, and Religion in Haiti and Its Diaspora  Melvin Butler
This course examines Haiti’s sonic and spiritual landscapes, paying particular attention to the intersections of musical practice, religious experience, and various forms of spiritual and political power. A recurring theme is the role of music in shaping ritual, negotiating cultural identities, and sustaining transnational linkages between Haiti and the United States. Highlighting the migration of sound and ritual practice to and from the Caribbean region, we carefully consider the extent to which music, ritual, and religious practice in Haiti constitute forms of resistance in the face of sociopolitical and natural hardships. T 2:30–4:20

MUSI 697a, Proseminar in Ethnomusicology  Michael Veal
A survey of the major works, topics, issues, and techniques of ethnomusicological research as it has developed over the last century. We consider the position of the field within the broader contexts of society and the academy, and provide a bibliographic foundation for further work in the field. TH 1:30–3:20

MUSI 698b, Proseminar in Music Theory  Ian Quinn
A survey of the major works, topics, questions, and techniques of research in the field of music theory as it has developed in the past half-century. We consider the position of the field within the broader contexts of the academy and provide a bibliographic foundation for further work in the field. TH 9:25–11:15

MUSI 705a, Nineteenth-Century Theory and Aesthetics of Music  Patrick McCreless
A study of the theory and aesthetics of Western art music in the long nineteenth century. The first half of the course begins with Kant’s *Critique of Judgment* and follows the development of aesthetics in the German, French, and Italian traditions to 1848; it then covers the music theory of the same period, proceeding topically from tonality, harmony, and counterpoint to rhythmic theory, form, and the pedagogy of music composition. The second half starts with music theory and traces these same topics from 1848 to 1900, before returning to the aesthetics—Wagner and Nietzsche initially, and then important developments in France, Italy, Russia, and Great Britain. M 9:25–11:15

MUSI 842a, American Music Genres  James Hepokoski
Contrasting genres of music as participants in the broader tensions and discourse networks of American culture in the first several decades of the twentieth century. Topics include Ives; the rise and dissemination of blues in the 1920s and 1930s; Cole Porter (and others) and American musical theater. Individualized work with Yale’s music resources
MUSI 844a/HIST 792a, Musical Consumerism  Emily Green
In the first half of the course we consider interdisciplinary models of consumerism, authorship, and materialism. We then investigate the history of musical print culture (1500–1800), from the first typesetting to engraving, examining the ways in which changing economies affected both the livelihood of the composer and the identity of the consumer. We engage with music as a tangible object; little to no musical literacy is required. T 1:30–3:20

MUSI 846b, Petrarchism and the Italian Madrigal  Ellen Rosand
One influential account of the rise of the Italian madrigal, stated most famously by Alfred Einstein in his classic study *The Italian Madrigal*, suggests that the new genre developed as a consequence of the changing literary sensibilities of sixteenth-century Italy. Central to this change were the canonization and widespread imitation of Petrarch, which, according to this narrative, resulted in the need for a new way of setting vernacular poetry that responded to new ways of reading it. While this explanation has since been thrown into question, the relationship between cinquecento Petrarchism and the first generations of polyphonic madrigalists has remained a vital topic of inquiry, yielding studies of the genre in relation to both the formal characteristics of Petrarchan verse and the broader cultural implications of the *questione della lingua*. The seminar considers the works of composers ranging from Verdelot, Arcadelt, Willaert, and Rore, to Marenzio, Wert, and Monteverdi. W 1–2:50

MUSI 847a/GMAN 680a/DRAM 456a, Wagner in and on Production  Gundula Kreuzer
An exploration of Wagner’s ideas of the *Gesamtkunstwerk* and their role in the theory and history of opera since the mid-nineteenth century. The seminar contextualizes Wagner’s theories of staging and his attempts at creating a lasting, “correct” production within contemporary theatrical practices and discusses consequences for both historical and modern stagings, with a special focus on *Tannhäuser*, the *Ring* cycle, and (possibly) *Parsifal*. We broach such methodological issues as theories and analyses of performance, multimedia, and the operatic work; approaches to and reconstructions of historical stagings; and the increasing mediatization of opera. Ultimately, the seminar seeks to understand opera more broadly in its liminal state between fixity and ephemerality. T 9:25–11:15

MUSI 910b, Contemporary Tonality  Daniel Harrison
This research seminar focuses on music-theoretical issues and problems posed by tonal music written after the “emancipation of the dissonance.” Previous theories and modes of explanation are examined, critiqued, and engaged experimentally in musical analysis involving the works of composers such as Hindemith, Shostakovich, Prokofiev, Martinů, Barber, and Bernstein. Creative adaptation and modification of previous theory are
welcome, as is new construction, in order to accommodate conditions of tonality after
the common-practice era.

**MUSI 920b, Auditory Culture**  Brian Kane
In the past decade there has been an explosion of work in “auditory culture” and “sound
studies.” This seminar functions as a selected introduction to these fields, focusing both
on central texts and theorists, as well as on readings that address music from these per-
spectives. In addition to comparing the findings of auditory cultural work on music with
findings based on the more traditional subdisciplinary methods in music (from music
theory, musicology, and ethnomusicology), we spend time investigating the theoretical
and methodological underpinnings of auditory culture and sound studies, and compar-
ing them with related fields (such as “visual culture” and art history and art theory).
Weekly reading and responses, midterm, and final paper required.

**MUSI 930b, Multiple Temporalities**  Ève Poudrier
Jonathan Kramer’s concept of “multiply-directed time” rests on the premise that musi-
cal time exists as an interaction between listener and composition. This course explores
the theoretical, psychological, and analytical issues raised by multiple temporalities in a
variety of musical practices, with a special focus on the perceptual and cognitive processes
at play.

**MUSI 952a, Metric States and Scripts**  Richard Cohn
Describing and representing musical meters and their relations; interpreting metric
scripts in terms of musical “form.” Nineteenth-century central-European concert music
(Beethoven, Schumann, Brahms, Dvořák); West African drumming; American minimalism,
jazz, and EDM; if sufficient time, musics of south Asia and/or southeastern
Europe.

**MUSI 997b, Readings for Qualifying Examination**  Sarah Weiss

**MUSI 998a, Prospectus Workshop**  Sarah Weiss

**MUSI 999b, Dissertation Colloquium**  Sarah Weiss
NEAR EASTERN LANGUAGES AND CIVILIZATIONS

314 Hall of Graduate Studies, 203.432.2944
www.yale.edu/nelc
M.A., M.Phil., Ph.D.

Chair
John Darnell

Director of Graduate Studies
Eckart Frahm

Professors  John Darnell, Benjamin Foster, Eckart Frahm, Beatrice Gruendler (on leave [F]), Dimitri Gutas (on leave [Sp]), Bentley Layton, Harvey Weiss

Associate Professor  Colleen Manassa

Lecturers  Adel Allouche, Karen Foster, Marsha Hill, David Klotz, Kathryn Slanski, Kevin Wilkinson

Senior Lector II  Ayala Dvoretzky

Senior Lector  Shiri Goren

Lectors  Sarab al-Ani, Muhammad Aziz, Aaron Butts, Etem Erol, Shady Nasser, Dina Roginsky, Farkhondeh Shayesteh

Fields of Study
Fields include Arabic and Islamic studies (also with interdisciplinary minor), Greco-Arabic studies, Assyriology, and Egyptology.

Special Admissions Requirements
Applicants should state their specific field of study and intended specialization. Evidence of a reading knowledge of both French and German is required of all students. Proficiency in one of these languages is normally prerequisite for admission and deficiency in the second language must be rectified before admission to a second year of study. Proficiency will be certified by passing a departmental examination upon registration at Yale. Students admitted with only one of the two required languages or who fail the departmental examination are expected to enroll in an appropriate full-year course given by the French or German department at Yale. Completion of such a course with a grade of A or B will be accepted as fulfilling the proficiency requirement in either language; exceptions, for instance, for native speakers of French or German, may be made by the department upon recommendation of the director of graduate studies (DGS).

Special Requirements for the Ph.D. Degree

COURSE WORK
The department normally requires three full years of course work, four year courses or eight term courses per year being considered a full load. This may be reduced to two years
in cases of exceptional background in Near Eastern languages. Normal progress in course work is considered to be consistent achievement of grades of High Pass or better, and at least four term courses or two year courses with Honors per year.

**SPECIAL LANGUAGE AND COURSE REQUIREMENTS**

Course work should be planned to meet two departmental general standards: core languages for the primary fields of study, and minimum competence in a secondary field. The core languages in each of the major fields of study are as follows: *Arabic and Islamic Studies*: Arabic, Persian (Farsi) or Syriac or Greek; *Assyriology*: Sumerian and Akkadian; *Egyptology*: Egyptian and at least four terms of Demotic or Coptic. Minimum competence in a secondary field of study is defined as follows: at least two terms of a Near Eastern language to be evaluated either by examination or with a course grade of High Pass or better, or at least two terms of nonlanguage courses outside the area of specialization. A minimum grade of High Pass in these courses will be considered successful fulfillment of this requirement.

In Arabic and Islamic Studies, the minimum competence can be extended to an interdisciplinary course of study in a minor field. Minors may include six to eight term courses in the following departments and programs: Anthropology, Comparative Literature, French, German Studies, Greek and Classics, History, History of Science and Medicine, Italian, Judaic Studies, Linguistics, Medieval Studies, Philosophy, Political Science and Sociology, Religious Studies, Spanish and Portuguese, or others, by permission of the DGS. Students in all programs of the department will be expected to declare their choice of a secondary language or area, or a minor field, by their third term of study.

**TRAINING IN TEACHING**

NELC students normally acquire four terms of teaching experience, between their second and fourth years in residence.

**EXAMINATIONS AND THE DISSERTATION**

The comprehensive examination is normally taken at the end of the third year of study or, where advanced standing has been granted, at the end of the second year, but in no case later than September of the academic year following the last year of the student’s required course work. The scope of the examination will be determined by the DGS in consultation with the student and department member(s) in whose area the student’s studies are concentrated. The examination will consist of written and oral portions and will cover no fewer than five and no more than six areas. In the case of the program in Arabic and Islamic Studies with an interdisciplinary minor, the written portion will consist of two language examinations and one subject in the minor field, and the oral of two subjects in Arabic studies and one in the minor field. The written examinations will be set by the individual faculty members responsible for particular areas of study, but the oral portion will be conducted by the full staff of the department. The dissertation proposal is normally submitted one month following the completion of the qualifying examination. Successful completion of the comprehensive examination and submission of an acceptable prospectus will qualify the student for admission to candidacy for the Ph.D. degree. After completion of the dissertation, the candidate may receive a final examination concerned primarily with the defense of the thesis.
Master’s Degrees

M.Phil.  See Degree Requirements under Policies and Regulations. Additionally, students in Near Eastern Languages and Civilizations are eligible to pursue a supplemental M.Phil. degree in Medieval Studies. For further details, see Medieval Studies. In addition to the Graduate School requirements, the dissertation prospectus must have been accepted.

Terminal Master’s Degree Program  Applicants who do not enroll in the Ph.D. program may pursue a Master of Arts degree. Students enrolled in the M.A. program should complete a minimum of twelve term courses with at least two term grades of Honors and an average of High Pass in the remaining courses, and will be required to submit a master’s thesis no later than April 1 of the fourth term of study. No financial aid is available. Students enrolled in the Ph.D. program are also eligible for this degree by meeting the same requirements. Because of the thesis requirement, the Graduate School procedure of automatic petitions for the M.A. degree is not available to students in Near Eastern Languages and Civilizations.

Courses

AKKD 501u, Elementary Akkadian  Eckart Frahm
Introduction to the language of ancient Babylonia, and its cuneiform writing system, with exercises in reading, translation, and composition. MW 9–10:15

AKKD 502au, Intermediate Akkadian  Benjamin Foster
2 HTBA

AKKD 503b, Advanced Akkadian  Benjamin Foster
2 HTBA

[AKKD 505, Historical and Archival Texts from First-Millennium Assyria]

[AKKD 506, Selected Mesopotamian Texts: Bilingual]

ARBC 505au, Arabic Seminar  Dimitri Gutas
Study and interpretation of classical Arabic texts for advanced students. Prerequisite: ARBC 510 or permission of the instructor. T 3:30–5:20

ARBC 505bu, Arabic Seminar  Beatrice Gruendler
Study and interpretation of classical Arabic texts for advanced students. Prerequisite: ARBC 510 or permission of the instructor. T 3:30–5:20

[ARBC 507bu, Modern Arabic Seminar]

ARBC 510u, Intermediate Classical Arabic  Hadi Jorati
Introduction to classical Arabic, with emphasis on analytical reading skills, grammar, and prose composition. Readings from the Qur’an, Islamic theology, and literature and history of the Middle East, as well as Jewish and Christian religious texts in Arabic. MW 11:35–12:50
ARBC 511u, Advanced Classical Arabic  Shady Nasser
An advanced course on Arabic grammar and morphology through a close reading of the grammar manual of Ibn Malik (*The Alfiyyah*), in addition to advanced training in sentence structure through *i’rab*. MW 1–2:15

ARBC 520a, Egyptian Arabic  Muhammad Aziz
TTH 1–2:15

ARBC 521b, Iraqi and Gulf Arabic  Sarab al-Ani
MW 1–2:15

[ARBC 522b, Business Arabic]

ARBC 523a, Arabic Prose Narrative  Muhammad Aziz
MW 1–2:15

[ARBC 832a, Introduction to Classical Arabic Literary Criticism]

EGYP 501u, Introduction to Classical Hieroglyphic Egyptian
An introduction to the language of ancient pharaonic Egypt (Middle Egyptian) and its hieroglyphic writing system, with short historical, literary, and religious texts. Grammatical analysis with exercises in reading, translation, and composition. TTH 9–10:15

EGYP 502a, Historical Texts of Egypt and Nubia  Colleen Manassa
TH 2:30–4:20

[EGYP 510u, Biblical Coptic: Elementary Course]

EGYP 511a/RLST 602a, Introduction to Coptic Literature  Bentley Layton
Close analysis of selected Coptic texts in various genres. Prerequisite: EGYP 510. MW 9–10:15

[EGYP 512a, Egyptian Monastic Literature in Coptic]

[EGYP 513a, Research Seminar on the Monastic Federation of Shenoute]

[EGYP 514b, Introduction to Gnostic Texts in Coptic]

EGYP 516b/RLST 662b, Coptic Prose Texts: Apa Shenoute  Bentley Layton
Artistic prose in Coptic of the classical period, primarily from works of Apa Shenoute. Prerequisite: EGYP 510. MW 9–10:15

[EGYP 531a, Intermediate Egyptian I: Texts Relating to Egypt and Nubia]

[EGYP 533a, Intermediate Egyptian I: Literary Texts]

EGYP 535b, Intermediate Egyptian II: Late Egyptian Stories  Colleen Manassa
TH 2:30–4:20

[EGYP 539b, Intermediate Egyptian: Cosmogonic Texts]

[EGYP 540a, Ancient Egyptian Epistolography]

[EGYP 550a, Introduction to Demotic]
[EGYP 568b, Texts from the Amarna Period]

[EGYP 577au, Egyptian Rock Inscriptions]

[EGYP 578b, The Egyptian Netherworld Books]

EGYP 580b, Temple Inscriptions: Medinet Habu  John Darnell
T 2:30–4:20

EGYP 590a, Coffin Texts  John Darnell
T 2:30–4:20

[EGYP 591au, Ancient Egyptian Love Poetry]

HEBR 501u, Elementary Modern Hebrew  Ayala Dvoretzky [F], Dina Roginsky [Sp]
Introduction to the language of contemporary Israel, both spoken and written. Fundamentals of grammar; extensive practice in speaking, reading, and writing under the guidance of a native speaker. No previous knowledge required.
MTWTHF 9:25–10:15
MTWTHF 10:30–11:20

HEBR 502au and bu, Intermediate Modern Hebrew  Shiri Goren [F], Ayala Dvoretzky [Sp]
Review and continuation of grammatical study leading to a deeper comprehension of style and usage. Focus on selected readings, writing, comprehension, and speaking skills. Prerequisite: HEBR 501 or equivalent. Fall: TH 11:35–12:50 (01), TH 1–2:15 (02); Spring: TTH 1–2:15

[HEBR 503au, Advanced Modern Hebrew]

HEBR 504bu, Introduction to Modern Israeli Literature  Ayala Dvoretzky
Reading, discussion, and analysis of short stories, poetry, and magazine articles representative of contemporary Israeli culture, with attention to different styles. Conducted in Hebrew. Prerequisite: HEBR 502 or equivalent. MW 11:35–12:50

[HEBR 505a, Contemporary Israeli Society in Film]

HEBR 506au, Dynamics of Israeli Culture  Shiri Goren
The course explores contemporary controversies in Israeli society as revealed in prose, films, poetry, newspaper articles, new media, advertisements, and television shows. Discussions include migration and the construction of the Sabra character; ethnicity and race; the emergence of the Mizrahi voice; women in Israeli society; private and collective memory; minority discourse: Druze, Russian Jews; and Israeli masculinity and queer culture. Conducted in Hebrew. Prerequisite: HEBR 502 or permission of the instructor. TTH 2:30–3:45

HEBR 509au, Reading Academic Texts in Modern Hebrew  Dina Roginsky
The course addresses the linguistic needs of English-speaking students who would like to be able to read with ease and accuracy contemporary Hebrew-language scholarship in the fields of Judaic studies, history, political science, sociology, Near Eastern studies, and other related fields. Particularly, this course confronts reading-comprehension problems
through straightforward exposition of the grammar supported by examples from scholarly texts. Prerequisite: HEBR 502 or permission of the instructor. MW 11:35–12:50

HEBR 510b\textsuperscript{c}, Conversational Hebrew: Israeli Media  
Shiri Goren
An advanced Hebrew course for students interested in practicing and enhancing conversational skills. The course aims to improve the four language skills while stressing listening comprehension and various forms of discussions including practical situations, online interactions, and content analysis. Prerequisite: HEBR 502 or permission of the instructor. TTH 11:35–12:50

HEBR 516b\textsuperscript{c}, Israeli Popular Music  
Dina Roginsky
Changes in the development of popular music in Israel explored as representations of changing Israeli society and culture. The interaction of music and cultural identity; the role of modern popular music in representing, shaping, challenging, and criticizing social conventions; songs of commemoration and heroism; popular representation of the Holocaust; Mizrahi and Arab music; feminism, sexuality, and gender; class and musical consumption; criticism, protest, and globalization. Conducted in Hebrew. Prerequisite: HEBR 502 or equivalent. TTH 1–2:15

[HEBR 517a\textsuperscript{u}, Sociological Aspects of Hebrew]

MESO 507a, History of Mesopotamia: 2nd Millennium  
Benjamin Foster

MESO 510b, Transitions in Mesopotamian History  
Benjamin Foster

MESO 512a, Women in Assyria and Babylonia  
Eckart Frahm
Study and interpretation of historical inscriptions, letters, legal treatises, and religious and literary texts related to the life of Assyrian and Babylonian women. Prerequisite: knowledge of Akkadian.

MESO 531, Beginning Sumerian

MESO 532a, Intermediate Sumerian  
Benjamin Foster

MESO 533b, Advanced Sumerian  
Benjamin Foster

[MESO 543a, Neo-Assyrian History]

MESO 544b, Mesopotamian Scholarly Texts  
Eckart Frahm
Study and interpretation of omen treatises, medical texts, and commentaries from Babylonia and Assyria. Prerequisite: knowledge of Akkadian.

MESO 559a or b, Directed Readings: Assyriology

[MESO 560a, Historical Horizons in Assyriology]

[MESO 572a, Prophecy in Mesopotamia]

[NELC 502\textsuperscript{c}, Worlds of Homer]

[NELC 503\textsuperscript{c}, Art of Ancient Palaces]

NELC 504b\textsuperscript{c}, Art of the Ancient Near East and Aegean  
Karen Foster

</table>
of politico-economic vulnerabilities, resiliencies, and adaptations in the face of abrupt climate change, anthropogenic environmental degradation, resource depletion, “barbarian” incursions, or class conflict. TH 1:30–3:20

NELC 589a/ANTH 763a/ARCG 763a, Archaeologies of Empire  Harvey Weiss
Comparative study of origins, structures, efficiencies, and limitations of imperialism, ancient and modern, in the Old and New World, from Akkad to “Indochine,” and from Wari to Aztec. The contrast between ancient and modern imperialisms examined from the perspectives of nineteenth- and twentieth-century archaeology and political economy. TH 2:30–4:20

[NELC 590b, Identity in Modern Turkey]

NELC 592a, State and Society in Israel  Harvey Weiss
This course focuses on the interplay between state and society in Israel and exposes students to the current Israeli discourse on controversial issues such as civil rights in a Jewish-democratic state, Jewish-Arab relations, right and left politics, as well as issues of orthodoxy, military service, globalization, and multiculturalism in Israel. The sociopolitical changes that have taken place in Israel in the past sixty-four years since the establishment of the state have led to the reshaping of Israeli Zionist ideology. TTH 11:35–12:50

NELC 620a/ARCG 623a/WGSS 622a, Lives in Ancient Egypt  Colleen Manassa
Introduction to the social history of ancient Egypt, from 3100 to 30 B.C.E., with particular focus on the lives of individuals attested in the textual and archaeological record, from pharaohs and queens to artists, soldiers, and farmers. Readings of primary sources in translation, and course projects integrating ancient objects in Yale collections. MW 10:30–11:20

[NELC 735a, Gnostic Religion and Literature]

NELC 829b, History of the Arabic Language  Beatrice Gruendler
The course covers the development of the Arabic language from the earliest epigraphic evidence through the formation of the Classical 'Arabiyya and further, to Middle Arabic and Neo-Arabic. Readings of textual specimens and survey of secondary literature. W 2:30–4:20

NELC 830a/HIST 829a, From Medina to Constantinople: The Middle East from 600 to 1517  Adel Allouche
The seminar discusses the religious and political events that shaped the Middle East from the rise of Islam to the Ottoman conquest of Egypt. It encompasses Arab lands, Iran, and Turkey. TH 1:30–3:20

[NELC 831b, Greco-Arabic Seminar]

[NELC 844, Arabic Textual Criticism and Editorial Technique]

NELC 849a or b, Directed Readings: Arabic  Beatrice Gruendler [Sp],
Dimitri Gutas [F]

NELC 850a, Introduction to Arabic and Islamic Studies  Dimitri Gutas
Comprehensive survey of the various subjects treated in Arabic and Islamic studies,
with representative readings from each. Detailed investigation into the methods and
techniques of scholarship in the field, with emphasis on acquiring familiarity with the
bibliographical and other research tools. W 2:30–4:20

PERS 501u, Elementary Persian (Farsi)
An introduction to modern Persian, with emphasis on grammar and syntax as well as
writing and reading simple prose. Both literary and classical Persian are taught in the
second term. MTWTHF 9:25–10:15

PERS 502u, Intermediate Persian (Farsi)
Detailed analysis of Persian usage and syntax through the study of modern and classical
texts in prose and poetry. Readings from newspapers, textbooks, historical writings,
travelogues, classical and modern literature. MTWTHF 10:30–11:20

PERS 503b, Persian Seminar: Identity and Change
PERS 504b, Thematic Survey of Modern Persian Literature

PERS 589a or b, Directed Readings: Persian

SMTC 501a, Introduction to Comparative Semitics

SMTC 502a, Linguistic Topics in Akkadian

SMTC 520, Introduction to Ugaritic

SMTC 521, Elementary Syriac  Aaron Butts
A two-term introduction to the Syriac language. The first term is devoted to acquiring
the essentials of Syriac grammar and vocabulary. The second term focuses on the read-
ing and analysis of Syriac texts from various genres and time periods. TTH 2:30–3:45

SMTC 522, Intermediate Syriac

SMTC 523a, Intermediate Syriac: Prose Texts

SMTC 524b, Intermediate Syriac: Poetic Texts

SMTC 531, Introduction to Aramaic  Aaron Butts
A two-term introduction to the Aramaic language. The first term is devoted to acquiring
the essentials of Aramaic grammar and vocabulary, followed by the reading and analysis
of texts in Old Aramaic (ca. 900–ca. 600 B.C.E.) and Imperial Aramaic (ca. 600–ca. 200
B.C.E.). The second term focuses on the reading and analysis of texts in Middle Aramaic
(ca. 200 B.C.E.–ca. 200 C.E.) and Late Aramaic (ca. 200–ca. 1200 C.E.). Prerequisite:
knowledge of a Semitic language. TTH 11:35–12:50

SMTC 542b, Introduction to Classical Ethiopic
SMTC 543a, Readings in Classical Ethiopic  Aaron Butts
Reading and analysis of texts in Classical Ethiopic. Prerequisite: SMTC 542b or knowledge of Classical Ethiopic.

TKSH 501u, Elementary Turkish  Etem Erol
Development of a basic knowledge of modern Turkish, with emphasis on grammatical analysis, vocabulary acquisition, and the training of reading and writing skills. MTWTHF 10:30–11:20

TKSH 502u, Intermediate Turkish  Etem Erol
Continued study of modern Turkish, with emphasis on advanced syntax, vocabulary acquisition, and the beginnings of free oral and written expression. Prerequisite: TKSH 501 or permission of the instructor. TTHF 11:35–12:50

[TKSH 505au, Structure of Modern Turkish]

TKSH 550au, Advanced Turkish  Etem Erol
Emphasis on advanced oral and written expression. Prerequisite: TKSH 502 or permission of the instructor.

TKSH 551bu, Advanced Turkish  Etem Erol
Emphasis on Turkish media and selected literary works. Prerequisite: permission of the instructor.

TKSH 560a, Beginning Ottoman Turkish  Etem Erol
Emphasis on printed texts and review of relevant Arabic and Persian grammar. Prerequisite: knowledge of the Arabic alphabet and four terms of Turkish.

TKSH 570a or b, Directed Readings and Research  Etem Erol
NEUROBIOLOGY

Director of Medical Studies
Michael Schwartz (ESH 302, 203.787.7100, michael.schwartz@yale.edu)

Professors

Associate Professors
Meenakshi Alreja, Charles Bruce, Ralph DiLeone, Jaime Grutzendler, Elizabeth Jonas, Mark Laubach, Chiang-shan Ray Li, Angeliki Louvi, James Mazer, Dhasakumar Navaratnam, Vincent Pieribone, Michael Schwartz

Assistant Professors
Jessica Cardin, Bo Chen, Michael Higley, In-Jun Kim, Ifat Levy, Justus Verhagen

Fields of Study
Fields include the development, neuronal organization, and function of the mammalian central nervous system. The range of methods includes molecular-genetic and cellular neurobiology, neuroanatomy, biochemistry, neuropharmacology, computational modeling, neurophysiology, neuroimaging and behavior. An integrative, multidisciplinary approach is encouraged.

Special Requirements for the Ph.D. Degree

COURSE REQUIREMENTS

Six courses are required, and students must obtain a grade of Honors in two of these courses and maintain an HP average. Required courses are Principles of Neuroscience (NBIO 501a), Neurobiology (NBIO 720a), and Structural and Functional Organization of the Human Nervous System (NBIO 500b). Three more elective graduate-level courses are required. Additional degree requirements are successful completion of both terms of Lab Rotation for First-Year Students (NBIO 512a/b) and both terms of Second-Year Thesis Research (NBIO 513a/b). This will ensure that degree candidates obtain a solid
background in systems, cellular, and molecular approaches to neuroscience. In addition to all other requirements, students must successfully complete NBIO 580b, Bioethics in Neuroscience, prior to the end of their first year of study. This requirement must be met prior to registering for a second year of study.

LABORATORY ROTATIONS

Two rotations are required; they are typically completed in the first year. Rotations outside the Neuroscience track will count toward this requirement upon approval of the Neuroscience track directors.

TEACHING REQUIREMENTS

An important aspect of graduate training in Neurobiology is the acquisition of teaching skills through participation in courses appropriate for the student’s scientific interests. These opportunities can be drawn from a diverse menu of lecture, laboratory, and seminar courses at the undergraduate, graduate, and medical school levels. Ph.D. students are required to serve as Teaching Fellows (TF) for two terms. First-year students may not serve as a TF without written permission from the Neuroscience track directors. It is recommended that one term of teaching should be completed by the end of the third year, and both requirements be completed by the end of the fourth year.

Specifically, it is recommended that the first requirement be met by teaching in either Principles of Neuroscience (NBIO 501a), Neurobiology (NBIO 720a), Brain and Thought (CGSC 201a), or Structural and Functional Organization of the Human Nervous System (NBIO 500b). The second course may be chosen from the list of neuroscience-related courses in the Graduate School of Arts and Sciences bulletin, or from the INP Bioethics course. A course not directly related to neuroscience must have the approval of the director of graduate studies (DGS).

QUALIFYING EXAM

Ph.D. students must complete their qualifying exam before the end of their second year as a graduate student. The student must choose four faculty members to read with in consultation with the DGS and the student’s Ph.D. mentor; it is strongly encouraged that these faculty represent interests spanning from molecular to systems/cognitive neuroscience and not include the Ph.D. mentor. The student and faculty should devise a reading list of about fifteen papers on a defined topic. They should meet regularly (at least three or four meetings) to discuss the papers in depth. For the written exam, the student is given two questions from each faculty member. The student has three hours to write an answer to one of the two questions for each faculty member, i.e., a twelve-hour written exam spread over two days. The exam is performed on a laptop observing the honor system and is proctored by the DGS. The student may refer to the papers and his/her notes but not to the Internet. The answers are distributed to the faculty, and several days later an oral exam is held to further evaluate the student’s knowledge. A fifth faculty member (a reader) chosen by the student may also be present at the oral exam, along with the DGS. If the student fails the qualifying exam, he/she may have one more attempt at passage; this must be completed within one term of taking the original exam.
PROSPECTUS

Ph.D. students must complete and submit their dissertation prospectus (also called thesis proposal) by the end of the third year as a graduate student. The guidelines are as follows:

1. The student should discuss with his/her mentor an appropriate topic and research plan for the thesis proposal, as well as discuss likely names of faculty to serve on the thesis committee.

2. The student should write a proposal of approximately seven (7) pages (similar to an NRSA application). This should include (a) the hypothesis to be addressed (specific aims), (b) a few pages of background and significance, (c) preliminary data to demonstrate feasibility, and (d) a research plan including strategies in case proposed experiments fail. It is highly recommended that the thesis include a core of conservative experiments, i.e., very feasible, well-controlled studies. High-risk/high-payoff studies should only be included as “halo” research; i.e., if these fail, the student should still be able to graduate.

3. The mentor should approve the thesis proposal.

4. The student should distribute the proposal to his/her thesis committee members at least several days before the thesis committee meeting, and optimally discuss the proposal with each member individually prior to the meeting to ensure that there are no major problems. The thesis committee is required to have four members: the mentor and three other faculty, with at least one of those three faculty with a primary appointment outside the Neurobiology department. Faculty outside of Yale can be included if they can attend on a regular basis. Non-Yale faculty are often best included as a fifth member, so that a meeting can officially be held in their absence if needed. One member of the thesis committee (not the mentor) is appointed chair.

5. The student meets with the thesis committee to approve the thesis proposal. It is at this time that the proposal is often modified, for instance by the suggestion of an additional control experiment. Goals should be realistic and in the interest of the student completing his/her degree in a timely manner. The finalized approved protocol is then provided to the Neurobiology business office, where the registrar will complete the paperwork for advancement to candidacy and send it to the Graduate School. As this must be completed before September 1, students should convene the thesis committee meetings prior to August 1.

The student is required to meet with his/her thesis committee on at least a yearly basis to update progress and problems. A one-page summary of this meeting, written by the mentor and signed by the student, the chair of the thesis committee, and the DGS, should also be given to the business office to reside in the student’s file.

ADMISSION TO CANDIDACY

Ph.D. students are required to have been admitted to candidacy by the end of the third year as a graduate student. Generally, the submission of the thesis prospectus is the final requirement for admission to candidacy, and paperwork for both is submitted to the Graduate School at the same time.
OTHER REQUIREMENTS

All graduate students who are admitted to candidacy are required to have an annual thesis committee meeting; more frequent meetings are encouraged. All graduate students are required to give a student research presentation annually (a brief INP rotation talk early in the graduate career, followed by a longer Neurobiology Student Research Talk as the student’s research advances). All students are expected to attend rotation/student research talks.

THESIS DEFENSE

There are several parts to the thesis defense: (1) The student gives the full thesis document to the thesis committee with sufficient time (approximately two weeks) for them to read this large document before the thesis defense. (2) The student defends the thesis in front of the thesis committee. It is expected that small changes to the thesis will be made before submitting the final document to the Graduate School. (3) The student gives the public defense approximately one month following the private (thesis committee) defense, following approval of the DGS. The public defense is a one-hour seminar summarizing the research and open to the community.

Special Requirements for the M.D./Ph.D.

COURSE REQUIREMENTS

Five courses are required; students must obtain a grade of Honors in two of these courses, and this must be achieved in the first two years of the combined program. Required courses are Principles of Neuroscience (NBIO 501a) and Structural and Functional Organization of the Human Nervous System (NBIO 500b). Three more elective graduate-level courses are required. The following courses taken during the first two years of medical school will count toward the student’s elective requirements in the Neurobiology program, provided the student has registered to receive a graduate grade in the course: CBIO 502, CBIO 601, GENE 500b, MB&$B 800a, Physiology 500. In the case of students accepted into the M.D./Ph.D. program during their first year of medical school, a letter from the faculty member in charge of the first-year course indicating the grade achieved in the course is required, and an official transcript from the School of Medicine must be submitted to the Graduate School.

LABORATORY ROTATIONS

Two rotations are required; rotations in another department/program will count toward this requirement upon approval of the Neuroscience track directors.

TEACHING REQUIREMENTS

M.D./Ph.D. students are required to serve as Teaching Fellows (TF) for one term; two terms are preferred. Previous teaching (as TF) in the histology labs or courses in MCDB does count toward this requirement as long as the student has taught while enrolled at Yale as an M.D./Ph.D. student.
QUALIFYING EXAM
M.D./Ph.D. students must complete their qualifying exam before the end of their first year as an affiliated graduate student. Thus, if the student affiliates at the customary 2½-year point (beginning of the spring term of the third year of matriculation at Yale), he/she must complete the examination before registering for the spring term of the fourth year at Yale.

PROSPECTUS
M.D./Ph.D. students must complete and submit their dissertation prospectus (i.e., thesis proposal) by the end of the second year as an affiliated graduate student. Thus, if the student affiliates at the customary 2½-year point, he/she must submit the approved prospectus before registering for the spring term of the fifth year (at the beginning of year three as an affiliated graduate student).

Please note that every dissertation prospectus must be approved by the thesis committee.

ADMISSION TO CANDIDACY
M.D./Ph.D. students are required to have been admitted to candidacy by the end of the second year as an affiliated graduate student. Generally, the submission of the dissertation prospectus is the final requirement for admission to candidacy, and paperwork for both is submitted to the Graduate School at the same time.

OTHER REQUIREMENTS
All M.D./Ph.D. students who are admitted to candidacy are required to have an annual thesis committee meeting; more frequent meetings are encouraged. All M.D./Ph.D. students are required to give a student research presentation annually (a brief INP rotation talk early in the graduate career, followed by a longer Neurobiology Student Research Talk as the student’s research advances). All students are expected to attend rotation/student research talks.

Affiliation requirement  A copy of the student’s application to the M.D./Ph.D. program, a copy of the student’s current transcript, and notation of rotations completed must be submitted to the Neurobiology program business office. The DGS must have this information in hand before the official M.D./Ph.D. student affiliation form can be approved. The Neurobiology program business office requests that copies of transcripts for all affiliated M.D./Ph.D. students be forwarded when they are received by the M.D./Ph.D. office.

TIMELINE
Year one  M.D./Ph.D. students complete courses in the School of Medicine and register for selected courses in the Graduate School. Most who identify Neuroscience as their probable Ph.D. field will take the required course, Principles of Neuroscience, in the fall term. This is the recommended timing. M.D./Ph.D. students should take NBIO 500b in the spring for Graduate School credit/grade. Other electives as listed above may be taken for Graduate School credit to fulfill our requirements, and indeed, it is recommended that this be done. Two laboratory rotations should be completed in the summer. The
DGSs of both the Neurobiology program and the INP may be of assistance in identifying appropriate laboratories based on the student’s interests.

**Year two** Courses in the School of Medicine are typically taken. Part 1 of the Boards is taken.

**Year three** By January of the third year, a thesis lab should be identified and all paperwork should be completed (affiliation form completed and copy of student’s academic record including application transferred to the Neurobiology business office). Student’s stipend is supplemented by PI/PI’s primary department at time of affiliation.

**Year four** The Qualifying Examination must be completed within one year of laboratory/program affiliation. Registration for the following term will be denied if this requirement is not fulfilled in a timely manner. Typically this will be fulfilled before the spring term of the fourth year.

**Year five** The dissertation prospectus must be approved and submitted to the Graduate School by the end of the second year of laboratory/PI affiliation. Typically, this is by the end of the fall term of year five. Registration for the following term will be denied if this requirement is not fulfilled in a timely manner. The Thesis Committee approves the prospectus, and required paperwork is then delivered to the Neurobiology program business office by the student. The Neurobiology program business office will then complete the Admission to Candidacy paperwork and submit it to the Graduate School. The prospectus must be submitted to the Graduate School at least six months before the dissertation is submitted.

**Year six** Typically an M.D./Ph.D. student will complete and defend his/her dissertation at the end of the fall term or the beginning of the spring term. We require that M.D./Ph.D. students defend their dissertations before returning to fulfill the remaining School of Medicine requirements.

**Year seven** Student completes all remaining requirements and graduates in May.

While this is considered a guideline for a typical M.D./Ph.D. student, we recognize that not every student will follow this path. Any digression from this timeline must be discussed and approved by the DGS, with appropriate notes to the student’s file and copies to the M.D./Ph.D. office. Continued participation in the Neurobiology program is subject to the satisfactory completion of requirements in a timely fashion. If any question arises about the satisfactory progress of a student, and the qualifying examination committee or the thesis committee cannot agree on an appropriate resolution, then the Neurobiology faculty will meet to determine a course of action.

**Master’s Degrees**

**M.Phil.** See Degree Requirements under Policies and Regulations. Awarded only to students who are continuing for the Ph.D. degree. Students are not admitted for this degree.

**M.S.** Awarded only to students who are not continuing for the Ph.D. Students must have successfully completed our equivalent of 30 credit hours in the doctoral program. This
includes a passing grade in the four required courses plus two elective courses, a minimum of two Honors grades, and successful completion of both terms of Lab Rotation for First-Year Students (NBIO 512a/b) and both terms of Second-Year Thesis Research (NBIO 513a/b). Students are not admitted for this degree.

Program materials are available upon request to the Director of Graduate Studies, Department of Neurobiology, Yale University, PO Box 208001, New Haven CT 06520-8001.

Courses

**NBIO 500b/NSCI 510b, Structural and Functional Organization of the Human Nervous System**  Michael Schwartz, Pasko Rakic, and staff
An integrative overview of the structure and function of the human brain as it pertains to major neurological and psychiatric disorders. Neuroanatomy, neurophysiology, and clinical correlations are interrelated to provide essential background in the neurosciences. Lectures in neurocytology and neuroanatomy survey neuronal organization in the human brain, with emphasis on long fiber tracts related to clinical neurology. Weekly three-hour laboratory sessions in close collaboration with faculty members. Lectures in neurophysiology cover various aspects of neural function at the cellular level, with a strong emphasis on the mammalian nervous system. Clinical correlations consist of five sessions given by one or two faculty members representing both basic and clinical sciences. These sessions relate neurological symptoms to cellular processes in various diseases of the brain. Variable class schedule; contact course instructors. This course is offered to graduate and M.D./Ph.D. students only and cannot be audited.

**NBIO 501a/NSCI 501a, Principles of Neuroscience**  Ralph DiLeone, Angeliki Louvi
General neuroscience seminar: lectures, readings, and discussion of selected topics in neuroscience. Emphasis is on how approaches at the molecular, cellular, physiological, and organismal levels can lead to understanding of neuronal and brain function.
WF 3:15–4:45

[NBIO 507b/NSCI 507b, Cellular and Molecular Mechanisms of Neurological Disease  Offered every other year]

[NBIO 509b/NSCI 539b, Synaptic Organization of the Nervous System  Offered every other year]

**NBIO 510a, Introduction to Methods in Cellular and Molecular Neurobiology**
Independent study providing firsthand insight into various techniques and approaches used in neuroscience. Light microscopic techniques include various metallic impregnation methods, autoradiography, anterograde and retrograde axonal transport methods, hybridoma and recombinant DNA technology, deoxyglucose metabolic method, fluorescent and immunocytochemical methods. Electron microscopy encompasses transmission, electronmicroscopic autoradiography, and immuno-peroxidase methodology. Choice of techniques and hours to be arranged with individual faculty or staff members of the Department of Neurobiology.
NBIO 511, Introduction to Techniques Used in Electrophysiological Analysis at the Cellular Level
Independent study providing practical training in in vivo and in vitro nervous system preparations, extracellular and intracellular recordings, sensory stimulation, dye injections, and selected neuropharmacological procedures. Choice of techniques and hours to be arranged with individual faculty of the Department of Neurobiology.

NBIO 512a/b/NSCI 512a/b, Lab Rotation for First-Year Students  Charles Greer
Required for all first-year Neuroscience graduate students. Rotation period is one term. Both terms required.

NBIO 513a/b/NSCI 513a/b, Second-Year Thesis Research
Required for all second-year Neuroscience graduate students. Both terms required.

[NBIO 524a/NSCI 514a, Neurodevelopment and Neuropsychiatric Disorders]

[NBIO 532b/NSCI 532b, Neurobiology of Cortical Systems  Offered every other year]

NBIO 535b/NSCI 535b, History of Modern Neuroscience  Gordon Shepherd
In this course we focus on the original breakthroughs that led to major lines of research being pursued today. Subjects include classic papers in the discoveries of DNA, action potential, synaptic transmission, growth factors, second messengers, neurotransmitters, Hebb synapse, dendrites, hippocampus and memory, cortical columns, REM sleep, neuroendocrine system, instrumental conditioning, reticular activating system, psychoactive drugs, computer modeling, and artificial intelligence.

[NBIO 570a, Cellular and Network Dynamics of Sensory and Motor Functions]

NBIO 580b/NSCI 580b, Bioethics in Neuroscience  Charles Greer
This course is an introduction to ethics and ethical decision making in the neurosciences. Format for the course is an informal discussion. Each week we are joined by members of the Yale faculty and community who can share their experiences and expertise as it relates to the topic of the week. This course is mandatory for first-year graduate students in the Interdepartmental Neuroscience Program (INP). Grading is Satisfactory/Unsatisfactory and is based on attendance/participation, weekly reaction papers, and a final term paper. The successful (Satisfactory) completion of this course is worth one full graduate course credit. TH 4–5:15

[NBIO 582b/NSCI 582b/PHYS 582b/PSYC 582b, Introduction to Computational Neuroscience]

NBIO 590a, Sensory Neuroethology: Bats and Owls, Electric Fish, and Beyond  James Mazer
In this course we review the neurophysiology of sensory processing with particular attention to animal behavior (ethology) and computation. We begin with the classic neuroethology literature and end with current work on neocortical circuits underlying sensory processing in higher vertebrates. This seminar course meets once per week to read and discuss (mostly) primary research papers selected and presented by the students.
[NBIO 595a/NSCI 595a, Seminar in Visuomotor Neurophysiology]

[NBIO 596a/NSCI 596a, Seminar in Neurophysiology of Decision Making]

[NBIO 597b/NSCI 597b, Neuroeconomics  Offered every other year]

**NBIO 602, Topics in Cortical Development and Evolution**  Pasko Rakic
This advanced tutorial course involves extensive reading, discussion, and pilot experiments on the topic.

**NBIO 610b/C&MP 620b, Fundamentals in Neurophysiology**  Vincent Pieribone,  Fred Sigworth
The course is designed for students who wish to gain a theoretical and practical knowledge of modern neurophysiology. Graduate students specializing in neurophysiology and non-neurophysiology are encouraged to attend, as the course begins at a very basic level and progresses to more complicated topics. Topics include properties of ion channels, firing properties of neurons, synaptic transmission, and neurophysiology methodology.

**NBIO 720a/MCDB 720a/NSCI 720a, Neurobiology**  Haig Keshishian,  Paul Forscher
Examination of the excitability of the nerve cell membrane as a starting point for the study of molecular, cellular, and intracellular mechanisms underlying the generation and control of behavior. MWF 11:35–12:25
NEUROSCIENCE

Fahmeed Hyder (Diagnostic Radiology; Biomedical Engineering), Marcia Johnson (Psychology), Leonard Kaczmarek (Pharmacology; Cellular & Molecular Physiology), Haig Keshishian (Molecular, Cellular & Developmental Biology), Kenneth Kidd (Genetics; Ecology & Evolutionary Biology; Psychiatry), Jeffery Kocsis (Neurology; Neurobiology), Anthony Koleske (Molecular Biophysics & Biochemistry; Neurobiology), Robert LaMotte (Anesthesiology; Neurobiology), Daeyeol Lee (Neurobiology), Paul Lombroso (Child Study Center; Neurobiology), Laura Manuelidis (Neuropathology), Gregory McCarthy (Psychology), David McCormick (Neurobiology), Mark Mooseker (Molecular, Cellular & Developmental Biology; Cell Biology; Pathology), Angus Nairn (Psychiatry; Pharmacology), Pasko Rakic (Neurobiology; Neurology), Robert Roth, Jr. (Psychiatry; Pharmacology), Gary Rudnick (Pharmacology), W. Mark Saltzman (Biomedical Engineering; Cellular & Molecular Physiology; Chemical & Environmental Engineering), Joseph Santos-Sacchi (Surgery; Cellular & Molecular Physiology; Neurobiology), Nenad Sestan (Neurobiology), Gordon Shepherd (Neurobiology), Fred Sigworth (Cellular & Molecular Physiology; Biomedical Engineering), Matthew State (Child Study Center; Genetics; Psychiatry), Stephen Strittmatter (Neurology; Neurobiology), Jane Taylor (Psychiatry; Psychology), Flora Vaccarino (Child Study Center; Neurobiology), Christopher van Dyck (Psychiatry; Neurobiology; Neurology), Allan Wagner (Psychology), Xiao-Jing Wang (Neurology; Physics; Psychology), Robert Wyman (Molecular, Cellular & Developmental Biology), Z. Jimmy Zhou (Ophthalmology & Visual Science; Cellular & Molecular Physiology; Neurobiology), Steven Zucker (Computer Science; Biomedical Engineering)
Associate Professors  Meenakshi Alreja (Psychiatry; Neurobiology), Thomas Biederer (Molecular Biophysics & Biochemistry), Angélique Bordey (Neurosurgery; Cellular & Molecular Physiology), Charles Bruce (Neurobiology), Jonathan Demb (Ophthalmology & Visual Science; Cellular & Molecular Physiology), Ralph DiLeone (Psychiatry; Neurobiology), Jaime Grutzendler (Neurology; Neurobiology), Elizabeth Jonas (Internal Medicine; Neurobiology), Sven-Eric Jordt (Pharmacology), Michael Koelle (Molecular Biophysics & Biochemistry), Mark Laubach (Neurobiology), Michael Levene (Biomedical Engineering), Chiang-Shan Ray Li (Psychiatry; Neurobiology), Angeliki Louvi (Neurosurgery; Neurobiology), James Mazer (Neurobiology; Psychology), Evan Morris (Diagnostic Radiology; Biomedical Engineering; Psychiatry), Dhasakumar Navaratnam (Neurology), Michael Nitabach (Cellular & Molecular Physiology; Genetics), Kevin Pelphrey (Child Study Center; Psychology), Vincent Pieribone (Cellular & Molecular Physiology; Neurobiology), Maria Piñango (Linguistics), Laurie Santos (Psychology), Glenn Schafe (Psychology), Michael Schwartz (Neurobiology), Dana Small (Psychiatry), Susumu Tomita (Cellular & Molecular Physiology), David Zenisek (Cellular & Molecular Physiology; Ophthalmology & Visual Science), Weimin Zhong (Molecular, Cellular & Developmental Biology)

Assistant Professors  Nii Addy (Psychiatry; Cellular & Molecular Physiology), William Cafferty (Neurology), Jessica Cardin (Neurobiology), Sreeganga Chandra (Neurology; Molecular, Cellular & Developmental Biology), Daniel Colon-Ramos (Cell Biology), Thierry Emonet (Molecular, Cellular & Developmental Biology; Physics), June Gruber (Psychology), Marc Hammarlund (Genetics), Michael Higley (Neurobiology), In-Jung Kim (Ophthalmology & Visual Science; Neurobiology), Hedy Kober (Psychiatry; Psychology), Ifat Levy (Comparative Medicine; Neurobiology), Janghoo Lim (Genetics), Christopher Pittenger (Psychiatry; Psychology), Satinder Singh (Cellular & Molecular Physiology)

Research Scientist  David Wells

Fields of Study
The Interdepartmental Neuroscience Program offers flexible but structured interdisciplinary training for independent research and teaching in neuroscience. The goal of the program is to ensure that degree candidates obtain a solid understanding of cellular and molecular neurobiology, physiology and biophysics, neural development, systems and behavior, and neural computation. In addition to course work, graduate students participate in a regular journal club, organize the Interdepartmental Neuroscience Program Seminar Series, and attend other seminar programs, named lectureships, symposia, and an annual research retreat.

Special Admissions Requirements
Applicants to the Neuroscience Program should have a B.S. or B.A. Most applicants have had course work in neuroscience, psychobiology, physiological psychology, mathematics through calculus, general physics, general biology, general chemistry, organic chemistry, biochemistry, computer science, or engineering. Deficiencies in these areas
can be corrected through appropriate course work in the first year of residence. Laboratory research experience is desirable but is not a formal requirement. Scores for the GRE (General Test required; Subject Test recommended) or MCAT, three letters of recommendation, transcripts of undergraduate grades, and a statement of interest must accompany the application.

To enter the Ph.D. program, students apply to an interest-based track within the interdepartmental graduate Program in the Biological and Biomedical Sciences (BBS).

**Special Requirements for the Ph.D. Degree**

Each entering student is assigned a faculty advisory committee to provide guidance. This committee is responsible for establishing the student’s course of study and for monitoring his or her progress. This committee will be subsequently modified to include faculty with expertise in the student’s emerging area of interest. Although each student’s precise course requirements are set individually to take account of background and educational goals, the course of study is based on a model curriculum beginning with four core required courses (Principles of Neuroscience, Neurobiology, Bioethics in Neuroscience, and Structural and Functional Organization of the Human Nervous System) designed to ensure broad competence in modern neuroscience. Students must successfully complete NSCI 580b, Bioethics in Neuroscience, prior to the end of their first year of study. Students are also required to complete at least three additional elective courses from a broad set of neuroscience-related courses. The Graduate School uses grades of Honors, High Pass, Pass, and Fail and requires two term grades of Honors during the first two years of study. Students are expected to maintain at least a High Pass average. Additional degree requirements are successful completion of both terms of Lab Rotation for First-Year Students (NSCI 512a/b) and both terms of Second-Year Thesis Research (NSCI 513a/b). This will ensure that degree candidates obtain a solid background in systems, cellular, and molecular approaches to neuroscience. Admission to candidacy requires passing a qualifying examination normally given during the second year, and submission of a dissertation prospectus (NIH grant format) before the end of the third year. In accordance with the expectations of the BBS program, Ph.D. students are expected to participate in two terms (or the equivalent) of teaching. Thesis committee meetings are required annually. Also required is the completion and satisfactory defense of the thesis.

Requirements for M.D./Ph.D. students are the same as for Ph.D. students with the following differences: five courses are required (Principles of Neuroscience and Structural and Functional Organization of the Human Nervous System, and three elective graduate-level courses). M.D./Ph.D. students are required to serve for one term as teaching assistants; however, two terms of teaching are preferred.

**Master’s Degrees**

**M.Phil.** See Degree Requirements under Policies and Regulations.

**M.S.** Awarded only to students who are not continuing for the Ph.D. degree and have successfully completed the equivalent of 30 credit hours in the doctoral program. This includes a passing grade in the four required courses plus two elective courses, a minimum of two Honors grades, and successful completion of both terms of Lab Rotation
for First-Year Students (NSCI 512a/b) and both terms of Second-Year Thesis Research (NSCI 513a/b). Students are not admitted for this degree.

Program information is available at http://medicine.yale.edu/neuroscience.

Courses

NSCI 501a/NBIO 501a, Principles of Neuroscience  Ralph DiLeone, Angeliki Louvi
General neuroscience seminar: lectures, readings, and discussion of selected topics in neuroscience. Emphasis is on how approaches at the molecular, cellular, physiological, and organismal levels can lead to understanding of neuronal and brain function. WF 3:15–4:45

[NSCI 502b/MCDB 730bu, Cell Biology of the Neuron]

NSCI 504b/MCDB 735bu, Seminar in Brain Development and Plasticity  Weimin Zhong
Weekly seminars and discussion sessions to explore recent advances in our understanding of brain development and plasticity, including neuronal determination, axon guidance, synaptogenesis, and developmental plasticity. MW 2:30–3:45

[NSCI 507b/NBIO 507b, Cellular and Molecular Mechanisms of Neurological Disease  Offered every other year]

NSCI 510b/NBIO 500b, Structural and Functional Organization of the Human Nervous System  Michael Schwartz, Pasko Rakic, and staff
An integrative overview of the structure and function of the human brain as it pertains to major neurological and psychiatric disorders. Neuroanatomy, neurophysiology, and clinical correlations are interrelated to provide essential background in the neurosciences. Lectures in neurocytology and neuroanatomy survey neuronal organization in the human brain, with emphasis on long fiber tracts related to clinical neurology. Weekly three-hour laboratory sessions in close collaboration with faculty members. Lectures in neurophysiology cover various aspects of neural function at the cellular level, with a strong emphasis on the mammalian nervous system. Clinical correlations consist of five sessions given by one or two faculty members representing both basic and clinical sciences. These sessions relate neurological symptoms to cellular processes in various diseases of the brain. Variable class schedule; contact course instructors. This course is offered to graduate and M.D./Ph.D. students only and cannot be audited.

NSCI 512a/b/NBIO 512a/b, Lab Rotation for First-Year Students  Charles Greer
Required for all first-year Neuroscience graduate students. Rotation period is one term. Both terms required.

NSCI 513a/b/NBIO 513a/b, Second-Year Thesis Research
Required for all second-year Neuroscience graduate students. Both terms required.

[NSCI 514a/NBIO 524a, Neurodevelopment and Neuropsychiatric Disorders]

NSCI 519a/b, Tutorial
By arrangement with faculty and approval of DGS.
Neuroimaging methodologies including Positron Emission Tomography (PET), Single Photon Emission Computed Tomography (SPECT), Magnetic Resonance Imaging (MRI), functional Magnetic Resonance Imaging (fMRI), and Magnetic Resonance Spectroscopy (MRS) are rapidly evolving tools used to study the living human brain. Neuroimaging has unprecedented implications for routine clinical diagnosis, for assessment of drug efficacy, for determination of psychotropic drug occupancy, and for the study of pathophysiological mechanisms underlying neurologic and psychiatric disorders. The course is designed to provide an overview of the application of state-of-the-art neuroimaging methods to research in neurologic and psychiatric disorders.

**NSCI 532b/NBIO 532b, Neurobiology of Cortical Systems**  
Offered every other year

In this course we focus on the original breakthroughs that led to major lines of research being pursued today. Subjects include classic papers in the discoveries of DNA, action potential, synaptic transmission, growth factors, second messengers, neurotransmitters, Hebb synapse, dendrites, hippocampus and memory, cortical columns, REM sleep, neuroendocrine system, instrumental conditioning, reticular activating system, psychoactive drugs, computer modeling, and artificial intelligence.

**NSCI 539b/NBIO 509b, Synaptic Organization of the Nervous System**  
Offered every other year

This course is an introduction to ethics and ethical decision making in the neurosciences. Format for the course is an informal discussion. Each week we are joined by members of the Yale faculty and community who can share their experiences and expertise as it relates to the topic of the week. This course is mandatory for first-year graduate students in the Interdepartmental Neuroscience Program (INP). Grading is Satisfactory/Unsatisfactory and is based on attendance/participation, weekly reaction papers, and a final term paper. The successful (Satisfactory) completion of this course is worth one full graduate course credit. TH 4–5:15

**NSCI 580a, The MAP Kinase Pathway and Cognitive Disorders**

**NSCI 580b/NBIO 580b, Bioethics in Neuroscience**

**NSCI 596a/NBIO 596a, Seminar in Neurophysiology of Decision Making**

**NSCI 597b/NBIO 597b, Neuroeconomics**  
Offered every other year
NSCI 612b/ENAS 812b, Molecular Transport and Intervention in the Brain  
W. Mark Saltzman, Richard Carson  
A graduate-level seminar on mechanisms and rates of movement of molecules in the brain and the design of novel drug delivery systems. Topics include mathematical methods for modeling diffusion and flow processes, diffusion in the brain interstitium, fluid flows in the brain and spinal cord, the blood-brain barrier, microdialysis measurements, controlled release systems, microfluidic approaches for drug delivery. Weekly readings are assigned from neuroscience and engineering texts; current papers from the literature are used to guide discussion each week.

M.Phil., Ph.D.

Dean
Margaret Grey

Director of Graduate Studies
Nancy Reynolds (203.737.2313, nancy.reynolds@yale.edu)

Associate Professors Sally Cohen, Barbara Guthrie, Lois Sadler, Allison Shorten, Sandra Talley, Robin Whittemore

Assistant Professors Angelina Chambers, Wei-Ti Chen, Joanne Iennaco, Sheila Molony, Margaret Moss, Linda Pellico, Jacquelyn Taylor, Julie Womack

Fields of Study
Fields include chronic illness (diabetes, cardiovascular disease, cancer, HIV/AIDS); self-and family management; maternal and child health; policy and politics of health care; health equity and care of vulnerable populations; acute and critical care; children with mental health disorders; end-of-life and palliative care; genetic and environmental influences on health; gerontology and long-term care; and school- and community-based interventions.

Special Admissions Requirements
Applicants should have a master’s degree in nursing, or the equivalent, including previous course work in statistics and graduate-level course work in research methods. The Graduate Record Examination (GRE) General Test is required. The Test of English as a Foreign Language (TOEFL) is required of all applicants for whom English is a second language. Samples of written work (e.g., published article, thesis, literature review) and a curriculum vitae are required. Qualified applicants will be invited for an interview with a member of the doctoral faculty.

Special Requirements for the Ph.D. Degree
COURSE WORK
Completion of twelve core courses and six cognates in the student’s area of specialization (including one advanced analysis course) is required.

The grading system includes Honors, High Pass, Pass, and Fail. Students must maintain a High Pass average and achieve a grade of Honors in at least two core courses to remain in good standing. High Pass is required in all core courses in the first year for a student to be eligible to take the Preliminary Examination. After the first year, no more
than one grade of Pass in a core course will be permitted. A grade of Pass or better is required for all cognates, including the required advanced analysis course.

In addition to all other requirements, students must successfully complete NURS 929b, Ethical Conduct of Clinical Research, prior to the end of their first year of study. This requirement must be met prior to registering for a second year of study.

GRADUATE RESEARCH ASSISTANT AND TEACHING FELLOW EXPERIENCE

During the first two years of the program, students are Graduate Research Assistants with faculty mentors and participate in the mentor’s ongoing research.

Two terms of a Teaching Fellowship Program are required. Teaching Fellows assist with the teaching of larger master's-level courses, typically during their third year of doctoral study.

EXAMINATIONS

Successful completion of three examinations is required.

1. The Preliminary Examination is taken in June after the first year of course work has been completed. A grade of High Pass or better in each core course is required. The Preliminary Examination is intended to allow the student to demonstrate mastery of doctoral course work. This written examination is taken over two consecutive days. Passing the Preliminary Examination is a prerequisite for continuing in the second year of doctoral study.

2. The Qualifying Examination typically takes place during the third year of study, and preferably by the end of the fifth term, when required course work is completed. The student prepares a comprehensive dissertation proposal containing a statement of the problem to be studied, conceptual framework, critical review of relevant literature, design, methods, and plan for analysis. The oral Qualifying Examination typically lasts 1 to 1.5 hours. The student gives a 15-minute formal presentation of the proposed study and answers questions regarding the research and related topics. Successful completion of the Qualifying Examination is required for candidacy for the doctoral degree.

