THE PRESIDENT AND FELLOWS OF YALE UNIVERSITY

President
Peter Salovey, A.B., A.M., Ph.D.

Fellows
His Excellency the Governor of Connecticut, ex officio
Her Honor the Lieutenant Governor of Connecticut, ex officio
Joshua Bekenstein, B.A., M.B.A., Wayland, Massachusetts
Michael J. Cavanagh, B.A., J.D., Philadelphia, Pennsylvania
Charles Waterhouse Goodyear IV, B.S., M.B.A., New Orleans, Louisiana
Catharine Bond Hill, B.A., B.A., M.A., Ph.D., Bronx, New York
William Earl Kennard, B.A., J.D., Charleston, South Carolina
Reiko Ann Miura-Ko, B.S., Ph.D., Menlo Park, California (June 2025)
Carlos Roberto Moreno, B.A., J.D., Los Angeles, California (June 2026)
Gina Marie Raimondo, A.B., D.Phil., J.D., Providence, Rhode Island
Eve Hart Rice, Jr., B.A., M.B.A., Bethesda, Maryland
Emmett John Rice, Jr., B.A., M.D., Bedford, New York (June 2021)
Joshua Linder Steiner, B.A., M.St., New York, New York
David Li Ming Sze, B.A., M.B.A., Hillsborough, California
Annette Thomas, S.B., Ph.D., Cambridge, England (June 2022)
Kathleen Elizabeth Walsh, B.A., M.P.H., Boston, Massachusetts (June 2023)
Lei Zhang, B.A., M.A., M.B.A., Hong Kong, China
THE OFFICERS OF
YALE UNIVERSITY

President
Peter Salovey, A.B., A.M., Ph.D.

Provost
Scott Allan Strobel, B.A., Ph.D.

Secretary and Vice President for University Life
Kimberly Midori Goff-Crews, B.A., J.D.

Senior Vice President for Operations
Jack Francis Callahan, Jr., B.A., M.B.A.

Senior Vice President for Institutional Affairs and General Counsel
Alexander Edward Dreier, A.B., M.A., J.D.

Vice President for Finance and Chief Financial Officer
Stephen Charles Murphy, B.A.

Vice President for Alumni Affairs and Development
Joan Elizabeth O’Neill, B.A.

Vice President for Human Resources and Administration
Janet Elaine Lindner, B.S., M.P.A., Ed.D.

Vice President for Global Strategy
Pericles Lewis, B.A., A.M., Ph.D.

Vice President for Facilities and Campus Development
John Harold Bollier, B.S., M.B.A.

Vice President for Communications
Nathaniel Westgate Nickerson, B.A.
SCHOOL OF NURSING
ADMINISTRATION AND FACULTY

OFFICERS OF ADMINISTRATION
Peter Salovey, A.B., M.A., Ph.D., President of the University
Scott A. Strobel, B.A., Ph.D., Provost of the University
Ann Kurth, Ph.D., M.P.H., C.N.M., FAAN, Dean; and Linda Koch Lorimer Professor of Nursing
Saveena Dhall, B.A., Ed.M., Associate Dean of Student Life and Belonging
LaRon Nelson, Ph.D., R.N., F.N.P., FNAP, FAAN, Associate Dean for Global Health and Equity; and Independence Foundation Associate Professor
Carmen Portillo, Ph.D., R.N., FAAN, Executive Deputy Dean; and Professor of Nursing
Marcia Thomas, Ed.D., M.P.H., M.S., Associate Dean for Finance and Administration
Beth Zapatka, B.A., Associate Dean for Advancement
M. Tish Knobf, Ph.D., R.N., A.O.C.N., FAAN, Chair, GEPN Program; Co-Director, Ph.D. Program; and Professor of Nursing
Martha K. Swartz, Ph.D., R.N., C.P.N.P., FAAN, Chair, M.S.N. Program; Professor of Nursing; and Pediatric Nurse Practitioner, Yale New Haven Hospital

BOARD OF PERMANENT OFFICERS
Jane Karpe Dixon, Ph.D., Professor of Nursing
Margaret Grey, Dr.P.H., R.N., FAAN, NAM, Annie W. Goodrich Professor of Nursing
Linda Honan, Ph.D., M.S.N., C.N.S.-B.C., R.N., ANEF, FAAN, Professor of Nursing
Holly Powell Kennedy, Ph.D., C.N.M., FACNM, FAAN, Helen Varney Professor of Midwifery
M. Tish Knobf, Ph.D., R.N., A.O.C.N., FAAN, Chair, GEPN Program; Co-Director, Ph.D. Program; and Professor of Nursing
Ann Kurth, Ph.D., M.P.H., C.N.M., FAAN, Dean; and Linda Koch Lorimer Professor of Nursing
LaRon Nelson, Ph.D., R.N., F.N.P., FNAP, FAAN, Associate Dean for Global Health and Equity; and Independence Foundation Associate Professor
Carmen Portillo, Ph.D., R.N., FAAN, Executive Deputy Dean; and Professor of Nursing
Nancy S. Redeker, Ph.D., R.N., FAHA, FAAN, Beatrice Renfield Term Professor of Nursing; and Director, Biobehavioral Laboratory
Lois Siebert Sadler, Ph.D., R.N., P.N.P.-B.C., FAAN, Co-Director, Ph.D. Program; Professor of Nursing; and Professor, Yale Child Study Center
Martha K. Swartz, Ph.D., R.N., C.P.N.P., FAAN, Chair, MSN Program; Professor of Nursing; and Pediatric Nurse Practitioner, Yale New Haven Hospital
David Vlahov, Ph.D., R.N., FAAN, NAM, Professor of Nursing
Robin Whittemore, Ph.D., A.P.R.N., FAAN, Professor of Nursing
Canhua Xiao, Ph.D., R.N., FAAN, Associate Professor of Nursing

FACULTY EMERITA
Patricia Jackson Allen, M.S., R.N., P.N.P., FAAN, Professor Emerita of Nursing
Ann Tomaino Ameling, M.S.N., R.N., Professor Emerita of Nursing
Helen Varney Burst, M.S.N., R.N., C.N.M., FACNM, Professor Emerita of Nursing
Angela Crowley, Ph.D., A.P.R.N., C.S., P.N.P., FAAN, Professor Emerita of Nursing
Marjorie Funk, Ph.D., R.N., FAHA, FAAN, Professor Emerita of Nursing
Judith Belliveau Krauss, M.S.N., R.N., FAAN, Professor Emerita of Nursing
Mary Ellen Rousseau, M.S., R.N., C.N.M., FACNM, Professor Emerita of Nursing

FACULTY
Nancy Anderson, M.S.N., A.P.R.N., P.M.H.C.N.S.-B.C., Lecturer in Nursing
Laura Andrews, Ph.D., R.N., A.P.R.N., A.C.N.P.-B.C., Associate Professor of Nursing; and Specialty Director, Adult/Gerontology Acute Care Nurse Practitioner Program
Nancy Banasiak, D.N.P., A.P.R.N., P.P.C.N.P.-B.C., Associate Professor of Nursing; and Pediatric Nurse Practitioner, Yale New Haven Hospital
Veronica Barcelona, Ph.D., M.S.N., M.P.H., R.N., A.P.H.N-B.C., FAAN, Assistant Professor of Nursing
Susan Boorin, Ph.D., A.P.R.N., P.M.H.N.P.-B.C., Lecturer in Nursing
Elyse Borsuk, M.S.N., B.S.N., M.A., Lecturer in Nursing
Allison Cable, D.N.P., A.P.R.N., A.C.N.P., Lecturer in Nursing
Mary Ann Camilleri, J.D., B.S.N., R.N., FACHE, Director, Leadership Doctor of Nursing Program; and Lecturer in Nursing
Elizabeth Cohen, Pharm.D., Lecturer in Nursing
Nicole Colline, M.S.N., A.P.R.N., R.N., F.N.P.-B.C., Lecturer in Nursing; and Specialty Director, Family Nurse Practitioner Program
Samantha Conley, Ph.D., R.N., F.N.P.-B.C., Assistant Professor of Nursing
Lisa Corbett, D.N.P., A.P.R.N., A.N.C.S.-B.C., C.W.O.C.N., Lecturer in Nursing
Jessica Shank Coviello, D.N.P., A.P.R.N., A.N.P.-B.C., Associate Professor of Nursing; and Nurse Practitioner, Smilow Cancer Center Cardiology-OncoClinic
Mary Ann Cyr, M.S.N., A.P.R.N., A.C.N.P.-B.C., Lecturer in Nursing
Andree de Lisser, D.N.P., A.P.R.N., P.M.H.C.N.S.-B.C., Lecturer in Nursing
Susan E. Devine, A.P.R.N.-B.C., Lecturer in Nursing; Director, New Haven Court Clinic; and Risk Manager, Connecticut Mental Health Center, New Haven
Jane Karpe Dixon, Ph.D., Professor of Nursing
Elizabeth Doyle, D.N.P., A.P.R.N., P.P.C.N.P.-B.C, B.C.-A.D.M., C.D.E., Assistant Professor of Nursing
Ashley Draper, M.S.N., C.N.M., W.H.N.P.-B.C., Lecturer in Nursing
Ophelia Empleo-Frazier, M.S.N., A.P.R.N., G.N.P.-B.C., Lecturer in Nursing
Deborah Fahs, D.N.P., A.P.R.N., M.S.N., F.N.P.-B.C., R.N., Associate Professor of Nursing
Shelli Feder, Ph.D., A.P.R.N., F.N.P.-B.C., A.C.H.P.N., Assistant Professor of Nursing
Jamie Feingold, M.S.N., N.P.-C., W.H.N.P.-B.C., Lecturer in Nursing
Loren Fields, D.N.P., M.S.N., A.N.P.-B.C., W.H.N.P.-C., Lecturer in Nursing; and Specialty Director, Women's Health Program
Linda Ghampson, M.S.N., R.N., Lecturer in Nursing
Margaret Grey, Dr.P.H., R.N., FAAN, NAM, Annie W. Goodrich Professor of Nursing
Carla Hannon, B.S.N., M.S., A.P.R.N., C.C.R.N., C.C.N.S., Lecturer in Nursing
Natasha Harris, A.P.R.N., M.S.N., Lecturer in Nursing
Margaret Holland, Ph.D., M.P.H., M.S., Research Scientist
Linda Honan, Ph.D., M.S.N., C.N.S.-B.C., R.N., ANEF, FAAN, Professor of Nursing
Joanne DeSanto Iennaco, Ph.D., P.M.H.N.P.-B.C., A.P.R.N., Associate Professor of Nursing; and Director, Clinical Doctor of Nursing Program
Sascha James-Conterelli, D.N.P., C.N.M., FACNM, Lecturer in Nursing
Sangchoon Jeon, Ph.D., Senior Research Scientist
Joan Kearney, Ph.D., A.P.R.N.-B.C., P.M.H.C.N.S., Associate Professor of Nursing; and Chair, Doctor of Nursing Practice Program
Holly Powell Kennedy, Ph.D., C.N.M., FACNM, FAAN, Helen Varney Professor of Midwifery
Michelle Kennedy, M.S.N., A.P.R.N., F.N.P.-B.C., Lecturer in Nursing
M. Tish Knobf, Ph.D., R.N., A.O.C.N., FAAN, Chair, GEPN Program; Co-Director, Ph.D. Program; and Professor of Nursing
Sarah Korpak, M.S.N., R.N.-B.C., C.N.E., Lecturer in Nursing
Ann Kurth, Ph.D., M.P.H., C.N.M., FAAN, Dean; and Linda Koch Lorimer Professor of Nursing
Timothy Layman, D.N.P., M.S.N., R.N., N.E.-B.C., Lecturer in Nursing
Wendy Lord Mackey, M.S.N., A.P.R.N.-B.C., C.O.R.L.N., Lecturer in Nursing
Ami Marshall, Ed.D., M.S.N., A.P.R.N., A.N.P.-C., Lecturer in Nursing; and Specialty Director, Adult/Gerontology Primary Care Nurse Practitioner Program
Philip R. Martinez, Jr., Ed.D., M.S.N., A.P.R.N.-B.C., C.C.R.N.-B.C., Lecturer in Nursing
Sharen McKay, Ph.D., Lecturer in Nursing
Erin McMahon, Ed.D., M.S.N., C.N.M., R.N., Assistant Professor; and Specialty Director, Midwifery Program
Lisa Meland, Pharm.D., R.Ph., Lecturer in Nursing
Erin Morelli, R.N., C.N.M., C.L.C., Lecturer in Nursing; and Director, Yale Midwifery Faculty Practice
Alison Moriarty Daley, Ph.D., A.P.R.N., P.P.C.N.P.-B.C., FAAN, Associate Professor of Nursing; Specialty Director, Pediatric Nurse Practitioner Program; and Pediatric Nurse Practitioner, Yale New Haven Hospital
Ronica Mukerjee, D.N.P., M.S.N., Ms.A., F.N.P.-B.C., L.Ac., AAHVIS, Lecturer in Nursing
Soohyun Nam, Ph.D., A.P.R.N., A.N.P.-B.C., FAHA, Associate Professor of Nursing
LaRon Nelson, Ph.D., R.N., F.N.P., FNAP, FAAN, Associate Dean for Global Health and Equity; and Independence Foundation Associate Professor
Gina Novick, Ph.D., C.N.M., FACNM, Associate Professor of Nursing
Monica Ordway, Ph.D., A.P.R.N., P.P.C.N.P.-B.C., Associate Professor of Nursing
Monica Philipp, M.S.N., A.P.R.N., A.P.N.-B.C., W.H.N.P.-B.C., Lecturer in Nursing
Carmen Portillo, Ph.D., R.N., FAAN, Executive Deputy Dean; and Professor of Nursing
Lindsey Powell, D.N.P., P.M.H.N.P.-B.C., A.P.R.N, Lecturer in Nursing
Shannon Pranger, M.S.N., R.N., C.E.N., Lecturer in Nursing
Nancy C. Redeker, Ph.D., R.N., FAHA, FAAN, Beatrice Renfield Term Professor of Nursing; and Director, Biobehavioral Laboratory
Heather Reynolds, M.S.N., C.N.M., FACNM, Minority Student Coordinator; and Lecturer in Nursing
Dilice Robertson, D.N.P., A.P.R.N., P.M.H.C.N.S.-B.C., P.M.H.N.P.-B.C., Lecturer in Nursing
Kaitlin Roche, R.N., M.S.N., N.P.-C., Lecturer in Nursing
Patricia Ryan-Krause, M.S.N., M.S., R.N., P.C.P.N.P.-B.C., Associate Professor of Nursing; and Pediatric Nurse Practitioner, Yale New Haven Hospital
Lois Siebert Sadler, Ph.D., R.N., P.N.P.-B.C., FAAN, Co-Director, Ph.D. Program; Professor of Nursing; and Professor, Yale Child Study Center
Gia Santoro, M.S.N., A.P.R.N., P.M.H.N.P.-B.C., Lecturer in Nursing
Polly Sather, M.S.N., A.C.N.P., Lecturer in Nursing
Virginia Sherrick, M.S.N., A.P.R.N., F.N.P.-B.C., R.N.-B.C., Lecturer in Nursing; and Director of the Simulation Lab
Gail M. Sicilia, M.S.N., R.N., Lecturer in Nursing
Lisa Summers, M.S.N., Dr.P.H., FACNM, Lecturer in Nursing
Martha K. Swartz, Ph.D., R.N., C.P.N.P., FAAN, Chair, M.S.N. Program; Professor of Nursing; and Pediatric Nurse Practitioner, Yale New Haven Hospital
Michelle Telfer, D.N.P, M.P.H., C.N.M., Assistant Professor of Nursing

Tina Walde, D.N.P., P.M.H.N.P.-B.C., P.M.H.C.N.S.-B.C., Lecturer in Nursing
Robin Whittemore, Ph.D., A.P.R.N., FAAN, Professor of Nursing
Patrice O’Neill Wilhelm, M.S.N., A.P.R.N., Lecturer in Nursing
Julie Womack, Ph.D., C.N.M., F.N.P.-B.C., Associate Professor of Nursing
Canhua Xiao, Ph.D., R.N., FAAN, Associate Professor of Nursing

RESEARCH STAFF
Sarah Linsky, Research Assistant
Meghan O’Connell, Research Program Manager

CLINICAL STAFF
Amanda Lendler, Nurse Midwife
Elise Resch, Nurse Midwife

ADMINISTRATIVE STAFF
Janene Batten, Reference Librarian
Dylesha Blackmon, Manager, Human Resources and Administrative Services
Caitlin Blacksmith, Institutional Research Analyst
Jana Buck, Director of Enrollment and Registrar
Olivia Buckholz, Senior Administrative Assistant
Gustavo Carrillo, Simulation Lab Media Technician
Linda Caruso, Senior Administrative Assistant
Tracy Chidsey, Director of the Clinical Support Unit
Leigh Clemens, Clinical Site Coordinator
Colleen Colbert, GEPN Program Manager
Nancy DeMatteo, Senior Administrative Assistant 2
Daniela Dowling, Portfolio and Grant Accountant
Niamh Emerson, Associate Director of Advancement
Dilan Eroglu, Senior Administrative Assistant
Emily Finn, Program Manager
Sandra Fischer-Storck, Clinical Site Coordinator
Lorena Fonte, Senior Administrative Assistant
Jaleesa Freeman, Senior Administrative Assistant
Ekaterina Ginzburg, Director of the Academic Support Unit
Joshua Gleason, Instructional Technology Specialist
Rochelle Goodwin, Communications Manager
Fredericka Grant, Senior Administrative Assistant
Neal Greene, Media Technician
Mary Grund, Manager of Facilities and Administrative Services
Christine Kendzierski, Senior Administrative Assistant 2
Michelle Koss, Senior Executive Assistant
Lauren Langford, Assistant Director of Communications
Rebecca Linsky, Registrarial Associate
Triana Lyde, Student Services Coordinator
Mary Ann Marshak, Senior Administrative Assistant
Melissa Nixon, Senior Administrative Assistant
Mary Nusdeo, Senior Administrative Assistant
Alexandra Oshinskie, Development Coordinator
Charlyn Paradis, Program Manager, Annual Giving and Alumnae/i Affairs
Jeanetsey Prates, Senior Administrative Assistant
Eddie Quiles, Senior Administrative Assistant
Lori Rasile, Director of Finance
Wesley Revangil, Assistant Director of Financial Aid

Monica Vella-Angelastro, Director of Academic Operations
Catherine Wagner, Senior Administrative Assistant
Sarah Zaino, Assistant Director for Research Activities
A MESSAGE FROM THE DEAN

A world in crisis has called, and Yale nurses have answered. Yale nurses were on the front lines of the COVID-19 (coronavirus disease) pandemic, living our mission to change health for the better, for all people. At Yale School of Nursing (YSN), you are joining an intellectual community that integrates science with practice with an emphasis on public and global health justice, addressing persistent health care disparities in the United States and around the world. Over the last year, states have expanded the scope of practice of advanced practice registered nurses and midwives to address a need that has never been greater.

In an unusually prescient move, the World Health Organization declared 2020 the Year of the Nurse and the Midwife, and the corresponding report, State of the World’s Nursing 2020 (https://www.who.int/publications-detail/nursing-report-2020), highlights the worldwide need for nurses and midwives, including from Yale. Nurses are the backbone of every health care system in the world, and our critical functions have become more widely recognized during the pandemic. As nurse scientists and expert clinicians, we can educate patients with authority and live up to the standards of the nation’s most trusted profession. But our work does not stop when the pandemic’s waves recede, and our advanced practice registered nurses (nurse practitioners and midwives) are well positioned to adapt to post-pandemic needs. As the world shifts from emergency response to primary care, health systems will return to the principles of Alma-Ata—health beyond the absence of disease. This outlook ensures that our nurse leaders will incorporate lessons learned into future care.

A YSN education promotes advocacy for underserved populations and rigorous scientific research. Our outstanding faculty, expert staff, and incredible student community, combined with the excellence of our graduates, placed YSN in the number six position of nursing schools in the world this year. Our Graduate Entry Prespecialty in Nursing (GEPN) program combines preparation in basic nursing with advanced preparation in a clinical specialty, attracting students with rich life experience from diverse backgrounds. Several of our Master of Science in Nursing (M.S.N.) specialty tracks are among the most highly rated in the country, positioning graduates to improve care across the lifespan. Our Ph.D. program prepares expert nurse scientists to improve individual and population health. The Doctor of Nursing Practice (D.N.P.) program enhances the credentials of experienced nurses across the country, giving those students the tools to shape policy and lead health systems using a pioneering degree format. Yale Nursing’s D.N.P. was ranked in the top tier nationally since graduating the very first cohort, and it continues to draw a diverse and accomplished group of nurse leaders.

Our curriculum is forward-thinking, expanding the education of nurses to address stresses stemming from climate change and incipient global health emergencies. Students benefit from our recently expanded clinical simulation facility and flexible educational opportunities through remote learning. Our world-class faculty engage in high-impact research in areas that include self-management of chronic conditions, sleep science, symptom science, palliative care, genomics, maternal-child health, mental health, and global health, among other key areas. Our dedicated staff are
highly committed to the school and to our mission. We aim to build a diverse nursing workforce educated in health justice, and we actively work to further inclusion in nursing academia and the health care sector. Students are key members of YSN’s Inclusion, Diversity, Equity Action Solutions (IDEAS) Council. Finally, but not least, YSN is part of the singular Yale University ecosystem in which the tools of intellectual discourse, available to every student, can become instruments of powerful change in the world. We are one YSN and one Yale, committed, in the words of the University’s mission statement, “to improving the world today and for future generations.”

Thank you humbly for your engagement in YSN. Our faculty, staff, alumni, and I are thrilled to welcome you to Yale and to West Campus.

Ann Kurth, ’90 M.S.N., Ph.D., M.P.H., C.N.M., FAAN
Dean, Yale School of Nursing
Linda Koch Lorimer Professor of Nursing
History

The School of Nursing, founded in 1923, became the first school to prepare nurses under an educational rather than an apprenticeship program. Dean Annie Goodrich's insistence that her students came to Yale to learn a highly skilled profession rather than to provide extra hands to already trained nurses was truly revolutionary. The School has continued to spawn new ideas that have helped redefine nursing: the groundbreaking research of Virginia Henderson, the founding of the American hospice movement, and the first “graduate entry” system that enlivened nursing practice by attracting mature students with varied and rich life experiences.

Since its founding, the School routinely revises its curriculum to meet the profession's needs. Because of an increasing realization that a college education was essential in the profession of nursing, the School of Nursing admitted only college graduates after 1934. Fifteen years later an advanced program in mental health nursing was added to the basic program. In 1952 the School became coeducational when the first male student was admitted.

A study of nursing education at Yale was undertaken in 1952. The Yale Corporation decided that the University could contribute to nursing most effectively through a graduate program for nurses who had both basic professional preparation and a baccalaureate degree. The basic program was discontinued in 1956, and the curriculum of the advanced program was expanded to prepare nurses in psychiatric–mental health, maternal–newborn health, and community health nursing. Nurse-midwifery was an option in the Maternal-Newborn Health Program until 1972, when it became the total clinical component of the program. A Master of Science in Nursing degree was awarded to those who had successfully completed a minimum of one year’s study, coupled with a summer field experience. A Certificate in Nurse-Midwifery was also awarded by Yale University until 1972, when national certification by the American College of Nurse-Midwives was instituted.

In 1959–60 a revised curriculum of two years of study leading to the master’s degree was inaugurated. The curriculum was further expanded in 1969 to include pediatric nursing and in 1974 to include medical–surgical nursing. In September 1992 a specialty was added in nursing systems and policy, then renamed nursing management and policy; that specialty was discontinued in 2003. From 2006 to 2015 the curriculum included a specialty in nursing management, policy, and leadership to prepare leaders in the management of delivery systems that promote patient safety and quality of care. In April 1997 the Yale Corporation approved the Post-Master’s Certificate for advanced practice nurses seeking additional specialty preparation. The first certificates were awarded at the May 1997 commencement exercises.

In April 1970 the Corporation approved development of a three-year curriculum for college graduates from other fields, a program of study now known as the Graduate Entry Prespecialty in Nursing. The first class of twelve enrolled in the fall of 1974.
In November 1992 the Corporation approved the development of a Doctor of Nursing Science program. The first class was admitted and enrolled in September 1994; and the first graduates were awarded the D.N.Sc. in June 1998. In 2006 the Corporation approved the program’s conversion from the Doctor of Nursing Science to a Doctor of Philosophy, awarded by the Graduate School of Arts and Sciences. The first Ph.D. class was admitted and enrolled in September 2006. In April 2011 the Corporation approved the development of a Doctor in Nursing Practice program. The first class of D.N.P. students was admitted and enrolled in September 2012.

In spring 2020 the Board of Permanent Officers approved three new programs: a Clinical D.N.P. program, a Pediatric Nurse Practitioner—Acute Care specialty in the M.S.N. program, and a Post-Master’s Pediatric Nurse Practitioner—Acute Care Certificate option.

Accreditation

The School is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington DC 20001; 202.887.6791; www.aacnnursing.org/ccne. The Graduate Entry Prespecialty in Nursing is approved by the State of Connecticut Board of Examiners for Nursing. The Nurse-Midwifery specialty is accredited by the Accreditation Commission for Midwifery Education.

Mission

The mission of the Yale School of Nursing is better health for all people. We accomplish this by educating each generation of nurse leaders, scholars, and practitioners; transforming health care practice; and advancing science. Building on the tradition of our founding dean, Annie W. Goodrich, the YSN community relates the “adventure of thought to the adventure of action, in touch with the fundamentals of human experience” across local, national, and international systems of care.

Values

The Yale School of Nursing is a community that holds an expansive view of health and believes that access to high-quality, patient-centered health care is a social right, not a privilege. In our intellectual and clinical work, we value integrity, dignity, rigor, curiosity, and excellence. Mindful of our traditions, as well as those of Yale University, we emphasize innovation grounded in creativity and the integration of education, scholarship, practice, and policy in service of social justice and health equity. Respect for diversity of thought, ideas, and opinions of others guides all of our work. We value the wise use of resources. We are committed to interprofessional education, research, and practice, and mentorship of the next generation of leaders. We strive to create an environment for study that is caring and supports openness and transparency.

Philosophy

Each person is a unique biological, psychological, social being, who is influenced by and influences environments. Culture and society shape a person’s values, beliefs, behaviors,
and perceptions about health and illness. We believe that individual differences are to be respected, free from bias and stereotyping.

Individuals have the right to accurate and comprehensible information about their health care and available resources. Individuals have the right to participate in decisions concerning their care and their return to health.

Our diverse society is composed of individuals, families, and communities that share a need for health care. We believe in working toward a society in which individuals have equal rights regardless of personal characteristics or genetic differences.

Health is a product of a dynamic process in which growth and development enable adaptation to changing environmental demands. We believe that improvement in health care will be facilitated through the collaborative efforts of patients’ and health professionals.

Concern for the highest possible quality of life, respect for human value, and commitment to caring are the primary postulates of nursing. Nursing involves an alliance with the patient to promote health, prevent disease, treat selected illness, and maintain or restore function. Nursing services may be provided independently or in collaboration with other health professionals. Nursing draws upon the integration of science and humanism, and theory developed through practice and research. We believe that the Yale School of Nursing has an obligation to effect public and colleague acceptance of the leadership capabilities of the nursing profession.

Faculty are committed to the advancement of nursing knowledge and the improvement of health care. It is our responsibility to shape the design of health care and nursing education systems, because we believe that improving patient care improves education and, likewise, improving education improves patient care. An environment conducive to an interchange of ideas among students, faculty, and administration is essential. The character of University life for faculty and students consists of active teaching and learning, clinical scholarship, and research upon which to base current and future education and practice.

We believe that practice will be improved through sound clinical judgment, scholarship, and research. Those who enter this environment should exhibit a readiness for systematic inquiry and critical thinking, and the ability to contribute to the advancement of nursing knowledge and health policy.

1 The term “patient” encompasses individuals, families, groups, and communities across the lifespan in various states of health and illness.

Organizational Framework

Curriculum follows directly from the Yale School of Nursing’s mission and philosophy. The aims and assumptions of the School state:

The master’s curriculum is designed to offer students an opportunity to become prepared as advanced practitioners in selected health care specialties so that they may assume roles as clinicians, scholars, and leaders and ultimately improve health care for all people. Advanced Practice Nurses are committed to the delivery and the study of high-quality, evidence-based clinical care and work to help shape
health care systems. The program of study in the School is viewed as preparation for graduates’ continuing activity in a variety of leadership roles.

ADVANCED NURSING PRACTICE

Nursing involves an alliance with the patient or health care system using a holistic and contextual perspective. This statement is further substantiated by a direct quote:

…to assist the individual, sick or well, with those activities contributing to health or its recovery (or to a peaceful death) that [the patient] would perform unaided if [the patient] had the necessary strength, will or knowledge. And to do this in such a way as to help [the patient] gain independence as rapidly as possible.

Advanced Nursing Practice is defined as specialization in an area of practice and builds upon mastery of depth and breadth of specific knowledge. Practicing at the advanced level also involves the identification of signs/symptoms/behaviors that indicate vulnerability and the selection of interventions to promote health and prevent illness, disability, and complications. Nurses in advanced practice integrate knowledge, scholarship, management, leadership, and consultation into their role and function in collaboration with other members of the health care team.

Knowledge supporting advanced practice nursing is organized into three constructs: clinical practice, scholarship, and leadership.

Clinical Practice

Clinical practice includes the assessment, management, and coordination of health care needs of individuals, families, groups, communities, and/or populations. This care occurs within bio-psychosocial, cultural, political, environmental, and economic contexts.

Clinical practice requires that clinicians foster, develop, and sustain effective patient-provider relationships within the context of complex organizational and health care delivery systems. Excellent clinical practice is based on current and relevant evidence-based data and entails the systematic collection of diverse forms of information, sound analytical reasoning, strong interpersonal and leadership skills, knowledge of organizational and systems behavior, and proficiency in translating knowledge into practice and policy. The ultimate goal of clinical practice is to enable patients to attain the best possible quality of life by integrating principles of health promotion and disease prevention into their lifestyles and fostering an effective patient-provider relationship. Clinical practice includes clinicians’ ability to coordinate patient care, resources, and services among providers and to provide patients with the information needed to attain optimum health outcomes.

Scholarship

Scholarship forms the underpinning and context for advanced practice nursing. Scholarship encompasses the iterative process of generating and testing theories, applying them in practice settings, and revising theories based on data. This intellectual process involves familiarity with knowledge of current and cutting-edge science from nursing and other health-related disciplines, critical analysis, hypothesis formation
and testing, and consideration of alternative theories. In clinical practice, scholarship includes assessment, data gathering, hypothesis generation, and use of clinical data for evaluation.

Scholarship involves systematic evaluation of the rationale for health-related decision-making, critical analysis of health-related issues and policies, and the process of describing, explaining, and predicting phenomena of relevance to human health, health care environments, and nursing. Examples of relevant phenomena include, but are not limited to, patterns of human behavior and the contexts in which it occurs, physiological and pathophysiological processes, and health care systems, ethical concerns, and policy. Knowledge is generated through empirical, aesthetic, personal, and ethical ways of knowing. Ongoing critical evaluation of the state of the science and questioning of available information, as well as personal clinical wisdom, are critical components of scholarly inquiry.

Scholarly activity is the hallmark of graduate education in nursing and provides the basis for delivery of evidence-based best nursing practices. Scholarship is an essential organizing construct for the curriculum and is evident in the strong emphasis on using empirical, personal, aesthetic, and ethical knowledge. Development of scholarly skills and use of knowledge derived from these skills are addressed in clinical and didactic courses.

**Leadership**

Leadership is essential for creating change within a society, organization, or health care system. Ultimately, leadership is about the capacity for vision and the wise use of power, authority, managerial skills, and influence to enable others to accomplish and sustain change. Change is an important concept based in knowledge of group process, organizational and systems theory, and leadership strategies. Influence comes in part from knowledge of the health care system’s structure and process, inter- and intra-professional issues, and public and private sector policies as they affect health care services. Influence also arises from interpersonal competence and knowledge of human relations theories. Leadership is necessary at all levels of the health care organization, including at the level of patient care, where it is seen in autonomy and accountability of practice, grounded in specialized practice knowledge. Leadership is fundamental to providing equitable health care for all people.

Thus, the three major constructs—clinical practice, scholarly inquiry, and leadership—reinforce each other, true to the nature of knowledge in advanced nursing practice, and provide the organizing framework for the master’s objectives and outcomes.

**Master’s-Level Outcomes**

Upon completion of the Master of Science in Nursing Program, graduates will have the requisite skills and knowledge to accomplish the following:

**CLINICAL PRACTICE**

1. Provide evidence-based care integrating holistic perspectives and ethical factors at the advanced practice level specific to the specialty area.
   - Employ appropriate methods/strategies/technologies to gather relevant data from multiple sources.
• Analyze and synthesize data to identify and prioritize problems.
• Develop and implement management plans using best available evidence, and evaluate outcomes and modify management plans accordingly.

2. Engage in scholarship.
3. Critically evaluate clinical evidence from multiple sources (such as current literature, clinical, and patient) to derive implications for best practices.
4. Identify clinical challenges and gaps in knowledge, and participate in scholarship to improve health care.
5. Apply clinical scholarship to improve outcomes in health care.

SCHOLARSHIP
1. Engage in scholarship.
2. Critically evaluate clinical evidence from multiple sources (such as current literature, clinical, and patient) to derive implications for best practices.
3. Identify clinical challenges and gaps in knowledge, and participate in scholarship to improve health care.
4. Apply clinical scholarship to improve outcomes in health care.

LEADERSHIP
1. Provide professional advanced practice nursing/midwifery leadership to improve patient outcomes and shape health care systems.
2. Demonstrate professionalism and integrity in interactions with patients, colleagues, and systems.
3. Collaborate with colleagues and patients to improve access to and quality of health care.
4. Act as a catalyst for assuring access to timely, quality health care for all people irrespective of race, ethnicity, gender, or social status.
Yale School of Nursing is within one of the world's most distinguished research universities and proud of its role in advancing scientific knowledge. From the time it was founded, the School has expanded its research and scholarship portfolio by educating nurse leaders and researchers who will affect population health outcomes, demonstrate the highest standards of excellence in research, and innovate evidence-based approaches to health care delivery.

Research at Yale School of Nursing has a sterling history, and our faculty continue to produce research and scholarship that shape and improve clinical practice in meaningful ways. YSN faculty lead research across a wide range of clinical areas, from chronic disease management, including HIV/AIDS, diabetes, and cancer; to pregnancy and early childhood outcomes, including pregnancy and birth outcomes, and adolescent parenthood; and more, including toxic stress, palliative care, and sleep science. Regardless of clinical area, our faculty approach research and scholarship through the lens of addressing health inequities and improving social determinants of health, and this research consistently produces new knowledge that informs health policy as well as global and planetary health. Nursing research at Yale continues to evolve as new areas of science are identified: most recently, YSN faculty quickly organized to identify and launch new nursing research efforts in response to the COVID-19 pandemic of 2020.

Nursing faculty, doctoral students, and postdoctoral fellows collaborate with researchers from other professions and disciplines. With transdisciplinary colleagues, nursing faculty are conducting leading-edge translational research to address the most pressing needs of vulnerable people in the community. Key partners include the Yale Center for Clinical Investigation (YCCI) – Yale’s Clinical and Translational Science Award – through YCCI’s community outreach and engagement core, as well as the Center for Interdisciplinary Research on AIDS (CIRA), Yale Child Study Center, Yale Cancer Center, and Yale Institute for Global Health (YIGH). Yale School of Nursing nurse researchers serve as leaders and team members in these multidisciplinary and multisite endeavors. The scope of these projects is often much larger than single-site or single-investigator studies. The promise of these larger studies is a greater impact on the health and well-being of vulnerable populations.

Yale School of Nursing is committed to advancing research and scholarship through active mentorship and provision of support services throughout all phases of proposal development, conduct of research, and dissemination of results. An active academic community is the foundation for making progress toward fulfilling the School’s mission of “better health for all.”
Yale School of Nursing has a long history of and commitment to faculty practice and the provision of direct health care services to the community. Most of our faculty maintain a clinical practice and consult with community-based organizations or nursing systems organizations. As part of our legacy, YSN makes a positive impact in every community where there are YSN students, graduates, or faculty.

For more than ninety-five years, YSN has had a tremendous impact on the health of individuals and families in our local community. YSN faculty have spearheaded the development of new strategies to minimize the effects of diabetes and the HIV/AIDS epidemic. Examples of new models of care that faculty have developed and implemented include an evidence-based home visitation program, Minding the Baby®; and a program to improve the management of sleep deficiency for those suffering from acute and chronic conditions, especially in populations from underserved communities.

YSN has long been committed to developing partnerships with community agencies and organizations. In response to the health care needs of women, faculty established a Women’s Health and Midwifery practice, which provides comprehensive health, labor, and birth services for women in the Greater New Haven area. YSN has been a consistent collaborating partner with the Yale School of Medicine in supporting a student-run clinic, the Haven Free Clinic. Haven Free Clinic plays an important role in improving health of the underserved and uninsured of the greater New Haven region by providing primary care services. Another partnership is with Cornell Scott-Hill Health Center, Connecticut’s first federally qualified community health center, to provide midwifery and women’s health, HIV, and psychiatric mental health services. This crucial relationship provides health care access to people who are medically underserved. Similarly, our faculty are committed to providing health care to key populations through grant opportunities to provide primary care services and graduate residency training experiences in partnership with Community Health Center, Inc.