3. The Final Oral Examination is based on the dissertation. The dissertation is intended to demonstrate that the student is competent in the chosen area of study and has conducted independent research. The Final Oral Examination typically lasts 1.5 to 2 hours. The student gives a 15- to 20-minute formal presentation of the dissertation and answers questions. Successful completion of the Final Oral Examination is required before the Ph.D. can be awarded.

Master’s Degree

M.Phil. (en route to the Ph.D.) This degree will be granted to Ph.D. students who successfully complete two years of course work, but do not progress to the dissertation stage. To be awarded the M.Phil. degree, students need to complete all core courses, six cognates (may include independent study with faculty), and two years of Graduate Research Assistant experience, and must pass the Preliminary Examination. This degree is normally granted only to students who are withdrawing from the Ph.D. program.
For information on the terminal master’s degree offered by the Yale School of Nursing (Master of Science in Nursing), visit the School’s Web site, http://nursing.yale.edu, or contact Frank A. Grosso, Assistant Dean for Student Affairs and Registrar, Yale School of Nursing, at frank.grosso@yale.edu.

Courses

**NURS 901a, Quantitative Methods for Nursing Research**  Jane Dixon
This advanced course in quantitative research methods provides an opportunity to evaluate various research designs used to investigate problems of importance to nursing and health. Emphasis is placed on the interrelationships of the clinical problem, study aims, and study design—with the goal of understanding methods decisions that are made by researchers, and how these decisions influence study validity. Required for all Ph.D. students in nursing. Open to master’s students with permission of the instructor. Three hours per week.

**NURS 903a, Measurement of Health Variables**  Jane Dixon
The course focuses on theory of measurement and on reliability and validity of research instruments—with emphasis on interaction of conceptual, methodological, and pragmatic considerations. An integration of seminar and lecture modalities is employed. This course is required for all second-year Ph.D. students in nursing and is also open to advanced graduate students in other schools of the University. Three hours per week.

**NURS 904a/b, Doctoral Independent Study**  Faculty
This elective is initiated by the student and negotiated with faculty. The purpose is to allow in-depth pursuit of individual areas of interest and/or practice. A written proposal must be submitted and signed by the student, the faculty member(s), and the program chairperson.

**NURS 905b, Creating Method: Issues in Nursing Research**

**NURS 907, Dissertation Seminar**  Nancy Redeker
The course provides the student with advanced study and direction in research leading to development of the dissertation proposal and completion of the dissertation. Students are guided in the application of fundamentals of scientific writing and criticism. Required for all Ph.D. students in nursing. 2.5 hours every other week for academic year.

**NURS 909a, Philosophical Foundations of Inquiry**  Barbara Guthrie
The purpose of this course is to provide doctoral students with an overview and critical analysis of historical and contemporary views of knowledge development and of science, with particular emphasis on the ways these views influence approaches to nursing inquiry. Emphasis is on a critical examination of the underlying epistemological and ontological assumptions and their respective implications for diverse approaches to knowledge generation within the discipline. Required for all Ph.D. students in nursing. Three hours per week.

**NURS 911, Doctoral Research Practicum**  Nancy Reynolds
The overall purpose of this seminar is to guide the student in acquiring an understanding of the role and responsibilities of the nurse researcher. Topics include scientific writing,
peer review, components and development of a research plan, program of research and research career, funding and grantsmanship, presentation, publication, ethical considerations, collaboration, and interdisciplinary research. Required of all students for the first two years of doctoral study to coincide with their Graduate Research Assistant experience. One hour every other week.

**NURS 913b, Theoretical Basis of Nursing Science**  Robin Whittemore  
The course examines the nature of scientific knowledge and the development of the conceptual and theoretical underpinnings of nursing science. The contribution to nursing science of various approaches to knowledge synthesis and theory development is emphasized. Specific approaches to concept/theory development and analysis are examined. Students are expected to complete a formal analysis of a concept or theory of interest to them. Required for all Ph.D. students in nursing. Three hours per week.

**NURS 917, Advanced Statistics for Nursing Research**  Kristopher Fennie, Marjorie Funk  
This yearlong course starts with a review of basic descriptive and inferential statistics and advances to multivariate analyses most commonly used in nursing studies. The emphasis is on attaining a conceptual understanding of these statistical techniques, selecting appropriate techniques for a given clinical research problem, conducting computer-assisted data analyses, and correctly expressing the results of such analyses. The laboratory part of the course covers fundamentals of data management and statistical analysis, and proceeds to the conduct of advanced analyses. The course emphasizes using programming language in SAS; however, the menu-driven user interfaces in SAS, SPSS, n-Query, MS Excel, and MS Access also are briefly covered. This course is required for all Ph.D. students in nursing and may be elected by M.S.N. students with permission of the instructors. Three hours per week for academic year.

**NURS 921b, Seminar on Research in Care of Patients with Diabetes**  Robin Whittemore  
This seminar focuses on the current state of the science in research on care of patients with diabetes mellitus and builds on knowledge gained in clinical courses in diabetes management. Specific attention is paid to issues related to interventions with high-risk cultural and ethnic groups. Research from nursing, medicine, and the social sciences is discussed by leaders in the field. Prerequisites: NURS 769a and 901a, or the equivalent. Two hours per week. Offered every other year.

**NURS 923a, Current Issues in Cardiovascular Nursing Research**

**NURS 925b, Qualitative Research in Nursing**  Holly Kennedy  
The course introduces the student to major approaches to qualitative research. Selected topics related to the design, conduct, and reporting of qualitative research are addressed. Emphasis is placed on the appropriate use of qualitative methods and differences across qualitative approaches. The course includes firsthand experience with data collection and analysis. Required for all Ph.D. students in nursing. Three hours per week.

**NURS 927b, Seminar on Research in Care of People with Cancer or at Risk for Cancer and Their Families**
Nursing

NURS 929b, Ethical Conduct of Clinical Research  Lois Sadler
The course introduces major concepts in the ethical conduct of clinical research from the perspective of the advanced practice nurse and the nurse-researcher. National and international ethical codes for research and regulatory requirements are reviewed. Emphasis is placed on the protection of vulnerable populations and community-based research, including international research. Required for all Ph.D. students in nursing. Open to others with permission of the instructor. One hour per week.

NURS 941a, Health Policy, Leadership, and Systems  Margaret Moss
The course addresses salient issues in health policy and the challenges to linking research and clinical care with public and private policy agendas. The course covers the following topics: health care delivery systems; policy and political factors that affect access to care and its financing, delivery, and quality; challenges to evidence-based policy and the dissemination of research findings to policy and community-based leaders. It also includes theories of leadership and policy change relevant to students’ research topics. Critical thinking, problem-solving skills, and research-based analysis are integrated throughout the course. A major written assignment suitable for submission to a peer-reviewed journal (or that can be easily modified for same) is a course requirement. Prerequisite: students must pass a test based on the online Yale University School of Nursing Health Policy Module. Required for all Ph.D. students in nursing. Three hours per week.

NURS 943a, Self- and Family Management of Vulnerable Populations  Nancy Reynolds
The course examines major conceptualizations of health and illness, vulnerability, and self- and family management in the context of health disparities, and the research supporting these conceptualizations. Emphasis is placed on the link among illness self-management, vulnerability, and related concepts such as self-efficacy and coping and the contributions of risk and protective factors to self-management. These links and associations with self-management are considered from an individual, family, and health system perspective, and sociocultural influences on self-management are explored. Required for all Ph.D. students in nursing. Three hours per week.

NURS 943b, Methods of Intervention Development and Testing  Margaret Grey
The seminar focuses on the research methods necessary for the understanding, development, and testing of interventions in the management of health and illness by self- and family management. Content includes the use of qualitative, family, and survey approaches to understand the factors associated with management of health and illness and the application of these approaches to both the individual and the family as a unit of study. Prerequisite: NURS 943a. Required for all Ph.D. students in nursing. Open to others by consent of the instructor. Three hours per week.

Fields of Study

Major emphases in the department are in the areas of molecular pharmacology, mechanisms of drug action, signal transduction, structural biology, neuropharmacology, and chemotherapy.

Special Admissions Requirements

A bachelor’s degree in biology, chemistry, or another science is required. Undergraduate courses should include biology, organic chemistry, physics, and calculus. GRE scores are required; a GRE Subject Test, preferably in Biology or Chemistry, is recommended.

To enter the Ph.D. program, students should apply to an interest-based track within the interdepartmental graduate program in the Biological and Biomedical Sciences.

Special Requirements for the Ph.D. Degree

Because the field of pharmacology encompasses many disciplines, the department’s flexible program of study toward the Ph.D. degree permits students to concentrate in areas of their particular interest. Students must take the core graduate pharmacology course (PHAR 504a), Physiological Systems (PHAR 550a), and the two terms of the graduate seminar course (PHAR 502a/b). The other courses will be selected based on each student’s interest and must include at least two other courses offered by the Pharmacology department (among PHAR 528a, PHAR 529b, and PHAR 560). The Graduate School requires a grade of Honors for a minimum of two courses. (Honors for seminar courses cannot be used toward this requirement). In addition, students are required to do three research rotations and to pass the qualifying examination.
A thesis prospectus must be submitted and accepted by the end of the third year. Admission to candidacy is usually achieved by the end of the third year. A doctoral dissertation based upon original research, with an oral presentation given to the pharmacology faculty and a thesis committee in defense of the dissertation, is required for the degree. The norm for completion of the Ph.D. program is about six years.

An important aspect of graduate training in pharmacology is the acquisition of teaching skills through the participation in courses appropriate for the student’s scientific interests. These opportunities can be drawn from a diverse menu of lecture, laboratory, and seminar courses given at the undergraduate, graduate, and medical school levels. Ph.D. students are required to participate in two terms (or the equivalent) of teaching. Students are not expected to teach during their first year.

Prior to registering for a second year of study, students must successfully complete PHAR 580, Ethics.

Master’s Degrees

M.Phil. See Degree Requirements under Policies and Regulations.

M.S. (en route to the Ph.D.) Students are eligible for the M.S. degree upon successful completion of the first three terms of the Ph.D. program. This includes one year of lab rotations and course requirements.

Program materials are available upon request to the Director of Graduate Studies, Department of Pharmacology, Yale University, PO Box 208066, New Haven CT 06520-8066.

Courses

PHAR 502a/C&MP 630a/PATH 680a, Seminar in Molecular Medicine, Pharmacology, and Physiology Sven-Eric Jordt, Don Nguyen, Susumu Tomita Readings and discussion on a diverse range of current topics in molecular medicine, pharmacology, and physiology. The class emphasizes analysis of primary research literature and development of presentation and writing skills. Contemporary articles are assigned on a related topic every week, and a student leads discussions with input from faculty who are experts in the topic area. The overall goal is to cover a specific topic of medical relevance (e.g., cancer, neurodegeneration) from the perspective of three primary disciplines (i.e., physiology: normal function; pathology: abnormal function; and pharmacology: intervention). M 3–5

PHAR 504a, Principles of Pharmacology Elias Lolis Lectures covering antibiotics, immunotherapy, and chemotherapy. MW 11:35–12:50

PHAR 506a and b, Methods in Pharmacological Research (Rotations) Elias Lolis Students work in laboratories of faculty of their choice. The period spent in each laboratory is one term.

[PHAR 521a/NSCI 521a, Neuroimaging in Neuropsychiatry I: Imaging Methods]
PHAR 521b/NSCI 521b, Neuroimaging in Neuropsychiatry II: Clinical Applications  
Kelly Cosgrove, Hilary Blumberg, Irina Esterlis  
Neuroimaging methodologies including Positron Emission Tomography (PET), Single Photon Emission Computed Tomography (SPECT), Magnetic Resonance Imaging (MRI), functional Magnetic Resonance Imaging (fMRI), and Magnetic Resonance Spectroscopy (MRS) are rapidly evolving tools used to study the living human brain. Neuroimaging has unprecedented implications for routine clinical diagnosis, for assessment of drug efficacy, for determination of psychotropic drug occupancy, and for the study of pathophysiological mechanisms underlying neurologic and psychiatric disorders. The course is designed to provide an overview of the application of state-of-the-art neuroimaging methods to research in neurologic and psychiatric disorders. TH 9–10:30

PHAR 528a, Principles of Signal Transduction  
Anton Bennett  
The regulation of intracellular signaling is of fundamental importance to the understanding of cell function and regulation. This course introduces the broad principles of intracellular signal transduction. More detailed lectures on specific intracellular signaling pathways are given in which students learn both the basic and most recent and cutting-edge concepts of intracellular signaling. Topics include regulation of signaling by protein phosphorylation, small G proteins, G-protein-coupled receptors, hormones, phospholipids, adhesion, and gasses. TTH 10:30–12

PHAR 529b, Structural Pharmacology  
Ya Ha, Titus Boggon  
The goal of the course is to show students how concepts of structural biology are applied to areas of great importance in pharmacology such as protein kinases, proteases, cell surface receptors, integrins and other membrane-bound enzymes, and transporters and channels, and how these concepts facilitate drug development. TTH 2–3:30

PHAR 550a/C&MP 550au/ENAS 550au/MCDB 550au, Physiological Systems  
Emile Boulpaep, W. Mark Saltzman  
The course develops a foundation in human physiology by examining the homeostasis of vital parameters within the body, and the biophysical properties of cells, tissues, and organs. Basic concepts in cell and membrane physiology are synthesized through exploring the function of skeletal, smooth, and cardiac muscle. The physical basis of blood flow, mechanisms of vascular exchange, cardiac performance, and regulation of overall circulatory function are discussed. Respiratory physiology explores the mechanics of ventilation, gas diffusion, and acid-base balance. Renal physiology examines the formation and composition of urine and the regulation of electrolyte, fluid, and acid-base balance. Organs of the digestive system are discussed from the perspective of substrate metabolism and energy balance. Hormonal regulation is applied to metabolic control and to calcium, water, and electrolyte balance. The biology of nerve cells is addressed with emphasis on synaptic transmission and simple neuronal circuits within the central nervous system. The special senses are considered in the framework of sensory transduction. Weekly discussion sections provide a forum for in-depth exploration of topics. Graduate students evaluate research findings through literature review and weekly meetings with the instructor. MWF 9:25–10:15
PHAR 560b/C&MP 560bu/ENAS 570bu/MCDB 560bu, Cellular and Molecular Physiology: Molecular Machines in Human Disease  Emile Boulpaep, Fred Sigworth
The course focuses on understanding the processes that transfer molecules across membranes at the cellular, molecular, biophysical, and physiological levels. Students learn about the different classes of molecular machines that mediate membrane transport, generate electrical currents, or perform mechanical displacement. Emphasis is placed on the relationship between the molecular structures of membrane proteins and their individual functions. The interactions among transport proteins in determining the physiological behaviors of cells and tissues are also stressed. Molecular motors are introduced and their mechanical relationship to cell function is explored. Students read papers from the scientific literature that establish the connections between mutations in genes encoding membrane proteins and a wide variety of human genetic diseases. MWF 9:25–10:15

PHAR 580/C&MP 650/PATH 660, Ethics  Barbara Ehrlich, Michael Robek, Satinder Singh
Organized to foster discussion, the course is taught by faculty in the Pharmacology, Pathology, and Physiology departments and two or three senior graduate students. Each session is based on case studies from primary literature, reviews, and two texts: Francis Macrina’s Scientific Integrity and Kathy Barker’s At the Bench. Each week, students are required to submit a reaction paper discussing the reading assignment. Students take turns leading the class discussion; a final short paper on a hot topic in bioethics is required.
PHILOSOPHY

Connecticut Hall, 203.432.1665
www.yale.edu/philos
M.A., M.Phil., Ph.D.

Chair
Tamar Gendler

Director of Graduate Studies
Sun-Joo Shin (205 C, 203.432.1674, sun-joo.shin@yale.edu)

Associate Professor  Joshua Knobe

Assistant Professors  Barbara Sattler, Raul Saucedo, Bruno Whittle

Senior Research Scholar  Susanne Bobzien

Lecturers  Scott Edgar, Sonny Elizondo, Benjamin George

Fields of Study
Fields include most of the major areas of philosophy. Please see the Philosophy Web site (www.yale.edu/philos) for the departmental statement.

Special Requirements for the Ph.D. Degree
In the first two years all students must complete a total of twelve term courses. Graduate courses are grouped: (1) metaphysics, theory of knowledge, philosophy of science; (2) ethics, aesthetics, philosophy of religion, political philosophy, and theory of value; (3) history of philosophy. No more than six and no fewer than two courses may be taken in each group. A course in logic must also be taken, although on the basis of previous work a student may petition to have this requirement waived. Two qualifying papers must be submitted, one in history, the other in another distribution area; normally the first of these papers will be submitted by mid-September, the second by December, of a student’s third year. It is expected that these papers will be more substantial and professional than an ordinary term paper. Students must demonstrate competence in at least one of the following languages: French, German, Greek, or Latin, normally by the end of the second year. Students in Philosophy will teach in the third and fourth years. They must have teaching experience in at least two distribution areas. Approval of the dissertation prospectus is expected before the end of the sixth term. Upon completion of all predissertation requirements, including the prospectus, students are admitted to candidacy for the Ph.D. Admission to candidacy must take place by the end of the third year of study. The norm for completion of the Ph.D. degree is five to six years.
Classics and Philosophy Joint Ph.D. Program

The Classics and Philosophy Program is a joint program, offered by the Departments of Classics and Philosophy at Yale, for students wishing to pursue graduate study in ancient philosophy. Suitably qualified students may apply for entry to the program either through the Classics department for the Classics track or through the Philosophy department for the Philosophy track.

Applicants for the Classics track of the joint program must satisfy the general requirements for admission to the Classics graduate program, in addition to the requirements of the Classics track of the joint program. Details of the Classics track of the program are available online at www.yale.edu/classics/research_philosophy_program.html.

Applicants for the Philosophy track of the joint program must satisfy the general requirements for admission to the Philosophy graduate program, in addition to the requirements of the Philosophy track of the joint program. Details of the Philosophy track of the program are available online at www.yale.edu/philos/grad_classics.html.

The joint program is overseen by an interdepartmental committee currently consisting of Professors Susanne Bobzien, Verity Harte, and Barbara Sattler, together with the director of graduate studies for Classics and the director of graduate studies for Philosophy.

Master’s Degrees

M.Phil.  See Degree Requirements under Policies and Regulations.

M.A. (en route to the Ph.D.) An M.A. degree is awarded to students after completion of seven term courses with an average grade of High Pass.

Please see the Philosophy Web site for information on the program (www.yale.edu/philos).

Courses

PHIL 567bu, Mathematical Logic I  Sun-Joo Shin
An introduction to the metatheory of first-order logic, up to and including the completeness theorem for the first-order calculus. An introduction to the basic concepts of set theory is included. TTH 11:35–12:25

PHIL 570bu, Epistemology  Keith DeRose
Introduction to current topics in the theory of knowledge. The analysis of knowledge, justified belief, rationality, certainty, and evidence. T 11:35–12:25

PHIL 600au, Timaeus  Barbara Sattler
An examination of one of the most influential texts in Western thought, Plato’s Timaeus, which gives an account of the universe from the set-up of the stars and planets all the way down to humans beings, fish, and atoms. The seminar focuses on, among other things, Plato’s theory of time and history, the mathematical nature of the physical world, the notion of space, the nature of the human soul and body, and the metaphysical foundations of what there is. T 3:30–5:20
PHIL 601au/GREK 726a, Plato’s Laws X  Verity Harte, Raphael Woolf
The course focuses on the Greek text of Plato’s Laws, Book X, which offers one of the earliest surviving characterizations of atheism, against which it argues that gods exist, that they have concern for human beings, and that they are just. W 3:30–5:20

PHIL 602bU, Ancient Notions of Time  Barbara Sattler
An examination of the rich array of temporal notions and their development in antiquity. We look at passages from epic, lyric, and tragedy in order to get a grasp of the earliest temporal notions in Western thought. Subsequently, we inquire how the requirements of historiography and philosophy led to a unified conception of time, which is the precursor to our notion of time. Authors include Homer, Hesiod, Pindar, Sophocles, Thucydides, Plato, and Aristotle. T 3:30–5:20

PHIL 603au, The Philosophy of Hobbes  Steven Smith
A close reading of the major works of Thomas Hobbes. In what respect is Hobbes the founder of modern political science? Special attention is devoted to the problem of political theology and the status of the Bible in Hobbes’s political thought. M 1:30–3:20

PHIL 604b, Leibniz  Michael Della Rocca, Thomas Feeney, Julia von Bodelschwingh
A close examination of Leibniz’s vast, intricate, and still poorly understood philosophical system. Topics to be explored include substance, necessity, freedom, psychology, teleology, and the problem of evil. Attention to relevant philosophical and theological antecedents, including Spinoza, Descartes, Suarez, Aquinas, and Aristotle. Attention also to Leibniz’s relevance to contemporary philosophy. W 3:30–5:20

PHIL 605au/JDST 786au, Jewish Philosophy in the Twentieth Century  Michael Morgan
Major figures in the tradition of Jewish philosophy during the twentieth century. Engagement with the Western philosophical tradition, especially in Europe and postwar America. The impact of the Six-Day War and the Nazi Holocaust on American Jewish thinkers. TH 9:25–11:15

PHIL 606au/CPLT 651a/GMAN 647au, Systems and Their Theory  Henry Sussman
This course spans the developments between two of the most original and still-telling early system-makers, Kant and Hegel, and some important twentieth-century fiction writers, among them Kafka, Proust, Borges, Calvino, and Pynchon, whose works built and played upon the architecture of systems. We read a number of scholars and scientists who have thought about the systematic dimensions of culture and life: Gregory Bateson, Steps to an Ecology of Mind; Fritjof Capra, The Web of Life; Anthony Wilden, System and Structure; and James Gleick, Chaos. Seminars are divided between elucidations of systematic pictures of the world and specific instances from criticism, literature, and other art forms. We work to discern the follow-through between conceptual systems and the systematic dimensions of our everyday lives, whether legal, institutional, or familial. M 3:30–5:20

PHIL 625au, Belief  Keith DeRose, Bruno Whittle
An investigation of the nature of belief and the meaning of belief reports. Readings focus on quite recent philosophical literature. T 7–8:50
PHIL 626b, Logic and Metaphysics in Eastern Thought  Raul Saucedo
A systematic study of various logical and metaphysical doctrines in Eastern thought, using the tools of contemporary analytic philosophy. Special attention to issues about truth, contradiction, plurals, parts and wholes, and ontological dependence in ancient Indian philosophy. Readings from both classic and contemporary sources. M 3:30–5:20

PHIL 627b, Computability and Logic  Sun-Joo Shin
A technical exposition of Gödel's first and second incompleteness theorems and of some of their main consequences in proof theory and model theory, such as Lob's theorem, Tarski's undefinability of truth, provability logic, and nonstandard models of arithmetic. TH 1:30–3:20

PHIL 628a, Philosophy of Philosophy  George Bealer
An examination of the aims of philosophy, the methods used in philosophizing, their epistemological grounds, and the prospects for success. Also considered are the role of intuition in philosophy and philosophy’s relationship to empirical science. W 3:30–5:20

PHIL 629a, Philosophical Implications of Social Psychology  Tamar Gendler
An exploration of the philosophical implications of important recent work in social psychology showing the important role that social structures play in influencing human behavior. Specific topics are likely to include authority and obedience, and implicit racial attitudes. M 7–8:50

PHIL 630b, Philosophy and Psychology in the Nineteenth Century  Scott Edgar
What is the mind and how does it produce cognition? And as a methodological issue, can those questions be answered scientifically? If so, how? This course examines these questions, paying special attention to the answers given by the “founding fathers” of experimental psychology and their philosophical contemporaries. M 1:30–3:20

PHIL 631b, Personal Identity  Kenneth Winkler
The nature of persons, their unity, and the conditions of their identity over time. Readings in classical and contemporary sources, among them Locke, Hume, Shaftesbury, Butler, Reid, Bernard Williams, Derek Parfit, Charles Taylor, Sally Haslanger, and David Lewis. Consideration of the metaphysics of kinds; social construction; philosophical methodology; and the bearing of ethics on metaphysics. W 7–8:50

PHIL 632b, Topics in the Philosophy of Mathematics  Bruno Whittle
Metaphysical and epistemological issues raised by mathematics. Questions concerning the notion of a set; whether one can quantify absolutely everything; whether there are really infinite sets of different sizes; the significance of Gödel's incompleteness theorems; arguments designed to show that certain mathematical terms are referentially indeterminate. T 7–8:50

PHIL 633b/LING 776b, Implicature and Pragmatic Theory  Laurence Horn
Theories of conversational and conventional implicature. Diverse approaches to the characterization of what is said and what is meant. Pragmatic intrusion into truth-conditional meaning in neo-Gricean pragmatics and relevance theory; the problem of “embedded implicatures” and the grammatical view of scalar implicature. Experimental studies of
implicature and the grammar/pragmatics interface. Prerequisite: one course in semantics or pragmatics, or permission of the instructor. W 9:25–11:15

PHIL 634b\(v\), Stoc Logic  Susanne Bobzien
The contributions of Stoic philosophers to various areas of logic, such as speech act theory, theory of meaning, propositional logic, deductive systems, relevance and modal logic, truth theories and semantic paradoxes. F 1:30–3:20

PHIL 650a\(v\), Recent Work in Ethical Theory: Derek Parfit  Stephen Darwall, Shelly Kagan
The aim of the course is to expose students to some of the best and most recent work in ethical theory. The exact content of the course depends on the instructor and changes in the field. This year, the course involves an extended study of Derek Parfit’s *On What Matters*. TH 1:30–3:20

PHIL 651a\(v\), Violence and Human Dignity  Stephen Darwall
There are deep connections between the concepts of violence and the distinctive kind of value we suppose human beings to have: a dignity that grounds basic human rights. We examine these connections from philosophical, historical, psychological, and sociological perspectives. T 1:30–3:20

PHIL 652b\(v\), History of Early Modern Ethics  Stephen Darwall

PHIL 653b\(v\), Contemporary Kantian Ethics  Sonny Elizondo
An examination of contemporary Kantian ethics. We are especially interested in different interpretations of the key Kantian claim that rational beings are ends in themselves. M 3:30–5:20

PHIL 654a\(v\)/JDST 797a\(v\), Emmanuel Levinas: Ethics as First Philosophy  Michael Morgan
Emmanuel Levinas (1906–1995) is among the half-dozen most important Jewish thinkers of the twentieth century. The course examines works from every stage of Levinas’s career, from his early study of Husserl and Heidegger to the emergence of his new understanding of the human condition and the primacy of ethics, the face-to-face encounter with the human other, the role of language and the relationship between ethics and religion, and finally his understanding of Judaism and its relationship to Western philosophy. TH 1:30–3:20

PHIL 655b\(v\), Normative Ethics  Shelly Kagan
A systematic examination of normative ethics, the part of moral philosophy that attempts to articulate and defend the basic principles of morality. The bulk of the course surveys and explores some of the main normative factors relevant in determining the moral status of a given act or policy (features that help make a given act right or wrong). Brief consideration of some of the main views about the foundations of normative ethics (the ultimate basis or ground for the various moral principles). T 1:30–3:20
PHIL 656au/HIST 804a/PLSC 605au, Rethinking Sovereignty: Human Rights and Cosmopolitanism  Adam Tooze, Seyla Benhabib
This course explores conceptions of sovereignty, cosmopolitanism, and human rights as basic elements of the international political order from the dawn of the modern age to the present in historical, philosophical, and jurisprudential aspects. W 1:30–3:20

PHIL 657au, Recent Work on Justice  Thomas Pogge
In-depth study of one contemporary book, author, or debate in political philosophy, political theory, or normative economics. Depending on student interest, this might be a ground-breaking new book, the life’s work of a prominent author, or an important theme in contemporary political thought. M 3:30–5:20

PHIL 700a/LAW 20633, Aristotle’s Ethics: Nature and the Human Good  Anthony Kronman
Topics to be considered include the meaning of happiness; habit and virtue; justice; practical wisdom; action and contemplation. Time permitting, some attention is also paid to a few related topics in Aristotle’s Politics. Paper required. Enrollment limited. Follows Law School academic calendar. W 1:10–3

PHIL 701a, Origins of the Modern World Picture  Karsten Harries
An inquiry into the presuppositions of the modern world picture. Special emphasis on the theme of perspective. Readings in Alberti, Cusanus, Descartes, and Heidegger. T 1:30–3:20

PHIL 702b, Epistemology  Keith DeRose
A study of some prominent issues in current epistemology. Topics may include skepticism, internalist vs. externalist accounts of knowledge and of justification, the structure of knowledge and justification (foundationalism vs. coherentism), and contextualism in epistemology. TH 1:30–3:20

PHIL 703b/HPM 599b/INRL 524b/LAW 21595/PLSC 594b, Global Health Ethics, Politics, and Economics  Thomas Pogge, Jennifer Ruger
Billions lack access to basic medical care, and global health inequalities are wide and growing. Such radical disparities cast doubt on the justice of supranational institutional arrangements (such as the TRIPS Agreement) and also pose ethical challenges for the global health community, especially international and domestic health and development institutions. Seeking to illuminate the normative issues involved, the course features a series of distinguished visitors, including academics as well as a few important representatives of international organizations, politics, foundations, NGOs, and relevant industries. Follows Law School academic calendar. T 10:10–12

PHIL 704a, First-Year Seminar  Raul Saucedo, Kenneth Winkler
Required of and limited to first-year students in the Philosophy Ph.D. program. Topic varies from year to year. Preparation for graduate work. Reading, writing, and presentation skills. W 7–8:50
PHIL 705a, Work in Progress  Keith DeRose
In consultation with the instructor, each student presents a significant work in progress, e.g., a revised version of an advanced seminar paper or a dissertation chapter. Upon completion of the writing, the student presents the work in a mock colloquium format, including a formal question-and-answer period. W 1:30–3:20

PHIL 706a, Kant’s Philosophy of Religion  John Hare
Kant’s writings in the philosophy of religion. The principle readings are from Critique of Pure Reason (especially the Ideal and the Canon), the Lectures on Ethics, The Critique of Practical Reason (especially the Dialectic), the Critique of Judgment (especially the Methodology), Religion within the Boundaries of Mere Reason, and The Conflict of the Faculties. T 3:30–5:20

PHIL 707b, Kierkegaard’s Philosophy of Religion  John Hare
This seminar explores a number of texts focusing on the relation between religious faith and the ethical life. We read the following texts (in whole or in part): Either/Or, Fear and Trembling, Philosophical Fragments, Concluding Unscientific Postscript, and Works of Love. T 3:30–5:20

PHIL 708b/LING 775b, Questions and Attitudes  Benjamin George, Zoltán Szabó
An exploration of the semantics of embedded and unembedded questions, with an emphasis on attitude ascription constructions relating an individual to a wh-question. Topics include question embedding under “know,” the question-answer relationship, and some of the important ambiguities associated with questions. M 7–8:50

PHIL 750a or b, Tutorial
By arrangement with faculty.
PHYSICS

35 Sloane Physics Laboratory, 203.432.3607
www.yale.edu/physics
M.S., M.Phil., Ph.D.

Chair
C. Megan Urry

Director of Graduate Studies
Paul Tipton (JWG 520, 203.432.3375, graduatephysics@yale.edu)

Associate Professors  Helen Caines, Bonnie Fleming, Walter Goldberger, Jack Harris, Sohrab Ismaill-Beigi (Applied Physics), Daniel McKinsey, Daisuke Nagai, Corey O’Hern (Mechanical Engineering & Materials Science), Witold Skiba, Hong Tang (Electrical Engineering), Volker Werner

Assistant Professors  Sarah Demers, Eric Dufresne (Mechanical Engineering & Materials Science), Thierry Emonet (Molecular, Cellular & Developmental Biology), Tobias Golling, Nikhil Padmanabhan, David Poland, A. Elizabeth Rhoades (Molecular Biophysics & Biochemistry)

Fields of Study

Fields include atomic physics and quantum optics; nuclear physics; particle physics; astrophysics and cosmology; condensed matter; biological physics; quantum information physics; applied physics; and other areas in collaboration with the School of Engineering & Applied Science, and the departments of Applied Physics; Mathematics; Chemistry; Molecular Biophysics and Biochemistry; Molecular, Cellular, and Developmental Biology; Geology and Geophysics; and Astronomy.
Special Admissions Requirements

The prerequisites for work toward a Ph.D. degree in physics include a sound undergraduate training in physics and a good mathematical background. The GRE General Test and the Subject Test in Physics are required.

Special Requirements for the Ph.D. Degree

To complete the course requirements students are expected to take a set of nine term courses. A set of five core courses (Advanced Classical Mechanics, Electromagnetic Theory, Quantum Mechanics I and II, and Statistical Mechanics) serves to complete the student's undergraduate training in classical and quantum physics. A set of four advanced courses, including a required course in quantum field theory, provides an introduction to modern physics and research. Certain equivalent course work and successful completion of a pass-out examination may reduce the course requirement or allow substitution of elective courses for individual students. In addition, all students are required to be proficient and familiar with mathematical methods of physics (such as that necessary to master the material covered in the five core courses) and to be proficient and familiar with advanced laboratory techniques. These requirements can be met either by taking a course offered by the department or by carrying out an approved Special Investigation with individual faculty. In addition to all other requirements, students must successfully complete PHYS 590b, Responsible Conduct in Research for Physical Scientists, prior to the end of their first year of study. This requirement must be met prior to registering for a second year of study.

Students who have completed their course requirements with satisfactory grades (a grade of Honors in PHYS 990, Special Investigations, may be counted toward the Graduate School requirement of two grades of Honors), pass the qualifying examination, and submit an acceptable thesis prospectus are recommended for admission to candidacy. The qualifying examination, normally taken at the beginning of the third term (and no later than the beginning of the fifth term), is a six-hour written examination covering the five core courses and mathematical methods as described above. Students normally submit the dissertation prospectus before the end of the third year of study.

There is no foreign language requirement. Teaching experience is regarded as an integral part of the graduate training program. During their study students are expected to serve as teaching fellows, usually in the first two years. Formal association with a dissertation adviser normally begins in the fourth term after the qualifying examination has been passed and required course work has been completed. An adviser from a department other than Physics can be chosen in consultation with the director of graduate studies (DGS), provided the dissertation topic is deemed suitable for a physics Ph.D.

Master's Degrees

M.Phil. Students who have successfully advanced to candidacy qualify for the M.Phil. degree.

M.S. (en route to the Ph.D.) Students who complete the first-year graduate courses with a satisfactory record (including two Honors or four High Passes) qualify for the M.S. degree.
Program materials are available upon request to the Director of Graduate Studies, Department of Physics, Yale University, PO Box 208120, New Haven CT 06520-8120; e-mail, graduatephysics@yale.edu; Web site, www.yale.edu/physics.

Courses

**PHYS 500a, Advanced Classical Mechanics**  Yoram Alhassid

**PHYS 502b, Electromagnetic Theory I**  Thomas Appelquist
Classical electromagnetic theory including boundary-value problems and applications of Maxwell equations. Macroscopic description of electric and magnetic materials. Wave propagation. **MW 9–10:15**

**PHYS 504Lb, Modern Physics Measurements**  Volker Werner
A laboratory course with experiments and data analysis in soft and hard condensed matter, nuclear and elementary particle physics. **MW 1:30–4:20**

**PHYS 506a, Mathematical Methods of Physics**  Nicholas Read
Survey of mathematical techniques useful in physics. Includes vector and tensor analysis, group theory, complex analysis (residue calculus, method of steepest descent), differential equations and Green's functions, and selected advanced topics. **MW 9–10:15**

**PHYS 508a, Quantum Mechanics I**  Thomas Appelquist
The principles of quantum mechanics with application to simple systems. Canonical formalism, solutions of Schrödinger’s equation, angular momentum, and spin. **MW 11:35–12:50**

**PHYS 512b, Statistical Physics I**  Yoram Alhassid
Review of thermodynamics, the fundamental principles of classical and quantum statistical mechanics, canonical and grand canonical ensembles, identical particles, Bose and Fermi statistics, phase transitions and critical phenomena, renormalization group, irreversible processes, fluctuations. **MW 11:35–12:50**

**PHYS 517b3/ENAS 517b/MB&B 517b3/MCDB 517b3, Methods and Logic in Interdisciplinary Research**  Lynne Regan, Enrique De La Cruz, Eric Dufresne, Thierry Emonet, Paul Forscher, Megan King, Michael Levene, Simon Mochrie, Corey O’Hern, Thomas Pollard, Elizabeth Rhoades, Corey Wilson, and staff
This half-term IGPPEB class is intended to introduce students to integrated approaches to research. Each session is led by faculty with complementary expertise and discusses papers that use different approaches to the same topic (for example, physical and biological or experiment and theory). Counts as 0.5 credit toward graduate course requirements. Required for students in IGPPEB. **MW 5–7**

[**PHYS 522a, Introduction to Atomic Physics**]
PHYS 523a/ENAS 541a/MB&B 523a, Biological Physics  
Eric Dufresne  
An introduction to the physics of several important biological phenomena, including molecular motors, protein folding, bacterial locomotion, and allostery. The material and approach are positioned at the interface of the physical and biological sciences. TTH 2:30–3:45

[PHYS 524a, Introduction to Nuclear Physics]

PHYS 526b, Introduction to Elementary Particle Physics  
O. Keith Baker  
An overview of particle physics, including an introduction to the standard model, experimental techniques, symmetries, conservation laws, the quark-parton model, and open questions in particle physics.

PHYS 529b/AMTH 665bu/CB&B 561b/MCDB 561bu, Systems Modeling in Biology  
Thierry Emonet, Steven Kleinstein, Kathryn Miller-Jensen, Xiao-Jing Wang, Steven Zucker  
An introduction to the techniques of integrating knowledge from mathematics, physics, and engineering into the analysis of complex living systems. Use of these techniques to address key questions about the design principles of biological systems. Discussion of experiments and corresponding mathematical models. Reading of research papers from the literature. Students build their own models using MATLAB. TTH 2:30–3:45

PHYS 538a, Introduction to Relativistic Astrophysics and General Relativity  
Vincent Moncrief  
Basic concepts of differential geometry (manifolds, metrics, connections, geodesics, curvature); Einstein’s equations and their application to such areas as cosmology, gravitational waves, black holes. MW 9–10:15

PHYS 548au and 549bu/APHY 548au and 549bu/ENAS 850au and 851bu, Solid State Physics I and II  
Victor Henrich [F], A. Douglas Stone [Sp]  
A two-term sequence covering the principles underlying the electrical, thermal, magnetic, and optical properties of solids, including crystal structures, phonons, energy bands, semiconductors, Fermi surfaces, magnetic resonance, phase transitions, and superconductivity. Fall: TTH 1–2:15; Spring: TTH 2:30–3:45

[PHYS 561bu, General Relativity, Astrophysics, and Cosmology]

PHYS 570b/ASTR 570b, High-Energy Astrophysics  
Priyamvada Natarajan  
A survey of current topics in high-energy astrophysics, including accreting black hole and neutron star systems in our galaxy, pulsars, active galactic nuclei and relativistic jets, gamma-ray bursts, and ultra-high-energy cosmic rays. The basic physical processes underlying the observed high-energy phenomena are also covered. TTH 4–5:15

[PHYS 582b/NBIO 582b/NSCI 582b/PSYC 582b, Introduction to Computational Neuroscience]

PHYS 590b, Responsible Conduct in Research for Physical Scientists  
Required seminar for all first-year students.

[PHYS 600a/ASTR 600au, Cosmology]
PHYS 608b, Quantum Mechanics II  Jack Harris

PHYS 609a, Relativistic Field Theory I  Walter Goldberger
The fundamental principles of quantum field theory. Interacting theories and the Feynman graph expansion. Quantum electrodynamics including lowest order processes, one-loop corrections, and the elements of renormalization theory. TTH 11:35–12:50

PHYS 610b/APHY 610b, Quantum Many-Body Theory  Leonid Glazman
Second quantization, quantum statistical mechanics, Hartree-Fock approximation, linear response theory, random phase approximation, perturbation theory and Feynman diagrams, Landau theory of Fermi liquids, BCS theory, Hartree-Fock-Bogoliubov method. Applications to solids and finite-size systems such as quantum dots, nuclei, and nanoparticles. TTH 11:35–12:50

PHYS 624a, Group Theory  Francesco Iachello

PHYS 628a, Statistical Physics II  Leonid Glazman
An advanced course in statistical mechanics. Topics to be covered may include mean field theory of and fluctuations at continuous phase transitions; critical phenomena, scaling, and introduction to the renormalization group ideas; topological phase transitions; dynamic correlation functions and linear response theory; quantum phase transitions; superfluid and superconducting transitions; some cooperative phenomena in low-dimensional systems. TTH 2:30–3:45

PHYS 630b, Relativistic Field Theory II  Walter Goldberger
An introduction to non-Abelian gauge field theories, spontaneous symmetry breakdown, and unified theories of weak and electromagnetic interactions. Renormalization group methods, quantum chromodynamics, and nonperturbative approaches to quantum field theory. TTH 1–2:15

[PHYS 633b/APHY 633b, Introduction to Superconductivity]

[PHYS 634a/APHY 634a, Mesoscopic Physics I]

[PHYS 662b, Special Topics in Particle Physics: Beyond the Standard Model]

[PHYS 667b/APHY 667b, Special Topics in Condensed Matter Physics: Quantum Hall Effect and Conformal Field Theory]

PHYS 675a/APHY 675a, Principles of Optics with Applications  Hui Cao
Introduction to the principles of optics and electromagnetic wave phenomena with applications to microscopy, optical fibers, laser spectroscopy, nanophotonics, plasmonics, and
metamaterials. Topics include propagation of light, reflection and refraction, guiding light, polarization, interference, diffraction, scattering, Fourier optics, and optical coherence. TTH 11:35–12:50

PHYS 677a/APHY 677a, Noise, Dissipation, Amplification, and Information  
Michel Devoret  
Graduate-level non-equilibrium statistical physics applied to noise phenomena, both classical and quantum. The aim of the course is to explain the fundamental link between the random fluctuations of a physical system in steady state and the response of the same system to an external perturbation. Several key examples in which noise appears as a resource rather than a limitation are treated: spin relaxation in nuclear magnetic resonance (motional narrowing), Johnson-Nyquist noise in solid state transport physics (noise thermometry), photon correlation measurements in quantum optics (Hanbury Brown-Twiss experiment), and so on. The course explores both passive and active systems. It discusses the ultimate limits of amplifier sensitivity and speed in physics measurements. MW 9–10:15

PHYS 678b, Computing for Scientific Research  
Helen Caines  
An introduction to basic computational tools and techniques utilized in science and engineering research. The course focuses on developing hands-on experience via a mixture of lectures and practical programming. Introduction to the fundamentals of PC hardware, the UNIX/Linux operating system, scripting languages (Perl), and the development of programs to solve physical and mathematical problems. Programming languages with emphasis on C/C++ (procedural and object-orientated) as well as the conceptual underlying numerical methods are covered to provide the tools for scientific problem solving. This course is intended for students with little basic programming experience.

PHYS 679a/APHY 679a, Nonlinear Optics and Lasers  
Hui Cao  

PHYS 816a/APHY 816a, Techniques of Microwave Measurements and RF Design  
Robert Schoelkopf  
An advanced course covering the concepts and techniques of radio-frequency design and their application in making microwave measurements. The course begins with a review of lumped element and transmission line circuits, network analysis, and design of passive elements, including filters and impedance transformers. We continue with a treatment of passive and active components such as couplers, circulators, amplifiers, and modulators. Finally, we employ this understanding for the design of microwave measurement systems and techniques for modulation and signal recovery, to analyze the performance of heterodyne/homodyne receivers and radiometers. MW 11:35–12:50
PHYS 990a and b, Special Investigations
Directed research by arrangement with individual faculty members and approved by the DGS.

PHYS 991b/ENAS 991b/MB&B 591b, Integrated Workshop  Lynne Regan, Eric Dufresne, Thierry Emonet, Paul Forscher, Simon Mochrie
This required course for students in IGPPEB involves hands-on laboratory modules with students working in pairs. A biology student is paired with a physics or engineering student; a computation/theory student is paired with an experimental student. The modules are devised so that a range of skills are acquired, and students learn from each other.
POLITICAL SCIENCE
Rosenkranz Hall, 203.432.5241
www.yale.edu/polisci
M.A., M.Phil., Ph.D.

Chair
Susan Stokes

Director of Graduate Studies
Gregory Huber

Professors  Bruce Ackerman, Akhil Amar (Law), Seyla Benhabib, Paul Bracken (Management), David Cameron, Bryan Garsten, Alan Gerber, Jacob Hacker, Gregory Huber, Stathis Kalyvas, David Mayhew, Barry Nalebuff (Management), Douglas Rae, John Roemer, Susan Rose-Ackerman, Frances Rosenbluth, Nicholas Sambanis, James Scott, Ian Shapiro, Stephen Skowronek, Steven Smith, Susan Stokes, Alec Stone Sweet, Peter Swenson, Ivan Szelenyi (Sociology), John Wargo (Forestry & Environmental Studies), Steven Wilkinson, Elisabeth Wood

Associate Professors  Thad Dunning, Susan Hyde, Ellen Lust, Karuna Mantena, Andrew March

Assistant Professors  John Bullock, Daniel Butler, Seok-ju Cho, Allan Dafoe, Alexandre Debs, Samuel DeCanio, Ana De La O Torres, Eitan Hersh, Sigrun Kahl, Hélène Landemore, Adria Lawrence, Christopher Lebron, Jason Lyall, Nuno Monteiro, Paulina Ochoa Espejo, Ato Kwamena Onoma, Eleanor Powell, Kelly Rader, Thania Sanchez, Tariq Thachil, Vesla Weaver, Jessica Weiss

Fields of Study
Fields include political theory, international relations, comparative politics, American politics, political economy, quantitative empirical methods, qualitative and archival methods, and formal theory.

Special Admissions Requirement
The department requires that scores from the GRE General Test and a writing sample accompany an application. Additional details about the application process are available on the department Web site. The department only accepts applications for the Ph.D. program.

Special Requirements for the Ph.D. Degree
Overall program requirements  Students are required to pass sixteen term courses by the end of their fourth term in the program, to receive a grade of Honors in at least two Political Science courses, and to maintain an overall High Pass or above average (for purposes of calculating this average, Honors=3, High Pass=2, Pass=1, and Fail=0). The High Pass average must also be met for graduate courses listed in the Political Science department. To remain in good standing throughout their time in the Ph.D. program,
students are expected to actively participate in classes and workshops, produce high quality written work, and demonstrate regular progress toward completion of the dissertation. The department regularly offers about sixty term courses for graduate students each year. Courses are conducted as seminars and typically have small enrollments. Four of the courses required for the degree may be in departments other than Political Science (two of these can be advanced language courses with the approval of the director of graduate studies [DGS]).

Each student must demonstrate elementary reading competence in one foreign language. Such competence is usually demonstrated by taking, or having completed, two years of undergraduate course work or by examination. Alternatively, the language requirement can be satisfied by successfully completing two terms of formal theory or two terms of statistical methods at the graduate level (beyond the introductory course in statistical methods offered in the department).

Courses are offered in five substantive fields—political theory, international relations, comparative politics, American politics, and political economy—and three methods fields: quantitative empirical methods, qualitative and archival methods, and formal theory. Courses taken must include one each in at least three of the department’s substantive fields. Courses cannot be counted in more than one field. Each student must demonstrate competence in three fields (two of which must be substantive fields) before the start of the fifth term. Competence can be demonstrated either by passing the comprehensive examination in the field or by course work, provided that each student takes at least two comprehensive exams. The fields of formal theory and quantitative empirical methods offer certification only through examination. For fields to be certified by course work, students are required to satisfactorily complete three courses in the field, where courses in the field are determined by the faculty and the DGS, including one in which a research paper is written and presented. The paper must be submitted to review by the instructor of the course for which the paper was written. The department offers exams twice a year, in late August and in early January. Students are expected to pass their comprehensive examinations by August of their second year. Each examination is based on a reading list compiled by the faculty within the field and updated each year. Each list offers an introduction and framework for study in the field and preparation for the examination. A committee of faculty within the field grades the exams as Distinguished, Satisfactory, or Unsatisfactory.

Students who successfully complete the Ph.D. in Political Science will often join the faculties of colleges and universities. For that reason, learning what is involved in teaching and gaining teaching experience are also essential components of graduate education. The department normally expects students to devote themselves exclusively to course work and comprehensive examinations in their first two years in the Ph.D. program. Students in Political Science typically teach in their third and fourth years.

During each year in residence, graduate students are expected to participate actively and regularly in one or more of the many research workshops run by the department. Students beyond their fourth term are required to enroll in at least one of the workshops for credit, and all workshops are graded on a Satisfactory/Unsatisfactory basis. All students are expected to present a research paper of their own at one of these workshops before the end of their fourth year. Workshop participation does not count toward the requirement of sixteen term courses.
Prior to registration for the second year  (1) Students must have taken and passed at least seven courses, including the required Introduction to the Study of Politics, and maintained an overall High Pass average. At least five of these courses must be graduate courses in Political Science. While only seven courses are required, students are normally expected to complete eight courses in the first year to be on track to complete sixteen courses by the end of the second year. (2) Students are strongly encouraged to complete at least one field certification prior to the beginning of their second year. (3) Students are strongly encouraged to attend one of the subfield weekly workshops. (Note that these workshops do not count toward the required number of completed courses.)

Prior to registration for the third year  (1) Students must have taken at least sixteen term courses and have received a grade of at least Pass in each of them, including the two-term required Research and Writing course for second-year students. Research and Writing is devoted to the preparation of a manuscript based on original research on a topic of the student’s choice and will count as two of the sixteen credits needed to advance to candidacy. (2) Students must have received a grade of Honors in at least two Political Science courses and maintained an overall High Pass average. (3) Students must have completed certification in three fields by the end of their second year. (For purposes of fulfilling this requirement, students registered for the August exams are assumed to have passed those exams when determining eligibility for enrollment in the third year.) At the discretion of the DGS, students who fail an exam may be granted a one-term extension (to January of the third year) for obtaining certification. (4) Students are strongly encouraged to attend one of the required subfield weekly workshops. (Note that these workshops do not count toward the required number of completed courses.)

Admission to candidacy  Students must be admitted to candidacy prior to registration for the fourth year of study. Students are recommended to the Graduate School for admission to candidacy by the Department of Political Science after having completed departmental requirements listed above and the Graduate School’s prospectus requirement. As part of admission to candidacy, a student must have a prospectus approved by a dissertation director and two other members of the faculty. This must occur no later than May 1 of the student’s third year of study.

Submitting the dissertation  A student’s dissertation research is guided by a committee of no fewer than three faculty members, at least two of whom must be members of the Yale Department of Political Science. One of the committee members is designated as chair. When a dissertation is completed, the student will select two members to write written reports on the final dissertation, at least one of whom must be a member of the Yale Department of Political Science. The DGS will also appoint one additional member of the department to write an additional evaluation.

Combined Degrees  

The Graduate School offers a combined degree in Political Science and African American Studies. For details, see the entry under African American Studies in this bulletin. Students may also pursue a joint degree with the Law School.
Master’s Degrees

M.Phil.  The academic requirements for the M.Phil. degree are the same as for the Ph.D. degree except for the completion of the dissertation.

M.A. (en route to the Ph.D.)  The M.A. degree is awarded upon completion of a full year of course work in the program (i.e., at least eight term courses) with an average of High Pass or better. The courses must include at least six listed in the Political Science department and one each in at least three of the department’s substantive fields. A graduate-level course in statistical analysis is also required for the M.A. degree. Language requirements are the same as for the Ph.D. degree.

Program materials are available upon request to the Director of Graduate Studies, Department of Political Science, Yale University, PO Box 208301, New Haven CT 06520-8301.

Courses

**EMPIRICAL ANALYSIS AND RESEARCH METHODOLOGY**

**PLSC 500a, Statistics**  Daniel Butler  
The goal of the course is to introduce basic statistical theory and techniques for Political Science graduate students. The first part of the course covers probability theory, and the second part is devoted to estimation and inference, including an introduction to the classic multiple linear regression framework. Although emphasis is on the development of the relevant theory and statistical concepts, a series of applications and examples is considered on a variety of political science problems, such as turnout, crime, elections, party systems.

**PLSC 503b, Quantitative Methods**  Thad Dunning  
The course provides an extensive treatment of the linear regression model. It covers a wide array of regression techniques, including those that address problems of measurement error, reciprocal causation, and nonlinearities. Time series and pooled time-series-cross-sectional models are also covered. The aim is to make students intelligent consumers of published quantitative research and to prepare them to conduct original research in political science. The course assumes that students have command of the material covered in PLSC 500a, including basic knowledge of probability and linear regression. Matrix algebra and calculus are helpful but not essential.

**PLSC 504a, Advanced Quantitative Methods**  Allan Dafoe  
The course covers a wide range of topics in quantitative methodology. The recurrent theme is the challenge of drawing secure causal inferences from data. Topics covered include matching estimators, differences-in-differences estimators, instrumental variable methods, and regression discontinuity analysis. We also introduce maximum likelihood estimation and an array of linear and nonlinear regression applications such as dichotomous and polychotomous response models, models for censored and truncated data, sample selection models, duration models, and models for count data. The broader aim of the course is to provide students with the statistical background necessary to read and conduct quantitative research. The course assumes students have command of the
material covered in PLSC 500a and PLSC 503b, including basic probability theory, matrix algebra, and the linear regression model.

**PLSC 505b/SOCY 508b, Qualitative Field Research**

In this seminar we discuss and practice qualitative field research methods. The course covers the basic techniques for collecting, interpreting, and analyzing ethnographic data, with an emphasis on the core ethnographic techniques of participant observation and in-depth interviewing. All participants carry out a local research project. Permission of the instructor required for undergraduates.

**PLSC 508b, Causal Inference and Research Design**  Ana De La O Torres

This new class exposes advanced graduate students to cutting-edge empirical projects that use strong identification strategies and/or fieldwork to study topics in comparative politics, political economy, international relations, American politics, and other fields. The course features six or seven presentations by visiting speakers (mainly faculty at other universities), who present their research projects. Students engage presenters not just on the data and findings but also on the nuts and bolts of actually doing the work, e.g., the research design process, question selection, identification strategies, measurement decisions, and the role of various qualitative methods. Outside speakers are encouraged to share data in advance so that students can replicate results. When visiting speakers are not present (roughly every other week), lectures and discussions focus on selected methodological topics. Special emphasis is placed on the merger of quantitative and qualitative methods and the use of research design to facilitate causal inference. Prerequisite: students should normally have completed PLSC 500a, 503b, and 504a before taking this course, though exceptions are allowed in consultation with the instructor.

**PLSC 510a, Introduction to the Study of Politics**  Susan Stokes

The course introduces students to some of the major controversies in political science. We focus on the five substantive themes that make up the Yale Initiative: Order, Conflict, and Violence; Representation and Popular Rule; Crafting and Operating Institutions; Identities, Affiliations, and Allegiances; and Distributive Politics. We divide our time between discussing readings on these subjects and conversations with different members of the faculty who specialize in them. There is also some attention to methodological controversies within the discipline. Requirements: an annotated bibliography of one of the substantive themes and a take-home final exam.

**PLSC 512b, Introduction to Experimental Methods in Political Science**  Alan Gerber

An introduction to experimental methods as they can be used to study politics. Exploration of strengths and weaknesses of experimental and nonexperimental studies. Applications include the effects of television advertising, formation of political attitudes, and causes of voter turnout. Students participate in the design and implementation of an experiment. Knowledge of introductory statistics helpful but not required.

**PLSC 517a, Fundamentals of Modeling**  John Roemer

The course is an introduction to techniques of microeconomic modeling, as applied to problems in political economy and political science. The level is that of a sophisticated
course in intermediate microeconomics. Topics include preferences, utility functions, Pareto efficiency, competitive economic equilibrium, the first theorem of welfare economics, Hotelling-Downs political equilibrium, Nash equilibrium, Wittman-Nash political equilibrium, Nash bargaining, Arrow’s theorem and social welfare functions, and distributive justice. Prerequisites: differential calculus and/or the Political Science Math Camp. Microeconomics at the intermediate level is helpful but not mandatory.

**PLSC 518b, Fundamentals of Modeling II**  Seok-ju Cho
Building upon Fundamentals of Modeling I, the course offers a rigorous introduction to noncooperative game theory. The goal of the course is to help students understand the key concepts and ideas in game theory and to provide students with a road map for applying game theoretic tools to their own research. Topics include strategic form games, extensive form games, and Bayesian games, among others. Students are assumed to have mathematical knowledge at the level of the Political Science Math Camp and to have taken Fundamentals of Modeling I or its equivalent.

**PLSC 522a/SOCY 503a, Historical Approaches to the Study of Politics**  Sigrun Kahl
Provides an overview of the how-to, and the payoff, of a historical approach to the study of politics. Covers a wide range of topics, from the classics of political science and sociology up to recent comparative historical work.

**PLSC 540, Research and Writing**  Thad Dunning, Gregory Huber
This is a required course for all second-year students. It meets for the first six weeks of the fall term and the first six weeks of the spring term. The fall meetings are devoted to discussion of research design as well as individual student projects. The spring meetings are devoted to discussion of drafts of student papers. The work of the spring-term seminar includes criticism of the organization, arguments, data evaluation, and writing in each student’s paper by the instructors and the other students. Using this criticism, and under the supervision of the instructors, each student conducts additional research, if necessary, rewrites the paper as required, and prepares a final paper representing the best work of which the student is capable. Students must submit a one-page outline of the proposed project for the first fall-term meeting and a complete draft of the paper at the first meeting in the spring.

**POLITICAL THEORY**

**PLSC 553a/LAW 20104, Justice**  Bruce Ackerman
An examination of contemporary theories, together with an effort to assess their practical implications. Authors this year include Peter Singer, Richard Posner, John Rawls, Robert Nozick, Michael Walzer, Marian Young, and Roberto Unger. Topics: animal rights, the status of children and the principles of educational policy, the relation of market justice to distributive justice, the status of affirmative action. MT 4:10–6

**PLSC 572b, Non-Domination as a Political Ideal**  Ian Shapiro
An exploration of the ideal of non-domination as it operates in political theory and argument. Authors discussed include Aristotle, Machiavelli, Nietzsche, Weber, Gaventa, Foucault, Adorno, Habermas, Sen, Walzer, Young, Skinner, Pettit, and the instructor. T 3:30–5:20
PLSC 590a, Introduction to Political Theory  Ian Shapiro
This course is designed to introduce Ph.D. students in Political Science to contemporary debates in political theory. It is organized around several themes, including theories of justice, democracy, republicanism, power, and collective action. All readings are drawn from the department’s political theory comprehensive field list. They range over the historical and contemporary parts of the list. Particular emphasis is devoted to the ways in which the preoccupations of political theorists should be informed by and inform the empirical study of politics. Students are required either to write a paper or take a final exam. The course is open to students in the Political Science Ph.D. program. Others admitted only with permission from the instructor.

PLSC 605a/U/HIST 804a/PHIL 656a/U, Rethinking Sovereignty: Human Rights and Cosmopolitanism  Adam Tooze, Seyla Benhabib
This course explores conceptions of sovereignty, cosmopolitanism, and human rights as basic elements of the international political order from the dawn of the modern age to the present in historical, philosophical, and jurisprudential aspects. W 1:30–3:20

PLSC 623b/U, Borders  Paulina Ochoa Espejo
What is a border in politics? Under what conditions are borders appropriate? What kinds of borders should we have (a sign, a line, barbed wire fences, walls)? Who governs borders? How should they be governed? This course examines the concept of borders by relating theoretical debates to historical and contemporary political problems.

PLSC 624b/U, Empire and Modern Political Thought  Karuna Mantena
The development of modern political thought examined as it relates to the history of empire, focusing on how the imperial experience shaped central concepts of political theory such as reason, liberty, rights, sovereignty, property, and progress. Readings from Montaigne, Locke, Diderot, Kant, Herder, Burke, Marx, Mill, Tocqueville, and others.

PLSC 625b/U, Means and Ends in Politics  Karuna Mantena
The course considers the tension between principles of political action (means) and political ideals (ends). It asks how political theory ought to situate itself vis-à-vis the historical, sociological, and practical contexts of politics. Organized around tensions between idealism and realism, philosophy and politics, moral and political judgment, practical and theoretical reason, moral intention and unintended consequences. Thinkers to be considered include Aristotle, Machiavelli, Burke, Weber, Arendt, and Gandhi.

PLSC 633a/U, Modern Liberty  Bryan Garsten
European political theorists on commercial society and representative democracy during the Age of Revolution. Authors include Montesquieu, Adam Smith, Emmanuel Sieyès, Benjamin Constant, François Guizot, Alexis de Tocqueville, G.W.F. Hegel, and Karl Marx.

PLSC 643a/U, The Political Philosophy of Hobbes  Steven Smith
The course is based on a close reading of the major works of Thomas Hobbes. In what respect is Hobbes the founder of modern political science? Special attention is devoted to the problem of political theology and the status of the Bible in Hobbes’s political thought.
INTERNATIONAL RELATIONS

PLSC 594b/HPM 599b/INRL 524b/LAW 21595/PHIL 703b, Global Health Ethics, Politics, and Economics Thomas Pogge, Jennifer Ruger

Billions lack access to basic medical care, and global health inequalities are wide and growing. Such radical disparities cast doubt on the justice of supranational institutional arrangements (such as the TRIPS Agreement) and also pose ethical challenges for the global health community, especially international and domestic health and development institutions. Seeking to illuminate the normative issues involved, the course features a series of distinguished visitors, including academics as well as a few important representatives of international organizations, politics, foundations, NGOs, and relevant industries. Follows Law School academic calendar. T 10:10–12

PLSC 658aU, International Institutions Nikolay Marinov

The role of international institutions in structuring cooperation between nations. Emphasis is both theoretical – on the theory of cooperation – and empirical, with examples drawn from the post-WWII world order.

PLSC 665aU, Perception, Reputation, and War Allan Dafoe

PLSC 668aU, International Dimensions of Democratization Nikolay Marinov

The current wave of democratizations around the world leads us to investigate the role played by international factors such as socialization, coercion, emulation. The main question of interest is how much democratic processes can be affected from the outside.

PLSC 685a/INRL 555a, Theories in International Relations Nikolay Marinov

Introduction to the major concepts and theories in the field of international relations. By the end of the course, students should be familiar with some of the major debates in the field and comfortable using IR concepts and theories to understand and explain events in international politics. The course is a reading-intensive seminar, and the weekly meetings are structured around student-led presentations and discussions of assigned readings. The presentations should provide a brief overview of the main arguments of the readings and raise questions for group discussion. All students should prepare discussion notes, which are turned in at the end of each class meeting. Approximately 150–200 pages of required reading per week. M 3:30–5:20

PLSC 686bU, Chinese Foreign Policy Jessica Weiss

PLSC 695a, International Relations I Nicholas Sambanis

The course examines theories of international relations and evaluates empirical evidence in favor of or against those theories. It surveys the main theoretical traditions in international relations and considers how empirical methods can be used to identify causation in the international relations field. Students acquire broad familiarity with the diverse literature in this field, learn to identify opportunities for new research, and apply rigorous methodology to evaluate theoretical claims. The course is designed for students who plan to pursue doctoral-level research in international relations and want to pass the Ph.D. qualifying exam in the field.
PLSC 696b, International Relations II  Jason Lyall
This course introduces students to the various methodological challenges that arise while conducting empirical research in international relations as well as possible research designs for overcoming them. This course, which builds directly on PLSC 695a, draws heavily, though not exclusively, on research issues that arise in the subfield of international security. Each week we tackle a key debate: proposed topics include (1) explaining the origins, conduct, and outcomes of inter- and intrastate wars; (2) the sources of military effectiveness; (3) the uses and limits of coercive diplomacy; and (4) the effects of transnational forces and actors. We use these debates as springboards for broader discussions of the strengths and weaknesses of different research approaches, including experimental, quasi-experimental, observational, and interview and archival-based work. PLSC 695a is strongly recommended.

PLSC 715b/HIST 985b/MGT 984b, Studies in Grand Strategies, Part I  
John Gaddis, Charles Hill
This two-term course begins in January with readings in classical works from Sun Tzu to Clausewitz to Kissinger. Students identify principles of strategy and examine the extent to which these were or were not applied in historical case studies from the Peloponnesian War to the post-Cold War period. During the summer students undertake research projects or internships designed to apply resulting insights to the detailed analysis of a particular strategic problem or aspect of strategy. Written reports are presented and critically examined early in the fall term. Students must take both terms, fulfill the summer research/internship, and attend additional lectures to be scheduled throughout the spring and fall terms. Admission is by competitive application only; deadline is early November. Please visit www.yale.edu/iss/gs for application information. M 3:30–5:20

PLSC 716a/HIST 985a/MGT 984a, Studies in Grand Strategies, Part II  
John Gaddis, Paul Kennedy, Charles Hill
Part II of the two-term linked seminar offered during the calendar year 2012. Research seminar. M 3:30–5:20

COMPARATIVE POLITICS

PLSC 714a/LAW 20098, Corruption, Economic Development, and Democracy  
Susan Rose-Ackerman
A seminar on the link between political and bureaucratic institutions, on the one hand, and economic development, on the other. A particular focus is the impact of corruption on development and the establishment of democratic government. Enrollment limited to fifteen.

PLSC 734a,b/SOCY 560a,b, Comparative Research Workshop  Julia Adams,
Philip Gorski
This weekly workshop is dedicated to group discussion of work-in-progress by visiting scholars; Yale graduate students; and in-house faculty from Sociology and affiliated disciplines. Papers are distributed a week ahead of time and also posted on the Web site of the Center for Comparative Research (www.yale.edu/ccr). Students who take the course for a letter grade are expected to present a paper-in-progress the term that they are enrolled for credit. T 11:50–1:20
PLSC 741b, Armed Groups and Violence Patterns  
Elisabeth Wood  
Characteristics of armed organizations such as state militaries, police forces, insurgent groups, secessionist movements, and terrorist organizations. The patterns of political violence used by these groups. Readings from political science, history, anthropology, and sociology.

PLSC 755a, European Politics  
David Cameron  
Comparison of the political systems of the major European countries. Topics include political institutions, electoral politics and political parties, public policies, and contemporary problems.

PLSC 758b, Political Parties in the Developing World  
Tariq Thachil  
Political parties are routinely described as ineffective, unresponsive, and corrupt. Yet they are vital players in both democratic and nondemocratic regimes across the globe. Parties are essential for several basic political functions, ranging from representing societal interests, providing political alternatives, mobilizing voting publics, and even maintaining social control. It is thus essential for any serious student of democracy to understand how political parties emerge and function. This course seeks to introduce students to the big questions surrounding parties and party systems, with an emphasis on the non-Western world. It examines how different kinds of parties form, the various ways in which they seek to forge linkages with ordinary citizens, and the effect of their competition on democratic institutions. The readings examine a variety of parties, from those that led independence movements, to those that represent particular ethnic groups or religious ideology. Examples are drawn from countries in Latin America, Asia, the Middle East, and sub-Saharan Africa.

PLSC 771a, Legacies of Empire  
Steven Wilkinson  
This seminar examines how differences in patterns of colonization have affected post-independence levels of democracy, instability, and conflict. The course is broadly comparative, looking at the major colonial empires and their successor states in Asia, Africa, and the Americas. It is also interdisciplinary, drawing on recent work from political science, history, sociology, and economics.

PLSC 777a, Comparative Politics I: Research Design  
Stathis Kalyvas  
This course, the first in the yearlong introduction to the study of comparative politics for Ph.D. students in political science, examines the purpose and methodology of comparative inquiry. Designed to introduce students to the study of comparative politics and to assist students in developing research topics and strategies, the course explores key themes—the origins of political regimes, the building of nations and states, ethnicity and nationalism, collective action, the politics of welfare states, and the logic of institutional change—through the critical reading and discussion of classic and contemporary works.

PLSC 778b, Comparative Politics II  
Elisabeth Wood  
The second part of a two-part sequence designed to introduce graduate students to the fundamentals of comparative politics, including the major debates, topics, and methods.
PLSC 779a/ANTH 541a/F&ES 836a/HIST 965a, Agrarian Societies: Culture, Society, History, and Development  
Peter Perdue, James Scott, Kalyanakrishnan Sivaramakrishnan  
An interdisciplinary examination of agrarian societies, contemporary and historical, Western and non-Western. Major analytical perspectives from anthropology, economics, history, political science, and environmental studies are used to develop a meaning-centered and historically grounded account of the transformations of rural society. Team-taught. M 1:30–5:20

POLITICAL ECONOMY

PLSC 724a, Equity and Climate Change  
John Roemer  
Climate change presents two important challenges for equity: (1) How should the rights to emit carbon into the biosphere be allocated across the present and future generations, and (2) How should the rights be allocated among regions of the world in the next seventy-five or so years? The course presents work, mainly by economists, addressing these issues. The main machinery is models of intergenerational economic growth, with one or several “representative households” at each generation. The problem is to study paths of resource use that maximize an appropriate intergenerational or intragenerational social welfare function, subject to emitting a time-stream of CO2 that will maintain atmospheric concentration of carbon at an acceptable level. We address debates involving utilitarianism, sustainability, and appropriate rates at which to discount the utility of future generations. Prerequisite: mathematical techniques are developed from the beginning, although a certain level of sophistication is undoubtedly necessary: that acquired by the first term/year of the microeconomics Ph.D. course or the fundamentals-of-modeling sequence in political science is sufficient.

AMERICAN POLITICS

PLSC 800a, Introduction to American Politics  
David Mayhew  
An introduction to the analysis of U.S. politics. Approaches given consideration include institutional design and innovation, social capital and civil society, the state, attitudes, ideology, econometrics of elections, rational actors, formal theories of institutions, and transatlantic comparisons. Assigned authors include R. Putnam, T. Skocpol, J. Gerring, J. Zaller, D.R. Kiewiet, L. Bartels, D. Mayhew, K. Poole & H. Rosenthal, G. Cox & M. McCubbins, K. Krehbiel, E. Schickler, and A. Alesina. Students are expected to read and discuss each week’s assignment and, for each of five weeks, to write a three- to five-page analytic paper that deals with a subject addressed or suggested by the reading.

PLSC 801a, Political Preferences and American Political Behavior  
John Bullock  
Introduction to research methods and topics in American politics. Focus on ideas about choice that are useful for the study of politics. Topics include utility theory, heuristics and biases, proximity vs. directional voting, Bayesian updating, retrospective voting, priming and framing, the role of emotion, and the consequences of political ignorance.

PLSC 802b, Collective Action and Choice  
Alan Gerber  
A graduate-level course, open to undergraduates, about the basic issues of collective action and choice (preference aggregation), with a particular focus on issues of American
politics. Topics include externalities and public goods provision, social choice theory, models of electoral competition (including “median voter” models, and extensions to those models that incorporate strategic challenger entry, campaign spending, heterogeneity in voter attentiveness, valence dimensions, and primaries, etc.), the effects of different institutional settings (e.g., competitive versus retention elections) on choices, the incumbency advantage, lobbying, and decision-making in small groups (e.g., issues of deliberation). Course work includes reading and writing assignments. The course meets for the first six weeks of the spring term at the time assigned to PLSC 802b and PLSC 803b.

**PLSC 803b, American Political Institutions**  Eleanor Powell
A graduate-level course, open to undergraduates, designed to introduce students to research on American political institutions. We examine different explanations for and models of the sources of institutions, discuss their internal organization and governance, and consider the effects of institutions on outcomes of interest. Particular topics include alternatives to institutions, agenda-setting models, influences on bureaucratic decisions, the size of government and state building, congressional organization, the presidency, policy feedback and path dependence, and interest groups. Course work includes reading and writing assignments. While this course builds on material covered in 801a and 802b, it is a stand-alone course without any prior requirements. The course meets for the second six weeks of the spring term at the time assigned to PLSC 802b and PLSC 803b.

**PLSC 820a, Executive Politics and the Presidency**  Stephen Skowronek
This course surveys the origins of the American presidency, its constitutional foundations, institutional development, and current operations. Special attention is given to topics of interest in current research. These include the politics of leadership, the scope and limits of unilateral action, changing relations with Congress, the bureaucracy and the public, and the managerial capacities of the Executive Office of the President.

**PLSC 827b, Politics, Law, and Economics of Affirmative Action**  Ian Shapiro
An exploration of the politics, law, and economics of affirmative action, principally in the United States. M 3:30–5:20

**PLSC 842b/LAW 21046, The Constitution: Philosophy, History, and Law**  Bruce Ackerman
An inquiry into the foundations of the American Constitution, at its founding and at critical moments in its historical transformation — most notably in response to the Civil War, the Great Depression, and the Civil Rights Movement. Philosophically speaking, do we still live under the Constitution founded by the Federalists, or are we inhabitants of the Second or Third or Nth Republic? Institutionally, in what ways are the patterns of modern American government similar to, and different from, those in post-Revolutionary (1787–1860) and post-Civil War (1868–1932) America? Legally, what is or was the role of constitutional law in the organization of each of these historical regimes? Through asking and answering these questions, the course tries to gain a critical perspective on the effort by the present Supreme Court to create a new constitutional regime for the twenty-first century. MT 4:10–6
PLSC 847b, Theorizing about Congress  David Mayhew
Theorizing about the U.S. Congress from *The Federalist* and Woodrow Wilson through a line of political scientists of recent times.

PLSC 857a, Judicial Politics  Kelly Rader
This seminar is designed to provide an overview of the major debates in judicial politics. The primary goals of the course are to familiarize students with the principal questions being asked by scholars in this subfield, the methodological approaches employed, and the avenues available for future research. The focus is on studying law and courts as political institutions and judges as political actors. We examine decision making and power relations within courts, within the judicial hierarchy, and across the constitutional system. While we concentrate on U.S. courts, we also cover some material on other courts.

PLSC 866b/AFAM 811b, Race and the Politics of Punishment  Vesla Weaver
In this course, we explore the rise of the carceral state in America and its implications for minorities, particularly the black urban underclass. We examine how punishment and surveillance and crime discourse have changed over time, debate the explanations for black mass incarceration, and consider its effects for the political lifeworlds of black communities. F 9:25–11:15

PLSC 872a/LAW 20089, The Civil Rights Revolution  Bruce Ackerman
This seminar begins with an intensive analysis of the movement/institutional dynamics of the civil rights revolution— from the Court’s decision in *Brown v. Board* in 1954 through the resignation of Richard Nixon in 1974. It then proceeds to assess the constitutional meaning that modern lawyers/judges should give to these epochal events as they confront the challenges of the twenty-first century. Students are invited to propose papers in connection with this seminar. Those who have not taken The Constitution: Philosophy, History, Law will be asked to do approximately 150 pages of background reading. Paper required. Enrollment limited. TH 2:10–4

RESEARCH WORKSHOPS

PLSC 919, American Politics Workshop  Daniel Butler
The course meets throughout the year in conjunction with the ISPS American Politics Workshop. It serves as a forum for graduate students in American politics to discuss current research in the field as presented by outside speakers and current graduate students. Can be taken as Satisfactory/Unsatisfactory only. W 12–1:20

PLSC 920, Comparative Politics Workshop  Adria Lawrence
A forum for the presentation of ongoing research by Yale graduate students, Yale faculty, and invited external speakers in a rigorous and critical environment. The workshop’s methodological and substantive range is broad, covering the entire range of comparative politics. There are no formal presentations. Papers are read in advance by participants; a graduate student critically discusses the week’s paper, the presenter responds, and discussion ensues. Detailed information can be found at www.yale.edu/cpworkshop. Can be taken as Satisfactory/Unsatisfactory only. T 12–1:20
PLSC 921, Political Theory Workshop  Karuna Mantena
The Political Theory Workshop is an interdisciplinary forum that focuses on theoretical and philosophical approaches to the study of politics. The workshop seeks to engage with (and expose students to) a broad range of current scholarship in political theory and political philosophy, including work in the history of political thought; theoretical investigations of contemporary political phenomena; philosophical analyses of key political concepts; conceptual issues in ethics, law, and public policy; and contributions to normative political theory. The workshop features ongoing research by Yale faculty members, visiting scholars, invited guests, and advanced graduate students. Papers are distributed and read in advance, and discussions are opened by a graduate student commentator. Detailed information can be found at www.yale.edu/isps/seminars/politheo/index.html. Can be taken as Satisfactory/Unsatisfactory only. W 4:15–5:45

PLSC 922, Order, Conflict, and Violence (OCV) Seminar Series  Stathis Kalyvas
The OCV seminar series focuses on processes related to the emergence and breakdown of order. The key assumption is that understanding and studying these processes requires better theoretical and empirical foundations and calls for challenging existing disciplinary and methodological divides. The seminar series is, therefore, dedicated to the presentation of cutting-edge work from all social science disciplines and includes the presentation of ongoing research by Yale graduate students. Detailed information can be found at www.yale.edu/macmillan/ocvprogram. Can be taken as Satisfactory/Unsatisfactory only.

PLSC 924, Leitner Political Economy Seminar Series  Alexandre Debs
The Leitner Political Economy Seminar Series engages research on the interaction between economics and politics as well as research that employs the methods of political economists to study a wide range of social phenomena. The workshop serves as a forum for graduate students and faculty to present their own work and to discuss current research in the field as presented by outside speakers, faculty, and students. Detailed information can be found at www.yale.edu/leitner/seminars.html. Can be taken as Satisfactory/Unsatisfactory only. M 12–1:20

PLSC 926, International Relations Workshop
The International Relations Workshop engages work in the fields of international security, international political economy, and international institutions. The forum attracts outside speakers, Yale faculty, and graduate students. It provides a venue to develop ideas, polish work-in-progress, or showcase completed projects. Typically, the speaker would prepare a 35- to 40-minute presentation, followed by a question-and-answer session. More information can be found at www.yale.edu/polisci/conferences/ir.html. Can be taken as Satisfactory/Unsatisfactory only. W 12–1:20

PLSC 990, Directed Reading
By arrangement with individual faculty.
PSYCHOLOGY

Kirtland Hall, 203.432.4500
www.yale.edu/psychology
M.S., M.Phil., Ph.D.

Chair
Susan Nolen-Hoeksema (203.432.0699, susan.nolen-hoeksema@yale.edu)

Director of Graduate Studies
John Dovidio (203.432.4533, john.dovidio@yale.edu)

Professors  Woo-kyoung Ahn, Stephen Anderson (Linguistics), Amy Arnsten (Neurobiology), John Bargh, Sidney Blatt (Psychiatry), Paul Bloom, Thomas Brown, Kelly Brownell, Tyrone Cannon, Marvin Chun, Margaret Clark, Ravi Dhar (School of Management), John Dovidio, Carol Fowler (Haskins Laboratories), Robert Frank (Linguistics), Marcia Johnson, Alan Kazdin, Frank Keil, Marianne LaFrance (Women’s, Gender & Sexuality Studies), Lawrence Marks (Public Health), Gregory McCarthy, Susan Nolen-Hoeksema, Donald Quinlan (Psychiatry), Peter Salovey, Brian Scholl, Tom Tyler (Law School), Fred Volkmar (Child Study Center), Victor Vroom (School of Management), Xiao-Jing Wang (Neurobiology), Karen Wynn

Associate Professors  Walter Gilliam (Child Study Center), Elena Grigorenko (Child Study Center), Jeannette Ickovics (Public Health), Joan Kaufman (Psychiatry), Robert Kerns (Veterans Administration Medical Center), Becca Levy (Public Health), Linda Mayes (Child Study Center), Nathan Novemsky (School of Management), Maria Piñango (Linguistics), Laurie Santos, Glenn Schafer, Mary Schwab-Stone (Child Study Center), Jane Taylor (Psychiatry)

Assistant Professors  June Gruber, Dan Kahan (Law School), Julia Kim-Cohen, Hedy Kober (Psychiatry), Jaime Napier, Kristina Olson

Lecturers  Nancy Close, Nelson Donegan, Carla Horwitz, David Klemanski, Kristi Lockhart, Benjamin Toll, Marney White

Fields of Study
Fields include clinical psychology; cognitive psychology; developmental psychology; neuroscience; and social/personality psychology.

Special Admissions Requirement
The department requires that scores from the GRE General Test accompany an application.

Special Requirements for the Ph.D. Degree
In order to allow each student to be trained in accordance with his or her own interests and career goals, the general requirements of the department are kept to a minimum. The formal requirements are: (1) Course work selected to meet the individual’s objectives with a minimum of three basic-level courses and one course in data analysis. Two of the
three required basic-level courses must be in two different areas of psychology outside the student’s main area of concentration. The basic-level course requirement must be completed by the end of the second year. Students must attain an Honors grade in at least two term courses by the end of the second year of study. (2) Nine units of teaching are required in years two through four. (3) Completion of a First-Year Research Paper due by May 10 of the second term. (4) Completion of a predissertation research project, to be initiated not later than the second term and completed not later than May 1 of the second year. Certification of this research project as well as performance in course work and other evidence of scholarly work at a level commensurate with doctoral study, as judged by the faculty, are necessary for continuation beyond the second year. (5) Submission of a dissertation prospectus, and a theme essay that demonstrates the candidate’s comprehensive knowledge and understanding of the area of concentration. Certification of the theme essay completes the qualifying examination. (6) Approval of the dissertation by an advisory committee and the passing of an oral examination on the dissertation and its general scientific implications. The theme essay and the dissertation prospectus are completed during the third year. Students are then formally admitted to Ph.D. candidacy. There are no language requirements.

The faculty considers teaching to be an essential element of the professional preparation of graduate students in Psychology. For this reason participation in the Teaching Fellow Program is a degree requirement for all doctoral students. They are expected to serve as teaching fellows for a total of nine teaching fellow units over the course of the second through fourth years in the program. Opportunities for teaching are matched as closely as possible with students’ academic interests.

**Combined Ph.D. Program**

A combined Ph.D. degree with African American Studies is available. Students must apply to the African American Studies department with Psychology as the secondary department. Consult departments for details.

**Master’s Degrees**

**M.Phil.** The academic requirements for the M.Phil. degree are the same as for the Ph.D. degree except for the submission of a prospectus, a dissertation area review, and the completion and defense of a dissertation, which define the Ph.D.

**M.S. (en route to the Ph.D.)** The M.S. degree is awarded upon satisfactory completion of the second year of the program leading to the Ph.D. degree and also of the departmental predissertation research requirement.

Program materials are available online at www.yale.edu/psychology.

**Courses**

**[PSYC 501b, Social Cognitive Development]**

**PSYC 503a, Memory** Marcia Johnson

A consideration of major theoretical ideas and empirical findings about human memory. T 3:30–5:20
PSYC 504a*, Neurobiology of Emotion  Glenn Schafe
This course focuses on the brain circuitries involved in emotion and emotional learning and memory. We begin by considering the emotion research in a historical context, then discuss progress that has been made in understanding the neurobiology of emotion in both laboratory animals and humans. M 1:30–3:20

[PSYC 505a, Stereotyping and Prejudice]

[PSYC 506b/LING 540b*, Computational Models in Cognitive Science]

PSYC 509a, Social Cognition  John Bargh
A course in contemporary social cognition theory and research, in which students fully participate in each week’s class discussion of the assigned readings. The goal is to bring students up to speed, not only as to the major themes and programs of research today, but also the historical roots and context of that research—in other words, why that research is being done in the first place. TH 9:25–11:15

[PSYC 510b*, Thinking]

[PSYC 511b, Cognitive Development]

PSYC 512b, Affective Science  June Gruber
Core course in affective science. Topics include definitional issues in emotion; evolutionary theories of emotion; morality and emotion; culture and gender differences; physiological (autonomic, neural, genetic) aspects of emotion responding; emotion regulation; social relationships and emotion dynamics; development trajectories of emotion; and abnormal emotions in psychopathology. Class is discussion-based. Active attendance and participation are required. TH 9:25–11:15

[PSYC 514a*, Topics in Infant Studies]

PSYC 518a, Multivariate Statistics  John Dovidio
Introduction to the analysis of quantitative data from experiments—primarily the analysis of variance and contrast analyses. Some coverage of correlation and regression. Required of first-year students except with instructor’s permission. MWTH 1:30–2:20

[PSYC 521b*, Multivariate Statistics with Observable Variables]

[PSYC 522a*, Mapping the Human Brain]

[PSYC 523a, Cognitive Neuroscience]

PSYC 526a*, Research Methods in Human Neuroscience  Gregory McCarthy
This laboratory course provides students with experience in the major methods used in human neuroscience research. The focus is on functional magnetic resonance imaging, electroencephalography, and evoked potentials. Psychophysiological techniques such as the measurement of skin conductance are also covered, but in less detail. Students acquire a firm understanding of each technique, and design experiments, acquire data, and perform analyses. The course makes extensive use of MATLAB. F 12–4

[PSYC 531a*, Psychopharmacology]
[PSYC 534a, Research Methods in Clinical Psychology]

[PSYC 535a/C&MP 535a/NSCI 645a, Foundations of Behavioral Neuroscience]

[PSYC 539b, Advanced Psychopathology]

PSYC 541a, Research Methods in Psychology  Alan Kazdin
Research design, methodology, and evaluation considered in the context of clinical research. Emphasis on experimental and quasi-experimental designs, threats to validation, confounding, sources of artifact and bias, alternative assessment strategies, and data evaluation methods. T 1:30–3:20

[PSYC 543a, Motivation]

PSYC 551aU, Research Methods in Happiness  June Gruber
Methods of research in happiness and human emotion. Focus on psychophysiology, behavioral observation and coding, and self-report assessments of emotion response. Students learn experimental design, acquire data, perform analyses in SPSS, and submit written research projects. Weekly lecture and hands-on laboratory sessions. TH 9:25–11:15

PSYC 553a/MGMT 753a, Behavioral Decision Making I: Choice  Nathan Novemsky, Ravi Dhar
The seminar examines research on the psychology of decision making, focusing on choice. Although the normative issue of how choice should be made is relevant, the descriptive issue of how choices are made is the main focus of the course. Topics of discussion include choice framing and mental accounting, prospect theory and loss aversion, context effects, task effects, goal-directed choice, preference reversals, intertemporal choice, and behavioral economics, among others. The goal of the seminar is threefold: to foster a critical appreciation of existing research in behavioral decision theory as applied to consumer choice, to develop the students’ skills in identifying and testing interesting research ideas, and to explore research opportunities for adding to that knowledge. Students generally enroll from a variety of disciplines including cognitive and social psychology, behavioral economics, finance, marketing, political science, medicine, and public health.

[PSYC 556bU, Developmental Psychopathology]

[PSYC 557a, Social and Emotional Relationships]

[PSYC 575bU, Brain and Behavior]

[PSYC 582b/NBIO 582b/NSCI 582b/PHYS 582b, Introduction to Computational Neuroscience]

PSYC 601b, The Science of Science Communication  Dan Kahan
The simple dissemination of valid scientific knowledge does not guarantee it will be recognized by non-experts to whom it is of consequence. The science of science communication is an emerging, multidisciplinary field that investigates the processes that enable ordinary citizens to form beliefs consistent with the best available scientific evidence, the conditions that impede the formation of such beliefs, and the strategies that can be employed to avoid or ameliorate such conditions. This seminar surveys, and makes a modest attempt to systematize, the growing body of work in this area. Special attention
is paid to identifying the distinctive communication dynamics of the diverse contexts in which non-experts engage scientific information, including electoral politics, governmental policy making, and personal health decision making. M 2:30–4:30

**PSYC 607bu, Cognitive Science of Causality**  Frank Keil
Examination of how people and animals track causal patterns in the world around them. Topics include the perception of causality; mechanistic, teleological, and psychological causation; variations in causal thinking across domains; the role of counterfactuals; biases and heuristics in causal thought; and the development of causal thinking. M 1:30–3:20

[**PSYC 608bu, Cognitive Science of Ignorance**]
[**PSYC 610au, The Modern Unconscious**]
[**PSYC 611bu, What We Eat and Why**]
[**PSYC 613bu, Mind, Brain, and Society**]

**PSYC 615a, Psychology, Psychotherapy, History, Systems, and Practice**  Sarah Rabbitt
This course focuses on the major philosophical and scientific underpinnings of psychology and psychotherapy. W 9:25–11:15

**PSYC 618bu, The Social Brain**  Gregory McCarthy
Selected topics in the field of social neuroscience, including animacy and the attribution of intention from motion, thinking about the self and others, and moral judgments. F 1:30–3:20

[**PSYC 619au, Food Policy and Science**]
[**PSYC 621bu, Cognitive Science of Pleasure**]
[**PSYC 623bu, Cognitive Science of Good and Evil**]
[**PSYC 624bu, The Psychology of Legitimacy**]

**PSYC 625bu, Social Perception**  Brian Scholl
When exploring the structure of the mind, we typically think of visual perception as among the earliest and most basic of our cognitive processes, while we think of social cognition as among the most advanced forms of higher-level cognition. In this seminar we explore how these two aspects of the mind connect. Specific topics include the perception of animacy, agency, and goal-directedness; biological motion; face perception (including the perception of facial attractiveness); gaze processing and social attention; thin-slicing and perceptual stereotypes; and social and cultural influences on perception. TH 1:30–3:20

[**PSYC 627a, Topics in Infant Studies**]
[**PSYC 632bu, Food and the Brain**]

**PSYC 646a/LAW 20627, Social Science in Law**  Tom Tyler
An introduction to the use of social science in law. Three general topics are considered. First, the use of social science evidence in adjudication. This includes eyewitness
identification, lie detection, and other types of evidence. The second topic is decision making. How do judges and juries make their decisions? Finally, the course examines the use of social science evidence to make substantive “Legislative facts.” This includes the use of evidence on integration and obscenity. Across all these areas the use that legal authorities make of social science “facts” is reviewed and evaluated. Prerequisite: permission of the instructor. Follows Law School academic calendar. MW 1:40–3

**PSYC 647b/LAW 21496, Social Science and Institutional Design**  Tom Tyler

The current legal system bases many of its policies and practices upon assumptions concerning human nature. What does research tell us about how those policies and practices actually operate? What alternative social science models are available and how would institutions be different if those models were used? This class considers deterrence models and compares them to models emphasizing legitimacy, morality, and social norms. The theories underlying current policies and practices in policing, the courts, and corrections are examined and evaluated against available empirical evidence. The class also considers alternative models of institutional design and evidence of their potential or actual effectiveness. Prerequisite: permission of the instructor. Follows Law School academic calendar. MW 1:40–3

**[PSYC 648b/NSCI 648b, Cellular Analysis of Learning and Memory: Vertebrate Model Systems]**

**[PSYC 650a/LING 660a, Topics in Syntax: The Mental Lexicon]**

**PSYC 654b, Sensory Information Processing**  Lawrence Marks

A functional examination of the ways that sensory systems transduce stimulus energies and information. Topics include sensory anatomy and physiology, psychological analysis of the qualitative dimensions of sensory experience, selective attention, and interactions among sensory, perceptual, and cognitive mechanisms. T 3:30–5:20

**PSYC 657a/CDE 505a, Social and Behavioral Foundations of Health**  Marney White

The course provides students with an introduction to social and behavioral science issues that influence patterns of health and health care delivery. The focus is on the integration of biomedical, social, psychological, and behavioral factors that must be taken into consideration when public health initiatives are developed and implemented. The course emphasizes the integration of research from the social and behavioral sciences with epidemiology and biomedical sciences. TH 1–2:50

**PSYC 664a/CDE 531a, Health and Aging**  Becca Levy

Since 1900 the number of individuals aged sixty-five and older has tripled and life expectancy has increased by about thirty years. The course examines some of the health issues related to this growing segment of the population. Class discussions address such questions as: How does the aging process differ between cultures? What kinds of interventions can best reduce morbidity in old age? How can health policy adapt to the aging populations? The course integrates psychosocial and biomedical approaches.

**[PSYC 670b, Personality and Individual Differences]**
PSYC 671a, The Cognitive Science of Mind Reading  Laurie Santos
Examination of theory of mind from a developmental, comparative, and neural perspective. Topics include whether different representational systems underlie theory of mind capacities, how infants come to represent others’ mental states, whether nonhuman animals share humanlike theory of mind capacities, and how phenomena like conformity and metacognition can be reconciled with developmental and neural findings in the domain of mind reading. T 9:25–11:15

PSYC 684a, Introduction to Psychotherapy: Technique  Marney White
Introduction to basic clinical skills and clinical issues. Topics for discussion include developing a therapeutic relationship, barriers to effective communication, strategies for managing resistance, and developing a professional identity. Class format includes informal discussion, assigned readings, and student case presentations. Prerequisite: permission of the instructor. Enrollment limited to fifteen.

PSYC 684b, Introduction to Psychotherapy: Technique  Marney White
The focus of the seminar is on formulating and conceptualizing psychological problems from a cognitive-behavioral perspective. Special consideration is paid to individual and cultural diversity in conceptualizing cases and planning treatment. Also discussed are ways in which cognitive-behavioral perspectives can be integrated with other theoretical orientations (e.g., interpersonal theory, experiential therapy).

PSYC 689a, Psychopathology and Diagnostic Assessment  David Klemanski
Didactic practicum for first-year clinical students. Main emphasis is initial assessment. Treatment planning and evaluation of progress also covered. Students first observe and then perform initial interviews. Applicable ethics and local laws reviewed. M 2:30–4:20

PSYC 690b, Ethics and Clinical Practice: Legislation and Diversity Issues  David Klemanski
Introduction to ethical and legal guidelines for clinical practice. In addition, supervision on diagnostic interview using the Structured Clinical Interview for DSM-IV is provided.

PSYC 702, Current Work in Cognition  Marvin Chun
A weekly seminar in which students, staff, and guests report on their research in cognition and information processing. T 11:35–12:50

PSYC 704, Current Work in Behavioral Neuroscience  Thomas Brown
An informal student/faculty seminar in which each participant chooses, lays groundwork for, and presents some current work in behavioral neuroscience. Currently emphasizes the psychobiology of learning, but involves a variety of research approaches, designs, and methods. F 11:35–12:50

PSYC 708, Current Work in Developmental Psychology  Kristina Olson
A luncheon meeting of the faculty and graduate students in developmental psychology for reports of current research and discussion on topics of general interest. W 11:35–12:50

PSYC 710, Current Work in Social Psychology and Personality  John Dovidio
Faculty and students in personality/social psychology meet during lunchtime to hear about and discuss the work of a local or visiting speaker. M 11:35–12:50
PSYC 711, Current Work in Child Development and Social Policy  Walter Gilliam, Pia Rebello Britto
A series of lectures by guest speakers from academia, various levels of government, community organizations, service agencies, the business world, and the media. Speakers discuss their work and its social policy implications. Topics may include early childhood education, child care, intervention programs for children and families, education reform, mental health, child and family policies, research at the intersection of psychology and social policy, and media presentation of child and family issues, among others. F 10:35–12:25

PSYC 720, Current Work in Clinical Psychology  Kelly Brownell
Basic and applied current research in clinical and community psychology is presented by faculty, visiting scientists, and graduate students, and examined in terms of theory, methodology, and ethical and professional implications. TH 11:35–12:50

PSYC 721, Research Topics in Infant Cognition  Karen Wynn
Investigation of various topics in infant cognition: early mechanisms for representing and reasoning about number; infants’ ability to represent time; early object knowledge; foundations of intentional understanding. Prerequisite: permission of the instructor.

PSYC 722, Research Topics in Food, Nutrition, and Obesity  Kelly Brownell
In-depth discussion and analysis of current research topics on bulimia, anorexia nervosa, and obesity. Topics include, but are not limited to, physiology, cultural influences, treatment studies, body image, binge eating, and epidemiology.

PSYC 723, Research Topics in Child and Adolescent Therapy  Alan Kazdin
The course focuses on the development and execution of research related to child and adolescent treatment, and the factors with which clinical dysfunction and therapeutic change are associated.

PSYC 725, Research Topics in Human Neuroscience  Gregory McCarthy
Discussion of current and advanced topics in the analysis and interpretation of human neuroimaging and neurophysiology.

PSYC 726, Research Topics in Mood Regulation and Mental Health  Susan Nolen-Hoeksema
We discuss a range of topics related to mood regulation and psychological disorders, including models of depression, anxiety, and related disorders. We also discuss how gender impacts vulnerability to emotional problems, and how gender-related factors may serve to protect against certain types of psychopathology.

PSYC 729, Research Topics in Language and Cognition  Paul Bloom
Seminar focusing on ongoing research projects in language, cognition, and development. Prerequisite: permission of the instructor.

PSYC 731, Research Topics in Cognition and Development  Frank Keil
A weekly seminar discussing research topics concerning cognition and development. Primary focus on high-level cognition, including such issues as the nature of intuitive or
folk theories, conceptual change, relations between word meaning and conceptual structure, understandings of divisions of cognitive labor, and reasoning about causal patterns.

**PSYC 732, Research Topics in Visual Cognitive Neuroscience**  
Marvin Chun  
Examines current research in visual cognitive neuroscience, including discussion of proposed and ongoing research projects. Topics include visual attention, perception, memory, and contextual learning.

**PSYC 735, Research Topics in Thinking and Reasoning**  
Woo-kyoung Ahn  
In this lab students explore how people learn and represent concepts. Weekly discussions include proposed and ongoing research projects. Some topics include computational models of concept acquisition, levels of concepts, natural kinds and artifacts, and applications of some of the issues.

**PSYC 736, Research Topics in Stereotyping and Prejudice**  
John Dovidio  
Explores the nature of prejudice in its traditional and contemporary forms. Although the emphasis is on the causes and consequences of racial bias in the United States, the dynamics of intergroup relations are considered more broadly as well. Emphasis is on developing critical thinking, reading, and research skills to test ideas relevant to understanding and combating stereotyping, prejudice, and discrimination.

**PSYC 739, Research Topics in Autism and Related Disorders**  
Fred Volkmar  
Focus on research approaches in the study of autism and related conditions including both psychological and neurobiological processes. The seminar emphasizes the importance of understanding mechanisms in the developmental psychopathology of autism and related conditions.

**PSYC 741, Research Topics in Emotion and Relationships**  
Margaret Clark  
Members of this laboratory read, discuss, and critique current theoretical and empirical articles on relationships and on emotion (especially those relevant to the functions emotions serve within relationships). In addition, ongoing research on these topics is discussed along with designs for future research.

**PSYC 747, Research Topics in Affective Neuroscience**  
Glenn Schafe  
This laboratory course studies the neurobiological substrates of emotion, with particular emphasis on Pavlovian fear conditioning. We cover the current literature in fear conditioning, ranging from studies that emphasize the behavior/systems level of analysis to those that emphasize the cellular and/or molecular.

**PSYC 749, Research Topics in Memory**  
Marcia Johnson  
Examines current research on cognition and memory, including discussion of proposed and ongoing research projects. Topics include issues in design, analysis, and interpretation of empirical studies exploring human memory.

[**PSYC 750b/C&MP 750b/NSCI 614b, Research Topics in the Neurobiology of Learning and Memory**]
PSYC 766, Research Topics in Perception and Cognition  Brian Scholl
Seminar-style discussion of recent research in perception and cognition, covering both recent studies from the literature and the ongoing research in the Yale Perception and Cognition Laboratory.

PSYC 767, Research Topics in Emotion, Health, and Social Behavior  Peter Salovey
A forum for graduate students conducting research in the Health, Emotion, and Behavior Laboratory.

PSYC 771, Research Topics in Nonconscious Processes  John Bargh
The lab group focuses on nonconscious influences of motivation, attitudes, social power, and social representations (e.g., stereotypes) as they impact interpersonal behavior, as well as the development and maintenance of close relationships.

PSYC 775, Research Topics in Animal Cognition  Laurie Santos
Investigation of various topics in animal cognition, including what nonhuman primates know about tools and foods; how nonhuman primates represent objects and number; whether nonhuman primates possess a theory of mind. Prerequisite: permission of the instructor.

PSYC 777, Research Topics in Gender and Psychology  Marianne LaFrance
The “Gender Lab” meets weekly to consider research being done in the department that bears on some gender-related issue.

PSYC 801, Clinical Internship (Child)
Advanced training in clinical psychology with children. Adapted to meet individual needs with location at a suitable APA-approved internship setting.

PSYC 802, Clinical Internship (Adult)
Advanced training in clinical psychology with adults. Adapted to meet individual needs with location at a suitable APA-approved internship setting.

PSYC 806, Practicum in Childhood Intervention
Advanced supervised work in settings where child and family policies are developed and/or implemented. Adapted to meet individual needs with location at suitable sites.

PSYC 808, Practicum in Child Psychology
The Yale Child Study Center offers a yearlong practicum, which includes assessment of children, psychotherapy, team meetings, supervision, and didactic experiences.

PSYC 809, Practicum in Assessment of School-Aged Children
Students gain practical experience in testing with children.

PSYC 810, Practicum in Developmental Assessment  Linda Mayes
Practicum in early childhood screening and assessment of infants and toddlers at high risk for social adaptive and emotional developmental problems.

PSYC 811, Anxiety Disorders Practicum
Discussion of current topics in psychopathology and treatment of anxiety disorders. Group supervision of therapy cases involving OCD, panic, social phobia.
PSYC 812, Conduct Problem Practicum  Alan Kazdin
Provides training in the diagnosis, assessment, and treatment of aggressive and antisocial children and their families. Prerequisite: permission of the instructor.

PSYC 813, Eating and Weight Disorders Practicum  Kelly Brownell, Marlene Schwartz
Practical work for graduate students in clinical psychology on therapeutic interventions for eating and weight disorders. Assessment, diagnosis, and treatment are covered.

PSYC 815, Mood Disorders Practicum  David Klemanski
Supervised practicum in the assessment and treatment of mood disorders, with an emphasis on cognitive-behavioral perspectives.

PSYC 816b, Practicum in Developmental Disabilities and Developmental Assessment  Fred Volkmar, Ami Klin
An introduction to approaches in developmental assessment in infants and young children (under age five years) with a range of developmental difficulties. Students observe and/or participate in developmental assessments. Students are exposed to a range of assessment instruments including developmental tests, speech-communication assessments, and psychiatric diagnostic instruments appropriate to this age group. Prerequisite: permission of the instructor.

PSYC 817, Other Clinical Practica
For credit under this course number, clinical students register for practicum experiences other than those listed elsewhere in clinical psychology, so that transcripts reflect accurately the various practicum experiences completed.

PSYC 883, Practicum in Clinical Assessment  Donald Quinlan
Supervised psychological assessment using measures of intellectual functioning, projective testing, and neuropsychological testing with patients.

PSYC 923, Individual Study: Theme Essay
By arrangement with faculty.

PSYC 925, Individual Tutorial
By arrangement with faculty and approval of director of graduate studies.

PSYC 930, Predissertation Research
By arrangement with faculty.
PUBLIC HEALTH
60 College Street, 203.785.6383
http://medicine.yale.edu/ysph
M.S., M.Phil., Ph.D.

Dean
Paul Cleary

Director of Graduate Studies
Christian Tschudi (203.785.6383)

Director of Medical Studies
Mayur Desai

Director of Medical Research
Elizabeth Claus

Professors  Serap Aksoy, Michelle Bell (Forestry & Environmental Studies), Elizabeth Bradley (on leave), Michael Bracken, Kelly Brownell (Psychology), Richard Bucala (Internal Medicine), Michael Cappello (Pediatrics), Elizabeth Claus, Paul Cleary, Erol Fikrig (Internal Medicine), Durland Fish, Robert Heimer (on leave [F]), Theodore Holford, Jeannette Ickovics, Edward Kaplan (School of Management), Albert Ko, Harlan Krumholz (Internal Medicine), Brian Leaderer, Robert Makuch, Lawrence Marks, Susan Mayne, Diane McMahon-Pratt, I. George Miller (Pediatrics), A. David Paltiel, Peter Peduzzi (on leave [Sp]), Rafael Pérez-Escamilla, Jeffrey Powell (Ecology & Evolutionary Biology), Harvey Risch, Robert Rosenheck (Psychiatry), Peter Salovey (Psychology), Mark Schlesinger, Jody Sindelar, Mary Tinetti (Internal Medicine), Christian Tschudi, Daniel Zelterman, Heping Zhang, Hongyu Zhao, Tongzhang Zheng

Associate Professors  Susan Busch, Rani Desai (Psychiatry), David Fiellin (Internal Medicine), Jason Fletcher, Alison Galvani, Josephine Hoh (on leave [Sp]), Melinda Irwin, Amy Justice (Internal Medicine), Trace Kershaw, Douglas Leslie (Psychiatry), Becca Levy, Haiqun Lin, Judith Lichtman, Shuangge Ma, Xiaomei Ma, Ingrid Nembhard, Melinda Pettigrew, Jennifer Ruger, Nina Stachenfeld (Obstetrics, Gynecology & Reproductive Sciences), Yawei Zhang, Yong Zhu

Assistant Professors  Achyuta Adhvaryu, Xi Chen, Zack Cooper, Forrest Crawford, Andrew DeWan, Maria Diuk-Wasser, Adrienne Ettinger, Jhumka Gupta, Elisa Long (School of Management), Joan Monin, Sunil Parikh, Virginia Pitzer, Fatma Shebl, Zuoheng (Anita) Wang, Bingqing (Theresa) Zhou

Fields of Study
Programs of study are offered in the areas of Biostatistics, Chronic Disease Epidemiology, Environmental Health Sciences, Health Policy and Management, and Epidemiology of Microbial Diseases (infectious disease epidemiology, vector-borne diseases, immunology, and parasitology). The Social and Behavioral Program (SBS), within the Chronic
Disease Epidemiology department, offers students specialized instruction in the theory and methods of the social and behavioral sciences. All programs are under the faculty of the School of Public Health.

**Special Admissions Requirements**

Applicants should have a strong background in the biological and/or social sciences. Students pursuing a Biostatistics specialty should have a strong background in mathematics. The GRE General Test is required. The TOEFL is required of all applicants whose native language is not English. This requirement is waived only for applicants who will have received a baccalaureate degree, or its foreign equivalent, prior to matriculation at Yale, from a college or university where English is the primary language of instruction. If you do not qualify for a waiver but have taken the TOEFL within the last two years, you will need to have your TOEFL scores released to us (code 3987).

**Academic Requirements**

The normal requirement for the degree of Doctor of Philosophy can be up to six years of graduate study. The average time to completion for students in Public Health is five years. Generally the first two years are devoted primarily to course work and rotations for students in some areas. All doctoral students are required to successfully complete a minimum of ten graduate-level courses and must satisfy the individual departmental requirements. Courses such as Dissertation Research, Preparing for Qualifying Exams, Research Ethics and Responsibilities, or Seminar do not count toward the course requirements. However, students must register for these “courses” in order for them to appear on the transcript.

All students must enroll in and complete training in Research Ethics and Responsibilities (EPH 600b). This course will introduce and prepare students for responsible conduct in research, including data acquisition and management, mentor/trainee responsibilities, publication practices and authorship standards, scientific misconduct, and conflict of interest. Research Ethics and Responsibilities will be offered annually and is graded Satisfactory/Unsatisfactory. Students must take this course prior to the end of the first year.

The Graduate School uses grades of Honors, High Pass, Pass, or Fail. Students are required to earn a grade of Honors in at least two full-term courses in the first two years, and are expected to achieve a High Pass average. (This applies to courses taken after matriculation in the Graduate School and during the nine-month academic year.) The Honors requirement must be met in courses other than those concerned exclusively with dissertation research and preparation. See Course and Honors Requirements for more details.

The special course requirements for each department are: Biostatistics, an average of three to four courses per term plus seminars and colloquia; Chronic Disease Epidemiology, an average of three to four courses per term plus seminars and colloquia; Environmental Health Sciences, an average of three to four courses per term plus seminars and colloquia; Epidemiology of Microbial Diseases, two years of course work, lab rotations, and seminars developed with a faculty adviser; Health Policy and Management, an average of three to four courses per term plus seminars and colloquia.
Teaching is regarded as an integral aspect of the graduate training program. Doctoral students are required to satisfactorily complete four terms as Teaching Fellows (10 hours/week). These teaching experiences are typically completed during the second and third years of study. First-year students are encouraged to focus their efforts on course work and in most instances are not permitted to serve as Teaching Fellows. First-year students may be allowed to serve as Teaching Fellows if they have been awarded advanced standing. Advanced standing is available only to students who have completed previous graduate study at Yale (e.g., the M.P.H. program); see Transfer Credit and Advanced Standing. If a student has been awarded one year of advanced standing, he/she will be allowed to teach both fall and spring terms of the first year. If a student has been awarded one term of advanced standing, he/she will be allowed to teach only during the spring term of the first year. Students interested in serving as Teaching Fellows during their first year of doctoral study should submit a petition to the director of graduate studies (DGS) well before the start of the term in which they hope to participate in a course.

All doctoral students are required to complete 40 hours (four Level 2 assignments at 10 hours/week or an equivalent combination) as a Teaching Assistant. Graduate research assistantship opportunities may take the place of teaching in the third year of study. Furthermore, a waiver of 10 hours is possible if the student is working as a project assistant (generally no more than 10 hours per week and with prior approval of the DGS). By year four, all students are engaged in full-time research activities.

**Special Requirements for the Ph.D. Degree**

At the end of years one and two, advisers will be asked to complete a progress report for each student evaluating his/her academic progress and describing his/her readiness for teaching and/or conducting research. This is then discussed with the student and reviewed by the DGS. Students who have not progressed adequately will be asked to meet with the DGS to address the situation. Advisers of students in year three who have not been admitted to candidacy by May of that year will also be asked to complete a progress report. Once a student is admitted to candidacy, he/she is required by the Graduate School to complete an annual Dissertation Progress Report.

To be admitted to candidacy, students must: (1) satisfactorily complete the course requirements for their department as outlined in the most current School of Public Health Bulletin, achieving grades of Honors in at least two full-term courses and achieving an overall HP average; (2) obtain an average grade of High Pass on the qualifying examination; and (3) submit a dissertation prospectus. The qualifying examination must be taken by the end of the second full academic year. With the assistance of the faculty adviser, each student requests appropriate faculty members to join a dissertation advisory committee (DAC). The dissertation prospectus must be approved within a year of passing the qualifying examination.

The DAC reviews and approves the prospectus as developed by the student and recommends to the DGS and the Graduate Studies Executive Committee that the prospectus be approved. Each DAC is expected to meet as a group at least twice each year, and more frequently if necessary. The student schedules meetings of the DAC. The chair/adviser of the DAC produces a summary evaluation of progress and plans for the coming year. This document is to be distributed to each committee member for comments and signature.
Each student and the DGS are to receive a copy of the signed document from the DAC chair/adviser.

After approval of the prospectus, the DAC reviews the progress of the dissertation research and decides when the dissertation is ready to be submitted to the readers. At that time the chair/adviser of the DAC submits its recommendation to the DGS and the Graduate Studies Executive Committee, and its recommendation of suitable readers.

Doctoral dissertations originating in Public Health must be presented in a public seminar. This presentation is scheduled after the submission of the dissertation to the readers and preferably prior to the receipt and consideration of the readers’ reports. At least one member of the DAC supervising the dissertation and at least one member of the Graduate Studies Executive Committee are required to attend the presentation.

**Master’s Degrees**

**M.Phil. (en route to the Ph.D.)** Students who have completed all requirements for the Ph.D. except the dissertation may petition the Graduate School for the Master of Philosophy degree.

**Terminal Master’s Degree Program** The School offers a terminal master’s degree program leading to an M.S. in Public Health in two specialty areas: Biostatistics (a two-year program) and Chronic Disease Epidemiology (a one-year program). All students must fulfill both the departmental and Graduate School requirements for a terminal M.S. degree.

Students must have an overall grade average of High Pass, including a grade of Honors in at least one full-term graduate course (for students enrolled in the one-year program in Chronic Disease Epidemiology) or in at least two full-term graduate courses (for students enrolled in the two-year program in Biostatistics). In order to maintain the minimum average of High Pass, each grade of Pass must be balanced by one grade of Honors. For more details, please see Course and Honors Requirements under Policies and Regulations.

A Biostatistics or Chronic Disease Epidemiology student who is withdrawing from the Ph.D. program, and has successfully completed all required course work for the terminal M.S. degree (described below), may apply and be recommended for the M.S. in Public Health. In other departments (Environmental Health Sciences, Epidemiology of Microbial Diseases, or Health Policy and Management) students must have successfully completed (prior to withdrawal) at least ten courses in the doctoral program and a capstone experience, achieving a minimum of one Honors grade and an overall HP average.

**FIELDS OF STUDY**

**Terminal M.S. in Biostatistics**

Faculty in the Biostatistics department of the School of Public Health offer a two-year terminal Master of Science degree. Fields include clinical trials, epidemiologic methodology, statistical genetics, and mathematical models for infectious diseases.

*Requirements for M.S. in Biostatistics* Applicants should have a strong background in quantitative sciences such as mathematics. In addition, it is recommended that applicants have undergraduate course work in the biological and social sciences. At a minimum,
applicants would have taken one year of calculus and a course in linear algebra prior to enrolling in this program.

The GRE General Test is required. The TOEFL is required of all applicants whose native language is not English. This requirement is waived only for applicants who will have received a baccalaureate degree, or its foreign equivalent, prior to matriculation at Yale, from a college or university where English is the primary language of instruction. If you do not qualify for a waiver but have taken the TOEFL within the last two years, you will need to have your TOEFL scores released to us (code 3987).

A minimum of twelve courses must be completed, and a grade of Honors achieved in at least two courses with an overall grade average of High Pass. An acceptable master’s thesis must be submitted.

Terminal M.S. in Chronic Disease Epidemiology
Faculty in the Chronic Disease Epidemiology department of the School of Public Health offer a one-year terminal Master of Science degree. This one-year program is designed for medical and health care professionals (e.g., M.D., Ph.D., D.V.M., D.D.S., D.M.D.) who seek the skills necessary to conduct epidemiological research in their professional practice.

Requirements for M.S. in Chronic Disease Epidemiology Applicants should have a basic understanding of quantitative science and statistics. It is recommended that candidates have strong science backgrounds and demonstrated competency in statistical analysis and logical thinking. Applicants from rigorous programs in the biological or social sciences will be given preference. At a minimum, applicants should have one year of course work in statistics or equivalent prior to enrolling in this program. Part-time enrollment is not encouraged.

Applicants must take the GRE General Test. Students whose native language is not English must take the TOEFL or IELTS examination.

A minimum of ten courses must be completed and a grade of Honors achieved in at least one course. It is expected that this program will be completed during a single academic year. Satisfactory completion of the capstone experience is required. Examples of a capstone experience are completion of an NIH-type grant application that is deemed reasonably competitive by a faculty member; completion of a manuscript that is suitable for submission for publication; completion of a systematic review deemed eligible for publication. Manuscripts and grant applications may be derived from any of the courses taken by the student.

M.D./Ph.D. Program Requirements for Public Health
All M.D./Ph.D. students must meet with the DGS in Public Health as soon as they affiliate. Students in this program are expected to meet the guidelines listed below in the timeframe outlined. The DGS must approve any variations to these requirements.

TEACHING
One term of teaching as a TA 2 (10 hours/week) is required. If a student has served as a teaching assistant elsewhere on campus, this experience may be counted toward the requirement. DGS approval is required to waive the teaching requirement on the basis of previous Yale teaching experience.
ROTATIONS/INTERNSHIPS

Students should do two four-week rotations/internships with potential advisers in the School of Public Health. These short-term research projects will be with a specific Principal Investigator and can be either in a lab, or field work, or analysis of an existing dataset. The purpose of these rotations/internships is to learn lab or field technique and to allow the student time to determine if the PI’s research interests are compatible with his/her research interests. These rotations/internships are usually done during the summer between the first and second years of medical school course work. In some cases, a student may need to defer this activity until the summer after the second year after taking certain courses and/or completing readings so that he/she possesses the background necessary for a successful rotation/internship.

REQUIRED COURSE WORK

M.D./Ph.D. students are generally expected to take the same courses as traditional Ph.D. students. Departmental requirements may vary; therefore students should confer with the DGS and their Ph.D. adviser.

TIMELINE FOR QUALIFYING EXAM

Students generally take medical school courses in years one and two, then Public Health doctoral course work in years three and four. The qualifying exam is generally completed by the summer following the fourth year.

PROSPECTUS TIMELINE

Students are encouraged to develop their prospectus during their third and fourth years of study, while taking courses in the School of Public Health. Upon completion of the qualifying exam, students should focus entirely on completion of the prospectus, which should be submitted no later than six months after the completion of the qualifying exam.

Ph.D. or terminal M.S. degree program materials are available upon request to the Office of the Director of Graduate Studies (c/o M. Elliot), School of Public Health, Yale University, PO Box 208034, New Haven CT 06520-8034; 203.785.6383; e-mail, melanie.elliot@yale.edu.

Courses for all Public Health Graduate School Degrees

Chair
Christine Hayes

Director of Graduate Studies
Dale Martin

Professors  Harold Attridge (Divinity), Gerhard Böwering, Yochanan Breuer (Visiting), Adela Yarbro Collins (Divinity), John J. Collins (Divinity), Vasudha Dalmia, John Darnell (Near Eastern Languages & Civilizations), Stephen Davis, Carlos Eire, Steven Fraade, Bruce Gordon (Divinity), Philip Gorski (Sociology), Phyllis Granoff, Frank Griffel, John Hare (Divinity), Christine Hayes, Jennifer Herdt (Divinity), Richard Kalmin (Visiting), Bentley Layton, Ivan Marcus, Dale Martin, Harry Stout, Kathryn Tanner (Divinity), Emilie Townes (Divinity), Denys Turner, Miroslav Volf (Divinity), Robert Wilson

Associate Professors  Christopher Beeley (Divinity), Kathryn Lofton, Hindy Najman, Carolyn Sharp (Divinity)

Assistant Professors  Zareena Grewal (American Studies), Noreen Khawaja, Andrew Quintman, Eliyahu Stern

Senior Lecturers  Koichi Shinohara, David H. Smith (Political Science)

Lecturers  Hugh Flick, Jr., Margaret Olin, George Syrimis

Fields of Study

Special Admissions Requirement
The department requires the scores of the GRE General Test and previous study in areas relevant to the chosen field of study, including ancient languages where applicable.

Special Requirements for the Ph.D. Degree
Twelve term courses must be completed, in which the Graduate School Honors requirement must be met. Proficiency in two modern scholarly languages, normally French and German, must be shown, one before the end of the first year, the other before the beginning of the third; this may be done by passing an examination administered by the department, by accreditation from a Yale Summer School course designed for this
purpose, or by a grade of A or B in one of Yale’s intermediate language courses. Mastery of the languages needed in one’s chosen field (e.g., Chinese, Hebrew, Greek, Japanese) is also required in certain fields of study. A set of four qualifying examinations is designed for each student, following guidelines and criteria set by each field of study; these are normally completed in the third year. The dissertation prospectus must be approved by a colloquium, and the completed dissertation by a committee of readers and the departmental faculty. Upon completion of all predissertation requirements, including the prospectus, students are admitted to candidacy for the Ph.D. This is expected before the seventh term in American Religious History, Philosophy of Religion, Religious Ethics, and Theology; before the eighth term in other fields. Students begin writing their dissertation in the fourth year and normally will have finished by the end of the sixth. There is no oral examination on the dissertation.

In the Department of Religious Studies, the faculty considers learning to teach to be an important and integral component of the professional training of its graduate students. Students are therefore required to teach as teaching fellows for at least two years during their graduate programs. Such teaching normally takes place during their third and fourth years, unless other arrangements are approved by the director of graduate studies.

A combined Ph.D. degree is available with African American Studies. Consult department for details.

Master’s Degrees

M.Phil. and M.A. (both en route to the Ph.D.) See Degree Requirements under Policies and Regulations. Students in Religious Studies must take seven courses to be eligible for the M.A. degree. Additionally, students in Religious Studies are eligible to pursue a supplemental M.Phil. degree in Medieval Studies. For further details, see Medieval Studies.

Prospective students must apply in one of the ten fields of study, and when requesting information they should specify their particular field of interest. Program materials are available upon request to the Registrar, Department of Religious Studies, Yale University, PO Box 208287, New Haven CT 06520-8287.