The Clinical Support Unit at YSN is an established unit with APRNs representing the master’s program specialties and administrative staff. This unit dedicates its efforts to securing the very best clinical placements for students and matching the student and preceptor based on important learning factors as well as understanding students’ training needs.
GLOBAL HEALTH

The Yale School of Nursing’s Office of Global Health (OGH) promotes education and engagement in activities that advance population-level improvements in health of communities around the world. As the central coordination point for all international activities at YSN, OGH develops and organizes educational programming on topics related to global health and serves as the liaison office for the wide array of activities and opportunities offered through the Yale Institute for Global Health. Faculty, staff, and students can access OGH for advice on ideas involving global-focused service or local and international scholarly activities. In cooperation with the Office of Research, the OGH offers consultation to YSN faculty regarding their interests in or plans to conduct research that involves international engagement. OGH also helps to facilitate successful engagement of partners to collaborate and support faculty research. The office also oversees the Global Health Track: see Global Health Track under Curriculum in the chapter Master’s Program (M.S.N.). The OGH is led by the associate dean for global health and equity.
The Yale School of Nursing is committed to the confluence of research, practice, and education. The faculty believes in practicing what it teaches, and teaching what it practices. As a result, students have the unique opportunity to work alongside clinically active faculty members, senior nurse researchers, and experts in health care policy.

The School offers a master’s program with nurse practitioner and nurse-midwifery specialties, and students may enter the master’s program without previous education in nursing. The majority of current students enroll with an educational background in a liberal arts discipline, and the diverse mix of experience is an asset to our students. The three-year Graduate Entry Prespecialty in Nursing (GEPN) program is designed to provide graduate-level nursing education for those who hold baccalaureate degrees, but who have no previous nursing education.

Students who currently hold a license as a registered nurse can complete their master’s education in two years. An innovative curricular redesign, launched in 2017, brought renewed focus to concepts of social justice, health equity/disparity, population health, diversity/inclusiveness, and quality. For further information see Master in Nursing Specialties (under Curriculum), in the chapter Master’s Program (M.S.N.).

Post-master’s education is available in five areas: adult/gerontology acute care, family, pediatric acute care, pediatric primary care, and psychiatric–mental health. Application and curricular specifics for each offering are found in the chapter Post-Master’s Certificates.

A doctoral study program was launched in 1994 with the Doctor of Nursing Science program and was converted to a Ph.D. program in 2006, residing in the Yale Graduate School of Arts and Sciences. The program’s goal is to prepare expert nurse scholars in understanding health care issues and delivery while advancing the development of nursing knowledge. Upon completion of the program, students are expected to design and conduct research relevant to nursing practice; extend the theoretical base of nursing through empirical investigation; test conceptual models and theories that are derived from the knowledge of nursing and related disciplines; assume leadership roles in the profession and health care systems; and disseminate knowledge generated by independent, collaborative, and multidisciplinary research. The doctoral program is typically completed in four to five years of full-time study. A full description of the program can be found in the chapter Doctor of Philosophy Program.

The Doctor of Nursing Practice (D.N.P.) programs, while distinct, offer opportunities for interprofessional collaboration within YSN’s unique learning environment. The two programs are: (1) Health Care Leadership, Systems, and Policy D.N.P.; and (2) Clinical D.N.P. The Health Care Leadership, Systems, and Policy D.N.P. is designed for mid-career nurses who wish to build upon their previous education and professional experience to lead organizations that determine health care practice, education, and policy. The Clinical D.N.P. program is designed for advanced practice nurses working in clinical settings and desiring knowledge and skills to translate evidence and improve quality of care and patient outcomes within health care settings. Combining the Yale on-campus experience with online course work, the part-time, post-master’s
D.N.P. programs are tailored for nurses who have ongoing professional and clinical commitments. The programs are designed to be completed within two to three academic years. A full description of the programs can be found in the chapter Doctor of Nursing Practice (D.N.P.) Programs.

The courses of instruction and plans of study listed in this Bulletin are the official program and degree requirements for students matriculating at the Yale School of Nursing in the 2020–2021 academic year. However, the University reserves the right to withdraw or modify the courses of instruction and plans of study or to change the instructors at any time.
MASTER’S PROGRAM (M.S.N.)

Aims and Assumptions

The master’s curriculum is designed to offer students an opportunity to become prepared as practitioners in selected specialties and in evidence-based research so that they may assume roles as clinician-scholars. Nurses in advanced practice are professionals committed to the delivery and study of high-quality clinical service: responsible, accountable, and with the authority to help shape the health care system of the future. The program of study in the School is viewed as preparation for a variety of leadership roles.

The Yale School of Nursing admits both registered nurses who have a baccalaureate degree and college graduates with no previous nursing education. The graduate nurse moves directly into a chosen area of specialization. Students are expected to remain in the specialty to which they were accepted. The full-time student who is a registered nurse is expected to complete the requirements for the degree in two academic years; part-time study is also available. The Graduate Entry Prespecialty in Nursing (GEPN) for the college graduate who is not a nurse requires two terms and one summer session in addition to the two-year specialization sequence; full-time study is required for GEPN students throughout the prespecialty year.

The master’s curriculum places emphasis upon clinical competence and nursing scholarship. Each student is educated to function in an expanded role in the specialty area of the student’s choice. Employers recognize the superior preparation Yale School of Nursing graduates receive and actively seek to recruit them.

Requirements for the Degree

The degree of Master of Science in Nursing (M.S.N.) is conferred upon students who have satisfactorily completed the chosen course of graduate study at Yale and have met the other conditions prescribed by the School of Nursing. To be eligible for the degree, students in the Graduate Entry Prespecialty in Nursing (GEPN) must (1) successfully complete all prespecialty courses, (2) pass the National Council Licensure Examination—Registered Nurse (NCLEX-RN), which is taken upon completion of the prespecialty year, and (3) successfully complete all specialty M.S.N. courses. Students who are registered nurses satisfactorily complete a program of study to be eligible for the degree.

Transfer credits are not accepted; however, selected courses may be waived based on review and approval by faculty.

One hour of credit per term is given for each hour of classroom work per week; one hour of credit per term is given for three hours of clinical work per week.

General Enrollment Information

New students are enrolled in the School of Nursing only once per year (in August).

All students are required to maintain active Connecticut R.N. licensure and Basic Life Support (BLS) for the Healthcare Professional certification through the American Heart
Association while enrolled in the School of Nursing. GEPN students are to obtain their Connecticut R.N. license during the first term of their specialty year.

- Full-time study is required for students in the Graduate Entry Prespecialty in Nursing program (GEPN).
- R.N.s may apply for full-time or part-time study.

Students who wish to change from full-time to part-time status, or vice versa, must request this change and seek approval from their specialty director and follow instructions as per YSN’s part-time policy for M.S.N. and Post-Master’s Certificate students. The course schedule for part-time study is predetermined and dependent upon the specialty. General descriptions of the part-time study schedule can be obtained from the School’s website or specialty director.

Admission Requirements and Application Procedures for the Master’s Program

The minimum requirement for admission to the Graduate Entry Prespecialty in Nursing (GEPN) is a baccalaureate degree from an accredited college or university. No specific major is required, but collegiate courses in human anatomy, human physiology, statistics, and biophysical sciences are strongly recommended.

The minimum requirement for admission to the Master of Science in Nursing (M.S.N.) for registered nurses includes a baccalaureate degree from an accredited college or university and graduation from a school of nursing approved by the licensing board of the state in which it is located. A course in statistics and research methods is recommended, but not required. Additionally, at least one year of professional nursing experience is highly recommended. Applicants must be licensed to practice nursing in at least one U.S. state. If the applicant is a new graduate, steps to obtain a Connecticut R.N. license must be in process at the time the applicant enters the program and must be completed no later than November 1. For additional information on admission standards, see Technical Standards for Admission and Progression in the chapter YSN Student Policies and Guidelines.

The following application materials are required:

1. Online application form
2. Nonrefundable application fee ($100)
3. Résumé/curriculum vitae
4. Personal statement/essay
5. One unofficial transcript from each college or university attended uploaded to the application portal. If admitted, applicants will be required to submit one official transcript from all colleges and universities attended. Applicants with an international degree transcript must submit a course-by-course evaluation conducted by a credentialing agency such as World Education Services [www.wes.org] or Educational Credential Evaluators [www.ece.org]. In addition, if a transcript is issued in a language other than English, it must be accompanied by an English translation.
6. Three letters of recommendation (academic and professional)
7. Graduate Record Examination (GRE) General Test (see below for additional information).
8. TOEFL or IELTS scores for applicants whose native/primary language is not English (see below for additional information)

Application information is available online at https://apply.nursing.yale.edu/apply. Program information can be obtained by visiting http://nursing.yale.edu/admissions; or by contacting the Office of Admissions at ysnadmissions@yale.edu.

The deadline for GEPN and R.N. M.S.N. applicants is November 1.

Applications will be reviewed only if all application materials, including official GRE scores, are received by the above deadline. It is the applicant's responsibility to ensure that all materials are received by the Office of Admissions in a timely manner. Incomplete applications or applications submitted after the November 1 deadline will not be forwarded to the Admissions Committee for consideration.

Following the initial review of written credentials, qualified applicants are asked to participate in a virtual interview with a faculty member. Interviews are generally held in January. Please visit the School's website for details on interview dates.

Admission decisions are based upon a number of variables, which include evidence of motivation, academic ability, personal understanding of and propensity for advanced practice nursing, letters of recommendation, and potential for continued constructive use of the professional education. For clinical placement purposes, all accepted applicants will be required to undergo a background check before enrolling in the fall.

REAPPLICATION POLICY

Applicants to the Yale School of Nursing who have applied three times to the same program without an offer of admission will not be allowed to apply to that program again. Note: Programs that result in conferral of an identical degree are considered the same (GEPN and M.S.N.).

GRADUATE RECORD EXAMINATION

Applicants are required to take the General Test of the Graduate Record Examination (GRE). Test scores must be submitted electronically by the Educational Testing Service. The YSN GRE code is 3998. Scores that are more than five years old are not acceptable. The GRE requirement may be waived for applicants who hold both a bachelor's degree with a minimum 3.2 GPA and a master of science or doctoral degree with a minimum 3.5 GPA. Please contact the Office of Admissions for additional details.

GEPN and R.N. applicants must take the GRE prior to the November 1 application deadline. In most cases, computer-based testing has replaced the paper format and can be scheduled year-round in the United States. International students must plan carefully, as the GRE may only be offered once a year in a specific country. It takes approximately 7–10 business days from the date of a computerized administration for the official transcript of GRE scores to reach the School. Paper-based GRE results may take two months to reach the School. Prompt arrangements for taking this examination should be made in order to meet the application deadlines for receipt of scores.
Examinations are scheduled at specific times in centers located throughout the United States and many other countries. Information about the examination may be obtained by visiting www.ets.org/gre; by contacting Graduate Record Examinations, Educational Testing Service, PO Box 6000, Princeton NJ 08541-6000; or by telephoning 609.771.7670.

ENGLISH AS A FOREIGN LANGUAGE

All applicants whose native/primary language is other than English must take the Test of English as a Foreign Language (TOEFL) or the academic version of the International English Language Testing System (IELTS). Applicants with degrees from Australia, Canada (with the exception of Quebec), New Zealand, Singapore, Ireland, and the United Kingdom are exempt from taking the English proficiency exam. The following scores are required for admission to any programs at Yale School of Nursing:

Test of English as a Foreign Language (TOEFL) minimum score: 100/120 total, with minimum section scores of Reading, 22/30; Listening, 22/30; Writing, 22/30; and Speaking, 24/30.

International English Language Testing System (IELTS) minimum score: Band 7.0/9.0 total, with no section score below Band 6.5/9.0.

Arrangements to take the TOEFL must be made online at www.ets.org/toefl.

Arrangements to take the academic IELTS must be made online at www.ielts.org.

It typically takes a month from the date of administration for the official transcript of scores to reach the School. Prompt arrangements for taking an English examination should be made in order to meet the appropriate application deadline for receipt of scores.

COMMISSION ON GRADUATES OF FOREIGN NURSING SCHOOLS (CGFNS) EXAMINATION

Prior to enrolling at the School, graduates of foreign schools of nursing must pass the CGFNS Qualifying Exam as well as the NCLEX-RN examination in order to become a registered nurse (R.N.) in the United States. Several states, however, do not require successful completion of the CGFNS Qualifying Exam in order to take the NCLEX-RN. Information on the CGFNS Qualifying Exam can be obtained from the United States Embassy, the nurses’ association in the foreign country of residence, or www.cgfns.org. Information on the NCLEX-RN examination is available online at www.ncsbn.org/nclex.

Curriculum

The master’s curriculum is organized by specialty. The first year of the Graduate Entry Prespecialty in Nursing is described separately.

All course descriptions are listed in numerical order in the chapter Courses. Courses designated “a” meet in the fall term. Courses designated “b” meet in the spring term. Courses designated “c” are yearlong courses. Courses designated “e” meet in the summer. Bracketed courses are not offered in the current academic year. The a/b/c course designations appear in the YSN bulletin only.
Required courses for each specialty are listed in the description of each specialty. The listings describe schedules for full-time study. The course plan for scheduled part-time study may be found online or obtained from the YSN registrar and specialty directors. The School reserves the right to offer course substitutions and to amend the overall curriculum.

Elective courses: Students may elect School of Nursing courses offered by specialties other than the one in which they are enrolled or by other schools or departments within Yale University, with the permission of the course instructor and their specialty director. The School of Nursing also offers electives and concentrations. More information can be found in the chapter Courses and in the sections on concentrations, below.

GRADUATE ENTRY PRESPECIALTY IN NURSING

The Graduate Entry Prespecialty in Nursing (GEPN) is a one-year, full-time course of study focused on preparation in evidence-based nursing, followed by two years of advanced practice specialty study. The first year of the program is designed to provide a solid foundation in nursing theory, nursing process, biological science, health assessment, and pharmacology. This content is integrated into the clinical experiences in medical-surgical, pediatric, psychiatric–mental health, maternal-newborn, and community health nursing and interprofessional collaboration in practice. The prespecialty year is completed full-time over the course of the fall, spring, and summer terms.

Upon completion of the prespecialty year, the student continues in the master’s specialty that was designated when accepted into the GEPN program. At this point, changes in specialty are not allowed.

The Certificate in Nursing is awarded upon successful completion of all required GEPN courses. The Certificate in Nursing satisfies Connecticut General Statutes requirements, allowing the student to become eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN). Students are required to pass the NCLEX-RN and submit proof of their Connecticut RN licensure by the last day of classes of the first term of their specialty program of study. The Certificate in Nursing and a license to practice nursing in Connecticut are two prerequisites for enrollment in the second term of the first specialty year.

1 For NURS 5140, NURS 5150, NURS 5180, and NURS 5190, students are divided into two groups and enroll in the spring or summer term as assigned.

**MASTER IN NURSING SPECIALTIES**

The master’s program is designed to prepare advanced practice nurses to provide high-quality evidence-based care, to engage in scholarly inquiry, and to be leaders in the profession. The first year includes assessment of clinical skill development, foundational knowledge in pathophysiology of common diseases, and principles of evidence-based practice. The final year provides advanced clinical management skills, role development, integration of practice and policy theory, and leadership. Students are expected to remain in the specialty to which they were accepted.

The specialties offered in the master’s program are (1) Adult/Gerontology Acute Care Nurse Practitioner; (2) Adult/Gerontology Primary Care Nurse Practitioner; (3) Family Nurse Practitioner; (4) Midwifery and/or Women’s Health Nurse Practitioner; (5) Pediatric Nurse Practitioner—Primary Care; (6) Pediatric Nurse Practitioner—Acute Care; and (7) Psychiatric–Mental Health Nurse Practitioner. Each student is assigned a faculty adviser who is a clinical expert in the student’s chosen field of specialization. Within the specialty area, emphasis is placed upon the development of clinical judgment. In addition to clinical experience, conferences with individual faculty advisers, group conferences with specialty faculty members, and courses presenting scientific data and content relevant to the specialty area provide opportunity for in-depth study. In their final year, students may also have an opportunity to pursue clinical concentrations in the areas of diabetes, oncology, and gender and sexuality health justice. Students will be required to have access to transportation for their clinical site placements, including sites away from the State of Connecticut.

The following is a list of core courses for all specialties of the master’s program. In addition, each specialty requires specific didactic and clinical courses, which are listed
in the plans of study for each specialty. Course descriptions can be found in the chapter Courses.

The required research methods and evidence-based practice course in the first year of specialization provides the foundation for evidence-based, patient-centered care.

The curriculum of specialties is intended to prepare students to apply for certification through credentialing agencies. Please note that there is no program in the nation that can meet each state’s individual certification requirements. The School recommends that students review all state requirements and consult their academic adviser to plan how they can meet those requirements while enrolled in the School.

Adult/Gerontology Acute Care Nurse Practitioner Specialty

The Adult/Gerontology Acute Care Nurse Practitioner (AGACNP) specialty prepares acute care nurse practitioners to assess and manage collaboratively the needs of patients who are acutely and critically ill across the full continuum of adult acute care services. The core body of knowledge provided in the specialty is derived from the full spectrum of high-acuity patient care needs. The population focus is adult/gerontology. The AGACNP curriculum is intended to prepare students to apply for Adult/Gerontology Acute Care Nurse Practitioner Certification through the American Nurses Credentialing Center and the American Association of Critical-Care Nurses.

In the first year of study, the focus is on history taking, physical assessment, differential diagnosis, diagnostic testing, pathophysiology, pharmacology, and management of patients. Courses in assessing the acutely ill individual, diagnostic reasoning, nursing theory, research, and statistics are also featured in the first year. Clinical conferences focus on the diagnosis and management of problems seen in acutely ill patients, as well as pharmacology.

During the final year of study, emphasis is placed on the differential diagnosis and management of complex problems seen in the acutely and critically ill patient population. Courses also include content on specialty pharmacology, health promotion, acute and chronic disease management, and the role of the nurse practitioner. Clinical placement sites expose the student to a variety of acute care settings and patient populations. Clinical conferences focus on the diagnosis and management of complex acute care problems.

AGACNP courses are only open to students enrolled in the specialty. Students from other specialties who are interested in taking an AGACNP specialty course must consult with the specialty director. A Post-Master’s Adult/Gerontology Acute Care
Nurse Practitioner Certificate option is also available (see the chapter Post-Master’s Certificates).

### YEAR ONE

#### Summer Term
- **NURS 6000** Advanced Health Assessment for Entering RN Students (incoming RNs only)

#### Fall Term
- **NURS 6010** Advanced Pathophysiology
- **NURS 7800** Advanced Health Assessment in Adult/Gerontology Acute Care
- **NURS 7810** Advanced Diagnostics in Acute Care
- **NURS 7820** Critical Care Clinical Immersion

#### Spring Term
- **NURS 6020** Advanced Pharmacology
- **NURS 6040** Statistics and Research for Evidence-Based Practice Nursing
- **NURS 7830** Pathophysiology and Management of Adult/Gerontology Acute Care Health Problems I
- **NURS 7840** Adult/Gerontology Acute Care Clinical Practice I
- **NURS 7880** Advanced Acute Care Pharmacology

- **NURS 6060** Promoting Health in the Community
- **NURS 7850** Pathophysiology and Management of Adult/Gerontology Acute Care Health Problems II
- **NURS 7860** Adult/Gerontology Acute Care Clinical Practice II

#### Spring Term
- **NURS 7870** Adult/Gerontology Acute Care Clinical Practice III

### Adult/Gerontology Primary Care Nurse Practitioner Specialty

The Adult/Gerontology Primary Care Nurse Practitioner (AGPCNP) specialty emphasizes primary care of the entire adult to older adult age spectrum from wellness to illness across a variety of health care settings. The population of AGPCNP practice includes young adults (late adolescents and emancipated minors), adults, and older adults. The AGPCNP curriculum is intended to prepare students to apply for Adult/Gerontology Primary Care Nurse Practitioner Certification through the American Nurses Credentialing Center or the American Association of Nurse Practitioners.

AGPCNP courses are only open to students enrolled in the specialty. Students from other specialties who are interested in taking an AGPCNP specialty course must consult with the specialty director.

Family Nurse Practitioner Specialty

The Family Nurse Practitioner (FNP) specialty emphasizes the primary care of newborns, infants, children, adolescents, adults, pregnant and postpartum women, and older adults within the context of family-centered care. The FNP curriculum is intended to prepare students to apply for Family Nurse Practitioner Certification through the American Nurses Credentialing Center or the American Association of Nurse Practitioners.

FNP courses are only open to students enrolled in the specialty. Students from other specialties who are interested in taking an FNP specialty course must consult with the specialty director. A Post-Master’s Family Nurse Practitioner Certificate option is also available (see the chapter Post-Master’s Certificates).

**Nurse-Midwifery Specialty**

The Nurse-Midwifery (NM) specialty is designed to prepare clinically competent midwives who provide family-centered primary health care to women across the lifespan. Clinical experiences with individuals and groups, incorporated throughout the two years, emphasize use of the midwifery management process as a framework to provide health care. Relevant research and concepts from midwifery, nursing, medicine, and the sciences are studied to provide a base of theory and rationale for clinical practice and primary care. Students are expected to examine their midwifery and nursing...
practice critically and to develop beginning skills in the evaluation of research methods and statistics. Leadership capabilities are emphasized.

Courses and clinical work focus on the independent management of the health care needs of woman and newborns. These needs include primary care, pregnancy, birth, postpartum, family planning, and gynecological care across the lifespan. Students learn collaborative, interdisciplinary management of the care of women and newborns with health complications. Clinical practice takes place within health care systems that provide for medical consultation, collaborative management, and referral in accord with the Standards for the Practice of Midwifery promulgated by the American College of Nurse-Midwives (ACNM). The curriculum meets the ACNM Core Competencies for Basic Midwifery Practice. Elective and independent study courses offer opportunities for students to pursue individual educational and professional goals. Completion of the NM curriculum qualifies students for the national certification examination offered by the American Midwifery Certification Board (AMCB).

Nurse-Midwifery courses are only open to specialty students admitted to the Nurse-Midwifery (NM) specialty. Students from other specialties who are interested in taking a Nurse-Midwifery specialty course must consult with the specialty director.

Students admitted to the NM specialty may choose to complete the master’s degree and pursue the Nurse-Midwifery/Women’s Health Nurse Practitioner dual specialty; or students may choose to pursue only the Nurse-Midwifery specialty or only the Women’s Health Nurse Practitioner specialty. If students choose to complete both specialties, they will incur additional tuition charges and may require additional time to complete the program based on clinical site placement availability (see the chapter Educational Expenses and Financial Aid).

The NM program of study is fully accredited by the Accreditation Commission for Midwifery Education (ACME), www.midwife.org/Accreditation; and by the Commission on Collegiate Nursing Education (CCNE) of the American Association of Colleges of Nursing, www.aacn.nche.edu/ccne-accreditation.

### Women’s Health Nurse Practitioner Specialty

The Women’s Health Nurse Practitioner (WHNP) specialty prepares students for the role of a patient-centered primary health care provider who focuses on gender-related health care needs. WHNP students are prepared to care for women from adolescence through their later life, with expertise in gynecology, prenatal care, and primary care. They are also prepared to provide sexual and reproductive-related health care to men and patients across gender identities. Relevant research and concepts from nursing, midwifery, medicine, the sciences, and the humanities provide a base for classroom education and clinical practice. Clinical practice experiences take place across a variety of outpatient health care systems from community health centers to public and private women’s health and primary care offices.

WHNP courses are only open to students enrolled in the specialty. Students from other specialties who are interested in taking a WHNP specialty course must consult with the specialty director.

## Nurse-Midwifery and Women's Health Nurse Practitioner Dual Specialty

Students applying to YSN may pursue the NM program, the WHNP program, or the dual NM/WHNP program. WHNP students cannot make changes to their specialty selection once admitted into the program. Students admitted to the GEPN program as NM or dual NM/WHNP must declare their decision to pursue the dual NM/WHNP program prior to the start of the specialty years and are not permitted to join the dual program during their specialty years of study. Students who are accepted into the dual program will pay an additional tuition, split over four terms, beginning in the fall of the first specialty year (see the chapter Educational Expenses and Financial Aid). In addition, students will need to be enrolled in an extra term, usually but not always completed during the summer, in order to complete both specialties. Graduation in
May of the second specialty year cannot be guaranteed. It will be influenced by the availability of clinical sites and student flexibility in clinical placements.

NM/WHNP courses are only open to students enrolled in the dual specialty program. Students from other specialties who are interested in taking an NM/WHNP specialty course must consult with the specialty director.

Clinical courses may be taken in a different term depending on clinical site availability.

**Pediatric Nurse Practitioner – Acute Care Specialty**

The Pediatric Nurse Practitioner – Acute Care (PNP-AC) specialty prepares graduates for the advanced practice role of providing complex, comprehensive care to infants, children, adolescents, and young adults. With a foundation in primary care to more complex acute or chronic health conditions, there is an emphasis on integrating current evidence-based research, family-centered care, and cultural humility into clinical practice.

Each student, throughout the two years, provides acute, complex, and chronic illness health care for infants through adolescents in a variety of care settings, including pediatric intensive care units, inpatient settings, neonatal intensive care units, specialty clinics, and emergency departments. The PNP-AC curriculum is intended to prepare students to apply for Pediatric Nurse Practitioner Certification in acute care through the Pediatric Nursing Certification Board.

PNP-AC courses are only open to students enrolled in the specialty. This specialty is designed for entering R.N. students who hold a baccalaureate in any field and have one to two years of acute inpatient experience. The course plan for part-time study can be obtained from the specialty director. A Post-Master’s Pediatric Nurse Practitioner – Acute Care Certificate option is also available (see the chapter Post-Master’s Certificates).

Pediatric Nurse Practitioner—Primary Care Specialty

The Pediatric Nurse Practitioner—Primary Care (PNP-PC) specialty prepares graduates for expanded roles in the provision of primary care to children and adolescents. Courses focus on theories and clinical application related to health promotion, health and developmental assessment, pathophysiology, pharmacology, and management of common acute and chronic conditions in children and adolescents with a family-centered approach to care. There is an emphasis on the development of evidence-based research skills fundamental to advanced practice nursing.

Each student, throughout the two years, provides primary health care for children and adolescents in a variety of clinical settings, including community-based and private practices as well as school-based health centers. In addition, students select a specialty clinical rotation with relevance to pediatric primary care. In all clinical placements, the role of the PNP-PC as a member of an interdisciplinary team and coordinator across systems of care within the context of family is emphasized. The PNP-PC specialty curriculum is intended to prepare students to apply for Pediatric Nurse Practitioner Certification in primary care through the Pediatric Nursing Certification Board or the American Nurses Credentialing Center.

PNP-PC courses are only open to students enrolled in the specialty. Students from other specialties who are interested in taking a PNP-PC specialty course must consult with the specialty director. A Post-Master’s Pediatric Nurse Practitioner—Primary Care Certificate option is also available (see the chapter Post-Master’s Certificates).

**Psychiatric–Mental Health Nurse Practitioner Specialty**

The Psychiatric–Mental Health Nurse Practitioner (PMHNP) specialty prepares graduates for advanced practice providing psychiatric–mental health services to individuals across the lifespan and their family members in a variety of settings and roles. Courses focus on theories, research evidence, and clinical application related to mental health assessment and differential diagnosis, neurobiology, psychopathology, psychopharmacology, and psychotherapeutic modalities including individual, group, and family therapy. There is also emphasis on health promotion and risk prevention as students evaluate and monitor comorbid illnesses and conditions occurring with primary psychiatric diagnoses.

Each student, throughout the two years, provides a wide range of services in a variety of clinical settings, which may include acute emergency psychiatric services, community mental health centers, office-based and private practice, home-based
care, integrated psychiatric and primary care, substance abuse and forensic sites, and acute and long-term care facilities. Through application of evidence-based research skills, students evaluate systems of care, design evidence-based practice solutions, and work in collaboration with the multidisciplinary team. Upon completion of the required curriculum, students are prepared to apply for certification as a psychiatric-mental health nurse practitioner with a lifespan focus through the American Nurses Credentialing Center.

PMHNP courses are only open to students enrolled in the specialty. Students from other specialties who are interested in taking a PMHNP specialty course must consult with the specialty director. A Post-Master’s Psychiatric–Mental Health Nurse Practitioner Certificate option is also available (see the chapter Post-Master’s Certificates).

CONCENTRATIONS
Yale School of Nursing offers students the opportunity to specialize in a particular concentration area that further develops a clinical or conceptual interest. The four concentrations are: Diabetes Care, Gender and Sexuality Health Justice, Oncology, and Research. Upon completion of the concentration, students may be eligible for the certification exam in the area of the concentration.

Application
First-year specialty students in good standing, and with adviser approval, are encouraged to submit an online application to a concentration of their choice. Those interested are encouraged to visit the YSN website for concentration-specific information. Communication about concentrations and an opportunity to meet with the concentration coordinator are shared in the late summer/early fall. Enrollment is limited.

Concentration Fee
Due to the COVID-19 pandemic, students pursuing a concentration will not incur additional tuition charges in the 2020–2021 academic year. Starting with the 2021–2022 academic year, those pursuing a concentration will incur additional fees.

Diabetes Care Concentration
The Diabetes Care concentration consists of a series of courses that focus on advanced preparation in the subspecialty of diabetes care practice and management. It is designed for current M.S.N. students in their final year of study. Students are required to complete a series of didactic courses and a clinical practice course, which includes comprehensive management of diabetes patients.

The concentration is open to students in the Adult/Gerontology Acute Care Nurse Practitioner, Adult/Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Midwifery/Women's Health Nurse Practitioner, Pediatric Nurse Practitioner—Primary Care, and Pediatric Nurse Practitioner—Acute Care specialties. The concentration is designed to prepare specialists in these fields for practice in diabetes care and management.

All students in the concentration enroll in Advanced Concepts and Principles of Diabetes Care (NURS 6100), and Clinical Practice in Diabetes Care and Management (NURS 6110 and NURS 6111), which require four hours per week of clinical practice. The course work encompasses diabetes care, its complications across the lifespan, and the pathophysiology and management of type 1 diabetes, type 2 diabetes, monogenic forms of diabetes, and gestational diabetes. Concentration coordinator: Elizabeth Doyle
Gender and Sexuality Health Justice Concentration

The Gender and Sexuality Health Justice concentration is designed to educate current M.S.N. students in their final specialty year about the health disparities of LGBTQIA+ patients through a racial and economic justice lens. Students are taught about trans hormonal care, incarceration, substance use, and mental health issues in LGBTQIA+ communities. Upon completion of the concentration, students may be eligible to take the AAHIVM-specialist examination and be certified as buprenorphine-naloxone (suboxone) prescribers upon NP/CNM certification.

All students in this concentration are required to enroll in Gender and Sexuality Health Justice I, II, and III (NURS 6180, NURS 6190, and NURS 6200) and a clinical conference course (NURS 6202). Students may elect to enroll in the didactic courses only without applying to the concentration. Concentration coordinator: Ronica Mukerjee

Oncology Concentration

The Oncology concentration is designed to provide current M.S.N. students with a foundation of knowledge and skill for an advanced practice nursing role in the care of adults with cancer. Students are required to complete a series of didactic courses and a clinical experience. Opportunities for scholarly activities with faculty are available and encouraged.

The concentration is open to students in the Adult/Gerontology Acute Care Nurse Practitioner, Adult/Gerontology Primary Care Nurse Practitioner, and Family Nurse Practitioner specialties. Students in the Psychiatric–Mental Health Nurse Practitioner, Pediatric Nurse Practitioner—Primary Care, Pediatric Nurse Practitioner—Acute Care, and Women’s Health Nurse Practitioner specialties must obtain permission from the concentration coordinator prior to applying to ensure placements are available. The concentration is not available to Nurse-Midwifery or Nurse-Midwifery/Women’s Health Nurse Practitioner students.

Students are required to enroll in Principles of Advanced Oncology Practice (NURS 6120), Advanced Management of Clinical Problems in Oncology (NURS 6130 and NURS 6131), and Clinical Practicum for Oncology Nurse Practitioners (NURS 6140 and NURS 6141) in their final year. Concentration coordinator: Marianne Davies

Research Concentration

The Research concentration is designed to further expose current M.S.N. students to nursing research and foster an interest in future doctoral study. The concentration includes a seminar in which students learn how to review the literature and develop a preliminary proposal that can be used in their application to a Ph.D. program. The concentration includes a research practicum in which students work on faculty research to gain research skills. All students in this concentration enroll in two approved graduate-level Research Seminar courses, which include a research practicum (NURS 6150 and NURS 6160).

The research practicum allows students the opportunity to work on faculty research to gain research skills. The research practicum is an equivalent of three hours per week.
participating in a faculty member’s ongoing research (45 hours/term). The faculty member will assist the student in preparing goals and objectives for the experience and meet with the student at a minimum of every two weeks for research mentoring and supervision.

The concentration is open to M.S.N. students in their final year of study. Concentration coordinator: Margaret Grey

GLOBAL HEALTH TRACK
The Global Health track is designed to prepare students to serve global populations both internationally and domestically as clinicians, educators, scholars, and policy makers. In the track, students are exposed to a range of global health concepts through interdisciplinary didactic course work and through their global health clinical and scholarly activities. All students in the track take two approved graduate-level courses in global health from a preselected list curated from Yale schools or departments. Students must also complete a minimum of 60 additional clinical hours either in an international setting with YSN-approved preceptors or in a domestic site serving global populations by enrolling in Clinical Practice I and II for Global Health Track (NURS 6230 and NURS 6240).

Domestic experiences with local resettlement and reintegration organizations are also available as clinical opportunities. These experiences include developing and presenting educational programs to groups of refugees, immigrants, or asylum seekers; creating training materials for resettlement agencies; or serving as a cultural companion or health navigator for newly arrived families.

The track is open to students in their first year of specialty study in the M.S.N. program. Enrollment is limited. Students are encouraged to complete a track application in the fall term of their first specialty year. Specialty faculty recommendation is required. Students are also strongly advised to discuss their interests with the YSN global health clinical coordinator or the associate dean for global health and equity prior to applying to the Global Health track. Track coordinator: Patricia Ryan-Krause

Joint Degrees

JOINT DEGREES IN NURSING AND DIVINITY
In recognition of the relationship between nursing and religious studies, the Yale School of Nursing and the Yale Divinity School offer a joint-degree program in nursing and divinity. This option, established in 2003, is especially oriented to individuals who wish to combine careers in advanced nursing practice and social ministry that might involve direct practice, planning, and policy making and religious ministry in a variety of health care systems. There are two joint-degree options between the Divinity School and the School of Nursing. The first option, a joint degree leading to the Master of Science in Nursing (M.S.N.) and the Master of Arts in Religion (M.A.R.), requires three years of study (four years for students in the Graduate Entry Prespecialty in Nursing [GEPN]). The second option, a joint degree leading to the M.S.N. and Master of Divinity (M.Div.), requires four years of study (five years for GEPN students) and is designed for those students who wish to prepare for the lay or ordained ministries of Christian churches. Admissions decisions are made independently by the Divinity
School and the School of Nursing. Students are required to apply simultaneously to both schools. Applicants must indicate on each application form that they are applying to the joint-degree program. This joint-degree program is not open to YSN students enrolled in or applying to the Midwifery/Women's Health Nurse Practitioner specialty. All applicants must meet with the associate dean of student life and the specialty director prior to applying to discuss the feasibility of the program of study. More information, including the Joint Degree Agreement between the Yale School of Nursing and the Yale Divinity School, can be found at [https://nursing.yale.edu/admissions/how-apply/joint-degrees](https://nursing.yale.edu/admissions/how-apply/joint-degrees).

**JOINT DEGREES IN NURSING AND PUBLIC HEALTH**

Recognizing the relationship between nursing and public health, the Yale School of Nursing and the Yale School of Public Health offer a joint-degree program in nursing and public health. This option, established in 1997, is especially oriented to individuals who wish to combine careers in advanced nursing practice and public health that might involve direct practice, planning, and policy making in a variety of health care systems in the public health sector. The joint-degree program requires three years of study (four years for students in the Graduate Entry Prespecialty in Nursing) and awards a Master of Science in Nursing (M.S.N.) and a Master of Public Health (M.P.H.). Admissions decisions are made independently by the School of Public Health and the School of Nursing. Students are required to apply simultaneously to both schools. Applicants must indicate on each application form that they are applying to the joint-degree program. This joint-degree program is not open to YSN students enrolled in or applying to the Midwifery/Women's Health Nurse Practitioner specialty. All students are required to begin their first academic year at the School of Public Health. More information, including the Joint Degree Agreement between the Yale School of Nursing and the Yale School of Public Health, can be found at [https://nursing.yale.edu/admissions/how-apply/joint-degrees](https://nursing.yale.edu/admissions/how-apply/joint-degrees).

**M.S.N./PH.D. JOINT-DEGREE PROGRAM**

This joint-degree program, established in 2018, combines the two-year Master of Science in Nursing degree from the Yale School of Nursing and the Ph.D. in Nursing from the Yale Graduate School of Arts and Sciences. It allows students to complete requirements for both degrees in five years. Applicants for admission to the joint program must be admitted to both schools. Students typically enter the joint program at matriculation, but M.S.N. students who are completing the Research Concentration may apply to the Ph.D. program while enrolled in the fall of year two of the M.S.N. degree. Upon enrollment, the student is assigned a Ph.D. adviser who will work closely with the student to determine a plan of study, course selection (aligned with the student’s research interests), and the development of research ideas. The first two years of the program are spent in the School of Nursing, completing all requirements for the M.S.N. degree. In the second year, students will complete the Research Concentration, which provides mentored research experience and the development of a research proposal. The M.S.N. Research Concentration will fulfill one half of the first-term Research Assistantship in the Ph.D. program. Students are eligible to take Graduate School courses while enrolled at the School of Nursing, with up to three courses counting toward both degrees. One didactic or clinical course, aligned with the student’s proposed research topic, may count as a cognate course toward
the Ph.D. Students may have the opportunity to undertake additional mentored research experiences in the summers following years one and two, including research assistantship hours.

The minimum residence requirement in the program is five years. The tuition requirement is two years in the School of Nursing and three years in the Graduate School. Financial aid is awarded by each school according to its own criteria. While enrolled at the School of Nursing, students are eligible to compete for financial aid available to master’s students, but are not eligible for Graduate School aid. Once they have completed the M.S.N. degree and enroll in the Graduate School in year three, students in the joint-degree program receive a full doctoral financial aid package during those terms in which they are enrolled in the Graduate School, including up to three years of tuition, stipend, and a health award to cover the cost of Yale Health Hospitalization/Specialty Coverage. Students are expected to complete the joint-degree program within six years.

The M.S.N. and Ph.D. degrees are awarded separately, upon completion of the M.S.N. requirements (at the end of the second year of study in the M.S.N program by the School of Nursing), and upon completion of the requirements for the Ph.D. by the Graduate School of Arts and Sciences. To qualify for the M.S.N. and Ph.D. degrees, students must satisfy all degree requirements of both schools. Any exception to this pattern of study must be approved by the director of graduate studies and the appropriate associate dean.
POST-MASTER’S CERTIFICATES

Admission Requirements and Application Procedures

Requirements for admission include current Connecticut R.N. licensure, a baccalaureate degree from an accredited college or university, a master’s degree in nursing in a specialty area, and at least one year of post-master’s clinical nursing experience (preferred). Applicants to the Post-Master’s Certificate program must be licensed advanced practice nurses or certified nurse midwives. The duration of study for a post-master’s certificate for full-time study can be one or two years and is determined by the specialty directors, course requirements, and the incoming student’s graduate academic record. Part-time study is available; the duration of study is determined in the same manner as for full-time study. The Post-Master’s Certificate is available in five areas: adult/gerontology acute care nurse practitioner, family nurse practitioner, pediatric nurse practitioner—primary care, pediatric nurse practitioner—acute care, and psychiatric–mental health nurse practitioner.

The application procedures and deadlines are the same for both part-time and full-time study. The deadline for Post-Master’s Certificate applications is November 1.

The Post-Master’s Certificate admissions application is available online at https://apply.nursing.yale.edu/apply.

Program information can be found by visiting http://nursing.yale.edu/admissions; or by contacting the Office of Admissions, ysnadmissions@yale.edu.

The following materials are required:

1. Online application form
2. Nonrefundable application fee ($100) (Note: The application fee is waived for current YSN students.)
3. Résumé/curriculum vitae
4. Personal statement/essay
5. Current Connecticut R.N. licensure
6. One unofficial transcript from all colleges and universities attended. If admitted, applicants will be required to submit one official transcript from all colleges and universities attended. Applicants with an international degree must submit a course-by-course evaluation conducted by a credentialing agency such as World Education Services [www.wes.org] or Educational Credential Evaluators [www.ece.org]. In addition, if a transcript is issued in a language other than English, it must be accompanied by an English translation.
7. Three letters of recommendation (professional and academic)
8. TOEFL or IELTS for applicants whose native/primary language is not English (see below for additional information)

Applications will be reviewed only if all application materials are received on or before November 1. It is the applicant’s responsibility to ensure that all materials are
received by the Office of Admissions in a timely manner. Applications submitted late, or incomplete applications, will not be forwarded to the Admissions Committee for consideration.

Following the initial review of written credentials, qualified applicants are asked to participate in a virtual interview with a faculty member. Interviews are generally held in January.

Tuition is charged on a per-credit basis. For more information, see Tuition and Fees in the chapter Educational Expenses and Financial Aid.

**ENGLISH AS A FOREIGN LANGUAGE**

Applicants whose native/primary language is other than English must take the Test of English as a Foreign Language (TOEFL) or the academic version of the International English Language Testing System (IELTS). Applicants with degrees from Australia, Canada (with the exception of Quebec), New Zealand, Singapore, Ireland, and the United Kingdom are exempt from taking the English proficiency exam. The following scores are required for admission to the Post-M.S.N. program:

- Test of English as a Foreign Language (TOEFL) minimum score: 100/120 total, with minimum section scores of Reading, 22/30; Listening, 22/30; Writing, 22/30; and Speaking, 24/30.

- International English Language Testing System (IELTS) minimum score: Band 7.0/9.0 total, with no section score below Band 6.5/9.0.

Arrangements to take the TOEFL must be made online at [www.ets.org/toefl](http://www.ets.org/toefl).

Arrangements to take the academic IELTS must be made online at [www.ielts.org](http://www.ielts.org).

It typically takes a month from the date of administration for the official transcript of scores to reach the School. Prompt arrangements for taking an English examination should be made in order to meet the application deadline for receipt of scores.

**Adult/Gerontology Acute Care Nurse Practitioner**

The Post-Master’s Adult/Gerontology Acute Care Nurse Practitioner (AGACNP) Certificate option is intended to prepare the master’s-prepared clinical nurse specialist who desires formal education and clinical training in acute care in order to become eligible to apply for certification and advanced practice licensure as an adult/gerontology acute care nurse practitioner. The Post-Master’s Certificate option builds on the existing curriculum of the Adult/Gerontology Acute Care Nurse Practitioner specialty. Upon completion, students will be eligible to take the Adult/Gerontology Acute Care Nurse Practitioner examinations from the American Nurses Credentialing Corporation and the American Association of Critical-Care Nurses.

The plan of study includes all the required courses currently offered in the AGACNP specialty except for the statistics and research course. For purposes of student eligibility for certification, all AGACNP required courses must be taken at the Yale School of Nursing or challenged by either examination or demonstration of similar course
content in the student’s previous master’s program. A plan of study may be obtained from the specialty director.

Required courses for all post-master’s AGACNP students will be determined based on the incoming student’s graduate academic record.

**Family Nurse Practitioner**

The Post-Master’s Family Nurse Practitioner (FNP) Certificate option is intended to prepare the master’s-prepared clinical nurse specialist or nurse practitioner who desires formal education and clinical training in family-focused primary care in order to become eligible to apply for certification and advanced practice licensure as a family nurse practitioner. This Post-Master’s Certificate option builds on the existing curriculum of the Family Nurse Practitioner specialty.

The plan of study includes all the required courses currently offered in the FNP specialty except for the statistics and research course. For purposes of student eligibility for certification, all FNP required courses must be taken at the Yale School of Nursing or challenged by either examination or demonstration of similar course content in the student’s previous master’s program. Plans for full-time and part-time study may be obtained from the specialty director.

Clinical courses are supervised by the Family Nurse Practitioner Specialty faculty.

Required courses for all post-master’s FNP students will be determined based on the incoming student’s graduate academic record.

**Pediatric Nurse Practitioner – Acute Care**

The Post-Master’s Pediatric Nurse Practitioner – Acute Care (PNP-AC) Certificate option is intended to prepare the master’s- or doctoral-prepared advanced practice nurse—such as pediatric primary care nurse practitioner, clinical nurse specialist, neonatal nurse practitioner, or family nurse practitioner—who desires formal education and clinical training in caring for more acute, complex pediatric patients in order to become eligible to apply for pediatric nurse practitioner certification in acute care through the Pediatric Nursing Certification Board. This Post-Master’s Certificate option builds on the existing curriculum of the Pediatric Nurse Practitioner – Acute Care specialty and assumes that the entering student has a master’s degree in nursing and a specialty in some aspect of pediatric, family, or parent-child nursing.

The plan of study includes all the required courses currently offered in the PNP-AC specialty except for the statistics and research course. For purposes of student eligibility for certification, all PNP-AC required courses must be taken at the Yale School of Nursing or challenged by either examination or demonstration of similar course content in the student’s previous master’s program. A plan of study may be obtained from the specialty director.

Required courses for all post-master’s PNP-AC students will be determined based on the incoming student’s graduate academic record.
Pediatric Nurse Practitioner—Primary Care

The Post-Master’s Pediatric Nurse Practitioner—Primary Care (PNP-PC) Certificate option is intended to prepare the master’s- or doctoral-prepared advanced practice nurse—such as pediatric clinical nurse specialist, pediatric acute care nurse practitioner, neonatal nurse practitioner, or family nurse practitioner—who desires formal education and clinical training in pediatric primary care in order to become eligible to apply for certification and advanced practice licensure as a primary care pediatric nurse practitioner. This Post-Master’s Certificate option builds on the existing curriculum of the Pediatric Nurse Practitioner—Primary Care specialty and assumes that the entering student has a master’s degree in nursing and a specialty in some aspect of pediatric, family, or parent-child nursing.

The plan of study includes all the required courses currently offered in the PNP-PC specialty except for the statistics and research course. For purposes of student eligibility for certification, all PNP-PC required courses must be taken at the Yale School of Nursing or challenged by either examination or demonstration of similar course content in the student’s previous master’s program. A plan of study may be obtained from the specialty director.

Required courses for all post-master’s PNP-PC students will be determined based on the incoming student’s graduate academic record.

Psychiatric–Mental Health Nurse Practitioner

The Post-Master’s Psychiatric–Mental Health Nurse Practitioner (PMHNP) Certificate option is intended for the master’s or doctoral-prepared advanced practice nurse who desires formal education and clinical training as a Psychiatric–Mental Health Nurse Practitioner.

The Post-Master’s Certificate option builds on the existing curriculum of the Psychiatric–Mental Health Nurse Practitioner specialty. The plan of study includes all the required courses currently offered in the PMHNP specialty and is determined through completion of a gap analysis and review of the incoming student’s graduate academic record. A plan of study is available on the YSN website.

The Post-Master’s Psychiatric–Mental Health Certificate option is intended to prepare students to apply for certification as a psychiatric–mental health nurse practitioner with a life-span focus through the American Nurses Credentialing Center.
DOCTOR OF NURSING PRACTICE (D.N.P.) PROGRAMS

Aims and Assumptions

Yale School of Nursing’s founding dean, Annie W. Goodrich, wrote that nursing combines “the adventure of thought and the adventure of action.”\(^1\) The post-master’s Doctor of Nursing Practice (D.N.P.) programs, like the Yale Ph.D. and master’s degree programs, are built upon this rich history and tradition of encouraging innovative and progressive thought as a guide for adventurous action and practice. The Yale School of Nursing’s D.N.P. programs focus on vision and innovation. In the Leadership program the focus is on aggregates, systems, and health care organizations including executive leadership and policy. In the Clinical program the focus is on clinical practice innovation. Nursing practice, within these focal areas, provides for interventions that influence practice and health care outcomes for individuals and populations, administration of nursing and health care organizations, and the development and implementation of health policy.

\(^1\) Annie Warburton Goodrich, _The Social and Ethical Significance of Nursing_ (New York: Macmillan, 1933).

All competencies embody YSN’s philosophy that nursing has an ethical and social significance, and the curriculum is designed to prepare transformational executive, policy, and clinical leaders and innovators with the knowledge and skills to improve health care delivery and policies that are essential to insure patient-centered and culturally responsive clinical care, and safe, high-quality outcomes for diverse populations within and across health care systems and organizations.

The three-year part-time Leadership D.N.P. program is tailored for mid-career nurses who are in leadership trajectories in their careers. The two-year part-time Clinical D.N.P. program is geared toward clinically practicing advanced practice nurses. Both D.N.P. programs combine online course work with intensive on-campus experiences.

Upon completion of the YSN Leadership D.N.P. program, the graduate will demonstrate success in the areas of health systems services and leadership. Upon completion of the Clinical D.N.P. program, the graduate will demonstrate success in the areas of clinical innovation and practice change. Both programs focus on the competencies outlined in the American Association of Colleges of Nursing’s _D.N.P. Essentials_.

Admission Requirements

HEALTH CARE LEADERSHIP, SYSTEMS, AND POLICY D.N.P. PROGRAM

Applicants must hold a master’s degree in nursing or a related field (i.e., M.P.H., M.B.A., M.H.A.) and a current license to practice as a registered nurse in the United States. (Connecticut licensure is not required.) If the applicant’s bachelor of science degree is not in nursing, the master’s degree must be in nursing. Non-nursing master’s-
degree applicants are required to have a portfolio review to determine the number of additional practice hours that may be required.

A total of 1,000 practicum hours is required for a D.N.P. degree. Those who entered with a master’s degree in nursing generally earned a minimum of 500 clinical hours. Practice hours prior to entry into the D.N.P. program for those with a non-nursing master’s degree will be determined by (1) the number of faculty-supervised hours in a health care management or policy experience, and (2) the number of faculty-supervised hours in a management, policy, or administrative project or experience. Applicants who completed fewer than the hours needed to meet the required 1,000 hours must fulfill those hours through one or more of the following mentored/supervised leadership practica:

1. Mentored practicum: working with an experienced manager, administrator, or executive
2. Additional administrative systems/organizational activities, which are planned in collaboration with the faculty adviser, goal-defined, measurable, and appropriate to the systems/organization leadership role.

**Clinical D.N.P. Program**

Applicants must hold a master’s degree in nursing and a current license and certification to practice as an advanced practice nurse in the United States. *(Note: Connecticut licensure is not required if practicing elsewhere.)*

A total of 1,000 practicum hours is required for a D.N.P. degree. Advanced practice nurses enter with a minimum of 500 clinical hours from their M.S.N. program, which are applied toward the required total of practicum hours.

Hours for the Clinical D.N.P. program are accrued through mentored practica as a clinical leader/innovator with a population focus.

**Application Procedures**

The following application materials are required:

1. Online application form
2. Nonrefundable application fee ($100)
3. Current résumé/curriculum vitae
4. Personal statement/essay
5. One unofficial transcript from each college or university attended. If admitted, applicants will be required to submit one official transcript from all colleges and universities attended. Applicants with an international degree transcript must submit a course-by-course evaluation conducted by a credentialing agency such as World Education Services [www.wes.org] or Educational Credential Evaluators [www.ece.org]. In addition, if a transcript is issued in a language other than English, it must be accompanied by an English translation.
6. Three letters of recommendation (clinical, academic, and/or professional)
7. Scores from the Test of English as a Foreign Language (TOEFL) or the academic version of the International English Language Testing System (IELTS) are required of all applicants for whom English is a second language. Applicants with degrees
from Australia, Canada (with the exception of Quebec), New Zealand, Singapore, Ireland, and the United Kingdom are exempt from taking the English proficiency exam.

8. Applicants are required to upload an academic writing sample to the online application.

The Graduate Record Examination (GRE) is not required.

The application is available online at https://apply.nursing.yale.edu/apply. More information about the program can be obtained by visiting http://nursing.yale.edu/admissions; or by contacting the Office of Admissions at ysnadmissions@yale.edu.

The application deadline is January 15, 2021. It is the applicant’s responsibility to ensure that all materials are received by the Office of Admissions in a timely manner. Incomplete or late applications will not be forwarded to the Admissions Committee for consideration.

Students are admitted to degree programs without regard to their ability to pay. See the chapter Educational Expenses and Financial Aid.

D.N.P. Project

All students are required to complete a D.N.P. project. All D.N.P. projects must be evidence-based and may comprise executive leadership practice, systems/organizational clinical guidelines or clinical practice innovation projects, safety/quality projects, or policy analyses. The student will implement the evidence-based D.N.P. project in a final-year immersion experience.

Program Requirements

Requirements for the D.N.P. degree include successful completion of the courses listed in the curriculum templates below. The progression to graduation is contingent upon satisfactory completion of all courses, practica, a D.N.P. project, and a public presentation to the YSN community. Students must maintain a High Pass average to qualify for the final year. The D.N.P. programs use the same grading system as the rest of YSN’s programs.

**DOCTOR OF PHILOSOPHY PROGRAM**

**Aims and Assumptions**

The Yale University Ph.D. in nursing program educates students in research, scholarship, teaching, and health care policy. Under the guidance of the faculty, Ph.D. students engage in advanced study and generate new knowledge and ideas through research. They learn to disseminate this knowledge through scholarly publications, presentations, teaching, and leadership. Particular emphasis is placed on the development of scientific knowledge that is consistent with YSN’s mission of “better health for all people,” contributing to healthy lifespans, reducing health disparities, improving quality of care, and shaping health policy. The educational program is provided through formal course work, seminars, research assistantships, teaching fellowships, dissertation research, mentorship by faculty experts, and informal faculty and student interactions within the School of Nursing and throughout Yale University. Interdisciplinary study is encouraged, and students have access to the vast resources of the University as they complete their course work and dissertation research.

The Ph.D. program is administered by the Yale Graduate School of Arts and Sciences (GSAS). To receive admissions information, please contact the Office of Admissions at the GSAS at 203.432.2771 or at http://gsas.yale.edu/admission-graduate-school. More information about the program is available at https://nursing.yale.edu/academics/phd-program-nursing and http://gsas.yale.edu.

**Fields of Study**

Fields include chronic illness (diabetes, cardiovascular disease, cancer, HIV/AIDS); self- and family management; maternal and child health; sleep and sleep disorders; global health; health equity and care of vulnerable populations; acute and critical care; end-of-life and palliative care; genetic and environmental influences on health; gerontology and long-term care; and school- and community-based interventions.

**Special Admission Requirements**

Applicants should have a master’s degree in nursing, or the equivalent, including previous course work in statistics and graduate-level course work in research methods. The Graduate Record Examination (GRE) General Test is required. The Test of English as a Foreign Language (TOEFL) is required of all applicants for whom English is a second language. Samples of written work (e.g., published article, thesis, literature review) and a curriculum vitae are required. Qualified applicants will be invited for an interview with a member of the doctoral faculty.
# Special Requirements for the Ph.D. Degree

## COURSE WORK

Completion of fourteen core courses/seminars and four cognates in the student’s area of specialization (including one advanced analysis course) is required. Successful completion of the dissertation seminar (NURS 906 and NURS 907) every term is also required. The required core courses are:

<table>
<thead>
<tr>
<th>Course Code</th>

<td>Health Policy, Leadership, and Systems</td>
</tr>
</tbody>
</table>

The grading system includes Honors, High Pass, Pass, and Fail. Students must maintain a High Pass average and achieve a grade of Honors in at least two core courses to remain in good standing. High Pass is required in all core courses in the first year for a student to be eligible to take the Preliminary Examination. After the first year, no more than one grade of Pass in a core course will be permitted. A grade of Pass or better is required for all cognates, including the required advanced analysis course.

In addition to all other requirements, students must successfully complete NURS 929, Ethical Conduct of Clinical Research, prior to the end of their first year of study. This requirement must be met prior to registering for a second year of study.

## GRADUATE RESEARCH ASSISTANT AND TEACHING FELLOW EXPERIENCE

During the first two years of the program, students are Graduate Research Assistants with faculty mentors and participate in the mentor’s ongoing research.

Teaching experience is also considered to be an integral part of graduate education. Therefore, two terms as a Teaching Fellow are required. Teaching Fellows assist with
the teaching of larger master’s-level courses, typically during their third year of doctoral study.

EXAMINATIONS

Successful completion of three examinations is required.

1. The Preliminary Examination is taken in June after the first year of course work has been completed. A grade of High Pass or better in each core course is required. The Preliminary Examination is intended to allow the student to demonstrate mastery of doctoral course work. Passing the Preliminary Examination is a prerequisite for continuing in the second year of doctoral study.

2. The Qualifying Examination typically takes place at the end of the second year of study, when required course work is completed. If the Qualifying Examination is not completed by the end of the sixth term, the student will be placed on Academic Probation. If not completed by the end of the seventh term, the student will be dismissed from the program. The student prepares a comprehensive dissertation proposal containing a statement of the problem to be studied, conceptual framework, critical review of relevant literature, design, methods, and plan for analysis. The oral Qualifying Examination typically lasts 1 to 1.5 hours. The student gives a 15-minute formal presentation of the proposed study and answers questions regarding the research and related topics. Successful completion of the Qualifying Examination is required for candidacy for the doctoral degree.

3. The Final Oral Examination is based on the dissertation. The dissertation is intended to demonstrate that the student is competent in the chosen area of study and has conducted independent research. The Final Oral Examination typically lasts 1.5 to 2 hours. The student gives a 15- to 20-minute formal presentation of the dissertation and answers questions. Successful completion of the Final Oral Examination is required before the Ph.D. can be awarded.

Master’s Degree

M.Phil. This degree will be granted to Ph.D. students who successfully complete two years of course work, but do not progress to the dissertation stage. To be awarded the M.Phil. degree, students need to complete all core courses, four cognates (may include independent study with faculty), and two years of Graduate Research Assistant experience, and must pass the Preliminary Examination. This degree is normally granted only to students who are withdrawing from the Ph.D. program.
COURSES

NURS 903b, Research Methods III: Measurement of Health Variables  Jane Dixon
This course focuses on theory of measurement and reliability and validity of research
instruments—with emphasis on interaction of conceptual, methodological, and
pragmatic considerations. An integration of seminar and lecture is employed. Required
of all second-year Ph.D. students in nursing. Open to advanced graduate students in
other schools of the University. Three hours per week for seven weeks.  1 Course cr

NURS 904a, Research Methods IV: Mixed Methods  M. Tish Knobf
The purpose of this course is to provide an overview of mixed methods research. This
overview consists of the history, philosophical foundations, purpose, data collection,
analysis, and evaluation of the common mixed methods designs. Required of all Ph.D.
students in nursing. Three hours per week for seven weeks.  1 Course cr

NURS 905a, Research Methods V: Intervention Development  Lois Sadler
This seminar focuses on the research methods necessary for the understanding,
developing, and testing of interventions to improve outcomes in health and illness.
Content includes the use of various approaches to the development of biobehavioral
interventions. The second half of the module deals with methodological issues in
carrying out clinical intervention research. Required of all second-year Ph.D. students
in nursing. Open to others with permission of the instructors. Three hours per week for
seven weeks.  1 Course cr

NURS 906a, Dissertation Seminar I  Jane Dixon
This required doctoral course provides the student with advanced study and direction
in research leading to development of the dissertation proposal and completion of the
dissertation. Students are guided in the application of the fundamentals of scientific
writing and criticism. All Ph.D. students in nursing are required to take this seminar
every term. Three hours per month.  1 Course cr

NURS 907b, Dissertation Seminar II  Nancy Redeker
This required doctoral course provides the student with advanced study and direction
in research leading to development of the dissertation proposal and completion of the
dissertation. Students are guided in the application of the fundamentals of scientific
writing and criticism. All Ph.D. students in nursing are required to take this seminar
every term. Three hours per month.  1 Course cr

NURS 910a, Science, Scholarship, and Communication of Knowledge III
Margaret Grey
This is the third course in a four-course sequence designed to socialize the student into
the roles and responsibilities of a Ph.D.-prepared nurse scientist. Students develop
specific beginning competencies necessary to engage in a career as an independent
nurse scientist, including intermediate principles and processes of grant writing
and communicating research results. The NURS 908, 909, 910, 911 seminar series
accompanies the research practicum and is required of all Ph.D. students in nursing.
One hour every other week.  1 Course cr
NURS 911b, Science, Scholarship, and Communication of Knowledge IV  
Margaret Grey
This is the fourth course in a four-course sequence designed to socialize the student into the roles and responsibilities of a Ph.D.-prepared nurse scientist. Students develop specific beginning competencies necessary to engage in a career as an independent nurse scientist, including advanced principles and processes of grant writing and communicating research results. The NURS 908, 909, 910, 911 seminar series accompanies the research practicum and is required of all Ph.D. students in nursing. One hour every other week. 1 Course cr

NURS 916a, Advanced Qualitative Research Methods  
Holly Kennedy
This course provides the opportunity for doctoral students to engage more deeply in all aspects of qualitative research. Guided seminars examine methodological issues in qualitative research and explore emerging methodologies. Students gain knowledge in sampling strategies, data collection, analysis, and writing. Students gain skill with the ATLAS.ti software program to analyze data. This course is appropriate for Ph.D. students planning to employ qualitative methods in research. Three hours per week (two in class; one in project). 1 Course cr

NURS 922b, Introduction to Clinical Research Informatics  
Julie Womack
This course provides an introduction to informatics, focusing on clinical research informatics. There are lectures and discussion on data science and big data storage, including relational databases as well as some of the newer approaches to data storage. The course explores the use of the electronic health record as a source of data and investigates issues that impact data quality and analysis. It also covers data standards, metadata, and provenance, and it briefly introduces the uses of natural language processing, machine learning, data mining, and ontologies. Hands-on sessions include an introduction to Structured Query Language (SQL) and the use of SAS for visualizing data. Optional for second-year Ph.D. students. Open to others with permission of the instructor. 1 Course cr

NURS 941b, Health Policy, Leadership, and Systems  
Lisa Summers
The course addresses salient issues in health policy and the challenges to linking research and clinical care with public and private policy agendas. The course covers the following topics: health care delivery systems; policy and political factors that affect access to care and its financing, delivery, and quality; challenges to evidence-based policy and the dissemination of research findings to policy and community-based leaders. It also includes theories of leadership and policy change relevant to students’ research topics. Critical thinking, problem-solving skills, and research-based analysis are integrated throughout the course. A major written assignment suitable for submission to a peer-reviewed journal (or that can be easily modified for same) is a course requirement. Prerequisite: students must pass a test based on the online Yale University School of Nursing Health Policy Module. Required of all Ph.D. students in nursing. Three hours per week. 1 Course cr

NURS 5010a, Issues in Nursing  
Sarah Korpak
This course explores personal and professional issues affecting the ability of a nurse to deliver professional nursing care. Content includes ethical, legal, cultural, and other policy-related aspects of nursing practice. Required of all students in the prespecialty year. Two hours every other week. 1 Course cr
NURS 5030a and NURS 5031b, Biomedical Foundations of Health and Disease  
Sharen McKay  
This course is offered in the fall/spring terms of the first GEPN year. Lectures focus on the basic scientific principles of physiology and include an introduction to pathophysiology. Anatomical, biochemical, and developmental features are involved in discussion of the inseparable structural-functional relations within the human body. Topics include physiology, biochemistry, immunology, genetics, introductory embryology, and microbiology. In addition, the course addresses topics introduced in NURS 5160, NURS 5170, and NURS 5171. Required of all students in the prespecialty year, four hours per week. 3 Course cr per term  

NURS 5040a and NURS 5041b, Advanced Health Assessment  
Patrice O’Neill-Wilhelm and Kassandra August-Marcucio  
This course is designed to provide the student with the knowledge and skills needed to conduct a comprehensive health history and physical examination across the lifespan for the professional registered nurse (R.N.). Emphasis is on the assessment of physical, developmental, psychosocial (cognitive, affective, and behavioral), cultural, and spiritual dimensions of the client and/or families, as well as factors that influence behavioral responses to health and illness. Required of all students in the prespecialty year. 2½ Course cr per term  

NURS 5060a and NURS 5061b, Interprofessional Longitudinal Clinical Experience  
Linda Honan, Philip Martinez, Deborah Fahs, and Wendy Mackey  
The Interprofessional Longitudinal Clinical Experience (ILCE) is designed to prepare first-year health professional students to function effectively in the clinical environment. The ILCE is a foundational course on interprofessional education for students in the GEPN program to prepare them for their future roles as nurse practitioners or certified nurse-midwives. The structure and content of the curriculum are based on the needs of our current health care and academic environment. These include an increasingly complex and specialized health care system and national accreditation requirements. Patients have complicated psychosocial and medical problems that affect their health and that often require coordinated team care. And accreditation bodies require that trainees start learning about these complexities and have experiences learning together early in training. Yale School of Nursing faculty, in conjunction with Yale School of Medicine and Physician Associate program faculty, guide groups of students in planned interprofessional clinical experiences in a consistent clinical setting. Experiences are designed to help students begin to build a working knowledge of the clinical environment and health care organizations, and to learn with, from, and about each other through the activities associated with the ILCE program. Experiences also include planned group meetings designed to teach patient-and family-centered interviewing, physical examination skills, simulation, clinical reasoning, and oral presentation skills. Required of all students in the prespecialty year. 1 Course cr  

NURS 5090a, Introduction to Drug Therapy  
Lisa Meland  
Lectures focus on the appropriate clinical use of drugs. Emphasis is placed on pharmacology, side effects, pharmacokinetics, drug interactions, and the therapeutic use of medications across the populations. Required of all students in the prespecialty year. Integrated throughout the curriculum in the prespecialty year. 3 Course cr
NURS 5110a, Clinical Applications of Human Anatomy  Linda Honan, Philip Martinez, and Patrice O’Neill-Wilhelm

The effective assessment, diagnosis, and management of disease depend on knowledge of the structures of human beings. This introductory course reviews and discusses the structure and function of the major body systems. The aim of the course is to combine clinically relevant anatomical information with performance of clinical skills that will form the basis of clinical reasoning. Correlation of anatomical knowledge with clinical presentation both in the classroom and in the laboratory is emphasized. Required of all students in the prespecialty year. 2 Course cr

NURS 5140b, Clinical Practice in Maternal-Newborn Nursing  Sascha James-Conterelli and Erin Morelli

This course focuses on clinical practice essential to nursing care of women, newborns, and their families throughout the childbearing cycle and the neonatal period. Clinical settings include hospital and ambulatory care. 2 Course cr

NURS 5150b, Maternal-Newborn Nursing  Sascha James-Conterelli and Erin Morelli

This course presents theory essential to the provision of nursing care to childbearing families throughout the childbearing cycle, the neonatal period, and the pre- and interconceptional phases. Application of the nursing process as it relates to the promotion, maintenance, and restoration of health is emphasized. Required of all students in the prespecialty year. 2 Course cr

NURS 5160a, Clinical Practice in Medical-Surgical Nursing  Philip Martinez and Sarah Korpak

This course focuses on the scientific principles, psychomotor techniques, and communication skills fundamental to nursing practice. Sociocultural variations influencing patient care are introduced. Faculty guide small groups of students in individually planned clinical experiences that provide opportunities to use the nursing process in caring for the hospitalized adult with selected pathophysiological problems. Experience also includes weekly clinical conferences and selected observational experiences. Clinical experience twelve hours per week. 4 Course cr

NURS 5170a and NURS 5171b, Medical-Surgical Nursing  Linda Honan, Philip Martinez, and Deborah Fahs

This course focuses on the dynamic relationship between physical and psychosocial responses to pathophysiologial problems occurring in the hospitalized adult and older adults. Application of the nursing process as it relates to the promotion, maintenance, and restoration of health is emphasized. Required of all students in the prespecialty year. 2 Course cr per term

NURS 5180b, Clinical Practice in Pediatric Nursing  Wendy Mackey

Utilizing a family-centered approach, this course provides clinical experience in identifying and assessing children’s physiological and developmental needs, and planning, implementing, and evaluating a plan of nursing care to meet the needs of a particular child and the child’s family in health care settings. Students have opportunities to use principles of growth and development, knowledge of the child’s and family’s physical and emotional responses to illness, and principles of pediatric nursing in caring for children and their families. The student gains skill and knowledge in the nursing role and an appreciation for the importance of utilizing research findings in practice and collaborating with other health professionals. 2 Course cr
NURS 5190b, Pediatric Nursing  Wendy Mackey
This course presents theory essential to promote health and adaptation to illness for children and their families. Emphasis is placed on growth and development, as well as pathophysiological, social, environmental, and cultural factors that influence children’s and families’ response to health and illness. Required of all students in the prespecialty year.  2 Course cr

NURS 5200b, Clinical Practice in Psychiatric–Mental Health Nursing  
Dilice Robertson and Tina Walde
This course builds on skills learned in medical-surgical nursing by providing clinical experience in assessing, planning, implementing, and evaluating a plan of nursing care to meet the unique needs of patients with acute and chronic psychiatric disabilities across the lifespan. Students gain skills in the use of therapeutic communication, working with the interdisciplinary team, and implementing all phases of the nurse-patient relationship while applying concepts taught in NURS 5210.  2 Course cr

NURS 5210b, Psychiatric–Mental Health Nursing  Dilice Robertson and Tina Walde
In combination with NURS 5200, this seminar provides the foundations of understanding and treating psychiatric disabilities within a bio-psycho-social-spiritual-cultural-theoretical framework of health promotion and disease prevention related to both mental health and mental illness. Course content includes the pathophysiology, assessment, diagnosis, treatment, and evaluation of cognitive, perceptual, emotional, behavioral, and interpersonal symptoms associated with common psychiatric diagnoses for individuals with mental illness and their families across the lifespan. Students analyze the economic, legal, and ethical issues that influence care in a variety of settings. Four hours per week, first half of spring or summer term, as assigned.  2 Course cr

NURS 6000a, Advanced Health Assessment for Entering RN Students  
Nicole Colline
This course is required of all RNs entering the M.S.N. program regardless of specialty. It is conducted over the summer and designed to provide the student with the knowledge and skills needed to conduct a comprehensive health history and physical examination for the advanced practice registered nurse. Emphasis is on the assessment of physical, psychosocial (cognitive, affective, behavioral), spiritual, and cultural dimensions of the client, as well as factors that influence behavioral responses to health and illness. Normal/abnormal variations in physical exam findings and differential diagnoses are presented.  3 Course cr

NURS 6010a, Advanced Pathophysiology  Mary-Ann Cyr
This course provides students with advanced physiologic and pathophysiologic concepts central to understanding maintenance of health and the prevention and management of disease across the lifespan. Content on cellular function, genetics, immunology, inflammation, infection, and stress and adaptation provides the framework on which further specialty content knowledge is built. Current research, case studies, and application to advanced nursing practice are highlighted. This is a core course. Required of all M.S.N. students in the first year of specialization.  3 Course cr

NURS 6020b, Advanced Pharmacology  Elizabeth Cohen
This course is designed for APRN and master’s-level students to build upon their introduction to drug therapy course. Principles of pharmacology are presented through the study of pharmacokinetics and pharmacodynamics. Emphasis is placed on drug
categories, mechanisms of action, and side effects. Following initial content on general principles, applied interpretation of some of the most common clinical indications and considerations for prescribing are addressed. Student participation demonstrates understanding of clinical applications of pharmacologic principles and concepts. This is a core course. Required of all M.S.N. students in the first year of specialization. Two hours per week.  2 Course cr

NURS 6040b, Statistics and Research for Evidence-Based Practice Nursing
Robin Whittemore and Canhua Xiao
This course provides theoretical and practical experience in appraisal and application of research evidence into practice. The emphasis is on applying that knowledge to the critique of published research. This is a core course. Required of all M.S.N. students in the first year of specialization. Two hours per week and online modules.  3 Course cr

NURS 6050a, Transitions to Professional Practice  Holly Kennedy and Jonathan Johnson
Advanced practice nursing occurs in contexts that inevitably influence practice. This course provides students an integrative experience in applying health policy, organizational, regulatory, safety, quality, and ethical concepts to care. It provides the opportunity for students to explore the theoretical and practical considerations underlying the roles of advanced practice nurses (leader, educator, researcher, advocate, clinician, and consultant). The course is organized into modules incorporating the following content areas, explored utilizing a case-based approach: Regulation and Scope of Practice; Leadership and Organizational Dynamics; Health Care Access, Coverage, and Finance; Clinical Ethics; and Safety and Quality. This is a core course. Required of all M.S.N. students in the final year. This is a hybrid course that includes on-site interactive seminars as well as online asynchronous sessions. Group work and preparation are expectations outside of the classroom.  2 Course cr

NURS 6060a, Promoting Health in the Community  Veronica Barcelona and David Vlahov
This course is a synthesis and application of the process of health promotion, public health, community organization, and epidemiological principles. Emphasis is on prevention of disease, health maintenance, health promotion, and care of the sick within households, families, groups, and communities, across the lifespan. This is a core course. Required of all M.S.N. students in the final year. Two hours per week.  2 Course cr

NURS 6070a, Mental Health Management for Advanced Practice Nurses
Lindsay Powell
The focus of this course is to provide the foundation for management of commonly occurring mental health problems using the therapeutic relationship and basic models for intervention including stress management, crisis intervention, motivational interviewing, cognitive behavioral techniques, and pharmacotherapy. Diagnostic assessment, monitoring, and referral to specialty care and community resources are emphasized. Roles in management of commonly occurring mental health problems (anxiety, depression, sleep disturbance) and collaboration to manage severe and persistent mental illness (including schizophrenia, bipolar disorder, post-traumatic stress disorder, substance use and eating disorders) and referral to community and psychiatric resources are examined. Required of all adult gerontology primary care,
family, and midwifery/women’s health nurse practitioner students. Open to others with permission of the instructor. Two hours per week. 2 Course cr

**NURS 6080a, Master’s Independent Study**  Staff  
This elective study is initiated by the student and negotiated with faculty. The purpose is to allow in-depth pursuit of individual areas of interest and/or practice. A written proposal must be submitted and signed by the student, the faculty member(s), and the appropriate specialty director. Credit varies according to the terms of the contract. 1 Course cr

**NURS 6100a, Advanced Concepts and Principles of Diabetes Care**  Elizabeth Doyle  
This seminar focuses on the concepts and principles of diabetes managed care based on the annually updated American Diabetes Association Standards of Care. It includes principles of primary care (screening, early detection, intervention, and patient education), secondary care principles related to diabetes management (various treatment modalities, patient education, and self-care), and tertiary care related to complications. These concepts and principles of care are presented relative to type of diabetes (type 1, type 2, gestational, diabetes in pregnancy, and secondary), age, developmental stage, duration of disease, and ethnicity. A multidisciplinary approach to care issues is emphasized, incorporating the contributions of other disciplines in the collaborative management of diabetes. Important aspects of living with a chronic illness such as psychological, social, occupational, and economic are also emphasized. Required of all students in the diabetes care concentration in the final year. Two hours per week. 2 Course cr

**NURS 6110a and NURS 6111b, Clinical Practice in Diabetes Care and Management**  Elizabeth Doyle  
The focus of this practicum is comprehensive management of a caseload of patients with diabetes specific to the student’s elected specialty (adult/gerontology acute care, adult/gerontology primary care, family, midwifery/women’s health, and pediatric). The spring term is an extension of the fall and focuses on the management of common problems related to long-term diabetes complications, encouraging clinical decision-making and management of comorbidities. Student’s clinical practicum in diabetes care is in various settings specific to student’s specialty program. Required of all students in the diabetes care concentration in the final year. Four hours per week of practice required both terms. One and one-half hours of clinical conference per week. 1.65 Course cr per term