Courses

RLST 510a, Methods and Theory  Noreen Khawaja
The seminar provides a context for doctoral students to read and discuss major thinkers and books (scholarly “classics”) in the academic study of religion in the twentieth century (Weber, Durkheim, Geertz, Mary Douglas, Peter Berger) as well as theorists important for literary and social studies, such as Foucault, Derrida, Judith Butler, Edward Said, Gayatri Spivak, and Homi Bhabha. The course concludes with attention to examples of contemporary religious studies. W 3:30–5:20

RLST 522a/HIST 565a, Early Modern Spain  Carlos Eire
Reading and discussion in sixteenth- and seventeenth-century Spanish texts (all available in English translation) and also in recent scholarship on early modern Spain. TH 3:30–5:20
RLST 559b, Prakrit Texts  Phyllis Granoff
This is an advanced course in reading Jain Prakrit, canonical and postcanonical literature.  T 3:30–5:20

[RLST 584a, Introduction to the Chinese Buddhist Canon]

RLST 585b, Material Culture in Asian Religions  Koichi Shinohara
This seminar is designed as a forum in which students can begin developing substantial research papers in their respective fields of specialization. The term begins with a series of assigned readings; participants are asked to post reading responses for the entire class each week and come to class prepared to discuss each other’s responses. The second half of the course is devoted to the presentation of paper proposals and focused discussions of the previously circulated examples of primary source material on which the arguments in the research papers are to be based.  T 3:30–5:30

RLST 586a, Readings in Jain and Buddhist Texts  Phyllis Granoff
An advanced course in which we read selections from the Pali Buddhist commentaries and selections from Jain Prakrit texts. Prerequisite: while no knowledge of Pali or Prakrit is required, students should have had at least two years of Sanskrit.  T 1:30–3:20

[RLST 587b, Buddhist Hybrid Sanskrit]

RLST 601b/REL 593b, Pseudepigraphy  Adela Collins
Required for doctoral students in New Testament and History of Ancient Christianity. We examine and discuss the range of current opinion on the production and reception of pseudepigraphical works in the Hebrew Bible, Second Temple Jewish texts, the New Testament, other early Christian literature, and selected Hellenistic and Roman texts.  W 3:30–5:20

RLST 602a/EGYP 511a, Introduction to Coptic Literature  Bentley Layton
Close analysis of selected Coptic texts in various genres. Prerequisite: EGYP 510.  MW 9–10:15

RLST 605a, Greco-Roman Environment of the New Testament  Dale Martin
An introduction for advanced students to the religious, philosophical, and cultural milieu in which the New Testament took shape. The course requires extensive readings in primary sources and selected secondary literature.  T 3:30–5:30

RLST 608b, Christianity in Late Antiquity  Stephen Davis
Required for doctoral students in History of Ancient Christianity. Topics include the relation of church and state after Constantine; theological controversies and church councils; interfaith relations; pieties and practices; and material culture.  T 3:30–5:20

RLST 662b/EGYP 516b, Coptic Prose Texts: Apa Shenoute  Bentley Layton
Artistic prose in Coptic of the classical period, primarily from works of Apa Shenoute. Prerequisite: EGYP 510.  MW 9–10:15

RLST 691b/HIST 560b, Society and the Supernatural in Early Modern Europe  Carlos Eire
Readings in primary texts from the period 1500–1700 that focus on definitions of the relationship between the natural and supernatural realms, both Catholic and Protestant.
Among the topics to be covered: mystical ecstasy, visions, apparitions, miracles, and demonic possession. All assigned readings in English translation. W 3:30–5:20

RLST 705a/AMST 705a/HIST 720a, Readings in Religion and American History, 1600–2000  Harry Stout
This seminar explores intersections of religion and society in American history from the colonial period to the present as well as methodological problems important to their study. TH 1:30–3:20

RLST 706b, Sexuality and Religion  Kathryn Lofton
The relationship between ideas about sex and ideas about religion; the interrelations of sexual and religious practices. Case studies from religious cultures in the United States. Examination of presumptive norms about sexuality, religion, and American culture. TTH 11:35–12:25, 1 HTBA

RLST 717a, Islamic Theology and Philosophy  Frank Griffel
Historical survey of major themes in Muslim theology and philosophy, from teachings of the Qur’an to contemporary Muslim thought. The systematic character of Muslim thought and of the arguments given by thinkers; reason vs. revelation; the emergence of Sunnism in the tenth through eleventh centuries; the reaction of Muslim theology (from 1800) to the challenges of the West; and contemporary Muslim thought. TTH 10:30–11:20, 1 HTBA

RLST 720a, Seminar on the Qur’an  Gerhard Bowering
Intensive study of the Qur’an. Readings in commentaries on the Qur’an. Special emphasis on textual and hermeneutical problems. Prerequisites: reading knowledge of Arabic and permission of the instructor. TH 4–6

RLST 723b, Salafiyya Movement in Islam  Frank Griffel
Close study of the development of the Salafiyya movement, a widely spread modernist reform movement of Muslim intellectuals during the eighteenth and nineteenth centuries. Further development of the movement during the twentieth century and study of what “Salafism” means today. W 2:30–4:20

RLST 735b/JDST 676b, Babylonian Aramaic  Yochanan Breuer
This course deals with the Aramaic dialect used in the Babylonian Talmud and Gaonic literature. In addition to the basic structure of this dialect, we focus on its peculiarities (compared with other dialects of Aramaic), the methodology in investigating it, its various types, its contacts with other languages (especially Hebrew), and its importance for a proper understanding of the Jewish Babylonian literature, mainly the Babylonian Talmud, which is probably the most influential composition in Jewish heritage. W 9:25–11:15

RLST 736a/JDST 747a, Rabbis and Others in Late Antiquity: Contextualizing Classical Rabbinic Narratives  Richard Kalmin
This course focuses on important issues involved in the study of relations between Jews and other religious and ethnic groups in Persian and Roman Mesopotamia during late antiquity. Through close reading of primary texts and secondary literature, attention is given to Syriac-speaking Christians, Zoroastrians, and indigenous Babylonian pagans. Groups and individuals that vied with the rabbis for power over the Jewish community,
such as dream interpreters, aristocrats claiming royal descent, magicians, holy men, and astrologers, are also examined. M 2:30–4:30

**RLST 740b/JDST 734b, Rabbinic Texts**  Christine Hayes  
A close study of classical rabbinic sources with attention to questions of both form and content, critical methods, and cultural and historical context. Designed for doctoral students in Ancient Judaism. T 2:30–4:30

**RLST 746b/JDST 734b, Midrash Seminar: The Theophany at Sinai**  Steven Fraade  
The giving of the Torah to Israel as seen through rabbinic eyes. Close readings of midrashic texts. Views of revelation, tradition, interpretation, law, and commandment in their literary and historical contexts. Interpretations and interpretive strategies compared and contrasted with those of other ancient biblical exeges (Jewish and non-Jewish). Prerequisite: reading knowledge of ancient Hebrew. TH 9:25–11:15

**RLST 751b/JDST 721b, Introduction to Judaism in the Ancient World: From Temple to Talmud**  Steven Fraade  
The emergence of classical Judaism in its historical setting. Jews and Hellenization; varieties of early Judaism; apocalyptic and postapocalyptic responses to suffering and catastrophe; worship and atonement without sacrificial cult; interpretations of scriptures; law and life; the rabbi; the synagogue; faith in reason; Sabbath and festivals; history and its redemption. No prior background in Jewish history presumed. MW 11:35–12:50

**RLST 756a/JDST 756a, Ancient Judaism Seminar: The Temple Scroll**  Steven Fraade  
The topic of this seminar, which is required of graduate students in Ancient Judaism, changes yearly. This term we study the Temple Scroll, one of the most important of the Dead Sea Scrolls. Attention to its place within the history of the biblical text and biblical interpretation and the development of ancient Jewish law, the nature and function of its textual practices, and its relation to the more clearly sectarian of the Qumran writings. Possible topics to be covered: cultic calendar, temple constructions, sacrifice, ritual purity, priests, kings, prophets, judiciary, marital vows, sexual taboos, and holy war. Prerequisite: reading knowledge of ancient Hebrew. W 1:30–3:20

**RLST 768b/HIST 979b/JDST 788b, Holocaust in Historical Perspective**  Marc Saperstein  
A survey of the major historical issues raised by the Holocaust, including the roots of Nazism; different theoretical perspectives and ways of accounting for genocide; the behavior of perpetrators, victims, and bystanders; and problems of representation. TTH 10:30–11:20, 1 HTBA

**RLST 769b/HIST 988b/JDST 771b, Jewish Law in the Islamic State, 900–1500**  Eve Krakowski  
Jewish legal identity and the social practice of Jewish law in the medieval Islamic Near East. Islamic political contexts of Jewish communal institutions; leadership, authority, and coercion; practices and functions of legal courts; comparative readings of response, legal documents, and prescriptive legal codes. T 9:25–11:15
RLST 773au/HIST 535au/JDST 761au, History of the Jews and Their Diasporas to Early Modern Times  Ivan Marcus
A broad introduction to the history of the Jews from biblical beginnings until the European Reformation and the Ottoman Empire. Focus on the formative period of classical rabbinic Judaism and on the symbiotic relationships among Jews, Christians, and Muslims. An overview of Jewish society and culture in its biblical, rabbinic, and medieval settings. TTH 11:35–12:50

RLST 801a, Hebrew Bible Seminar: Problems in the Book of Kings  Robert Wilson
This course allows students to develop interpretive skills on the basis of the original texts by engaging in a close reading of the beginning (1 Kings 1–12) and end (2 Kings 24–25) of the Book of Kings in the context of parallel passages in Hebrew and in Greek.

[RLST 802b, Apocalyptic Religion in Cross-Cultural Perspective]

RLST 805a, History and Methods of Old Testament Scholarship  John J. Collins, Joel Baden
Reading and critical evaluation of major classic works in the history of Old Testament studies from Wellhausen to the present. Prerequisite: working knowledge of biblical Hebrew; reading knowledge of German helpful but not required. W 3:30–5:20

RLST 811a/JDST 712a, Judaism in the Time of Jesus  John J. Collins
Analysis of main features of Judaism in the land of Israel around the turn of the era. We consider whether it is possible to speak of Common Judaism, and we discuss the importance of the law, sectarianism, apocalypticism, and other currents. We also give a brief overview of the history of Judea between 200 B.C.E. and 135 C.E. Prerequisite: introductory course on either Hebrew Bible or New Testament. Research paper required. T 1:30–3:20

RLST 818b/JDST 718b, Postexilic Prophecy  John J. Collins
Exegesis of parts of Isaiah, Zechariah, Haggai, and Malachi. Examination of the relation of postexilic prophecy to apocalypticism, and of the social function of prophecy at this time. M 3:30–5:20

RLST 865au, Moral, Religious, and Social Issues in Bioethics  David H. Smith
A selective survey of issues in biomedical ethics. Comparison of different points of view about biomedical issues, including religious vs. secular and liberal vs. conservative. Special attention to issues in research and at the beginning and end of life. TTH 10:30–11:20

RLST 900b, Existentialism  Noreen Khawaja
This course serves as an in-depth introduction to key problems in European existentialism. Readings from Rousseau, Kierkegaard, Gide, Lukács, Nietzsche, Heidegger, de Beauvoir, Sartre, Marcuse. TTH 11:35–12:50

RLST 905a, Theology Seminar  Christopher Beeley
Required for all doctoral theology students in Religious Studies. Course topic changes each year.
RLST 920a, Modern Christian Thought I  Noreen Khawaja
This course is an introduction to the major intellectual issues of Christianity around the
time of the Enlightenment. Emphasis on the religious and philosophical confrontation
with radical doubt and on the meaning of religious “truth.” Readings from Descartes,
Hume, Kant, Voltaire, Reimarus, Lessing, Vico, Hegel, Feuerbach. TTH 2:30–3:45
RENAISSANCE STUDIES

53 Wall Street, Rm. 310, 203.432.0672
www.yale.edu/renstudies
M.A., M.Phil., Ph.D.

Chair and Director of Graduate Studies
To be announced

Executive Committee  Rolena Adorno, Edwin Duval, Carlos Eire, Roberto González Echevarría, Bruce Gordon, David Scott Kastan, Christina Kraus, Lawrence Manley, John Matthews, Giuseppe Mazzotta, Robert Nelson, David Quint, John Rogers, Ellen Rosand, Francesca Trivellato, Christopher Wood, Keith Wrightson

Faculty associated with the program  Rolena Adorno, Emily Bakemeier, Leslie Brisman, Paul Bushkovitch, Susan Byrne, Angela Capodivacca, Judith Colton (Emeritus), Edwin Duval, Carlos Eire, Roberta Frank, Paul Freedman, Roberto González Echevarría, Bruce Gordon, Emily Greenwood, Karsten Harries, K. David Jackson, Maija Jansson, David Scott Kastan, Joost Keizer, Christina Kraus, David Lummus, Lawrence Manley, John Matthews, Giuseppe Mazzotta, Mary Miller, Alastair Minnis, Robert Nelson, Catherine Nicholson, Lee Patterson (Emeritus), Steven Pincus, David Quint, John Rogers, Ellen Rosand, Christopher Semk, Francesca Trivellato, Brian Walsh, Christopher Wood, Keith Wrightson

Fields of Study
Renaissance Studies offers a combined Ph.D. degree that integrates concentration in a departmental field with interdisciplinary study of the broader range of culture in the Renaissance and early modern periods. The program is designed to train Renaissance specialists who are firmly based in a traditional discipline but who can also work across disciplinary boundaries. Departmental areas of concentration available are Classics, Comparative Literature, English, French, History, History of Art, History of Music, Italian, and Spanish and Portuguese.

Special Admissions Requirements
Only candidates wishing to proceed to a doctorate should apply. Application should be made to the department of concentration, with an indication that the candidate seeks nomination to the combined degree in Renaissance Studies. Applications should be accompanied by scores from the GREs and one research or critical paper.

Special Requirements for the Ph.D. Degree
Students are subject to the combined Ph.D. supervision of the Renaissance Studies program and the relevant participating department. The student’s program will be decided in consultation with an adviser, the director of graduate studies in Renaissance Studies, and the director of graduate studies in the participating department. As detailed below, requirements for the combined degree vary slightly to accommodate the requirements of
the participating departments, but all candidates for the combined degree are expected to meet, at a minimum, the following requirements. (1) Students must demonstrate a reading knowledge of Latin, Italian, and a third language, which will vary according to departmental requirements. At the minimum, an examination in Latin or Italian should normally be passed upon entrance; a second language should be passed before the third term; and a third language by the end of the second year. (2) Each student is required to take sixteen term courses (in History of Art, fifteen). The normal pattern is to have completed fifteen courses during the first two years of study, no more than two of which may be individual reading and research. (3) A two-term core seminar, designed to present a wide range of topics concerned with Renaissance and early modern culture, is required of all combined degree candidates. This course, offered every other year, is open to students from other departments.

Training in teaching, through teaching fellowships, is considered an important part of every student’s program. Most students teach in their third and fourth years.

The scheduling of the oral examination and the dissertation prospectus follows the practice of the primary department, but in every case the two requirements must be completed not later than September of the fourth year. The oral examination, varying in length from two hours to two hours and fifteen minutes, will include questions on Renaissance topics outside the primary discipline. The remainder of the examination will be devoted to the primary discipline, including (except in the case of Classics) some further coverage of the Renaissance period. Students take additional written examinations as required by the primary departments.

Upon completion of all predissertation requirements, including the prospectus, students are admitted to candidacy for the combined Ph.D. degree. Admission to candidacy must be completed by the beginning of the fourth year.

The dissertation will be advised and completed according to departmental guidelines, but one of the readers will normally be a member of the Renaissance Studies Executive Committee.

CLASSICS

Course work  Students are required to complete sixteen term courses. Eight of these will be courses in Classics and will include at least four courses in Greek and Latin literature, a course in historical or comparative grammar, and at least three seminars. The eight remaining courses making up the Renaissance Studies portion of the degree will be distributed as follows: two terms of the Renaissance Studies Core Course, six additional term courses to be taken in at least two disciplines (such as literature, history, history of art, music, religious studies, etc.). One of these courses should respect the spirit of the ordinary Classics requirement of a course in classical art or archaeology (a course on the classical origins of Renaissance architecture, for example, will satisfy this requirement).

Languages  Students are expected to pass the normal Greek and Latin competency exams upon entrance to the program. Italian, as set by Renaissance Studies—one hour on sixteenth-century Italian prose, and another one-hour exam on modern Italian scholarship—and a second language, normally German or French.
Examinations  Students are expected to pass the Greek and Latin translation exams, based on the Classics and Renaissance Studies Ph.D. reading lists, by the beginning of the fifth term in residence; the oral exams in Greek and Latin literature, based on the Classics and Renaissance Studies Ph.D. reading lists, by the end of the fifth term in residence; and the oral exams on special fields appropriate to both disciplines, as described below, by the end of the sixth term in residence.

Orals  Classics portion: seventy-five minutes on three or four topics in classical Greek and Latin literature. Renaissance Studies portion: forty-five minutes, three fifteen-minute questions on Renaissance topics to be divided between at least two disciplines, i.e., literature, history, history of art, etc.

Prospectus and dissertation  The prospectus must be completed by the end of the seventh term in residence. Procedures regarding the dissertation will follow departmental practice, although the board of readers will normally include at least one member of the Renaissance Studies Executive Committee.

COMPARATIVE LITERATURE

Course work  Students are required to complete sixteen term courses, at least seven of these (including the Comparative Literature proseminar) in the Department of Comparative Literature. Students must take at least ten courses in the field of Renaissance Studies (offered in several departments), including two terms of the Renaissance Studies Core Course and three courses in two disciplines other than literature (such as history, history of art, or religious studies). At least three of a student’s overall list of courses must be in literary theory, criticism, or methodology; at least one course each in poetry, narrative fiction, and drama; and at least one course each in ancient or medieval literature and Enlightenment or modern literature. At least two courses must be completed with the grade of Honors. In general, students should take a wide range of courses with a focus on one or two national or language-based literatures.

Languages  Latin and Italian, as set by Renaissance Studies—one hour of Renaissance Latin prose; one hour of sixteenth-century Italian prose, one of modern Italian scholarship—and two additional languages, at least one of them European.

Orals  The joint oral examination will consist of seven twenty-minute questions (two topics in Renaissance literature from a comparative perspective; three on non-Renaissance literature, including at least one theoretical or critical question; and two questions on Renaissance topics in nonliterary disciplines). Orals should be completed no later than the end of the sixth term.

Prospectus and dissertation  The prospectus should be completed in September of the fourth year. Procedures regarding the dissertation will follow departmental practice, although the final readers will normally include at least one member of the Renaissance Studies Executive Committee.

ENGLISH

Course work  Students are required to complete sixteen term courses. Eleven of these will be courses in English, of which five (including those normally cross-listed, such
as Comparative Literature courses and the Renaissance Studies Core Course) will be in Renaissance literature. An additional five courses in Renaissance topics will be non-cross-listed courses from other departments. Course work must be completed by the end of the fifth term.

**Languages** Latin, Italian, and a second modern language, to be tested by the Renaissance Studies program.

**Orals** Nine nine-minute questions, including four Renaissance topics. An additional thirty-minute portion, consisting of two fifteen-minute questions in Renaissance Studies on nonliterary disciplines. Orals must be completed by the end of the sixth term.

**Prospectus and dissertation** The prospectus must be completed by the beginning (i.e., September) of the seventh term. Procedures regarding the dissertation will follow departmental practice, with at least one reader from the Renaissance Studies Executive Committee.

**FRENCH**

**Course work** Sixteen term courses at the graduate level are required. Nine correspond to the requirements of the French department, seven to the requirements of the Renaissance Studies program. Of the nine courses taken in French, one must be French 610 (Introduction to Old French), two others must fall within the medieval and early modern periods (eleventh through seventeenth century). The six remaining courses in French must cover as broad a spectrum as possible of the various periods and subfields of French and francophone literature. Of the seven courses taken in Renaissance Studies, two must be the Renaissance Studies Core Course, two must be in a literature or literatures other than French, and three must be taken in other departments (e.g., History, History of Art, Music, Religious Studies, Philosophy, etc.).

**Languages** Latin and Italian, as required and examined by Renaissance Studies, and a third language relevant to the student’s specialization (Greek, Hebrew, Spanish, Portuguese, German), in addition to French. A written examination in Latin will consist of a passage of humanist Latin prose (one hour). A written examination in Italian will consist of a literary passage from the Italian Renaissance (one hour) and a passage of modern Italian scholarship (one hour). Written examinations in the third language will consist of passages appropriate to the language and the discipline, or may be satisfied by a graduate seminar taken in the language or literature in question.

**Orals** An oral qualifying examination must take place as early as possible in the third year of study, before spring recess at the latest. The examination will consist of seven topics: four in French and three in Renaissance Studies. Of the four topics in French, one must center on Renaissance literature, two on other areas of French and francophone literature; the fourth will consist of the textual analysis of a poem or prose passage in French, provided to the candidate twenty-four hours before the examination. Of the three topics in Renaissance Studies, one or two must center on a Renaissance literature other than French, the remainder on an area or areas of Renaissance Studies other than literature. The French part of the examination will be conducted in French; the Renaissance Studies part will be conducted in English.
Prospectus and dissertation A formal prospectus defense must take place no later than two weeks before the end of the sixth term (third year) of study. The prospectus committee will consist of three faculty members, including the dissertation director(s) and at least one member of the Renaissance Studies Executive Committee. Once approved by the committee, the prospectus will be submitted to the graduate faculty of the Department of French for a vote on final approval and advancement to candidacy. More than one dissertation adviser is permitted and indeed encouraged, but the principal adviser will normally be in the Department of French. The official readers of the finished dissertation need not be members of the original prospectus committee, but will include at least one member of the Department of French and at least one member of the Renaissance Studies Executive Committee.

HISTORY

Course work Students are required to complete sixteen term courses. Ten of these will be courses in History; of these, a minimum of four will be in Renaissance/early modern topics from the fourteenth through the seventeenth century. The six remaining courses making up the Renaissance Studies portion of the degree will be distributed as follows: two terms of the Renaissance Studies Core Course, four additional term courses to be taken in at least two disciplines outside of history (such as Classics, modern literatures, history of art, music, etc). The normal History department requirements of three research seminars and a prospectus tutorial apply to combined-degree students.

Languages Latin and Italian, as set by Renaissance Studies—one hour of Renaissance Latin prose; two hours of Italian, one of sixteenth-century Italian prose, one of modern Italian scholarship—and a third language chosen by the student.

Orals History portion: seventy-five minutes in all, including forty-five minutes on the student’s major Renaissance/Reformation/early modern field, which may, but need not be, shared with more than one examiner, and thirty minutes on a minor field outside the specialization (and preferably outside of European history). Renaissance Studies portion: forty-five minutes, three fifteen-minute questions to be divided between at least two disciplines outside of history narrowly conceived (i.e., in literature, history of art, etc.). Students are expected to complete the oral examination no later than September of the fourth year.

Prospectus and dissertation Students are expected to complete the prospectus by March of the third year. Procedures regarding the dissertation will follow departmental practice, although the board of readers will normally include at least one member of the Renaissance Studies Executive Committee.

HISTORY OF ART

Course work Students are required to complete fifteen term courses. Ten of these will be courses in History of Art; of these, a minimum of four will be in Renaissance art from fourteenth-century Italy through the baroque. The five remaining courses making up the Renaissance Studies portion of the degree will be distributed as follows: two terms of the Renaissance Studies Core Course, three additional term courses taken in at least two disciplines outside of history of art (such as literature, history, music, religious studies,
etc.). Students will normally take seven courses in the first year, six in the second year (the credit for first-time teaching will be included in this number), and a final course in the fall of the third year.

**Qualifying paper**  Normally during January of the second year, students submit a qualifying paper that should demonstrate the candidate’s ability to complete a Ph.D. dissertation successfully.

**Languages**  Latin and Italian, as set by Renaissance Studies—one hour of Renaissance Latin prose; two hours of Italian, one of sixteenth-century Italian prose, one of modern Italian scholarship. A third language (in most cases German) at the discretion of the History of Art department.

**Orals**  The comprehensive oral examination will normally take place toward the end of the first term of the third year and must be completed no later than September of the fourth year. It will consist of a three-hour written examination based on the candidate's major field and an oral examination as follows: History of Art: seventy-five minutes, including examination on at least one field noncontiguous with the Renaissance; Renaissance Studies: forty-five minutes, three fifteen-minute questions to be divided between at least two disciplines outside the history of art.

**Prospectus and dissertation**  Students are expected to complete the prospectus and colloquium by March of the third year. Procedures for the submission and evaluation of dissertations will be those followed in History of Art, although the board of readers will normally include a member of the Renaissance Studies Executive Committee.

**ITALIAN**

**Course work**  Of the combined degree program's total of sixteen term courses, seven are in Renaissance Studies and nine are in the Department of Italian. Of the nine courses in Italian, at least three must be devoted to the period from Dante to the earlier seventeenth century. The seven courses making up the Renaissance Studies portion of the degree will be distributed as follows: two terms of the Renaissance Studies Core Course; two courses in Renaissance literatures other than Italian, and three courses divided between at least two nonliterary disciplines (e.g., history, history of art, religious studies, etc.).

**Languages**  Latin, as set by Renaissance Studies (one hour of Renaissance Latin prose), a second romance language, and a non-romance language, tested in a two-hour examination (one hour of Renaissance prose, one hour of modern scholarship). Latin to be passed by the end of the first year (and preferably upon entrance); all languages to be passed before the oral examination.

**Orals**  The qualifying examination, which must be completed by the end of the third year, will include an oral examination in which sixty minutes will be devoted to Italian literature, including the Renaissance, and forty-five minutes will be devoted to three fifteen-minute questions on a topic in Renaissance literature outside of Italy and two topics in nonliterary areas of the Renaissance (such as history or history of art). The portion of the examination devoted to Italian literature will also include a written component following departmental guidelines.
Prospectus and dissertation The dissertation (a prospectus of which must be completed by the beginning of the fourth year) will normally be directed within the Department of Italian, but at least one of the readers will normally be a member of the Renaissance Studies Executive Committee.

MUSIC

Course work Students are required to complete sixteen term courses. Ten of these will be courses in Music, including four in early music, i.e., from the later Middle Ages through the baroque. The six remaining courses making up the Renaissance Studies portion of the degree will be distributed as follows: two terms of the Renaissance Studies Core Course, four additional term courses taken in at least two disciplines outside of music (such as literature, history, history of art, religious studies, etc.).

Languages Latin and Italian, as set by Renaissance Studies—one hour of Renaissance Latin prose; two hours of Italian, one of sixteenth-century Italian prose, one of modern Italian scholarship. A third language (normally French or German) at the discretion of the Department of Music.

Comprehensive examinations Music: three ninety-minute essays (including one on early music), followed by an oral examination of ninety minutes. Renaissance Studies: one ninety-minute essay on an interdisciplinary Renaissance topic (e.g., art and literature of a particular country, or comparison of the culture of two or three princely courts, or the history of the Reformation or Counter-Reformation), followed by a thirty-minute oral examination on the essay topic. Students take the comprehensive exam in Music at the beginning of the third year and the Renaissance Studies comprehensive exam in the spring of the third year.

Prospectus and dissertation Students enroll in the third-year prospectus/dissertation seminar in Music and must complete the prospectus no later than September of the fourth year. Dissertations will be approved in the Department of Music, with at least one reader to come from the Renaissance Studies Executive Committee.

SPANISH AND PORTUGUESE

Course work A total of sixteen term courses at the graduate level is required. Nine correspond to the requirements of the Spanish and Portuguese department, seven to the requirements of the Renaissance Studies program. Of the nine courses taken in Spanish and Portuguese, two are required: Spanish 790, Methodologies of Modern Foreign Language Teaching, and Spanish 500, History of the Spanish Language. Of the remaining seven, three or four will be in Spanish and/or Portuguese literature from the medieval period through the seventeenth century, and the balance will be in the literature of Spain’s and/or Portugal’s ultramarine possessions. The student doing the combined degree program may elect to devote his or her departmental course work to either Hispanic or Luso-Brazilian literatures or do a combination of both in a distribution to be determined by the student in consultation with his or her departmental adviser(s). Of the seven courses taken in Renaissance Studies, two must be the Renaissance Studies Core Course, two must be in a literature or literatures other than Spanish and/or Portuguese,
and three must be taken in other departments (e.g., History, History of Art, Religious Studies, Philosophy, etc.).

**Languages** Students are expected to have a strong command of Spanish and/or Portuguese as well as English. In addition, the following requirements must be met: (1) Latin, as set by the Renaissance Studies program (passing a one-hour translation examination in Renaissance Latin prose); (2) Italian, as set by the Renaissance Studies program (successful completion of a one-hour translation exam in sixteenth-century Italian prose and a one-hour translation exam in modern Italian scholarship); (3) demonstration of reading/translation proficiency in one of the following languages: French, German, Greek, Portuguese (available to students doing departmental course work exclusively in Spanish), Spanish (available to students doing departmental course work exclusively in Portuguese), or another language relevant to the student’s specialization. Students doing their departmental course work in a combination of Spanish-language and Portuguese-language courses will be understood to have satisfied this third reading knowledge requirement so long as the courses are taught and the readings done in the relevant Romance language. If the course work in either Hispanic or Luso-Brazilian literatures is done in English, then the student will be expected to demonstrate proficiency by taking a one-hour translation exam in the sixteenth-century prose of the relevant language.

One language requirement must be satisfied by the end of the first year of study, if not upon entrance into the program (preferably Latin or Italian); the remaining requirement (for students doing both Spanish- and Portuguese-language literatures) or requirements (for the student working exclusively in either Spanish or Portuguese) must be satisfied by the end of the second year.

**Qualifying examination** Written component: (1) a two-hour examination in peninsular Spanish and/or Portuguese literatures, and (2) a two-hour exam in the ultramarine literatures of Spain and/or Portugal. Oral component: eight fifteen-minute questions, distributed as follows: four in Spanish/Portuguese peninsular/ultramarine literatures (medieval period through the seventeenth century), and three in Renaissance Studies (one question on a non-Spanish/Portuguese literature, and two questions from extra-literary fields such as history, history of art, religious studies, etc.).

**Prospectus** The dissertation project should be carefully planned with faculty members from the relevant departments specializing in the respective areas. The prospectus should meet the approval of the student’s adviser in the Department of Spanish and Portuguese and the Renaissance Studies program member advising the student. The prospectus must include a presentation of the topic to be investigated, an explanation of the reasons for its significance, and a description of the theoretical and methodological framework to be employed. The prospectus must be submitted to the director of graduate studies in the Department of Spanish and Portuguese, who will circulate it to the departmental faculty for their review and approval; the prospectus will likewise be submitted to the Renaissance Studies program for review and approval by the faculty member(s) working with the student. The prospectus must be submitted and approved by the faculty by the beginning of the seventh term of enrollment. Failure to meet this deadline will result in suspension of registration privileges by the Graduate School. The deadline for
the submission of the dissertation prospectus in either term is the Monday of the final week of classes.

**Dissertation** The dissertation is to achieve a strong disciplinary (i.e., Spanish, Portuguese, or Spanish/Portuguese) identity while at the same time projecting a clear Renaissance Studies profile. The dissertation normally will be directed from within the Department of Spanish and Portuguese, and there will be at least one reader from the Renaissance Studies Executive Committee.

**Master’s Degrees**

**M.Phil.** The combined M.Phil. degree may be requested after all requirements but the dissertation are met.

**M.A. (en route to the Ph.D.)** The M.A. degree is awarded upon completion of eight term courses, taken in at least three disciplines, and with at least three grades of Honors. The examination in Latin or Italian must have been passed.

Program materials are available upon request to the Chair, Renaissance Studies Program, Yale University, PO Box 208298, New Haven CT 06520-8298.

**Courses**

[RNST 500a,b, Renaissance Studies Core Course  Offered every other year]

**RNST 900a,b, Directed Reading**

By arrangement with faculty.
SLAVIC LANGUAGES AND LITERATURES

2704 Hall of Graduate Studies, 203.432.1300, slavic.department@yale.edu

M.A., M.Phil., Ph.D.

Chair
Harvey Goldblatt (harvey.goldblatt@yale.edu)

Director of Graduate Studies
Vladimir Alexandrov (vladimir.alexandrov@yale.edu)

Professors  Vladimir Alexandrov, Katerina Clark, Harvey Goldblatt, Robert Greenberg (Adjunct), John MacKay

Assistant Professors  Molly Brunson, Bella Grigoryan

Senior Lector II  Irina Dolgova

Senior Lectors I  Krystyna Illakowicz, Rita Lipson, Constantine Muravnick, Julia Titus, Karen von Kunes

Fields of Study
The department offers the Ph.D. in Russian literature and culture and, by special arrangement, in medieval Slavic literature and philology.

Special Admissions Requirement
An advanced-level command of the Russian language is required.

Special Requirements for the Ph.D. Degree
All graduate students are required to take four courses. RUSS 607, Topics in Russian Literature from Its Origins to the Eighteenth Century, is coordinated with the department’s graduate reading list of required works in Russian literature of the period. All students will take an examination in RUSS 607 that will also double as the medieval Russian literature examination for the doctorate (for more on examinations, see below). RUSS 608, Eighteenth-Century Russian Literature, follows the same pattern as RUSS 607. Its readings are also coordinated with the department’s graduate reading list of required works in Russian literature. All students will take an examination in RUSS 608 that will also double as the eighteenth-century Russian literature examination for the doctorate. The other required courses are SLAV 754, Old Church Slavic, and RUSS 834, Aspects of Russian Grammar and Teaching Methodologies, which combines pedagogy with the structure of Russian. If possible, SLAV 754 should be taken before RUSS 607. RUSS 834 should be taken concurrently with or before a graduate student’s first term of teaching Russian language, typically during the seventh term of study.

The minimum number of graduate courses for the Ph.D. is sixteen, counting the above four required courses. Of the remaining twelve, at least two must be taken in
nineteenth-century Russian literature and at least two in twentieth-century Russian literature, including poetry and prose or dramatic works.

Graduate students in their second year may also spend a term studying at the Russian State University for the Humanities in Moscow; those who complete an approved program successfully will receive up to four course credits toward the Ph.D.

Students who have done graduate work elsewhere may petition the department for up to four course credits toward their degree after one year’s residence at Yale.

A special curriculum may be arranged for students wishing to specialize in medieval Slavic literature and philology.

**Minor field** As part of their program of study, students will also be responsible for developing a minor field of specialization in one of the following: (1) a Western or non-Western literature; (2) film studies; (3) a topic in intellectual history; (4) one of the other arts; (5) another Slavic literature; (6) Slavic linguistics; (7) another discipline relevant to their primary interests in Russian literature. The student’s minor field of specialization will be determined in consultation with the director of graduate studies (DGS). The minor field can be developed most readily through reading courses in the Slavic department or by taking graduate courses in another department. Up to two graduate courses in other departments will count toward the sixteen for the doctorate if they are relevant to a student’s program of study. The successful completion of a course or courses in the student’s minor field taken in another department may double as the departmental examination in the minor.

**Examinations** The Ph.D. qualifying examinations comprise eight parts and will be completed during the third year of study: (1) medieval Russian literature; (2) Russian literature of the eighteenth century; (3) minor field; (4) nineteenth-century Russian prose and drama; (5) nineteenth-century Russian poetry; (6) twentieth-century Russian prose and drama; (7) twentieth-century Russian poetry; (8) pre-prospectus examination.

The first two examinations are taken in conjunction with courses offered during the first two years of course work, RUSS 607 and RUSS 608. Early in the fifth term of study, students will take (3), a forty-minute oral exam in their chosen minor field, administered by the DGS and relevant faculty within and/or outside the department; this examination will be waived if the student has successfully completed one or two relevant graduate courses in another department. In October of the third year of study (typically during the second week), students will take two written examinations, (4) and (5), of two hours each, the first on Monday of the given week, the second on Friday. Each exam will consist of two or three passages drawn from well-known works of literature that will be identified and that are designated as required on the department’s reading list (which also includes additional works that are recommended but not required). Students will be expected to choose one passage and write an essay in which they analyze the text from as many of the following points of view as possible: versification (if relevant), style, structure, narrative point of view, themes, genre, period, place in the author’s oeuvre and in literary history, comparative context, and critical reception. Two additional written examinations, (6) and (7), which will follow the same format, will be held during one week at the end of the student’s fifth term of study (typically the first week of December),
again on Monday and Friday. Each of these four written exams will be compiled and graded by two faculty members with expertise in the given century and genres. After each exam, students will be informed as to how they performed.

After the final written exam, all students will have a one-hour oral pre-prospectus exam on a date to be specified by the department near the beginning of the sixth term (typically, during the first week of February). This examination will explore issues pertaining to the student’s future dissertation prospectus. Normally, preparation for the exam will entail a more focused reading of the departmental reading list. For example, a student who proposes to work on Pasternak would read not only the required and recommended works by Pasternak, but also the required and recommended works by other writers of the twentieth century. Students will also be expected to explore secondary and theoretical sources outside the reading list that are relevant to their chosen topic. Preparation for the examination will be done in consultation with two faculty advisers (see below), and students will be required to prepare in advance a 7–10 page text outlining their future dissertation topic, including a discussion of existing scholarship and the way they propose to structure their work. An annotated bibliography of primary and secondary works pertaining to their dissertation topic should also be appended. The pre-prospectus text will be distributed to all departmental faculty one week prior to the exam, and all faculty will attend the exam. The aim of this exam is for the student to take an intermediate step toward developing a dissertation prospectus and also to provide the student with feedback from the faculty about the project.

The departmental reading list is available on the department’s Web site.

**Article in lieu of examination** As a possible alternative to one of the four written examinations on the nineteenth and twentieth centuries, students may choose to write an article that they will submit for publication to a scholarly journal. The work will be carried out in consultation with a faculty adviser and will focus on a work or works in either poetry or prose (or drama) of the given century. This article will be due on the date that the exam on the given genre is normally scheduled. It is expected that the article will be ambitious in its overview and in its conceptualization of the issue(s) being addressed. The faculty adviser will evaluate the work and will advise the student on publication.

**Joint Ph.D. Program with Film Studies**

The Department of Slavic Languages and Literatures also offers, in conjunction with the Film Studies Program, a joint Ph.D. in Slavic Languages and Literatures and Film Studies. For further details, see Film Studies and the department’s Web site. Applicants to the joint program must indicate on their application that they are applying both to Film Studies and to Slavic Languages and Literatures. All documentation within the application should include this information.

**Master’s Degrees**

**M.Phil.** See Degree Requirements under Policies and Regulations. Additionally, students in Slavic Languages and Literatures are eligible to pursue a supplemental M.Phil. degree in Medieval Studies. For further details, see Medieval Studies.
M.A. The Department of Slavic Languages and Literatures does not admit students for the terminal M.A. degree, nor does it award an M.A. en route to the Ph.D. degree. If, however, a student admitted for the Ph.D. leaves the program prior to completion of the doctoral degree, he or she may be eligible to receive a terminal master’s degree. He or she must have completed at least fifteen term courses in Russian literature and linguistics, chosen in consultation with the director of graduate studies. A grade of Honors in at least two term courses and an average of High Pass in the remaining courses must be attained. A reading knowledge of French or German is required, and candidates must pass departmental proficiency examinations in Russian.

Program materials are available upon request to the Chair, Slavic Languages and Literatures, Yale University, PO Box 208236, New Haven CT 06520-8236.

Courses

**RUSS 603b/HSAR 605b, Russian Realist Literature and Painting**  
Molly Brunson

An interdisciplinary examination of the development of nineteenth-century Russian Realism in the literary and visual arts. Topics include the Natural School and the formulation of a realist aesthetic; the artistic strategies and polemics of critical Realism; narrative, genre, and the rise of the novel; the Wanderers and the articulation of a Russian school of painting. Readings include novels, short stories, and critical works by Dostoevsky, Turgenev, Goncharov, Tolstoy, Chekhov, and others. Painters of focus include Fedotov, Perov, Shishkin, Repin, and Kramskoy. Special attention is given to the particular methodological demands of inter-art analysis. **TH 1:30–3:20**

**RUSS 607b, Topics in Russian Literature from Its Origins to the Eighteenth Century**  
Harvey Goldblatt

Representative works, selected from both “old” Russian “bookish writing” and the “new” Russian literature of the seventeenth and first half of the eighteenth centuries, are examined against a broad comparative background to illustrate the development of various literary types and writing techniques. Special attention is devoted to diverse historiographic and methodological approaches; traditional and innovative theories of literary expression; and the connections between writing activity and ideological trends. **M 1:30–3:20**

**RUSS 608, Eighteenth-Century Russian Literature**

**RUSS 696a, Post-Stalin Literature and Film**  
Katerina Clark

The main development in Russian and Soviet literature and film from Stalin’s death in 1953 to the present. **W 1:30–3:20**

**RUSS 746b/CPLT 527b/FILM 828b, Art and Ideology**  
Katerina Clark

Examination of texts identified as ideological art, focusing on the relationship between the conventions they use and the ideology they seek to advance. Theoretical readings include works by Benjamin, Jameson, Lukács, Bakhtin, Marx, Althusser, and Judith Butler; literary works by Balzac, Brecht, Tretiakov, Ostrovsky, Orwell, Koestler, and others; films by Eisenstein, Leni Riefenstahl, and others. **W 1:30–3:20**
RUSS 750b/CPLT 569b/FILM 771b, Montage, Collage, and Political Art  
John MacKay  
Monuments of early Soviet film and their relationship to political-aesthetic debates surrounding montage and collage practice. Theories of montage; montage practices across the arts; twentieth-century conceptions of political art; debates about montage/collage practice and avant-gardism since World War II. M 3:30–5:20

RUSS 833b, Advanced Russian Conversation and Composition: Topics in Contemporary Russian Press and Media  
Rita Lipson  
A course designed to equip students with language skills necessary to comprehend complexities of contemporary Russia. Accompanied by a grammar review. TTH 4–5:15

RUSS 851a, Proseminar in Russian Literature  
Vladimir Alexandrov  
Introduction to the graduate study of Russian literature. Topics include literary theory, methodology, introduction to the profession. T 2:30–4:20

SLAV 754a, Old Church Slavic  
Harvey Goldblatt  
The study of Old Church Slavic and its place in the history of Church Slavic. The main features and the grammar of OCS. The Glagolitic and Cyrillic writing systems. Close readings from the “canon” of OCS literary monuments. OCS in relation to modern Slavic languages (especially Russian). MW 9–10:15

SLAV 771au, Introduction to the Slavic Languages  
Robert Greenberg  
This course explores the historical development of the Slavic languages from the time of an assumed Slavic unity through the modern period. Linguistic, cultural, historical, and social factors are considered to explain how more than a dozen Slavic languages emerged as standard languages in the past two centuries. Topics include the role of elites in shaping new Slavic languages, the influence of neighboring languages on the development of Slavic, and the natural linguistic differentiation that occurred in the Slavic lands. No previous knowledge of Slavic languages is required. M 3:30–5:20

SLAV 785au, Language, Nationalism, and Ethnic Conflict in the Balkans  
Robert Greenberg  
An exploration of the role of linguistic controversies in the polarization of ethnic relations within the former Yugoslavia. Topics include language and nationalism, the integration and disintegration of Yugoslavia, and the Balkans in the context of other charged ethno-linguistic controversies from the United States to India. M 7–8:50

SLAV 900, Directed Reading  
By arrangement with faculty.
SOCIOMETRY

www.yale.edu/sociology
M.A., M.Phil., Ph.D.

Chair
Julia Adams

Director of Graduate Studies
Philip Gorski

Professors Julia Adams, Jeffrey Alexander, Elijah Anderson, Scott Boorman, Richard Breen, Deborah Davis, Ron Eyerman, Philip Gorski, Philip Smith

Associate Professor Andrew Papachristos

Assistant Professors Rene Almeling, Emily Erikson, Lloyd Grieger, Marcus Hunter, Vida Maralani, Peter Stamatov, Christopher Wildeman, Jonathan Wyrtzen

Lecturers Matthew Mahler, Sadia Saeed

Fields of Study
Fields include comparative sociology/macrosociology; cultural and historical sociology; life course/social stratification; mathematical sociology; methodology (qualitative and quantitative approaches); networks; political sociology; race/gender/ethnic/minority relations; social change; social demography; social movements; theory (general, critical, hermeneutic); urban sociology.

Special Requirements for the Ph.D. Degree
Qualification for admission to candidacy for the Ph.D. will take place during the student’s first three years of study at Yale. A student who has not been admitted to candidacy will not be permitted to register for the seventh term of study. To qualify for candidacy the student must take twelve seminars to be completed in years one and two, four required courses (SOCY 542a, 578a, 580a, 581b), and eight electives, including at least one workshop. After completion of courses, students prepare a research paper and one field exam and defend a dissertation prospectus.

Teaching is an important part of the professional preparation of graduate students in Sociology. Students teach therefore in the third and fourth years of study.

Combined Ph.D. Degree in Sociology and African American Studies
The Department of Sociology offers, in conjunction with the Department of African American Studies, a combined Ph.D. degree in Sociology and African American Studies.

Students accepted to the combined Ph.D. program must meet all of the requirements of the Ph.D. in Sociology with the exception that, excluding the courses required, a research paper, and a field exam, combined-degree students may substitute African American Studies courses for six of the twelve term courses required to qualify for the Ph.D. in Sociology. For further details see African American Studies.
Master’s Degrees

M.Phil.  See Degree Requirements under Policies and Regulations.

M.A. (en route to the Ph.D.)  Eight term courses are required for the M.A. degree. Two of these courses must include statistics and theory. A grade of High Pass or Honors must be achieved in five of the eight required courses. A student may petition for the M.A. degree in the term following the one in which he/she completes the course requirements.

Program materials are available at www.yale.edu/sociology.

Courses

[SOCY 502a, Contemporary Sociological Theory: Durkheimian Sociology]

SOCY 503a/PLSC 522a, Historical Approaches to the Study of Politics  Sigrun Kahl
Provides an overview of the how-to, and the payoff, of a historical approach to the study of politics. Covers a wide range of topics, from the classics of political science and sociology up to recent comparative historical work.

SOCY 508b/PLSC 505b, Qualitative Field Research
In this seminar we discuss and practice qualitative field research methods. The course covers the basic techniques for collecting, interpreting, and analyzing ethnographic data, with an emphasis on the core ethnographic techniques of participant observation and in-depth interviewing. All participants carry out a local research project. Permission of the instructor required for undergraduates.

SOCY 510au, Religious Nationalism  Philip Gorski
Religious nationalism past and present, East and West; the normative issues the phenomenon raises. Religious roots of Western nationalism; nationalistic propensities of different religious traditions; conditions under which religious nationalism turns violent; and whether religion, nationalism, pluralism, and democracy are compatible.
M 1:30–3:20

[SOCY 511bu, Building Social Theory for Empirical Analysis]

SOCY 512bu, Sociology of Islam  Jonathan Wyrtnetz, Jeffrey Guhin
Social scientific studies of Islam; introduction to sociology of religion and its application to Islam; evaluation of utility of Islam and/or Muslim as analytical category; survey of debates about definition of Islam and religion in anthropology and religious studies. Second half of course explores possibilities for comparative sociological studies (1) with Islam and (2) of Islam with other religions.

[SOCY 515au, Urban Poverty and Policy]

[SOCY 520b, Revolutions in a Comparative Perspective]

SOCY 523b/WGSS 623b, Sociology of Sex and Gender  Rene Almeling
The course provides graduate students with an introduction to major theoretical approaches to sex and gender, and it covers recent empirical research in key arenas, including care work, sex work, work and family, mothering and fathering, reproductive
technologies, and health. Readings have been selected to reflect a variety of methodologi-
cal approaches and to spotlight the ways in which sex and gender intersect with other
social categories (e.g. race, class, and nationality) at different stages in the life course.
M 1:30–3:20

**SOCY 534a**, Cultural Sociology  Jeffrey Alexander
Cultural sociology is a new and vibrant area in social science. Collective meanings make a
profound difference in modern societies. They are symbolic, but also sensual, emotional,
and moral. They inspire ritual, but also creative performance and strategy. Examining
codes, narratives, icons, and metaphors, this course analyzes how cultural structures
energize capitalism, direct politics, create institutions, inspire social movements, and
motivate war and peace. TTH 1–2:15

**SOCY 542a**, Sociological Theory  Julia Adams
The course seeks to give graduate students the conceptual tools for a constructive engage-
ment with sociological theory and theorizing. We trace the genealogies of dominant
theoretical approaches and explore the ways in which theorists contend with these
approaches when confronting the central questions of both modernity and the disci-
pline. W 2:30–4:20

**SOCY 543b**, Demography, Gender, and Health  Vida Maralani
Comparative survey of research in demography. The interplay of population processes
and socioeconomic development; trends in fertility, mortality, aging, and health in both
richer and poorer nations; the relationship between women’s status and health and demo-
graphic outcomes. Readings from a variety of fields, including demography/sociology,
economics, epidemiology, and public health. TH 9:25–11:15

**SOCY 547a**, Gender, Race, and Genetic Testing  Rene Almeling
Overview of sociological approaches to genetics, including gene/environment interac-
tions and the history of genetic medicine. A focus on genetic testing in Huntington’s
disease, pregnancy, cancer, and psychological disorders to explore how genetic infor-
mation is provided to patients, and how patients experience genetic risk. Discussion of
commercial firms offering direct-to-consumer genetic testing. W 2:30–4:20

[**SOCY 550a**, A Secular Age?]

**SOCY 551b**, Comparative and Historical Methods  Nicholas Wilson
This course introduces the craft of comparative and historical analysis. It begins with an
inventory of the logics of inquiry employed by practitioners, including induction, deduc-
tion, and retroduction, as well as major comparative strategies. Next, the course focuses
on the kinds of sources historical sociologists use, and how they enroll these sources as
evidence and data in their explanations. Finally, the course’s substantive focus is a critical
engagement with core works in historical sociology, with special reference to the politi-
cal, economic, and cultural transformations involved in the emergence of modernity.
The course is designed for graduates in history and the social sciences but is also open to
undergraduates with a strong interest in research. W 3:30–5:20

[**SOCY 552a**, Punishment and Inequality]
[SOCY 553a\textsuperscript{u}, Empires and Imperialism]

[SOCY 555b\textsuperscript{u}, Social Dimensions of Medicine and Health]

**SOCY 557b, Political Sociology**  Sadia Saeed

This course surveys controversies and research topics in political sociology, exploring concepts of power and the theories of the state. Topics covered include the formation of states, political institutions, and social policies, and the determinants and outcomes of collective action. TH 2:30–4:20

[SOCY 558b, Topics in Social Stratification]

**SOCY 560a,b/PLSC 734a,b, Comparative Research Workshop**  Julia Adams,

Philip Gorski

This weekly workshop is dedicated to group discussion of work-in-progress by visiting scholars; Yale graduate students; and in-house faculty from Sociology and affiliated disciplines. Papers are distributed a week ahead of time and also posted on the Web site of the Center for Comparative Research (www.yale.edu/ccr). Students who take the course for a letter grade are expected to present a paper-in-progress the term that they are enrolled for credit. T 11:50–1:20

[SOCY 561b\textsuperscript{u}, Civil Society in China]

**SOCY 562a, Topics in Cultural Sociology**  Jeffrey Alexander

After reviewing contemporary sociological perspectives on culture, the seminar concentrates on the intellectual origins, theories, and empirical exemplars of the strong program in cultural sociology. We discuss hermeneutics and interpretation, critical theory, semiotics, structuralism, and post-structuralism; how a cultural-sociological program emerged in the late 1980s and early 1990s; and how this program has produced a range of research studies. We examine in particular emerging foci on social drama and performance, cultural trauma, and the iconic turn. TH 9:25–11:15

**SOCY 563b\textsuperscript{u}, Imperialism, Insurgency, and State Building**  Jonathan Wyrtzen

The course considers the evolution of political order in the "Greater Middle East" (from Morocco to Central Asia) in the past two centuries by examining imperialist and nationalist state building, insurgency, and counterinsurgency in the region. W 1:30–3:20

**SOCY 564a, Relationalism and Formalism in Contemporary Social Theory**  Emily Erikson

Relationalism and formalism refer to two different theoretical approaches to grounding explanation in the social sciences. Formalist works base their explanations of social processes and outcomes in individual-level behaviors, actions, beliefs, and desires. Relationalist works dissolve the concept of the individual into the set of social ties they possess, so that social relations are given explanatory precedence. For example, a relationalist might assert that it is not the desire of workers for a higher wage that causes them to strike, but instead the relationship between workers and managers that both causes conflict and creates the possibility of a strike. Each approach has deep philosophical roots. This seminar considers the underlying presuppositions of each approach by briefly considering
their philosophical roots and tracing their application in contemporary social theory and research.

**[SOCY 565, Advanced Seminar in Cultural Sociology]**

**SOCY 566b, Philosophy of the Social Sciences** Philip Gorski

**SOCY 570a, Social Theory: Trauma and Memory** Ron Eyerman

Exploration of sociological approaches to memory and trauma. A central theme is how cultural trauma has influenced the development of social theory, as well as literature and the arts generally. While aimed at graduate students in the social sciences and humanities, the seminar is open to advanced graduate students after consultation with the instructor. 
*M 9:25–11:15*

**SOCY 573b, Social Capital and Small Group Processes** Emily Erikson

Social capital is the potential advantage to individuals and groups of social ties and group cohesion. This course focuses on the problem of social capital formation in groups. Research that has identified significant declines in social capital over time in one society, such as Robert Putnam’s *Bowling Alone* and more recently McPherson, Smith-Lovin, and Brashears’s “Social Isolation in America,” has come under heavy criticism, which either explicitly or implicitly suggests that the natural impulse to form social relations and groups does not increase or decline over time, but is instead merely channeled along different paths. This course considers research that identifies variation in social capital over time and across societies in order to explore whether social capital reflects a basic human condition or varies over time given different social conditions. Particular attention is paid to micro-level processes that may build or destroy group-level social capital or channel group relations into more or less observable behaviors.

**[SOCY 576a, Civil Society and Democracy]**

**SOCY 578a, Logic of Empirical Social Research** Richard Breen

The seminar is an intensive introduction into the methodology of the social sciences. It covers such topics as concepts and indicators, propositions and theory, explanation and understanding, observation and measurement, methods of data collection, types of data, units of analysis and levels of variables, research design inference, description and causal modeling, verification and falsification. The course involves both the study of selected texts and the analysis and evaluation of recent research papers. 
*T 9:25–11:25*

**SOCY 580a, Statistics I** Lloyd Grieger

Introduction to probability and descriptive statistics. In-depth coverage of the linear model and its assumptions. 
*TH 3:30–5:20, 1 HTBA*

**SOCY 581b, Statistics II** Vida Maralani

The course provides the second part of a two-term introduction to statistical analysis for quantitative social science research. The course covers advanced topics in linear regression and provides an introductory overview of models for categorical and count data, the analysis of time data, and longitudinal data. We also discuss data-related issues such as missing data and weighting, and data that are complicated by issues of non-random design. 
*TT 1–2:15, 2 HTBA*
SOCY 582a, Statistics III: Advanced Quantitative Analysis for Social Scientists  
Richard Breen  
Covers more advanced statistical topics following on from Statistics II. Topics include probability; matrix algebra; properties of estimators; maximum likelihood estimation; identification; causal models; estimation of measurement and structural models; hierarchical linear models. T 3:30–5:20

[SOCY 583b, Ethnography of the African American Community]

[SOCY 585a, Sociology of the Life Course]

[SOCY 589b, Classical Social Theory: The Marx-Weber Debate]

SOCY 591b, Sociology of the Arts and Popular Culture  
Ron Eyerman  
An advanced introduction to sociological perspectives on the arts and popular culture. Emphasis on the conceptualization of culture within social theory, with the aim of interpreting cultural expressions and artifacts: artworks, music, television, film, and literature. T 9:25–11:15

SOCY 595a,b, Inequality and Life Course Workshop  
Lloyd Grieger, Richard Breen [F], Vida Maralani [Sp]  
In this workshop we present and discuss ongoing research work, primarily but not exclusively quantitative analyses. In addition, we address theoretical and methodological issues in the areas of the life course (education, training, labor markets, aging, as well as family demography), social inequality (class structures, stratification, and social mobility), and related topics. F 2–4

SOCY 597a,b, Special Topics in Sociology  
Students enroll in Special Topics if they wish to retake a course for credit when there is a new instructor and a substantially different syllabus from the first time they took the course. Only with the permission of the DGS.

SOCY 598a, 599b, Independent Study  
By arrangement with faculty. When students register for the course online, the dropdown menu should be completed.

SOCY 608a, Urban Sociology  
Marcus Hunter  
This course explores key theories, perspectives, and ethnographic research about urban America. We focus on the spatial and social organization of the city, political economy, and racial and ethnic relations. T 1:30–3:20

[SOCY 610b/WGSS 745b, Race, Gender, and the African American Experience]

[SOCY 612b, Agency and Action]

[SOCY 616a, Urban Ethnography]

[SOCY 620b, Material Culture and the Iconic Consciousness]

SOCY 625a, Analysis of Social Structure  
Scott Boorman  
Emphasizing analytically integrated viewpoints, the course develops a variety of major contemporary approaches to the study of social structure and social organization.
Building in part on research viewpoints articulated by Kenneth J. Arrow in *The Limits of Organization* (1974), by János Kornai in an address at the Hungarian Academy of Sciences published in 1984, and by Harrison C. White in *Identity and Control* (2nd ed., 2008), four major species of social organization are identified as focal: (1) social networks, (2) competitive markets, (3) hierarchies/bureaucracy, and (4) collective choice. This lecture course uses mathematical and computational models—and comparisons of their scientific styles and contributions—as analytical vehicles in coordinated development of the four species. M 9:25–11:15

**SOCY 628a,b, Workshop in Cultural Sociology**  Jeffrey Alexander [F], Ron Eyerman, Philip Smith

This workshop is designed to be a continuous part of the graduate curriculum. Meeting weekly throughout both the fall and spring terms, it constitutes an ongoing, informal seminar to explore areas of mutual interest among students and faculty, both visiting and permanent. The core concern of the workshop is social meaning and its forms and processes of institutionalization. Meaning is approached as both structure and performance, drawing not only on the burgeoning area of cultural sociology but on the humanities, philosophy, and other social sciences. Discussions range widely among methodological, theoretical, empirical, and normative issues. Sessions alternate between presentations by students of their own work and by visitors. Contents of the workshop vary from term to term, and from year to year. Enrollment is open to auditors who fully participate and for credit to students who submit written work. F 11–1

**SOCY 630a or b/AFAM 773a or b, Workshop in Urban Ethnography**  Elijah Anderson

The ethnographic interpretation of urban life and culture. Conceptual and methodological issues are discussed. Ongoing projects of participants are presented in a workshop format, thus providing participants with critical feedback as well as the opportunity to learn from and contribute to ethnographic work in progress. Selected ethnographic works are read and assessed. M 11:30–1:20

**SOCY 631a, Sociology of Work**

**SOCY 632b, Social Network Analysis**  Andrew Papachristos

Social Network Analysis (SNA) refers to both a theoretical perspective and a set of methodological techniques. As a theoretical perspective, SNA stresses the interdependence among social actors. This approach views the social world as patterns or regularities in relationships among interacting units and focuses on how such patterns affect the behavior of network units or actors. A “structure” emerges as a persistent pattern of interaction that can influence a multitude of behaviors, such as getting a job, income attainment, political decision making, social revolutions, organizational merges, global finance and trade markets, delinquent youth behaviors, the spread of infectious diseases, and so on. As a methodological approach, SNA refers to a catalog of techniques steeped in mathematical graph theory and now extending to statistical simulation and algebraic models. This course surveys the growing field of SNA, emphasizing the merger of theory and method, while gaining hands-on experience with network data and software. F 8:50–10:40
SOCY 647b, Social Processes  Scott Boorman
Focus is on identifying and exploring robust alternatives/complements to the rational choice models that have come to dominate so much of the analysis of social (including organizational) processes in recent years. Specifically, emphasis is placed on a range of mathematical models and related analytic approaches originating outside of the rational choice literature—in fields such as social network analysis, evolutionary biology, organization theory, and the law. Possible starting points include the Boorman-Levitt network matching model and its applications to nonprofits and complex statutes; weak ties models of job information transmission and other information transfer in elite social networks; and “garbage can” models of the internal problem-solving dynamics of complex organizations. M 9:25–11:15

SOCY 653b, Workshop in Advanced Sociological Writing and Research  Philip Smith
This class concerns the process of advanced writing and research that converts draft material into work ready for publication, preferably in refereed journals, or submission as a substantial grant proposal. It investigates problem definition, the craft of writing, the structure of argument and data presentation, and the nature of persuasion more generally. The aim is to teach a professional orientation that allows work that is promising to become truly polished and compelling within the full range of sociological genres. Prerequisite: permission of the instructor; participants must enter the class with suitable draft material for group analysis and discussion. W 1:30–3:20

SOCY 656a, Professional Seminar  Andrew Papachristos and faculty
This required seminar aims at introducing incoming sociology graduate students to the department and the profession. Yale Sociology faculty members are invited to discuss their research. There are minimum requirements, such as writing a book review. No grades are given; students should take for Audit. Held biweekly. F 8:50–10:40

SOCY 660b/AFAM 825b, Social Science of the Black Community  Marcus Hunter, Gerald Jaynes
This course surveys existing research and theories in the social sciences on a variety of topics pertaining to the notion of a “black community,” including family, politics, urban change, and migration. Texts include a mix of empirical and theoretical insights from the social sciences (i.e., history, economics, sociology, anthropology, and political science). T 3:30–5:20

Chair
Rolena Adorno

Director of Graduate Studies
Kevin Poole

Professors  Rolena Adorno, Aníbal González, Roberto González Echevarría, K. David Jackson, María Rosa Menocal, Noël Valis

Associate Professor  Paulo Moreira (on leave)

Assistant Professors  Susan Byrne, Leslie Harkema, Kevin Poole

Senior Lector  Ame Cividanes

Fields of Study
Fields include Spanish Peninsular literature, Spanish American literature, Portuguese and Brazilian literatures.