**NURS 6120b, Principles of Advanced Oncology Practice**  Marianne Davies  
This course introduces students to the principles of advanced oncology nursing practice. It focuses on (1) the problem of cancer—the epidemiology, biology, genetics, and immunology of cancer; (2) advanced practice nursing across the cancer care continuum (prevention, detection, diagnosis, treatment, chronic illness, and end of life), emphasizing nursing strategies for promoting patient- and family-centered care; and (3) the treatment of cancer, exploring the mechanisms of action, efficacy, and short- and long-term side effects of experimental and common traditional anticancer treatment modalities, as well as complementary, palliative, and supportive care. Required of all students in the oncology concentration in the first year of specialization. 2 Course cr
NURS 6130a and NURS 6131b, Advanced Management of Clinical Problems in Oncology  Marianne Davies
This course focuses on assessment and management of complex clinical problems of adults with cancer. The role of the advanced practice nurse and the use of clinical practice guidelines to support evidence-based practice are emphasized. Required of all students in the oncology concentration in the final year. Prerequisite: NURS 6120. 1 Course cr

NURS 6140a and NURS 6141b, Clinical Practicum for Oncology Nurse Practitioners  Marianne Davies
The goal of this practicum is to prepare students to comprehensively manage a caseload of adults with cancer. Emphasis is on anticipation of high-incidence clinical problems, development of clinical reasoning in assessment, differential diagnosis, and formulation of management strategies. The practice sites provide opportunities to understand cancer care along the trajectory of illness from diagnosis to death/bereavement, develop clinical leadership skills, and deliver high-quality supportive care to patients and families across the disease trajectory. Required of all students in the oncology concentration in the final year. Four hours per week of clinical experience plus one hour per week of clinical conference.  1½ Course cr per term

NURS 6150a, Research Seminar I  Margaret Grey
In this course, students are assigned to a research practicum experience, set goals for the research practicum with the faculty conducting the research, and identify barriers and facilitators to the conduct of research in health and illness. Students identify a clinical research problem and review the literature about the problem. Required of M.S.N. students in the research concentration. Open to other master’s students with permission of the instructor. 2 Course cr

NURS 6160b, Research Seminar II  Margaret Grey
In this course, students continue working on their research practicum experience, set goals for the research practicum with the faculty conducting the research, and identify barriers and facilitators to the conduct of health research. Students also develop a research proposal in their area of interest. Required of M.S.N. students in the research concentration. Open to other master’s students with permission of the instructor. 2 Course cr

NURS 6180b, Gender and Sexuality Health Justice (GSHJ) I  Ronica Mukerjee
This course is a foundational course designed to provide the student with an introduction to the social, racial, and economic disparities as well as the clinical care of LGBTQIA+ patients. The course is taught through the cultural safety framework in which students are asked to view patient care through the lens of addressing barriers to care including systems barriers, institutional barriers, as well as knowledge barriers to providing actual care. The role of the nurse practitioner/midwife as a member of the health care delivery team is emphasized. 2 Course cr

NURS 6190a, Gender and Sexuality Health Justice (GSHJ) II  Ronica Mukerjee
This is the second of three GSHJ courses that prepare future nurse practitioners/midwives for competence in common clinical issues seen in LGBTQIA+ patients and communities. Topics include HIV care, treatment of substance use disorders, and in-depth care for trans and MSM patients including pelvic and anal care. This course includes CMEs/CNEs in order to prepare students for either the American Academy
of HIV Medicine's professional certification or the HIV/AIDS Nursing Certification Board's certification.  2 Course cr

NURS 6200b, Gender and Sexuality Health Justice (GSHJ) III  Ronica Mukerjee
This is the third of three GSHJ courses that prepare future nurse practitioners for competence in common clinical issues seen in LGBTQIA+ patients and communities. Topics include in-depth primary care management of mental health issues and disorders experienced by LGBTQIA+ patients, and special considerations for lesbian, bisexual, queer, intersex, MSM, and asexual patients. (Trans patients are covered in GSHJ II). Substance Abuse and Mental Health Services Administration CMEs for treatment of mental health disorders are included in the curriculum to prepare students for the primary care of LGBTQIA+ students. 2.73 hours per week for 5.5 weeks.  2 Course cr

NURS 6202a or b, Gender and Sexuality Health Justice (GSHJ) Clinical  Ronica Mukerjee
This clinical conference course builds upon the experiences gained in first-year specialty clinical courses. This clinical provides students further opportunity to develop advanced nursing skills with LGBTQIA+ patients, including specialized clinical judgment and evidence-based patient management strategies learned in didactic sessions in both their specialty programs and within the GSHJ classroom.  1 Course cr

NURS 6210a and NURS 6211b, Advanced Primary Care and Community Health  Ami Marshall
This interdisciplinary collaborative course with the School of Medicine provides the student with an experience in delivering interdisciplinary primary care to an underserved community at an urban medical clinic through a rotation at HAVEN, the Yale student-run free clinic. Students engage in near-peer teaching with other medical, physician associate, and nurse practitioner students who are at an earlier stage of their training. Students are assigned to eight Saturdays over the course of the fall and spring terms. The didactic curriculum consists of foundational knowledge regarding teaching skills and cultural diversity. This course is available to all family and adult/gerontology primary care nurse practitioner students in either their first or second specialty year. Students apply for the elective and are chosen to participate at the discretion of the instructor. Students may enroll only once in the course.  2 Course cr per term

NURS 6230b, Clinical Practice I for Global Health Track  Patricia Ryan-Krause
This clinical application course for students in the global health track provides opportunities to develop advanced nursing skills with a range of global populations within the students’ areas of specialization. While in clinical settings, students develop skills in assessment and management of acute and chronic conditions using evidence-based patient management strategies in accordance with the cultural beliefs and practices of populations of immigrants, refugees, American Indians, and Alaskan native and rural residents. These experiences may take place in YSN-approved U.S. or international settings. Additional experiences with local resettlement organizations such as Integrated Refugee and Immigrant Services (IRIS) and Connecticut Institute for Refugees and Immigrants (CIRI) are also available. These experiences may include developing and presenting education programs to groups of refugees, immigrants, or asylum seekers; creating training materials for the resettlement agencies; or serving as a cultural companion or health navigator for newly arrived families. Required of all students pursuing the global health track during the spring term of their first specialty
year. Thirty hours of face-to-face interactions either in a health care setting or in an alternative setting, and one hour per week of clinical conference. Taken before NURS 6240. 1 Course cr

**NURS 6240a, Clinical Practice II for Global Health Track** Patricia Ryan-Krause
This clinical application course for students in the global health track provides opportunities to develop advanced nursing skills with a range of global populations within the students’ areas of specialization. While in clinical settings, students develop skills in assessment and management of acute and chronic conditions using evidence-based patient management strategies in accordance with the cultural beliefs and practices of populations of immigrants, refugees, American Indians, and Alaskan native and rural residents. These experiences may take place in YSN-approved U.S. or international settings. Additional experiences with local resettlement organizations such as Integrated Refugee and Immigrant Services (IRIS) and Connecticut Institute for Refugees and Immigrants (CIRI) are also available. These experiences may include developing and presenting education programs to groups of refugees, immigrants, or asylum seekers; creating training materials for the resettlement agencies; or serving as a cultural companion or health navigator for newly arrived families. Required of all students pursuing the global health track during the fall term of their second specialty year. Thirty hours of face-to-face interactions either in a health care setting or in an alternative setting, and one hour per week of clinical conference. Taken after NURS 6230. 1 Course cr

**NURS 7000a, Advanced FNP/AGPCNP Specialty Health Assessment** Ami Marshall, Nicole Colline, and Virginia Sherrick
This course is designed to enhance students’ adult health assessment skills in the context of primary care for patients from adolescence through senescence. Through laboratory sessions, simulation, and clinical activities, students demonstrate achievement of culturally responsive advanced health assessment techniques, data collection, and application of appropriate technology in health assessment. Normal and abnormal adult variations are presented. Required of all adult/gerontology primary care and family nurse practitioner students in the first year of specialization. 2 Course cr

**NURS 7020a, Primary Care I A** Monica Philipp, Monica Ordway, and Ronica Mukerjee
This course is a foundational primary care seminar module designed to provide the student with an introduction to primary care clinical practice and patient-centered health education. The role of the nurse practitioner and midwife across primary care settings and as a member of the health care delivery team is emphasized. Required of all adult/gerontology, family, midwifery/women’s health, and pediatric nurse practitioner—primary care students in the first year of specialization. Open to others with permission of the instructor. Two hours per week for the first eight weeks of the term. 1 Course cr

**NURS 7030a, Primary Care I B** Ronica Mukerjee
Following NURS 7020, this is the first of three didactic courses designed to enable students to develop the necessary knowledge base and problem-solving skills for primary care practice as nurse practitioners. Classes focus on health promotion, disease prevention, differential diagnoses, and evidence-based management of common health conditions in diverse populations of patients from adolescence to senescence. Required of all adult/gerontology primary care, family, and midwifery/women’s health nurse
practitioner students in the first year of specialization. Two hours per week for seven weeks. 1 Course cr

**NURS 7040b, Primary Care II**  Soohyun Nam
This is the second of three didactic courses designed to enable students to gain the problem-solving and clinical strategies necessary for primary care practice as nurse practitioners; it builds upon content taught in NURS 7020 and NURS 7030. Classes focus on health promotion, disease prevention, differential diagnoses, and evidence-based management of common health conditions for diverse populations of patients from adolescence to senescence. Required of all adult/gerontology primary care, family, and midwifery/women's health nurse practitioner students in the first year of specialization. Prerequisites: NURS 5040 and NURS 5041; or NURS 6000. 2 Course cr

**NURS 7050b, Primary Care II Clinical Practice**  Staff
Course content includes clinical practice in health assessment and the provision of primary and focused health care. Students meet weekly for a ninety-minute clinical seminar that is held concurrently with clinical practice. Clinical seminar serves as a forum for students to present and discuss cases and explore issues encountered in clinical practice. Required of all adult/gerontology primary care and family nurse practitioner students in the first year of specialization. Clinical seminar discussions for FNP students focus on providing care for patients across the lifespan. AGPCNP discussions focus on caring for adult and gerontologic populations, including adolescents, adults, and older adults. Taken concurrently with NURS 7040 and, for family nurse practitioner students, with NURS 7460. Eight to sixteen hours of clinical practice (fifteen weeks) and one and one-half hours of clinical seminar per week. 4½ Course cr

**NURS 7060a, Primary Care III**  Ami Marshall
This is the third of three didactic courses designed to enable students to develop the necessary knowledge base and problem-solving skills for primary care practice as nurse practitioners. Classes focus on health promotion and maintenance, and assessment, differential diagnoses, and evidence-based management of acute and chronic conditions for patients from adolescence to senescence, highlighting management of patients with complex comorbid conditions. Required of all adult/gerontology primary care and family nurse practitioner students in the final year. Taken concurrently with NURS 7070. Prerequisites: NURS 7030, NURS 7040, and NURS 7050. 2 Course cr

**NURS 7070a, Primary Care III Clinical Practice**  Staff
This clinical course builds upon the experiences gained in NURS 7050 and provides students further opportunity to develop advanced nursing skills, clinical judgment, and evidence-based patient management strategies necessary to manage common acute and chronic health care conditions. Students participate in designated weekly primary care clinical experiences arranged by faculty. In addition, students meet weekly for a ninety-minute clinical conference that is held concurrently with clinical practice. Clinical seminar discussions for family nurse practitioner students focus on family-centered care and providing care for patients across the lifespan. Clinical seminar discussions for all other students focus on providing patient-centered care for patients from adolescence to senescence. Clinical conference serves as a forum for students to present and discuss cases and explore issues encountered in clinical practice. Required of all adult/gerontology primary care and family nurse practitioner students in the final
year. Taken concurrently with NURS 7060 and, for family nurse practitioners, with NURS 7500. Eight to sixteen hours of clinical practice per week (fifteen weeks), and one and one-half hours of clinical conference per week. Prerequisite (or concurrent with): NURS 7050. 6 Course cr

NURS 7090b, Primary Care IV Clinical Practice  Staff
This clinical course builds upon the experiences gained in NURS 7070 and provides students further opportunity to develop advanced nursing skills, clinical judgment, and evidence-based patient management strategies necessary to manage common acute and chronic health care conditions. Students participate in designated weekly primary care clinical experiences arranged by faculty. In addition, students meet weekly for a ninety-minute clinical conference that is held concurrently with clinical practice. Clinical seminar discussions for family nurse practitioner students focus on family-centered care and providing care for patients across the lifespan. Clinical seminar discussions for all other students focus on providing patient-centered care for patients from adolescence to senescence. Clinical conference serves as a forum for students to present and discuss cases and explore issues encountered in clinical practice. Required of all adult/gerontology primary care and family nurse practitioner students in the final year. Taken concurrently with NURS 7500. Eight to sixteen hours of clinical practice per week (fifteen weeks), and ninety minutes of clinical conference per week. Prerequisite: NURS 7070. 6 Course cr

NURS 7100b, Concepts and Principles of Aging  Ophelia Empleo-Frazier and Ami Marshall
This course introduces students to the major concepts and principles of gerontology and to a variety of biophysiological theories on aging. Health care delivery systems and care of the elderly are explored along with the current social policy initiatives and the state of the science of research as it relates to the older adult. Required of all adult/gerontology primary care nurse practitioner students in their first specialty year. Two hours weekly class time. Prerequisites: NURS 5040 and NURS 5041, or NURS 6000; and NURS 6040 and NURS 7000. 2 Course cr

NURS 7104b, Advanced Primary Care of the Older Adult  Ami Marshall and Ophelia Empleo-Frazier
This course focuses on the role of the nurse practitioner in the assessment, diagnosis, and management of common primary geriatric syndromes. The age-friendly health system 4M model of geriatric care (Medications, Mentation, Mobility, and what Matters most) provides the framework for clinical conditions discussed in this course. Required of all adult/gerontology primary care nurse practitioner students in the final year. 2 Course cr

NURS 7110b, Advanced FNP/AGPCNP Pharmacology  Elizabeth Cohen
This course is designed to prepare FNP/AGPCNP students to clinically apply pharmacotherapeutics from an advanced practice approach. Students learn to identify the correct pharmaceutical agents for therapy and to develop plans to monitor the results for effectiveness and safety in a variety of advanced practice nursing clinical settings. Students learn multiple methods for obtaining pharmacological information requisite to safely prescribe and monitor effects of their pharmacological selections. Required all adult/gerontology primary care and family nurse practitioner students in
the first year of specialization. Taken concurrently with NURS 6020. The hours per week are determined by the specialty. 1 Course cr

**NURS 7200a, Women's Health I**  Gina Novick  
The first in a series of five didactic courses provided over three terms, designed to enable students to develop the necessary knowledge base and problem-solving skills in ambulatory care for women across the lifespan. Women's Health I and II focus on the gynecologic and prenatal care of essentially healthy women. Women's Health I provides foundational material and is required of all nurse-midwifery, women's health nurse practitioner, family nurse practitioner, and adult/gerontology primary care nurse practitioner students in the first year of specialization. 1 Course cr

**NURS 7210a, Women's Health II**  Gina Novick  
The second in a series of five didactic courses provided over three terms, designed to enable students to develop the necessary knowledge base and problem-solving skills in ambulatory care for women across the lifespan. Women's Health I and II focus on the gynecologic and prenatal care of essentially healthy women. Women's Health II builds on the foundation provided by Women's Health I, providing greater depth and detail required for the women's health specialist. Required of all nurse-midwifery and women's health nurse practitioner students in the first year of specialization. Open to others with permission of the instructor. 1 Course cr

**NURS 7220a, Women's Health I and II Advanced Health Assessment and Clinical Practice**  Staff  
This course provides clinical experience in basic ambulatory health care to pregnant and nonpregnant women across the lifespan, focusing on care of essentially normal women. Required of all nurse-midwifery and women's health nurse practitioner students in the first year of specialization. 3 Course cr

**NURS 7230b, Women's Health III**  Loren Fields and Monica Philipp  
This course is designed to build competencies in gynecologic care for women across the lifespan. Building on the foundational content and competencies introduced in the previous term, this course focuses on the evaluation and management of more complex gynecologic health conditions. Students also engage with a variety of additional advanced practice nursing competencies such as translating research evidence into evidence-based practice and counseling patients around complex decisions. Required of all nurse-midwifery, women's health nurse practitioner, family nurse practitioner, and adult/gerontology primary care nurse practitioner students in the first year of specialization. 1 Course cr

**NURS 7235a, Childbearing Care I**  Erin Morelli  
This course prepares students to care for patients during the intrapartum, postpartum, and lactation periods of the childbearing cycle. Students also learn about the normal neonate. Online and in-person lectures of fifteen hours and skills labs are utilized. Required of all nurse-midwifery students in the first year of specialization. Prerequisite: completion of all GEPN courses or R.N. license. 1 Course cr

**NURS 7240b, Women's Health IV**  Monica Philipp  
This course is designed to build competencies in antepartum care. Building on the foundational content and competencies introduced in the previous term, this course focuses on the outpatient monitoring and management of common complications that can occur in pregnancy. Students also engage with a variety of additional advanced
practice nursing competencies such as legal and professional practice issues, improving health literacy, and counseling patients around complex decisions. Required of all nurse-midwifery and women's health nurse practitioner students in the first year of specialization. 1 Course cr

**NURS 7250b, Women's Health III and IV Clinical Practice**  Staff
This course provides clinical experience in ambulatory health care to pregnant and nonpregnant women across the lifespan, focusing on care of women with complex issues and or complications. Required of all nurse-midwifery and women's health nurse practitioner students in the first year of specialization. 3 Course cr

**NURS 7260b, Childbearing Care II**  Michelle Telfer
This course introduces theory, skills, and management of the well woman during the intrapartum and postpartum periods. Care of the healthy newborn is also explored. Emphasis is on supporting normal physiologic birth and the transition to motherhood. Theory and evidence-based practice are presented through regularly scheduled class sessions, seminars, and problem-based learning case studies. Required of all nurse-midwifery students in the first year of specialization. 2 Course cr

**NURS 7270b, Childbearing Care II Clinical Practice**  Staff
Students are provided with supervised clinical experience in labor, birth, newborn, and postpartum care. Students have twelve hours of clinical practice per week for twelve weeks and attend clinical conference for one hour per week. The clinical seminar serves as a forum for students to explore issues encountered in clinical practice. Required of all nurse-midwifery students in the first year of specialization. 3 Course cr

**NURS 7280a, Women's Health V**  Loren Fields
This course is designed to build competencies in antepartum and gynecologic care. Building on the content and competencies introduced in previous terms, this course focuses on the evaluation and management of complex gynecologic conditions and antepartum complications. Students also engage with a variety of additional advanced practice nursing competencies such as ethical decision-making, legal and professional practice issues, translating research evidence into evidence-based practice, and counseling patients around complex decisions. Required of all nurse-midwifery and women's health nurse practitioner students in the final year. 2 Course cr

**NURS 7290a, Women's Health V Clinical Practice**  Staff
This course provides clinical experience and clinical competency building in antepartum and gynecologic care. Required of all nurse-midwifery and women's health nurse practitioner students in the final year. 3 Course cr

**NURS 7300a, Childbearing Care III**  Erin McMahon
This course focuses on advanced theoretical concepts and comprehensive management of the pregnant woman with at-risk pregnancies or comorbid health problems. Recognition of newborn health problems and initial management are explored. Complex health issues are analyzed through regularly scheduled class sessions, seminars, assignments, and problem-based learning case studies. Management includes triage, prenatal, birth, and postpartum emergencies; and perinatal loss. Emphasis is on collaboration within multidisciplinary teams. Required of all nurse-midwifery students in the final year. 2 Course cr
NURS 7310a, Childbearing Care III Clinical Practice  Staff
Students focus on providing increasingly complex intrapartum, postpartum, and newborn care as members of a multidisciplinary team in diverse settings. Students have twelve hours of clinical practice per week for twelve weeks and attend clinical conference for one hour per week. The clinical seminar serves as a forum for students to explore issues encountered in clinical practice. Required of all midwifery students in the final year. Prerequisite: students must be certified in neonatal resuscitation through the American Academy of Pediatrics course.  3 Course cr

NURS 7312b, Global Midwifery: Uganda  Michelle Telfer
This seminar course is a precursor to the Summer Global Midwifery Clinical: Uganda (NURS 7314). It is an introduction to maternal and newborn global health issues including understanding the global burden of disease and morbidity and mortality affecting women and newborns. Building on NURS 7200–7240, 7235, 7260, and 7270, the seminar develops the student's capacity to provide full-scope midwifery care for women and neonates in a low-resource setting. Introduction to country-specific prevalent tropical diseases and infections is covered, including their identification, treatment, and complications in pregnancy and childbirth. Historical, sociopolitical, economic, and cultural context is covered. Predeparture preparation with respect to personal health, travel safety, and anticipated ethical challenges is included. The Acholi language is introduced, and students are expected to master some basic phrases. Course meets one hour weekly.  1 Course cr

NURS 7320b, Integration of Midwifery Care  Staff
This course is designed to help students assimilate all areas of midwifery practice. It integrates student provision of full-scope care with appropriate clinical supervision, academic support, and clinical support including site preceptors, faculty, school, and library resources. Students continue to refine their ability to provide high-quality, evidence-based, and culturally sensitive care that is safe and professionally accountable. Students are expected to build on the knowledge and skills they have gained in their previous courses at YSN. Required of all nurse-midwifery students in the final year. For nurse-midwifery and nurse-midwifery/women's health nurse practitioner students, this course must be taken concurrently with NURS 7330, and students must successfully complete all requirements of both courses in order to graduate. Prerequisites: all YSN core courses and all nurse-midwifery core courses.  6 Course cr

NURS 7330b, Integration of Women's Health Care  Staff
This course concentrates on the application of physiologic, developmental, psychosocial, and cultural theories to advanced clinical decision-making, focusing on reproductive and developmental health issues for women from adolescence to senescence. Required of all nurse-midwifery and women's health nurse practitioner students in the final year of specialization. For nurse-midwifery and nurse-midwifery/women's health nurse practitioner students, this course must be taken concurrently with NURS 7320, and students must successfully complete all requirements of both courses in order to graduate. Prerequisite: successful completion of all courses required for the first, second, and third terms of the specialty.  6 Course cr

NURS 7355a or b, Women's Health Primary Care Clinical  Monica Philipp
Women's health nurse practitioner students are provided with supervised introductory clinical experience in adult primary care including the care of male patients. The emphasis of this clinical experience is on managing health promotion and common
acute and chronic health problems. Students learn appropriate recognition, management, and referral of common medical conditions as they present in the outpatient setting. Examples of common health problems are: chronic and acute skin conditions, upper respiratory infections, asthma, hypertension, hyperlipidemia, thyroid, diabetes, headaches, and mood disorders. Additionally, students incorporate the primary care foundations of health promotion, risk assessment, disease prevention, and counseling. Required of all women's health nurse practitioner students. The course may be completed in any term of the year depending on clinical site availability.

2 Course cr

NURS 7340b, Midwifery and Women's Health Pharmacology  Loren Fields
The clinical pharmacology course is designed to prepare midwifery and women's health students to clinically apply principles of pharmacotherapeutics in the management of women's health needs. Through a series of selected case studies and online and class discussion, students learn to identify the correct pharmaceutical agent(s) for therapy and to develop plans to monitor the results for effectiveness and safety in a variety of clinical settings. Students are expected to utilize multiple methods for obtaining pharmacological information (e.g., Internet, library, and consultation of pharmacist). Required of all nurse-midwifery and women's health nurse practitioner students in the first year of specialization. Taken concurrently with NURS 6020. 1 Course cr

NURS 7400a, Advanced Pediatric Health Assessment and Clinical Reasoning  Nancy Banasiak and Monica Ordway
This course is designed to enhance the student’s pediatric health assessment skills and to introduce the student to the primary care of children from infancy through adolescence. Key aspects of assessment, health promotion, and disease prevention in culturally diverse pediatric populations are discussed. Clinical applications of evidence-based practice guidelines in the care of children are reinforced through laboratory and simulation experiences, as well as through rotations in hospital newborn care settings. Required of all pediatric nurse practitioner students in the first year of specialization. 2 Course cr

NURS 7410a, Individual and Family Development during Childhood  Monica Ordway
This course focuses on a critical overview of conceptual and theoretical perspectives on individual development from infancy through adolescence and family development. Sociocultural, ethnic, gender, environmental, and political factors that influence individual and family development are reviewed and evaluated. Discussions focus on transitions from infancy to adolescence. Assessment of family functioning, strengths, and vulnerabilities is presented from clinical and research perspectives. Selected family issues are analyzed within theoretical, clinical, and policy perspectives, and issues of particular significance for evidence-based advanced nursing are stressed. This course is offered in weeks 1–8 of the fall term and is required of all family and pediatric nurse practitioner students in the first year of specialization. Open to other students with permission of the instructor. 1½ Course cr

NURS 7420a, Primary Care of Children I: Health Promotion  Staff
This course is designed to introduce the student to the primary care of children from infancy through adolescence. Key aspects of health promotion and disease prevention in culturally diverse pediatric populations are discussed within the context of the national health agenda. Health risks and behaviors are explored to determine culturally sensitive
interventions. Clinical applications of concepts, theories, current health policies, and evidence-based best-practice guidelines related to well-child care are presented. Required of all family and pediatric nurse practitioner students in the first year of specialization. Open to others with permission of the instructor. 2 Course cr

NURS 7430a, Primary Care of Children I Clinical Practice  Elyse Borsuk
This course provides clinical experience in well-child care and management of common pediatric problems in a variety of primary care settings. Students provide primary health care, acute care, and beginning case management for pediatric patients in the context of their families. Required of all pediatric nurse practitioner students in the first year of specialization. Four and one-half hours per week in a clinical setting and two hours of clinical conference per week. 2 Course cr

NURS 7440a, Primary Care of Adolescents  Alison Moriarty Daley
This course is designed to provide the student with a conceptual model for assessing normal psychological and physiological adolescent development, an understanding of the clinical relevance of basic deviations from normal development, and an understanding of the diagnosis and clinical care of adolescents in primary care settings. Required of all adult/gerontology primary care, family, and pediatric nurse practitioner students in the first year of specialization. Open to others with permission of the instructor. Two hours per week. 2 Course cr

NURS 7450a or b, Primary Care of Adolescents Clinical  Alison Moriarty Daley
This course is designed to aid the student in gaining elementary skills in the assessment of adolescent development, both physiological and psychological; in the recognition and management of deviations from normal development and health status; and in intermediate-level skill in the care of adolescents, including health education. Required of all pediatric nurse practitioner students in the second term of the first year of specialization or the first term of the final year. Six hours weekly in a clinical setting and six hours of clinical conference. 2 Course cr

NURS 7460b, Primary Care of Children II  Nancy Banasiak
This course is designed to focus on the assessment, diagnosis, evidence-based management, and best-practice guidelines for care of children from birth through adolescence for common pediatric health problems. Required of all family and pediatric nurse practitioner students in the first year of specialization. Open to others with permission of the instructor. 2 Course cr

NURS 7470b, Primary Care of Children II Clinical Practice  Elyse Borsuk
This course provides clinical experience in well-child care and management of common pediatric problems in a variety of primary care settings. Students provide primary health care, acute care, and beginning case management for pediatric patients in the context of their families. Required of all pediatric nurse practitioner students in the first year of specialization. Four and one-half hours per week in a clinical setting and two hours of clinical conference per week. 2 Course cr

NURS 7480a, Primary Care of Children III  Patricia Ryan-Krause
This course provides a forum for discussion of a variety of pediatric conditions encountered in the primary care setting. It focuses on the assessment and management of complex outpatient pediatric problems and the role of the advanced practice nurse in managing these problems. Lectures, discussions, and cases are presented by guest
speakers, faculty, and students. Required of all family and pediatric nurse practitioner students in the final year. Prerequisite: NURS 7460. 2 Course cr

**NURS 7490a, Primary Care of Children III Clinical Practice**  
Nancy Banasiak  
This course provides clinical experience in advanced pediatric primary care and management, including work with complex families. The student provides health care for children over the course of the year in the Primary Care Center, Yale New Haven Hospital, and at selected pediatric primary care sites in the community. Required of all pediatric nurse practitioner students in the final year. Five hours weekly in a clinical setting, eight hours per term of observation, and fifteen hours of clinical conference. Prerequisite: NURS 7470. 2 Course cr

**NURS 7500b, Primary Care of Children IV**  
Patricia Ryan-Krause  
This course provides a forum for the discussion of a variety of pediatric conditions encountered in the primary care setting. It focuses on the assessment and management of complex outpatient pediatric problems and the role of the advanced practice nurse in managing these problems. Lectures, discussions, and cases are presented by faculty and guest lecturers. Required of all family and pediatric nurse practitioner students in the final year. 2 Course cr

**NURS 7510b, Primary Care of Children IV Clinical Practice**  
Nancy Banasiak  
This course provides clinical experience in advanced pediatric primary care and management, including work with complex families. The student provides health care for children over the course of the year in the Primary Care Center, Yale New Haven Hospital, and at selected pediatric primary care sites in the community. Required of all pediatric nurse practitioner students in the final year. Five hours weekly in a clinical setting and twelve hours of clinical conference. Prerequisite: NURS 7470. 2 Course cr

**NURS 7520b, Chronic Health Conditions in Children and Adolescents**  
Elizabeth Doyle  
This course focuses on the pathophysiology and advanced nursing management of chronic health conditions in children and adolescents across settings. Utilizing a systems approach, pathophysiology is reviewed, and then prototype chronic conditions and related evidence-based interventions as well as specialty and primary care management are discussed. Required of all pediatric nurse practitioner students. Two hours per week. 2 Course cr

**NURS 7530a or b, School Health Clinical Practice**  
Nancy Banasiak  
This course is designed to provide an opportunity to develop an advanced practice nursing role in the school setting. Experience is in a school-based clinic where the student provides primary and episodic care to the client population, participates in health education, as well as consults and collaborates with other health and education personnel in the school and community. Required of all pediatric nurse practitioner students in the second term of the first year of specialization or the first term of the final year. Six hours of clinical practice per week and six hours of clinical conference. 2 Course cr

**NURS 7540a and NURS 7541b, Specialty Pediatric Primary Care Clinical**  
Monica Ordway  
This clinical practicum provides students with the opportunity to gain additional knowledge and experience in specialty practice areas with relevance to pediatric primary care. The course extends over the final academic year of specialization. Required of
all pediatric primary care nurse practitioner students in the final year. Four and one-half hours of clinical practice for fifteen weeks, nine hours of clinical conference, and 13.5 hours of web-based clinical conference over the course of the academic year.

1 Course cr

**NURS 7550b, Advanced Pediatric Pharmacology**  Nicole Maciejak

This pharmacology course builds on general principles of pharmacology for advanced practice nurses and is designed to prepare students in the PNP specialties to apply principles of pharmacotherapeutics in the management of children’s and adolescents’ health. Students learn to identify the correct pharmaceutical agents for therapy and develop plans to monitor the results for effectiveness and safety in the pediatric primary care setting. Required of all pediatric nurse practitioner students in the first year of specialization. Open to others with permission of the instructor. Two hours per week.

1 Course cr

**NURS 7600a, Mental Health Assessment across the Lifespan**  Susan Boorin and Tina Walde

This course provides students with concepts, techniques, and knowledge necessary to conduct accurate mental health evaluations of persons across the lifespan. Students learn to collect data guided by the principles of general health screening, psychiatric history, mental status examination, and diagnostic criteria from the DSM-5, therapeutic interviewing, and comprehensive history taking. A bio-psycho-social-cultural-spiritual framework is used to formulate a case history, determine accurate differential diagnoses, and make a psychiatric diagnosis using the DSM-5 framework. Beginning development of treatment planning is also emphasized. Mental health assessment also emphasizes health risks within the psychiatric population, differentiation of physical conditions that may present as a primary psychiatric disorder, mental health promotion, and early case-finding to prevent mental illness. Other components of mental health assessment include the use of rating scales; evaluation of risk from dangerousness to self, others, or inability to care for self; the influence of family, sociocultural background, and developmental achievements; substance use and abuse; forensics; and trauma history. Required of all psychiatric–mental health nurse practitioner students in the first year of specialization. Two hours per week in class and 1.5 hours per week in clinical lab activities.  2½ Course cr

**NURS 7610a, Psychopathology across the Lifespan I**  Lindsay Powell and Dilice Robertson

This course examines the psychopathology and neurobiology of major psychiatric disorders across the lifespan. Essentials of neuroanatomy and neurobiology are examined as they relate to psychiatric symptoms. Disorders selected for examination are those most commonly seen in clinical settings in children, adolescents, adults, and older adults, including anxiety; depression; and behavioral, personality, and cognitive disorders (ADHD, Alzheimer’s). The public health importance, epidemiology, risk factors, and neuroscience are reviewed. The examination integrates genetic and environmental influences to support an understanding of the interpersonal, cognitive, emotional, and behavioral processes that define and underlie major mental illnesses. Evidence-based treatments are discussed in relationship to their impact on behavior, symptoms, neurobiology, and family systems. Required of all psychiatric–mental health nurse practitioner students in the first year of specialization. Two hours per week.

2 Course cr
NURS 7620b, Psychopathology across the Lifespan II  Lindsay Powell and Susan Boorin
This course examines the psychopathology and neurobiology of major psychiatric disorders across the lifespan. Essentials of neuroanatomy and neurobiology are examined as they relate to psychiatric symptoms. Disorders selected for examination are those most commonly seen in clinical settings in children, adolescents, adults, and older adults, including anxiety; depression; and behavioral, personality, and cognitive disorders (ADHD, Alzheimer’s). The public health importance, epidemiology, risk factors, and neuroscience are reviewed. The examination integrates genetic and environmental influences to support an understanding of the interpersonal, cognitive, emotional, and behavioral processes that define and underlie major mental illnesses. Evidence-based treatments are discussed in relationship to their impact on behavior, symptoms, neurobiology, and family systems. Required of all psychiatric–mental health nurse practitioner students in the first year of specialization. Two hours per week.
2 Course cr

NURS 7630a and NURS 7631b, Psychiatric–Mental Health Clinical Practice across the Lifespan I and II  Staff
The goal of this two-term practicum is to provide the student with an opportunity to develop clinical skills with individuals and family across the lifespan. While in psychiatric clinical settings, students apply skills including holistic physical and mental health assessment, formulate differential diagnosis, plan and implement developmentally appropriate psychiatric nursing interventions, and evaluate interventions and outcomes with children, adolescents, adults, older adults, and their families. Emphasis is placed on application of a variety of population-specific assessment skills and use of differential diagnosis, and a beginning utilization of pharmacologic and psychotherapeutic treatment methods with individuals, groups, and families. Clinical experiences require the student to synthesize knowledge from courses, supplemental readings, clinical seminars, and practice experiences. Students are assigned to psychiatric clinical placement on the basis of development of competencies, previous clinical experiences, and interests. Required of all psychiatric–mental health nurse practitioner students in the first year of specialization. This course may be taken concurrently with didactic first-year PMH specialty course work. Primary placement supervision seminar meets two hours per week. Outplacement supervision seminar meets one hour per week. 4 Course cr per term

NURS 7650a, Individual Psychotherapy I  Andree de Lisser and Tina Walde
This course provides an overview of the major schools of personality theory and psychological development, and the individual psychotherapy treatment modalities that were developed from them. Students deepen and expand their knowledge of fundamental elements in developing and maintaining the therapeutic relationship with clients in mental health settings. The student conceptualizes personality characteristics, behavior, and defensive structure in order to better understand the dynamics of the patient and the therapeutic relationship. Required of all psychiatric–mental health nurse practitioner students in the first year of specialization. One hour per week.
1 Course cr

NURS 7660b, Individual Psychotherapy II  Andree de Lisser and Tina Walde
This course provides an overview of the major schools of personality theory and psychological development and the individual psychotherapy treatment modalities that
Courses

were developed from them. Students integrate the concepts learned in NURS 7650 with particular schools of theory and practice. A comparison of psychotherapeutic treatment modalities assists the student in beginning to identify and utilize select interventions specifically suited to individual patient problems identified in advanced practice psychiatric nursing. Required of all psychiatric–mental health nurse practitioner students in the first year of specialization. One hour per week.  

1 Course cr

NURS 7670b, Clinical Psychopharmacology across the Lifespan  
Susan Boorin and Lindsay Powell

This course covers the principles of psychiatric pharmacotherapy across the lifespan and the role of the advanced practice psychiatric nurse prescriber. It focuses on biological mechanisms of action of psychotropic drugs; common side effects and adverse reactions; safety issues in prescribing psychotropic medications; and alterations needed in using these agents in specialty populations. The neurobiological components important in understanding symptom etiology and treatment are incorporated to select the most efficacious pharmacologic treatment of psychiatric disorders. Pharmacological history, differential diagnoses, and symptoms targeted for pharmacological activity are incorporated as integral components of prescriptive practice. An emphasis on clinical decision-making includes all phases of pharmacologic treatment: evaluation and diagnosis; initiation of treatment; determining efficacy; evaluating side effects; enhancing patient adherence; evaluation of response; long-term maintenance vs. discontinuation; patient education; and integration of psychotherapy. Sources of information include evidence-based data, treatment algorithms, established practice guidelines, textbooks, journal articles, and current conference proceedings. Required of all psychiatric–mental health nurse practitioner students in the first year of specialization. Two hours per week.  

2 Course cr

NURS 7680a, Clinical Outcome Management in Psychiatric–Mental Health Nursing  
Joanne Iennaco and Tina Walde

The provision of mental health services is determined by many factors including policy, public demand, research evidence, ideas among general practitioners and mental health professionals, and the financial pressures under which purchasers and providers of services work. These groups often have widely disparate views about the nature of mental disorders and their most appropriate interventions. In providing services to individuals, families, groups, systems, and organizations, the advanced practice psychiatric nurse functions as clinician, consultant, leader, educator, and researcher in the analysis of critical issues important to decision-making and intervention. The assumption underlying the course is that all advanced practice mental health services should be fundamentally theoretical and evidence-based. In this course students define clinical problems and system implications, use technology to identify clinical and research evidence, and critically analyze the evidence. Based on this analysis they devise and present realistic plans for intervention in the clinical setting and write an evidence-based review paper summarizing the results. Discussion about what constitutes the best available evidence to clarify decision-making with regard to a variety of mental health and health promotion needs is addressed. Required of all psychiatric–mental health nurse practitioner students in the final year. Two hours per week.  

2 Course cr

NURS 7690a, Group Psychotherapy  
Andree de Lisser and Dilice Robertson

This course examines methods and major conceptual frameworks of group psychotherapy, especially Yalom’s group therapy model. Emphasis is placed on
the application of theory to the clinical realities of groups encountered in various inpatient and outpatient settings. This course examines various group treatment modalities and how they are useful in different psychiatric disorders and settings. The course demonstrates how group treatment choices are made through patient assessment; diagnosis; and cognitive, cultural, individual, and pharmacological considerations. Knowledge of group dynamics and systems theory is reviewed through the current literature and research. The lab portion of this course offers the opportunity for students to have a task group experience and examine group norms, process, communication patterns, roles, subgroups, stages of group development, and styles of leadership. Required of all psychiatric–mental health nurse practitioner students in the final year. One hour per week in class and 1.5 hours per week in clinical lab activities. 

1½ Course cr

NURS 7700a, Psychiatric–Mental Health Clinical Practice across the Lifespan III

Staff

The aim of the fall-term, second-year clinical practicum is to promote development of clinical and leadership skills required for advanced professional practice across the lifespan in psychiatric–mental health nursing. Building on first-year clinical skills, students are expected to choose, implement, and evaluate advanced assessment and differential diagnostic reasoning skills, psychotherapeutic (e.g., group, individual, family) techniques, and psychopharmacological interventions with children, adolescents, adults, older adults, and their families in a variety of psychiatric clinical settings. Ethnic, gender, and developmentally appropriate therapeutic, educational, and supportive intervention strategies are implemented for patients across the lifespan. Students are expected to collaborate with other health care providers in the care of their patients. Health promotion and disease prevention strategies are examined and prioritized in relation to promoting mental and physical health with ethnically diverse individuals, groups, and families. Role delineation, ethical and legal responsibilities, and clinical expectations related to prescriptive authority, evidence-based decision-making, anticipatory guidance, and therapeutic psychiatric–mental health nursing care are explored. Required of all psychiatric–mental health nurse practitioner students in the final year. Clinical supervision seminar meetings two hours per week. Prerequisites: first-year clinical and didactic requirements. 6 Course cr

NURS 7710b, Psychiatric–Mental Health Clinical Practice across the Lifespan IV

Staff

The aim of this final-term, second-year clinical practicum is to provide a clinical immersion experience with a specific patient population. Building on and enhancing the competencies of NURS 7700, the emphasis of the course is on the integration and application of leadership, ethics, patient safety, quality improvement, systems, and care delivery principles in advanced practice psychiatric–mental health nursing. This course builds on the knowledge and competencies acquired throughout the program of study and the required clinical practica. Students gain increased competency and demonstrate increased accountability in the provision of comprehensive psychiatric–mental health care in the designated clinical site(s). Students expand practice experiences to include leadership and indirect clinical activities (e.g., consultation, supervision, or education; understanding of organizational systems and structures, policy and systems issues, and the professional advanced practice nursing role; collaboration and leadership) within their practice sites. Required of all psychiatric–mental health nurse practitioner
students in the final year. Clinical supervision seminar meets two hours per week.
Prerequisites: first-year clinical and didactic requirements. 6 Course cr

**NURS 7720b, Applied Psychopharmacology across the Lifespan**  
Lindsay Powell and Susan Boorin

This elective course builds on NURS 7670 and is designed to facilitate student expertise and confidence in prescribing the major categories of psychiatric medications to patients across the lifespan. The course is divided into eight major topic areas: antipsychotic, antidepressant, anti-anxiety, mood-stabilizing, hypnotic, stimulant, cognitive enhancement, and substance use treatment medications used in the treatment of psychiatric disorders across the lifespan. The concepts of sleep disruption, personality function, and pain management are integrated into each topic area. Each topic area includes two class sessions. The first reviews the biological mechanisms of action, common adverse events, drug-drug and drug-nutrient interactions, safety issues, and monitoring implications of the psychopharmacology category. The second is case-based, using real-life, interactive, web-based cases for group problem solving and consensus building regarding the most appropriate psychopharmacological course of treatment incorporating legal-ethical and bio-psycho-social-cultural-spiritual components of care. Upon completion, students will be prepared to complete Phase 1 of the Neuroscience Education Institute's Master Psychopharmacology Program. Suggested for psychiatric–mental health nurse practitioner students in the final year. Two hours per week. 2 Course cr

**NURS 7730b, Family Psychotherapy**  
Andree de Lisser

This course provides an overview and critical analysis of family theories and conceptual models. The course examines the applicability of these models to guide advanced family psychiatric–mental health practice with children, adolescents, adults, and their families. The strengths and limitations of such models as Bowenian, cognitive-behavioral, structural, and problem-solving are compared and contrasted in relation to their potential to guide psychotherapy with children, adolescents, adults, and their families. The course also examines how the selected family theories and conceptual models take into account and address the influence of cultural, social, and ethical issues, and of mental and physical health status, on the family systems over time. A lab component assists students in applying family theories and models to guide their assessment, treatment, and evaluation of family therapy with ethnically diverse families in a variety of inpatient and outpatient settings. Required of all psychiatric–mental health nurse practitioner students in the final year. One hour per week in class and 1.5 hours per week in clinical lab activities. 1½ Course cr

**NURS 7800a, Advanced Health Assessment in Adult/Gerontology Acute Care**  
Staff

This course concentrates on development of a systematic methodology of identifying acutely and critically ill patients’ needs for health care. Patient history taking, physical examination, diagnostic studies and interpretation, interpretation of advanced hemodynamic and oxygenation monitoring, analysis of medical diagnoses, documentation, and student case presentations form the basis for this clinical/seminar course. Select clinical problems of patients in acute and critical care adult/gerontology settings are studied in the context of student case presentations, clinical practicum, and simulations. Required of all adult/gerontology acute care nurse practitioner students in the first year of specialization. Prerequisites: NURS 5040 and NURS 5041; or NURS 6000. 3 Course cr
NURS 7810a, Advanced Diagnostics in Acute Care  Allison Cable
This course provides comprehensive content necessary in the assessment of the acutely or critically ill patient. Emphasis is on examination of the cardiovascular and respiratory systems, based on complex interpretations from laboratory and technological findings. Required of all adult/gerontology acute care nurse practitioner students in the first year of specialization. The electrocardiographic (ECG) components of the course may be taken as an elective by students in any specialty who have an interest in ECG interpretation. Three hours per week for fifteen weeks. 3 Course cr

NURS 7820a, Critical Care Clinical Immersion  Staff
The focus of this practicum is comprehensive management of a caseload of patients with adult/gerontology acute care chronic and/or acute complex conditions. Emphasis is on prediction of common patient problems, formulation of management protocols, and generation of research questions. Required of all adult/gerontology acute care nurse practitioner students in the first year of specialization; students may request to exempt out as determined by faculty review of a clinical portfolio and competency. 3 Course cr

NURS 7830b, Pathophysiology and Management of Adult/Gerontology Acute Care Health Problems I  Mary-Ann Cyr
This course provides a basis for predicting the vulnerability for common cardiovascular, respiratory, hematologic, renal, and neurological clinical problems that occur as a result of illness or outcome of treatment in adult and geriatric patients. Assessment, management, and evaluation are emphasized. Normal physiology, pathophysiology, and pharmacological management of these conditions are included. Required of all adult/gerontology acute care nurse practitioner students in the first year of specialization. 4 Course cr

NURS 7840b, Adult/Gerontology Acute Care Clinical Practice I  Staff
This practicum and seminar in the care of acutely, critically, and complex chronically ill adult and geriatric patients provides students with direct care experiences. The focus is on assessment and management. Critical thinking, clinical analysis of patient data, formulation of differential diagnoses, and planning of care are emphasized. Clinical seminars focus on case presentation by students. Required of all adult/gerontology acute care nurse practitioner students in the first year of specialization. Eight hours of clinical practice plus one hour of seminar per week. Prerequisites: NURS 5040 and NURS 5041, or NURS 6000; and NURS 7800 and NURS 7810. 3 Course cr

NURS 7850a, Pathophysiology and Management of Adult/Gerontology Acute Care Health Problems II  Mary-Ann Cyr
This course provides a basis for predicting the vulnerability for common clinical problems in acute care patients. These include trauma and endocrine, hepatic, gastrointestinal, infection/sepsis, and end-of-life problems that occur as a result of illness or outcome of treatment. Assessment, management, and evaluation are emphasized. Normal physiology, pathophysiology, and pharmacological management of these systems are included. Required of all adult/gerontology acute care nurse practitioner students in the final year. Prerequisites: NURS 5040 and NURS 5041, or NURS 6000; and NURS 7800, NURS 7810, and NURS 7830. 4 Course cr
NURS 7860a, Adult/Gerontology Acute Care Clinical Practice II  Staff
The first term of a yearlong (with NURS 7870) practicum that provides students with clinical experience in data-gathering techniques, diagnostic reasoning, management of acute and chronic health problems, application of technology in patient care, consultation, collaboration, health promotion, and risk factor modification. This course builds upon the foundational objectives successfully met in NURS 7840. The differential diagnosis and treatment of complex health problems commonly seen in acutely ill adult/gerontology patients are stressed, with special emphasis on conditions presented in NURS 7830 and NURS 7850. The focus is on those acute illnesses with a predictable course and established treatment approaches. Students have the opportunity to manage a caseload of patients from admission through discharge, as well as follow patients on an outpatient basis. A two-hour weekly clinical conference addresses acute care clinical issues and includes simulation activities. Required of all adult/gerontology acute care nurse practitioner students in the final year. Preceptors are APRNs, PAs, and physicians. Twenty-four hours per week in an acute care setting for fifteen weeks.  8.3 Course cr

NURS 7870b, Adult/Gerontology Acute Care Clinical Practice III  Laura Andrews
The second term of a yearlong (with NURS 7860) practicum that provides students with clinical experience in data-gathering techniques, diagnostic reasoning, management of acute and chronic health problems, application of technology in patient care, consultation, collaboration, health promotion, and risk factor modification. This course builds upon the foundational objectives successfully met in NURS 7840. The differential diagnosis and treatment of complex health problems commonly seen in acutely ill adult/gerontology patients are stressed, with special emphasis on conditions presented in NURS 7830 and NURS 7850. The focus is on those acute illnesses with a predictable course and established treatment approaches. Students have the opportunity to manage a caseload of patients from admission through discharge, as well as follow patients on an outpatient basis. A two-hour weekly clinical conference addresses acute care clinical issues. Required of all adult/gerontology acute care nurse practitioner students in the final year. Preceptors are APRNs and physicians. Twenty-four hours per week in an acute care setting for fifteen weeks.  8.3 Course cr

NURS 7880b, Advanced Acute Care Pharmacology  Allison Cable
This course is designed to prepare students to clinically apply pharmacotherapeutics from an advanced practice approach. Students learn to identify the correct pharmaceutical agents for therapy and to develop plans to monitor the results for effectiveness and safety in a variety of advanced practice nursing clinical settings. Students learn multiple methods for obtaining pharmacological information requisite to safely prescribe and monitor effects of their pharmacological selections. Required of all adult/gerontology acute care nurse practitioner students in the first year of specialization. Taken concurrently with NURS 6020. The hours per week are determined by the specialty.  1 Course cr

NURS 9510b, Clinical D.N.P. Practicum I  Joan Combellick
This course is the first in a series of four clinical D.N.P. practica in which students gain health care agency experience in preparing for, developing, implementing, evaluating, and disseminating their D.N.P. projects. In this first practicum course, students begin to engage and work with experts in the health care systems and agencies where they will conduct their projects. This practicum prepares D.N.P. students
for the systems interactions involved in planning and executing clinical projects. The expected outcomes are a written agreement with the agency for D.N.P. project implementation, engagement and planning activities with agency personnel involved in requisite protocols for project implementation, and development of a relationship with an external mentor/expert. The student develops a preliminary outline of systems activities and protocols to be followed in this preparation phase of the project and obtains the signed agreement of an outside mentor. The student keeps weekly logs of activities, which are submitted to, reviewed by, and discussed with course faculty. 67.5 hours. 1½ Course cr

**NURS 9570a, Evidence for Doctor of Nursing Practice**  Samantha Conley and Maggie Holland

This course reviews research methods and statistics and explores the nature of evidence as it relates to the discipline of nursing. Literature and evidence within and outside of nursing are critically appraised for translation to and evaluation of practice. Students are expected to select a phenomenon of interest and to critically review and synthesize evidence from diverse sources (literature, research, and population-based health data) to address the phenomenon. Required of all D.N.P. students in the first year. 3 Course cr

**NURS 9630a or b, Moving Health Care Forward: Innovation and Implementation**  Staff

This course focuses on theories and methods of innovation in health care as well as models of change and implementation. Includes a review of the principles of transformational leadership as they relate to thought leadership and practice in health care. Students explore innovation and implementation science and practice from the organizational systems perspective, informed by the current and relevant literature. 2 Course cr

**NURS 9670b, Quality and Safety in Health Care Organizations**  Lisa Corbett

This course provides an overview of theoretical principles and concepts essential to assessing, designing, implementing, and evaluating population-based health projects within and across the health system and other organizations. In this course, students critically examine change, decision-making, evaluation, and management-related theories as a foundation for project planning, implementation, and evaluation of an evidence-based improvement project. Students identify and develop a theory-based project derived from an integrated synthesis of the literature. Students also identify appropriate software, tools, and communication techniques essential for leading an interprofessional team from inception to completion of the project within and across health care systems or other organizations. The tools and processes learned in this course will support work toward the subsequent D.N.P. final project. Required of all D.N.P. students in the first year. 3 Course cr

**NURS 9680a, Clinical D.N.P. Scholarly Project Development**  Joanne Iennaco

This seminar for the Clinical D.N.P. student supports the initial development of the D.N.P. proposal. Topics discussed in the seminar include: the structure and process of clinical knowledge development and translation; assessing existing evidence in relationship to current clinical practices and processes of change; identification of factors to ensure effective clinical implementation; and approaches to clinical scholarship development, including communication and expression. Seminar outcomes include an individualized Clinical Area of Inquiry and a Project Proposal identifying
the focus and site for the D.N.P. project. Meets 15 hours per term both in person and online. 1 Course cr

**NURS 9710b, Health Care Policy, Politics, and Process**  Lisa Summers
This course provides an overview of past and current health policy literature and research. It also provides the student with the opportunity to critically analyze basic concepts, principles, and consequences of policy options for achieving selected health services goals across the spectrum of health and health care systems. It is built upon the understanding that health care delivery is the transformation of health science into health service. Students increase their aptitude in the three P’s—policy, politics, and process—in order to shape health care delivery changes. Policy, politics, and process occur in organizational, state, tribal, and federal spaces. In this era of sweeping health reform, it is imperative that students understand the players, the interactions, and the routes to change. The class discusses contemporary policy changes and debates. Required of all D.N.P. students in the second year. This is a hybrid course, taken concurrently with NURS 9720. 3 Course cr

**NURS 9720b, Health Care Policy, Politics, and Process Practicum**  Lisa Summers
Taken concurrently with NURS 9710, this practicum offers the student a faculty-mentored clinical experience that is designed to enable the student to translate evidence-based principles of health policy content into best practices with diverse populations outside, within, and/or across a variety of local, national, and/or international health care systems or organizations. The student is expected to maintain a log of committed time dedicated to the selected practicum. Forty-five hours total, averaging three hours per week. Students are to maintain their clinical practicum hours in e-portfolio. Required of all D.N.P. students in the second year. 1 Course cr

**NURS 9770b, The Business of Health Care**  Mary Ann Camilleri
This course is designed to introduce students to the principles of economics, finance, and business operations within the context of the health care system and organizations. Essential economic and financial theory for the health care decision maker is examined within institutional, local, and national environments. Principles and theories of finance methodology are an intricate part of the discussions related to public and private financing within and across health care delivery systems. The relationships among health care systems, financial decision-making, and current and emerging electronic clinical database systems are examined. Required of all D.N.P. students in the second year. 3 Course cr

**NURS 9810a, Leadership Development**  Mary Ann Camilleri
In this course, students analyze and apply principles of contemporary leadership and administration. Students develop self-awareness of their leadership abilities and develop a plan to enhance areas for development. Building on previous courses in the D.N.P. program, especially regarding ethics, evidence for practice, and business applications, students analyze case studies in nursing leadership and suggest the best courses of action. The emphasis is on strategic thinking and quality improvement in health care delivery, policy, and regulatory environments. Students are expected to critically examine and integrate selected leadership styles and apply differing approaches to different situations. In the companion practicum (NURS 9820), students are expected to apply the principles learned in a mentored leadership experience in a health care delivery organization or other organizations (e.g., community-based health
centers), nursing education, regulatory, or policy setting environments. Required of all D.N.P. students in the second year. 3 Course cr

**NURS 9820a, Leadership Development Practicum**  Mary Ann Camilleri
Students participate in a mentored leadership initiative in a clinical, educational, or regulatory environment or with local and national policy makers. The expected outcome is a final scholarly paper that applies and evaluates their evidence-based leadership model and related strategies to an agreed upon leadership initiative. The students, in collaboration with their assigned mentor(s), identify the change initiative and develop a timeline for the negotiated deliverables. Required of all D.N.P. students in the second year. A total of forty-five clinical hours is required, and the students are expected to negotiate with their assigned mentor how these hours will be scheduled. Students are expected to keep a reflective log of their activities in e-portfolio, labeled as “practica.” 1 Course cr

**NURS 9890b, D.N.P. Project: Part 1**  Staff
This course is designed to help students integrate D.N.P. course content and practica into their project proposal. Common conceptual framework and models of care are presented. Methods for developing and evaluating D.N.P. projects are discussed. Strategies to establish project working relationships are explored. During this course, draft proposals are reviewed using the Guidelines for Developing and Implementing a D.N.P. Project, with the addition of rubrics for evaluation of the work. Students present their proposal for critique by their project adviser and faculty of record in order to finalize their proposal for presentation and approval. Required of all D.N.P. students in the first year. 2 Course cr

**NURS 9900a, D.N.P. Project: Part 2**  Jane Dixon and Joan Kearney
This course is designed to assist students as they integrate D.N.P. course content and clinical practica into a final D.N.P. project proposal. Students are expected to work in concert with their assigned D.N.P. project adviser during the spring term of their second year on the development of their final proposal. Draft proposals are reviewed using the Guidelines for Developing and Implementing a D.N.P. Project, with the addition of rubrics for evaluation of the work. The student is expected to present the proposal for critique by peers, project adviser, and course instructor. Required of all D.N.P. students in the second year. Three hours per week. 2 Course cr

**NURS 9980a and NURS 9981b, Leadership Immersion Practicum**  Jessica Coviello
The Leadership Immersion is a yearlong, mentored experience in which students apply relevant knowledge to an evidence-based experience culminating in a final D.N.P. project in NURS 9990/NURS 9991. Students employ effective communication and collaboration skills to influence improved health care quality and safety and to negotiate successful changes in care delivery processes within and/or across health and health care systems and organizations. Students complete the immersion under guidance of the site mentor, who will be a member of the nursing faculty D.N.P. project adviser/committee under the leadership of the D.N.P. project chair and the D.N.P. director. Required of all D.N.P. students in the final year. 225 practicum hours. Prerequisites: successful completion of all required theoretical and D.N.P. project courses as well as an approved D.N.P. project proposal. 2½ Course cr per term
NURS 9990a and NURS 9991b, D.N.P. Project: Evidence-Based Practice Change
Jessica Coviello

Students apply relevant knowledge to an evidence-based, yearlong experience culminating in a final D.N.P. project manuscript, which will be submitted for publication. The D.N.P. project includes critical review and integration of relevant literature/research that provides support of the identified population-based health issue or problem, as well as at least one policy and/or evidence-based strategy that has the potential to address that health issue or problem. Required of all D.N.P. students in the final year. 2½ Course cr per term

Courses in Yale College

Advanced courses in various departments of Yale College may be elected by students enrolled in the School of Nursing if schedule conflicts prevent them from obtaining particular course content on the graduate level. To enroll in a course offered by Yale College, students must first obtain permission from their adviser, the instructor of the course, and the departmental director of undergraduate studies. The elected course must be listed on the student’s School of Nursing course schedule within the prescribed period for course registration.

Courses in Yale University Graduate and Professional Schools

Students in the School of Nursing may elect courses offered by the various departments of the Graduate School of Arts and Sciences and other professional schools of the University. In the past, students have elected courses from the School of Medicine; courses in Sociology, Psychology, and Anthropology at the Graduate School; and courses offered by the Schools of Art, Divinity, Law, Management, Music, and Public Health. Students are encouraged to consult the bulletins of these schools (see https://bulletin.yale.edu), in which course offerings are listed and described, to seek content that may be relevant to their individual educational goals. Subject to the approval of the student’s adviser, the instructor of the course, and the departmental director of graduate studies, the elected course must be listed on the student’s School of Nursing course schedule within the prescribed period for course registration. Students should also check with the registrar of the individual school in which the course is elected for registration procedures specific to that school. Any fees incurred for courses taken at the Graduate School and the professional schools will be the responsibility of the student.
YSN STUDENT POLICIES AND GUIDELINES

The Yale School of Nursing expects students to understand and follow its set student policies and guidelines intended to help students navigate their academic career at YSN. The information in this section includes policies, procedures, guidelines, and resources available to YSN students and outlines the School’s expectations for students.

Questions regarding the contents of this chapter can be directed to Saveena Dhall, associate dean of student life, saveena.dhall@yale.edu, 203.737.2258.

For all YSN student policies and guidelines, see https://nursing.yale.edu/students/ysn-student-resources-guidelines. The list of policies and guidelines, including those referenced in full below, includes:

Academic Integrity
Access Student Records
Challenge Policy
Children in YSN Classrooms and Common Areas
Course Withdrawal
Disciplinary Procedures of the School of Nursing (see below)
Education Records
Grading System and Definitions of Honors, High Pass, Pass, Fail (see below)
Inclement Weather Information
HIPAA Guidelines
Leave of Absence and Withdrawal (see below)
Licensure (see below)
Mandatory Background Check
Military Leave (For those students in the Armed Forces, we thank you for your service. Please see also Leave of Absence and Withdrawal, below, which provides information in the case of military deployment.)
M.S.N./D.N.P. Students in Academic Difficulty (see below)
Non-Matriculated Auditors and Students
Notice of Privacy Practices
Part-Time Study for M.S.N. and Post-Master’s Certificate Students
Policy on Student Participation in Commencement before Completion of Requirements (see below)
Poster and Publicity Policy for YSN Student Organizations (see below)
Request for a Grade of Incomplete

Student Personal Conduct Policy (see below)
Student Use of Degree Credentials
Summer Registration for Students
Technical Standards for Admission and Progression (see below)
Disciplinary Procedures of the School of Nursing

All School of Nursing students are governed by the School’s policies and procedures and by a standard of conduct appropriate for a student of the health professions. These procedures will be used whenever there appears to have been a breach of the policies and/or standard of conduct, with the one exception of cases where there is an allegation that the student has committed academic fraud (including falsification or fabrication of data and plagiarism) in the course of proposing, conducting, or reporting research supported by the federal government. In cases of academic fraud, the allegation will instead be addressed under the “Policies and Procedures for Dealing with Allegations of Academic Fraud at Yale University.”

A student accused of a breach of the School’s policies or the standard of conduct will be presumed innocent unless and until found, pursuant to these procedures, to have committed a breach of conduct.

REPORT

The process begins when the dean of the School of Nursing is informed of any conduct by a student that appears to be in breach of the School’s policies or the standard of conduct expected of those in the health professions. This information shall come in the form of a written report, by a member of the faculty, administration, or staff, by another graduate or undergraduate student, or by a member of the public.

NOTICE TO THE STUDENT

Upon receipt of a formal complaint, the dean will promptly inform the student in writing that a complaint has been made, the nature of the charge, and ask for a response and/or explanation. This notification shall contain a statement of the conduct reported, the policy or standard of conduct it appears to contravene, all documents obtained by the dean that are relevant to the report, and a printed copy of these procedures and the possible penalties.

THE STUDENT’S INITIAL RESPONSE

The student will have one week after the notification to respond initially to the charge. The student may, for example, admit the violation; deny the violation entirely; admit part but not all of the violation; or assert extenuating circumstances. If the student admits the violation (with or without extenuating circumstances) and requests a disposition without a formal hearing, the dean will proceed as in 5 below. Otherwise the dean will consider the student’s initial response, if any, and either withdraw the charge or forward it to the Committee on Discipline for a formal hearing.
EVALUATION OF THE REPORT

The dean will ordinarily make a determination within two weeks of receiving the initial report. In making that determination, the dean may consult with other faculty within the School or officials of the University, provided that in the interest of confidentiality the dean will not consult more widely than deemed necessary. The dean may also obtain other information and/or documentation that the dean thinks may be useful. If it is determined that the conduct reported, if true, falls within the School’s policies and/or standards of conduct expected of health professionals and if the student denies the charges, admits only partial violation, or claims extenuating circumstances, then the dean shall refer the matter to the Committee on Discipline. If the dean decides that the charges do not fall within the purview of the Committee on Discipline, the dean will promptly notify in writing all individuals with whom the dean discussed the case that a preliminary investigation revealed that the charges did not warrant referral to the Committee on Discipline.

DISPOSITION WITHOUT A FORMAL HEARING

When a student admits a violation and requests a disposition without a formal hearing, the dean, usually in consultation with the relevant associate dean, will decide whether to grant the request, and if it is granted, will decide on the appropriate penalty for the violation and notify the student in writing. The dean will normally talk to the student before making such decisions. In any event, if the student desires, the student will have an opportunity to talk with the dean before the dean makes a decision about the appropriate penalty. If the student is dissatisfied with the penalty assigned by the dean, the student may, within seven days after receiving notice of the penalty, request a formal hearing before the Committee on Discipline, solely on the issue of the penalty. At such a hearing, the Committee on Discipline may uphold the dean’s decision or assign a more severe or lesser penalty. In the absence of such a request for a formal hearing on the penalty, the dean’s decision will be final.

Disciplinary decisions made by the Dean of the School of Nursing are final unless a change is recommended by the Committee on Discipline. Although students may request review of the decisions as described in these procedures, the decisions will remain in effect unless and until changed by the Dean.

PROCEDURES FOR FORMAL HEARINGS

Membership of the Committee

The Committee on Discipline is an ad hoc committee that will consist of two students (appointed by the chair of the Student Government Organization), two faculty, (appointed by the dean), and one associate dean (appointed by the dean). A chair will be selected from the faculty membership. The dean will appoint two alternates from the faculty. The Student Government Organization will be asked to appoint two alternates for the student members. A quorum will consist of three persons, including at least one student and one faculty member other than the associate dean. If a quorum is not available, the hearing will be delayed. If a quorum cannot reliably be achieved within two weeks, the Dean will appoint temporary members in either the student or faculty category.
Notice to the Student

Immediately after a case has been forwarded to the committee, the student shall be informed of its membership, and of the expected date of the hearing. The dean will encourage the student to seek advice, especially from the chair of the committee. If the student believes that any member of the committee might not be impartial in this case, the student may so inform the chair of the committee, giving specific reasons, at least one week before the hearing. The decision to excuse any committee member is made by a majority vote of the remaining members of the committee. If the charge of lack of impartiality be made against the chair, the decision (whether to excuse the chair from this hearing and temporarily place another faculty member of the committee in the chair) will be made by the dean of the School of Nursing.

Timing of the Hearing

Hearings will take place only during regular sessions of the University, not during intersessions, and must take place no later than the end of the term after the one in which the student is notified of the charge. Any additional documents or information that will be presented to the committee shall also be given to the student at least one week before the hearing. No new charges or categories of charge may be added during this week or at the hearing itself.

Conduct of the Hearing

All persons attending the hearing will address the group only after being recognized by the chair. Questions regarding points of order and procedure will be decided by the chair.

Counsel for the Student

1. Nonlegal advice and assistance: Any student who elects a hearing may be accompanied by an adviser, who may be any member of the University community without legal training. The role of the nonlegal adviser may include answering questions addressed to the adviser by the committee. The nonlegal adviser may also assist the student in making a presentation in those unusual circumstances where the student is unable to do so.

2. Legal advice: In a case where the student feels that the alleged conduct may have legal ramifications (for example, when a criminal charge is pending against the student for the alleged conduct that is the subject of the case), the student may have a legal adviser present at the hearing. In such cases, the student must notify the chair of the committee in advance so that a representative of the Office of the General Counsel may be present. The legal adviser and representative of the Office of the General Counsel may under no circumstances address the committee. The role of the legal adviser to the student may not go beyond quietly advising the student about the student’s legal situation.

Persons Present

The student has a right to be present at all times during the hearing. It is expected that the person who reported the facts (if disputed) and/or the person who brought the
charge of irregular behavior will be present at the hearing, to answer questions put by the student and the committee.

Witnesses

The student, having given the chair of the committee prior notice, may bring witnesses. The committee can also call witnesses. The chair shall determine what is a reasonable number of witnesses, but the student shall be allowed at least two witnesses.

Determination

At the conclusion of the hearing the committee shall meet in executive session to decide whether the conduct reported in fact occurred and whether it was a breach of the standard of conduct cited in the charge. The committee’s decision shall be made by a vote of at least three of its five members, or by a simple majority if fewer than five members are present. This decision shall be made by a preponderance of the evidence, voted on by secret ballot, and shall be final. In the event that the committee decides that the conduct reported occurred, and that it was a breach of the policy or standard of conduct cited in the charge, based on the seriousness of the breach of conduct, the committee shall also recommend the penalty, if any, to the dean. The dean may either impose the recommended penalty or a lesser one at the dean’s discretion. The dean will inform the student, orally if possible, and also in writing, of the committee’s decision and any penalty recommended.

Penalties

The range of penalties that may be imposed include, but are not limited to, reprimand, probation, suspension, or expulsion. In addition to imposing these penalties for offenses subject to disciplinary action, the School of Nursing may refer students for prosecution.

The penalties are defined as follows:

Reprimand: this is a matter of internal record only.

Probation: the student is in official jeopardy. The commission of a serious offense while on probation will normally result in suspension or expulsion.

Suspension: separation from the University for a stated period of time. A suspended student forfeits all privileges of enrollment, including attendance at classes, use of University libraries as well as other facilities. Suspension may require petition for readmission.

Expulsion: permanent separation from the University.

Record-Keeping

At the close of proceedings, the chair of the committee will prepare an abstract of the proceedings, including the decision and the recommended penalty, if any. The abstract should include no names. The abstract and any correspondence with the student shall be kept in the student’s file; except that if the student is exonerated, the student may choose to have no record in the file. A copy of the abstract shall be kept in the committee’s files for use in determining precedents in future cases. One copy of all documents in the case should be kept in the Office of the General Counsel.
Reconsideration of Disciplinary Decisions

The Committee of Review

There shall be a Committee of Review, which may review and, when appropriate, request reconsideration of disciplinary decisions made by the dean after a formal hearing by the Committee on Discipline. The Committee of Review will be composed of three persons, two of them members of the School of Nursing faculty, appointed as needed by the provost, one of whom shall be designated as chair of the committee. As needed, the Student Government Organization will select a student member to serve on the Committee of Review.

Request for Review

A student who has been assigned a penalty by the dean after a hearing by the ad hoc Committee on Discipline and who believes that the decision, in matters of fact or the assignment of penalties, is inconsistent with precedent or otherwise in error may submit a written request for review to the chair of the Committee of Review. The request must be received by the Committee of Review no later than sixty days after the student receives the decision of the dean. In order to review such requests, the Committee of Review will have access to all the written records of the Committee on Discipline.

Possible Actions by the Committee of Review

In response to such a request, the Committee of Review will have the right (1) to decline to take action; (2) to request in writing a reconsideration by the Committee on Discipline; or (3) to publish commentary on the case that, while maintaining the confidentiality of the Committee on Discipline hearings, seeks to clarify the principles involved in the case and to offer useful counsel for future decisions.

Possible Reasons for Requesting Reconsideration of a Decision

It is anticipated that in the large majority of cases, the Committee of Review will decline to take action. It will request reconsideration by the Committee on Discipline only in cases where it believes that (1) some pertinent evidence was not taken into account; (2) long-standing precedents, in decisions of culpability and the assignment of penalties, were ignored; (3) errors in procedure may have substantially affected the decisions; or (4) certain key principles of the University were not sufficiently considered in the original decision.

Response by the Committee on Discipline

The Committee on Discipline will have the authority to grant or deny a request for reconsideration. It is anticipated, however, that such requests will be rare and that in most instances the Committee on Discipline will give them the most serious consideration. In the case where the Committee on Discipline has granted the request to reconsider, the chairs of the Committee of Review and the Committee on Discipline will discuss appropriate procedures for the Committee on Discipline’s reconsideration. At a reconsideration of the case by the Committee on Discipline, the chair of the Committee of Review will appear before the Committee on Discipline in order to
make clear what motivated the call for reconsideration. The accused student and
the student’s adviser will have the right to be present during the appearance of the
chair of the Committee of Review and during any presentation of witnesses or other
evidence. The Committee on Discipline will be free either to alter or confirm its original
recommendations. In no case, however, may it make a finding of culpability where it
had previously exonerated a student. In matters concerning culpability, the Committee
on Discipline’s decisions will be final. The committee shall recommend a penalty, if any,
to the dean, but may not recommend a greater penalty than that assigned originally.
The dean, at the dean’s discretion, may either impose the newly recommended penalty
or a lesser one.

Reporting

The Committee of Review will be empowered to issue ad hoc reports on individual
cases, and may publish an Annual Report in which it makes clear the principles and
circumstances that led it to request reconsideration of certain cases, if in fact it has done
so during the course of the year. In the Annual Report, it may also reflect on general
principles and precedents guiding the administration of discipline in the School of
Nursing.

Grading System

The grading system consists of Honors (H), High Pass (HP), Pass (P), and Fail (F).
The School employs a standard set of definitions for each grade. Criteria for each grade
are the prerogative of individual faculty; however, the School uses a standard numerical
system for converting scored tests and assignments to the grading system, as follows:

- H Honors (92–100)
- HP High Pass (83–91)
- P Pass (74–82)
- F Fail (73 and below)

The standard numerical system is not used for Pass/Fail courses. Furthermore, Pass/
Fail courses are not included in the calculation of cumulative GPA on a student’s
transcript.

Final grades for Pass/Fail courses are assigned as follows:

- Pass (P/F)
- Fail (F/F)

Four additional indicators may appear on a student’s transcript:

- Incomplete (INC)
- Credit Waiver (CRW)
- Audit (AUD)
• Full-Year Course (Y). A “grade” of Y is assigned for the first term of a full-year course and will be converted to a standard grade once both terms are completed.

HONORS (H)
Superior graduate-level performance. Superior performance is maintained with new or complex material. Consistently demonstrates complete and accurate understanding and application of knowledge and skills. Synthesizes and integrates data from relevant disciplines and evidence-based sources to make decisions. Independently and appropriately initiates and follows through with learning opportunities.

HIGH PASS (HP)
Above-average graduate-level performance. Deals with new or complex material when periodic consultation is given. Demonstrates conceptual and accurate understanding and application of theoretical knowledge and skills. Uses information from relevant disciplines and evidence-based sources when developing a database or making decisions, but does not always achieve synthesis and true integration. Follows suggestions about opportunities that will enhance learning.

PASS (P)
Meets requirements as derived from course objectives. Demonstrates adequate understanding and application of theoretical knowledge and skill.

FAIL (F)
Does not meet requirements as derived from course objectives. No credit is given for the course.

PASS/FAIL (P/F)
The Pass/Fail course has been completed satisfactorily without identifying level of performance.

FAIL/FAIL (F/F)
The Pass/Fail course has not been completed satisfactorily. No credit is given for the course.

INCOMPLETE (INC)
All students are encouraged to complete all course work by the end of the term. However, a student and instructor may agree to an extension on completing course work. A grade of Incomplete (INC) on a transcript refers to such unfinished course work. For additional information, see the Request for a Grade of Incomplete policy at https://nursing.yale.edu/students/ysn-student-resources-guidelines.

CREDIT WAIVER (CRW)
Ungraded credit for work completed at another school that is applied toward a course requirement at YSN. Receiving a course credit toward the requirements for the degree requires demonstration of competence or mastery of the particular subject matter. More information is available at https://nursing.yale.edu/students/registrar/challenge-policy.
AUDIT (AUD)
A student who wishes to audit a course outside of Yale School of Nursing must receive permission from the instructor (not all faculty allow auditors) and YSN adviser and must officially enroll in the course as an auditor by contacting the Office of the Registrar at YSN. Typically, the minimum general requirement for auditing is attendance in two-thirds of the class sessions; instructors may set additional requirements for auditing their classes. Audited courses appear on the student’s transcript with a grade of AUD.

Leave of Absence and Withdrawal
It is to the School’s advantage to have enrolled students complete the course of study. When extenuating circumstances arise which require a student to be absent, all reasonable efforts will be made to accommodate the situation and enable the individual to meet the requirements for the degree.

It is understood that this policy and these procedures apply to situations in which the student will be absent from the School for the remainder of a term or longer.