The doctoral program offers: (1) a concentration in Spanish specializing in a single field of study (medieval, Renaissance/Golden Age, modern Spanish Peninsular, colonial Spanish American, contemporary Spanish American); (2) a joint concentration in Spanish and Portuguese offering the student the opportunity to work in both the Luso Brazilian and Spanish/Spanish American fields. In addition, the department participates in (1) a combined Ph.D. program in Spanish and Portuguese and African American Studies offered in conjunction with the Department of African American Studies and (2) a combined Ph.D. program in Spanish and Portuguese and Renaissance Studies offered in conjunction with the Renaissance Studies Program.

Special Admissions Requirements
Thorough command of the language in which the student plans to specialize and a background in its literature, as well as command of at least one of the three additional languages in which the student will need to fulfill requirements.

Application must include GRE scores, a personal statement, and an academic writing sample in the language of the proposed specialization, not to exceed twenty-five pages in length. Students whose native language is not English must submit scores of the Test of English as a Foreign Language (TOEFL).

Special Requirements for the Ph.D. Degree
The department requires two years of course work, sixteen term courses, a grade of Honors in at least two of these courses each year, and a minimum grade average of High Pass. Course work includes two required courses, SPAN 500, History of the Spanish Language, and SPAN 790, Methodologies of Modern Foreign Language Teaching, and
two courses taken outside the department. Also required are a reading knowledge of Latin and a second language, as well as a third language-literature minor. In the third year, the student is expected to pass the qualifying examination (written and oral components) and submit and receive approval of the dissertation prospectus. Upon completion of all predissertation requirements, including the dissertation prospectus, students are admitted to candidacy for the Ph.D. The entire program, including the dissertation, can be completed in five years.

Participation in the department’s teaching and pedagogy program is a degree requirement. It consists of taking the required course SPAN 790 in the second year and teaching one section per term of a course in the beginning language sequence during the third and fourth years of study. Viewed as an integral part of the course of study for the doctorate, this program includes supervision by the director of the language program and course directors.

**Combined Ph.D. Programs**

**SPANISH AND PORTUGUESE AND AFRICAN AMERICAN STUDIES**
The Department of Spanish and Portuguese also offers, in conjunction with the Department of African American Studies, a combined Ph.D. in Spanish and Portuguese and African American Studies. For further details, see African American Studies.

**SPANISH AND PORTUGUESE AND RENAISSANCE STUDIES**
The Department of Spanish and Portuguese also offers, in conjunction with the Renaissance Studies Program, a combined Ph.D. in Spanish and Portuguese and Renaissance Studies. For further details, see Renaissance Studies.

**Master’s Degrees**

**M.Phil.** See Degree Requirements under Policies and Regulations. Additionally, students in Spanish and Portuguese are eligible to pursue a supplemental M.Phil. degree in Medieval Studies. For further details, see Medieval Studies.

**M.A. (en route to the Ph.D.)** The M.A. en route is awarded upon the satisfactory completion of eight term courses and two of the three language requirements (Latin and one other language).

**Courses**

**PORT 990a, Novels of Machado de Assis in Translation** K. David Jackson
A study of the novelistic world of J.M. Machado de Assis (1839–1908), considered the master of the Brazilian novel, in translation, examining his skepticism, narrative innovations, social critiques, and encyclopedic referentiality. M 9:25–11:15

**PORT 991a, Tutorial**
By arrangement with faculty.

**PORT 991b, Tutorial**
By arrangement with faculty.
SPAN 500a, History of the Spanish Language  Kevin Poole
The evolution of modern Spanish from spoken Latin, the origin and development of philology as the foundational discipline of literary studies, the rise of linguistics as a positivist field, the separation of linguistics from literary studies, and the fracturing of Romance studies into separate language and culture fields. In Spanish. W 1:30–3:20

SPAN 503b, Literature of the Spanish Middle Ages  Kevin Poole
This course introduces students to some of the primary literary works of the Castilian Middle Ages and provides the appropriate historical context for further detailed study of this period. Texts studied include the Cantar de Mío Cid and other medieval texts related to the Cid tradition, the Poema de Fernán González, Berceo’s Milagros de Nuestra Señora and Poema de Santa Oria, selections from Alfonso X, Don Juan Manuel’s El Conde Lucanor, Juan Ruiz’s Libro de buen amor, and Jorge Manrique’s “Coplas por la muerte de su padre.” In Spanish. W 1:30–3:20

SPAN 528a, Novels: sentimental, pastoril, y filosófica in Renaissance Spain  Susan Byrne
A study of various forms of “novel” (historia) in Renaissance Spain: sentimental, pastoril, filosófica. We read the works and study the development of the form. Primary texts are Diego de San Pedro’s Cárcel de amor, Juan de Flores’s Historia de Grisel y Mirabella, Jorge de Montemayor’s Los siete libros de la Diana, Cervantes’s La Galatea and Los trabajos de Persiles y Sigismunda: historia septentrional, and Baltasar Gracián’s El Criticón. In Spanish. T 1:30–3:20

SPAN 710a, Leopoldo Alas (Clarín)  Noël Valis
This course focuses on one of the great fin de siglo writers of Spain. Works include La Regenta (and Flaubert’s Madame Bovary in counterpoint), Su único hijo (and Flaubert’s Bouvard et Pécuchet), Doña Berta (and Flaubert’s Un coeur simple), “Superchería,” “Cuervo,” “Pipá,” “Las dos cajas,” “El Señor,” “¡Adiós, Cordera!,” “Viaje redondo,” “Un jornalero,” and “Boroña,” as well as pertinent secondary criticism. In Spanish. M 1:30–3:20

SPAN 790b, Methodologies of Modern Language Teaching  Ame Cividanes
Preparation for a teaching career through readings, lectures, classroom discussions, and presentations on current issues in foreign/second language acquisition theory and teaching methodology. Classroom techniques at all levels. In Spanish. M 3:30–5, practicum M 5–6:30

SPAN 812b, The Polemics of Possession in Early Spanish American Narrative  Rolena Adorno
Fundamental writings on the Spanish Indies from Columbus’s “Letter of discovery” of 1493 to the writings by authors of indigenous American heritage in the first quarter of the seventeenth century. We study them from the vantage point of their own era: their observations of New World realities, their debates about the meanings and rights of Spanish sovereignty, and their incestuous intertextuality, or rather, their literary relationships to one another. The concept of “the polemics of possession” – their varied claims to territorial, political, cultural, and/or literary authority – orients the readings of the seminar. Prose texts by Cristóbal Colón, Hernán Cortés, Bartolomé de las Casas, Juan Ginés de Sepúlveda, Hernán Pérez de Oliva, Álvar Núñez Cabeza de Vaca, Bernal Díaz del Castillo,
El Inca Garcilaso de la Vega, and Felipe Guaman Poma de Ayala are complemented by Alonso de Ercilla’s enduring narrative epic poem. In Spanish. T 1:30–3:20

**SPAN 912b/CPLT 942b, The Borges Effect**  Roberto González Echevarría
Since the publication of *Ficciones* in 1944 and especially since achieving worldwide acclaim after receiving *ex-aequo* with Samuel Beckett the Formentor Group’s Prix International in 1961, Jorge Luis Borges has become one of the most influential modern writers. He is a recognizable and often acknowledged presence in the work of novelists and short-story writers, as well as in that of philosophers and literary theorists. A Borges “effect” can be perceived in John Barth, Julio Cortázar, Gabriel García Márquez, Italo Calvino, and Umberto Eco, and in Maurice Blanchot, Michel Foucault, Gérard Genette, and Jacques Derrida, among others. That effect is also projected retrospectively in Borges’s particular way of reading classics like Homer, Dante, and Cervantes. An elegant, playfully ironic skepticism, together with a fondness for aporias, enigmas, puzzles, and labyrinths as well as for minor genres such as the detective story, are the most recognizable components of Borges’s style and thought. Taken together these components suggest theories about writing and reading. We read closely Borges’s most influential stories, such as “Tlön, Uqbar, Orbis Tertius,” “Pierre Menard, Author of the *Quijote*,” and “The Garden of Forking Paths,” as well as his essays on Homer, Dante, and Cervantes. We then follow his track in the writers mentioned. Readings in English or the French, Spanish, or Italian originals; conducted in English. W 3:30–5:20

**SPAN 936b, Millennials: Twenty-First-Century Latin American Narrative**  
Aníbal González
This course deals with a new group of Spanish American writers whose breakout works were published early in the twenty-first century. Topics to be discussed include post-nationalism, the Crack and McOndo groups, cyberliterature (blogs, social networks), genre fiction (*noir* novels, science fiction). Readings of novels and short stories by Mario Bellatín, Roberto Bolaño, Yuri Herrera, Rodrigo Rey Rosa, Cristina Rivera Garza, Santiago Roncagliolo, Andrés Neuman, Pola Oloixarac, Ena Lucía Portela, Juan Gabriel Vásquez, and Jorge Volpi. In Spanish. TH 1:30–3:20

**SPAN 943a/CPLT 963a, El Neobarroco**  Roberto González Echevarría
A study of the reevaluation of baroque literature (Góngora, Calderón, Quevedo, Sor Juana) by the Spanish Generation of 27, Dámaso Alonso, Pedro Salinas, Jorge Guillén, and twentieth-century Latin American writers such as Alejo Carpentier, José Lezama Lima, Severo Sarduy, Octavio Paz, and others. Theoretical essays such as Alonso’s *La lengua poética de Góngora*, Guillén’s *Lenguaje y poesía*, and Pedro Salinas’s *Reality and the Poet in Spanish Poetry*. Lezama’s *La expresión americana*, Carpentier’s *Tientos y diferencias*, Sarduy’s *Barroco*, and Paz’s *Sor Juana o las trampas de la fe* are analyzed, as are literary works such as Carpentier’s *Concierto barroco*, Lezama’s *Paradiso*, Sarduy’s *Cobra*, and Paz’s *Blanco*. In Spanish. W 3:30–5:20

**SPAN 991a, Tutorial**  
By arrangement with faculty.

**SPAN 991b, Tutorial**  
By arrangement with faculty.
STATISTICS
24 Hillhouse Avenue, 203.432.0666
http://statistics.yale.edu
M.A., Ph.D.

Chair
Harrison Zhou

Director of Graduate Studies
To be announced [F]
David Pollard [Sp] (24 Hlh, david.pollard@yale.edu)

Professors Donald Andrews (Economics), Andrew Barron, Joseph Chang, John Hartigan (Emeritus), Theodore Holford (Public Health; Biostatistics), Peter Phillips (Economics), David Pollard, Heping Zhang (Public Health; Biostatistics), Hongyu Zhao (Public Health; Biostatistics), Harrison Zhou

Associate Professors John Emerson (Adjunct), Mokshay Madiman, Sekhar Tatikonda (Electrical Engineering)

Assistant Professors Lisha Chen, Jing Zhang

Senior Lecturer Jonathan Reuning-Scherer

Lecturer David Salsburg

Fields of Study
Fields comprise the main areas of statistical theory (with emphasis on foundations, Bayes theory, decision theory, nonparametric statistics), probability theory (stochastic processes, asymptotics, weak convergence), information theory, bioinformatics and genetics, classification, statistical computing, and graphical methods.

Special Admissions Requirements
GRE scores for the General Test and for the Subject Test in the area closest to the undergraduate major should accompany an application; for the Ph.D. program, the Math Subject Test is strongly recommended. All applicants should have a strong mathematical background, including advanced calculus, linear algebra, elementary probability theory, and at least one course providing an introduction to mathematical statistics. An undergraduate major may be in statistics, mathematics, computer science, or in a subject in which significant statistical problems may arise. For those whose native language is not English, the Test of English as a Foreign Language (TOEFL) scores are required.

Special Requirements for the Ph.D. Degree
There is no foreign language requirement. Students take at least twelve courses, usually during the first two years. The department strongly recommends that students take STAT 551 (Stochastic Processes), STAT 600 (Advanced Probability), STAT 610 (Statistical Inference), STAT 612 (Linear Models), STAT 625 (Case Studies), and STAT 661
Graduate School of Arts and Sciences 2012–2013

(Data Analysis), and requires that students take STAT 626 (Practical Work). Substitutions are possible with the permission of the DGS. For further details, see the departmental Web site. The qualifying examination consists of three parts: a written report on an analysis of a data set, a written examination on theoretical statistics, and an oral examination. The examination is taken not later than when scheduled by the department in the middle of the second year, with provision for one subsequent reexamination of one or more parts in the event that a student does not pass the first time. All parts of the qualifying examination must be completed before the beginning of the third year. A prospectus for the dissertation should be submitted no later than the first week of March in the third year. The prospectus must be accepted by the department before the end of the third year if the student is to register for a fourth year. Upon successful completion of the qualifying examination and the prospectus (and meeting of Graduate School requirements), the student is admitted to candidacy. Students are expected to attend weekly departmental seminars.

Master’s Degree

M.A. (en route to the Ph.D.) This degree may be awarded upon completion of eight term courses and two terms of residence.

Terminal Master’s Degree Program Students are also admitted directly to a terminal master’s degree program. To qualify for the M.A., the student must successfully complete an approved program of eight term courses, chosen in consultation with the director of graduate studies (DGS). Full-time students must take a minimum of four courses per term. Part-time students are also accepted into the master’s degree program. See Terminal M.A./M.S. Degrees, under Policies and Regulations.

Program information is available on the Web at http://statistics.yale.edu.

Courses

STAT 500b, Introductory Statistics Lisha Chen
An introduction to statistical reasoning. Topics include numerical and graphical summaries of data, data acquisition and experimental design, probability, hypothesis testing, confidence intervals, correlation and regression. Application of statistical concepts to data; analysis of real-world problems. MWF 10:30–11:20

STAT 501–506, Introduction to Statistics
A basic introduction to statistics, including numerical and graphical summaries of data, probability, hypothesis testing, confidence intervals, and regression. Each course focuses on applications to a particular field of study and is taught jointly by two instructors, one specializing in statistics and the other in the relevant area of application. The first seven weeks are attended by all students in STAT 501–506 together as general concepts and methods of statistics are developed. The course separates for the last six and a half weeks, which develop the concepts with examples and applications. Computers are used for data analysis. These courses are alternatives; they do not form a sequence and only one may be taken for credit.
STAT 501a/E&EB 510a, Introduction to Statistics: Life Sciences  Walter Jetz, Jonathan Reuning-Scherer
Statistical and probabilistic analysis of biological problems presented with a unified foundation in basic statistical theory. Problems are drawn from genetics, ecology, epidemiology, and bioinformatics. Graduate students are expected to finish a course project in addition to regular homework and exams. TTH 1–2:15

STAT 502a, Introduction to Statistics: Political Science  Alan Gerber, Jonathan Reuning-Scherer
Statistical analysis of politics, elections, and political psychology. Problems presented with reference to a wide array of examples: public opinion, campaign finance, racially motivated crime, and public policy. TTH 1–2:15

STAT 503a, Introduction to Statistics: Social Sciences  Jonathan Reuning-Scherer
Descriptive and inferential statistics applied to analysis of data from the social sciences. Introduction of concepts and skills for understanding and conducting quantitative research. TTH 1–2:15

STAT 505a, Introduction to Statistics: Medicine  Jonathan Reuning-Scherer, David Salsburg
Statistical methods relied upon in medicine and medical research. Practice in reading medical literature competently and critically, as well as practical experience performing statistical analysis of medical data. TTH 1–2:15

[STAT 506a, Introduction to Statistics: Data Analysis]

STAT 530b, Introductory Data Analysis  John Emerson
Survey of statistical methods: plots, transformations, regression, analysis of variance, clustering, principal components, contingency tables, and time series analysis. The R computing language and Web data sources are used. Prerequisite: STAT 501a. MW 2:30–3:45

STAT 538a, Probability and Statistics  Joseph Chang
Fundamental principles and techniques of probabilistic thinking, statistical modeling, and data analysis. Essentials of probability: conditional probability, random variables, distributions, law of large numbers, central limit theorem, Markov chains. Statistical inference with emphasis on the Bayesian approach: parameter estimation, likelihood, prior and posterior distributions, Bayesian inference using Markov chain Monte Carlo. Introduction to regression and linear models. Computers are used throughout for calculations, simulations, and analysis of data. Prerequisite: differential calculus of several variables; some acquaintance with matrix algebra and computing is assumed. TTH 1–2:15

STAT 541a, Probability Theory  Harrison Zhou
A first course in probability theory: probability spaces, random variables, expectations and probabilities, conditional probability, independence, some discrete and continuous distributions, central limit theorem, Markov chains, probabilistic modeling. Prerequisite: calculus of functions of several variables. MWF 9:25–10:15
STAT 542b\textsuperscript{u}, Theory of Statistics  Andrew Barron

STAT 551b\textsuperscript{u}, Stochastic Processes  David Pollard
Introduction to the study of random processes, including Markov chains, Markov random fields, martingales, random walks, Brownian motion, and diffusions. Techniques in probability such as coupling and large deviations. Applications chosen from image reconstruction, Bayesian statistics, finance, probabilistic analysis of algorithms, genetics, and evolution. MW 1–2:15

STAT 600b\textsuperscript{u}, Advanced Probability  David Pollard
Measure theoretic probability, conditioning, laws of large numbers, convergence in distribution, characteristic functions, central limit theorems, martingales. Some knowledge of real analysis is assumed. TTH 2:30–3:45

STAT 610a, Statistical Inference  Andrew Barron
A systematic development of the mathematical theory of statistical inference covering methods of estimation, hypothesis testing, and confidence intervals. An introduction to statistical decision theory. Knowledge of probability theory at the level of STAT 541a is assumed. TTH 10:30–11:45

STAT 611b, Decision Theory  Harrison Zhou
A detailed study of some topics in statistical decision theory, including admissibility and minimaxity; the James-Stein estimator; Stein’s unbiased estimator of risk; empirical Bayes estimators; hierarchical Bayes methods and random effects; complete class theorems; asymptotic minimaxity for nonparametric estimation; and sparsity models. Prerequisite: STAT 610a.

STAT 612a, Linear Models  Joseph Chang
The geometry of least squares; distribution theory for normal errors; regression, analysis of variance, and designed experiments; numerical algorithms (with particular reference to the R statistical language); alternatives to least squares. Prerequisites: linear algebra and some acquaintance with statistics. MW 11:35–12:50

STAT 625a, Case Studies  John Emerson
Statistical analysis of a variety of statistical problems using real data. Emphasis on methods of choosing data, acquiring data, assessing data quality, and the issues posed by extremely large data sets. Extensive computations using R.

STAT 626b, Practical Work
Individual one-term projects, with students working on studies outside the department, under the guidance of a statistician.

STAT 627a and b, Statistical Consulting  John Emerson
Statistical consulting and collaborative research projects often require statisticians to explore new topics outside their area of expertise. This course exposes students to real problems, requiring them to draw on their expertise in probability, statistics, and data
Statistics 467

Students complete the course with individual projects supervised jointly by faculty outside the department and by one of the instructors. Students enroll for both terms and receive one credit at the end of the year. F 2:30–4:30

STAT 645b/BIS 692b/BB&B 645b, Statistical Methods in Genetics and Bioinformatics  Heping Zhang

Introduction to problems, algorithms, and data analysis approaches in computational biology and bioinformatics; stochastic modeling and statistical methods applied to problems such as mapping disease-associated genes, analyzing gene expression microarray data, sequence alignment, and SNP analysis. Statistical methods include maximum likelihood, EM, Bayesian inference, Markov chain Monte Carlo, and some methods of classification and clustering; models include hidden Markov models, Bayesian networks, and the coalescent. The limitations of current models, and the future opportunities for model building, are critically addressed. Prerequisite: STAT 538a, 542b, or 661a. Prior knowledge of biology is not required, but some interest in the subject and a willingness to carry out calculations using R is assumed.

STAT 660bu, Multivariate Statistical Methods for the Social Sciences  Jonathan Reuning-Scherer

An introduction to the analysis of multivariate data. Topics include principal components analysis, factor analysis, cluster analysis (hierarchical clustering, k-means), discriminant analysis, multidimensional scaling, and structural equations modeling. Emphasis is placed on practical application of multivariate techniques to a variety of examples in the social sciences. Students complete extensive computer work using either SAS or SPSS. Prerequisites: knowledge of basic inferential procedures, experience with linear models (regression and ANOVA). Experience with some statistical package and/or familiarity with matrix notation is helpful but not required. Requirements: regular assignments and a final project. TTH 1–2:15

STAT 661au, Data Analysis  Lisha Chen

By analyzing data sets using the R statistical computing language, a selection of statistical topics are studied: linear and nonlinear models, maximum likelihood, resampling methods, curve estimation, model selection, classification, and clustering. Weekly sessions are held in the Social Sciences Statistical Laboratory. Prerequisite: after or concurrent with STAT 542b. MW 2:30–3:45

STAT 662a, Statistical Computing  John Emerson

Topics in the practice of data analysis and statistical computing, with particular attention to problems involving massive data sets or large, complex simulations and computations. Programming with R, C/C++, and Perl, memory management, interactive and dynamic graphics, and parallel computing.

[STAT 664bu/ENAS 954bu, Information Theory]

STAT 665bu, Data Mining and Machine Learning  Lisha Chen

Techniques for data mining and machine learning are covered from both a statistical and a computational perspective, including support vector machines, bagging, boosting, neural networks, and other nonlinear and nonparametric regression methods. The course gives
the basic ideas and intuition behind these methods, a more formal understanding of how and why they work, and opportunities to experiment with machine learning algorithms and apply them to data. Prerequisite: STAT 542b. MW 2:30–3:45

[STAT 667b/AMTH 605b/ENAS 503b, Probabilistic Networks, Algorithms, and Applications]

STAT 674b/F&ES 781b, Applied Spatial Statistics  Jonathan Reuning-Scherer, Timothy Gregoire
An introduction to spatial statistical techniques with computer applications. Topics include spatial sampling, visualizing spatial data, quantifying spatial association and autocorrelation, interpolation methods, fitting variograms, kriging, and related modeling techniques for spatially correlated data. Examples are drawn from ecology, sociology, public health, and subjects proposed by students. Four to five lab/homework assignments and a final project. The class makes extensive use of the R programming language as well as ArcGIS. TTH 10:30–11:50

[STAT 680a, Nonparametric Statistics]

STAT 681a, Applied Nonparametric Estimation  Mark Hansen
This term, the approach is largely methodological, examining common approaches to function estimation (or, informally, “smoothing”) and comparing them in terms of their algorithmic ingredients: representation and interpretation (basis expansions, kernel methods, Gaussian processes), fitting and evaluation criteria (maximum likelihood, penalized fits, robust modeling, Bayesian approaches), the expression and visualization of uncertainty and complexity (“classical” approaches, the bootstrap, McMC), strategies for model interrogation and comparison, and the underlying computational and numerical techniques. This methodological investigation is supported by a great deal of practical application work, with periodic appeals to relevant (asymptotic) theory where appropriate.

STAT 690a or b, Independent Study
By arrangement with faculty. Approval of DGS required.
Non-Degree-Granting Programs, Councils, and Research Institutes

ATMOSPHERIC SCIENCE

Advisory Committee Hagit Affek (Geology & Geophysics), Sarbani Basu (Astronomy), Michelle Bell (Forestry & Environmental Studies), William Boos (Geology & Geophysics), Alexey Fedorov (Geology & Geophysics), Debra Fischer (Astronomy), Gary Haller (Chemical & Environmental Engineering; Chemistry), Xuhui Lee (Forestry & Environmental Studies), Rajendra Pachauri (Forestry & Environmental Studies), Mark Pagani (Geology & Geophysics), Daniel Rosner (Chemical & Environmental Engineering; Mechanical Engineering & Materials Science), Ronald Smith (Geology & Geophysics), Mitchell Smooke (Mechanical Engineering & Materials Science; Applied Physics), Sabatino Sofia (Astronomy), Trude Storelvmo (Geology & Geophysics), Mary-Louise Timmermans (Geology & Geophysics), Andrew Wells (Applied Mathematics), John Wettlaufer (Applied Mathematics; Geology & Geophysics; Physics)

A number of departments of the Graduate School offer courses dealing with the physics, dynamics, and chemistry of the atmosphere, and the interactions of the atmosphere with the biosphere, oceans, and cryosphere, including all biogeochemical cycles. The mathematical and physical science basis for these phenomena is developed in course work and research foci across a range of departments. In order to permit students whose interests lie in the field of atmospheric science to develop an integrated program of studies, an interdisciplinary program is offered. Typical areas of interest included in the scope of the program are theory of weather and climate, computational fluid dynamics, air pollution from industrial and natural sources, urban environmental health, global climatic change, paleoclimatology, hydrometeorology, and dynamics of atmospheric and oceanic motions. The program is individually planned for each student through a faculty adviser system.

Special Admissions Requirements

A student should, on the basis of scientific orientation, seek admission to one of the participating departments. The Department of Geology and Geophysics is the focus for studies of physical and dynamical meteorology, oceanography, and atmospheric chemistry, with allied methods and approaches in the Program on Applied Mathematics. The departments of Applied Physics, Public Health, and Engineering & Applied Science (which includes the programs of Biomedical Engineering, Chemical & Environmental Engineering, Electrical Engineering, and Mechanical Engineering & Materials Science) provide additional courses in environmental health and atmospherically related processes. The Ph.D. and M.Phil. requirements are those of the admitting departments (see entries in this bulletin).
COMBINED PROGRAM IN THE BIOLOGICAL AND BIOMEDICAL SCIENCES (BBS)

L-203A Sterling Hall of Medicine, 203.785.5663
www.bbs.yale.edu

Director
Lynn Cooley (lynn.cooley@yale.edu)

Fields of Study

The Yale Combined Program in the Biological and Biomedical Sciences (BBS) offers unprecedented access to Yale’s extensive array of bioscience resources, encompassing everything the University has to offer in one comprehensive, interdisciplinary graduate program. BBS has no boundaries, either departmental or geographical. Students therefore have access to courses, seminars, and faculty labs in every department. Moreover, students can participate in research activities anywhere – on the main University campus, West Campus, or the School of Medicine.

Within BBS there are approximately 300 participating faculty, several dozen courses, and a great many seminars from which to choose. BBS is currently divided into seven interest-based “tracks”:

Biochemistry, Biophysics, and Structural Biology
Computational Biology and Bioinformatics
Immunology
Microbiology
Molecular Cell Biology, Genetics, and Development
Molecular Medicine, Pharmacology, and Physiology
Neuroscience

Students apply to and, upon matriculation, affiliate with one of these seven tracks. It is important to note that, regardless of a student’s home track, all courses, faculty, and research opportunities at the University remain available.

Year 1  Each track has a faculty director who helps first-year students select courses and find suitable lab rotations. Students typically take two to three courses per term and conduct two to four lab rotations over the course of the year.

Year 2  Just prior to the start of the second year, students select a thesis adviser in whose lab they will conduct their doctoral research. They also then leave their BBS track and formally join one of twelve Ph.D.-granting programs:

Cell Biology
Cellular and Molecular Physiology
Computational Biology and Bioinformatics
Experimental Pathology
Genetics
Immunobiology
Interdepartmental Neuroscience Program
Microbiology
Molecular Biophysics and Biochemistry
Molecular, Cellular, and Developmental Biology
Neurobiology
Pharmacology

Students in year 2 complete the course requirements for the graduate program they have joined, take a qualifying exam, act as teaching assistants in lecture or lab courses, and begin thesis research.

**Year 3 and beyond**  Students focus primarily on thesis research, publishing their results, and presenting their work at scientific meetings.

The average time to degree is 5.5 years.

For the duration of their studies all students receive a stipend, full tuition, and health coverage. Financial support comes from university fellowships, National Institutes of Health (NIH) training grants, and grants from foundations and companies.

**Special Admissions Requirements**

Entrance requirements to BBS are track-specific but include the following: GRE General Test scores; relevant GRE Subject Test scores (strongly recommended but not a strict requirement); undergraduate major in a relevant biological, chemical, or physical science; three letters of recommendation addressing the student’s academic performance and/or laboratory training; and TOEFL exam scores for students whose native language is not English. Track-specific requirements are listed below.

**BIOCHEMISTRY, BIOPHYSICS, AND STRUCTURAL BIOLOGY**

All applicants are expected to meet general BBS requirements for entrance. Successful applicants will have a firm foundation in the sciences. Desirable courses include biology; biochemistry; general, organic, and physical chemistry; physics; and math. A pertinent GRE Subject Test is strongly recommended.

**COMPUTATIONAL BIOLOGY AND BIOINFORMATICS**

All applicants are expected to meet general BBS requirements for entrance. In addition, successful applicants will have a strong foundation in the basic sciences such as biology, chemistry, and mathematics. Training in computing/informatics is also essential and should include significant computer programming experience. The GRE Subject Test in cellular and molecular biology, biology, biochemistry, chemistry, computer science, or other relevant discipline is recommended. The MCAT is also accepted.

**IMMUNOLOGY**

All applicants are expected to meet general BBS requirements for entrance. In addition, successful applicants are expected to have a firm foundation in the biological and physical sciences. It is preferred that students have taken courses in biology, organic chemistry, biochemistry, genetics, cell biology, physics, and mathematics. Actual course requirements are not fixed, however, and students with outstanding records in any area of the biological sciences may qualify for admission. There are no specific grade requirements for prior course work, but a strong performance in basic science courses is of great
importance for admission. In special cases the Medical College Admission Test (MCAT) may be substituted.

**MICROBIOLOGY**

No additional requirements or recommendations.

**MOLECULAR CELL BIOLOGY, GENETICS, AND DEVELOPMENT**

In addition to general BBS requirements, the GRE Subject Test in Biochemistry, Cell and Molecular Biology, Biology, or Chemistry is recommended.

**MOLECULAR MEDICINE, PHARMACOLOGY, AND PHYSIOLOGY**

All applicants are expected to meet general BBS requirements for entrance. Successful applicants should have a strong background in the biological, chemical, and/or physical sciences. For example, an undergraduate major/degree in biology, biochemistry, physiology, genetics, chemistry, physics, mathematics, engineering, or computer science could be appropriate. Courses in biology, biochemistry, organic and physical chemistry, and mathematics through elementary calculus are strongly recommended.

**NEUROSCIENCE**

All applicants are expected to meet general BBS requirements for entrance. Successful applicants will have a firm foundation in the sciences. The Neuroscience track will accept the Medical College Admission Test (MCAT) in lieu of the Graduate Record Examination (GRE) General Test.

Program materials are available upon request to Bonnie Ellis, Assistant Administrative Director, BBS Program, Yale University, PO Box 208084, New Haven CT 06520-8084; telephone 203.785.5663; fax 203.785.3734; e-mail, bbs@yale.edu; Web site, www.bbs.yale.edu.
THE COWLES FOUNDATION

30 Hillhouse Avenue, 203.432.3702
http://cowles.econ.yale.edu

Director
Donald Andrews

The Cowles Foundation for Research in Economics at Yale University has as its purpose the conduct and encouragement of research in economics and related fields. The Cowles Foundation seeks to foster the development and application of rigorous logical, mathematical, and statistical methods of analysis. Members of the Cowles research staff are faculty members with appointments and teaching responsibilities in the Department of Economics and other departments. Among its activities, the Cowles Foundation provides financial support for research, visiting faculty, postdoctoral fellowships, workshops, and graduate students. Cowles regularly sponsors conferences and publishes a working paper series and research monographs.
THE ECONOMIC GROWTH CENTER

27 Hillhouse Avenue, 203.432.3610
www.econ.yale.edu/~egcenter

Director
Mark Rosenzweig

The Economic Growth Center is a research organization within the Yale Department of Economics that was created in 1961 to analyze, both theoretically and empirically, economic growth and the economic relations between low- and high-income countries. The research program emphasizes the search for regularities in the process of growth and changes in economic structure using existing data sets. In recent years the center has also undertaken new and continuing long-term panel studies and is carrying out randomized field experiments in a number of countries to provide new information on and analyses of the consequences and mechanisms of development. An increasing share of the research involves historical analysis of long-term processes as part of the Economic History Program that is housed in the Economic Growth Center. Current projects in the center include research on technology development; choice and transfer; microfinance and credit markets; formal insurance; household consumption; investment and demographic behavior; the role of networks; agricultural research and productivity growth; labor markets and the returns to education of women and men; income distribution; domestic and international migration; the relationship between trade and development; and international political economy. The center’s research faculty hold appointments in the Department of Economics and other departments and schools at Yale, and accordingly have teaching as well as research responsibilities.

The center sponsors a number of activities, including a regular series of workshops on development, trade, labor and population, and economic history, and provides competitive research grants to graduate students and faculty as well as graduate student fellowships.

The Economic Growth Center Collection, housed in a separate facility at the Center for Science and Social Science Information, is a special collection focused on the statistical, economic, and planning documents of developing countries, including government documents.

The center administers, jointly with the Department of Economics, the Yale master’s degree training program in International and Development Economics.
INSTITUTION FOR SOCIAL AND POLICY STUDIES

77 Prospect Street, 203.432.3234
http://isps.research.yale.edu

Director
Jacob Hacker

Executive Committee  Richard Breen, John Dovidio, Heather Gerken, Benjamin Polak, Ian Shapiro, Jody Sindelar

The Institution for Social and Policy Studies (ISPS) facilitates interdisciplinary inquiry in the social sciences and research on important public policy subjects. Recognizing that important social problems cannot be studied adequately by a single discipline, the Yale Corporation established ISPS in 1968 to stimulate interdisciplinary collaboration within the University. Faculty and students from many departments in the Faculty of Arts and Sciences and from Yale’s graduate and professional schools are involved in a variety of activities. These include interdisciplinary faculty seminars, research projects, postdoctoral programs, and the undergraduate major in Ethics, Politics, and Economics.

As a hub for interdisciplinary policy research and discussion at Yale, ISPS hosts a number of major programs, including the University Interdisciplinary Center for Bioethics, Stephen Latham, director; the Center for the Study of American Politics, Alan Gerber, director; the Agrarian Studies Program, James Scott and K. Sivaramakrishnan, codirectors; and the Program in Ethics, Politics, and Economics, Nicholas Sambanis, director. Through these activities, ISPS seeks to provide intellectual leadership in the social sciences; foster sound and creative research on public policies of local, national, and international significance; and inform both teaching at Yale and academic and public debates beyond Yale.
INTERNATIONAL SECURITY STUDIES

31 Hillhouse Avenue, 203.432.6242
http://iss.yale.edu

Director
Paul Kennedy

International Security Studies (ISS) supports interdisciplinary research and teaching in grand strategy, as well as international, diplomatic, and strategic history. Its goals are to fill the critical national need for educators and leaders with knowledge of these fields; to advance analysis, training, and teaching in its areas of interest; and to provide a forum for informed and independent discussions of historical and contemporary policy thinking and policy making on relevant issues.

ISS is not a degree-granting program: it facilitates the work and welcomes the participation of all Yale undergraduate, graduate, and professional school students in its events and its program of research grants and internship support. ISS is supported by Yale University, the Smith Richardson Foundation, the George Frederick Jewett Foundation, and the Friends of ISS, an organization of private donors.

The Brady-Johnson Program in Grand Strategy at Yale University, led by John Lewis Gaddis, is part of ISS. The program seeks to revive the study and practice of grand strategy by teaching future leaders to appreciate and apply its principles; by supporting undergraduate, graduate, and postdoctoral education and scholarship grounded in these principles; and by promoting a broader recognition of the centrality of grand strategy to successful, pragmatic leadership.

The program, launched in January 2000 and dedicated on December 11, 2006, to Nicholas F. Brady (B.A. 1952) and Charles B. Johnson (B.A. 1954), combines historical depth and analytical range with the belief that training future leaders at the graduate and undergraduate levels is the best long-term investment ISS can make in the future.

Inquiries should be directed to International Security Studies, Yale University, PO Box 208353, New Haven CT 06520-8353. Further information on ISS and the Brady-Johnson Program can be found at http://iss.yale.edu.
Judaic Studies offers an interdisciplinary approach to the critical study of the languages, history, literature, religion, and culture of the Jews. Jewish society, texts, ideologies, and institutions are studied in comparative historical perspective in relation to the surrounding societies and cultures.

Graduate-level programs are available through the following departments: History (Ancient, Medieval, and Modern Jewish History), Religious Studies (History and Literature of Ancient Judaism, Medieval and Modern Jewish History), Near Eastern Languages and Civilizations (Northwest Semitic, Hebrew Language and Literature), Comparative Literature (Hebrew and Comparative Literature). Applications are made to a specific department, and programs of study are governed by the degree requirements of that department.

Other resources include the Judaica collection of Sterling Memorial Library and its Judaica bibliographer, the Fortunoff Archive for Holocaust Testimonies, the biweekly faculty/graduate student Judaic Studies Seminar, several lecture series, postdoctoral fellowships, and graduate fellowships in Judaic Studies.

Program materials are available on request to the director of graduate studies of the department of intended specialization, or to the Chair, Program of Judaic Studies, Yale University, PO Box 208282, New Haven CT 06520-8282, and at www.yale.edu/judaicstudies.
Courses

JDST 676bu/RLST 735bu, Babylonian Aramaic  Yochanan Breuer
This course deals with the Aramaic dialect used in the Babylonian Talmud and Gaonic literature. In addition to the basic structure of this dialect, we focus on its peculiarities (compared with other dialects of Aramaic), the methodology in investigating it, its various types, its contacts with other languages (especially Hebrew), and its importance for a proper understanding of the Jewish Babylonian literature, mainly the Babylonian Talmud, which is probably the most influential composition in Jewish heritage. W 9:25–11:15

JDST 712a/RLST 811a, Judaism in the Time of Jesus  John J. Collins
Analysis of main features of Judaism in the land of Israel around the turn of the era. We consider whether it is possible to speak of Common Judaism, and we discuss the importance of the law, sectarianism, apocalypticism, and other currents. Brief overview of the history of Judea between 200 B.C.E. and 135 C.E. Prerequisite: introductory course on either Hebrew Bible or New Testament. Research paper required. T 1:30–3:20

JDST 718b/RLST 818b, Postexilic Prophecy  John J. Collins
Exegesis of parts of Isaiah, Zechariah, Haggai, and Malachi. Examination of the relation of postexilic prophecy to apocalypticism, and of the social function of prophecy at this time. M 3:30–5:20

JDST 721bu/RLST 751bu, Introduction to Judaism in the Ancient World: From Temple to Talmud  Steven Fraade
The emergence of classical Judaism in its historical setting. Jews and Hellenization; varieties of early Judaism; apocalyptic and postapocalyptic responses to suffering and catastrophe; worship and atonement without sacrificial cult; interpretations of scriptures; law and life; the rabbi; the synagogue; faith in reason; Sabbath and festivals; history and its redemption. No prior background in Jewish history presumed. MW 11:35–12:50

JDST 734b/RLST 740b, Rabbinic Texts  Christine Hayes
A close study of classical rabbinic sources with attention to questions of both form and content, critical methods, and cultural and historical context. Designed for doctoral students in Ancient Judaism. T 2:30–4:30

JDST 736bu/RLST 746bu, Midrash Seminar: The Theophany at Sinai  Steven Fraade
The giving of the Torah to Israel as seen through rabbinic eyes. Close readings of midrashic texts. Views of revelation, tradition, interpretation, law, and commandment in their literary and historical contexts. Interpretations and interpretive strategies compared and contrasted with those of other ancient biblical exegetes (Jewish and non-Jewish). Prerequisite: reading knowledge of ancient Hebrew. TH 9:25–11:15

JDST 747au/RLST 736au, Rabbis and Others in Late Antiquity: Contextualizing Classical Rabbinic Narratives  Richard Kalmin
This course focuses on important issues involved in the study of relations between Jews and other religious and ethnic groups in Persian and Roman Mesopotamia during late antiquity. Through close reading of primary texts and secondary literature, attention is
given to Syriac-speaking Christians, Zoroastrians, and indigenous Babylonian pagans. Groups and individuals that vied with the rabbis for power over the Jewish community, such as dream interpreters, aristocrats claiming royal descent, magicians, holy men, and astrologers, are also examined. M 2:30–4:30

**JDST 756a/RLST 756a, Ancient Judaism Seminar: The Temple Scroll**  
Steven Fraade

The topic of this seminar, which is required of graduate students in Ancient Judaism, changes yearly. This term we study the Temple Scroll, one of the most important of the Dead Sea Scrolls. Attention to its place within the history of the biblical text and biblical interpretation and the development of ancient Jewish law, the nature and function of its textual practices, and its relation to the more clearly sectarian of the Qumran writings. Possible topics to be covered: cultic calendar, temple constructions, sacrifice, ritual purity, priests, kings, prophets, judiciary, marital vows, sexual taboos, and holy war. Prerequisite: reading knowledge of ancient Hebrew. W 1:30–3:20

**JDST 761a/HIST 535a/RLST 773a, History of the Jews and Their Diasporas to Early Modern Times**  
Ivan Marcus

A broad introduction to the history of the Jews from biblical beginnings until the European Reformation and the Ottoman Empire. Focus on the formative period of classical rabbinic Judaism and on the symbiotic relationships among Jews, Christians, and Muslims. An overview of Jewish society and culture in its biblical, rabbinic, and medieval settings. TTH 11:35–12:50

**JDST 763a, Medieval Jews, Christians, and Muslims Imagining Each Other**  
Ivan Marcus

How members of Jewish, Christian, and Muslim communities thought of and interacted with members of the other two cultures during the Middle Ages. Topics include the cultural grids and expectations each imposed on the other; the rhetoric of otherness such as humans or devils, purity or impurity, and animal imagery; and models of religious community and power in dealing with the other when confronted with cultural differences. T 1:30–3:20

**JDST 767a/HIST 957a, Marriage and Kinship in Medieval Near East**  
Eve Krakowski

Kinship relationships and family life in the Cairo Geniza documents. The legal and social construction of marriage; parents and children; the structure and function of the extended patriarchal family; slaves and other non-kin in the household; kinship and social capital. MW 11:35–12:50

**JDST 770b, Jewish Society in the Medieval Crown of Aragon**  
Yom Tov Assis

Jewish society in the medieval Crown of Aragon in the thirteenth and fourteenth centuries, a period of transition when the Crown of Aragon expanded its territories during the Reconquista, followed by a period of stability leading to tragic decline. Attention is paid to the structure of Jewish society and the impact of external factors on its formation T 3:30–5:20
JDST 771b/HIST 958b/RLST 769b, Jewish Law in the Islamic State, 900–1500
Eve Krakowski
Jewish legal identity and the social practice of Jewish law in the medieval Islamic Near East. Islamic political contexts of Jewish communal institutions; leadership, authority, and coercion; practices and functions of legal courts; comparative readings of response, legal documents, and prescriptive legal codes. T 9:25–11:15

JDST 786a/PHIL 605a, Jewish Philosophy in the Twentieth Century
Michael Morgan
Major figures in the tradition of Jewish philosophy during the twentieth century. Engagement with the Western philosophical tradition, especially in Europe and postwar America. The impact of the Six-Day War and the Nazi Holocaust on American Jewish thinkers. TH 9:25–11:15

JDST 788b/HIST 979b/RLST 768b, Holocaust in Historical Perspective
Marc Saperstein
A survey of the major historical issues raised by the Holocaust, including the roots of Nazism; different theoretical perspectives and ways of accounting for genocide; the behavior of perpetrators, victims, and bystanders; and problems of representation. TTH 10:30–11:20, 1 HTBA

JDST 794b, Early Modern Jewish History, 1450–1789
Marc Saperstein
A study of Jewish historical experience during the transitional period from the Expulsion of 1492, which ended the millennial experience of Jews in Spain, to the French Revolution, which elevated Jews to a status of equality in a framework that refused to recognize distinctions of legal status. The course examines the dynamics of Jewish life in Portugal, Italy, Germany, eastern Europe, Amsterdam, and England. Challenges to traditional Jewish life are highlighted: skeptical critique of Jewish tradition, the messianic movement of Sabbatai Zevi, Hasidism, and Haskalah (Enlightenment). Emphasis is on new trends in historiography (studies written in the past generation by American and Israeli scholars). T 1:30–3:20

JDST 797a/PHIL 654a, Emmanuel Levinas: Ethics as First Philosophy
Michael Morgan
Emmanuel Levinas (1906–1995) is among the half-dozen most important Jewish thinkers of the twentieth century. The course examines works from every stage of Levinas’s career, from his early study of Husserl and Heidegger to the emergence of his new understanding of the human condition and the primacy of ethics, the face-to-face encounter with the human other, the role of language and the relationship between ethics and religion, and finally his understanding of Judaism and its relationship to Western philosophy. TH 1:30–3:20

JDST 799a/AMST 692a/HSAR 730a, Religion and the Performance of Space
Margaret Olin, Sally Promey
This interdisciplinary seminar explores categories, interpretations, and strategic articulations of space in a range of religious traditions. In conversation with the work of theorists of space such as Henri Lefebvre, Michel de Certeau, and Jonathan Z. Smith,
the seminar examines spatial practices of religion in the United States during the modern era, including the conception, construction, and enactment of religious spaces. It is structured around theoretical issues, including (historical) deployments of secularity as a framing mechanism, ideas about space and place, and relations between property and spirituality. Examples of case studies treated in class include the enactment of rituals within museums, the marking of religious boundaries such as the Jewish eruv, and the assignment of “spiritual” ownership in Hawai’i Volcanoes National Park. Several campus events, including special lectures and symposia, the Religion and Film series, and a concurrent exhibition on the eruv, are coordinated with the seminar. Students make presentations and submit papers on topics of their choosing in consultation with the instructors. Prerequisite: permission of the instructors; qualified undergraduates are welcome. T 1:30–3:20

JDST 800a/FREN 925a/HIST 745a, Judging the Holocaust: Law, History, and Politics  Henry Rousso
For the first time in history, the perpetrators of a mass crime were sued after 1945 in an international court, while many others were hunted across the world over seven decades. Judging the crimes committed during the Holocaust led to new legal qualifications (genocide, crimes against humanity), as well as new conceptions of time, history, and memory. This seminar, which is partly based on films and video excerpts, deals with some of the major war crimes trials (Nuremberg, Eichmann, Barbie, Papon) and other judicial cases related to the Holocaust (the Kasztner affair, the laws against the deniers). It focuses on their moral and political impact, as well as their effectiveness in providing “historical narratives” or preventing new forms of racism and anti-Semitism. T 9:25–11:15

For course offerings in the Hebrew language and in Israeli society and culture, see Near Eastern Languages and Civilizations.
THE WHITNEY AND BETTY MACMILLAN CENTER
FOR INTERNATIONAL AND AREA STUDIES AT YALE

Luce Hall, 203.432.3410
www.yale.edu/macmillan

Director
Ian Shapiro (Political Science)

For more than four decades the Whitney and Betty MacMillan Center for International and Area Studies at Yale has been the University’s principal institution for encouraging and coordinating teaching and research on international affairs and on societies and cultures around the world. The MacMillan Center endeavors to make understanding the world outside the borders of the United States an integral part of liberal education and professional training at the University. It brings together scholars from all relevant schools and departments to provide insightful interdisciplinary comparative and problem-oriented teaching and research on regional, international, and global issues.

The MacMillan Center provides eleven degree programs. The seven undergraduate majors include African Studies; East Asian Studies; Global Affairs; Latin American Studies; Modern Middle East Studies; Russian and East European Studies; and South Asian Studies. The four graduate degree programs award master’s degrees in African Studies, East Asian Studies, International Relations, and European and Russian Studies. There are joint-degree graduate programs with the schools of Forestry & Environmental Studies, Law, Management, and Public Health. Additionally, the programs offer seven Graduate Certificates of Concentration: in African Studies, European Studies, Global Health, International Development Studies, International Security Studies, Latin American and Iberian Studies, and Modern Middle East Studies.

The many councils, committees, and programs at the MacMillan Center support research and teaching across departments and professions, support doctoral training, advise students at all levels, and provide extracurricular learning opportunities, as well as funding resources for student and faculty research related to their regions and subject areas. Regional studies programs include African Studies, British Studies, Canadian Studies, East Asian Studies, European Studies, Hellenic Studies, Latin American and Iberian Studies, Middle East Studies, South Asian Studies, and Southeast Asia Studies. Comparative and international programs include the Jackson Institute for Global Affairs; the Center for the Study of Globalization; European Union Studies; Genocide Studies; the Gilder Lehrman Center for the Study of Slavery, Resistance, and Abolition; Global Health; Global Justice; International and Comparative Political Economy; International Security Studies; Order, Conflict, and Violence; Program on Democracy; and Religion, Politics, and Society.

The MacMillan Center’s regional councils regularly teach all levels of nine foreign languages (Modern Greek, Hindi, Indonesian, Sanskrit, Swahili, Urdu, Vietnamese, Yorùbá, Zulu). With the Jackson Institute, they collaborate with the Center for Language Study in supporting Directed Independent Language Study of another sixty-four languages for undergraduate, graduate, and professional school students.
The MacMillan Center provides opportunities for scholarly research and intellectual innovation; awards nearly 500 fellowships and grants each year; encourages faculty/student interchange; sponsors some 750 lectures, conferences, workshops, seminars, and films each year (most of which are free and open to the public); produces a range of working papers and other academic publications; and contributes to library collections comprising 1.4 million volumes in the languages of various areas. In addition to administering the master’s program in International Relations, the Jackson Institute for Global Affairs provides career counseling services to Yale students interested in diplomatic service or careers with international agencies or nongovernmental organizations. Through the Programs in International Educational Resources (PIER), it brings international education and training to educators, K−12 students, the media, businesses, and the community at large. The MacMillan Center also supports The MacMillan Report, an online show that features Yale faculty in international and area studies and their research in a one-on-one interview format. Webisodes can be viewed at www.yale.edu/macmillanreport.

For details on degrees, programs, and faculty leadership, please consult www.yale.edu/macmillan.

**Graduate Certificates of Concentration in International and Area Studies**

**GENERAL GUIDELINES — PROGRAM DESCRIPTION**

The Whitney and Betty MacMillan Center for International and Area Studies at Yale, through the Jackson Institute for Global Affairs and the regional councils on African, European, Latin American and Iberian, and Middle East Studies, sponsors graduate certificates of concentration that students may pursue in conjunction with graduate-degree programs in the Graduate School of Arts and Sciences and the professional schools. The certificate is intended for students seeking to demonstrate substantial preparation in the study of one of the seven areas of concentration: regional (Africa, Europe, Latin America, Middle East) or thematic and international (Development, Global Health, and Security).

Candidates for the certificate must demonstrate expertise in the area of concentration through their major graduate or professional field, as well as show command of the diverse interdisciplinary, geographic, and cultural-linguistic approaches associated with expertise in the area of concentration. Admission to the graduate certificate is contingent on the candidate’s acceptance into a Yale graduate-degree program. Award of the graduate certificate, beyond fulfilling the relevant requirements, is contingent on the successful completion of the candidate’s Yale University degree program.

**Application Procedure**

Specific requirements of each council are reflected in its application, monitoring, and award procedures. Application forms can be picked up at the relevant council or downloaded from its Web site. Prospective students should submit a completed application form to the relevant council.

Applications may be submitted by students admitted to a graduate program at Yale or during their program of study but no later than the beginning of the penultimate term.
of study. Each council may set limits on the number of candidates for its program in any given year. For further information, see the council administrator.

**Summary of General Requirements**

While the general requirements are consistent across all councils of the MacMillan Center, the specific requirements of each council may vary according to the different expertise required for its area of concentration. In addition to the specific requirements, students pursuing the certificate are expected to be actively engaged in the relevant council’s intellectual community and to be regular participants at its events, speaker series, and other activities. Serious study, research, and/or work experience overseas in the relevant region is highly valued. The requirements:

1. Six courses in the area of concentration (in at least two different fields).
2. Language proficiency in at least one language relevant to the area of concentration beyond proficiency in English. For some councils and for some individual circumstances, proficiency in two languages beyond English is required.
3. Interdisciplinary research paper focused on the area of concentration.

**Further Details on General Requirements**

1. **Course work**
   
   Students must complete a total of six courses focused on the area from at least two different fields including a Foundations Course if designated by the council. Of the remaining five courses only two may be “directed readings” or “independent study.”

   Please note:
   - No more than four courses may count from any one discipline or school.
   - Courses from the home field of the student are eligible. Courses may count toward the student’s degree as well as toward the certificate.
   - Literature courses at the graduate level may count toward the six-course requirement, but elementary or intermediate language courses may not. At the discretion of the faculty adviser, an advanced language course at the graduate level may be counted if it is taught with substantial use of field materials such as literature, history, or social science texts and journals relevant to the area.
   - Course work must demonstrate broad comparative knowledge of the region rather than focus on a specific country.
   - Course work must demonstrate a grasp of the larger thematic concerns affecting the region, such as environment, migration, or global financial movements.
   - Only those courses listed on the Graduate Course Listings provided by the area council may be used to fulfill course requirements. For courses not listed there, please consult the certificate adviser. Non-listed courses may only be counted with prior approval of the council adviser, not after the fact.
   - A minimum grade of HP must be obtained or the course will not be counted toward the certificate.
   - Only course work taken during the degree program at Yale may be counted toward the certificate.
2. Language proficiency
In the major-area language targeted for meeting the proficiency requirement, students must demonstrate the equivalent ability of two years of language study at Yale with a grade of HP or better. Language proficiency must encompass reading, writing, speaking, and listening skills plus grammar. Students may demonstrate proficiency by completing course work, by testing at Yale, or by other means as approved by the council adviser. When a second major language of the region beyond English is required, the relevant council will specify the target level. The typical departmental graduate reading exam is not sufficient for certifying the four-skill language requirement of the certificate.

Normally, when the candidate is a native speaker of one of the area's major languages, he/she will be expected to develop language proficiency in a second major area language.

3. Interdisciplinary research paper
A qualifying research paper is required to demonstrate field-specific research ability focused on the area of concentration. After they have completed substantial course work in the area of concentration, students must seek approval from the council faculty adviser for the research project they propose as the qualifying paper. Normally, the student will submit the request no later than the fourth week of the term in which he or she plans to submit the qualifying paper.

The interdisciplinary research paper may be the result of original research conducted under the supervision of a faculty member in a graduate seminar or independent readings course or in field research related to the student's studies. An M.A. thesis, Ph.D. prospectus, or dissertation may also be acceptable if it is interdisciplinary as well as focused on the area of concentration. The qualifying paper should examine questions concerning the area of concentration in a comparative and/or interdisciplinary context. It should also use relevant international and area-focused resource materials from a relevant region and/or resource materials in the language(s) of a relevant region or regions. Normally the paper should incorporate at least two of the following elements:

• Address more than one country relevant to the area of concentration
• Draw on more than one disciplinary field for questions or analytic approaches
• Address a transregional or transnational theme relevant to the area of concentration

The paper will be read by two faculty members selected in agreement with the council adviser. The readers will be evaluating the paper for the quality of research, knowledge of the relevant literature, and depth of analysis of the topic. The qualifying paper must be fully footnoted and have a complete bibliography. The council adviser may call for a third reader as circumstances warrant.

Progress Reports and Filing for the Award of the Certificate/Qualification
Students should submit a progress report along with a copy of their unofficial transcript to the council faculty adviser at the end of each term. Ideally, this will include a brief narrative describing the student's engagement in the relevant council's intellectual
community and participation in its events, speaker series, and the like, as well as any planned or newly completed experience overseas.

A student who intends to file for the final award of the certificate should contact the council no later than the end of the term prior to award. By the fourth week of the term of the expected award at the latest, the candidate should demonstrate how he/she has or will have completed all the requirements on time.

At the end of the term as grades are finalized, the council will confirm that the candidate is cleared to receive the home degree and has fulfilled all the requirements of the certificate. The final award will require review and clearance by the relevant associate director of the MacMillan Center.

**Pursuit of Two Certificates by a Single Student**

No courses may overlap between the two certificates. Any application for two certificates by a single student must robustly fulfill all of the requirements for each of the two certificates. Each certificate must be approved independently by each respective council’s certificate adviser.

In addition to the approval of both council advisers, any award of two certificates will require review and approval by the relevant associate director of the MacMillan Center.
COUNCIL ON AFRICAN STUDIES

The MacMillan Center
309 Luce Hall, 203.432.9903
www.yale.edu/macmillan/african
Graduate Certificate of Concentration in African Studies

Chair
Christopher Udry (Economics)

Faculty
For faculty listings, see the section on African Studies under Degree-Granting Departments and Programs in this bulletin.

Special Requirements for the Graduate Certificate of Concentration in African Studies

The Graduate Certificate of Concentration in African Studies enables graduate and professional school students in fields other than African Studies to demonstrate interdisciplinary area expertise, language proficiency, and research competence in African Studies. The certificate program is intended to complement existing fields of studies in other M.A. and Ph.D. programs and to provide the equivalent of such specialization for students in departments and schools without Africa-related fields of study. The certificate program is designed to be completed within the time span of a normal Ph.D. residence. Professional school students and M.A. students in the Graduate School may require an additional term of registration to complete the certificate requirements depending on the requirements of specific programs.

The certificate program includes interdisciplinary course work, language study, and research components. The specific requirements are:

1. Successful completion of at least six courses in African Studies from at least two departments or schools, one of which is a core course in African Studies (AFST 764b, Topics in African Studies, or AFST 501a, Research Methods in African Studies).
2. Demonstration of proficiency in an African language.
3. Evidence of research expertise in African Studies. Research expertise may be demonstrated by completion of an interdisciplinary thesis, dissertation prospectus, or dissertation or by completion of a substantive research seminar paper or the equivalent as approved by the faculty adviser.

The certificate courses and research work should be planned to demonstrate clearly fulfillment of the goals of the certificate. Certificate candidates should design their course schedules in consultation with the director of graduate studies for African Studies. Ideally, students should declare their intention to complete the certificate requirements early in their program at Yale. Graduate and professional school students who intend to complete the certificate program must declare their intention to do so no later than during their penultimate term of enrollment.
For course listings, see African Studies under Degree-Granting Departments and Programs in this bulletin.

Program materials are available upon request to the Director of Graduate Studies, Council on African Studies, Yale University, PO Box 208206, New Haven CT 06520-8206; e-mail, africanstudies@yale.edu.
COUNCIL ON EAST ASIAN STUDIES

The MacMillan Center
320 Luce Hall, 203.432.3426
http://eastasianstudies.research.yale.edu

Chair
Daniel Botsman (History)

Faculty
For faculty listings, see the section on East Asian Studies, under Degree-Granting Departments in this bulletin.