LEAVE OF ABSENCE
Leave of absence (LOA) is permission granted to a student to interrupt the program of study for a specified time.

Since the purpose of a leave is to relieve a student of educational obligations, students will not normally be allowed to enroll in courses, audit courses, or continue in scholarly work during the period of leave.

Granting of Leave
1. Students should meet with their academic adviser and specialty/program director to discuss their request. Students must complete the appropriate form before a request can be considered. Forms can be found online at http://nursing.yale.edu/withdrawal-leave-absence.
2. The request for LOA must be approved by the specialty/program director after consultation with the student. The request is approved and forwarded to the division chair and the associate dean of student life. Approval of leave will be noted by a formal letter to the student from the associate dean, with a copy to the division chair, specialty/program director, academic adviser, and the financial aid officer.
3. The granting of a student leave must be in accordance with the Academic Progression Policy.
4. There must be sufficient evidence that circumstances, medical or otherwise, exist that make it impossible or difficult for the student to continue with a program of study; and there must be evidence that once these circumstances are resolved, the student would be able and committed to continuing the program of study. This determination is made by the specialty/program director after an interview with the student, consultation with the associate dean of student life and division chair, and review of the clinician’s recommendation when indicated.
5. International students who apply for an LOA must consult with Office of International Students and Scholars (OISS) regarding their visa status.
Yale Health

Students on LOA are eligible to purchase Yale Health Student Affiliate Coverage for the term(s) of the leave. See Health Services in the chapter Yale University Resources and Services.

Term of Leave

LOA will be granted, for a fixed and limited term, which will ordinarily be two terms or less. The specific length of the LOA is determined by the associate dean of student life, upon receipt of recommendation from the division chair and specialty/program director, with appropriate consultation with the student.

Medical Leave

A student who must interrupt study temporarily because of illness or injury may be granted a medical leave of absence based on the written recommendation of the director of Yale Health or the director of Yale Mental Health and Counseling, and with the approval of the associate dean of student life and the student’s division chair and specialty/program director. The general policies governing leaves of absence are described above. Students who are making satisfactory progress toward their degree requirements are eligible for a medical leave any time after matriculation.

The School reserves the right to place a student on a mandatory medical leave of absence when, on the recommendation of the director of Yale Health or director of Yale Mental Health and Counseling, the dean of the School of Nursing determines that, because of a medical condition, the student is a danger to self or others, the student has seriously disrupted others in the student’s residential or academic communities, or the student has refused to cooperate with efforts deemed necessary by Yale Health and the dean to make such determinations. Each case will be assessed individually based on all relevant factors, including, but not limited to, the level of risk presented and the availability of reasonable modifications. Reasonable modifications do not include fundamental alterations to the student’s academic, residential, or other relevant communities or programs; in addition, reasonable modifications do not include those that unduly burden University resources.

An appeal of such a leave must be made in writing to the dean of the School of Nursing no later than seven days from the effective date of the leave.

An incident that gives rise to voluntary or mandatory leave of absence may also result in subsequent disciplinary action.

Students who are placed on medical leave during any term will have their tuition adjusted according to the same schedule used for withdrawals. (See Tuition Rebate and Refund Policy in the chapter Educational Expenses and Financial Aid.)

Before re-registering, a student on medical leave must secure written permission to return to School from the director of Yale Health or the director of Yale Mental Health and Counseling. The letter must be presented to the School before the student resumes studies following a mandatory medical leave.
Parental Leave

A student who wishes or needs to interrupt study temporarily for reasons of pregnancy, maternity care, or paternity care may be granted a leave of absence for parental responsibilities. The general policies governing all leaves of absence are described above.

Any student planning to have or care for a child is encouraged to meet with the specialty/program director as soon as possible to discuss individualized leaves or other short-term arrangements. For many students, short-term arrangements rather than a leave of absence are possible.

Return after Leave

A student on LOA has the right to return to the School to complete the requirements for the degree at the date the LOA expires, provided that:

1. The student notified the School, in writing, by the date specified in the original letter granting the LOA, confirming intent to return;
2. The student has complied with any written conditions of the LOA by the time the LOA has expired; and
3. In the case of a medical LOA, a medical statement has been provided in accordance with the above terms, and the division chair, specialty/program director, and associate dean of student life have determined that the student is eligible to return.

A student who, for any reason, does not enroll at the termination of the LOA shall be determined to have terminated association with the School, will be withdrawn, and will be ineligible to return.

Records

When LOA is granted, appropriate materials will be filed in the student’s folder regarding date and length of leave. The associate dean of student life will notify the registrar and the Financial Aid Office so that they may communicate with Student Financial Services, Yale Health, and other offices as deemed necessary. They will follow the same procedure if leave is extended and/or ended by the student’s return or termination of the student’s association with the School.

U.S. MILITARY LEAVE READMISSIONS POLICY

Students who wish or need to interrupt their studies to perform U.S. military service are subject to a separate U.S. military leave readmissions policy. In the event a student withdraws or takes a leave of absence from YSN to serve in the U.S. military, the student will be entitled to guaranteed readmission under the following conditions:

1. The student must have served in the U.S. Armed Forces for a period of more than thirty consecutive days;
2. The student must give advance written or verbal notice of such service to the associate dean of student life. In providing the advance notice the student does not need to indicate an intent to return. This advance notice need not come directly from the student, but rather, can be made by an appropriate officer of the U.S. Armed Forces or official of the U.S. Department of Defense. Notice is not required
if precluded by military necessity. In all cases, this notice requirement can be fulfilled at the time the student seeks readmission, by submitting an attestation that the student performed the service.

3. The student must not be away from the School to perform U.S. military service for a period exceeding five years (this includes all previous absences to perform U.S. military service but does not include any initial period of obligated service). If a student's time away from the School to perform U.S. military service exceeds five years because the student is unable to obtain release orders through no fault of the student or the student was ordered to or retained on active duty, the student should contact the associate dean of student life to determine if the student remains eligible for guaranteed readmission.

4. The student must notify YSN within three years of the end of the U.S. military service of the intention to return. However, a student who is hospitalized or recovering from an illness or injury incurred in or aggravated during the U.S. military service has up until two years after recovering from the illness or injury to notify YSN of the intent to return; and

5. The student cannot have received a dishonorable or bad conduct discharge or have been sentenced in a court-martial.

A student who meets all of these conditions will be readmitted for the next term, unless the student requests a later date of readmission. Any student who fails to meet one of these requirements may still be readmitted under the general readmission policy but is not guaranteed readmission.

Upon returning to YSN, the student will resume education without repeating completed course work for courses interrupted by U.S. military service. The student will have the same enrolled status last held and with the same academic standing. For the first academic year in which the student returns, the student will be charged the tuition and fees that would have been assessed for the academic year in which the student left the institution. YSN may charge up to the amount of tuition and fees other students are assessed, however, if veteran's education benefits will cover the difference between the amounts currently charged other students and the amount charged for the academic year in which the student left.

All students in clinical programs who are away from YSN for more than two consecutive terms are required to pass a reentry assessment to demonstrate clinical safety and proficiency. This assessment will normally consist of a written exam, written cases, and demonstration of a comprehensive history and physical exam with relevant SOAP note documentation. The assessment will include content from the student’s clinical specialty area encompassing relevant didactic and clinical courses completed prior to the leave of absence. In the case of a student who is not prepared to resume studies with the same academic status at the same point at which the student left or who will not be able to complete the program of study, YSN will undertake reasonable efforts to help the student become prepared. If after reasonable efforts, YSN determines that the student remains unprepared or will be unable to complete the program or after YSN determines that there are no reasonable efforts it can take, YSN may deny the student readmission.
WITHDRAWAL

Reasons for Withdrawal

Withdrawal is termination of the student’s association with the School. Withdraw may be initiated by the student or by faculty, and the student may be eligible or ineligible to return. In rare cases, at the discretion of the dean, the School may withdraw a student if it is determined that the student is a danger to self or others or if the student is unable to act on the student’s behalf to prevent academic and/or financial jeopardy. Students in the GEPN year may be withdrawn from the program by the program director and division chair due to a course failure. Failure of a course means the student is unable to progress in the GEPN program. For students with academic difficulty in the M.S.N. specialty years or the D.N.P. program, procedures are outlined below in M.S.N./D.N.P. Students in Academic Difficulty.

Withdrawal Procedures

Students who initiate withdrawal are required to complete and submit the withdrawal form that is available on the School’s website at http://nursing.yale.edu/withdrawal-leave-absence. If a student is withdrawn from the School due to academic failure, the specialty/program director and the student’s academic adviser will meet with the student to notify the student that the student is being withdrawn from the program. The specialty/program director will follow up with an official letter of withdrawal that includes: (1) date the student was notified of the withdrawal, (2) rationale for withdrawal, (3) term of withdrawal, and (4) signature of the director. The letter of withdrawal is sent to the student and copied to the associate dean of student life, the division chair, and the executive deputy dean. In the circumstance that the student is withdrawn and ineligible to return, the student’s transcript will state “Withdrawn—ineligible to return” and a letter will be placed in the student’s file.

Upon receipt of the withdrawal form from the student or the official letter of withdrawal from the specialty/program director, the associate dean of student life will notify the YSN Financial Aid Office and the YSN registrar. Tuition charges will be adjusted as specified in Tuition Rebate and Refund Policy in the chapter Educational Expenses and Financial Aid.

Petition for Readmission

The student who is eligible to return to the program, and desires readmission, must first meet with the specialty/program director and follow up with a petition to the School for readmission no later than three months prior to the start of the following academic year. The written petition should be sent to the specialty/program director and the associate dean of student life along with updated transcripts and a résumé or CV, if indicated. Petitions will be reviewed by the specialty/program director with the program faculty, and notification of the decision will be sent to the student within a month of receipt. If the student is permitted to return to the program, the specialty/program director will identify the expectations and requirements, including but not limited to courses. If more than two terms have lapsed, the student will be required to establish clinical competency either through a comprehensive exam or by retaking a clinical course.
Licensure

GRADUATE ENTRY PRESPECIALTY IN NURSING (GEPN)

Students in the Graduate Entry Prespecialty in Nursing must pass the NCLEX-RN and submit proof of their Connecticut R.N. licensure by December 1 of the first year of their specialty program.* Any student who does not pass the NCLEX-RN, or who does not sit for the NCLEX-RN prior to this date, may be required to withdraw or take a leave of absence and will be required to make individual arrangements for completion of the specialty requirements after receiving a passing grade on the NCLEX-RN. GEPN students must follow steps outlined in the Student NCLEX Reporting Process (https://nursing.yale.edu/sites/default/files/files/NCLEXReporting.pdf).

* Some specialties may have licensure requirements based on the licensure requirement of the assigned clinical sites. In such circumstances, students are advised to obtain their Connecticut R.N. license as quickly as possible to ensure they can continue with their clinical hours at sites with R.N. licensure requirements.

MASTER’S PROGRAM FOR NURSES WITH BACCALAUREATE DEGREES

Requirements for admission for registered nurses include a baccalaureate degree from an accredited college or university, and graduation from a school of nursing. Applicants must be licensed in at least one state. If the student is a new graduate from a school of nursing, the student’s Connecticut R.N. license must be submitted 90 days from the student’s graduation date. Incoming students with an out-of-state R.N. license must obtain a Connecticut R.N. license prior to enrollment and no later than August 1. All students are required to maintain active Connecticut R.N. licensure and Basic Life Support (BLS) for the Healthcare Professional certification through the American Heart Association while enrolled in the School of Nursing. Students who have not passed the NCLEX-RN by the above mentioned dates may be required to withdraw or take a leave of absence and will be required to make individual arrangements for completion of the specialty requirements after passing the NCLEX-RN exam.

DOCTOR OF NURSING PRACTICE PROGRAMS

Applicants to the Healthcare Leadership, Systems, and Policy D.N.P. program must hold a current R.N. license to practice in the United States. Clinical D.N.P. program applicants must hold a current license to practice as an R.N. as well as an advanced practice nurse or certified midwife in the United States prior to the start of the first term of the Clinical D.N.P. program.

PH.D. STUDENTS

An active R.N. license is not required unless the student is practicing. However, Ph.D. students are encouraged to maintain their R.N. license.

M.S.N./D.N.P. Students in Academic Difficulty

In the Master of Science in Nursing (M.S.N.) and Doctor of Nursing Practice (D.N.P.) programs, satisfactory academic progress is defined as a grade of Pass or higher in all required courses or a grade of Pass in Pass/Fail courses. Satisfactory completion of all
required courses in a given term is a prerequisite for progression in the program of study. Required courses are defined in the program's plan of study. These program requirements are listed in the YSN Bulletin in the chapters Master's Program (M.S.N.) and Doctor of Nursing Practice (D.N.P.) Programs, and on the YSN website (https://nursing.yale.edu/masters-specialties). There are two possible actions that may be taken when a student is in academic difficulty. They are separate actions as defined in this policy. The first is an academic warning, which may or may not lead to the second, academic probation.

ACADEMIC WARNING

Written warning of the risk of failure must be provided to the student as soon as course evaluation procedures provide evidence that there is a risk. The purpose of the academic warning is to provide the student notice of the risk of failure. Academic warning applies to students at risk for failure in classroom, clinical, or research activities. It is a faculty responsibility to maintain ongoing documentation of each student's progress in courses. In academic courses, documentation of a student's progress may be evident in written work grades, faculty comments on exams/projects, and faculty notes on classroom participation if that is part of the grade. In clinical practica, documentation may be evident in clinical objective checklists, comments on progress evaluations, faculty notes about observed practice, supervisory sessions, or reports of clinical staff working with the student.

The warning should clearly detail deficit areas and, where appropriate, spell out the objectives the student is at risk for not meeting. The written warning should be sent to the student with a copy to the program chair, the specialty director or program director, the academic adviser, and the associate dean of student life. The faculty member who issued the warning may request a meeting with the student. The faculty member and the student, in consultation with the clinical preceptor if applicable, should plan corrective action.

Students who fail a required course may not continue with any academic or clinical course work until notified by the specialty director or program director of the student’s status in the School. The program chair, associate dean of student life, specialty director or program director, course instructor, and the student’s academic adviser will review the student’s case to determine which of the following will occur:

1. The student may be withdrawn from the School.
2. The student may be placed on academic leave of absence and allowed to return to retake the failed course.
3. In rare circumstances, the student may be allowed to continue in the program and retake the failed course at the next available offering.

ACADEMIC PROBATION

If the student is allowed to continue in the program, the student will be placed on academic probation until the student has successfully completed the failed course. For #2 and #3 above, the faculty member, specialty director or program director, and program chair will develop a plan and time frame for retaking the failed course. If applicable, the student may be charged additional tuition for the retake of the course at the per credit hour rate. If the student achieves a grade of Pass or better upon retaking
the course, probationary status will be removed, and the student will be permitted to continue in the program. Students will be allowed to retake the failed course only once.

Each course failed is considered one occurrence of academic probation. Throughout their enrollment at YSN, students may be placed on academic probation a maximum of two times before they are withdrawn from the program.

The financial aid officer will be notified by the associate dean of student life only when a probation status is likely to affect the student’s eligibility for aid or registration status.

**Policy on Student Participation in Commencement before Completion of Requirements**

Students who wish to participate in Commencement ceremonies in May and have not completed course requirements and are in “good standing” may participate only if the faculty of record for requirement(s) in question—in consultation with the specialty director, associate dean of student life, and executive deputy dean—attest that the student is expected to finish all requirements no later than December 31 of that same year. The student’s specialty/program director will create an academic plan with the student for completion of remaining work to meet the December 31 deadline. The student will submit a request for an “incomplete” grade to the registrar for any courses with incomplete work in which the student is enrolled. For any spring-term courses with incomplete work in which the student is enrolled, the faculty of record will submit a grade of “incomplete” to the registrar.

Any time that a student is allowed to participate in the May Commencement before completion of requirements, an asterisk will be printed following the student’s name in the program that states the student is expected to complete requirements by December of that year. These students will not be presented to the Yale Corporation for conferral and will not receive a diploma until all their work is finalized and graded.

**Poster and Publicity Policy for YSN Student Organizations**

Posters must be confined to the bulletin boards, kiosks, display cases, and other spaces that the Yale School of Nursing has specifically designated for posters. Other forms of non-electronic publicity on campus grounds or buildings at Yale School of Nursing are prohibited. The following regulations apply to YSN student organization posters on the Yale School of Nursing’s campus:

- Posters may not exceed 11 by 14 inches. Only one copy of each poster may be placed on the same bulletin board/display area.
- Posters for an event must provide the name of the event, its date, time, and location, including the name of its sponsoring organization.
- To post in a particular Yale building outside of YSN, follow the applicable poster policy of that institution/organization.
· Authorized staff members\(^1\) typically remove all posters from bulletin boards and other designated spaces once a week. Posters improperly placed in other locations (interior or exterior walls, doors, signs, trees, utility poles, etc.) or that otherwise do not comply with this policy will be subject to immediate removal.

· Unless by authorized staff members, the removal, defacing, destroying, or posting over existing posters is prohibited.

· Glue, staples, and tape of any variety (e.g., Scotch tape, masking tape, duct tape) are damaging and may not be used on any Yale property. Thumbtacks or pushpins should be used on bulletin boards but may not be used on any interior or exterior woodwork.

Violation of these regulations may result in a student organization’s loss of official recognition and consequent loss of funding opportunities. Violations may also subject individuals to discipline under other University or School regulations. Students or student organizations may also be charged for the costs of removing improperly posted materials and repairing any damaged property.

\(^1\) Authorized staff members include staff of the Office of Student Life and YSN Manager of Facilities and Administrative Services.

**Student Building Use**

The Yale School of Nursing building at 400 West Campus Drive in Orange, Connecticut, is a shared space among faculty, staff, and students. The following protocol has been proposed to:

1. Ensure a safe environment for our community
2. Adhere to University best practices and compliance standards
3. Support Yale and YSN sustainability efforts by reducing energy use.

**PROTOCOL**

· Students will be granted access to all floors of the building during regular school hours (defined as 7:30 a.m. to 8 p.m.).

· Between 8 p.m. and 7:30 a.m., Yale Nursing students will be permitted access to the garden level and first floor of the building only (garden-level classrooms, wellness room, the Hub, first-floor classrooms, study rooms, and the Learning Commons).

· Exceptions include approved events and/or classes that take place during non-school hours.

· Building access will be extended during certain exam periods and communicated in advance to students.

**Student NCLEX Reporting Process**

Students are required to have an active Connecticut R.N. license as per YSN’s Licensure Policy. This NCLEX reporting process outlines student responsibilities with respect to reporting exam date(s) and results by set deadlines. This standardized process will allow for students to receive remediation if needed and allow YSN faculty and staff to better support students, particularly those who have not passed the NCLEX-RN.
GUIDELINES FOR TAKING AND REPORTING NCLEX RESULTS

1. Students are given information in May on the NCLEX-RN testing process, including recording date of exam and reporting results.

2. Upon receipt of GEPN student grades, final transcripts are sent to the Department of Public Health by the Office of Student Life in early August.

3. GEPN students secure an NCLEX-RN exam date and record their exam date in eValue by September 15.

4. GEPN students must pass the NCLEX-RN by December 1 of their first specialty year.*

5. RN students who are not new graduates must upload their active Connecticut R.N. license into eValue by August 1.

6. New RN graduates must pass NCLEX-RN and upload their Connecticut R.N. license into eValue by 90 days from their graduation date.

7. Post-Graduate Master’s Certificate students must upload their active Connecticut R.N. license into eValue by August 1.

8. All incoming D.N.P. students are required to have an active R.N. license and upload it into eValue by August 1.

9. Ph.D. students are not required to have an active R.N. license unless they are practicing. However, they are encouraged to maintain their R.N. license.

10. After GEPN students take the NCLEX-RN exam, they must record their unofficial result, PASS OR FAIL, in eValue within three days of the exam date.

11. Upon receipt of the Connecticut R.N. license, students must upload their Connecticut R.N. license into eValue within three days so that it may be verified by the Office of Student Life.

* Some specialties may have licensure requirements based on the licensure requirement of the assigned clinical sites. In such circumstances, students are advised to obtain their Connecticut R.N. license as quickly as possible, to ensure they can continue with their clinical hours at sites with R.N. licensure requirements.

GUIDELINES FOR STUDENTS WHO DO NOT PASS THE NCLEX

1. If the student rescheduled the exam or did not pass the NCLEX, the student must record the new exam date in eValue.

2. Students who do not pass the NCLEX must report this to the associate dean of student life and their specialty director(s).

3. Obtain a new exam date as soon as possible given the 45-day wait period and record the new exam date in eValue.

4. Make an appointment with their specialty director(s) to review their remediation plan based on the NCLEX score report.

5. After taking the exam, students must record their unofficial result, PASS OR FAIL, in eValue within three days of the exam date and inform their specialty director(s) and the associate dean of student life.
6. Upon receipt of the Connecticut R.N. license, students must upload their Connecticut R.N. license into eValue within three days so that it may be verified by the Office of Student Life. The Connecticut R.N. license must be uploaded into eValue by December 1.

**MAINTAINING AN ACTIVE LICENSE**

Students are responsible for maintaining an active Connecticut R.N. license and must upload their new and renewed license annually in order to remain compliant, participate in clinical hours, and attend classes. Students with out-of-state clinical placements will upload their additional licenses in eValue and seek assistance from the Clinical Support Unit if needed.

**Student Personal Conduct Policy**

The Yale School of Nursing (YSN) is an academic and professional community committed to the education of students and socialization of professionals for a variety of clinical and scholarly roles. The mission of YSN is better health for all people. This mission requires that all members of the YSN community contribute to creating a work and learning environment that maintains the highest standards of academic integrity, values honesty and free expression, and respects individual differences and viewpoints. All members of the community are expected to abide by the regulations of the University as well as to obey local, state, and federal laws. YSN students are expected to adhere to the following principles:

**Academic integrity** It is expected that students’ work represents their own efforts. Behaviors such as cheating on exams or other forms of tests, the falsification or fabrication of data, and plagiarism are prohibited. Students witnessing cheating are expected to contact the appropriate faculty member.

**Personal integrity** It is expected that students honestly represent their credentials, abilities, and situation. Behaviors such as altering transcripts or work history or misrepresenting one’s financial situation in order to obtain financial aid are prohibited. Students are expected to use professional judgment in their use of social media and assent to the federal regulations on health information privacy and security (HIPAA).

**Professional integrity** As adult learners, students are expected to share responsibility with faculty for their learning. This includes completing assignments in a timely fashion, coming to class and clinical sessions prepared, being actively engaged in classroom discussions, and assuming responsibility for assessing and addressing their learning needs. It is also expected that students conduct themselves in clinical settings in a way that is consistent with the goal of providing optimal patient care. Students’ interactions with clients and other professionals in these settings should respect differences, maintain confidentiality according to federal and state privacy standards, avoid stereotyping, and reflect nursing’s ultimate commitment to caring. Abuse or excessive use of drugs, including alcohol, narcotics, or chemicals, is considered improper professional conduct under the laws of the State of Connecticut Nurse Practice Act.

**Respect for person** It is expected that students will respect individual differences and diversity of ideas. Students are expected to welcome and engage in civil discussion
of conflicting viewpoints. Students are expected to demonstrate courtesy and respect for their classmates and professors in the classroom by adhering to general classroom decorum; this includes punctuality, refraining from cell phone use, respecting rules of the classroom as established by faculty, and communicating with faculty and students in a polite manner. Respectful communication includes both face-to-face and written interactions.

**Respect for property** It is all students’ responsibility to contribute to maintaining the physical environment of YSN and the University. Misuse of materials or University facilities, theft, or damaging property are prohibited. The unauthorized use of University services, equipment, or facilities is also prohibited. The possession or use on or around campus of explosives, incendiary materials, or weapons (including guns, ammunition, air rifles, paintball and pellet guns, Tasers, and knives) is absolutely prohibited.

**Sexual misconduct** Inappropriate sexual behavior is prohibited. Informal or formal complaints of sexual misconduct, including sexual harassment and sexual assault, may be brought to a Title IX coordinator or to the University-Wide Committee on Sexual Misconduct (see https://uwc.yale.edu). Students may contact the YSN Title IX coordinator or any other Yale University Title IX coordinator. A formal complaint of sexual misconduct must be pursued in accordance with the procedures of the University-Wide Committee on Sexual Misconduct. See Resources on Sexual Misconduct in the chapter Yale University Resources and Services.

Violations of the above principles will be referred to the YSN Committee on Discipline, and students who have violated the above principles will be subject to one or more of the following actions: counseling, reprimand, probation, suspension, dismissal, fine, restriction, or referral for prosecution. This policy allows for the consideration of infractions on a case-by-case basis. Final actions will depend on the seriousness of the infraction and the circumstances surrounding the case.

Students must sign a form attesting that they have read and will abide by this policy while enrolled at YSN.

**Technical Standards for Admission and Progression**

By accepting admission and enrolling in the Yale School of Nursing, students certify that they have read this policy and understand the technical standards for admission and progression in the program. In addition to didactic content, nursing education requires that a student must complete a clinical/practicum component that involves caring for patients. This policy reviews the School’s expectations for the student’s participation in and adherence to required technical standards in the classroom, simulation, and throughout clinical settings. The Yale School of Nursing does not discriminate on the basis of disability. If reasonable accommodations will allow an otherwise qualified student with a disability to meet these technical standards, reasonable accommodations will be provided. Students who require accommodations on the basis of disability must register with Student Accessibility Services (see Student
Accessibility Services in the chapter Yale University Resources and Services), provide supporting documentation to that office, and request accommodation.

Essential eligibility requirements for participation in the nursing program include the following technical standards:

**OBSERVATION/COMMUNICATION**

- Auditory, visual, and tactile ability sufficient to observe, monitor, assess, and respond to patient health needs in a variety of clinical settings
- Capacity to use data for demonstrations and oral presentations, and use visual images, sounds, and verbal and non-verbal communication to inform patient care
- Ability to record information accurately and clearly in oral and written form and communicate effectively and sensitively with patients and colleagues

**PHYSICAL/MOTOR**

- Physical abilities sufficient to move throughout clinical settings, execute motor movements, and perform manually based diagnostic procedures (i.e., palpation, auscultation, percussion, etc.) required to provide general and emergency patient care
- Gross and fine motor abilities sufficient to provide therapeutic nursing interventions that are safe and effective and that maintain safety and security standards
- Motor skills sufficient to meet the requirements specific to the specialty scope of practice

**INTELLECTUAL—CONCEPTUAL, INTEGRATIVE, AND QUANTITATIVE**

- Critical thinking sufficient for clinical and academic judgment
- Sophisticated problem-solving skills, including calculation, reasoning, analysis, and synthesis; ability to learn through a variety of modalities, including classroom, simulation, and clinical settings, individual and team-based learning, preparation of oral and written reports, and use of technology to support academic work
- Ability to integrate and assimilate complex information from multiple sources in varying amounts, and multiple educational experiences in a timely fashion in order to formulate accurate diagnosis and management plans
- Ability to comprehend spatial relationships and three-dimensional relationships of structures

**BEHAVIORAL/SOCIAL**

- Interpersonal ability to interact appropriately, sensitively, and compassionately with individuals, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds
- Ability to adhere to the Yale School of Nursing Personal Conduct Policy in academic and clinical settings
- Ability to demonstrate appropriate judgment in decision-making, in order to maintain safety and security of patients and to behave appropriately with patients, staff, students, and supervisors
Ability to function effectively under physically demanding workload, long hours, and in times of physical and mental stress; display flexibility and openness for changing environments.

Ability to engage in respectful, mature, and healthy client-provider relationships.

Updated July 2016
Approved May 2020 by Executive Committee; edited and final approval June 2020

YSN Alcohol Policy for Student-Organized Events

Yale School of Nursing is a community of adults, and the consumption of alcohol in a responsible manner may have a place within some YSN student-organized events. Students should bear in mind that YSN does not tolerate excessive drinking, nor any resulting harmful behavior, and that such conduct may violate YSN’s Student Personal Conduct Policy.

In view of the importance of promoting the responsible use of alcohol, the liability issues connected with alcohol service and consumption, and compliance with Connecticut state law, the following guidelines apply whenever alcohol is purchased with YSN funds and/or served or consumed on YSN property in connection with a student-organized event.

- Alcohol, whether purchased with YSN funds or purchased with private funds, may not be served or consumed on YSN property except in the context of YSN-approved events. Students seeking to hold an event where alcohol will be served should contact the Office of Student Life in advance of the event for approval.
- YSN funds may not be used to support private parties or any parties at student homes.
- In accordance with Connecticut state law, alcoholic beverages may be dispensed only to individuals over the age of twenty-one and may not be dispensed to any intoxicated person.
- Driving under the influence of alcohol or other drugs creates a significant safety risk and is strictly prohibited by Connecticut law. When returning from events where alcohol is served, YSN encourages students to use the West Campus Shuttle, rideshare apps, taxi services, or public transportation.
- Alcohol served on the YSN campus must be consumed within the room or area in which the event is held; taking open containers of alcohol to other rooms or areas is not permitted.
- Beer and wine are the only alcoholic beverages that may be served. Mixed drinks or other “hard” alcoholic beverages are not permitted. Only one drink at a time may be served to each individual.
- Whenever alcohol is served, appropriate quantities of nonalcoholic beverages and a substantial amount of food must be available at the same location. Potato chips, pretzels, etc., do not meet the requirement for “substantial” food.
- No events may have a theme that promotes alcohol consumption, e.g., beer pong party, booze cruise, etc.
Students should assist each other and any impaired guests, either by calling 911 or contacting Yale Health (203.432.0123) if the person's condition appears serious, or by helping to arrange transportation (either by calling a cab or by enlisting the help of sober friends to take the impaired guest home).

Any exceptions to this policy must be approved in writing by the executive deputy dean.

YSN reserves the right to add additional requirements based on event size and scope including, but not limited to, the presence of a police officer and/or the requirement that alcohol be served by a bartender who is certified by TIPS or a similar organization and who is not a YSN student.

Note: YSN encourages students struggling with alcohol dependency to seek out help from Yale Health, the YSN Dean's Office, and other available resources.

YSN Testing Accommodations Protocol

The need for testing accommodations at YSN has increased in the past few years and continues to be more evident each term, as it has across campus. Concomitantly, YSN is committed to adhering to the Americans with Disabilities Act and to mandates from Yale's Student Accessibility Services (SAS), which speak to YSN values of inclusion and diversity. To this end, in an effort to create a smooth testing coordination process and experience for students, staff, and faculty, procedures and responsibilities for students, faculty, and staff are as follows.

STUDENTS

- Students will be responsible for forwarding electronically their letter of accommodations received from SAS to their course faculty for courses where they wish to use their approved accommodations. The specific documentation provided to the student from SAS should be sent to their respective faculty within five business days of receiving it from SAS.
- Students will leave all personal items, laptop, and cell phone in their locker, car, etc. Nothing will be allowed to be brought into the assigned testing room/area.
- Students will abide by the honor code and not leave the testing room/area or remove the exam from the testing room and/or building. If the student must leave the room (i.e., bathroom emergency), the student must take the exam to the designated staff person (course instructor, senior administrative assistant, or testing coordinator).
- Students will receive specific information and instructions as to the date and time of the exam, start and end time of the exam, instructions for questions and bathroom breaks, and the contact person and where that person is located. This information will be e-mailed to each student at least the day before the exam.
- Students who do not wish to avail themselves of the accommodations for a specific exam should notify the administrative staff and course instructor at least three days prior to the exam.
OFFICE OF STUDENT LIFE AND ENROLLMENT SERVICES STAFF

- The registrar is responsible for recruitment and training of testing coordinators.
- The Office of Student Life will communicate with the student population about accommodations, student responsibilities, and important deadlines related to securing accommodations in a timely manner.
- The registrarial associate will be responsible for collecting and forwarding electronically to the senior administrative assistants for each program/specialty the letters of accommodations received from SAS. SAS letters include specific accommodations (time and a half, semi-private, etc.) for each student.
- The registrarial associate will send students with accommodations the YSN Testing Protocol upon receipt of their accommodations letter from SAS.

FACULTY

- Faculty will determine the date/time of the exam.
- Faculty will be responsible for notifying the respective senior administrative assistant of the students who have documented accommodations and specific dates of exams no later than the end of the first month of the term.
- Faculty will make themselves available to students and attempt to circulate to those students in separate rooms, if possible.

SENIOR ADMINISTRATIVE ASSISTANTS

- Senior administrative assistants will follow up with faculty regarding their exam and quiz schedules (i.e., dates, time, allotted time for exam/quiz) to determine the room needs for students with accommodations.
- Each term, the senior administrative assistant for each program/specialty will reserve rooms at YSN based on student accommodation needs and communicate these directly to the faculty instructor and/or student.
- In situations where testing space is limited (heavy midterm or exam season), the senior administrative assistants will work with the Business Office to identify any spaces not designated on EMS that may be used only in the rare occasion when testing space is limited.
- Senior administrative assistants will be responsible for notifying each student who requires accommodations with specific information and instructions about the test day. Specific information/instructions to students should be sent by e-mail at least the day before.
- Confidentiality of a student’s accommodation is critical. Senior administrative assistants will be sure to send separate e-mails to each student or blind copy the group of students.
- Specific information/instructions to the students will include:
  - Date and start time of exam.
  - Where to report on the day/time of the exam.
  - The importance of notifying the administrative staff immediately if there is an issue with the space assigned.
• What they are allowed to bring and not to bring: i.e., instructions regarding leaving personal items in lockers, their car, etc.
• Refer to the protocol so the student may review it in advance.
• Offer noise-canceling headphones if needed.
• Senior administrative assistants will place a sign outside the testing room that indicates a test is in progress, etc.
• In the event of a paper exam, if senior administrative assistants are determined as the designee to receive the completed exam, the end time of the exam should be written on the document.

Additional Student Guidelines

FERPA
For the Family Education Rights and Privacy Act (FERPA), see https://registrar.yale.edu/rights-privacy/student-rights-under-ferpa.

FREEDOM OF EXPRESSION
The Yale School of Nursing is committed to the protection of free inquiry and expression in the classroom and throughout the school community. In this, the School reflects the University’s commitment to and policy on freedom of expression as eloquently stated in the Woodward Report (Report of the Committee on Freedom of Expression at Yale, 1974). See https://studentlife.yale.edu/guidance-regarding-free-expression-and-peaceable-assembly-students-yale.

GRADUATE SCHOOL OF ARTS AND SCIENCES POLICIES
Nursing students in the Ph.D. program can access the Graduate School of Arts and Sciences Programs and Policies bulletin at https://bulletin.yale.edu.

GUIDELINES IN CASE OF OCCUPATIONAL EXPOSURE
See https://yalehealth.yale.edu/more/exposure-blood-or-bodily-fluids-work.

RESOURCES FOR STUDENTS TO ADDRESS DISCRIMINATION AND HARASSMENT CONCERNS
See https://student-dhr.yale.edu.

SERVICE ANIMAL POLICY
See https://your.yale.edu/policies-procedures/policies/4400-service-animals-and-emotional-support-animals#1. Students must first register their service animal with Student Accessibility Services (SAS) before they are permitted to bring their service animal to the building. Service animals registered with SAS are welcome at YSN. This includes during classes, meetings, and other events. Non-service animals (pets) are not permitted with the exception of planned occasions, and require prior approval from YSN.
UNIVERSITY STATEMENT ON DISCLOSURE OF DIRECTORY INFORMATION

EDUCATIONAL EXPENSES AND FINANCIAL AID

Tuition and Fees

For more information contact the YSN Financial Aid Office at ysnfinancialaid@yale.edu

MASTER’S PROGRAM (M.S.N.)

Tuition for students in the full-time M.S.N. program in 2020–2021 is $46,190 (divided evenly between the fall and spring terms). Students entering the GEPN program pay an additional one-time summer-term tuition of $18,323.

Tuition for students in the part-time M.S.N. program in 2020–2021 is $30,650 (divided evenly between the fall and spring terms).

In addition, full-time students in 2020–2021 pay an equipment and technology fee of $2,025, lab fees of $460, and a student activities fee of $120, all due in the fall term. Part-time students pay an equipment and technology fee of $695 and a student activities fee of $120.

Nurse-Midwifery and Women’s Health Nurse Practitioner Dual Specialty

Students who are accepted into the NM/WHNP dual specialty will pay an additional fee, split over four terms, beginning in the fall of the first specialty year. For students who entered the dual specialty in the 2019–2020 academic year, the additional fee is $15,000 (of which $3,750 is due each term for four terms). For students entering the dual specialty in the 2020–2021 academic year, the fee is $15,750 (of which $3,937.50 is due each term for four terms).

If, at the end of the first two terms, a student elects to drop one of the specialty tracks, the student will not need to pay the second-year dual specialty fee. If the student drops a specialty track in the second year, the fee will not be refunded.

DOCTOR OF NURSING PRACTICE PROGRAMS (D.N.P)

Tuition for students in the part-time Health Care Leadership, Systems, and Policy D.N.P. program in 2020–2021 is $30,660 (divided evenly between the fall and spring terms).

Tuition for students in the part-time Clinical D.N.P. program in 2020–2021 is $20,000 (divided evenly between the fall and spring terms). Students entering the program pay an additional one-time summer-term tuition of $6,060.

In addition, students in both programs pay an equipment and technology fee of $695 and a student activities fee of $120, both due in the fall term.

Tuition for clinical faculty who are currently teaching on a full-time basis at YSN will be $14,000 in 2020–2021 (divided evenly between the fall and spring terms). Full-time faculty entering the program pay an additional one-time summer-term tuition of
$3,360. Full-time faculty will need to agree to teach on a full-time basis for three years following graduation with the D.N.P degree.

Tuition for clinical faculty who are currently teaching on a part-time basis at YSN will be $14,240 in 2020–2021 (divided evenly between the fall and spring terms). Part-time faculty entering the program pay an additional one-time summer-term tuition of $7,120. Part-time faculty will need to agree to teach on a part-time basis for three years following graduation with the D.N.P degree.