The Council on East Asian Studies (CEAS) was founded in 1961 and continues a long tradition of East Asian Studies at Yale. CEAS provides an important forum for academic exploration and support related to the study of China, Japan, and Korea. For almost fifty years, it has promoted education about East Asia both in the college curricula and through lectures and workshops, conferences, cultural events, and educational activities open to faculty, students, K–16 educators, and the general public. CEAS has been designated a National Resource Center for the study of Asian languages and cultures by the U.S. Department of Education. With more than twenty core faculty and twenty language instructors spanning twelve departments on campus, East Asian Studies remains one of Yale’s most extensive area studies programs. Its interdisciplinary emphasis encourages collaborative linkages across fields and departments and contributes to diversity across the curricula and in the classroom. Approximately one hundred fifty courses on East Asia in the humanities and social sciences are offered each year.

CEAS administers Bachelor of Arts (B.A.) and Master of Arts (M.A.) programs. The M.A. program focuses on Chinese, Japanese, and East Asian transnational studies. For details on the M.A. program, see the section on East Asian Studies, under Degree-Granting Departments in this bulletin.
EUROPEAN STUDIES COUNCIL

The MacMillan Center
342 Luce Hall, 203.432.3423
www.yale.edu/macmillan/europeanstudies
Graduate Certificate of Concentration in European Studies

Chair
Philip Gorski (Sociology)

Faculty and Participating Staff
For faculty listings, see the section on European and Russian Studies under Degree-Granting Departments and Programs in this bulletin.

The European Studies Council formulates and implements new curricular and research programs on European politics, culture, economy, society, and history. The geographical scope of the council’s activities extends from Ireland to the lands of the former Soviet Union. Its concept of Europe transcends the conventional divisions into Western, Central, and Eastern Europe, and includes the Balkans and Russia. In 2010 the U.S. Department of Education again designated the council a National Resource Center under its HEA Title VI program.

The European Studies Council builds on existing programmatic strengths at Yale while serving as a catalyst for the development of new initiatives. Yale's current resources in European Studies are vast and include the activities of many members of the faculty who have teaching and research specialties in the area. Such departments as Comparative Literature, Economics, English, History, History of Art, Political Science, Slavic Languages and Literatures, and Sociology regularly offer courses with a European focus. These are complemented by the rich offerings and faculty strength of the French, German, Italian, Slavic, and Spanish and Portuguese language and literature departments, as well as the European resources available in the professional schools and other programs, such as Film Studies. By coordinating Yale's existing resources, including those in the professional schools, encouraging individual and group research, and promoting an integrated comparative curriculum and degree programs, the council strongly supports the disciplinary and interdisciplinary study of European regions and their interactions. The council is also home to special programs in European Union Studies, British Studies, Baltic Studies, and Hellenic Studies, and to initiatives in Polish Culture and Dutch.

In addition to the M.A. degree program, the council offers students in the University's doctoral and other professional degree programs the chance to obtain a Graduate Certificate of Concentration in European Studies by fulfilling a supplementary curriculum. The undergraduate major in Russian and East European Studies is administered by the Department of Slavic Languages and Literatures.

The benefits provided to the Yale community by the European Studies Council include not only its status as an HEA Title VI National Resource Center, but also its affiliation with interuniversity and international organizations that can offer specialized training programs and research grants for graduate students (see http://studentgrants.yale.edu), support conferences among European and American scholars, and subsidize
European visitors to Yale. The Fox International Fellowship Program, for example, offers generous fellowship support to qualified students who undertake research at specified institutions in the United Kingdom, Germany, France, and Russia. Furthermore, the council supplements the regular Yale curriculum with lectures and seminars by eminent European and American scholars, diplomats, and political officials. Each year the European Commission sponsors a European Union Fellow at Yale. The European Studies Council is now pursuing formal links with a variety of European institutions and is in its sixth year of a scholarly exchange with École des Hautes Études en Sciences Sociales (EHESS) in Paris.

**Fields of Study**

European and Slavic languages and literatures; economics; history; music; political science; law; sociology and other social sciences.

**Graduate Certificate of Concentration in European Studies**

Yale students may pursue the Graduate Certificate of Concentration in European Studies in conjunction with graduate-degree programs in the Graduate School of Arts and Sciences and the professional schools. Candidates will specify as an area of primary focus either (1) Russia and Eastern Europe or (2) Central and Western Europe. Admission is contingent on the candidate’s acceptance into a Yale graduate-degree program. To complete the certificate, candidates must demonstrate expertise in the area through their major graduate or professional field, as well as show command of the diverse interdisciplinary, geographic, and cultural-linguistic approaches associated with expertise in the area of concentration. Award of the certificate, beyond fulfilling the relevant requirements, is contingent on successful completion of the candidate’s Yale University degree program.

Certificate candidates must comply with the general requirements for all MacMillan Center graduate certificates, as described at [www.yale.edu/macmillan/grad_certificates.htm](http://www.yale.edu/macmillan/grad_certificates.htm).

**Additional Requirements Specific to European Studies**

1. Minimum L4 language proficiency in two modern European languages, in addition to English. Students wishing to focus on Russia and Eastern Europe must demonstrate knowledge of Russian or an Eastern European language; those focusing on Central and Western Europe must demonstrate knowledge of one of the appropriate languages. Students must demonstrate proficiency in oral (speaking/listening), reading, and writing skills.

2. Six courses in the area of concentration, of which:
   a. three courses must offer transnational approaches to Europe-related issues, and
   b. of the remaining three courses, students focusing on Russia and Eastern Europe must take at least one course concerning the nations of Central and Western Europe. For those focusing on Central and Western Europe, at least one course must concern Russia and Eastern Europe.
3. Interdisciplinary research paper written either:
   a. in the context of one of the six courses in the area of concentration, or
   b. as independent work under faculty supervision, replacing one of the six required courses.

A qualifying research paper is required to demonstrate field-specific research ability focused on the area of concentration. After they have completed substantial course work in the area, students must seek approval from the council faculty adviser for the research project they propose as the qualifying paper. Normally, students will submit their proposals no later than the fourth week of the term in which they plan to submit the qualifying paper.

For course listings, see European and Russian Studies under Degree-Granting Departments and Programs in this bulletin.

For more information, write to European Studies Council, Yale University, PO Box 208206, New Haven CT 06520-8206; or call 203.432.3423.
Graduate Certificate of Concentration in Development Studies

The Graduate Certificate of Concentration in Development Studies provides recognition that a graduate or professional student at Yale has completed interdisciplinary study and integrative research to address fundamental and applied economic, political, social, and cultural issues facing developing countries.

The certificate in Development Studies may be pursued only in conjunction with graduate degree programs in the Graduate School of Arts and Sciences and the professional schools. Students who enroll in the International Relations M.A. program in fall 2012 or later are not eligible for this certificate. The certificate allows students to develop and demonstrate their competence in this interdisciplinary field. Award of the certificate, beyond fulfilling the relevant requirements, is contingent on the successful completion of the candidate’s Yale University degree program. The Development Studies faculty adviser may set a limit on the number of applicants accepted into this certificate program in any given year.

The certificate courses and research should be planned, in consultation with the Development Studies faculty adviser, to clearly demonstrate fulfillment of the goals of the Development Studies certificate. The application deadline is November 15 each year.

Requirements

1. Six courses in the area of Development Studies. Each year, the Development Studies faculty adviser will provide a list of courses that will count toward the six-course requirement. This list will draw primarily on Graduate School offerings in economics, political science, history, international relations, anthropology, and sociology, and on courses at the professional schools, including Forestry & Environmental Studies, Law, Management, and Public Health. Candidates may petition the faculty adviser to have other relevant courses count.

2. Candidates must demonstrate proficiency in one relevant language other than English. The language should be either a major world language relevant to development studies or the language of the region on which the candidate is focusing.
3. Candidates must demonstrate proficiency in the basic concepts of economic analysis, either by demonstrating substantial prior course work in economics or by taking a graduate- or professional-level economics course at Yale. Such a course may count toward the certificate with the approval of the faculty adviser.

4. Candidates must write a substantial research paper. The paper must demonstrate the ability to use interdisciplinary resources in development studies, including, where appropriate, primary sources, field research, data analysis, and non-English sources.

**Graduate Certificate of Concentration in Global Health**

Graduate and professional students at Yale may pursue the Graduate Certificate of Concentration in Global Health as part of their degree program. M.P.H. students enrolled in the Global Health Concentration at Yale School of Public Health are not eligible for this certificate. This certificate allows students to develop expertise and demonstrate competence in Global Health and provides recognition that a student has completed interdisciplinary study and integrative research to address fundamental and applied economic, political, social, cultural, and scientific issues relevant to Global Health.

Students are expected, in consultation with the Global Health faculty adviser, to develop a coherent plan of courses and research that focuses on a specific significant Global Health issue that requires an interdisciplinary perspective (e.g., health and human rights, the worldwide obesity epidemic, economic development and tropical diseases). Often this focal issue will be studied in the context of a particular region of the world (e.g., East Asia, Latin America, sub-Saharan Africa) or comparatively across countries or regions.

We expect that students pursuing the certificate will engage with the community of scholars and practitioners working on Global Health at Yale and around the world, demonstrating the ability and cultural sensitivity to work with them in languages beyond English. Overseas field experience in Global Health is also highly desirable. The application deadline is November 15 each year. Master’s students in particular are advised to apply during the fall term of their first year.

**REQUIREMENTS**

1. Six courses in the area of Global Health. Each year, the Global Health faculty adviser will provide a list of courses that will count toward the six-course requirement. Candidates must work with the adviser to organize their course selections around their chosen focal issue within Global Health. Two courses must be from the School of Public Health, one of which must provide a broad-based foundation in epidemiology.

2. Candidates must demonstrate proficiency in one relevant language other than English. The language should be either a major world language relevant to global health or one of the main working languages of the region on which the candidate is focusing.

3. Candidates must write a substantial, interdisciplinary research paper. The paper must demonstrate the ability to use interdisciplinary resources in global health, including, where appropriate, field research, primary sources, data analysis, and non-English sources.
Graduate Certificate of Concentration in International Security Studies

The Graduate Certificate of Concentration in International Security Studies provides recognition that a graduate or professional student at Yale has completed interdisciplinary study and integrative research to address fundamental and applied economic, political, social, and cultural issues relevant to the study of international security.

The certificate in International Security Studies may be pursued only in conjunction with graduate degree programs in the Graduate School of Arts and Sciences and the professional schools. Students who enroll in the International Relations M.A. program in fall 2012 or later are not eligible for this certificate. The certificate allows students to develop and demonstrate their competence in this interdisciplinary field. Award of the certificate, beyond fulfilling the relevant requirements, is contingent on successful completion of the candidate’s Yale University degree program. The International Security Studies faculty adviser may set a limit on the number of applicants accepted into this certificate program in any given year.

The certificate courses and research should be planned, in consultation with the International Security Studies faculty adviser, to clearly demonstrate fulfillment of the goals of the International Security Studies certificate. The application deadline is November 15 each year.

Requirements

1. Six courses in the area of International Security. Each year, the International Security Studies faculty adviser will provide a list of courses that will count toward the six-course requirement. This list will draw primarily on Graduate School offerings in anthropology, economics, history, international relations, political science, and sociology, and on courses at the professional schools, including Forestry & Environmental Studies, Law, Management, and Public Health. Candidates may petition the faculty adviser to have other relevant courses count.

   One of these six courses must have a core focus on international security issues. The International Security Studies faculty adviser will provide a list of courses each year that meet this requirement.

   Up to three courses may focus on a particular region.

2. Candidates must demonstrate proficiency in one relevant language other than English. The language should be either a major world language relevant to international security studies or the language of the region on which the candidate is focusing.

3. Candidates must write a substantial research paper. The paper must demonstrate the ability to use interdisciplinary resources in international security studies, including, where appropriate, primary sources, field research, data analysis, and non-English sources. If the paper is of sufficient quality, the faculty adviser may submit it for publication in the IAC International Security Studies Working Paper Series.

For more information, visit http://www.yale.edu/macmillan/grad_certificates.htm, e-mail jackson.institute@yale.edu, or call 203.432.3418.
COUNCIL ON LATIN AMERICAN AND IBERIAN STUDIES

The MacMillan Center
232 Luce Hall, 203.432.3422
www.yale.edu/macmillan/lais

Graduate Certificate of Concentration in Latin American and Iberian Studies

Chair
Stuart Schwartz (History)

Professors Rolena Adorno (Spanish & Portuguese), Mark Ashton (Forestry & Environmental Studies), Ned Blackhawk (History; American Studies), Garry Brewer (School of Management), Richard Burger (Anthropology), Hazel Carby (African American Studies; American Studies), Amy Chua (Law), Carlos Eire (History; Religious Studies), Eduardo Engel (Economics), Paul Freedman (History), Aníbal González (Spanish & Portuguese), Roberto González Echevarría (Spanish & Portuguese), K. David Jackson (Spanish & Portuguese), Gilbert Joseph (History), Efstatios Kalyvas (Political Science), Robert Mendelsohn (Forestry & Environmental Studies), María Rosa Menocal (Spanish & Portuguese), Mary Miller (History of Art), Florencia Montagnini (Forestry & Environmental Studies), Stephen Pitti (History), Susan Rose-Ackerman (Law; Political Science), T. Paul Schultz (Economics), Stuart Schwartz (History), Susan Stokes (Political Science), Robert Thompson (History of Art), Noël Valis (Spanish & Portuguese), Michael Veal (Music; American Studies; African American Studies), Elisabeth Wood (Political Science)

Associate Professors Robert Bailiss (Forestry & Environmental Studies), Thad Dunning (Political Science), Moira Fradinger (Comparative Literature), Paulo Moreira (Spanish & Portuguese), Leonard Munstermann (Senior Research Scientist, Public Health), Alicia Schmidt-Camacho (American Studies)

Assistant Professors Jafari Allen (Anthropology; African American Studies), P. Sean Brotherton (Anthropology), Susan Byrne (Spanish & Portuguese), Ana De La O Torres (Political Science), Mariola Espinosa (History of Medicine), Leslie Harkema (Spanish & Portuguese), Paulina Ochoa Espejo (Political Science), Kevin Poole (Spanish & Portuguese)

Senior Lectors I, II (Spanish & Portuguese) Sybil Alexandrov, Marta Almeida, Maria Pilar Asensio-Manrique, Teresa Carballal, Mercedes Carreras, Ame Cividanes, Sebastián Díaz, María de la Paz García, Oscar González-Barreto, María Jordán, Juliana Ramos-Ruano, Lissette Reymundi, Lourdes Sabé, Barbara Safille, Terry Seymour, Margherita Tortora, Sonia Valle

Lector (Spanish & Portuguese) Rosamaría León

Others Jane Edwards (Associate Dean, Yale College), Nancy Ruther (Lecturer, Political Science)
Professors Emeriti  Emilia Viotti da Costa (History), Juan Linz (Political Science; Sociology), Josefina Ludmer (Spanish & Portuguese), Enrique Mayer (Anthropology), Gustav Ranis (Economics)

A variety of Latin American Studies options are available for graduate students in history and other humanities disciplines, the social sciences, and the professional schools. Latin American Area course offerings are available in twenty-five disciplines with distinct strengths in Anthropology, History, Political Science, and Spanish and Portuguese. Latin Americanist faculty specialize in the Andes (Burger), Brazil (Jackson, Moreira, Schwartz), the Caribbean (Thompson), Central America (Joseph, Miller, Wood), Mexico (Camacho, Joseph, Miller, Pitti), and the Southern Cone (Engel, Stokes). F&ES faculty (Anisfeld, Ashton, Clark, Doolittle, Dove, Mendelsohn, Montagnini) have tropical research interests or participate in educational exchanges with Argentina, Bolivia, Brazil, Costa Rica, Dominica, Ecuador, Guyana, Honduras, Mexico, Nicaragua, Panama, Peru, and Venezuela. Latin American content courses are also offered in the Divinity School, Law, Management, and Public Health.

Students may pursue the Graduate Certificate of Concentration in Latin American and Iberian Studies in conjunction with graduate degree programs in the Graduate School of Arts and Sciences and the professional schools. To complete the certificate, candidates must demonstrate expertise in the area through their major graduate or professional field, as well as show command of the diverse interdisciplinary, geographic, cultural, and linguistic approaches associated with expertise in Latin America or Iberia.

Admission is contingent on the candidate’s acceptance into a Yale graduate degree program, and award of the certificate, beyond fulfilling the relevant requirements, requires the successful completion of the candidate’s Yale University degree program. Active participation in the council’s extracurricular and research programs and seminars is also strongly encouraged.

Limited financial resources, such as the LAIS Summer Research grants, are available to graduate and professional school students.

Specific Requirements for the Graduate Certificate of Concentration

Language proficiency  The equivalent of two years’ study of one language and one year of the other, normally Spanish and Portuguese. Less frequently taught languages, such as Nahuatl, Quechua, or Haitian Creole, may also be considered for meeting this requirement.

Course work  Six graduate courses in at least two different disciplines. No more than four courses may count in any one discipline.

Geographical and disciplinary coverage  At least two countries and two languages must be included in the course work or thesis.

Research  A major graduate course research paper or thesis that demonstrates the ability to use field resources, ideally in one or more languages of the region, normally with a focus on a comparative or regional topic rather than a single country.
The certificate adviser of the Council on Latin American and Iberian Studies will assist graduate students in designing a balanced and coordinated curriculum. The council will provide course lists and other useful materials.

**Academic Resources of the Council**

The council supplements the graduate curriculum with annual lecture and film series, special seminars, and conferences that bring visiting scholars and experts to campus. The council also serves as a communications and information center for a vast variety of enriching events in Latin American studies sponsored by the other departments, schools, and independent groups at Yale. It is a link between Yale and Latin American centers in other universities, and between Yale and educational programs in Latin America and Iberia.

The Latin American Collection of the University library has approximately 522,000 printed volumes, plus newspapers and microfilms, CD-ROMs, films, sound recordings, and maps. The library’s Latin American Manuscript Collection is one of the finest in the United States for unpublished documents for the study of Latin American history. Having the oldest among the major Latin American collections in the United States, Yale offers research opportunities unavailable elsewhere.

Information about the Graduate Certificate of Concentration in Latin American Studies may be requested from the Council on Latin American and Iberian Studies, Yale University, PO Box 208206, New Haven CT 06520-8206; e-mail, jean.silk@yale.edu; or telephone, 203.432.3422.
COUNCIL ON MIDDLE EAST STUDIES

The MacMillan Center
346 Rosenkranz Hall, 203.436.2553
www.yale.edu/macmillan/cmes

Graduate Certificate of Concentration in Modern Middle East Studies

Chair
Frank Griffel (Religious Studies)

Professors  Abbas Amanat (History), Harold Attridge (Divinity; on leave), Gerhard Böwering (Religious Studies), Adela Yarbro Collins (Divinity), John J. Collins (Divinity), John Darnell (Near Eastern Languages & Civilizations), Stephen Davis (Religious Studies), Owen Fiss (Emeritus, Law), Benjamin Foster (Near Eastern Languages & Civilizations), Steven Fraade (Religious Studies), Eckart Frahm (Near Eastern Languages & Civilizations), Frank Griffel (Religious Studies), Beatrice Gruendler (Near Eastern Languages & Civilizations), Dimitri Gutas (Near Eastern Languages & Civilizations; on leave [Sp]), Christine Hayes (Religious Studies; on leave [F]), Frank Hole (Emeritus, Anthropology), Marcia Inhorn (Anthropology), Anthony Kronman (Law), Bentley Layton (Religious Studies), J.G. Manning (Classics), Ivan Marcus (History), Robert Nelson (History of Art), W. Michael Reisman (Law), Maurice Samuels (French; on leave [Sp]), Lamin Sanneh (Divinity), Harvey Weiss (Near Eastern Languages & Civilizations), Robert Wilson (Divinity)

Associate Professors  Kaveh Khoshnood (Public Health), Ellen Lust (Political Science; on leave), Colleen Manassa (Near Eastern Languages & Civilizations), Andrew March (Political Science; on leave), Kishwar Rizvi (History of Art)

Assistant Professors  Narges Erami (Anthropology), Zareena Grewal (American Studies), Adria Lawrence (Political Science), Mark Lazenby (Nursing), Alan Mikhail (History; on leave), Ahmed Mobarak (Economics), Edwige Tamalet Talbayev (French), Jonathan Wyrtzen (Sociology; on leave [F])

Senior Lecturers and Lecturers  Adel Allouche (History; Religious Studies), Karla Britton (Architecture), Karen Foster (Near Eastern Languages & Civilizations; History of Art), Tolga Köker (Economics), Nikolay Marinov (Political Science), Kathryn Slanski (Near Eastern Languages & Civilizations)

Senior Lectors (I, II) and Lectors  Sarah Alani (Arabic), Muhammad Aziz (Arabic), Aaron Butts (Semitics), Ayala Dvoretzky (Hebrew), Etem Erol (Turkish), Shiri Goren (Hebrew), Shady Nasser (Arabic), Dina Roginsky (Hebrew), Farkhondeh Shayesteh (Persian), Hasmik Tovmasyan (Arabic)

Librarians and Curators  Roberta Dougherty (Near East Collection), Ulla Kasten (Babylonian Collection), Susan Matheson (Ancient Art, Yale University Art Gallery), Elizabeth Payne (Babylonian Collection), Nanette Stahl (Judaica Collection)

The Council on Middle East Studies is part of the Whitney and Betty MacMillan Center for International and Area Studies. The council brings together faculty and students
sharing an interest in the Middle East by sponsoring conferences, discussions, films, and lecture series by scholars from Yale as well as visiting scholars. It provides information concerning grants, fellowships, research programs, and foreign study opportunities. It also administers research projects in a variety of Middle East-related areas.

In addition to the resources of the individual departments, Yale’s library system has much to offer the student interested in Middle East studies. Of particular note are the collections of Arabic and Persian manuscripts, as well as large holdings on the medieval and modern Middle East.

The Council on Middle East Studies administers the Middle East Studies National Resource Center at Yale, which is funded by the U.S. Department of Education under HEA Title VI. As a National Resource Center, the council supports a number of projects and activities, including summer- and academic-year language fellowships and an extensive outreach program.

The council also offers a Graduate Certificate of Concentration in Modern Middle East Studies. Students with an interest in the Middle East should first apply to one of the University’s degree-granting departments, such as Anthropology, History, Linguistics, Near Eastern Languages and Civilizations, Political Science, Religious Studies, or Sociology, and then apply for the graduate certificate of concentration no later than the beginning of their penultimate term of study.

**Graduate Certificate of Concentration in Modern Middle East Studies**

The certificate represents acknowledgment of substantial preparation in Middle East Studies, both in the student’s major graduate or professional field and also in terms of the disciplinary and geographical diversity required by the council for recognized competency in the field of Middle East Studies. As language and culture are the core of the area studies concept, students are required to attain or demonstrate language proficiency.

**Requirements**

1. Language proficiency: the equivalent of two years of study at a passing grade in one of the four languages of the Middle East—Arabic, Hebrew, Persian, and Turkish.
2. Course work: six graduate courses in at least two different disciplines. No more than four courses may count in any one discipline. Included in these six courses must be an introductory Middle East history course, such as State and Society and Culture in the Middle East (taken with special supplemental graduate readings and assignments), and a foundations course, such as Culture and Politics in the Contemporary Middle East.
3. Interdisciplinary coverage: both courses and any research project undertaken in lieu of a course must reflect experience of at least two disciplines.
4. Research: a major graduate course research paper, dissertation prospectus, dissertation, or thesis that demonstrates ability to use field resources, ideally in one or more languages of the region.

For more information on the Graduate Certificate and inquiries about Middle East Studies, contact the Council on Middle East Studies, Yale University, PO Box 208206, New Haven CT 06520-8206, or the council e-mail, cmes@yale.edu.

Senior Lector
Seema Khurana (Hindi)

Lectors
David Brick (Sanskrit), Swapna Sharma (Hindi)

Associate Research Scholar
Mark Turin (South Asian Studies Council)

Students with an interest in South Asian Studies should apply to one of the University’s degree-granting departments, such as Anthropology, History, Political Science, Economics, or Religious Studies. The South Asian Studies Council is part of the MacMillan Center for International and Area Studies. It has been organized to provide guidance to graduate students who desire to use the resources of the departments of the University that offer South Asia-related courses.

The South Asian Studies Council aims to bring together faculty and students sharing an interest in South Asia, and it supplements the curriculum with seminars, conferences, and special lectures by scholars from Yale as well as visiting scholars. It provides information concerning grants, fellowships, research programs, and foreign study opportunities.

Language instruction is offered in Hindi and Tamil. Students planning to undertake field research or language study in South Asia may apply to the council for summer fellowship support.
Courses

HNDI 510au, Elementary Hindi  Seema Khurana, Swapna Sharma
An in-depth introduction to modern Hindi, including the Devanagari script. Through a combination of graded texts, written assignments, audiovisual material, and computer-based exercises, the course provides cultural insights and increases proficiency in understanding, speaking, reading, and writing Hindi. Emphasis placed on spontaneous self-expression in the language. No prior background in Hindi assumed.
510a-1: MTWTHF 10:30–11:20
510a-2: MTWTHF 1:30–2:20

HNDI 520bu, Elementary Hindi II  Seema Khurana, Swapna Sharma
Continuation of HNDI 510a.
520b-1: MWF 10:30–11:20, TTH 1:30–2:20
520b-2: MWF 1:30–2:20, TTH 10:30–11:20

HNDI 530au, Intermediate Hindi I  Seema Khurana, Swapna Sharma
First half of a two-term sequence designed to develop proficiency in the four language skill areas. Extensive use of cultural documents including feature films, radio broadcasts, and literary and nonliterary texts to increase proficiency in understanding, speaking, reading, and writing Hindi. Focus on cultural nuances and various Hindi literary traditions. Emphasis on spontaneous self-expression in the language. Prerequisite: HNDI 520b or equivalent.
530a-1: MTWTHF 2:30–3:20
530a-2: MTWTHF 11:30–12:20

HNDI 532au, Hindi for Heritage Speakers I  Swapna Sharma
TTH 4–5:15

HNDI 540bu, Intermediate Hindi II  Seema Khurana, Swapna Sharma
Continuation of HNDI 530a, focusing on further development of proficiency in the four language skill areas. Prerequisite: HNDI 530a or equivalent.
540b-1: MWF 2:30–3:20
540b-2: TTH 9:30–10:20

HNDI 542bu, Hindi for Heritage Speakers II  Swapna Sharma, Seema Khurana
Continuation of HNDI 532a. Development of increased proficiency in the four language skills. Focus on reading and higher language functions such as narration, description, and comparison. Reading strategies for parsing paragraph-length sentences in Hindi newspapers. Discussion of political, social, and cultural dimensions of Hindi culture as well as contemporary global issues. Prerequisite: HNDI 532a or equivalent. TTH 4–5:15

HNDI 550au, Advanced Hindi  Seema Khurana
An advanced language course aimed at enabling students to engage in fluent discourse in Hindi and to achieve a comprehensive knowledge of formal grammar. Introduction to
a variety of styles and levels of discourse and usage. Emphasis on the written language, with readings on general topics from newspapers, books, and magazines. Prerequisite: HNDI 540b or permission of instructor. TTH 4–5:15

**HNDI 598a\(^b\) or b\(^u\), Advanced Tutorial**

For students with advanced Hindi language skills who wish to engage in concentrated reading and research on material not otherwise offered by the department. The work must be supervised by an adviser and must terminate in a term paper or its equivalent. Prerequisites: HNDI 540b, and submission of a detailed project proposal and its approval by the language studies coordinator. 1 HTBA

**SKRT 510a\(^u\)/LING 515a\(^u\), Introductory Sanskrit I**  
David Brick

An introduction to Sanskrit language and grammar. Focus on learning to read and translate basic Sanskrit sentences in the Indian Devanagari script. No prior background in Sanskrit assumed. Credit only on completion of SKRT 520b/LING 525b. MTWTHF 9:25–10:15

**SKRT 520b\(^u\)/LING 525b\(^u\), Introductory Sanskrit II**  
David Brick

Continuation of SKRT 510a/LING 515a. Focus on the basics of Sanskrit grammar; readings from classical Sanskrit texts written in the Indian Devanagari script. Prerequisite: SKRT 510a/LING 515a. MTWTHF 9:25–10:15

**SKRT 530a\(^u\), Intermediate Sanskrit I**  
David Brick

The first half of a two-term sequence aimed at helping students develop the skills necessary to read texts written in Sanskrit. Readings include selections from the *Hitopadesa; Kathasaritasagara; Mahabharata*; and *Bhagavad Gita*. Prerequisite: SKRT 520b or equivalent. MTWTHF 10:30–11:20

**SKRT 540b\(^u\), Intermediate Sanskrit II**  
David Brick

Continuation of SKRT 530a, focusing on Sanskrit literature from the kavya genre. Readings include selections from the *Jatakamala of Arysura* and the opening verses of Kalidasa’s *Kumarasambhava*. Prerequisite: SKRT 530a or equivalent. MTWTHF 10:30–11:20

**SKRT 550b, Advanced Sanskrit: Dharmasastra**  
David Brick

The course is designed as an advanced tutorial offered in connection with the proposed seminar course Law and Religion in Ancient India. Its purpose is to introduce students to Sanskrit commentarial literature in general and to Dharmasastra in particular. Dharmasastra is a major genre of Brahmanical literature dedicated to the explication and analysis of everything falling under the broad rubric of dharma. Prerequisite: knowledge of Sanskrit equivalent to at least two years of college course work. MW 1–2:15

**SAST 619b/ANTH 663b\(^u\), Ethnicity and Indigeneity in a Mobile World**  
Sara Shneiderman

Classical literature on ethnicity in conversation with more recent work on indigeneity and mobility. We consider the relationships between place, belonging, and citizenship in shaping contemporary identity practices and discourses. Readings are primarily ethnographic, with a focus on South Asia, but including material from Latin America, Native North America, Southeast and East Asia, Australia/New Zealand, and Africa. TH 1:30–3:20
SAST 672a, Himalaya through Film and Text  Mark Turin
An exploration of the Himalayan region through film and ethnography. Comparing visual and textual genres of storytelling and narration, we examine topics such as adventure, caste, education, gender, ritual, and violence by watching, analyzing, and critiquing selected films and texts. Films and readings are drawn from Bhutan, northern India, Nepal, and Tibet.
COUNCIL ON SOUTHEAST ASIA STUDIES

The MacMillan Center
311 Luce Hall, 203.432.3431, seas@yale.edu
www.yale.edu/seas

Chair
Benedict Kiernan (History)

Professors William Burch (Forestry & Environmental Studies), Michael Dove (Forestry & Environmental Studies), J. Joseph Errington (Anthropology), Benedict Kiernan (History), James Scott (Political Science), Mimi Yiengpruksawan (History of Art)

Associate Professor Sarah Weiss (Music)

Assistant Professor Erik Harms (Anthropology)

Lecturers and Senior Lectors (I, II) Carol Carpenter (Forestry & Environmental Studies), Amity Doolittle (Forestry & Environmental Studies), Quang Phu Van (Southeast Asian Languages), Indriyo Sukmono (Southeast Asian Languages)

Curators Ruth Barnes (Indo-Pacific Art, Yale University Art Gallery), Richard Richie (Southeast Asia Collection, Yale University Library)

Yale does not offer higher degrees in Southeast Asia Studies. Instead, students apply for admission to one of the regular degree-granting departments and turn to the Council on Southeast Asia Studies for guidance regarding the development of their special area interest, courses outside their department, and instruction in Southeast Asian languages related to their research interest. The council aims to bring together faculty and students sharing an interest in Southeast Asia and supplements the graduate curriculum with an annual seminar series, periodic conferences, and special lectures.

Yale offers extensive library and research collections on Southeast Asia in Sterling Memorial Library, the Economic Growth Center, the Peabody Museum of Natural History, and the Human Relations Area Files. Further information on library resources is available from Richard Richie, Curator, Southeast Asia Collection, Sterling Memorial Library (203.432.1858, rich.richie@yale.edu).

Language instruction is offered in two Southeast Asian languages, Indonesian and Vietnamese. The council supports language tables and tutoring in other Southeast Asian languages by special arrangement. Students planning to undertake field research or language study in Southeast Asia may apply to the council for summer fellowship support.

For information on program activities and participating faculty, contact the Council on Southeast Asia Studies, Yale University, PO Box 208206, New Haven CT 06520-8206; or see our Web site, www.yale.edu/seas.

Courses

INDN 510au, Elementary Indonesian I Indriyo Sukmono
An introductory course in Standard Indonesian with emphasis on developing communicative skills through systematic survey of grammar and graded exercises. Introduction to
reading in the second term, leading to mastery of language patterns, essential vocabulary, and basic cultural competence. Enrollment limited to fifteen per section. (01) MTWTHF 9:25–10:15; (02) MTWTHF 10:30–11:20; (03) MTWTHF 1:30–2:20

**INDN 520b**, Elementary Indonesian II  Indriyo Sukmono
Continuation of INDN 510a. (01) MTWTHF 9:25–10:15; (02) MTWTHF 10:30–11:20; (03) MTWTHF 1:30–2:20

**INDN 530a**, Intermediate Indonesian I  Indriyo Sukmono
Continues practice in colloquial Indonesian conversation and reading and discussion of texts. Prerequisite: INDN 520b or equivalent. Enrollment limited. (01) TTH 11:30–12:50; (02) MF 11:30–12:50

**INDN 540b**, Intermediate Indonesian II  Indriyo Sukmono
Continuation of INDN 530a. (01) TTH 11:30–12:50; (02) MF 11:30–12:50

**INDN 553a**, Advanced Indonesian  Jolanda Pandin, Indriyo Sukmono
A semi-directed study in which the focus of discussion depends upon the research interests of the students. The instructor assists the study by providing and developing materials on the chosen theme from articles, journals, books, and audiovisual collections. Students work to improve their Indonesian speaking, listening, writing, and grammar skills to an advanced level. Conducted via distance learning format with Cornell University. Prerequisites: INDN 540b or equivalent and permission of the instructor.

**INDN 560b**, Advanced Indonesian II  Indriyo Sukmono
Continued development of advanced fluency through sophisticated discussion of original Indonesian sociohistorical, political, and literary texts and audiovisual sources designed to challenge students to further apply and extend their knowledge and understanding of Indonesia. Prerequisites: INDN 553a or equivalent and permission of the instructor. TTH 2:30–3:45

**INDN 570a/b, Readings in Indonesian**  Indriyo Sukmono
For students with advanced Indonesian language skills preparing for academic performance and/or research purposes. Prerequisites: advanced Indonesian and permission of the instructor.

**VIET 510a**, Elementary Vietnamese I  Quang Phu Van
Students acquire basic working ability in Vietnamese including sociocultural knowledge. Attention to integrated skills such as speaking, listening, writing (Roman script), and reading. No previous knowledge of or experience with Vietnamese language required. MTWTHF 9:25–10:15

**VIET 520b**, Elementary Vietnamese II  Quang Phu Van
Continuation of VIET 510a. MTWTHF 9:25–10:15

**VIET 530a**, Intermediate Vietnamese I  Quang Phu Van
An integrated approach to language learning aimed at strengthening students’ listening, speaking, reading, and writing skills in Vietnamese. Students are thoroughly grounded in communicative activities such as conversations, performance simulation, drills, role
playing, and games. Discussion of aspects of Vietnamese society and culture. Prerequisite: VIET 520b or equivalent. MTWTHF 10:30–11:20

**VIET 540b**, Intermediate Vietnamese II  Quang Phu Van
Continuation of VIET 530a. MTWTHF 10:30–11:20

**VIET 550a**, Advanced Vietnamese  Quang Phu Van
Aims to enable students to achieve greater fluency and accuracy in the language beyond the intermediate level and to solidify their reading, writing, speaking, and listening skills. Topics include social, economic, and cultural practices; gender issues; and notions of power, taboo, etc. Prerequisite: VIET 540b or equivalent. TH 4–5:15

**VIET 570a/b**, Readings in Vietnamese  Quang Phu Van
For students with advanced Vietnamese language skills who wish to engage in concentrated reading and research. Prerequisite: permission of the instructor.
WOMEN’S, GENDER, AND SEXUALITY STUDIES

315 William L. Harkness Hall, 203.432.0845
www.yale.edu/wgss

Chair
Inderpal Grewal

Director of Graduate Studies
Marianne LaFrance [F]
Jill Campbell [Sp]

Professors  Elizabeth Alexander (African American Studies), Carol Armstrong (History of Art), Seyla Benhabib (Political Science), Jill Campbell (English), Hazel Carby (African American Studies; American Studies), Kang-i Sun Chang (East Asian Languages & Literatures), George Chauncey (History), M. Kamari Clarke (Anthropology), Glenda Gilmore (History; American Studies; African American Studies), Inderpal Grewal (Women’s, Gender & Sexuality Studies; American Studies; Anthropology), Dolores Hayden (Architecture; American Studies), Margaret Homans (English; Women’s, Gender & Sexuality Studies), Marianne LaFrance (Psychology; Women’s, Gender & Sexuality Studies), Joanne Meyerowitz (History), Sally Promey (American Studies; Institute of Sacred Music; Religious Studies), Cynthia Russett (History), Alicia Schmidt Camacho (American Studies), Emilie Townes (Divinity), John Treat (East Asian Languages & Literatures), Michael Warner (English), Laura Wexler (American Studies; Women’s, Gender & Sexuality Studies)

Associate Professor  Naomi Rogers (History of Science & Medicine)

Assistant Professors  Jafari Allen (African American Studies; Anthropology), Rene Almeling (Sociology), GerShun Avilez (English; African American Studies), Crystal Feimster (African American Studies; American Studies), Joseph Fischel (Women’s, Gender & Sexuality Studies), Moira Fradinger (Comparative Literature), Terri Francis (Film Studies), Kathryn Lofton (American Studies; Religious Studies), Karen Nakamura (Anthropology), Sam See (English)

Lecturers  Melanie Boyd (Women’s, Gender & Sexuality Studies), Geetanjali Singh Chanda (Women’s, Gender & Sexuality Studies), Kathleen Cleaver (African American Studies), Maria Trumpler (Women’s, Gender & Sexuality Studies)

Fields of Study

The Program in Women’s, Gender, and Sexuality Studies considers gender and sexuality as fundamental categories of social and cultural analysis and offers critical perspectives upon them as a basis from which to study the diversity of human experience. Gender (the social and historical meanings of the distinction between the sexes) and sexuality (the domain of sexual practices, identities, discourses, and institutions) are studied as they intersect with class, race, ethnicity, nationality, and other axes of human difference. The introduction of these perspectives into all fields of knowledge necessitates new research,
criticism of existing research, and the formulation of new paradigms and organizing concepts.

The Qualification in Women’s, Gender, and Sexuality Studies is open to students already enrolled in a Ph.D. program at Yale. Interested students are strongly encouraged to register for the Qualification by meeting with the director of graduate studies (DGS) during their first year. Students who wish to receive the Qualification must (1) complete the core course, WGSS 619b, Feminist and Queer Theory: National and Transnational Perspectives, or, with permission of the DGS, another course in the theory of gender and sexuality; (2) complete two electives to be determined in consultation with the DGS and their individual WGSS graduate adviser; (3) demonstrate the capacity to pursue independent, interdisciplinary research in Women’s, Gender, and Sexuality Studies by presenting a qualifying paper at a meeting of the WGSS Colloquium; and (4) demonstrate readiness to teach basic and advanced courses in this field by serving as TF in a WGSS lecture course or teaching a seminar on a WGSS topic, or by preparing appropriate course syllabi. Students who fulfill these expectations will receive a letter from the DGS, indicating that they have completed the work for the Qualification.

Program information and the requirements for the Qualification are available on the Women’s, Gender, and Sexuality Studies Web site, or by contacting 203.432.0845 or wgss@yale.edu.

Courses

WGSS 620b/FREN 968b/CPLT 590b, Writing Women: Gender and Nation Building in the Francophone Arab World  
Edwige Tamalet Talbayev

This course investigates the ways in which the related discourses of nationalism, Islam, and feminism can fruitfully intersect to illuminate the corpus of women’s literature from the former French colonies in the Arab world. With an emphasis on issues of social justice, citizenship, and feminism, both locally and transnationally, we interrogate the ways in which literature mediates the construction of women as historical subjects. Although the focus of the course is on francophone texts, we address the literary landscape of the former Maghrebi and Middle Eastern colonies and mandates as a whole, reading Arabic texts in translation alongside texts written in French and English. Proposed readings include Fatima Mernissi, Dreams of Trespass; Kateb Yacine, Nedjma; Tahar Ben Jelloun, Lettre à Delacroix; Joumana Haddad, I Killed Scheherazade; Leila Abouzeid, The Year of the Elephant; Fawzi Mellah, Le Conclave des pleureuses; Ahlam Mosteghanemi, Memory in the Flesh; Malika Mokeddem, Des rêves et des assassins. W 3:30–5:20

WGSS 622au/ARCG 623au/NELC 620au, Lives in Ancient Egypt  
Colleen Manassa

Introduction to the social history of ancient Egypt, from 3100 to 30 B.C.E., with particular focus on the lives of individuals attested in the textual and archaeological record, from pharaohs and queens to artists, soldiers, and farmers. Readings of primary sources in translation, and course projects integrating ancient objects in Yale collections. MW 10:30–11:20
WGSS 623b/SOCY 523b, Sociology of Sex and Gender  Rene Almeling
The course provides graduate students with an introduction to major theoretical approaches to sex and gender, and it covers recent empirical research in key arenas, including care work, sex work, work and family, mothering and fathering, reproductive technologies, and health. Readings have been selected to reflect a variety of methodological approaches and to spotlight the ways in which sex and gender intersect with other social categories (e.g. race, class, and nationality) at different stages in the life course.

M 1:30–3:20

WGSS 630a, Feminist Postcolonial Theories: Discourses, Subjects, Knowledge  Inderpal Grewal
An advanced survey course in feminist theory that covers key debates over the last three decades within feminist postcolonial scholarship. The course goes beyond the basic texts of postcolonial studies and feminist theory, seeking, on the one hand, to historicize and contextualize particular emergences and changes in academic knowledge production, and, on the other hand, to examine the debates that have energized the field. Thus we examine postcolonial feminist theory as a field of knowledge that came both from social and national movements and from academic upheavals caused by these movements. Beginning with colonial discourse studies and cultural studies in the 1980s, we end by focusing on analyses of contemporary colonialisms, which reveal both the influences of the field and the extensions of it into a variety of disciplines and knowledge formations.

WGSS 632b/AFAM 734b/FILM 719b, Film Race Gender  Terri Francis
Film aesthetics and intellectual history of African American cinema. Shifting views on race/racism and gender/sex/sexism within the overall context of the Hollywood industry. American independent/experimental filmmaking practices and African diaspora aesthetics. African American cinema as a case of cross-cultural contact, complicity, and creativity. Issues of stereotypes, authorship, and performance. Shared problematic and passions between African American film and literature. Film positioned less as a window and more as a palimpsest, a refracting medium with its own aesthetics and, within its own traditions, working over “race” and perceptions of particular cultures through plot devices, lighting, and sound, in particular, often in unexpected ways. Films alongside materials drawn from film, drama, literature, social history, journalism, photography, painting, dance, and other arts. Special unit on Josephine Baker, embodying the crucial conceptual bridge between black modernism and primitivism and between American race films and European colonial films. Baker through the lens of a recast Harlem Renaissance that emphasizes the modernist concerns of the body, life as art, migration, memory, and intercultural collaboration in a multidisciplinary canon. Readings from canonical, controversial, and recent publications in African American studies, film and media studies, and gender/sexuality studies. Oscar Micheaux and his circle, the L.A. Rebellion, “New” Black Cinema, and beyond. W 3:30–5:20

WGSS 670b, Sexuality and Social Justice  Joseph Fischel
Compared to other sites of social stratification, “sexuality” is late on arrival to the scene of both justice politics and justice theory. How should sexuality fit into writings on and demands for justice? Is “sexual justice” as an aspirational object discrete from, contiguous
to, or identical with social justice writ large? Folded into these grand narrative questions are smaller but no less significant ones. For purposes of justice-theorizing and justice-politicking, is sexuality best understood as reducible to the familiar identity forms: L, G, B, and T? Is the analytic distinction of sexuality from gender, class, and race itself an injustice of sorts, or is such categorization necessary to redress particular forms of late modern injustice or inequality? In particular, we consider the extent to which sexuality injustice is (1) tethered to economic distribution, (2) tethered to gender asymmetry, and (3) context-dependent. Along the way we consider influential scholarship on justice by American political theorists; queer and feminist critiques; (some) Marxism and (some of) its interlocutors; transnational ethnography and theory on sexuality; intersectional approaches to sex, sexuality, and justice; and desire in its compromised manifestations.

T 2:30–4:30

**WGSS 689b/AFAM 647b/ANTH 591b, Black Feminist Theory and Praxis**

Jafari Allen

In this course we analyze black feminisms as both political space and scholarly choice. This framework enables us to examine the continuities between black feminist and womanist theorizing in diverse locations, and to explore how different embodied experiences—including genders, histories, geographies, and genealogies—condition divergent perspectives. Themes explored include slavery, colonialism, diaspora consciousness, multiple genders and sexualities, class difference and inequities of power within black communities; representation in popular culture; state violence; poetics and resistance. We employ a transdisciplinary perspective—including anthropology, history, sociology, literature, and film—and challenge notions of “theory” as the province of the West (and North) and the middle class. TH 3:30–5:20

**[WGSS 701bU/ANTH 508bU, Queer Ethnographies]**

**WGSS 715b/AFAM 829b, American Legal History: Citizenship and Race**

Kathleen Cleaver

This seminar examines the evolution of U.S. citizenship as defined and interpreted by courts during the nineteenth and twentieth centuries, with particular attention to the way historical events that defined race have affected citizenship. Topics of study include the Thirteenth, Fourteenth, and Fifteenth Amendments to the U.S. Constitution; the 1866 Civil Rights Act; Reconstruction legislation; immigration restrictions imposed on Asians; legislation impacting the racial classification of Mexicans; statutes governing the citizenship of indigenous native peoples; racially based prohibitions against voting, education, and employment; and efforts to reduce them by civil rights legislation culminating with the 1964 Civil Rights Act. Each seminar participant has to research several topics and make a presentation to the class on at least one topic. Engagement in seminar discussion and the drafting of research papers are the basis for grading. This seminar is open to seniors. TH 3:30–5:20

**WGSS 716a/AFAM 738a/AMST 706a/HIST 711a, Readings in African American Women’s History**

Crystal Feimster

The diversity of African American women’s lives from the colonial era through the late twentieth century. Using primary and secondary sources we explore the social, political,
cultural, and economic factors that produced change and transformation in the lives of African American women. Through history, fiction, autobiography, art, religion, film, music, and cultural criticism we discuss and explore the construction of African American women’s activism and feminism; the racial politics of the body, beauty, and complexion; hetero- and same-sex sexualities; intraracial class relations; and the politics of identity, family, and work. TH 9:25–11:15

WGSS 730b/HIST 943b/HSHM 736b, Health Politics, Body Politics  Naomi Rogers
A reading seminar on struggles to control, pathologize, and normalize human bodies, with a particular focus on science, medicine, and the state, both in North America and in a broader global health context. Topics include colonialism and prostitution; repression and regulation of birth control; the teaching of sex education; the public celebration and denial of sexual difference; politics of sexually transmitted diseases, including HIV/AIDS; public health and legal efforts to define and restrict abortion; the pathologizing and identity politics of transgendered people; and the development and regulation of artificial insemination and other methods of reproductive technology. W 1:30–3:20

WGSS 736b/AFAM 709b/AMST 709b/HIST 736b, Research in U.S. Political and Social History after 1865  Glenda Gilmore
Projects chosen from the post-Civil War period, with emphasis on twentieth-century social and political history, broadly defined. Research seminar. TH 9:25–11:15

[WGSS 745b/SOCY 610b, Race, Gender, and the African American Experience]

WGSS 771b/ENGL 725b, The Eighteenth-Century Novel  Jill Campbell
Studies in the emergence of the “novel” as a category of literature and of “fiction” as a basis for experience in the course of the long eighteenth century. Likely authors include Behn, Haywood, Defoe, Richardson, Fielding, Sterne, Austen, Maria Edgeworth, and Mary Shelley. Special emphasis on the forms of selfhood developed by the novel; the claims to attention of suppositional persons in fictional forms; and eighteenth- and early-nineteenth-century experimentation with the uses of fiction for didactic and political ends. Readings also include a sampling of prose fiction for children and of nonfictional, polemical prose. W 9:25–11:15

WGSS 788a/AFAM 736a/HSAR 785a, Bodies and Borders: Sexuality, Race, and Representation  Kobena Mercer
Introducing methods from cultural studies, postcolonial studies, and psychoanalysis, this seminar examines representations of black bodies in modern art and visual culture. Abolitionist, Orientalist, and primitivist painting and sculpture are investigated through concepts of fetishism, fantasy, and the gaze, and in light of post-1960s artistic practices addressing interracial border zones as sites of cross-cultural hybridity. Artists include Carl Van Vechten, Wifredo Lam, Adrian Piper, Robert Mapplethorpe, Kara Walker, and Renee Cox; texts include Mikhail Bakhtin, Homi Bhabha, Frantz Fanon, and Griselda Pollock. TH 1:30–3:20
WGSS 816a/AFAM 816a/AMST 657a, Place and Space in Caribbean Literature, Theory, and Ecology  Hazel Carby
Readings are drawn from twentieth-century Caribbean literature (fiction and poetry), written or translated into English, as well as cultural and literary theory and recent work on visual culture and ecology. The course poses questions about the various inventions, imaginings, and mappings of bodies and locations; representations of nature, land, island, and archipelago; the architectures offered by literature; and the relation between ecology and war in the greater Caribbean region. T 1:30–3:20

WGSS 834b/AFAM 834b/AMST 658b, The Politics of Representation: Visual and Literary Culture and the Black Female Body  Hazel Carby
Utilizing collections held in the Yale Art Gallery, the Center for British Art, and the Beinecke Library, this course juxtaposes literary texts and visual culture to create interdisciplinary conversations about the representation of the black female body with particular emphasis on issues of sexuality, gender, and racial formation. T 1:30–3:20
YALE CENTER FOR THE STUDY OF GLOBALIZATION

Betts House, 203.432.1900, globalization@yale.edu
YCSG Web site: www.ycsg.yale.edu
YaleGlobal Online magazine: www.yaleglobal.yale.edu

Director
Ernesto Zedillo

The Yale Center for the Study of Globalization (YCSG) is devoted to examining the impact of our increasingly integrated world on individuals, communities, and nations. The center’s purpose is to support the creation and dissemination of ideas for seizing the opportunities and overcoming the challenges resulting from globalization’s impact on the world’s people and places. The center also studies problems that, even if they do not result directly from globalization, are global in nature and can therefore be effectively addressed only through international cooperation. In pursuit of this mission, and to assist in Yale’s effort to become a more international institution, the core of our strategy is collaboration both with the Yale community and with a variety of institutions and individuals across the globe.

One of the center’s strengths, and an important area of focus, is its ability to engage with multilateral institutions and global organizations in activities pertinent to its mission, thereby connecting academia with the world of public policy. Through these projects, YCSG produces reports, policy papers, and other publications that contribute toward influencing the attitudes and actions of policy makers, academics, and institutions. Natural opportunities exist to present the results of this work at Yale through seminars, colloquia, and public lectures.

The center’s strategy comprises four pillars. First, we focus on issues that are truly core to globalization, like international trade, global finance, inclusion, and the provision of key global public goods. Second, relying on a diversity of means—from closed brainstorming sessions among highly specialized thinkers to large multidisciplinary conferences—the center serves at Yale as a catalyst for debate and cutting-edge thought with a view to generate policy-relevant proposals. Third, in addition to our priority task of interacting with the Yale community, we seek actively to collaborate with a variety of institutions and individuals across the globe to leverage our own resources, reinforce the policy pertinence of our work, and support Yale’s internationalization efforts. And fourth, in the endeavor of disseminating critical analysis and stirring constructive debate, we apply ourselves to reach not only the academic and policy worlds with printed publications, but also to communicate with a wide audience of informed citizens around the world.

Included among the center’s recent international activities are the following:

YCSG works with the Natural Resource Charter, an effort to establish a set of principles for governments and societies on how best to harness the opportunities created by extractive resources for development.

The center also works with the Global Commission on Elections, Democracy and Security, for which the center’s director serves as vice chair and Kofi Annan as chair. It aims to highlight the importance of the integrity of elections to achieving a more secure,
prosperous, and stable world. The Global Commission works to convince different stakeholders why elections with integrity matter not just for democracy, but also for security, human rights, and development. At the heart of the Global Commission’s approach is ensuring that the international community applies political solutions to the political problems surrounding elections, rather than purely technical approaches.

In follow-up to the center’s collaboration with the Global Commission on Drug Policy, YCSG held a conference in 2011 that resulted in the publication _Rethinking the “War on Drugs” through the US-Mexico Prism_, which is available for download at www.ycsyale.edu.

On campus, the center hosts international conferences, organizes workshops and panels, and works constantly to bring to the Yale community individuals who have input on international policy. YCSG’s Distinguished Visiting Fellows interact with faculty and students and are expected to produce one or more publications during their tenure.

In order to multiply the effects of the internal and external dimensions of the center’s strategy, YCSG has developed a global media instrument, _YaleGlobal Online_ magazine (www.yaleglobal.yale.edu). _YaleGlobal_ explores the growing interconnectedness of the world and aims to analyze and promote debate on all aspects of globalization. A Chinese-language edition, _YaleGlobal Fudan Edition_, was launched in September of 2009 with partner institution Fudan University. The magazine posts three original articles per week, republishes and archives articles from around the globe, and offers interviews with eminent visitors as well as video recordings of the center’s events at Yale. With a vastly increased readership in over 160 countries, _YaleGlobal_ now receives 1.5 to 2 million hits per week.
YALE CLIMATE AND ENERGY INSTITUTE

http://climate.yale.edu

**Director**  Rajendra K. Pachauri

The Yale Climate and Energy Institute (YCEI) seeks to understand Earth’s climate system, the ecological and social impacts of climate change, and the strengths and weaknesses of current political and economic systems’ ability to respond to climate change, and to provide realistic, implementable solutions to societies and communities around the world.

The YCEI is an umbrella organization within Yale University, composed of all relevant departments, centers, and faculty. Its mission promotes a multidisciplinary approach to learning, research, and the development of strategies that help societies contribute to solutions and adapt to the challenges of local and global climatic changes.
Policies and Regulations

ADMISSIONS

www.yale.edu/graduateschool/admissions

Application for admission to any of the Graduate School’s programs should begin in the summer or fall of the academic year prior to the one in which the applicant proposes to matriculate. Application can be made to only one department, program, or combined program. The Graduate School utilizes an online application. Access to this application as well as application procedures, guidelines, requirements, fees, deadline dates, and all other information that an applicant will need are available at the Web site listed above.

Holders of American Ph.D. or Sc.D. degrees, or their international equivalents, are not eligible for admission to the Graduate School in the field in which they have already earned a degree. They may, however, apply in other fields and are also eligible to apply for admission to the Division of Special Registration as special students for nondegree study (see Nondegree Study below for more information or visit the Web site listed above). With the approval of the appropriate associate dean, holders of master’s degrees are eligible for admission to a terminal master’s degree program in the same field at the Graduate School provided that there is significant curricular distinction between the previous and proposed programs of study.

Individual program descriptions, prerequisites, special admissions requirements, and links to these programs are available via the Admissions Web site. Although programs may have varying prerequisites and special requirements for admission, all programs will require, in addition to an application and the application fee, three letters of recommendation, transcripts from each academic institution previously attended, and the results of the Graduate Record Examinations (GRE) General Test, which is administered in the United States and abroad by Educational Testing Service (ETS). This examination, in addition to any GRE Subject Tests that may be required by the student’s program of study, should be taken as early as possible to ensure that official scores are released and received no later than the stated deadline of the program for which the student is applying.

Applicants whose native language is not English must present evidence of proficiency in English by satisfactorily completing the Test of English as a Foreign Language (TOEFL), which is administered by ETS, or the International English Language Testing System (IELTS). This requirement is waived only for applicants who will have received a baccalaureate degree, or its international equivalent, prior to matriculation at Yale, from a college or university in which English is the primary language of instruction. The examination, if required, should be taken as early as possible to ensure that official scores are released and received no later than the stated deadline of the program for which the student is applying.

Students who do not demonstrate sufficient proficiency in English may be retested or asked to take courses in English for speakers of other languages. A higher level of proficiency will be required in order for students to serve as teaching fellows.
International applicants who accept offers of admission will be required to give appropriate evidence of necessary financial support before the University will be able to issue visa documents.

The application contains questions regarding prior or pending criminal convictions and disciplinary actions. When an applicant answers affirmatively to either of these questions, the Graduate School will evaluate the circumstances outlined by the applicant to determine if they are potentially relevant to his or her participation in the Yale community as a graduate student. In cases where such charges are pending, the Graduate School may decide to admit the applicant contingent upon the charges being resolved or to defer the decision on admission until the charges are resolved.

It is the policy of the Graduate School to verify all credentials in support of an application. All transcripts, recommendations, publications, standardized test scores, and supplemental materials may be traced to their sources in order to confirm their authenticity. Written materials submitted by an applicant may be subject to review for the purpose of identifying plagiarism.

Applicants are typically notified of decisions regarding their applications during the months of February and March. Official notification is sent from the Graduate School of Arts and Sciences only.

All entering students must have obtained the bachelor’s degree or its international equivalent. Offers of admission are contingent on a student providing an official transcript indicating that the student has been awarded a baccalaureate degree (or its international equivalent) prior to matriculation. Students who are not able to provide such evidence will not be permitted to register. Those who have been engaged in graduate work at Yale or another university must also present an official transcript giving evidence of degree(s) awarded and/or satisfactory completion of the previous year’s work.

Applicants who have been previously denied admission to the Graduate School of Arts and Sciences three times may not apply again.

The Office of Graduate Admissions will not release application materials, including standardized test scores, letters of recommendation, or transcripts, to the applicant or other institutions or agencies for any purpose. Students will need to contact ETS, recommenders, or educational institutions they have previously attended in order to furnish such materials to a third party.

PROGRAMS OF STUDY

Full-Time Degree Candidacy

Most students enrolled in the Graduate School are registered for full-time study as they pursue a Ph.D. or master’s degree program. These students devote their full effort to course work, preparation for qualifying examinations, gaining teaching experience, and the research and writing leading to the completion of the dissertation.

Part-Time Study

In rare circumstances, qualified individuals who are unable to devote their full time to graduate study may apply and be admitted as part-time students in either doctoral or terminal master’s programs. For more complete information, see Part-Time Study under Degree Requirements, below.
Nondegree Study

Qualified individuals who wish to study at the graduate level as nondegree candidates may be admitted to the Division of Special Registration (DSR). Admission to the DSR is for one term or for one year only and carries with it no commitment by the Graduate School for further study. Students admitted for the academic year must demonstrate satisfactory academic performance in the first term in order to register for the second term. Students in the DSR may obtain transcripts indicating the appropriate credit for work completed.

DSR students engaged in course work or a combination of course work and research are identified as Special Students. Although normally admitted for full-time study, Special Students may be admitted for part-time study and are charged tuition on a per-course basis, whether for credit or audit. Please refer to Financing Graduate School below for a schedule of tuition and fee charges. Students admitted to the DSR as Special Students are not eligible for financial aid, including federal and most nonfederal student loans.

Advanced graduate students who are degree candidates (at the master’s or Ph.D. level) at another university and who have made arrangements with a specific Graduate School faculty member for a research project under his or her direct supervision may be admitted to the DSR as Visiting Assistants in Research. Undergraduate students in combined or simultaneous B.S./M.S., B.A./M.A., or similar programs are not considered advanced graduate students. Student research conducted at Yale must be part of the visiting student’s thesis or dissertation. The extent and location of the research completed at Yale must be cited in the completed thesis or dissertation. Any proposal for the admission of a Visiting Assistant in Research must be discussed by the relevant departmental director of graduate studies and the appropriate associate dean. The Graduate School does not provide financial support to Visiting Assistants in Research. Such students either hold standard graduate student Assistantship in Research appointments that are funded by the faculty adviser, or provide their own funding through external awards or personal resources. Please refer to Financing Graduate School below for a schedule of tuition and fee charges.

Detailed information, requirements, and access to the online DSR application are available at www.yale.edu/graduateschool/admissions/nondegreeprograms.html. DSR applicants must provide evidence of health care for the duration of their studies at Yale at the time of application.