POST-MASTER’S CERTIFICATE PROGRAM

The Post-Master’s Certificate Program and non-matriculated part-time study are available at $1,820 per credit. Applicable fees, such as the equipment and technology fee of $695 and the student activity fee of $120, are also assessed in the fall term.

ADDITIONAL FEES

Acceptance Fee

A nonrefundable fee of $600 is required within three weeks of the receipt of an offer of admission in order to secure a place in the entering class. For matriculating students, $300 will be credited toward the fall-term tuition.

Required Fees

The University requires hospitalization insurance for all students. Students will be billed $2,548 in 2020–2021 for single-student hospitalization/specialty coverage with Yale Health (see Health Services in the chapter Yale University Resources and Services). This fee may be waived with proof of alternative coverage for each year of enrollment.

Students are also responsible for the cost of equipment, uniforms, books, photocopying, transportation to and from clinical sites, and on-site parking, if needed.

Other Fees

Service fees are charged for late registration, course schedule changes after the add/drop period, Internet connectivity from a Yale residence hall, late return of library materials, and the like.

Tuition Rebate and Refund Policy

Students who withdraw from the School for any reason during the first 60 percent of the term will receive a pro rata rebate of tuition. No adjustment is made after 60 percent of the term has expired. In 2020–2021, no portion of tuition will be rebated in the fall term after October 27, 2020, for students in the D.N.P program; after November 1, 2020, for students in the GEPN program; and after October 29, 2020, for students in the M.S.N. and post-master’s programs. In the spring term, the dates are March 31, 2021, for students in the D.N.P program; and April 4, 2021, for students in the GEPN, M.S.N., and post-master’s programs. In the summer term, the dates are June 30, 2021, for students in the D.N.P. and GEPN programs; and July 10, 2021, for students in the M.S.N. program.
The death of a student will cancel charges for tuition as of the date of death, and the tuition will be adjusted on a pro rata basis.

A student who withdraws from the School of Nursing for any reason during the first 60 percent of the term will be subject to the proration of the student’s federal Title IV student aid. A student who withdraws after the 60 percent point has earned 100 percent of the federal Title IV student aid. In order to comply with federal regulations, the School must return to the U.S. Department of Education any unearned federal Title IV student aid. In 2020–2021, the last days for refunding federal Title IV student aid are the same as noted above for tuition. Aid will be refunded in the order prescribed by federal regulations, namely, first Federal Direct Unsubsidized Loan, then Federal Direct Grad PLUS Loan.

For purposes of determining the refund of all other sources of student aid (federal non-Title IV, state, private, or institutional scholarships and loans), a student who withdraws from the School of Nursing for any reason will be subject to the same pro rata schedule as for federal Title IV student aid.

All recipients of federal and institutional student loans who leave the School are required to complete an exit interview. Graduating students are required to complete the process before participating in commencement. Students leaving the School receive instructions on completing this process from Yale Student Financial Services.

WITHDRAWAL AND LEAVE OF ABSENCE

A leave of absence must be requested in writing and is subject to approval by the associate dean of student life. A request for withdrawal must also be in writing and presented first to the specialty or program director and then to the associate dean of student life. For both leave and withdrawal, the general rules of the University and other policies of the School are applicable. An exit interview is required at the School of Nursing, arranged through the office of the associate dean of student life. See Leave of Absence and Withdrawal in the chapter YSN Student Policies and Guidelines.

Student Accounts and Billing

Student accounts, billing, and related services are administered through the Office of Student Financial Services, which is located at 246 Church Street. The office’s website is http://student-accounts.yale.edu.

STUDENT ACCOUNT

The Student Account is a record of all the direct charges for a student’s Yale education such as tuition, room, board, fees, and other academically related items assessed by offices throughout the University. It is also a record of all payments, financial aid, and other credits applied toward these charges.

Students and student-designated proxies can view all activity posted to their Student Account in real time through the University’s online billing and payment system, YalePay (https://student-accounts.yale.edu/yalepay). At the beginning of each month, e-mail reminders to log in to YalePay to review the Student Account activity are sent to all students at their official Yale e-mail address and to all student-designated YalePay proxies. Payment is due by 4 p.m. Eastern Time on the first of the following month.
Yale does not mail paper bills or generate monthly statements. Students and their authorized proxies can generate their own account statements in YalePay in pdf form to print or save. The statements can be generated by term or for a date range and can be submitted to employers, 401K plans, 529/College Savings Plans, scholarship agencies, or other organizations for documentation of the charges.

Students can grant others proxy access to YalePay to view student account activity, set up payment plans, and make online payments. For more information, see Proxy Access and Authorization (http://sfas.yale.edu/proxy-access-and-authorization).

The Office of Student Financial Services will impose late fees of $125 per month (up to a total of $375 per term) if any part of the term bill, less Yale-administered loans and scholarships that have been applied for on a timely basis, is not paid when due. Students who have not paid their student account term charges by the due date will also be placed on Financial Hold. The hold will remain until the term charges have been paid in full. While on Financial Hold, the University will not fulfill requests for transcripts or provide diplomas and reserves the right to withhold registration or withdraw the student for financial reasons.

PAYMENT OPTIONS
There are a variety of options offered for making payments toward a student’s Student Account. Please note:

- All bills must be paid in U.S. currency.
- Yale does not accept credit or debit cards for Student Account payments.
- Payments should not be made to a Student Account that are in excess of the balance due (net of pending financial aid credits). Yale reserves the right to return any overpayments.

Online Payments through YalePay
Yale’s recommended method of payment is online through YalePay (https://student-accounts.yale.edu/yalepay). Online payments are easy and convenient and can be made by anyone with a U.S. checking or savings account. There is no charge to use this service. Bank information is password-protected and secure, and there is a printable confirmation receipt. Payments are immediately posted to the Student Account, which allows students to make payments 365/24/7 up to 4 p.m. Eastern Time on the due date of the bill, from any location, and avoid late fees.

For those who choose to pay by check, a remittance advice and mailing instructions are available on YalePay. Checks should be made payable to Yale University, in U.S. dollars, and drawn on a U.S. bank. To avoid late fees, please allow for adequate mailing time to ensure that payment is received by 4 p.m. Eastern Time on the due date.

Cash and check payments are also accepted at the Student Financial Services Cashier’s Office, located at 246 Church Street. The Cashier’s Office is open Monday through Friday from 8:30 a.m. to 4:30 p.m.

Yale University partners with Flywire, a leading provider of international payment solutions, to provide a fast and secure way to make international payments to a Student Account within YalePay. Students and authorized proxies can initiate international
payments from the Make Payment tab in YalePay by selecting “International Payment via Flywire” as the payment method, and then selecting the country from which payment will be made to see available payment methods. International payment via Flywire allows students and authorized proxies to save on bank fees and exchange rates, track the payment online from start to finish, and have access to 24/7 multilingual customer support. For more information on making international payments via Flywire, see International Payments Made Easy at https://student-accounts.yale.edu/sites/default/files/files/Yale%20International%20Payments%20-%20YalePay.pdf.

A processing charge of $25 will be assessed for payments rejected for any reason by the bank on which they were drawn. In addition, the following penalties may apply if a payment is rejected:

1. If the payment was for a term bill, late fees of $125 per month will be charged for the period the bill was unpaid, as noted above.
2. If the payment was for a term bill to permit registration, the student’s registration may be revoked.
3. If the payment was given to settle an unpaid balance in order to receive a diploma, the University may refer the account to an attorney for collection.

YALE PAYMENT PLAN

A Yale Payment Plan provides parents and students with the option to pay education expenses monthly. It is designed to relieve the pressure of lump-sum payments by allowing families to spread payments over a period of months without incurring any interest charges. Participation is optional and elected on a term basis. The cost to sign up is $50 per term.

Depending on the date of enrollment, students may be eligible for up to five installments for the fall and spring terms. Payment Plan installments will be automatically deducted on the 5th of each month from the bank account specified when enrolling in the plan. For enrollment deadlines and additional details concerning the Yale Payment Plan, see https://student-accounts.yale.edu/ypp.

BILL PAYMENT AND PENDING MILITARY BENEFITS

Yale will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other facilities, or the requirement that a student borrow additional funds, on any student because of the student’s inability to meet their financial obligations to the institution, when the delay is due to the delayed disbursement of funding from VA under chapter 31 or 33.

Yale will permit a student to attend or participate in their course of education during the period beginning on the date on which the student provides to Yale a certificate of eligibility for entitlement to educational assistance under chapter 31 or 33 and ending on the earlier of the following dates: (1) the date on which payment from VA is made to Yale; (2) ninety days after the date Yale certifies tuition and fees following the receipt of the certificate of eligibility.
Interruption or Temporary Suspension of University Services or Programs

Certain events that are beyond the University’s control may cause or require the interruption or temporary suspension of some or all services and programs customarily furnished by the University. These events include, but are not limited to, epidemics or other public health emergencies; storms, floods, earthquakes, or other natural disasters; war, terrorism, rioting, or other acts of violence; loss of power, water, or other utility services; and strikes, work stoppages, or job actions. In the face of such events, the University may, at its sole discretion, provide substitute services and programs or appropriate refunds. The decision to suspend services and programs shall be made at the sole discretion of the University.

Financial Aid for the Master’s Program

Students are admitted to degree programs without regard to their ability to pay. All full-time degree candidates are eligible for financial aid in the form of loans, scholarships, and employment. U.S. citizens must complete the Free Application for Federal Student Aid (FAFSA) online at https://fafsa.ed.gov. Graduate Entry Prespecialty Nursing applicants and R.N. applicants to the master’s program must complete the FAFSA by December 1, 2020. All continuing students in the master’s program must file for aid by February 1, 2021. Late applicants may not be eligible for maximum funding. All financial information and files are kept strictly confidential.

TYPES OF AID

Financial aid is awarded based on demonstrated financial need. U.S. citizens are awarded federal student loans, work-study, and scholarship according to federal regulations and school policy. The School offers the Federal Direct Unsubsidized Loan, Direct Graduate PLUS Loan, and Nursing Student Loan to the maximum eligibility the funds allow. International students are eligible for School scholarships and the International Student Loan, but not federal student loans. Part-time students are eligible for loans only.

School of Nursing scholarships are awarded to full-time students with demonstrated need beyond federal loans. The Yale School of Nursing also offers a limited number of merit- and mission-based scholarships to incoming students who demonstrate outstanding academic achievement, leadership capacity, and overall excellence, and/or a commitment to serving underserved populations in the field of nursing. These scholarships are awarded upon matriculation into the program and are renewed each year as long as students are enrolled full-time and maintain a cumulative grade point average (GPA) of 3.50 or higher. These scholarships are awarded in addition to the School’s need-based scholarships.

The Federal Direct Unsubsidized Loan for graduate students is available up to a limit of $20,500 per year. Students will be responsible for the interest payments on the loan while in school (the interest may be paid monthly or it may be capitalized, adding the accrued interest to the principal loan amount). The unsubsidized Direct Loan has a fixed interest rate and an origination fee. Borrowers receive a six-month grace period, which means that they do not have to begin repayment until six months
after they graduate or when their enrollment drops below half-time status. There are no payments due while enrolled in school, during the grace period, and during any approved deferments (e.g., attendance at graduate school). The standard repayment term is 120 months with a $50 minimum monthly payment.

Nursing Student Loans are awarded after Federal Direct to a limited number of students with demonstrated need. The loan is subsidized, interest rate is 5%, and students have ten years to repay.

The Direct Graduate PLUS Loan is a federal student loan with a fixed interest rate and an origination fee. A credit check is performed, but denial is only for adverse credit such as bankruptcy or default. Graduate students are eligible for any amount up to the Cost of Education minus other financial aid. Repayment can be deferred while the student is enrolled, but interest accrues from the date of disbursal.

Jobs are available to students working on faculty research and administrative support. Additional employment is available throughout the University campus. Visit the student employment website, www.yale.edu/seo, for on-campus job listings.

Students are encouraged to seek outside scholarships from their employer or alma mater, from organizations with which they are affiliated, and via website searches. A list of opportunities is available on the School’s website. Students must inform the YSN Financial Aid Office of any outside support, as awards may need to be revised. Revisions begin with loans, not scholarships, whenever possible.

Financial Support and Visa Process for International Students

International students are offered admission without regard to their ability to pay. International students seeking aid must complete the International Student Financial Aid Application available on the School’s website. Students demonstrating financial need are eligible for scholarships to cover a portion of their tuition.

U.S. immigration regulations require that the University have proof of full financial support before an I-20 can be issued. If additional family members are coming to the United States, financial support is required for their health insurance and living expenses as well. More information is available at Yale’s Office of International Students and Scholars website at https://oiss.yale.edu.
GENERAL INFORMATION

Housing

EDWARD S. HARKNESS MEMORIAL HALL

Harkness Hall, located adjacent to the School of Medicine and Yale New Haven Hospital, houses students from the Schools of Medicine, Nursing, and Public Health, the Physician Associate program, and other graduate and professional schools at Yale. Residents of Harkness Hall live in a secure building with single-occupancy bedrooms. Yale administrative offices occupy the first through third floors of the building. The great advantage of living in Harkness Hall is the opportunity to reside with students from the various medical-related fields in a relaxed social setting. Harkness is also located close to a Yale Shuttle stop, allowing students easy access to the YSN campus. For additional information visit https://housing.yale.edu.

YALE HOUSING OFFICE

The Yale Housing Office has dormitory and apartment units available for graduate and professional students. Dormitories are single-occupancy and two-bedroom units of varying sizes and prices. They are located across the campus, from Edward S. Harkness Memorial Hall, serving the medical campus, to Helen Hadley Hall and the newly built 272 Elm Street, serving the central/science campus. Unfurnished apartments consisting of efficiencies and one-, two-, and three-bedroom apartments for singles and families are also available. Family housing is available in Whitehall and Esplanade Apartments. The Housing website (https://housing.yale.edu) is the venue for graduate housing information and includes dates, procedures, facility descriptions, floor plans, and rates. Applications for the new academic year are available beginning April 20 and can be submitted directly from the website with a Yale NetID.

The Yale Housing Office also manages the Off Campus Living listing service (http://offcampusliving.yale.edu; 203.436.9756), which is the exclusive Yale service for providing off-campus rental and sales listings. This secure system allows members of the Yale community to search rental listings, review landlord/property ratings, and search for a roommate in the New Haven area. On-campus housing is limited, and members of the community should consider off-campus options. Yale University discourages the use of Craigslist and other third-party nonsecure websites for off-campus housing searches.

The Yale Housing Office is located in Helen Hadley Hall (HHH) at 420 Temple Street and is open from 9 a.m. to 4 p.m., Monday through Friday; 203.432.2167.

Dining

CAFÉ MED

Café Med, located in Harkness Hall at the School of Medicine, is open from 7:30 a.m. to 7 p.m., Monday through Friday. The menu enhances convenience and choice, with a customizable salad, soup, and rice bar utilizing local and seasonal ingredients; specialty coffees and fresh pastries; a grab-and-go selection of freshly made salads, sandwiches,
and entrées; and a daily hot food option. For additional information visit https://hospitality.yale.edu/retail/cafe-med.

**YALE WEST CAMPUS DINING**

Yale West Campus Dining is located on the first floor of the West Campus Conference Center. Breakfast (8–10:00 a.m.), lunch (11:30 a.m.–2 p.m.), and dinner (5–8 p.m.) are served daily, Monday through Friday. West Campus offers a unique dining plan, which costs $6 per meal and includes salad, bread, a hot entrée du jour, beverage, and dessert with the purchase of Eli Bucks. Anyone wishing to establish a West Campus dining plan should contact Yale Hospitality for initial set-up. Non-dining plan users pay $8 per meal.

**The Student Government Organization**

The Student Government Organization (SGO), open to all enrolled Nursing students, was formalized in 1969. The SGO mission statement was revised in 2000 to state: “The mission of the Yale School of Nursing Student Government Organization is to enhance the quality of life and education for the whole community by fostering student vision, leadership, advocacy, and action.” In recent years the SGO has focused on strengthening School-wide communication, providing social activities, and representing a student voice in policy making at YSN. The SGO is responsible for providing support to the class representatives and supporting outreach activities between graduate and professional schools at Yale and within the New Haven area.

Each spring the SGO elects officers for the next term of office, which is from April to April. General meetings are held monthly during the academic year, and all students are invited to attend. Students can contact their SGO Board representative by e-mailing ysn.studentgovernment@gmail.com.

**Awards**

Nominations are sought from the community for the following awards, and selections are made by the Commencement Awards Committee.

Annie Goodrich, founding Dean of Yale School of Nursing, was an outstanding nurse leader and educator whose vision set the course for nursing education. Each year, the students recognize an outstanding faculty member through the Annie Goodrich Award for excellence in teaching.

The Charles King, Jr., Memorial Scholars’ Aid Prize is awarded to a member of the graduating class who has demonstrated outstanding performance in scholarship, research, and clinical practice and who, through accomplishments and leadership, has inspired an admiration for professional work. Nominations are solicited from faculty and students.

The Milton and Anne Sidney Prize is awarded to a graduating student whose research, in the judgment of the faculty, best exemplifies the School’s commitment to clinical scholarship and its mission to contribute to better health care for all people. Nominations are solicited from faculty.
OFFICE OF DIVERSITY, EQUITY, AND INCLUSION

The Office of Diversity, Equity, and Inclusion (ODEI) at YSN works to actively enhance diversity through evidence-based methods of recruitment, career development, and retention focused on faculty, staff, and our student body to best reflect YSN’s mission. ODEI endeavors to increase representation and belonging of groups historically underrepresented in nursing and whose social identities are marginalized in the broader community. This includes those who identify as black, Latinx, Indigenous/First Nations, Alaska Natives, and Asian/Pacific Islanders. Men (cisgender and transgender inclusive) are also underrepresented in nursing. ODEI also offers counsel, support, and capacity-building activities for individuals who live experiences that are grounded in one or more identities that commonly operate as markers for exclusion, including but not limited to: sexual orientation (lesbian, gay, bisexual, queer), gender identity (non-cis or transgender), disability status, religion or spirituality, economic deprivation, educationally disadvantaged (e.g., first-generation college), and international students. ODEI facilitates the creation of “room at the center” for the voices of individuals from groups that have historically been kept at the fringes, by providing educational and skills-building programming opportunities that promote belonging among everyone in the YSN community.

The Yale School of Nursing has long been an innovator and leader in education, practice, and research. Faculty research covers a wide array of topics that encompass and address health disparities and well-being of underrepresented and vulnerable populations. ODEI directly contributes to YSN’s mission by guiding the School’s growth to increase and improve diversity while promoting equity and inclusion, thereby creating an environment that is reflective of the communities that we serve and supports the School’s overall mission. ODEI is also responsible for the implementation of bias, harassment, and mistreatment procedures for YSN. These procedures are administered by the director of diversity, equity, and inclusion with oversight from the associate dean for global health and equity.

Additionally, YSN dean’s designees—identified by the dean as YSN community members with the responsibility to receive student concerns and offer advice and guidance related to diversity and inclusion, discrimination and harassment, and equal opportunity—are available to support students and respond to student needs. For more information, please contact the YSN dean's designees: Heather Reynolds (heather.reynolds@yale.edu), YSN diversity, equity, and inclusion student coordinator; or Raven Rodriguez (raven.rodriguez@yale.edu), YSN director of diversity, equity, and inclusion.

For inquiries about ODEI, please contact Raven Rodriguez (raven.rodriguez@yale.edu).
Yale School of Nursing places students in more than three hundred clinical settings. The following highlights some of our major clinical partners.

Yale New Haven Health System

The combined facilities of the Yale School of Medicine, the Yale School of Nursing, the Yale School of Public Health, the Yale Child Study Center, the Yale New Haven Hospital, and the Smilow Cancer Hospital at Yale New Haven constitute the Yale New Haven Health System. The Connecticut Mental Health Center is closely affiliated with this complex. In affiliation with Yale University, and through delivery networks in Bridgeport and Greenwich, the larger Yale New Haven Health System provides comprehensive, cost-effective patient care; educates health professionals; and advances clinical care.

Yale School of Medicine

The Yale School of Medicine offers courses leading to the degree of Doctor of Medicine. In addition, there are programs for postdoctoral training in the basic medical sciences and the clinical disciplines. A Physician Associate program and a Physician Assistant Online program are also offered, which award a Master of Medical Science (Physician Associate) degree. Clinical facilities for instruction are available at Yale New Haven Health System, the Veterans Affairs Medical Center, and at various community hospitals in Connecticut with which the School is affiliated. The School of Medicine provides opportunity for students in nursing to extend their knowledge both through formal courses of study and informally through clinical conferences and rounds, where problems of patient care are discussed by doctors, nurses, and other health professionals. Dean, Nancy J. Brown, M.D.

Yale School of Public Health

The Yale School of Public Health (YSPH) provides leadership to protect and improve the health of the public through innovative research, policy analysis, and education that draw upon multidisciplinary scholarship from across the graduate and professional programs at Yale. In accordance with the School's mission and goals, YSPH serves local, national, and international communities by developing and demonstrating solutions to major public health problems and promoting leadership in public health, both at home and around the world. YSPH offers courses leading to the degree of Master of Public Health. Dean, Sten H. Vermund, M.D., Ph.D.

Yale Child Study Center

The Yale Child Study Center is an academic, clinical, and research center devoted to improving the understanding and treatment of children with psychiatric and developmental problems. The center functions as the Department of Child Psychiatry for the School of Medicine and Yale New Haven Hospital. It has three major missions: to increase knowledge about children from infancy through adolescence using systematic research, to educate professionals concerned with children’s development, and to provide clinical services to children with psychiatric and developmental
disorders and to their families. To achieve these goals, the center faculty and staff comprise professionals from the major disciplines concerned with children, including child and adolescent psychiatrists, psychologists, child psychiatric nurses, social workers, speech pathologists, educators, pediatricians, pediatric nurse practitioners, child psychoanalysts, geneticists, public health planners, and lawyers. Engaged in a broad range of research programs, educational activities, consultation, and service provision, these professionals educate the next generation of professionals for leadership roles throughout the United States and abroad.

The combined service, education, and research mission of the center fosters an environment in which students can further their interest in child development and contribute to the field of developmental psychology. Collaboration with the University occurs at both the graduate and undergraduate levels.

The Outpatient Clinic offers direct mental health services to children from birth to age eighteen at the Child Study Center and in school-based clinics in New Haven public schools. There are several specialty clinics that provide consultation for children with tic disorders, obsessive-compulsive disorders, and developmental disorders, and there is a psychopharmacology consultation service. The Outpatient Clinic provides school-based mental health services in inner-city schools and walk-in immediate-access service in the clinic. The Yale Children’s Psychiatric Inpatient Service, a collaborative program of Yale New Haven Hospital and the Child Study Center, provides inpatient and partial hospital care for children between the ages of four and fourteen. Community-based child and adolescent mental health services include the Family Support Service for vulnerable children and families; in-home psychiatric services; and the Child Development and Community Policing Program, a collaboration between the Child Study Center and the New Haven Department of Police Services to serve children exposed to violence and other trauma. Director, Linda C. Mayes, M.D.

YALE NEW HAVEN HOSPITAL

Founded in 1826 as Connecticut’s first and the nation’s fifth hospital, today Yale New Haven Hospital (YNHH), affiliated with Yale University Schools of Medicine, Nursing, and Public Health, ranks among the premier medical centers in the nation. The Yale New Haven Children’s Hospital, which opened in 1993, features new maternity facilities and the most comprehensive pediatric services between Boston and New York. Smilow Cancer Hospital at Yale New Haven—a partnership between YNHH, Yale School of Medicine, and the nationally designated Yale Cancer Center—opened in fall 2009 and consolidated the inpatient and outpatient cancer services into one facility. There are also eleven Smilow Cancer Hospital Care Centers at convenient locations throughout the region, delivering high-quality cancer care in the community.

Both an academic medical center hospital and a community hospital, Yale New Haven Hospital provides primary and specialized care in three inpatient pavilions and offers more than ninety medical and surgical specialty services, including anesthesiology, organ transplantation, cardiology, psychiatry, newborn special care, and geriatric assessment.

In September 2012, YNHH acquired the assets of the Hospital of Saint Raphael, located on Chapel Street in New Haven and now named Yale New Haven Hospital Saint Raphael Campus. This integration allows YNHH to provide the region with more
School of Nursing 2020–2021

coordinated, comprehensive care. The YSN Midwifery Service is located on the Saint Raphael Campus.

Yale New Haven Hospital is the primary clinical campus for the Yale School of Nursing. There are many joint appointments between the staff of the nursing service and the faculty of the nursing school who collaborate closely in the education of students and improvement of patient care. Yale New Haven Hospital’s commitment to excellence in nursing care attracts highly qualified nurses to its staff, many of whom serve as role models to the rest of the staff and nursing students who use the clinical facilities of the hospital. The hospital is also the flagship hospital of the Yale New Haven Health System, a fully integrated provider of comprehensive health care to individuals, families, and employees of large and small businesses. In addition, as a strong regional provider network, currently composed of Bridgeport, Connecticut; Greenwich, Connecticut; Westerly, Rhode Island; and Yale New Haven hospitals, the system includes relations with insurance companies, managed care companies, physician practices, and employers throughout the state. Chief Executive Officer, Marna P. Borgstrom, M.P.H.; President, Richard D’Aquila; Chief Nursing Executive, Beth Beckman, D.N.Sc.

NORTHEAST MEDICAL GROUP

Part of the Yale New Haven Health System, Northeast Medical Group is a not-for-profit multispecialty medical foundation established in 2010. It has more than 130 community practices in Connecticut, Rhode Island, and Westchester County, New York. Chief Executive Officer, Prathibha Varkey, M.B.B.S., M.P.H.

CONNECTICUT MENTAL HEALTH CENTER

The Connecticut Mental Health Center (CMHC) is an urban community mental health center, owned by the State of Connecticut and operated by the Department of Mental Health and Addiction Services in partnership with Yale University Department of Psychiatry. Founded in 1966, the CMHC has a long tradition of serving disadvantaged persons with serious illness from diverse cultural backgrounds. The center provides innovative services and solutions to challenging problems of patient care, drawing on research into the causes, treatment, and prevention of behavioral disorders.

CMHC treats individuals suffering from severe and persistent psychosis, depression, anxiety, and addictions (including alcoholism, cocaine, and gambling), as well as those with coexisting mental health and addiction problems. Several treatments in either an inpatient or an outpatient setting are available. Special clinics include the Hispanic Clinic (for Spanish-speaking individuals) and a clinic in West Haven that offers services to children and their families. The center also runs distinct outreach programs for individuals who are homeless, at risk for mental illness, or involved with the criminal justice system.

In addition, the center is committed to educating the next generation of behavioral health professionals, who will not only care for the seriously ill but also continue the missions of education and research into the nature and treatment of serious mental and addictive disorders.
The organization and activities of the Nursing Department reflect the integration of the clinical care and academic dimensions of nursing. This integration is achieved through joint appointments with faculty of the Yale School of Nursing.

Nurses practice in a range of patient care settings in the center, providing services to individuals, groups, and families, as well as attending to community-wide mental health concerns. Chief Executive Officer, Michael Sernyak, M.D.; Director of Nursing, Anjana Sharma, R.N.

Other Clinical Resources

COMMUNITY HEALTH CENTER, INC.

Community Health Center, Inc., is a private, nonprofit health care provider in the state of Connecticut, providing comprehensive primary care services in medicine, dentistry, and behavioral health to more than 145,000 people. CHC incorporates prevention and health promotion, treatment of illness, and management of chronic disease—often all during the same visit. Using innovative service delivery models and state-of-the-art technology, CHC goes beyond traditional health services to bring care to the places it is most needed and most impactful. Founder, President, and Chief Executive Officer, Mark Masselli; Senior Vice President and Clinical Director, Margaret Flinter, Ph.D., A.P.R.N.

CONNECTICUT HOSPICE

The Connecticut Hospice offers a specialized health care program for terminally ill patients (adults and children) and their families. The combination of medical, emotional, and psychosocial patient/family needs is met by the coordinated care of members of several disciplines: physicians (including a psychiatrist); nurses; social workers; clergy; pharmacists; financial adviser; arts, bereavement, and dietary consultants; and both professional and lay volunteers. The caregiving team is available to patients and families in the Home Care and Inpatient programs. Hospice includes family members in the unit of care to help them through the time of illness and bereavement. Hospice Home Care Services are available in Fairfield, New Haven, Middlesex, and Hartford counties; inpatient care is available for all state residents at the Connecticut Hospice in Branford. Any physician from the state may refer a patient for inpatient care or home care services. The Connecticut Hospice is a clinical model for national replication, and the John D. Thompson Hospice Institute for Education, Training, and Research is a national education center for health professionals from all disciplines.

CORNELL SCOTT-HILL HEALTH CENTER

Cornell Scott-Hill Health Center, established in 1968, is a community-oriented family health service that provides comprehensive care to the people in the New Haven area. The center also operates four satellite clinics: Dixwell Health Center, which specifically serves the Dixwell, Newhallville, and West Rock areas; Women’s Health Services; the West Haven Health Center; and the Community Health Connection in Ansonia, serving the Lower Naugatuck Valley.

The center’s programs are supported by federal grants, patient fees, third-party payments, private donations, foundation grants, and contracts-for-service.
There is emphasis on the total family health needs with comprehensive medical, dental, psychosocial, nursing, and other ancillary services provided by a team composed of professionals and community residents trained as health workers. The intent is to allow the health professional to deal more efficiently and effectively with the health care needs of the people to be served. Programs include the Young Parents Outreach Program; school-based clinics at five elementary and middle schools; a homeless health care project, an AIDS outreach project, and a twenty-nine-bed medical detoxification center; a comprehensive perinatal care program; an outpatient drug and alcohol treatment program; a public housing primary care project; and a day treatment program for homeless substance abusers. Chief Executive Officer, Michael Taylor

FAIR HAVEN COMMUNITY HEALTH CENTER

Fair Haven Community Health Center is a community-initiated and community-controlled health center serving the predominantly ethnic neighborhood of Fair Haven. Developed along the lines of the free clinic model in 1971, the Fair Haven center strives to provide health care in a congenial and personalized setting to 10,000 patients through an interdisciplinary team of doctors, nurse practitioners, nurse-midwives, social service, and community health workers. This includes prenatal and family planning services, general medical and pediatric care, preventive health education, language translation, counseling, and community outreach. Center funding comes from patient fees and a variety of private, government, and third-party reimbursement sources. In addition to its main facility, the center operates a satellite for geriatric patients at an elderly housing complex and five school-based clinics. The Fair Haven Center is located in a health professional shortage area. Chief Executive Officer, Suzanne Lagarde, M.D., M.B.A., FACP

HARTFORD HEALTHCARE

Hartford HealthCare has cultivated a strong, unified culture of accountability and innovation. Its care-delivery system, serving 185 towns and cities, includes two tertiary-level teaching hospitals, an acute-care community teaching hospital, an acute-care hospital and trauma center, three community hospitals, the state’s most extensive behavioral health network, a large multispecialty physician group, a clinical care organization, a regional home care system, an array of senior care services, and a large physical therapy and rehabilitation network at more than 350 locations in Connecticut and Rhode Island. Hartford HealthCare’s unique, system-wide Institute Model offers a single, high standard of care in crucial specialties at hospital and ambulatory sites across Connecticut. The institutes include: Behavioral Health; Cancer; Heart and Vascular; Neuroscience; Orthopedics; and Urology. President and Chief Executive Officer, Jeffrey Flaks

PROHEALTH PHYSICIANS

Formed in 1997, ProHealth Physicians includes more than 360 primary care and specialty physicians and advanced practice clinicians, and offers a wide range of diagnostic and therapeutic services. Made up of community-based physician practices, ProHealth focuses on continuous improvement and ongoing expansion of clinical programs to support wellness and to prevent and treat chronic illnesses. With more than ninety locations throughout the state of Connecticut, its primary care providers
and specialists care for more than 360,000 people statewide. President and Chief Executive Officer, Benito A. Alvarez, M.D., M.B.A., J.D., FACHE

UNITED COMMUNITY AND FAMILY SERVICES, INC.

United Community and Family Services, Inc., a nonprofit health and human services agency, has been serving Eastern Connecticut since 1877. UCFS has three health centers, located in Norwich, Griswold, and Plainfield. Additionally, outpatient behavioral health offices are located in New London and Colchester. UCFS also has community-based behavioral health offices in Norwich, Willimantic, and Centerbrook. Eldercare services, including adult day services and a residential care facility, are located in Norwich. As a federally qualified health center since 2015, UCFS offers services to all, regardless of ability to pay, with an income-based, sliding fee scale. President and Chief Executive Officer, Jennifer Granger

VETERANS AFFAIRS CONNECTICUT HEALTHCARE SYSTEM

The Veterans Affairs Connecticut Healthcare System is one of the outstanding Veterans Affairs (VA) Medical Centers nationwide with quality clinical services and innovative research programs. The two VA hospitals (West Haven and Newington) merged in 1995 to form VA Connecticut Healthcare System. Several VA Connecticut specialized programs are recognized nationally and regionally. These include the Eastern Blind Rehabilitation Service, one of four national programs providing extensive rehabilitation services to blind veterans enabling them to gain and maintain their independence. The Positron Emission Tomography (PET) Center is a joint project with Yale School of Medicine, and Single-Photon Emission Computerized Tomography (SPECT) provides state-of-the-art imaging for medical care and research in biology, psychiatry, cardiology, and oncology. VA Connecticut also encompasses the Geriatric Rehabilitation Extended Care Service, Substance Abuse Treatment Program, National Centers for Post-Traumatic Stress Disorder, Alcoholism Research, Schizophrenia Research, and a comprehensive cancer center. Additionally, clinical services include epilepsy treatment, cardiac rehabilitation, cardiac surgery, geriatric evaluation, respite care, and home-based primary care. Currently, VA Connecticut is a leader nationally in the application of home telemonitoring of patients in the home-based primary care program. VA Connecticut operates an Ambulatory Care Center at the West Haven campus and the Ambulatory Care Center of Excellence at the Newington campus. There are six community-based outpatient clinics located in Danbury, New London, Stamford, Waterbury, Willimantic, and Winsted. Director, Alfred A. Montoya, Jr., M.H.A., FACHE, VHA-CM
A Global University

Global engagement is core to Yale's mission as one of the world’s great universities. Yale aspires to:

- Be the university that best prepares students for global citizenship and leadership
- Be a worldwide research leader on matters of global import
- Be the university with the most effective global networks

Yale’s engagement beyond the United States dates from its earliest years. The University remains committed to attracting the best and brightest from around the world by offering generous international financial aid packages, conducting programs that introduce and acclimate international students to Yale, and fostering a vibrant campus community.

Yale’s globalization is guided by the vice president for global strategy, who is responsible for ensuring that Yale’s broader global initiatives serve its academic goals and priorities, and for enhancing Yale’s international presence as a leader in liberal arts education and as a world-class research institution. The vice president works closely with academic colleagues in all of the University’s schools and provides support and strategic guidance to the many international programs and activities undertaken by Yale faculty, students, and staff.

Teaching and research at Yale benefit from the many collaborations underway with the University’s international partners and the global networks forged by Yale across the globe. International activities across all Yale schools include curricular initiatives that enrich classroom experiences from in-depth study of a particular country to broader comparative studies; faculty research and practice on matters of international importance; the development of online courses and expansion of distance learning; and the many fellowships, internships, and opportunities for international collaborative research projects on campus and abroad. Together these efforts serve to enhance Yale’s global educational impact and are encompassed in the University’s global strategy.

The Office of International Affairs (https://world.yale.edu/oia) provides administrative support for the international activities of all schools, departments, centers, and organizations at Yale; promotes Yale and its faculty to international audiences; and works to increase the visibility of Yale’s international activities around the globe.

The Office of International Students and Scholars (https://oiss.yale.edu) hosts orientation programs and social activities for the University’s international community and is a resource for international students and scholars on immigration matters and other aspects of acclimating to life at Yale.
The Yale Alumni Association (https://alumni.yale.edu) provides a channel for communication between the alumni and the University and supports alumni organizations and programs around the world.

Additional information may be found on the “Yale and the World” website (https://world.yale.edu), including resources for those conducting international activities abroad and links to international initiatives across the University.

Libraries

The Harvey Cushing/John Hay Whitney Medical Library provides a comprehensive collection of clinical reference tools, databases, evidence-based practice resources, image collections, educational software, and books and journals in support of programs in medicine, nursing, public health, physician associates, bioinformatics, and the basic sciences. A small print collection is housed at the School of Nursing, allowing students access to health care information related to courses as well as other health-related information sources. EliExpress (Yale Library’s delivery service) transports library books daily among the libraries on central campus and to the School of Nursing at West Campus.

The Nursing Resources website is the gateway to an online collection of clinical reference tools, databases, evidence-based practice resources, and electronic books and journals. In addition to these online resources, students have access to the library’s rich collection of resources including books, images, educational software, and a large unique collection of rare medical books, medical prints, photographs, and memorabilia.

All Yale University students have off-campus access to all electronic resources including electronic books, journals, and databases. Librarians work to create seamless access to full-text electronic resources. Remote access is available throughout the School of Nursing, the Medical Library, and across the University. The library also lends laptops to students in the Schools of Medicine, Nursing, and Public Health.

The School of Nursing librarian spends time both at the School and in the Medical Library. Librarians provide reference assistance and in-depth consultation, conduct tours, teach classes, acquire and organize the collection, lend materials, and provide a scan and deliver service.