Some departments at Yale have formal exchange agreements with universities in other countries that have been approved by the Graduate School. Graduate students who are admitted to Yale under such approved exchange agreements may be registered as Visiting International Exchange Students. Visiting International Exchange Students normally are not charged tuition.

In rare circumstances, students may apply for a second year of registration in the DSR; however, cumulative enrollment is limited to two years. Students enrolled in the DSR who are subsequently admitted to degree programs in the Graduate School may receive academic and tuition credit for no more than four courses completed while enrolled in the DSR, provided that the department recommends such credit and the appropriate associate dean approves.
Interdisciplinary Study

All graduate students are formally associated with one department or program, and in the case of students in combined-degree programs, with two. Students may, however, be encouraged to take one or more courses in related departments. Students are often advised by faculty members from more than one department during their dissertation research. Students in the Graduate School, with permission of the director of graduate studies and the relevant school, may take advantage of particular course or research opportunities in Yale College and in Yale’s professional schools.

Combined and Joint-Degree Programs

Students interested in African American Studies, Film Studies, and Renaissance Studies pursue a combined Ph.D. with departments in related fields. In addition to these academic programs, there are several formal interdisciplinary Ph.D. programs in the Graduate School listed under the appropriate departmental entries of this bulletin. Ad hoc programs may also be approved. A student who is interested in an ad hoc program should prepare a written proposal for review and approval by the relevant departments and associate deans before the student has advanced to candidacy.

Students are encouraged to contact the appropriate directors of graduate studies about specific opportunities for interdisciplinary study throughout the Graduate School and the University.

The Graduate School also participates in the following formal joint-degree programs with the professional schools: the J.D./M.A. and J.D./Ph.D. programs in cooperation with the Law School; the M.D./Ph.D. program in cooperation with the School of Medicine; the M.A./M.B.A. and Ph.D./M.B.A. programs in cooperation with the School of Management; the M.A./M.P.H. program in cooperation with the School of Public Health; and the M.A./M.F.S. and M.A./M.E.S. programs in cooperation with the School of Forestry & Environmental Studies. For all joint-degree programs except the M.D./Ph.D., students are required to submit formal applications to both the professional school and the Graduate School indicating their interest in enrolling in the joint program. Individuals interested in the M.D./Ph.D. program apply directly to the School of Medicine (see Requirements for Joint-Degree Programs, below).

Exchange Scholar Program

www.yale.edu/graduateschool/academics/exchanges.html

Graduate students in Yale Ph.D. programs may petition to enroll full- or part-time for a term or for an academic year as exchange scholars at the University of California at Berkeley, Brown, University of Chicago, Columbia, Cornell, Harvard, MIT, University of Pennsylvania, Princeton, and Stanford. The Exchange Scholars Program enables students to take advantage of special educational opportunities not available at their home institutions. Applications are available at the Web site listed above. Please direct questions to Assistant Dean Edward Barnaby (edward.barnaby@yale.edu). Applications must be received at least six weeks prior to the beginning of the term for which the student is applying.
International Graduate Student Exchange Agreements

All international exchange agreements must be approved in advance by the Graduate School to ensure that they meet University policy and Graduate School guidelines. Departments interested in establishing an exchange program must prepare a statement that demonstrates that there is a clear academic and reciprocal need for such a program, and that the program will conform to the established guidelines for all such exchange agreements.

INTERNATIONAL EXCHANGE PROGRAMS

Agrarian Studies
Amsterdam School for Social Science Research, Netherlands

Chemical and Environmental Engineering
Université de Cergy-Pontoise, France

Computer Science
University of Science and Technology of China, Beijing

Council on East Asian Studies
Inter-University Center for Japanese Language Studies, Yokohama; Inter-University Program for Chinese Language Studies, Tsinghua University, Beijing; International Chinese Language Program, National Taiwan University, Taipei; University of Tokyo, Japan

Economic Growth Center
Research Institute for Economics and Business Administration, Kobe University, Japan

Economics
Institut d’Etudes Politiques de Paris [“Sciences Po”], France; Università Bocconi, Milan, Italy; Universität Mannheim, Germany

Graduate School
Royal Holloway College, University of London, England; Connecticut Department of Education and the State of Baden-Württemberg Exchange, Germany; Universität Konstanz, Germany; University College London, England

French
Ecole Normale Supérieure, Paris, France; Sciences Po, Paris, France

German
Freie Universität, Berlin, Germany; Goethe-Universität, Frankfurt, Germany

History
Sciences Po, Paris, France; University of Sussex, Brighton, England

History of Science and Medicine
Ecole des Hautes Etudes en Sciences Sociales, Paris, France; Ecole Normale Supérieure, Paris, France

Linguistics
Gakushuin University, Tokyo, Japan; Tokyo Metropolitan University, Japan
MacMillan Center for International and Area Studies
Fox International Fellowship Program (Moscow State University; University of Cambridge; Freie Universität, Berlin; Fudan University, Shanghai; University of Tokyo; El Colegio de México, Mexico City; Sciences Po, Paris; Jawaharlal Nehru University, New Delhi); Graduate Institute of International and Development Studies, Geneva, Switzerland

Molecular, Cellular, and Developmental Biology
Peking University, Beijing, China

Political Science
Nuffield College, University of Oxford, England; Sciences Po, Paris, France

Slavic Languages and Literatures
Russian State University for the Humanities, Moscow, Russia

Sociology
Sciences Po, Paris, France; University of Copenhagen, Denmark

Summer Study
Doctoral students are funded year-round and are expected to make progress toward the completion of their degrees during the summer months (see Summer Registration under Registration Status and Leaves of Absence, below). See individual departmental policies in this bulletin regarding specific expectations for degree programs during the summer. Although the Graduate School does not offer courses in the summer, intensive language instruction is available through the Yale Summer Session, and graduate students may wish to take advantage of those programs while in New Haven. For further details on summer offerings at Yale, please consult the Yale Summer Session Web site at www.yale.edu/summer.

Degree Requirements
The requirements set forth in the pages that follow are the minimum Graduate School degree requirements and apply to all degree candidates. Students should consult the listings of individual departments and programs for additional specific departmental requirements.

Requirements for the Degree of Doctor of Philosophy
Length of Study
In most fields of study, six years should normally be sufficient for the completion of the Ph.D., although it is understood that seven years may be needed by students in fields requiring extensive fieldwork or the mastery of difficult foreign languages. Departments and programs make every effort to design a course of study and to provide advice and guidance to make it possible for students to complete their work within six years. Normally three, or at most three and one-half, years are devoted to the completion of predissertation requirements (courses, examinations, selection of a dissertation topic). The remaining time, typically two to three years, is devoted to conducting research and
writing the dissertation. Advanced standing that has been granted for work done in a Yale M.A./M.S. program is counted as part of the six years (for further information, see Transfer Credit and Advanced Standing, below).

**RESIDENCE REQUIREMENT**

Students seeking the Ph.D. degree are required to be in residence in the New Haven area during at least three academic years. This is an academic requirement, distinct from and independent of the tuition requirement described below. The residence requirement must normally be met within the first four years of study. Any exception to the residence requirement must be approved by the department and by the appropriate associate dean.

**TUITION REQUIREMENT AND THE CONTINUOUS REGISTRATION FEE**

All Ph.D. candidates are charged four years (eight terms) of full tuition, or proportionately less if all degree requirements, including submission of the dissertation, are completed in less than four continuous years of full-time study from the date of matriculation in the Ph.D. program.

Once the full-tuition obligation has been completed, registered students are charged the Continuous Registration Fee (CRF).

**TRANSFER CREDIT AND ADVANCED STANDING**

The Graduate School does not award transfer credit for graduate work completed before matriculation at Yale. A department may, with the approval of the Graduate School, waive a portion of the Ph.D. course requirement (normally a maximum of three courses) in recognition of previous graduate-level work done at Yale or elsewhere. Such a waiver does not affect the full-tuition requirement. Courses taken previous to matriculation at Yale will not appear on the student’s Graduate School transcript.

With the approval of the department, a student who is currently enrolled may petition for advanced standing in the Graduate School of up to one year for work completed in a Yale master’s or professional doctoral program that is relevant to the student’s Ph.D. program. This petition must be received by the appropriate associate dean in the Graduate School before the end of the student’s first year of study in the Ph.D. program. Such students may also be offered admission with advanced standing by the department and the Graduate School. Such advanced standing will reduce the four-year tuition requirement and eligibility for Graduate School fellowship aid accordingly. The normal six-year period of registration will be similarly reduced.

**LANGUAGE REQUIREMENT**

Language requirements are set by individual departments and programs. Specific language requirements are explained in the individual department listings. All departmental requirements are subject to initial approval by the Executive Committee of the Graduate School and are monitored by the divisional degree committees. A department cannot make exceptions to its own requirements without authorization by the appropriate degree committee.

The required level of proficiency in foreign languages, and the method for demonstrating it, are determined by the individual departments. Most give their own examinations.
A few permit the requirement to be satisfied by passing particular courses. Students are urged to be prepared to meet language requirements at the beginning of their first year of study.

**COURSE AND HONORS REQUIREMENTS**

The course requirements for the Ph.D. degree are set individually by each department or program. Each course offered in the Graduate School counts for a single credit or, in rare cases, one-half credit. Only courses offered by the Graduate School and officially numbered on the graduate level (i.e., 500 or higher), and receiving a qualitative grade of Honors, High Pass, or Pass, can fulfill requirements for the doctoral degree, with the exception of certain language courses or where specified in advance by the department or program. Although departments may set more stringent requirements, to meet the minimum Graduate School quality requirement for the Ph.D., students must achieve the grade of Honors in at least one full-year or two full-term graduate courses taken after matriculation in the Graduate School and during the nine-month academic year. The Honors requirement must be met in courses other than those concerned exclusively with dissertation research and preparation.

A student who has not met the Honors requirement at the end of the fourth term of full-time study will not be permitted to register for the fifth term. A student who is not in good academic standing with regard to course work or research as defined by the minimum standards established by the Graduate School and the expectations outlined by the student's department or program may be dismissed from the Graduate School. Such dismissal will be recorded on the student's transcript.

**QUALIFYING EXAMINATION**

Each Ph.D. student must pass a general examination, separate from course examinations, in the major subject offered and in such subordinate subjects as may be required by the department. Such examinations are described in the individual department listings. Students should consult with the director of graduate studies for further information about this requirement.

**PROSPECTUS**

The dissertation topic, in the form of a prospectus, must be approved by the department. Certification of this approval, together with a copy of the prospectus, must be filed with the Graduate School registrar at least six months prior to the submission of the dissertation. By the time a prospectus is submitted, the department must approve a member of the graduate faculty to serve as the primary adviser for the dissertation. Students who plan to submit the dissertation before the end of the fourth year of study should be sure to reserve time to satisfy this requirement.

The prospectus should be viewed as a preliminary statement of what the student proposes to do in his or her dissertation and not as an unalterable commitment. However, substantive deviation from the dissertation project outlined in a prospectus (as determined by the director of graduate studies and associate dean) will require that the student draft a new prospectus to be approved by the dissertation committee at least six months prior to the submission of the dissertation.
In consultation with their faculty advisers and directors of graduate studies, students should give serious thought to the scale of proposed dissertation topics. There should be a reasonable expectation that the project can be completed during the stipulated duration of the degree program.

The appropriate form and typical content of a prospectus inevitably vary from field to field. In most cases, however, a prospectus should contain the following information:
1. The name of the dissertation adviser.
2. A statement of the topic of the dissertation and an explanation of its importance. What in general might one expect to learn from the dissertation that is not now known, understood, or appreciated?
3. A concise review of what has been done on the topic in the past. Specifically, how will the proposed dissertation differ from or expand upon previous work? A basic bibliography should normally be appended to this section.
4. A statement of where most of the work will be carried out—for example, in the Yale library or another library or archive, in the laboratory of a particular faculty member, or as part of a program of fieldwork at specific sites in the United States or abroad.
5. If the subject matter permits, a tentative proposal for the internal organization of the dissertation—for example, major sections, subsections, sequence of chapters.
6. A provisional timetable for completion of the dissertation.

ADMISSION TO CANDIDACY

Admission to candidacy indicates that the department and the Graduate School consider the student prepared to do original and independent research. Students will be admitted to candidacy when they have completed all predissertation requirements, including the dissertation prospectus and excluding any required teaching. Admission to candidacy will normally take place by the end of the third year of study. Any programmatic variations from this pattern that have been approved by the Executive Committee of the Graduate School are described in the individual department statements. Training in teaching can occur both before and after a student is admitted to candidacy. A student who has not been admitted to candidacy at the expected time will not be permitted to register for the following term. At the time of advancement to candidacy, students who have not petitioned for or received en route degrees (e.g., M.A., M.S., M.Phil.) will automatically be considered for such degrees. If a student advances to candidacy after the deadline to submit a petition for the degree in that term, the student will be considered for a degree in the following term.

TRAINING IN TEACHING

The Teaching Fellow Program (TFP) is the principal framework at Yale in which graduate students learn to become effective teachers. Learning to teach and to evaluate student work is fundamental to the education of graduate students. Teaching is required in many departments and is an expectation for all doctoral students. The TFP provides opportunities for graduate students to develop teaching skills, under faculty guidance, through active participation in the teaching of Yale undergraduates. Teaching fellows who encounter problems or difficulties related to their teaching appointments are encouraged to meet with the director of the TFP (Judith Dozier Hackman) or their associate
dean. A student must be registered in the Graduate School, at least half-time, to be appointed as a teaching fellow (TF) or as a part-time acting instructor (PTAI). TFs assist faculty in teaching relatively large undergraduate courses. PTAIs are responsible for small undergraduate courses, subject to guidance and advice by department faculty. For a more detailed description of these types of appointments, see Teaching Fellow Levels under Financing Graduate School.

Faculty should clearly communicate to students and teaching fellows their expectations about evaluation of work, feedback to students, and grading policies. Faculty are expected to prepare course syllabi, assignments, and examinations. Typically, they should not ask teaching fellows to give lectures when they are unable to attend class, although they are encouraged to offer occasional opportunities for student lectures when they can attend and advise. While on rare occasions teaching fellows may be asked to assist with administrative activities (such as placing course material on library reserve or online, making photocopies for class, ensuring that audiovisual resources are available and working, and the like), in general such activities should not be done by students.

Graduate students may occasionally serve as graders for graduate-level courses, but only in highly quantitative courses with grading demands for frequent assignments. Even there, the grading may not count toward final grades, and the students may not grade exams. In courses that are double-titled with both graduate and undergraduate numbers, the same guidelines hold for the grading of assignments; all other grading of graduate students should be done by the faculty member.

The Graduate School requires that all students who teach be in good academic standing. In addition, they must be fluent in English, except for those who solely grade. Graduate students whose native language is not English are required to meet the oral English proficiency standard before they may begin teaching. The standard may be met by (1) passing the SPEAK test, (2) passing the ELI oral exam, (3) passing the speaking section of the iBT TOEFL, (4) passing the speaking portion of the IELTS exam, or (5) having received an undergraduate baccalaureate degree or its equivalent from an institution where the principal language of instruction is English. In some instances, a student’s director of graduate studies may require that students with an undergraduate degree from English-speaking institutions also pass the SPEAK test to satisfy the language requirement.

DEFERRAL OF TEACHING YEAR

In the humanities and social sciences, students in a teaching year, normally years three and four, may request to defer a teaching year or term into the fifth or sixth year for compelling academic reasons. Such reasons include but are not limited to a need to conduct research in absentia or undertake additional preparation for teaching.

A student who wishes to defer a teaching year must make arrangements to do so no later than the beginning of the fourth year. At the time the deferral is requested, the student and director of graduate studies should agree on the teaching the student will do in the fifth or sixth year. The assignment should be at the level normally expected in a regular teaching year, that is, a TF 3.5 or 4, depending on the department.

The deferral must be approved by the DGS and the associate dean. If the deferral is approved, the conditions associated with the formal teaching years will apply to the
specified terms of study, including that the student will receive priority in terms of assignment; the assignment will not be changed unless the student, DGS, and instructor agree upon it, or if enrollment in any of the teaching fellow’s discussion sections falls below six students, or if course enrollment falls below nine students for a grader; and the student will receive the standard departmental stipend. Under no circumstances may a student defer a teaching year beyond the sixth year, and all students must still complete the Dissertation Fellowship by the end of the sixth year.

Dissertation

The dissertation should demonstrate the student’s mastery of relevant resources and methods and should make an original contribution to knowledge in the field. Normally, it is expected that a dissertation will have a single topic, however broadly defined, and that all parts of the dissertation will be interrelated, but can constitute essentially discrete units. Beyond this principle, the faculty will apply the prevailing intellectual standards and scholarly practices within their fields in advising students with regard to the suitable scope, length, and structure of the dissertation, including what constitutes an original contribution to that field.

In accord with the traditional scholarly ideal that the candidate for a doctorate must make a contribution to knowledge, all dissertations that have been accepted by the Graduate School are published on microfilm by University Microfilms International and then deposited in the Manuscripts and Archives section of the Sterling Memorial Library. As such, classified or restricted research is not acceptable as part of the dissertation. Exceptions must be approved in advance by the appropriate degree committee.

Dissertations must be written in and submitted in English except in some disciplines in which there are strong academic reasons for the submission of a dissertation in a foreign language. At the time of the submission of their prospectus, students must petition for permission to submit all or a portion of their dissertations in a foreign language. The petition should be submitted in the form of a letter explaining the academic reasons for using a foreign language and will be evaluated by the DGS and the appropriate associate dean. Petitions for writing and submitting a dissertation in a foreign language will not be accepted after students have advanced to candidacy. A dissertation may not be translated into English by someone other than the student.

Dissertations must be submitted to the Graduate School by the respective deadlines in the academic calendar to be considered for December or May degrees. No exceptions are made to these deadlines, which have been established to allow sufficient time for departments to receive evaluations from readers and recommend students to the degree committees. Once the adviser and committee have approved a dissertation for submission and the director of graduate studies has been notified, the student submits one unbound copy of the dissertation, softbound copies that will be distributed to each reader, a completed set of required forms (available at www.yale.edu/graduateschool/academics/forms/dissertationChecklist.pdf), and any requisite fees to the Graduate School. The department must submit to the Graduate School a fully completed “Notification of Readers” form that has been approved by the director of graduate studies.

Registered doctoral candidates must have a principal adviser with an appointment on the Graduate School faculty. The Graduate School requires that each dissertation be
read by at least three persons but not more than five, at least two of whom are ladder or
ladder-track faculty members at Yale. All readers must hold the Ph.D. degree as well as
a faculty position or be considered otherwise qualified to evaluate the dissertation. The
process for assigning readers is determined by the department, which is responsible for
confirming the qualifications, contact information, and willingness of all readers before
notifying the Graduate School of these appointments. All appointments of readers are
subject to review by the associate deans. The department is responsible for reassigning
readers as necessary, and this process will not extend the deadline for readers’ reports to
be returned to the Graduate School. The Graduate School will send each student a copy
of the readers’ reports and place a copy in the student’s permanent academic record.

Award of the Ph.D. will be considered by the degree committee only if all readers’
evaluations have been received by the Graduate School and are positive, all other degree
requirements have been met, and the department has recommended the awarding of
the degree. Should a reader indicate that a dissertation contains significant errors in typing, grammar, spelling, reference citations, or other textual matters, the student will be
required to revise the dissertation by a date provided by the registrar. Corrected pages
or a new unbound copy of the dissertation must be submitted to the Graduate School,
as well as a letter from the director of graduate studies indicating that the student has
addressed the readers’ concerns, before the dissertation can be recommended for a degree.
In the event that a dissertation is evaluated as failing, departmental practice determines
the number of reevaluations normally permitted.

The Graduate School does not require departments to evaluate the dissertations of
degree candidates who are no longer registered. The decision to review such dissertations
rests with the department.

Requirements for the Degree of Master of Philosophy

The Master of Philosophy is awarded en route to the Ph.D. in many departments. The
minimum general requirements for this degree are that a student shall have completed
all requirements for the Ph.D. except required teaching, the prospectus, and dissertation.
Students will not generally have satisfied the requirements for the Master of Philosophy
until after two years of study, except where graduate work done before admission to
Yale has reduced the student’s graduate course work at Yale. In no case will the degree be
awarded for less than one year of residence in the Yale Graduate School.

Not all departments offer the M.Phil. degree. Information regarding special departmental requirements for the degree, if any, are stated in the individual department listings.

Requirements for the Degree of Master of Arts or Master of Science

Except in the case of programs listed below under Terminal M.A./M.S. Degrees, stu
dents are not admitted as candidates for the Master of Arts or Master of Science degree.
However, students in most doctoral departments may be awarded the M.A. or M.S. en
route to the Ph.D. degree.

Although departments may set more stringent requirements, the minimum general
requirements must comply with the credit hour standards set by the U.S. Department
of Education and include the (1) completion of a minimum of seven courses leading to
the Ph.D. or the equivalent of such courses, with grades that satisfy the departmental
requirements; (2) completion of one academic year in full-time residence, or the equiva-
 lent, at Yale; (3) recommendation by the department for award of the degree, subject to
final review and approval by the appropriate degree committee. In no case may courses
taken prior to matriculation in the Graduate School, or in Yale College or other summer
programs, be applied toward the requirements for the Master of Arts or Master of Science
degree.

Some departments do not offer the M.A. or M.S. en route to the Ph.D., or award it
only to students who are withdrawing from the Ph.D. program. For information about
this or any special departmental requirements additional to the general requirements
stated above, see the department listings.

Students enrolled in a Ph.D. program may receive a master’s degree from another
department provided that it is in a related field of study and deemed necessary for the
completion of the proposed dissertation research. The student’s proposed program of
study must receive formal approval in writing from the director of graduate studies in
both departments and the appropriate associate dean prior to enrollment in courses that
will fulfill master’s degree requirements in another department. Courses taken toward a
master’s degree in another department must be part of the student’s course requirement
for the Ph.D., as approved by the director of graduate studies in both departments. How-
ever, such course work cannot also be counted toward a master’s degree in the department
to which the student was admitted. A student may not advance to candidacy until all
requirements have been completed for both the en route master’s degree in the program
to which the student was admitted and the proposed master’s degree in a related field.
Students who wish to obtain a master’s degree in a field that is not directly related to
the doctoral degree must apply for a personal leave from the Ph.D. program and submit
an application for admission to the master’s program. Any financial aid offered to the
student for a Ph.D. program may not be transferred to a master’s degree course of study.

Students enrolled in combined programs normally receive combined en route degrees as
well.

TERMINAL M.A./M.S. DEGREES

The M.A./M.S. degrees are offered as terminal degrees in twenty-two departments and
programs: African Studies, American Studies, Applied Mathematics, Applied Physics,
Archaeological Studies, Biostatistics (Epidemiology and Public Health), Computational
Biology and Bioinformatics, Computer Science, East Asian Studies, Engineering and
Applied Science, English, European and Russian Studies, History, History of Science and
Medicine, International and Development Economics (IDE), International Relations,
Mathematics, Medieval Studies, Music, Near Eastern Languages and Civilizations, Slavic
Languages and Literatures, and Statistics.

The residence and tuition requirements for a terminal M.A./M.S. degree are a mini-
imum of one year of full tuition and course work in residence in one-year programs, or a
minimum of two years of full tuition and course work in residence in two-year programs.
For information about which departments offer one-year programs and which offer two-
year programs, see the department listings.
With the approval of the department and the appropriate associate dean, a student may be admitted for part-time study toward the master’s degree. In that case, tuition will be charged on a per-course basis. Part-time study does not change the one- or two-year full-tuition obligation described above. Part-time students must complete all degree requirements within five years of matriculation.

Individual departments establish the specific course and language requirements for these degrees. Although departments may set more stringent requirements, the minimum Graduate School requirement for students admitted for M.A./M.S. degrees is an overall grade average of High Pass, including a grade of Honors in at least one full-term graduate course (for students enrolled in one-year programs), or in at least two full-term graduate courses (for students enrolled in two-year programs). In order to maintain the minimum average of High Pass, each grade of Pass on the student’s transcript must be balanced by one grade of Honors. Each grade of Fail must be balanced by two grades of Honors. If a student retakes a course in which he or she has received a failing grade, only the newer grade will be considered in calculating this average. The initial grade of Fail, however, will remain on the student’s transcript. A grade awarded at the conclusion of a full-year course in which no grade is awarded at the end of the first term would be counted twice in calculating this average.

Each course offered in the Graduate School counts for one or one-half credit. Only courses offered by the Graduate School and officially numbered on the graduate level can fulfill requirements for the master’s degree, with the exception of certain language courses or when specified in advance by the department or program. A student who has not fulfilled the course requirements for the degree at the conclusion of the standard duration of the program can, at the discretion of the department and associate dean, be granted one additional term to fulfill degree requirements. If the student has not taken the requisite number of courses but has fulfilled the tuition requirement, the student will be charged the Continuous Registration Fee. If the student must take additional courses beyond the number required, the student will be charged tuition on a per-course basis.

No credit will be awarded toward the M.A./M.S. degree for courses taken prior to matriculation in the Graduate School, or taken in Yale or other summer programs. Students in one of Yale’s professional schools who matriculate in the Graduate School to complete a joint master’s degree may, however, with the permission of their director of graduate studies, count courses already completed in their professional school program toward the joint degree. See the individual program or department listings.

The master’s degree may also be earned jointly with the B.A./B.S. in certain departments by students enrolled in Yale College. For further information, see *Yale College Programs of Study*, available from the Office of the Dean of Yale College.

**Requirements for Joint-Degree Programs**

Students who are candidates for degrees in any of the joint programs sponsored by the Graduate School and Yale’s professional schools must meet the requirements established by each school for the degree they are seeking. Degree requirements in the Graduate School include both the Graduate School’s general requirements and any special requirements set by the relevant department or program. In all cases the Honors requirement
must be fulfilled in non-research courses offered primarily for Graduate School students, taken after matriculation in the Graduate School.

In addition to the J.D./Ph.D., J.D./M.A., M.D./Ph.D., and Ph.D./M.B.A. programs described below, joint-degree programs with other professional schools have been approved for students in European and Russian Studies, International Relations, and International and Development Economics. These programs are described in the individual department listings.

J.D./Ph.D. AND J.D./M.A. PROGRAMS

Admission to the Graduate School joint-degree programs with the Law School, described below, requires separate admission to both schools as well as approval by the appropriate associate dean in each school, and by the director of graduate studies in the student’s Graduate School department. Students must apply for admission to a joint program no later than their first year of study in a J.D., Ph.D., or two-year M.A. program, and must matriculate in the joint program no later than the beginning of their second year. Students wishing to pursue a J.D./M.A. in a one-year M.A. program must apply for admission no later than their first year of study in the J.D. program and must matriculate in the M.A. program as a joint-degree candidate.

In the J.D./Ph.D. program, the first year of study is spent principally in the Law School. The second and third years are combined according to the interest of the student. As many as six term courses, designated by the student at the beginning of the term, may be counted toward both degrees. During this time all course work and language requirements for the Ph.D. program are normally completed. The J.D. should be completed by the end of the fourth year. During the fifth year the student is expected to complete all remaining predissertation requirements and be admitted to candidacy. The teaching requirement for the Ph.D. will normally be completed by this time. Any exception to this pattern of study must be approved by the appropriate associate dean.

The minimum residence requirement in the J.D./Ph.D. program is four years. The tuition requirement is two and one-half years in the Law School and three and one-half years in the Graduate School. Financial aid is provided by each school according to its own criteria, typically for two and one-half years in the Law School and three and one-half years in the Graduate School, and is awarded by each school during the terms in which the student pays tuition in that school. Students are not eligible for financial aid from the Graduate School during terms in which they are registered at another school.

In the J.D./M.A. program, the J.D. and M.A. degrees are awarded simultaneously at the end of the fourth year of study in one-year M.A. programs and at the end of four and one-half years of study in two-year M.A. programs. The Graduate School tuition requirement for J.D./M.A. students in one-year M.A. programs is one year of tuition; students in two-year M.A. programs have a one and one-half year tuition requirement in the Graduate School. In all cases students pay three years of tuition in the Law School. Students in J.D./M.A. programs, like other students in M.A. programs, are not ordinarily eligible for University Fellowship aid through the Graduate School. Students usually enroll in the Law School during the first year of study. The pattern of enrollment in subsequent years depends on whether the M.A. program is a one-year or a two-year program.
**M.D./PH.D. PROGRAM**

This program is sponsored jointly by the Graduate School and the School of Medicine. Applications for admission to the joint program are reviewed by a committee composed of faculty members and deans from both schools. Normally, admission to the program includes simultaneous admission to both schools. However, students may apply to the joint program by October 15 of their second year of study in either the M.D. or Ph.D. program, and they must matriculate in the joint program no later than the beginning of the following year.

Students request affiliation with a particular department or program in the Graduate School by the middle of their third year of study in the joint program, after their course and research interests have been defined. Although students usually pursue their research in one of the biological sciences, those interested in earning the Ph.D. through work in another department may do so under certain circumstances, with the approval of the M.D./Ph.D. committee.

The residence requirement in this program is seven years. The full-tuition requirement is three and one-half years in the School of Medicine and two and one-half years in the Graduate School. To qualify for the M.D. and Ph.D. degrees, students must satisfy all degree requirements of both schools. Normally, a student admitted to this joint program must satisfy the Graduate School Honors requirement by the end of the second year of study and must complete all remaining predissertation requirements within four terms of affiliation with the Ph.D. department. This schedule may be adjusted for students who have been enrolled in either the School of Medicine or the Graduate School before admission to the M.D./Ph.D. program.

**PH.D./M.B.A.**

The joint degree combines the two-year M.B.A. degree from the School of Management (SOM) with the six-year Ph.D. It would allow its students to complete requirements for both degrees in roughly seven years rather than the eight or more years that would be required if the degrees were pursued separately. Both degrees will be awarded simultaneously once the student has fulfilled the degree requirements of both programs. Like all graduate students, joint-degree students will receive a full financial aid package from the Graduate School during the terms registered there. For students in the humanities and social sciences, this includes four years of tuition, five years of stipend, and health insurance for each term registered. Funding for students in the sciences will mirror standard, departmental packages. Students will pay one and one-half years of tuition for the three terms registered at SOM.

The School of Management and the Graduate School will use independent admissions processes and make independent admissions decisions. Applicants must take both the GRE tests and the GMAT. Prospective students who are currently enrolled neither in the Graduate School nor in SOM may apply to both schools simultaneously. Students already enrolled in the Graduate School normally apply to SOM after taking one course at SOM for matriculation any time after they have passed their Ph.D. qualifying examinations at the Graduate School but prior to beginning the fifth year of study. This pattern, however, is flexible, and students interested in the joint degree should consult the Web pages of their departments or programs for further information. Students registered in
SOM may apply to the Graduate School during the first year of study at SOM. Following admission to both programs, each student must complete a form requesting joint-degree status. The form must be signed by the appropriate associate dean at the Graduate School and at SOM and the student’s director of graduate studies.

A student in the Graduate School who wishes to pursue the joint degree will normally be required to take one course in SOM before applying there. The student will need to obtain the permission of the SOM instructor and state his or her intention to apply to the joint-degree program. The Graduate School will waive one course during the term in which the student takes this preliminary course at SOM. For students in some disciplines, this prerequisite to admission will be waived. The student is expected to complete the qualifying exams and prospectus according to the standard schedule set by the Graduate School. The student will normally begin study at SOM after completing the departmental Ph.D. qualifying examinations at the Graduate School, but there are exceptions to this pattern described on the departmental Web sites. Upon admission to SOM, the joint-degree student will register at SOM for the first-year core of courses. Students may not fulfill any Graduate School requirements during this time, nor may they serve as teaching fellows in the Graduate School in any capacity. The student must register for a third term at SOM and complete four additional courses, normally prior to the beginning of the sixth year of study at the Graduate School. Depending on the schedule of individual students, they may or may not complete all four of these remaining courses within a single term at SOM. If they do not, they may complete outstanding courses while registered at the Graduate School, but in all circumstances, students are required to pay a third term of tuition to SOM.

A student who has been admitted to the Graduate School while completing the first-year core at SOM may begin course work in the Graduate School the following year. Once a joint-degree student has matriculated at the Graduate School, it is expected that the student remain registered continuously until completing the qualifying exams. During this time, the student may undertake limited course work at SOM, but may not register there for the third and final term until he or she has passed the departmental exams at the Graduate School. Prospective students who apply simultaneously may start the joint degree at either school and follow the schedules outlined above.

All joint-degree students are subject to the codes of conduct published in the bulletins of their respective programs. Joint-degree students will receive separate transcripts from SOM and the Graduate School. Each transcript will list the courses required for the respective school’s portion of the joint degree. Each course taken may be counted toward one degree only. The transcripts will reflect the joint-degree status. If a joint-degree student decides not to complete both degrees, he or she may petition both schools to receive a single degree if the requirements for the single degree, including the two-year tuition requirement at SOM, are met.

**Responsible Conduct in Research**

The Graduate School is committed to training its students in the importance of professional ethics. All graduate students are required to complete an online training module in professional ethics before they can register for the spring term of their first year. Additionally, students in the sciences are required to complete a training course in the
Graduate School of Arts and Sciences 2012–2013

responsible conduct of research by the end of their first year of study. These training opportunities are not necessarily independent of compliance work required by participation in certain externally administered grants. They are meant to establish a basis of understanding among graduate students at Yale concerning their participation in scholarship and research.

Petitioning for Degrees

Graduate School degrees are awarded twice each year, at Commencement in May and in the fall (normally in December, depending on the schedule of the Yale Corporation). Degrees are not granted automatically. Students must file a petition for each degree by the appropriate date (see Schedule of Academic Dates and Deadlines). Petitions that have received favorable recommendations from the student’s department are reviewed by the appropriate degree committee. When the degree committee has given its approval, the petition is forwarded to the faculty of the Graduate School and then to the Yale Corporation. If the petition is successful, the student will be notified in writing by the dean of the Graduate School.

Students enrolled in Ph.D. programs should not petition for M.A./M.S. and M.Phil. degrees until the end of the term in which requirements for the degree are completed (e.g., students completing degree requirements during the spring term should petition for award of the degree the following fall). At the time of advancement to candidacy, students who have not petitioned for or received en route degrees (e.g., M.A., M.S., M.Phil.) will automatically be considered for such degrees. Students in terminal M.A./M.S. programs may petition for their degrees in the term in which they expect to complete them.

Commencement

www.yale.edu/graduateschool/academics/commencement.html
GScommencement@yale.edu

There is only one University Commencement ceremony each year, in May. All degrees awarded for both December and May of each academic year are presented at the May ceremony.

ACADEMIC REGULATIONS

Registration

Only registered students may attend classes, receive financial aid, or use the facilities of the University. Students must register every term for the duration of their degree program (normally six years or less for Ph.D. programs and one or two years for students in M.A./M.S. programs). This regulation applies to all students, whether engaged in course work, preparation for qualifying examinations, or dissertation research, and, in the case of students in Ph.D. programs, whether study is in residence or in absentia. Students who do not register for any term for which they have not been granted a leave of absence (see Leaves of Absence, under Registration Status and Leaves of Absence, below) will be considered to have withdrawn from the Graduate School. Privileges associated with
registered status (i.e., library privileges, health care coverage, and e-mail accounts) will likewise be withdrawn.

Unless otherwise noted in the letter of admission, students are expected to register on a full-time basis. Part-time employment at the University or elsewhere should not conflict with the obligations of the degree program or interfere with academic progress. Part-time employment beyond an average of ten hours per week requires permission of the director of graduate studies in consultation with the appropriate associate dean. International students must consult the Office of International Students and Scholars (OISS) regarding their eligibility for employment while in the United States.

No student may register for any term unless he or she is making satisfactory progress toward the degree and has been cleared by the Office of Student Financial Services to register. In compliance with Connecticut state law, no student will be allowed to register unless satisfactory evidence of immunity to measles and rubella has been presented to Yale Health (see Health Services under Yale University Resources and Services for more information).

Satisfactory progress means that the student has met all Graduate School and departmental requirements normally expected for each stage of the student’s program. For Ph.D. students before admission to candidacy and for M.A./M.S. students, this includes satisfactory completion of courses from the preceding term(s). As indicated in the sections on Course and Honors Requirements and Admission to Candidacy, students in Ph.D. programs must satisfy the Honors requirement before beginning the fifth term of study and must be admitted to candidacy by the appropriate time. In addition to satisfying these general Graduate School requirements, students must meet any additional requirements specified by their departments. Ph.D. students who have been admitted to candidacy must continue to demonstrate satisfactory progress toward the degree in the annual dissertation progress report. Students who fail to meet departmental or Graduate School requirements by the designated deadlines, and students who have been admitted to candidacy who fail to submit the annual dissertation progress report, will be administratively withdrawn.

Students must register each term until the dissertation is submitted or until six years (twelve terms) of study have been completed. Registered students who submit dissertations will remain registered until the end of the term (i.e., through December for those submitting during the fall term, through May for those submitting before the spring degree deadline, and through August for those submitting after the spring degree deadline) and will retain all privileges of registration (e.g., library privileges, health care coverage, and e-mail accounts). Students who complete all Ph.D. requirements within four continuous years of full-time study in the Ph.D. program will be registered and charged full tuition only through the term in which the dissertation is submitted. Students who have registered part-time or taken a leave of absence must complete the four-year, full-tuition obligation, regardless of when they submit the dissertation.

Students who have not yet submitted the dissertation by the end of the sixth year of study may do so subsequently without registering at the discretion of the department or may request a period of extended registration by submitting the petition for extended registration, which includes the standard Dissertation Progress Report that is required annually by May 1 of all students admitted to candidacy. Before a seventh
year of registration is approved, the student and his or her adviser, as well as the director of graduate studies, must complete a report that specifies the progress the student has already made in writing the dissertation and that also includes a detailed plan for completing the dissertation in the seventh year. In addition to this requirement, students seeking an eighth year of registration must demonstrate serious circumstances beyond their control that have prevented them from completing the dissertation by the end of the seventh year of study. Students who receive extended registration must register online each term and are normally expected to be in residence.

Alternatively, a doctoral student who has completed at least six years of study and who was registered as a full-time student during the previous term may request to enroll with the status “Dissertation Completion.” This part-time status enables advanced students to maintain an active NetID in order to access electronic library resources and their Yale e-mail accounts while completing their dissertations under the supervision of a member of the Graduate School faculty. A student may hold this status for a maximum of four consecutive terms and will be charged the Continuous Registration Fee in each term for which it is approved. Once a student enters this status, he or she may not petition to register as a full-time student in a subsequent term.

**Noncumulative registration** In certain areas of study it may be necessary for a registered student to acquire an academic skill (typically, knowledge of a foreign language) that is essential for a degree requirement or for research in a particular field and for the overall progress of the dissertation but is not an inherent part of the dissertation itself. A student in this situation may request up to one year of “noncumulative registration.” It is important to note that general study in a field related to or parallel with the topic of the dissertation is not appropriate for noncumulative registration.

A student who wishes to have a specific period of study designated as “noncumulative” should discuss the reasons for such a period of study with and secure prior approval from his or her associate dean. If prior authorization has been given by the Graduate School, the period of time spent in acquiring the necessary academic skill will not be counted as part of the student’s six-year period of candidacy. Noncumulative registration does not change the four-year full-tuition obligation. The tuition charge and any University Fellowship aid will be postponed if a student registers noncumulatively before the four-year full-tuition obligation has been satisfied. While registered noncumulatively, students pay the Continuous Registration Fee and doctoral students continue to receive the Health Award from the Graduate School.

**Part-time study** Students in Ph.D. programs are expected to register for full-time study. In extraordinary circumstances a student may petition the Graduate School for permission to register as a half-time student for a limited period. Students may not register for half-time study for more than three of the first four academic years they are enrolled. Thereafter they must register full-time until the four-year tuition obligation has been satisfied. Any Ph.D. student who registers half-time at any point in his or her graduate program must fulfill the four-year tuition obligation to receive the Ph.D. (see below). Ph.D. students may not register less than half-time.

Students who wish to study part-time should consult with their director of graduate studies and the appropriate associate dean to develop a proposed plan of study, so that
both the student and the Graduate School have a common understanding about the time by which the requirements leading to admission to candidacy must be completed. Such a plan of study may be modified with the consent of the director of graduate studies and the associate dean.

Course Enrollment

Any student who wishes to enroll in courses during a term must register through the Online Course Selection (OCS) process. The deadlines for registration each term are listed in the Schedule of Academic Dates and Deadlines. Students who submit course enrollment forms after the appropriate deadline will be assessed a fee.

No student may attend any class unless officially registered in the course. No credit will be given for work done in any course for which a student is not officially registered, even if the student entered the course with the approval of the instructor and the director of graduate studies. Graduate students who wish to register for courses that are offered on both the graduate and undergraduate levels must register with the graduate-level course number (i.e., 500 or higher) in order to receive credit toward their degrees. In rare instances, a graduate student may be granted permission to register for an undergraduate course that will count toward the fulfillment of course requirements for the student’s graduate degree. In such cases, the student must file an approved Graduate Credit Request form (www.yale.edu/graduateschool/academics/forms/Credit_Request_Form.pdf) with the Registrar’s Office by the end of the registration period. Graduate students may not utilize the “Credit/D/Fail” option within the Yale College grading scale. Students enrolling in courses offered by a Yale professional school are subject to all policies and deadlines of both the professional school and the Graduate School. Graduate students taking a course through the School of Management and the Law School must also obtain written permission from the respective schools’ registrars to be officially enrolled. Permission must be obtained within two weeks of the close of registration at the Graduate School.

A student who wishes to audit a course must receive permission from the instructor (as not all faculty permit auditors in their classes) and register for the course as an auditor. The minimum general requirement for auditing is attendance in two-thirds of the class sessions; instructors may set additional requirements for auditing their classes. Audited courses appear on the student’s transcript.

Course Changes

Once the Online Course Selection (OCS) process has closed for a given term, all subsequent changes must be made using the Course Schedule Change Notification Form, approved by the student’s director of graduate studies and then filed with the registrar. If a student is enrolled in a professional school course, all changes in enrollment status must be reported to the registrar of that school as well as to the Graduate School. Forms for reporting changes to the Graduate School are available at the Graduate School Student Information Office, 140 HGS, through the student’s department, or online at www.yale.edu/graduateschool/forms.

The dates for changing enrollment in a course from Credit to Audit or Audit to Credit and for withdrawing from a course are listed in the Schedule of Academic Dates and
Deadlines. If a student officially withdraws from a course by the stated deadline, the course will be removed from the student’s transcript. If a student ceases to participate in a course without officially withdrawing from that course by the stated deadline, it is at the instructor’s discretion to assign an appropriate qualitative grade or a grade of “Incomplete.”

**Grades**

The grades assigned in the Graduate School are:

- **H** Honors
- **HP** High Pass
- **P** Pass
- **F** Fail
- **TI** Temporary Incomplete
- **I** Incomplete

A mark of “Y” is assigned as the grade for the first term of a full-year course and will be converted to a standard grade once both terms are completed, depending on the number of credits the course fulfills.

Marks of Satisfactory/Unsatisfactory may be assigned only when the department sponsoring the course has designated such marks. In such cases, the grading mode is the same for all students enrolled in the course.

The Graduate School does not calculate grade-point averages, nor does it assign numerical or letter equivalents to Graduate School grades. Grades assigned according to grading scales other than those described above will be returned to the instructor for conversion.

The Schedule of Academic Dates and Deadlines indicates the dates on which grades are due for the current year. Instructors have the responsibility for assigning dates for submission of course work to meet these grade deadlines. If a student and instructor have agreed that an extension is appropriate, the student must submit to the Registrar’s Office a request for the Temporary Incomplete (TI) (available on the Graduate School Web site at www.yale.edu/graduateschool/forms) with the intended completion date, signed by the instructor and the director of graduate studies. Only one TI in a single term is permitted. Temporary Incompletes received in an academic year must be converted to final grades by October 1 of the following academic year. If a grade is not received by the registrar by this date, the TI will be converted to a permanent Incomplete (I) on the student’s record.

In certain extraordinary circumstances, such as serious illness or a family emergency, and on the recommendation of the student’s department, the associate dean may grant an additional extension. A written request for such an extension must be made by the director of graduate studies on the student’s behalf within two weeks of the grade submission deadline. The request should indicate the special circumstances and suggest a date by which the student will complete the work. If the request is approved, the associate dean will inform the student and instructor. If the grade is submitted to the registrar by the new deadline approved by the associate dean, it will replace the Temporary Incomplete.
If a grade is not received by the registrar by this date, a Temporary Incomplete (TI) will be converted to a permanent Incomplete (I) on the student’s record.

“Provisional” or “temporary” grades (as opposed to Incompletes) are not permitted. Once submitted to the Office of the Registrar, a grade may be changed only in cases of arithmetical or clerical error on the part of the instructor and only with the approval of the appropriate associate dean. If the registrar has not received a given grade from an instructor within two weeks of the stated deadline for the submission of grades, the student will be assigned a grade of “Incomplete” for that course.

Students are reminded that the policies stated above are the Graduate School minimum general requirements. Departments or individual instructors may have more stringent policies, and students should consult their departmental handbooks or directors of graduate studies about such requirements.

Registration Status and Leaves of Absence

Registration in Residence

Students who are studying on campus, attending classes, and using University facilities are considered to be in residence. All M.A./M.S. and nondegree (DSR) students must register in residence each term, as do most students in Ph.D. programs (see also Registration in Absentia and Continuous Registration Fee, below). Students who will be in residence during any term are required to register through the Online Course Selection process during the normal registration period at the beginning of that term (see the Schedule of Academic Dates and Deadlines).

A fee will be charged to students who register in residence after the close of the registration period. Late fees may be waived only if the registrar receives written notification from the student or director of graduate studies before the start of the registration period that the student will register late because of participation in an academic program, such as a summer language course or professional meeting, that coincides with the registration period. A student who cannot register during the registration period because of a sudden serious illness or family emergency should contact the deputy registrar (246 Church Street) as soon as possible.

Registration in Absentia

Ph.D. students whose program of study requires full-time dissertation research, full-time fieldwork, or full-time study at another academic institution outside the New Haven area may request to be registered in absentia. Such registration requires the recommendation of the director of graduate studies and the approval of the appropriate associate dean. Forms for requesting registration in absentia may be obtained at the Graduate School Student Information Office reception desk or online at www.yale.edu/graduateschool/forms and should be filed at least one month before the beginning of the term during which the student expects to be studying away from New Haven. A student who has not completed the three-year residence requirement will be permitted to register in absentia for compelling academic reasons only, and normally only if the student has completed all other predissertation requirements. Registration in absentia does not reduce the four-year full-tuition or three-year residence requirements. For additional information, see Eligibility for Fellowships under Financing Graduate School.
Students who are enrolled in Yale Health and are registering in absentia should consult the staff of the Member Services Department at the Yale Health Center about the policies governing coverage while they are away from New Haven. The Graduate School funds travel insurance for students who have been approved to pursue degree-related activities outside the United States. Such students should register their locations at http://world.yale.edu/travel to facilitate communication with the University in cases of an emergency.

**CONTINUOUS REGISTRATION FEE**

Ph.D. students who have completed the tuition and residence requirements described above must continue to register each term through the sixth year whether in residence or in absentia, or until they submit the dissertation, whichever occurs first. Students who have met the tuition requirement are charged a Continuous Registration Fee (CRF) for each term in which they remain registered. Students who are granted permission to register beyond the sixth year are also charged this fee.

**SUMMER REGISTRATION**

Ph.D. students receive funding and are expected to continue full-time independent study or research during the summer. Continuing students who were registered during the preceding spring term remain registered through August 31. Ph.D. students who wish to interrupt their studies during the summer (e.g., to accept an internship) must notify their associate dean prior to May 15.

Many M.A./M.S. students continue full- or half-time independent study or research during the summer. Continuing students who were registered during the preceding spring term remain registered through August 31.

Students can obtain verification of summer registration from the Office of the Graduate Registrar.

**LEAVES OF ABSENCE**

Students who wish or need to interrupt their study temporarily may request a leave of absence. There are three types of leave—personal, medical, and parental—all of which are described below. The general policies that apply to all types of leave are:

1. All leaves of absence must be approved by the appropriate associate dean on the recommendation of the department. Medical leaves also require the written recommendation of a Yale Health physician, as described below.

2. Students in Ph.D. programs may be granted a leave for one term or one academic year. A leave extends the eligibility for fellowship aid by a time equal to the duration of the leave, but not for partial terms. The expected last date of registration will be adjusted by one term for each term of the leave.

   Students in one-year M.A./M.S. programs may be on leave for a maximum of one term. Students in two-year M.A./M.S. programs may be on leave for a maximum total of one year.

   In exceptional circumstances renewal of a one-term or one-year leave, to a cumulative maximum total of two years of personal and medical leave, may be granted for students in Ph.D. programs. Leaves of absence for students in M.A./M.S.
programs are not renewable. The duration of a parental leave is one term or one year, renewable for each birth or adoption event.

3. International students who apply for a leave of absence must consult with OISS regarding their visa status.

4. Students on leave may complete outstanding work in courses for which they have been granted approved Incompletes. They may not, however, fulfill any other degree requirements during the time on leave. (Students who intend to work toward the degree while away from the University must request registration in absentia.) Students who in fact make progress toward the degree while on leave will have their registration changed retroactively to in absentia for the period of the leave.

5. A leave of absence does not exempt the student from meeting the tuition requirement (payment of eight terms of full tuition in Ph.D. programs, or the appropriate established tuition charge in M.A./M.S. programs) or from paying the Continuous Registration Fee (if appropriate), but merely postpones the required charges.

6. A student on leave of absence is not eligible for financial aid, including loans; and in most cases, student loans are not deferred during periods of nonenrollment.

7. A student on leave of absence is not eligible for the use of any University facilities normally available to enrolled students.

8. A student on leave of absence may continue to be enrolled in Yale Health by purchasing coverage through the Student Affiliate Coverage plan. In order to secure continuous coverage from Yale Health, enrollment in this plan must be requested prior to the beginning of the term in which the student will be on leave or, if the leave commences during the term, within thirty days of the date when the leave is approved. Coverage is not automatic; enrollment forms are available from the Member Services Department of Yale Health, 203.432.0246.

9. Students living in University housing units are encouraged to review their housing contract and the related policies of the Graduate Housing Office before applying to the Graduate School for a leave of absence.

10. Students on leave of absence do not have to file a formal application for readmission. However, they must notify the registrar in writing of their intention to return. Such notification should be given at least eight weeks prior to the end of the approved leave.

11. Students who fail to register for the term following the end of the approved leave will be administratively withdrawn from the Graduate School.

Personal leave of absence  A student who wishes or needs to interrupt study temporarily because of personal exigencies may request a personal leave of absence. The general policies governing all leaves of absence are described above. A student who is current with his or her degree requirements is eligible for a personal leave after satisfactory completion of at least one term of study. Normally, students in Ph.D. programs are not eligible for personal leaves after the fourth year of study. In certain exceptional cases, however, personal leaves may be granted to students beyond the fourth year of study. Personal leaves cannot be granted retroactively and normally will not be approved after the tenth day of a term.

To request a personal leave of absence, the student must complete the appropriate form (available online at www.yale.edu/graduateschool/forms) before the beginning of the term for which the leave is requested, explaining the reasons for the proposed leave.
and stating both the proposed start and end dates of the leave and the address at which
the student can be reached during the period of the leave. If the dean finds the student
to be eligible and the department approves, the leave will be granted. In any case, the
student will be informed in writing of the action taken. Students who do not apply for a
personal leave of absence, or whose application for a personal leave is denied, and who do
not register for any term, will be administratively withdrawn from the Graduate School.

Medical leave of absence A student who must interrupt study temporarily because of
illness or injury may be granted a medical leave of absence with the approval of the
appropriate associate dean and the student’s department, on the written recommenda-
tion of a physician on the staff of Yale Health. The general policies governing all leaves of
absence are described above. A student who is making satisfactory progress toward his or
her degree requirements is eligible for a medical leave any time after matriculation. The
final decision concerning a request for a medical leave of absence will be communicated
in writing by the appropriate associate dean.

The Graduate School reserves the right to place a student on a medical leave of absence
when, on the recommendation of the director of Yale Health or the chief of the Depart-
ment of Mental Health and Counseling, the dean of the Graduate School determines that
the student is a danger to self or others because of a serious medical problem.

A student who is placed on medical leave during any term will have his or her tuition
adjusted according to the same schedule used for withdrawals (see Schedule of Academic
Dates and Deadlines). Before re-registering, a student on medical leave must secure writ-
ten permission to return from a Yale Health physician. Advanced Ph.D. students may
return at any time during the term with the permission of Yale Health. Forms for request-
ing a medical leave of absence are available at the Graduate School Student Information
Office and online at www.yale.edu/graduateschool/forms.

Eligible Ph.D. students will receive a Health Award from the Graduate School to cover
the cost of the Student Affiliate Coverage plan for the remainder of the coverage period
in which the medical leave is started, if they apply for this coverage through Yale Health
within thirty days of the start of their leave.

Leave of absence for parental responsibilities A student who wishes or needs to inter-
rupt study temporarily for reasons of pregnancy, maternity care, or paternity care may
be granted a leave of absence for parental responsibilities. The general policies governing
all leaves of absence are described above. A student who is making satisfactory prog-
ress toward his or her degree requirements is eligible for parental leave any time after
matriculation.

Any student planning to have or care for a child is encouraged to meet with his or her
director of graduate studies and appropriate associate dean to discuss leaves and other
short-term arrangements. For many students, short-term arrangements rather than a
leave of absence are possible.

Eligible Ph.D. students will receive a Health Award from the Graduate School to cover
the cost of the Student Affiliate Coverage plan for the remainder of the coverage period
in which the parental leave is started, if they apply for this coverage through Yale Health
within thirty days of the start of their leave.
Students granted a parental leave may continue to reside in University housing to the end of the academic term for which the leave was first granted, but no longer.

**PARENTAL SUPPORT AND RELIEF**

Registered Ph.D. students who wish to modify their academic responsibilities because of the birth or adoption of a child may request parental support and relief during or following the term in which the birth or adoption occurs. For the whole of the term in which the support and relief are requested, the student’s academic clock stops, effectively adding an additional term to the total time to degree. During this period, students remain registered, receive the full financial aid package as specified in their letter of admission, and will have departmental academic expectations modified to best suit the specific situation. The precise nature of the academic responsibilities undertaken or suspended during this period should be a matter of consultation among the adviser, the student, and the Graduate School, with the understanding that students are entitled to full relief for at least an eight-week period. Students who take only eight weeks of relief during the term in which, or just after, a birth or adoption occurs may receive an additional eight weeks of stipend funded by the Graduate School in a later term. Parental relief may not be combined with other funding. To arrange for parental relief, a student should contact the appropriate associate dean four months prior to the birth or adoption.

Graduate students in terminal M.A./M.S. programs may modify their academic responsibilities because of the birth or adoption of a child. They should contact their associate dean the term before the planned modifications would occur.

**WITHDRAWAL AND READMISSION**

A student who wishes to terminate his or her program of study should confer with the director of graduate studies and the appropriate associate dean regarding withdrawal; their signatures on an official withdrawal form (available on the Graduate School Web site at www.yale.edu/graduateschool/forms) are required for withdrawal in good standing. The associate dean will determine the effective date of the withdrawal, upon consultation with the department. The University identification card must be submitted with the approved withdrawal form in order for withdrawal in good standing to be recorded.

Students who fail to meet departmental or Graduate School requirements by the designated deadlines will be administratively withdrawn, unless an extension or exception has been granted by the appropriate dean or degree committee. Students who do not register for any fall or spring term, and for whom a leave of absence has not been approved by the appropriate associate dean, will be administratively withdrawn from the Graduate School.

A student who discontinues his or her program of study during the academic year without submitting an approved withdrawal form and the University identification card will be liable for the tuition charge (or Continuous Registration Fee) for the term in which the withdrawal occurs. Tuition charges for students who withdraw in good standing will be adjusted as described in the Schedule of Academic Dates and Deadlines. The Continuous Registration Fee for the term is not canceled if a student withdraws after the fourteenth day of the term. Health service policies related to withdrawal and readmission are described under Health Services, below.
A student who has withdrawn from the Graduate School in good standing and who wishes to resume study at a later date must apply for readmission. Normally, students seeking readmission must do so within three years of the original withdrawal. Neither readmission nor financial aid is guaranteed to students who withdraw. The deadline for making application for readmission is six weeks prior to the term in which the student wishes to return to the Graduate School. The student's application will be considered by the department, which will make a recommendation for review by the appropriate associate dean. The student's remaining tuition obligation will be determined at the time of readmission. Ph.D. students who withdraw after completion of the full tuition requirement and who are subsequently readmitted will be charged the accumulated CRF up to a maximum of four terms. Students may seek readmission no more than once. If subsequent to a readmission they must again withdraw, they are ineligible for readmission.

**U.S. MILITARY LEAVE READMISSIONS POLICY**

Students who wish or need to interrupt their studies to perform U.S. military service are subject to a separate U.S. military leave readmissions policy. In the event a student withdraws or takes a leave of absence from the Graduate School to serve in the U.S. military, the student will be entitled to guaranteed readmission under the following conditions:

1. The student must have served in the U.S. Armed Forces for a period of more than thirty consecutive days.
2. The student must give advance written or verbal notice of such service to the appropriate dean. In providing the advance notice the student does not need to indicate whether he or she intends to return. This advance notice need not come directly from the student, but rather, can be made by an appropriate officer of the U.S. Armed Forces or official of the U.S. Department of Defense. Notice is not required if precluded by military necessity. In all cases, this notice requirement can be fulfilled at the time the student seeks readmission, by submitting an attestation that the student performed the service.
3. The student must not be away from the Graduate School to perform U.S. military service for a period exceeding five years (this includes all previous absences to perform U.S. military service but does not include any initial period of obligated service). If a student's time away from the Graduate School to perform U.S. military service exceeds five years because the student is unable to obtain release orders through no fault of the student or the student was ordered to or retained on active duty, the student should contact the appropriate dean to determine if the student remains eligible for guaranteed readmission.
4. The student must notify the Graduate School within three years of the end of the U.S. military service of his or her intention to return. However, a student who is hospitalized or recovering from an illness or injury incurred in or aggravated during the U.S. military service has up until two years after recovering from the illness or injury to notify the Graduate School of his or her intent to return.
5. The student cannot have received a dishonorable or bad conduct discharge or have been sentenced in a court-martial.
A student who meets all of these conditions will be readmitted for the next term, unless the student requests a later date of readmission. Any student who fails to meet one of these requirements may still be readmitted under the general readmission policy but is not guaranteed readmission.

Upon returning to the Graduate School, the student will resume his or her education without repeating completed course work for courses interrupted by U.S. military service. The student will have the same enrolled status last held and with the same academic standing. For the first academic year in which the student returns, the student will be charged the tuition and fees that would have been assessed for the academic year in which the student left the institution. Yale may charge up to the amount of tuition and fees other students are assessed, however, if veteran’s education benefits will cover the difference between the amounts currently charged other students and the amount charged for the academic year in which the student left.

In the case of a student who is not prepared to resume his or her studies with the same academic status at the same point at which the student left or who will not be able to complete the program of study, the Graduate School will undertake reasonable efforts to help the student become prepared. If after reasonable efforts, the Graduate School determines that the student remains unprepared or will be unable to complete the program, or after the Graduate School determines that there are no reasonable efforts it can take, the Graduate School may deny the student readmission.

**Personal Conduct**

Yale University is an academic community dedicated to the advancement of learning. Its members freely associate themselves with the University and in doing so affirm their commitment to a philosophy of tolerance and respect for all members of the community. They pledge to help sustain the intellectual integrity of the University and to uphold its standards of honesty, free expression, and inquiry. They are expected to obey the regulations of the University. They are also expected to obey local, state, and federal laws, and violations of these may be cause for discipline by the Graduate School.

The Graduate School specifically prohibits the following forms of behavior by graduate students:

1. Cheating on examinations, problem sets, and any other form of test; also, falsification and/or fabrication of data.
2. Plagiarism, that is, the failure in a dissertation, essay, or other written exercise to acknowledge ideas, research, or language taken from others.
3. Misuse of the materials or facilities of the University library.
4. Unauthorized use of University services, equipment, or facilities, such as telephones and photocopying equipment.
5. Violation of University rules for using information technology services and facilities, including computers, the University network, and electronic mail. (See Policies for Use of Information Technology Services Facilities.)
6. Assault on, or coercion, harassment, or intimidation of, any member of the University community, including harassment on the basis of race, religion, gender, ethnicity, or sexual orientation; sexual harassment; or the use of a teaching position to harass or intimidate another student.
7. Engaging in a relationship with a student while serving as the student’s teaching fellow or in any other direct supervisory role over the student (as outlined in the University’s policy prohibiting “Teacher-Student Consensual Relationships”).

8. Disruption of a legitimate function or activity of the University community, including disrupting classes and meetings, blocking entrances and exits to University buildings, unauthorized occupation of any space on the Yale campus, or preventing the free expression or dissemination of ideas. (See Freedom of Expression, below.)

9. Refusal to comply with the direction of a University police officer or other University official, including a member of the faculty, acting in the performance of her or his duties.

10. Misuse, alteration, or fabrication of University credentials or documents, such as an identification card or a transcript or grade list, including grade lists submitted by teaching fellows.

11. Misrepresentation or lying during a formal inquiry by University officials.

12. Misrepresentation in applying for admission or financial aid.

13. Theft, misuse of funds, or willful damage of University property.

14. Trespassing on University property to which access is prohibited.

15. Possession or use of explosives, incendiary devices, or weapons on or about the campus.

16. Interference with the proper operation of safety or security devices, including fire alarms, electronic gates, and sprinkler systems.

17. Unlawful manufacture, possession, use, or distribution of illicit drugs or alcohol on University property or as part of any University activity.

Violations of any of the above regulations will be referred to the Graduate School Committee on Regulations and Discipline, composed of three graduate students, three faculty members, normally one from each division, and an associate dean. Violations of regulations pertaining to sexual misconduct or the University’s Consensual Relations Policy will be referred to the University-Wide Committee on Sexual Misconduct. Students found guilty of such violations will be subject to one or more of the following penalties:

- Reprimand
- Probation
- Suspension
- Dismissal
- Fines
- Restriction

Penalties of suspension or dismissal will be noted on the student’s transcript. Pending disciplinary charges will be noted on a student’s transcript if he or she withdraws from the Graduate School after being formally charged but before such charges have been resolved. A student who has petitioned for a degree will not receive the degree while charges are pending. A student who has been dismissed for a disciplinary violation may petition for a degree, to be awarded at the discretion of the Degree Committee, based on work completed before the infraction occurred. A student dismissed for academic misconduct will
not receive a degree from the Graduate School regardless of requirements fulfilled before the infraction occurred. In addition to imposing these penalties for offenses subject to disciplinary action, the University may refer students for prosecution, and students found guilty of unlawful possession, use, or distribution of illicit drugs or alcohol on University property or as part of any University activity may be required to complete an appropriate rehabilitation program.

Copies of the procedures of the Committee on Regulations and Discipline may be obtained from the office of each of the associate deans of the Graduate School or via the Graduate School Web site (www.yale.edu/graduateschool/policies). The deans may be consulted for further information and advice. A copy of the procedures is sent automatically to any student who is charged with a violation of the Graduate School’s regulations.

Grievance Procedures

To address complaints and grievances of various kinds, the Graduate School maintains a set of procedures. Copies of the grievance procedures of the Graduate School may be obtained from the office of each of the associate deans of the Graduate School or via the Graduate School Web site: www.yale.edu/graduateschool/policies. The deans may be consulted for further information and advice.

THE GRADUATE SCHOOL PROCEDURE FOR STUDENT COMPLAINTS

This procedure governs most student complaints, including, but not limited to, complaints of discrimination on the basis of race, sex, color, religion, national or ethnic origin, disability, or sexual orientation, against a member of the faculty or administration of the Graduate School. Complaints that involve a misapplication of Graduate School policy are also appropriate for consideration by the Dean’s Advisory Committee on Student Grievances. Complaints that require an emendation of policy will be referred to the Graduate School Executive Committee. Complaints of sexual misconduct, which includes sexual harassment and sexual assault, may be brought to a Title IX Coordinator or to the University-Wide Committee on Sexual Misconduct (UWC). For more information on the University’s Title IX Coordinators or the UWC, please see Resources on Sexual Misconduct under Yale University Resources and Services.

PROVOST’S PROCEDURE

The Provost’s Procedure governs most student complaints, including, but not limited to, complaints of discrimination on the basis of race, sex, color, religion, national or ethnic origin, disability, or sexual orientation, against a faculty member who is not a member of the Faculty of Arts and Sciences, or against an employee who is not an administrator in the Graduate School or who is not subject to discipline by the student’s dean. This procedure is available at www.yale.edu/equalopportunity/grievance. Complaints of sexual misconduct, which includes sexual harassment and sexual assault, may be brought to a Title IX Coordinator or to the University-Wide Committee on Sexual Misconduct (UWC). For more information on the University’s Title IX Coordinators or the UWC, please see Resources on Sexual Misconduct under Yale University Resources and Services.
Freedom of Expression

The Yale faculty has formally endorsed as an official policy of Yale University the following statement from the Report of the Committee on Freedom of Expression at Yale, published in January 1975.

The primary function of a university is to discover and disseminate knowledge by means of research and teaching. To fulfill this function a free interchange of ideas is necessary not only within its walls but with the world beyond as well. It follows that the university must do everything possible to ensure within it the fullest degree of intellectual freedom. The history of intellectual growth and discovery clearly demonstrates the need for unfettered freedom, the right to think the unthinkable, discuss the unmentionable, and challenge the unchallengeable. To curtail free expression strikes twice at intellectual freedom, for whoever deprives another of the right to state unpopular views necessarily also deprives others of the right to listen to those views.

We take a chance, as the First Amendment takes a chance, when we commit ourselves to the idea that the results of free expression are to the general benefit in the long run, however unpleasant they may appear at the time. The validity of such a belief cannot be demonstrated conclusively. It is a belief of recent historical development, even within universities, one embodied in American constitutional doctrine but not widely shared outside the academic world, and denied in theory and in practice by much of the world most of the time.

Because few other institutions in our society have the same central function, few assign such high priority to freedom of expression. Few are expected to. Because no other kind of institution combines the discovery and dissemination of basic knowledge with teaching, none confronts quite the same problems as a university.

For if a university is a place for knowledge, it is also a special kind of small society. Yet it is not primarily a fellowship, a club, a circle of friends, a replica of the civil society outside it. Without sacrificing its central purpose, it cannot make its primary and dominant value the fostering of friendship, solidarity, harmony, civility, or mutual respect. To be sure, these are important values; other institutions may properly assign them the highest, and not merely a subordinate, priority; and a good university will seek and may in some significant measure attain these ends. But it will never let these values, important as they are, override its central purpose. We value freedom of expression precisely because it provides a forum for the new, the provocative, the disturbing, and the unorthodox. Free speech is a barrier to the tyranny of authoritarian or even majority opinion as to the rightness or wrongness of particular doctrines or thoughts.

If the priority assigned to free expression by the nature of a university is to be maintained in practice, clearly the responsibility for maintaining that priority rests with its members. By voluntarily taking up membership in a university and thereby asserting a claim to its rights and privileges, members also acknowledge the existence of certain obligations upon themselves and their fellows. Above all, every member of the university has an obligation to permit free expression in the university. No member has a right to prevent such expression. Every official of the university, moreover, has a special obligation to foster free expression and to ensure that it is not obstructed.
The strength of these obligations, and the willingness to respect and comply with them, probably depend less on the expectation of punishment for violation than they do on the presence of a widely shared belief in the primacy of free expression. Nonetheless, we believe that the positive obligation to protect and respect free expression shared by all members of the university should be enforced by appropriate formal sanctions, because obstruction of such expression threatens the central function of the university. We further believe that such sanctions should be made explicit, so that potential violators will be aware of the consequences of their intended acts.

In addition to the university’s primary obligation to protect free expression there are also ethical responsibilities assumed by each member of the university community, along with the right to enjoy free expression. Though these are much more difficult to state clearly, they are of great importance. If freedom of expression is to serve its purpose and thus the purpose of the university, it should seek to enhance understanding. Shock, hurt, and anger are not consequences to be weighed lightly. No member of the community with a decent respect for others should use, or encourage others to use, slurs and epithets intended to discredit another’s race, ethnic group, religion, or sex. It may sometimes be necessary in a university for civility and mutual respect to be superseded by the need to guarantee free expression. The values superseded are nevertheless important, and every member of the university community should consider them in exercising the fundamental right to free expression.

We have considered the opposing argument that behavior which violates these social and ethical considerations should be made subject to formal sanctions, and the argument that such behavior entitles others to prevent speech they might regard as offensive. Our conviction that the central purpose of the university is to foster the free access of knowledge compels us to reject both of these arguments. They assert a right to prevent free expression. They rest upon the assumption that speech can be suppressed by anyone who deems it false or offensive. They deny what Justice Holmes termed “freedom for the thought that we hate.” They make the majority, or any willful minority, the arbiters of truth for all. If expression may be prevented, censored, or punished, because of its content or because of the motives attributed to those who promote it, then it is no longer free. It will be subordinated to other values that we believe to be of lower priority in a university.

The conclusions we draw, then, are these: even when some members of the university community fail to meet their social and ethical responsibilities, the paramount obligation of the university is to protect their right to free expression. This obligation can and should be enforced by appropriate formal sanctions. If the university’s overriding commitment to free expression is to be sustained, secondary social and ethical responsibilities must be left to the informal processes of suasion, example, and argument.

*It is anticipated that tuition will be increased in subsequent years.
†It is anticipated that the Continuous Registration Fee will be increased in subsequent years.
Other fees are subject to change without notice. For fees relating to registration and course enrollment, see Course Enrollment, under Academic Regulations.
‡See Registration Status and Leaves of Absence, under Academic Regulations.
§Hospitalization fees are for single students. Rates are higher for students needing dependent coverage.

Appointment to a University post does not exempt a student from registration and payment of other fees. Full-time (and certain part-time) Yale managerial and professional employees and their spouses, as well as the spouses of Yale faculty, are eligible for a tuition reduction in the DSR and master’s programs. They should consult Human Resources for details. Full-time faculty members and their spouses, emeritus faculty and their spouses, and University employees may audit courses without charge.

Candidates for degrees in the Graduate School, nondegree students paying full tuition, and spouses of full-time candidates for degrees in the Graduate School may audit courses without charge provided that they have received the approval of the course instructor.

STUDENT ACCOUNTS AND BILLS

Student accounts, billing, and related services are administered through the Office of Student Financial Services, which is located at 246 Church Street. The telephone number is 203.432.2700, or visit www.yale.edu/sfs/contactus.
Bills

Yale University’s official means of communicating monthly financial account statements is through the University’s Internet-based system for electronic billing and payment, Yale University eBill-ePay. Yale does not mail paper bills.

Student account statements are prepared and made available twelve times a year at the beginning of each month. Payment is due in full by 4 p.m. Eastern Time on the first business day of the following month. E-mail notifications that the account statement is available on the University eBill-ePay Web site (www.yale.edu/sis/ebep) are sent to all students at their official Yale e-mail addresses and to all student-designated authorized payers. It is imperative that all students monitor their Yale e-mail accounts on an ongoing basis.

Bills for tuition, room, and board are available to the student during the first week of July, due and payable by August 1 for the fall term; and during the first week of November, due and payable by December 1 for the spring term. The Office of Student Financial Services will impose late fees of $125 per month (up to a total of $375 per term) if any part of the term bill, less Yale-administered loans and scholarships that have been applied for on a timely basis, is not paid when due. Nonpayment of bills and failure to complete and submit financial aid application packages on a timely basis may result in the student’s involuntary withdrawal from the University.

No degrees will be conferred and no transcripts will be furnished until all bills due the University are paid in full. In addition, transcripts will not be furnished to any student or former student who is in default on the payment of a student loan.

The University may withhold registration and certain University privileges from students who have not paid their term bills or made satisfactory payment arrangements by the day of registration. To avoid delay at registration, students must ensure that payments reach Student Financial Services by the due dates.

Charge for Rejected Payments

A processing charge of $25 will be assessed for payments rejected for any reason by the bank on which they were drawn. In addition, the following penalties may apply if a payment is rejected:

1. If the payment was for a term bill, a $125 late fee will be charged for the period the bill was unpaid.
2. If the payment was for a term bill to permit registration, the student’s registration may be revoked.
3. If the payment was given to settle an unpaid balance in order to receive a diploma, the University may refer the account to an attorney for collection.

Yale University eBill-ePay

There are a variety of options offered for making payments. Yale University eBill-ePay is the preferred means for payment of bills. It can be found at www.yale.edu/sis/ebep. Electronic payments are easy and convenient—no checks to write, no stamps, no envelopes, no hassle. Payments are immediately posted to the student’s account. There is no
charge to use this service. Bank information is password-protected and secure, and there is a printable confirmation receipt. Payments can be made twenty-four hours a day, seven days a week, up to 4 p.m. Eastern Time on the due date to avoid late fees. (The eBill-ePay system will not be available when the system is undergoing upgrade, maintenance, or repair.) Students can authorize up to three authorized payers to make payments electronically from their own computers to the student’s account using Yale’s system.

Use of the student’s own bank payment service is not authorized by the University because it has no direct link to the student’s Yale account. Payments made through such services arrive without proper account identification and always require manual processing that results in delayed crediting of the student’s account, late fees, and anxiety. Students should use Yale eBill-ePay to pay online. For those who choose to pay by check, remittance advice with mailing instructions is available on the Web site.

**Yale Payment Plan**

The Yale Payment Plan (YPP) is a payment service that allows students and their families to pay tuition, room, and board in ten equal monthly installments throughout the year based on individual family budget requirements. It is administered by the University’s Office of Student Financial Services. The cost to enroll in the YPP is $100 per contract. The deadline for enrollment is June 20. For additional information, please contact Student Financial Services at 203.432.2700 and select “Press 1” from the Main Menu. The enrollment link can be found online in the Yale Payment Plan section of the Student Accounts Web site: www.yale.edu/sfas/financial/accounts.html#payment.

**TRANSCRIPTS**

Transcripts may be ordered online at www.yale.edu/sis or in writing from the Office of the Registrar for the Faculty of Arts and Sciences (246 Church Street, third floor). For each transcript order, the charge for the first transcript is $7, with a charge of $3 for each additional transcript ordered at the same time for the same address. Normally a transcript order is processed within forty-eight hours after receipt. There are additional charges for overnight delivery. www.yale.edu/sfas/registrar

**FINANCIAL AID**

Financial assistance is provided in the form of Yale University Fellowships, tuition fellowships, teaching fellowships, traineeships, and research assistantships. The nature of the assistance varies among the divisions and departments. In most departments and programs, doctoral students are guaranteed five years of 12-month stipend and tuition support. Applicants for admission to Ph.D. programs will automatically be considered for all Yale fellowships, traineeships, research assistantships, and teaching fellowships for which they are eligible. These awards of financial aid are announced in letters of admission, which are usually mailed during the month of March. Applicants for admission to nondegree and terminal master’s programs are required to complete the financial statement contained in the application brochure. Students are strongly encouraged to seek financial support from external sources (see External Fellowships and Combined Award Policy, below).
In addition to grants and fellowships for tuition and living costs, Yale Health Basic Coverage is provided at no cost to students enrolled at least half-time in M.A., M.S., and Ph.D. programs. Eligible Ph.D. students also receive a Health Award, which covers the full cost of single-student Yale Health Hospitalization/Specialty Coverage, half the cost of two-person coverage, and the full cost for family coverage. Students who do not participate in Yale Health Hospitalization/Specialty Coverage will not be provided with Health Awards. Yale Health Prescription Plus Coverage and the graduate dental and vision plans are options that eligible students may choose to purchase for themselves and their dependents and are not covered by the Health Award. (For further information regarding health care options through Yale Health, see Health Services under Yale University Resources and Services.)

**University Fellowships**

The Graduate School provides all Ph.D. students with a minimum level of support for five years upon admission. Fellowships are awarded at admission to entering students on the basis of merit and recommendations made by individual departments. In most departments the source of stipend support will change after the first or second year of study to a teaching fellowship or research assistantship. Students who teach when such teaching is not part of the standard departmental pattern defer their University Fellowships to a later year and do not receive more than the standard departmental stipend while teaching.

Students awarded a University Fellowship may not accept any other award without the permission of the appropriate associate dean. The Graduate School is the final authority on University Fellowships and any combination of University funding with other sources of financial aid (see External Fellowships and Combined Award Policy, below).

**Dissertation Fellowships**

The Graduate School offers University Dissertation Fellowships as part of its five-year financial aid package to eligible advanced graduate students in the humanities and social sciences once they have advanced to doctoral candidacy. These awards are made when a student’s adviser and director of graduate studies certify that the student will be engaged full-time in research and writing, is making satisfactory progress toward the degree, and has a reasonable schedule for the timely completion of the dissertation. The University Dissertation Fellowship is usually taken in consecutive terms (beginning in either the fall or spring term) and must be completed by the end of the sixth year of study. With the permission of the Graduate School, it may be interrupted in certain circumstances when recommended by the department. It may never be held concurrently with a teaching fellowship of any kind. Students who accept a teaching position in the fall or spring of the year of final eligibility will forfeit that term's dissertation fellowship amount. Prize dissertation fellowships awarded by the Graduate School, such as the Whiting Fellowship, replace the University Dissertation Fellowship. Students receiving external funding for dissertation research or writing may be eligible for a combined award and should consult the External Fellowships and Combined Award policy. Application materials and additional information can be obtained online at www.yale.edu/graduateschool/funding or from the appropriate associate dean.
Teaching Fellowships

TEACHING AND ADMISSION OFFERS

Because the Graduate School considers teaching experience to be an integral part of graduate education, doctoral students receive financial aid packages that include teaching fellowships. In many programs there are specific years when students are expected to teach. For example, most humanities and social science students will teach in their third and fourth years. In the natural sciences, the timing of teaching is earlier or is flexible across several years. When requested by the student for compelling academic reasons, these patterns may be adjusted with the permission of an associate dean and the director of graduate studies contingent on the student’s satisfactory academic progress and on sufficient course enrollment.

When students are teaching as specified in their letters of admission, appointments for these students will change only if a course is canceled; if enrollment in any of the teaching fellow’s discussion sections falls below six students, or if course enrollment falls below nine students for a grader; or if the student, course instructor, and director of graduate studies all agree upon a reassignment. The Graduate School provides a supplementary fellowship in cases where the teaching fellowship is less than the standard departmental stipend. If an associate dean and director of graduate studies determine that no suitable teaching is available in a term in which a student is expected to teach, the student will continue to receive his or her standard departmental stipend that term. Stipend support will be withheld if a student elects not to teach as outlined in the student’s offer of admission.

ACCESS TO TEACHING FELLOWSHIPS

When departments are considering applications for teaching fellowships, priority is given to qualified graduate students who are expected to teach as indicated in their letter of admission (usually in years three and four in the humanities and social sciences). Students in their fifth or sixth year of study may teach if enrollments permit and as long as they have been admitted to candidacy and do not currently hold a dissertation fellowship. Students who are permitted to register beyond the sixth year of study may be appointed as TFs or PTAIs, but only if there is no other qualified candidate available in the first six years of study in any department or program of the Graduate School. In cases where an appointing department must choose between two or more graduate students who are each well qualified to teach a particular course, the student or students who have not yet had a chance to teach or who have taught the least should be given preference.

LIMITS ON TEACHING

Except when specified in their letters of admission, first-year and second-year doctoral students may be appointed as teaching fellows only in exceptional cases, and only after prior approval by their director of graduate studies, the appropriate associate dean, and the director of the Teaching Fellow Program (TFP). In any year of study, the maximum amount of teaching a student may do is four TF units or one PTAI per term. Students may not serve as faculty lecturers while registered in the Graduate School.

Students with outside fellowships are eligible to serve as TFs according to the policies of the Graduate School and the conditions of their outside awards. Students receiving a
University Dissertation Fellowship are not eligible for appointments through the Teaching Fellow Program.

**APPOINTMENT LETTERS**

Letters of appointment are sent to graduate students via the online Teaching Fellow System (TFS) indicating the course in which a graduate student is expected to teach and the level of the assignment. An appointment is not official until the appointment letter has been reviewed and transmitted by the TFP and the student has responded affirmatively. This acceptance is required before teaching fellow appointments are processed for payment.

**TEACHING FELLOW LEVELS**

There are five primary levels of TFs at Yale. They are distinguished from one another by several considerations, including the kind or kinds of activity required, the approximate hours per week, and the number of students taught. For example, courses in which TFs are expected to provide frequent and intensive writing criticism, to grade problem sets or vocabulary tests frequently, or to prepare especially complicated visual or laboratory materials may be accorded a higher-level teaching fellowship than courses that do not carry such an expectation. A graduate student’s teaching assignment is measured in terms of teaching fellow units (one unit for a term as TF 1, two units for a term as TF 2, and so on).

**Teaching Fellow 1** The responsibilities of a TF 1 are primarily (a) grading, (b) a combination of the following: attending class, reading, advising undergraduates, offering an occasional discussion section, helping to set up a lab, or assisting in the administrative details of the course, (c) in nonlanguage courses providing Language-across-the-Curriculum one-on-one language tutoring, or (d) in language courses providing one-on-one tutoring sessions. A TF 1 does not engage in regular classroom teaching. Approximate weekly effort, 5 hours. The 2012–2013 teaching fellowship is $2,490 per term.

**Teaching Fellow 2** A TF 2 typically leads and grades one discussion or laboratory section of up to 20 students in courses in the natural sciences and some social sciences, tutors in language courses, or combines responsibilities (a) and (b) as described under TF1. A TF2 also may lead a Language-across-the-Curriculum session for courses with fewer than 30 students and no other sections. Approximate weekly effort, 10 hours. The 2012–2013 teaching fellowship is $4,980 per term.

**Teaching Fellow 3** Depending on department policy, the duties of a TF 3 may include leading and grading one or two lab or discussion sections, as in Chemistry. Alternatively, a TF 3 may be appropriate for a combination of duties that might include attending lectures, office hours and consultations, and grading, as in Psychology. Approximate weekly effort, 15 hours. The 2012–2013 teaching fellowship is $7,470 per term.

**Teaching Fellow 3.5** This appointment is appropriate for TFs who lead and grade one section in English, History of Art, or the Literature major; in any literature course in the national language departments that may conform to the same mode of teaching; in courses double-titled with these departments and programs; and in a few designated courses. Discussion section leaders are appointed for lecture courses with 30 or more
students; a section size is expected not to exceed 18 students, with 20 the absolute maximum and six the minimum. This appointment is also used for Writing Requirement TFs and Language-across-the-Curriculum section leaders. Approximate weekly effort, 17.5 hours. The 2012–2013 teaching fellowship is $8,715 per term.

**Teaching Fellow 4** This appointment is appropriate for TFs in humanities and social science departments in which teaching fellows usually lead and grade two sections. Discussion section leaders are appointed for lecture courses with 30 or more students; a section size is expected not to exceed 18 students, with 20 the absolute maximum and six the minimum. Approximate weekly effort, 20 hours. The 2012–2013 teaching fellowship is $9,960 per term.

**PART-TIME ACTING INSTRUCTORS**

Graduate students appointed as part-time acting instructors (PTAIs) conduct sections of introductory courses or advanced seminars, normally seminars in their special fields. Even in the case of seminars, PTAIs are supervised by faculty. In the case of multisection introductory courses, this may include the use of a common syllabus and examinations. No student should teach more than one PTAI course per term. PTAIs who teach advanced seminars must have satisfied all predissertation requirements (including the dissertation prospectus) and must be registered full-time to be eligible for the appointment. Hours of effort for PTAIs will vary from one individual to another. The 2012–2013 teaching fellowship is $10,060 per term.

**Traineeships and Assistantships in Research**

Traineeships (National Research Service Awards) from the National Institutes of Health are available in most of the biological sciences and in some other departments. These awards support full-time Ph.D. study by U.S. citizens, noncitizen nationals of the United States, and permanent residents. In combination with University and departmental supplements, they provide payment of tuition, a monthly stipend, and the hospitalization premium. Federal rules require that trainees pursue their research training on a full-time basis. In some instances, there is a federal payback provision, which is ordinarily satisfied by serving in health-related research or teaching at the conclusion of training. Information about this obligation and other matters relating to traineeships is available from the director of graduate studies or the principal investigator of the specific training grant in question.

**Research Appointments**

Doctoral students in departments where the faculty receive research grants or contracts may be eligible for appointments as assistants in research (AR). In most of the science departments, advanced Ph.D. students are normally supported as ARs by individual faculty research grants. An assistantship in research provides a monthly salary at a rate agreed upon by the department and the Graduate School. It is understood that the work performed not only is part of the faculty principal investigator’s research project but also is the student’s dissertation research and therefore in satisfaction of a degree requirement. For a standard AR appointment, in addition to the salary, the grant pays half of
the tuition or all of the CRF. When the appointee is eligible for a University Fellowship, the other half of tuition is covered by a fellowship.

An appointment as a project assistant (PA) is intended for a student who performs services for a research project that are not a part of the student’s degree program. A project assistant may normally work no more than ten hours per week. The rate of compensation is based on the department-approved rate paid to assistants in research. With the permission of the director of graduate studies and the appropriate associate dean, a student may receive a combination of project assistant and assistant in research appointments.

Questions about AR or PA appointments should be directed to the director of graduate studies or the appropriate associate dean in the Graduate School.

EXTERNAL FELLOWSHIPS AND COMBINED AWARD POLICY

To benefit both their current work and their future career prospects, students are strongly encouraged to seek funding from external agencies through grants. These awards, sponsored by both public and private agencies, confer distinction on a student who wins an award in a national competition. They are often more generous than the fellowships the University is able to provide.

Students receiving external awards have two options. They may either (1) hold the outside awards in conjunction with University stipends (including research and teaching fellowships) up to the total of the standard department/program stipend plus $4,000 or (2) defer financial support awarded in their admission offer for up to one year. Students must report to their associate dean any scholarship/fellowship received from an outside agency or organization. The dean will then assist students in considering the benefits of each option.

Option 1: Supplementation of an External Fellowship

During the twelve-month academic year (September 1–August 31), the Graduate School’s stipend award, made at the time of admission, may be used to supplement the sum of all external stipend awards to a maximum stipend equal to the total of the standard department/program stipend plus $4,000. If the sum of the Graduate School’s initial stipend award and all outside awards exceeds this limit, the Graduate School’s stipend award will be reduced accordingly. In instances where an external award does not cover the full twelve-month academic year, the combined award will be determined by prorating the combined award over the period when the internal and external awards overlap. Students who receive external fellowships providing yearly stipends that are more than the total of the standard department/program stipend plus $4,000 will retain the full external fellowship funding and will receive no university supplement.

Option 2: Deferral of Graduate School Funding

Students receiving external awards in years one through five of study may defer for up to one year the Graduate School’s stipend award made at the time of admission. Stipend awards may not be deferred beyond the sixth year of study.
ELIGIBILITY FOR FELLOWSHIPS

Students who hold Yale-administered fellowships are required to be in residence and engaged in full-time study. Permission to hold a fellowship in absentia must be obtained from the appropriate associate dean. A student who leaves New Haven, except for short vacation periods, without having such permission may have the fellowship canceled. No fellowships will be paid for any period when a student is not registered.

Students are not eligible for stipend support from the Graduate School after six years of study, but they remain eligible for student loans as long as they are enrolled at least half-time.

A fellowship will be withdrawn and a stipend withheld if the recipient’s activities become prejudicial to the purpose for which the fellowship was granted or if a student becomes ineligible to register for any reason.

OTHER MEANS OF FINANCING

GRADUATE EDUCATION

Part-Time Employment

Unless otherwise noted in the letter of admission, students are expected to register on a full-time basis. Part-time employment at the University or elsewhere should not conflict with the obligations of the degree program or interfere with academic progress. International students must consult the Office of International Students and Scholars (OISS) regarding their eligibility for employment while in the United States.

Part-time employment beyond an average of ten hours per week requires permission of the director of graduate studies in consultation with the appropriate associate dean.

Students who hold student loans must report all part-time employment earnings to the Office of Financial Aid. Failure to do so may result in cancellation of the loan(s).

Loans and Work-Study

U.S. citizens may be eligible to borrow through federally subsidized loan programs. Eligibility is based on federal regulations and University policies. Information is available from the Office of Financial Aid, 129 HGS.

Eligible students in the Graduate School may be able to borrow from the following federal student loan programs: Federal Direct Loans and Federal Perkins Loans.

The College Work-Study (CWS) program, which is federally funded, enables eligible graduate students to meet a portion of their academic year financial need through part-time employment.

All students applying for any of these federal programs must fill out a Free Application for Federal Student Aid (FAFSA). Information on loan and work-study programs is contained in Financial Information for Entering Graduate Students, included with the student’s letter of admission. These documents are available from the Office of Financial Aid. Information and FAFSA applications are also available at the Web site of the United States Department of Education (www.fafsa.ed.gov).

Yale currently offers a loan for international students. Features of the Yale International Loan include no requirement for a co-signer and a ten-year repayment period.
Students may apply for the Yale International Loan or any other loan of their choice. Students are encouraged to identify a loan that best suits their needs. Information is available from the Office of Financial Aid, 129 HGS.

**TWO FEDERAL REGULATIONS GOVERNING TITLE IV FINANCIAL AID PROGRAMS**

*Satisfactory Academic Progress*
Federal regulations require that students be making satisfactory academic progress each year in order to be eligible for Title IV funding (i.e., federal loans, Javits Fellowships, and College Work-Study). The standards by which satisfactory academic progress is measured are determined by the Graduate School and by individual departments. Verification of satisfactory progress is based on annual student evaluations from the directors of graduate studies and, for students in the dissertation stage, on a statement of progress from the student, the dissertation adviser, and the director of graduate studies.

*Department of Education Refund Policy*
Students receiving Title IV financial assistance who withdraw during a term and are entitled to a refund of any University charges will have their Title IV assistance adjusted according to a formula specified by the Department of Education. Please consult the Office of Financial Aid, 129 HGS.
Yale University Resources and Services

LIVING ACCOMMODATIONS

Graduate Housing—On Campus
www.yale.edu/gradhousing

The Graduate Housing Department has dormitory and apartment units for a small number of graduate and professional students. The Graduate Dormitory Office provides dormitory rooms of varying sizes and prices for single occupancy only. The Graduate Apartments Office provides unfurnished apartments consisting of efficiencies and one-, two-, and three-bedroom apartments for singles and families. Both offices are located in Helen Hadley Hall, a graduate dormitory at 420 Temple Street, and have office hours from 9 a.m. to 4 p.m., Monday through Friday.

Applications for 2012–2013 are available as of April 1 online and can be submitted directly from the Web site (www.yale.edu/graduatehousing/application.html). For new students at the University, a copy of the letter of acceptance from Yale will need to be submitted to the Dormitory or Apartments office. The Web site is the venue for graduate housing information and includes procedures, facility descriptions, floor plans, and rates. For more dormitory information, contact grad.dorms@yale.edu, tel. 203.432.2167, fax 203.432.4578. For more apartment information, contact grad.apts@yale.edu, tel. 203.432.8270, fax 203.432.4578.

Off-Campus Listing Service
www.yale.edu/gradhousing/och/index.html

Yale Off Campus Housing is a database of rental and sale listings available to the Yale community. The system has been designed to allow incoming affiliates to the University access to the online database at www.yale.edu/och. The use of your University NetID allows you immediate access to search the listings. It also allows you to set up a profile to be a roommate or search for roommates. Those without a NetID can set themselves up as guests by following the simple instructions. For answers to questions, please e-mail offcampushousing@yale.edu or call 203.432.9756.

University Properties
www.yale.edu/up

University Properties owns and operates Yale University’s nonacademic, off-campus properties in New Haven. The office is committed to enhancing the quality of life at Yale and in downtown New Haven through the development of unique retail and office environments and the revitalization of surrounding neighborhoods.

University Properties offers a variety of quality market-rate housing options to the Yale community and provides high-quality commercial space to businesses. Properties are managed by contracted management companies chosen for their professionalism and ability to work effectively with the Yale community. Several apartment properties are
leased exclusively to graduate students. Applications are accepted via the Web site listed above. As these properties are in high demand, early application is encouraged.

Dining

www.yale.edu/dining/options/Gradmealplan.html

Yale Dining (YD) has tailored its services to meet the particular needs of graduate and professional school students by offering meal plan options that allow flexibility and value. Inquiries concerning food services should be addressed to Yale Dining, 246 Church Street, PO Box 208261, New Haven CT 06520-8261; tel., 203.432.0420.

HEALTH SERVICES

http://yalehealth.yale.edu

The Yale Health Center is located on campus at 55 Lock Street. The center is home to Yale Health, a not-for-profit, physician-led health coverage option that offers a wide variety of health care services for students and other members of the Yale community. Services include student medicine, gynecology, mental health, pediatrics, pharmacy, laboratory, radiology, a seventeen-bed inpatient care unit, a round-the-clock acute care clinic, and specialty services such as allergy, dermatology, orthopedics, and a travel clinic. Yale Health coordinates and provides payment for the services provided at the Yale Health Center, as well as for emergency treatment, off-site specialty services, inpatient hospital care, and other ancillary services. Yale Health's services are detailed in the Yale Health Student Handbook, available through the Yale Health Member Services Department, 203.432.0246, or online at www.yalehealth.yale.edu/understand-your-coverage.

Eligibility for Services

All full-time Yale degree-candidate students who are paying at least half tuition are enrolled automatically for Yale Health Basic Coverage. Yale Health Basic Coverage is offered at no charge and includes preventive health and medical services in the departments of Student Health, Gynecology, Health Education, and Mental Health & Counseling. In addition, treatment for urgent medical problems can be obtained twenty-four hours a day through Acute Care.

Students on leave of absence or on extended study and paying less than half tuition are not eligible for Yale Health Basic Coverage but may enroll in Yale Health Student Affiliate Coverage. Students enrolled in the Division of Special Registration as nondegree special students or visiting scholars are not eligible for Yale Health Basic Coverage but may enroll in the Yale Health Billed Associates Plan and pay a monthly fee. Associates must register for a minimum of one term within the first thirty days of affiliation with the University.

Students not eligible for Yale Health Basic Coverage may also use the services on a fee-for-service basis. Students who wish to be seen fee-for-service must register with the Member Services Department. Enrollment applications for the Yale Health Student Affiliate Coverage, Billed Associates Plan, or Fee-for-Service Program are available from the Member Services Department.
All students who purchase Yale Health Hospitalization/Specialty Coverage (see below) are welcome to use specialty and ancillary services at Yale Health Center. Upon referral, Yale Health will cover the cost of specialty and ancillary services for these students. Students with an alternate insurance plan should seek specialty services from a provider who accepts their alternate insurance.

**Health Coverage Enrollment**

The University also requires all students eligible for Yale Health Basic Coverage to have adequate hospital insurance coverage. Students may choose Yale Health Hospitalization/Specialty Coverage or elect to waive the plan if they have other hospitalization coverage, such as coverage through a spouse or parent. The waiver must be renewed annually, and it is the student’s responsibility to confirm receipt of the waiver by the University’s deadlines noted below.

**Yale Health Hospitalization/Specialty Coverage**

For a detailed explanation of this plan, see the *Yale Health Student Handbook*, available online at www.yalehealth.yale.edu/understand-your-coverage.

Students are automatically enrolled and charged a fee each term on their Student Financial Services bill for Yale Health Hospitalization/Specialty Coverage. Students with no break in coverage who are enrolled during both the fall and spring terms are billed each term and are covered from August 1 through July 31. For students entering Yale for the first time, readmitted students, and students returning from a leave of absence who have not been covered during their leave, Yale Health Hospitalization/Specialty Coverage begins on the day the dormitories officially open. A student who is enrolled for the fall term only is covered for services through January 31; a student enrolled for the spring term only is covered for services through July 31.

**Waiving Yale Health Hospitalization/Specialty Coverage**

Students are permitted to waive Yale Health Hospitalization/Specialty Coverage by completing an online waiver form at www.yhpstudentwaiver.yale.edu that demonstrates proof of alternate coverage. It is the student’s responsibility to report any changes in alternate insurance coverage to the Member Services Department. Students are encouraged to review their present coverage and compare its benefits to those available under Yale Health. The waiver form must be filed annually and must be received by September 15 for the full year or fall term or by January 31 for the spring term only.

**Revoking the waiver**

Students who waive Yale Health Hospitalization/Specialty Coverage but later wish to be covered must complete and send a form voiding their waiver to the Member Services Department by September 15 for the full year or fall term, or by January 31 for the spring term only. Students who wish to revoke their waiver during the term may do so, provided they show proof of loss of the alternate insurance plan and enroll within thirty days of the loss of this coverage. Yale Health fees will not be prorated.

**Yale Health Student Two-Person and Family Plans**

A student may enroll his or her lawfully married spouse or civil union partner and/or legally dependent child(ren) under the age of twenty-six in one of two student dependent
plans: the Two-Person Plan or the Student Family Plan. These plans include services described in both Yale Health Basic Coverage and Yale Health Hospitalization/Specialty Coverage. Yale Health Prescription Plus Coverage may be added at an additional cost. Coverage is not automatic and enrollment is by application. Applications are available from the Member Services Department or can be downloaded from the Web site (www.yalehealth.yale.edu) and must be renewed annually. Applications must be received by September 15 for full-year or fall-term coverage, or by January 31 for spring-term coverage only.

YALE HEALTH STUDENT AFFILIATE COVERAGE

Students on leave of absence or extended study, students paying less than half tuition, or students enrolled in the Eli Whitney Program prior to September 2007 may enroll in Yale Health Student Affiliate Coverage, which includes services described in both Yale Health Basic and Yale Health Hospitalization/Specialty Coverage. Prescription Plus Coverage may also be added for an additional cost. Applications are available from the Member Services Department or can be downloaded from the Web site (www.yalehealth.yale.edu) and must be received by September 15 for full-year or fall-term coverage, or by January 31 for spring-term coverage only.

YALE HEALTH PRESCRIPTION PLUS COVERAGE

This plan has been designed for Yale students who purchase Yale Health Hospitalization/Specialty Coverage and student dependents who are enrolled in either the Two-Person Plan, the Student Family Plan, or Student Affiliate Coverage. Yale Health Prescription Plus Coverage provides protection for some types of medical expenses not covered under Yale Health Hospitalization/Specialty Coverage. Students are billed for this plan and may waive this coverage. The online waiver (www.yhpstudentwaiver.yale.edu) must be filed annually and must be received by September 15 for the full year or fall term or by January 31 for the spring term only. For a detailed explanation, please refer to the Yale Health Student Handbook.

Eligibility Changes

Withdrawal A student who withdraws from the University during the first ten days of the term will be refunded the fee paid for Yale Health Hospitalization/Specialty Coverage and/or Yale Health Prescription Plus Coverage. The student will not be eligible for any Yale Health benefits, and the student’s Yale Health membership will be terminated retroactive to the beginning of the term. The medical record will be reviewed, and any services rendered and/or claims paid will be billed to the student on a fee-for-service basis. At all other times, a student who withdraws from the University will be covered by Yale Health for thirty days following the date of withdrawal or to the last day of the term, whichever comes first. Fees will not be prorated or refunded. Students who withdraw are not eligible to enroll in Yale Health Student Affiliate Coverage.

Leaves of absence Students who are granted a leave of absence are eligible to purchase Yale Health Student Affiliate Coverage during the term(s) of the leave. If the leave occurs during the term, Yale Health Hospitalization/Specialty Coverage will end on the date the leave is granted and students may enroll in Yale Health Student Affiliate Coverage.
Students must enroll in Affiliate Coverage prior to the beginning of the term during which the leave is taken or within thirty days of the start of the leave. Fees paid for Yale Health Hospitalization/Specialty Coverage will be applied toward the cost of Affiliate Coverage. Coverage is not automatic and enrollment forms are available at the Member Services Department or can be downloaded from the Web site (www.yalehealth.yale.edu). Fees will not be prorated or refunded.

**Extended study or reduced tuition** Students who are granted extended study status or pay less than half tuition are not eligible for Yale Health Hospitalization/Specialty Coverage and Yale Health Prescription Plus Coverage. They may purchase Yale Health Student Affiliate Coverage during the term(s) of extended study. This plan includes services described in both Yale Health Basic and Yale Health Hospitalization/Specialty Coverage. Coverage is not automatic, and enrollment forms are available at the Member Services Department or can be downloaded from the Web site (www.yalehealth.yale.edu). Students must complete an enrollment application for the plan prior to September 15 for the full year or fall term, or by January 31 for the spring term only.

For a full description of the services and benefits provided by Yale Health, please refer to the **Yale Health Student Handbook**, available from the Member Services Department, 203.432.0246, 55 Lock Street, PO Box 208237, New Haven CT 06520-8237.

**Required Immunizations**

**Measles (rubeola), German measles (rubella), and mumps** All students who were born after January 1, 1957, are required to provide proof of immunization against measles (rubeola), German measles (rubella), and mumps. Connecticut state law requires two doses of measles vaccine. The first dose must have been given on or after January 1, 1980, and after the student’s first birthday; the second dose must have been given at least thirty (30) days after the first dose. Connecticut state law requires proof of two doses of rubella vaccine administered on or after January 1, 1980, and after the student’s first birthday. Connecticut state law requires proof of two mumps vaccine immunizations administered on or after January 1, 1980, and after the student’s first birthday; the second dose must have been given at least thirty (30) days after the first dose. The law applies to all students unless they present (a) a certificate from a physician stating that such immunization is contraindicated, (b) a statement that such immunization would be contrary to the student’s religious beliefs, or (c) documentation of a positive blood titer for measles, rubella, and mumps.

**Meningitis** All students living in on-campus housing must be vaccinated against meningitis. The vaccine must have been received after January 1, 2008. Students who are not compliant with this state law will not be permitted to register for classes or move into the dormitories for the fall term, 2012. Please note that the State of Connecticut does not require this vaccine for students who intend to reside off campus.

**Varicella (chicken pox)** All students are required to provide proof of immunization against varicella. Connecticut state law requires two doses of varicella vaccine. The first dose must have been given on or after the student’s first birthday; the second dose must have been given at least twenty-eight (28) days after the first dose. Documentation from
a health care provider that the student has had a confirmed case of the disease is also acceptable.

**TB screening** The University requires tuberculosis screening for all incoming students. This screening includes a short questionnaire to determine high-risk exposure and, if necessary, asks for information regarding resulting treatment. Please see the Yale Health Web site (www.yalehealth.yale.edu/forms) for more details and the screening form.

*Note:* Students who have not met these requirements prior to arrival at Yale University must receive the immunizations from Yale Health and will be charged accordingly.

**COMPUTING AND TELECOMMUNICATIONS**

www.yale.edu/its

Information Technology Services (ITS) is the central computing and communications services organization for the University, providing academic computing, data networking, telephone services, voice and video networking, computer sales, training, printing and copying services, and general user support.

Academic Computing Services (ACS) and Student Technology Collaborative (STC), units of ITS, partner to furnish and support general purpose computing clusters at many locations on campus (www.yale.edu/cluster), including the Graduate School’s McDougal Center and the graduate student residences (Helen Hadley Hall and HGS), where the computing facility is accessible to residents twenty-four hours a day (www.yale.edu/its/stc). Windows and Apple computers and laser printers are available for open use by the Yale community at Connecticut Hall, Bass Library, Dunham Laboratories, Kline Biology Tower, the Center for Science and Social Science Information, and the Sterling Chemistry Laboratory.

The online purchasing site (www.yale.edu/eportal) sells computers, networking cards, and printers, as well as software and supplies. Apple, Lenovo, and Dell now support direct purchase of computers over the Internet, with systems properly configured for the Yale network. See the student computing site (www.yale.edu/its/stc/purchase) for more information and recommendations for purchasing computer supplies. Up-to-date information on pricing and ordering can be found at the ePortal Web site (www.yale.edu/eportal).

Graduate students in Arts and Sciences receive free technical support on their personal computers through the Student Technology Collaborative (www.yale.edu/its/stc). Certified technicians provide warranty support on Dell and Apple computers. Students should bring all of their supporting documentation for their computers with them to campus (especially software CDs and DVDs), to facilitate necessary repairs.

**Network Access to Yale Services and Beyond**

www.yale.edu/its/network/index.html

ITS Network Services manages Yale’s voice and data network services (www.yale.edu/its/telecom). These include basic telephone services, long distance, voice mail, operator services, conferencing services, cable TV, Internet and Internet 2 connectivity, and all the related cable and distribution facilities on the Central, Medical, and West Campuses.
Long-distance service for telephones on campus is available through the University’s private network, YALENET. All direct-dialed long-distance calls require a toll authorization number (TAN), which can be arranged through the telecommunications office, as well as through departmental offices. Prepaid phone cards and personal calling cards may also be used. Bulldog calling cards are available to address off-campus needs.

All on-campus residences, offices, and laboratories are equipped with wired Yale network outlets. Wireless network access is available in most of the buildings on campus (www.yale.edu/its/network/wireless). Both wired and wireless network access is available in the public areas of HGS, in the Sterling Memorial Library (SML) reading room, and for doctoral students in the SML carrels. Registered users can access network resources through wired or wireless connections.

Students need to register their computers to access services on the Yale network (www.yale.edu/netreg). To enhance support for graduate student research activities, the University provides network roaming access for laptop computers.

**OFFICE OF INTERNATIONAL STUDENTS AND SCHOLARS**

www.yale.edu/oiss

The Office of International Students and Scholars (OISS) coordinates services and support for Yale’s nearly 4,500 international students, faculty, staff, and their dependents. OISS staff provides assistance with issues related to employment, immigration, and personal and cultural adjustment, as well as serves as a source of general information about living at Yale and in New Haven. As Yale University’s representative for immigration concerns, OISS can provide assistance to students, faculty, and staff on how to obtain and maintain legal nonimmigrant status in the United States. All international students and scholars must register with OISS as soon as they arrive at Yale; see www.yale.edu/oiss/coming/arrival/oiss.

OISS programs, like the Community Friends hosting program, daily English conversation groups, U.S. culture workshops and discussions, bus trips, and social events, provide an opportunity to meet members of Yale’s international community and become acquainted with the many resources of Yale University and New Haven. Spouses and partners of Yale students and scholars will want to get involved with the International Spouses and Partners at Yale (ISPY), which organizes a variety of programs for the spouse and partner community.

The OISS Web site (www.yale.edu/oiss) provides useful information to students and scholars prior to and upon arrival in New Haven, as well as throughout their stay at Yale. International students, scholars, and their families and partners can connect with OISS and the Yale international community virtually through several listservs and Facebook.

OISS is housed in the International Center for Yale Students and Scholars, which provides a welcoming venue for students and scholars who want to peruse resource materials, check their e-mail, and meet up with a friend or colleague. Open until 9 p.m. on weekdays during the academic year, the center—located at 421 Temple Street, across the street from Helen Hadley Hall—also provides meeting space for student groups and
a venue for events organized by both student groups and University departments. In addition, the center has nine work carrels that can be reserved by academic departments for short-term international visitors. For more information about reserving space at the center, send a message to oiss@yale.edu or call 203.432.2305. For information about the center, visit www.yale.edu/oiss/about/icenter.

**RESOURCE OFFICE ON DISABILITIES**

www.yale.edu/rod

The Resource Office on Disabilities facilitates accommodations for undergraduate and graduate and professional school students with disabilities who register with and have appropriate documentation on file in the Resource Office. Early planning is critical. Documentation may be submitted to the Resource Office even though a specific accommodation request is not anticipated at the time of registration. It is recommended that matriculating students in need of disability-related course accommodations at Yale University contact the Resource Office by June 15. Special requests for University housing need to be made in the housing application. Returning students must contact the Resource Office at the beginning of each term to arrange for course and exam accommodations.

The Resource Office also provides assistance to students with temporary disabilities. General informational inquiries are welcome from students and members of the Yale community and from the public. The mailing address is Resource Office on Disabilities, Yale University, PO Box 208305, New Haven CT 06520-8305. The Resource Office is located at 35 Broadway (rear entrance), Room 222. Office hours are Monday through Friday, 8:30 a.m. to 4:30 p.m. Voice callers may reach staff at 203.432.2324; fax at 203.432.8250. The Resource Office may also be reached by e-mail (judith.york@yale.edu) or through its Web site (www.yale.edu/rod).

**RESOURCES ON SEXUAL MISCONDUCT**

Yale University is committed to maintaining and strengthening an educational, employment, and living environment founded on civility and mutual respect. Sexual misconduct is antithetical to the standards and ideals of our community, and it is a violation of Yale policy and the disciplinary regulations of Yale College and the graduate and professional schools.

Sexual misconduct incorporates a range of behaviors including rape, sexual assault (which includes any kind of nonconsensual sexual contact), sexual harassment, intimate partner violence, stalking, and any other conduct of a sexual nature that is nonconsensual, or has the purpose or effect of threatening or intimidating a person or persons. Sexual activity requires consent, which is defined as voluntary, positive agreement between the participants to engage in specific sexual activity. Violations of Yale’s Policy on Teacher-Student Consensual Relations also constitute sexual misconduct. Yale aims to eradicate sexual misconduct through education, training, clear policies, and serious consequences for violations of these policies. In addition to being subject to University disciplinary action, sexual misconduct may lead to civil liability and criminal prosecution. Yale
provides a range of services, resources, and mechanisms for victims of sexual misconduct. The options for undergraduate, graduate, and professional school students are described at http://smr.yale.edu.

**SHARE: Advocacy, Information, and Support**

24/7 hotline: 203.432.2000
http://sharecenter.yale.edu

SHARE, the Sexual Harassment and Assault Response and Education Center, has trained counselors available at any time of day or night via its direct hotline to discuss sexual misconduct with any member of the Yale community. SHARE counselors offer confidential or anonymous support and help callers make informed decisions. SHARE can provide professional help with medical and health issues (including accompanying students to the hospital), as well as advice and assistance with contacting police and/or initiating a complaint. SHARE works closely with the University-Wide Committee on Sexual Misconduct, the Title IX coordinators, the Yale Police Department, and other campus resources.

If you wish to make use of SHARE’s services, you can call the crisis number (203.432.2000) at any time. Some legal and medical options are time-sensitive, so if you have been assaulted, we encourage you to call SHARE and/or the Yale Police as soon as possible. Counselors can talk with you over the telephone or meet you in person at the Yale Health Center or the Yale-New Haven Emergency Room. If it is not an acute situation and you would like to speak with Dr. Carole Goldberg, the director of SHARE, she can be reached at 203.432.0290 during business hours or via e-mail at carole.goldberg@yale.edu.

**Title IX Coordinators**

http://provost.yale.edu/title-ix

Title IX of the Education Amendments of 1972 protects people from sex discrimination in educational programs and activities at institutions that receive federal funding. Sex discrimination includes sexual harassment, sexual assault, and other forms of misconduct. The University is committed to providing an environment free from discrimination on the basis of sex.

Each school, including Yale College, has assigned a senior administrator to act as a Title IX coordinator. Coordinators provide information, track and resolve complaints, and address issues relating to gender-based discrimination and sexual misconduct within their respective schools. Coordinators are knowledgeable about, and will provide information on, all options for complaint resolution, and can initiate institutional action when necessary. They also work closely with the SHARE Center, the University-Wide Committee on Sexual Misconduct, and the Yale Police Department.
University-Wide Committee on Sexual Misconduct

203.432.1834 (business hours)
http://provost.yale.edu/uwc

The University-Wide Committee on Sexual Misconduct (UWC) is an internal disciplinary board for complaints of sexual misconduct available to students, faculty, and staff across the University, as described in the committee's procedures. The UWC strives to address allegations of sexual misconduct fairly and expeditiously and has procedures for both formal and informal resolutions. Core UWC members can answer inquiries about procedures and the University definition of sexual misconduct. Operated from the Provost’s Office, the UWC is comprised of faculty, administrative, and student representatives from across the University. In cases where formal resolution is sought, investigations are conducted by professional, independent fact finders.

Yale Police Department

24/7 hotline: 203.432.4400
http://publicsafety.yale.edu/department-information#sensitivecrimes

The Yale Police Department (YPD) offers 24-hour availability by telephone and walk-in for confidential consultations regarding possible criminal investigations and actions. The YPD can provide information on available victims’ assistance services and also has the capacity to perform full criminal investigations. If you wish to speak with Sergeant Robbins-Hoffman, the Sensitive Crimes coordinator, she can be reached at 203.432.9547 during business hours or via e-mail at marnie.robbins@yale.edu. The YPD works closely with the New Haven State’s Attorney, the Yale SHARE Center, the University’s Title IX coordinators, and various other departments within the University. Talking to the YPD does not commit you to collecting evidence or pressing charges; with few exceptions, all decisions about how to proceed are up to you.
The Work of Yale University

The work of Yale University is carried on in the following schools:

**Yale College**  Est. 1701. Courses in humanities, social sciences, natural sciences, mathematical and computer sciences, and engineering. Bachelor of Arts (B.A.), Bachelor of Science (B.S.).

For additional information, please write to the Office of Undergraduate Admissions, Yale University, PO Box 208234, New Haven CT 06520-8234; tel., 203.432.9300; e-mail, student.questions@yale.edu; Web site, http://admissions.yale.edu

**Graduate School of Arts and Sciences**  Est. 1847. Courses for college graduates. Master of Arts (M.A.), Master of Engineering (M.Eng.), Master of Science (M.S.), Master of Philosophy (M.Phil.), Doctor of Philosophy (Ph.D.).

For additional information, please visit www.yale.edu/graduateschool, write to graduate.admissions@yale.edu, or call the Office of Graduate Admissions at 203.432.2771. Postal correspondence should be directed to the Office of Graduate Admissions, Yale Graduate School of Arts and Sciences, PO Box 208323, New Haven CT 06520-8323.

**School of Medicine**  Est. 1810. Courses for college graduates and students who have completed requisite training in approved institutions. Doctor of Medicine (M.D.). Postgraduate study in the basic sciences and clinical subjects. Five-year combined program leading to Doctor of Medicine and Master of Health Science (M.D./M.H.S.). Combined program with the Graduate School of Arts and Sciences leading to Doctor of Medicine and Doctor of Philosophy (M.D./Ph.D.). Master of Medical Science (M.M.Sc.) from the Physician Associate Program.

For additional information, please write to the Director of Admissions, Office of Admissions, Yale School of Medicine, 367 Cedar Street, New Haven CT 06510; tel., 203.785.2643; fax, 203.785.3234; e-mail, medical.admissions@yale.edu; Web site, http://medicine.yale.edu/education/admissions

**Divinity School**  Est. 1822. Courses for college graduates. Master of Divinity (M.Div.), Master of Arts in Religion (M.A.R.). Individuals with an M.Div. degree may apply for the program leading to the degree of Master of Sacred Theology (S.T.M.).

For additional information, please write to the Admissions Office, Yale Divinity School, 409 Prospect Street, New Haven CT 06511; tel., 203.432.5360; fax, 203.432.7475; e-mail, divinity.admissions@yale.edu; Web site, http://divinity.yale.edu. Online application, https://apply.divinity.yale.edu/apply

**Law School**  Est. 1824. Courses for college graduates. Juris Doctor (J.D.). For additional information, please write to the Admissions Office, Yale Law School, PO Box 208215, New Haven CT 06520-8215; tel., 203.432.4995; e-mail, admissions.law@yale.edu; Web site, www.law.yale.edu

Graduate Programs: Master of Laws (LL.M.), Doctor of the Science of Law (J.S.D.), Master of Studies in Law (M.S.L.). For additional information, please write to Graduate Programs, Yale Law School, PO Box 208215, New Haven CT 06520-8215; tel., 203.432.1696; e-mail, gradpro.law@yale.edu; Web site, www.law.yale.edu
School of Engineering & Applied Science  Est. 1852. Courses for college graduates. Master of Science (M.S.), Master of Engineering (M.Eng.), and Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please write to the Office of Graduate Studies, Yale School of Engineering & Applied Science, PO Box 208267, New Haven CT 06520-8267; tel., 203.432.4250; e-mail, grad.engineering@yale.edu; Web site, http://seas.yale.edu

School of Art  Est. 1869. Professional courses for college and art school graduates. Master of Fine Arts (M.F.A.).

For additional information, please visit http://art.yale.edu, write to artschool.info@yale.edu, or call the Office of Academic Affairs at 203.432.2600. Postal correspondence should be directed to the Office of Academic Affairs, Yale School of Art, PO Box 208339, New Haven CT 06520-8339.

For additional information, please write to the Yale School of Music, PO Box 208246, New Haven CT 06520-8246; tel., 203.432.4155; fax, 203.432.7448; e-mail, gradmusic.admissions@yale.edu; Web site, http://music.yale.edu

School of Forestry & Environmental Studies  Est. 1900. Courses for college graduates. Master of Forestry (M.F.), Master of Forest Science (M.F.S.), Master of Environmental Science (M.E.Sc.), Master of Environmental Management (M.E.M.). Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please write to the Office of Admissions, Yale School of Forestry & Environmental Studies, 205 Prospect Street, New Haven CT 06511; tel., 800.825.0330; e-mail, fesinfo@yale.edu; Web site, www.environment.yale.edu

School of Public Health  Est. 1915. Courses for college graduates. Master of Public Health (M.P.H.). Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please write to the Director of Admissions, Yale School of Public Health, PO Box 208034, New Haven CT 06520-8034; tel., 203.785.2844; e-mail, ysphealth.admissions@yale.edu; Web site, http://publichealth.yale.edu

School of Architecture  Est. 1916. Courses for college graduates. Professional degree: Master of Architecture (M.Arch.); nonprofessional degree: Master of Environmental Design (M.E.D.). Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please visit www.architecture.yale.edu, write to gradarch.admissions@yale.edu, or call 203.432.2296. Postal correspondence should be directed to the Yale School of Architecture, PO Box 208242, New Haven CT 06520-8242.

School of Nursing  Est. 1923. Courses for college graduates. Master of Science in Nursing (M.S.N.), Post Master’s Certificate, Doctor of Nursing Practice (D.N.P.). Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please write to the Yale School of Nursing, PO Box 9740, New Haven CT 06536-0740; tel., 203.785.2389; Web site, http://nursing.yale.edu

For additional information, please write to the Admissions Office, Yale School of Drama, PO Box 208325, New Haven CT 06520-8325; tel., 203.432.1507; e-mail, ysd.admissions@yale.edu; Web site, www.drama.yale.edu

School of Management  Est. 1976. Courses for college graduates. Master of Business Administration (M.B.A.), Master of Advanced Management (M.A.M.). Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

The University is committed to basing judgments concerning the admission, education, and employment of individuals upon their qualifications and abilities and affirmatively seeks to attract to its faculty, staff, and student body qualified persons of diverse backgrounds. In accordance with this policy and as delineated by federal and Connecticut law, Yale does not discriminate in admissions, educational programs, or employment against any individual on account of that individual’s sex, race, color, religion, age, disability, or national or ethnic origin; nor does Yale discriminate on the basis of sexual orientation or gender identity or expression.

University policy is committed to affirmative action under law in employment of women, minority group members, individuals with disabilities, and covered veterans. Inquiries concerning these policies may be referred to the Office for Equal Opportunity Programs, 221 Whitney Avenue, 203.432.0849 (voice), 203.432.9188 (TTY). For additional information, see www.yale.edu/equalopportunity.

In accordance with both federal and state law, the University maintains information concerning current security policies and procedures and prepares an annual crime report concerning crimes committed within the geographical limits of the University. In addition, in accordance with federal law, the University maintains information concerning current fire safety practices and prepares an annual fire safety report concerning fires occurring in on-campus student housing facilities. Upon request to the Office of the Associate Vice President for Administration, PO Box 208322, 2 Whitney Avenue, Suite 810, New Haven CT 06520-8227, 203.432.8049, the University will provide such information to any applicant for admission.

In accordance with federal law, the University prepares an annual report on participation rates, financial support, and other information regarding men’s and women’s intercollegiate athletic programs. Upon request to the Director of Athletics, PO Box 208216, New Haven CT 06520-8216, 203.432.1414, the University will provide its annual report to any student or prospective student. The Equity in Athletics Disclosure Act (EADA) report is also available online at http://ope.ed.gov/athletics.

Equal Opportunity Programs, 221 Whitney Avenue, 203.432.0849 (voice), 203.432.9388 (TTY). For additional information, see www.yale.edu/equalopportunity.