The Medical Historical Library contains one of the world’s finest collections of rare medical books, journals, prints, posters, drawings, and photographs, as well as current works in the history of medicine. There are 325 medical incunabula, more than seventy-five manuscript volumes from the twelfth through sixteenth century, and one of the best study collections of weights and measures in the world. Special strengths in the collection are the works of Hippocrates, Galen, Vesalius, Boyle, Harvey, Culpeper, Haller, Priestley, and S. Weir Mitchell, and works on anatomy, anesthesia, and smallpox inoculation and vaccination. The Library also owns an extensive smoking and tobacco advertising collection, and the Robert Bogdan collection of disability photographs and postcards. In addition, an outstanding selection of photographs, posters, and other images is available in the Cushing/Whitney Medical Library Digitized Collections.

The Cushing Center houses a unique collection of materials once owned by Dr. Harvey Cushing. A neurosurgeon and pioneer of brain surgery, Dr. Cushing was also an
enthusiastic collector. The center is the home of the Harvey Cushing Brain Tumor Registry, which contains approximately six hundred brain specimens, glass-plate negatives, and accompanying patient files from the early twentieth century. The space also displays a portion of his rich collection of rare books, part of the Medical Historical Library's collections.

Sterling Memorial Library, Yale’s main library and the largest library on campus, houses more than four million volumes and serves as the center of the library system. Other libraries in the Yale University Library system include the Beinecke Rare Book and Manuscript Library, the Anne T. and Robert M. Bass Library, the Center for Science and Social Science Information (CSSSI), the Law Library, and the Divinity Library. All libraries are open to students for study purposes.

Health Services

The Yale Health Center is located on campus at 55 Lock Street. The center is home to Yale Health, a not-for-profit, physician-led health coverage option that offers a wide variety of health care services for students and other members of the Yale community. Services include student health, gynecology, mental health, pediatrics, pharmacy, blood draw, radiology, a seventeen-bed inpatient care unit, a round-the-clock acute care clinic, and specialty services such as allergy, dermatology, orthopedics, and a travel clinic. Yale Health coordinates and provides payment for the services provided at the Yale Health Center, as well as for emergency treatment, off-site specialty services, inpatient hospital care, and other ancillary services. Yale Health’s services are detailed in the Yale Health Student Handbook, available through the Yale Health Member Services Department, 203.432.0246, or online at https://yalehealth.yale.edu/coverage/student-coverage.

Eligibility for Services

All full-time Yale degree-candidate students who are paying at least half tuition are enrolled automatically for Yale Health Basic Coverage. Yale Health Basic Coverage is offered at no charge and includes preventive health and medical services in the departments of Student Health, Gynecology, Student Wellness, and Mental Health & Counseling. In addition, treatment for urgent medical problems can be obtained twenty-four hours a day through Acute Care.

Students on leave of absence or on extended study and paying less than half tuition are not eligible for Yale Health Basic Coverage but may enroll in Yale Health Student Affiliate Coverage. Students enrolled in the Division of Special Registration as nondegree special students or visiting scholars are not eligible for Yale Health Basic Coverage but may enroll in the Yale Health Billed Associates Plan and pay a monthly fee. Associates must register for a minimum of one term within the first thirty days of affiliation with the University.

Students not eligible for Yale Health Basic Coverage may also use the services on a fee-for-service basis. Students who wish to be seen fee-for-service must register with the Member Services Department. Enrollment applications for the Yale Health Student Affiliate Coverage, Billed Associates Plan, or Fee-for-Service Program are available from the Member Services Department.
All students who purchase Yale Health Hospitalization/Specialty Coverage (see below) are welcome to use specialty and ancillary services at Yale Health Center. Upon referral, Yale Health will cover the cost of specialty and ancillary services for these students. Students with an alternate insurance plan should seek specialty services from a provider who accepts their alternate insurance.

HEALTH COVERAGE ENROLLMENT

The University also requires all students eligible for Yale Health Basic Coverage to have adequate hospital insurance coverage. Students may choose Yale Health Hospitalization/Specialty Coverage or elect to waive the plan if they have other hospitalization coverage, such as coverage through a spouse or parent. The waiver must be renewed annually, and it is the student’s responsibility to confirm receipt of the waiver by the University’s deadlines noted below.

Yale Health Hospitalization/Specialty Coverage

For a detailed explanation of this plan, which includes coverage for prescriptions, see the Yale Health Student Handbook, available online at https://yalehealth.yale.edu/coverage/student-coverage.

Students are automatically enrolled and charged a fee each term on their Student Financial Services bill for Yale Health Hospitalization/Specialty Coverage. Students with no break in coverage who are enrolled during both the fall and spring terms are billed each term and are covered from August 1 through July 31. For students entering Yale for the first time, readmitted students, and students returning from a leave of absence who have not been covered during their leave, Yale Health Hospitalization/Specialty Coverage begins on the day the dormitories officially open. A student who is enrolled for the fall term only is covered for services through January 31; a student enrolled for the spring term only is covered for services through July 31.

Waiving Yale Health Hospitalization/Specialty Coverage Students are permitted to waive Yale Health Hospitalization/Specialty Coverage by completing an online waiver form at https://yhpstudentwaiver.yale.edu that demonstrates proof of alternate coverage. It is the student’s responsibility to report any changes in alternate insurance coverage to the Member Services Department within thirty days. Students are encouraged to review their present coverage and compare its benefits to those available under Yale Health. The waiver form must be filed annually and must be received by September 15 for the full year or fall term or by January 31 for the spring term only.

Revoking the waiver Students who waive Yale Health Hospitalization/Specialty Coverage but later wish to be covered must complete and send a form voiding their waiver to the Member Services Department by September 15 for the full year or fall term, or by January 31 for the spring term only. Students who wish to revoke their waiver during the term may do so, provided they show proof of loss of the alternate insurance plan and enroll within thirty days of the loss of this coverage. Yale Health fees will not be prorated.

Yale Health Student Dependent Plans

A student may enroll the student’s lawfully married spouse or civil union partner and/or legally dependent child(ren) under the age of twenty-six in one of three student
dependent plans: Student + Spouse, Student + Child/Children, or Student Family Plan. These plans include services described in both Yale Health Basic Coverage and Yale Health Hospitalization/Specialty Coverage. Coverage is not automatic, and enrollment is by application. Applications are available from the Member Services Department or can be downloaded from the website (https://yalehealth.yale.edu/resources/forms) and must be renewed annually. Applications must be received by September 15 for full-year or fall-term coverage, or by January 31 for spring-term coverage only.

Yale Health Student Affiliate Coverage

Students on leave of absence or extended study, students paying less than half tuition, students enrolled in the EMBA program, students enrolled in the PA Online program, or students enrolled in the Eli Whitney Program prior to September 2007 may enroll in Yale Health Student Affiliate Coverage, which includes services described in both Yale Health Basic and Yale Health Hospitalization/Specialty Coverage. Applications are available from the Member Services Department or can be downloaded from the website (https://yalehealth.yale.edu/resources/forms) and must be received by September 15 for full-year or fall-term coverage, or by January 31 for spring-term coverage only.

ELIGIBILITY CHANGES

Withdrawal A student who withdraws from the University during the first fifteen days of the term will be refunded the fee paid for Yale Health Hospitalization/Specialty Coverage. The student will not be eligible for any Yale Health benefits, and the student’s Yale Health membership will be terminated retroactive to the beginning of the term. The medical record will be reviewed, and any services rendered and/or claims paid will be billed to the student on a fee-for-service basis. Assistance with identifying and locating alternative sources of medical care may be available from the Care Management Department at Yale Health. At all other times, a student who withdraws from the University will be covered by Yale Health for thirty days following the date of withdrawal. Fees will not be prorated or refunded. Students who withdraw are not eligible to enroll in Yale Health Student Affiliate Coverage. Regardless of enrollment in Yale Health Hospitalization/Specialty Coverage, students who withdraw will have access to services available under Yale Health Basic Coverage (including Student Health, Athletic Medicine, Mental Health & Counseling, and Care Management) during these thirty days to the extent necessary for a coordinated transition of care.

Leaves of absence Students who are granted a leave of absence are eligible to purchase Yale Health Student Affiliate Coverage for the term(s) of the leave. If the leave occurs on or before the first day of classes, Yale Health Hospitalization/Specialty Coverage will end retroactive to the start of the coverage period for the term. If the leave occurs anytime after the first day of classes, Yale Health Hospitalization/Specialty Coverage will end on the day the registrar is notified of the leave. In either case, students may enroll in Yale Health Student Affiliate Coverage. Students must enroll in Affiliate Coverage prior to the beginning of the term unless the registrar is notified after the first day of classes, in which case, the coverage must be purchased within thirty days of the date the registrar was notified. Fees paid for Yale Health Hospitalization/Specialty Coverage will be applied toward the cost of Affiliate Coverage. Coverage is not
automatic, and enrollment forms are available at the Member Services Department or can be downloaded from the website (https://yalehealth.yale.edu/resources/forms). Fees will not be prorated or refunded.

**Extended study or reduced tuition** Students who are granted extended study status or pay less than half tuition are not eligible for Yale Health Hospitalization/Specialty Coverage. They may purchase Yale Health Student Affiliate Coverage during the term(s) of extended study. This plan includes services described in both Yale Health Basic and Yale Health Hospitalization/Specialty Coverage. Coverage is not automatic, and enrollment forms are available at the Member Services Department or can be downloaded from the website (https://yalehealth.yale.edu/resources/forms). Students must complete an enrollment application for the plan prior to September 15 for the full year or fall term, or by January 31 for the spring term only.

For a full description of the services and benefits provided by Yale Health, please refer to the *Yale Health Student Handbook*, available from the Member Services Department, 203.432.0246, 55 Lock Street, PO Box 208237, New Haven CT 06520-8237.

**REQUIRED IMMUNIZATIONS**

Proof of vaccination is a pre-entrance requirement determined by the Connecticut State Department of Public Health. Students who are not compliant with this state regulation will not be permitted to register for classes or move into the dormitories for the fall term, 2020. Please access the Incoming Student Vaccination Record form for health professions students at https://yalehealth.yale.edu/new-school-medicine-school-nursing-and-pa-program-student-forms. Connecticut state regulation requires that this form be completed and signed, for each student, by a physician, nurse practitioner, or physician’s assistant. The form must be completed, independent of any and all health insurance elections or coverage chosen. Once the form has been completed, the information must be entered into the Yale Medicat online system (available after June 20), and all supporting documents must be uploaded to http://yale.medicatconnect.com. The final deadline is August 1.

**Measles, mumps, rubella, and varicella** All students who were born after January 1, 1957, are required to provide proof of immunization against measles (rubella), mumps, German measles (rubella), and varicella. Connecticut state regulation requires two doses of measles vaccine, two doses of mumps vaccine, two doses of rubella vaccine, and two doses of varicella vaccine. The first dose must have been given on or after January 1, 1980, and after the student’s first birthday; the second dose must have been given at least thirty (30) days after the first dose. If dates of vaccination are not available, titer results (blood test) demonstrating immunity may be substituted for proof of vaccination. The cost for all vaccinations and/or titers rests with the student, as these vaccinations are considered to be a pre-entrance requirement by the Connecticut State Department of Public Health. Students who are not compliant with this state regulation will not be permitted to register for classes or move into the dormitories for the fall term, 2020.

**Quadrivalent meningitis** All students living in on-campus dormitory facilities must be vaccinated against meningitis. The only vaccines that will be accepted in satisfaction of the meningitis vaccination requirement are ACWY Vax, Mencevo, Nimenrix, Menactra, Mencevax, and Menomune. The vaccine must have been given within five years of the
first day of classes at Yale. Students who are not compliant with this state regulation will not be permitted to register for classes or move into the dormitories for the fall term, 2020. The cost for all vaccinations and/or titers rests with the student, as these vaccinations are considered to be a pre-entrance requirement by the Connecticut State Department of Public Health. Please note that the State of Connecticut does not require this vaccine for students who intend to reside off campus and are over the age of twenty-nine.

**TB screening** The University requires tuberculosis screening for all incoming health professions students. For students in the School of Nursing, this entails providing proof of a PPD or Quantiferon testing done within six months of the start of the fall term. A chest X-ray is required only for individuals known to have previously positive PPD or Quantiferon results.

**Hepatitis B** In addition, all health professions students are required to provide documentation of three Hepatitis B vaccinations and the laboratory report from a Quantitative Hepatitis B Surface Ab titer with the result as a numeric value listed. In the event that the titer result is determined to be negative, one vaccine is required, followed by a repeat titer thirty days later. If the second titer result is positive, this requirement is complete. If the second titer result is still negative, then the additional two vaccines are required, followed by a repeat titer thirty days after the final vaccine.

**Tdap** In addition, all health professions students must show evidence that they have received a tetanus-diphtheria-pertussis booster within the past ten years.

Any students who will be traveling abroad should make an appointment for a travel health consultation at least six to eight weeks prior to departure. Travel health consultations are available through the Student Health Department at Yale Health and other locations in the New Haven area listed on the Student Travel website. Travel health services are not a covered benefit. Students will be charged for travel consultations, medications, and travel immunizations at Yale Health and all other locations. Additional information is available at https://yalehealth.yale.edu/more/travel-health-services-students. It is especially important that students notify the Travel clinician of travel activities that include working in areas where they might encounter blood or fluid exposure. Such students will be given a supply of antiretroviral medication at no charge. They will also receive instructions about how to handle possible exposure.

**Student Accessibility Services**

Student Accessibility Services (SAS) facilitates accommodations for all Yale students with disabilities who choose to register with the office. Registration with SAS is confidential. SAS helps arrange academic, transportation, dietary, and housing accommodations across campus. To qualify as a student with a disability, supporting documentation must be provided. The required first step for a student with a disability is completion of the registration form, which will initiate the process of obtaining disability-related accommodations; see https://yale-accommodate.symplicity.com/public_accommodation.

SAS works with students with temporary disabilities as well. At any time during a term, students with a newly diagnosed disability or recently sustained injury requiring
accommodations should register following the above instructions. More information can be found at https://sas.yale.edu, including instructions for requesting or renewing accommodations and the guidelines for supporting documentation. You can also reach us by phone at 203.432.2324.

Resources on Sexual Misconduct

Yale University is committed to maintaining and strengthening an educational, working, and living environment founded on civility and mutual respect. Sexual misconduct is antithetical to the standards and ideals of our community, and it is a violation of Yale policy and the disciplinary regulations of Yale College and the graduate and professional schools.

Sexual misconduct incorporates a range of behaviors including sexual assault, sexual harassment, intimate partner violence, stalking, voyeurism, and any other conduct of a sexual nature that is nonconsensual, or has the purpose or effect of threatening, intimidating, or coercing a person. Violations of Yale's Policy on Teacher-Student Consensual Relations also constitute sexual misconduct. Sexual activity requires consent, which is defined as positive, unambiguous, and voluntary agreement to engage in specific sexual activity throughout a sexual encounter.

Yale aims to eradicate sexual misconduct through education, training, clear policies, and serious consequences for violations of these policies. In addition to being subject to University disciplinary action, many forms of sexual misconduct are prohibited by Connecticut and federal law and may lead to civil liability or criminal prosecution.

Yale provides a range of services, resources, and mechanisms for victims of sexual misconduct. The options for undergraduate, graduate, and professional school students are described at https://smr.yale.edu.

SHARE: INFORMATION, ADVOCACY, AND SUPPORT

55 Lock Street, Lower Level
Office hours: 9 a.m.–5 p.m., M–F
24/7 hotline: 203.432.2000
https://sharecenter.yale.edu

SHARE, the Sexual Harassment and Assault Response and Education Center, has trained counselors available 24/7, including holidays. SHARE is available to members of the Yale community who wish to discuss any current or past experience of sexual misconduct involving themselves or someone they care about. SHARE services are confidential and can be anonymous if desired. SHARE can provide professional help with medical and health issues (including accompanying individuals to the hospital or the police), as well as ongoing counseling and support. SHARE works closely with the University-Wide Committee on Sexual Misconduct, the Title IX coordinators, the Yale Police Department, and other campus resources and can provide assistance with initiating a formal or informal complaint.

If you wish to make use of SHARE’s services, you can call the SHARE number (203.432.2000) at any time for a phone consultation or to set up an in-person appointment. You may also drop in on weekdays during regular business hours. Some legal and medical options are time-sensitive, so if you have experienced an
assault, we encourage you to call SHARE and/or the Yale Police as soon as possible. Counselors can talk with you over the telephone or meet you in person at Acute Care in the Yale Health Center or at the Yale New Haven Emergency Room. If it is not an acute situation and you would like to contact the SHARE staff during regular business hours, you can contact Jennifer Czincz, the director of SHARE (203.432.0310, jennifer.czincz@yale.edu), Anna Seidner (203.436.8217, anna.seidner@yale.edu), Cristy Cantu (203.432.2610, cristina.cantu@yale.edu), Freda Grant (203.436.0409, freda.grant@yale.edu), or John Criscuolo (203.645.3349, john.criscuolo@yale.edu).

**TITLE IX COORDINATORS**

203.432.6854  
Office hours: 9 a.m.–5 p.m., M–F  
https://provost.yale.edu/title-ix

Title IX of the Education Amendments of 1972 protects people from sex discrimination in educational programs and activities at institutions that receive federal financial assistance. Sex discrimination includes sexual harassment, sexual assault, and other forms of sexual misconduct. The University is committed to providing an environment free from discrimination on the basis of sex.

Yale College, the Graduate School of Arts and Sciences, and the professional schools have each designated a deputy Title IX coordinator, reporting to Stephanie Spangler, Deputy Provost for Health Affairs and Academic Integrity and the University Title IX Coordinator. Coordinators respond to and address specific complaints, provide information on and coordinate with the available resources, track and monitor incidents to identify patterns or systemic issues, deliver prevention and educational programming, and address issues relating to gender-based discrimination and sexual misconduct within their respective schools. Coordinators are knowledgeable about, and will provide information on, all options for complaint resolution, and can initiate institutional action when necessary. Discussions with a Title IX coordinator are confidential. In the case of imminent threat to an individual or the community, the coordinator may need to consult with other administrators or take action in the interest of safety. The coordinators also work closely with the SHARE Center, the University-Wide Committee on Sexual Misconduct, and the Yale Police Department.

**UNIVERSITY-WIDE COMMITTEE ON SEXUAL MISCONDUCT**

203.432.4449  
Office hours: 9 a.m.–5 p.m., M–F  
https://uwc.yale.edu

The University-Wide Committee on Sexual Misconduct (UWC) is an internal disciplinary board for complaints of sexual misconduct available to students, faculty, and staff across the University, as described in the committee’s procedures. The UWC provides an accessible, representative, and trained body to fairly and expeditiously address formal complaints of sexual misconduct. UWC members can answer inquiries about procedures and the University definition of sexual misconduct. The UWC is comprised of faculty, administrative, and student representatives from across the University. In UWC cases, investigations are conducted by professional, independent fact finders.
Yale Police Department
101 Ashmun Street
24/7 hotline: 203.432.4400
https://your.yale.edu/community/public-safety/police/sensitive-crimes-support

The Yale Police Department (YPD) operates 24/7 and is comprised of highly trained, professional officers. The YPD can provide information on available victims’ assistance services and also has the capacity to perform full criminal investigations. If you wish to speak with Sergeant Kristina Reech, the Sensitive Crimes & Support coordinator, she can be reached at 203.432.9547 during business hours or via e-mail at kristina.reech@yale.edu. Informational sessions are available with the Sensitive Crimes & Support coordinator to discuss safety planning, available options, etc. The YPD works closely with the New Haven State’s Attorney, the SHARE Center, the University’s Title IX coordinators, and various other departments within the University. Talking to the YPD does not commit you to submitting evidence or pressing charges; with few exceptions, all decisions about how to proceed are up to you.

General Resources

Keep up to date about campus news and events by subscribing to the Yale Today and/or Yale Best of the Week e-newsletters (https://news.yale.edu/subscribe-enewsletter), which feature stories, videos, and photos from YaleNews (http://news.yale.edu) and other campus websites. Also visit the Yale Calendar of Events (http://calendar.yale.edu) and the University’s Facebook, Twitter, Instagram, Tumblr, LinkedIn, and YouTube channels.

The Yale Peabody Museum of Natural History, founded in 1866, houses more than thirteen million specimens and objects in ten curatorial divisions: anthropology, botany, entomology, historical scientific instruments, invertebrate paleontology, invertebrate zoology, mineralogy and meteoritics, paleobotany, vertebrate paleontology, and vertebrate zoology. The renowned collections provide crucial keys to the history of Earth and its life-forms, and in some cases are the only remaining traces of animals, plants, and cultures that have disappeared. About 5,000 objects are on public display, including the original “type” specimens — first of its kind — of Brontosaurus, Stegosaurus, and Triceratops.

The Yale University Art Gallery was founded in 1832 as an art museum for Yale and the community. Today it is one of the largest museums in the country, holding more than 250,000 objects and welcoming visitors from around the world. The museum’s encyclopedic collection can engage every interest. Galleries showcase artworks from ancient times to the present, including vessels from Tang-dynasty China, early Italian paintings, textiles from Borneo, treasures of American art, masks from Western Africa, modern and contemporary art, ancient sculptures, masterworks by Degas, van Gogh, and Picasso, and more. Spanning one and a half city blocks, the museum features more than 4,000 works on display, multiple classrooms, a rooftop terrace, a sculpture garden, and dramatic views of New Haven and the Yale campus. The gallery’s mission is to encourage an understanding of art and its role in society through direct engagement with original works of art. Programs include exhibition tours, lectures,
and performances, all free and open to the public. For more information, please visit https://artgallery.yale.edu.

The Yale Center for British Art is a public art museum and research institute that houses the largest collection of British art outside the United Kingdom. Presented to the University by Paul Mellon (Yale College, Class of 1929), the collection reflects the development of British art and culture from the Elizabethan period to the present day. Free and open to all. Offers exhibitions and programs, including lectures, concerts, films, symposia, tours, and family events. For more information, please visit https://britishart.yale.edu.

There are more than eighty endowed lecture series held at Yale each year on subjects ranging from anatomy to theology, and including virtually all disciplines.

More than five hundred musical events take place at the University during the academic year. In addition to recitals by graduate students, the School of Music presents the Ellington Jazz Series, Faculty Artist Series, Horowitz Piano Series, New Music New Haven, Oneppo Chamber Music Series, and Yale in New York, as well as performances by the Yale Opera, Yale Philharmonia, Yale Choral Artists, and various YSM ensembles, along with concerts at the Yale Collection of Musical Instruments. The Norfolk Chamber Music Festival/Yale Summer School of Music presents the New Music Workshop and the Chamber Choir and Choral Conducting Workshop, in addition to the six-week Chamber Music Session. Many of these concerts stream live on the School’s website (https://music.yale.edu). Additionally, the School presents the Iseman Broadcasts of the Metropolitan Opera Live in HD free to members of the Yale community. Undergraduate organizations include the Yale Bands, Yale Glee Club, Yale Symphony Orchestra, and numerous other singing and instrumental groups. The Department of Music sponsors the Yale Collegium, Yale Baroque Opera Project, productions of new music and opera, and undergraduate recitals. The Institute of Sacred Music presents Great Organ Music at Yale, the Yale Camerata, the Yale Schola Cantorum, and many other special events.

For theatergoers, Yale and New Haven offer a wide range of dramatic productions at such venues as the University Theatre, Yale Repertory Theatre, Yale Cabaret, Yale Residential College Theaters, Off Broadway Theater, Iseman Theater, Whitney Humanities Center, Collective Consciousness Theatre, A Broken Umbrella Theatre, Elm Shakespeare Company, International Festival of Arts and Ideas, Long Wharf Theatre, and Shubert Performing Arts Center.

The Graduate and Professional Student Senate (GPSS or “Yale G&P Senate”) is composed of student-elected representatives from each of the thirteen graduate and professional schools at Yale. Any student enrolled in these schools is eligible to run for a senate seat during fall elections. As a governing body, the GPSS advocates for student concerns and advancement within Yale, represents all graduate and professional students to the outside world, and facilitates interaction and collaboration among the schools through social gatherings, academic or professional events, and community service. GPSS meetings occur on alternating Thursdays and are open to the entire graduate and professional school community, as well as representatives from the Yale administration. GPSS also oversees the management of the Graduate and Professional Student Center, located at 204 York Street. The center provides office and event space
for GPSS and other student organizations and houses Gryphon’s Pub. For more information, please visit https://gpsenate.yale.edu.

The religious and spiritual resources of the University serve all students, faculty, and staff of all faiths. These resources are coordinated and/or supported through the Chaplaincy (located on the lower level of Bingham Hall on Old Campus); the University Church in Yale in Battell Chapel, an open and affirming ecumenical Christian congregation; and Yale Religious Ministries, the on-campus association of professionals representing numerous faith traditions. This association includes the Saint Thomas More Catholic Chapel and Center at Yale and the Joseph Slifka Center for Jewish Life at Yale, and it supports Buddhist, Hindu, and Muslim life professionals; several Protestant denominational and nondenominational ministries; and student religious groups such as the Baha’i Association, the Yale Hindu Student Council, the Muslim Student Association, the Sikh Student Association, and many others. Hours for the Chaplain’s Office during the academic term are Monday through Thursday from 8:30 a.m. to 11 p.m., Friday from 8:30 a.m. to 5 p.m., and Sunday evenings from 5 to 11. Additional information is available at http://chaplain.yale.edu.

The Payne Whitney Gymnasium is one of the most elaborate and extensive indoor athletic facilities in the world. This complex includes the 3,100-seat John J. Lee Amphitheater, the site for varsity basketball, volleyball, and gymnastics competitions; the Robert J.H. Kiphuth Exhibition Pool; the Brady Squash Center, a world-class facility with fifteen international-style courts; the Adrian C. Israel Fitness Center, a state-of-the-art exercise and weight-training complex; the Brooks-Dwyer Varsity Strength and Conditioning Center; the Colonel William K. Lanman, Jr. Center, a 30,000-square-foot space for recreational/intramural play and varsity team practice; the Greenberg Brothers Track, an eighth-mile indoor jogging track; the David Paterson Golf Technology Center; and other rooms devoted to fencing, gymnastics, rowing, wrestling, martial arts, general exercise, and dance. Numerous group exercise classes in dance, martial arts, zumba, yoga, pilates, spinning, HIIT and cardio, and sport skills are offered throughout the year. Yale undergraduates and graduate and professional school students may use the gym at no charge throughout the year. Memberships at reasonable fees are available for faculty, employees, postdocs, visiting associates, alumni, and members of the New Haven community. Memberships are also available for spouses and children of all members. Additional information is available at https://sportsandrecreation.yale.edu.

During the year, various recreational opportunities are available at the David S. Ingalls Rink, the McNay Family Sailing Center in Branford, the Yale Outdoor Education Center in East Lyme, the Yale Tennis Complex, and the Yale Golf Course. All members of the Yale community and their guests may participate at each of these venues for a modest fee. Up-to-date information on programs, hours, and specific costs is available at https://sportsandrecreation.yale.edu.

Approximately fifty club sports are offered at Yale, organized by the Office of Club Sports and Outdoor Education. Most of the teams are for undergraduates, but a few are available to graduate and professional school students. Yale students, faculty, staff, and alumni may use the Yale Outdoor Education Center (OEC), which consists of 1,500 acres surrounding a mile-long lake in East Lyme, Connecticut. The facility includes overnight cabins and campsites, a pavilion and dining hall available for group
rental, and a waterfront area with supervised swimming, rowboats, canoes, stand-up paddleboards, and kayaks. Adjacent to the lake, a shaded picnic grove and gazebo are available to visitors. In a more remote area of the facility, hiking trails loop the north end of the property; trail maps and directions are available on-site at the field office. The OEC runs seven days a week from the third week of June through Labor Day. For more information, including mid-September weekend availability, call 203.432.2492 or visit https://sportsandrecreation.yale.edu.

Throughout the year, Yale graduate and professional school students have the opportunity to participate in numerous intramural sports activities, including volleyball, soccer, and softball in the fall; basketball and volleyball in the winter; softball, soccer, ultimate, and volleyball in the spring; and softball in the summer. With few exceptions, all academic-year graduate-professional student sports activities are scheduled on weekends, and most sports activities are open to competitive, recreational, and coeducational teams. More information is available from the Intramurals Office in Payne Whitney Gymnasium, 203.432.2487, or online at https://sportsandrecreation.yale.edu.

Office of International Students and Scholars

The Office of International Students and Scholars (OISS) coordinates services and support for Yale’s nearly 6,000 international students, faculty, staff, and their dependents. OISS staff assist with issues related to employment, immigration, and personal and cultural adjustment, as well as serve as a source of general information about living at Yale and in New Haven. As Yale University’s representative for immigration concerns, OISS helps students, faculty, and staff obtain and maintain legal nonimmigrant status in the United States. All international students and scholars must register with OISS as soon as they arrive at Yale; see http://oiss.yale.edu/coming-to-yale.

OISS programs, like daily English conversation groups, U.S. culture workshops and discussions, bus trips, and social events, provide an opportunity to meet members of Yale’s international community and become acquainted with the many resources of Yale University and New Haven. Spouses and partners of Yale students and scholars will want to get involved with the International Spouses and Partners at Yale (ISPY), which organizes a variety of programs.

The OISS website (http://oiss.yale.edu) provides useful information to students and scholars prior to and upon arrival in New Haven, as well as throughout their stay at Yale. International students, scholars, and their families and partners can connect with OISS and the Yale international community virtually through Facebook.

OISS is housed in the International Center for Yale Students and Scholars, which serves as a welcoming venue for students and scholars who want to peruse resource materials, check their e-mail, grab a cup of coffee, and meet up with a friend or colleague. Open until 9 p.m. on weekdays during the academic year, the center—located at 421 Temple Street, across the street from Helen Hadley Hall—also provides meeting space for student groups and a venue for events organized by both student groups and University departments. For more information about reserving space at the center, go to http://
For information about the center, visit http://oiss.yale.edu/about/international-center.
Alumni records show that those individuals who have completed graduate programs offered by the Yale School of Nursing are now located throughout the United States and in a number of foreign countries.

Recent graduates hold positions as chief nursing officers, administrative directors, nurse-midwives, nurse practitioners, and nurse managers, and other nurse advocacy, leadership, and research positions in a variety of settings. Their roles are being tested and defined as they function in new situations. Their responsibilities may include direct patient care, supervision and teaching of others involved in caring for patients served by their units or agencies, interdisciplinary planning, and execution and evaluation of services.

Many graduates from former years are now in administrative, teaching, policy, and/or research positions in educational institutions, foundations, or government.

A number hold positions as consultants in their specialty areas to public and private agencies at local, state, federal, and international levels.

Others have assumed responsibility for management of nursing services in both public and private institutions and agencies.
OFFICERS FOR THE YEAR ENDING JUNE 2020

**President**
Christa Hartch ’02 M.S.N.

**Secretary**
Maria Banevicius ’92 M.S.N.

**Board of Directors**
Fanta Bayoh ’18 M.S.N.
Stephan Davis ’16 D.N.P.
Kathryn Dzurilla ’18 M.S.N.
Julie Edwards ’17 M.S.N.
Laura Ippolito Bracale ’00 M.S.N., M.P.H.
Nancy Kraus ’78 M.S.N.
Elyssa Noce ’17 M.S.N.
Caroline R. Piselli ’15 D.N.P.
Elliott Race ’18 M.S.N.
Elizabeth Silvers ’19 M.S.N.

**Ex-Officio Members**
Bridget Cota ’09 M.S.N., Chairperson, Alumni Fund and Class Agents
Joanne Iennaco ’09 Ph.D., Faculty Representative
Ann Kurth ’90 M.S.N., Dean; Linda Koch Lorimer Professor
Charlyn Paradis, Program Manager, Office of Advancement

**YAA Delegates**

Elyssa Noce ’17 M.S.N.

**YAA Assembly Appointed At-Large Delegate**
Lydia Cristobal ’16 D.N.P.

**YAA Board of Directors Representative**
Elaine Gustafson ’86 M.S.N.
THE WORK OF YALE UNIVERSITY

The work of Yale University is carried on in the following schools:

**Yale College** Est. 1701. Courses in humanities, social sciences, natural sciences, mathematical and computer sciences, and engineering. Bachelor of Arts (B.A.), Bachelor of Science (B.S.).

For additional information, please visit https://admissions.yale.edu, e-mail student.questions@yale.edu, or call 203.432.9300. Postal correspondence should be directed to Office of Undergraduate Admissions, Yale University, PO Box 208234, New Haven CT 06520-8234.

**Graduate School of Arts and Sciences** Est. 1847. Courses for college graduates. Master of Advanced Study (M.A.S.), Master of Arts (M.A.), Master of Science (M.S.), Master of Philosophy (M.Phil.), Doctor of Philosophy (Ph.D.).

For additional information, please visit https://gsas.yale.edu, e-mail graduate.admissions@yale.edu, or call the Office of Graduate Admissions at 203.432.2771. Postal correspondence should be directed to Office of Graduate Admissions, Yale Graduate School of Arts and Sciences, PO Box 208236, New Haven CT 06520-8236.

**School of Medicine** Est. 1810. Courses for college graduates and students who have completed requisite training in approved institutions. Doctor of Medicine (M.D.). Postgraduate study in the basic sciences and clinical subjects. Five-year combined program leading to Doctor of Medicine and Master of Health Science (M.D./M.H.S.). Combined program with the Graduate School of Arts and Sciences leading to Doctor of Medicine and Doctor of Philosophy (M.D./Ph.D.). Master of Medical Science (M.M.Sc.) from the Physician Associate Program and the Physician Assistant Online Program.

For additional information, please visit https://medicine.yale.edu/education/admissions, e-mail medical.admissions@yale.edu, or call the Office of Admissions at 203.785.2643. Postal correspondence should be directed to Office of Admissions, Yale School of Medicine, 367 Cedar Street, New Haven CT 06510.

**Divinity School** Est. 1822. Courses for college graduates. Master of Divinity (M.Div.), Master of Arts in Religion (M.A.R.). Individuals with an M.Div. degree may apply for the program leading to the degree of Master of Sacred Theology (S.T.M.).

For additional information, please visit https://divinity.yale.edu, e-mail div.admissions@yale.edu, or call the Admissions Office at 203.432.5360. Postal correspondence should be directed to Admissions Office, Yale Divinity School, 409 Prospect Street, New Haven CT 06511.

**Law School** Est. 1824. Courses for college graduates. Juris Doctor (J.D.). For additional information, please visit https://law.yale.edu, e-mail admissions.law@yale.edu, or call the Admissions Office at 203.432.4995. Postal correspondence should be directed to Admissions Office, Yale Law School, PO Box 208215, New Haven CT 06520-8215.
Graduate Programs: Master of Laws (LL.M.), Doctor of the Science of Law (J.S.D.), Master of Studies in Law (M.S.L.), Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences. For additional information, please visit https://law.yale.edu, e-mail gradpro.law@yale.edu, or call the Graduate Programs Office at 203.432.1696. Postal correspondence should be directed to Graduate Programs, Yale Law School, PO Box 208215, New Haven CT 06520-8215.

**School of Engineering & Applied Science** Est. 1852. Courses for college graduates. Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please visit https://seas.yale.edu, e-mail grad.engineering@yale.edu, or call 203.432.4252. Postal correspondence should be directed to Office of Graduate Studies, Yale School of Engineering & Applied Science, PO Box 208292, New Haven CT 06520-8292.

**School of Art** Est. 1869. Professional courses for college and art school graduates. Master of Fine Arts (M.F.A.).

For additional information, please visit http://art.yale.edu, e-mail artschool.info@yale.edu, or call the Office of Academic Administration at 203.432.2600. Postal correspondence should be directed to Office of Academic Administration, Yale School of Art, PO Box 208339, New Haven CT 06520-8339.

For additional information, please visit https://music.yale.edu, e-mail gradmusic.admissions@yale.edu, or call the Office of Admissions at 203.432.4155. Postal correspondence should be directed to Yale School of Music, PO Box 208246, New Haven CT 06520-8246.

**School of the Environment** Est. 1900. Courses for college graduates. Master of Forestry (M.F.), Master of Forest Science (M.F.S.), Master of Environmental Science (M.E.Sc.), Master of Environmental Management (M.E.M.), Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please visit https://environment.yale.edu, e-mail fesinfo@yale.edu, or call the Office of Admissions at 800.825.0330. Postal correspondence should be directed to Office of Admissions, Yale School of the Environment, 195 Prospect Street, New Haven CT 06511.

**School of Public Health** Est. 1915. Courses for college graduates. Master of Public Health (M.P.H.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please visit https://publichealth.yale.edu, e-mail yspah.admissions@yale.edu, or call the Admissions Office at 203.785.2844.

**School of Architecture** Est. 1916. Courses for college graduates. Professional and post-professional degree: Master of Architecture (M.Arch.); nonprofessional degree: Master
of Environmental Design (M.E.D.). Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please visit https://www.architecture.yale.edu, e-mail gradarch.admissions@yale.edu, or call 203.432.2296. Postal correspondence should be directed to the Yale School of Architecture, PO Box 208242, New Haven CT 06520-8242.

School of Nursing Est. 1923. Courses for college graduates. Master of Science in Nursing (M.S.N.), Post Master’s Certificate, Doctor of Nursing Practice (D.N.P.). Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please visit https://nursing.yale.edu or call 203.785.2389. Postal correspondence should be directed to Yale School of Nursing, Yale University West Campus, PO Box 27399, West Haven CT 06516-0974.

For additional information, please visit https://drama.yale.edu, e-mail ysd.admissions@yale.edu, or call the Registrar/Admissions Office at 203.432.1507. Postal correspondence should be directed to Yale School of Drama, PO Box 208325, New Haven CT 06520-8325.

School of Management Est. 1976. Courses for college graduates. Master of Business Administration (M.B.A.), Master of Advanced Management (M.A.M.), Master of Management Studies (M.M.S.). Doctor of Philosophy (Ph.D.) awarded by the Graduate School of Arts and Sciences.

For additional information, please visit https://som.yale.edu. Postal correspondence should be directed to Yale School of Management, PO Box 208200, New Haven CT 06520-8200.
